It has been intimated that the assessing of duties on "American wholesale market prices" is in the nature of an emergency measure, that after the conditions change, which are asserted to make the adoption of the present plan necessary, the tariff can be changed also. If it were simply necessary to change the rates under the "American valuation" plan in accordance with changing economic conditions that would be a relatively easy matter, but it is our conviction that the effects of this plan in its present form, or in any form that has so far been advocated, will do such serious injury to American industry and our international commerce that the plan itself, if adopted, will very soon have to be materially modified or dropped entirely.

In view of the revolutionary change involved in the proposed new law and the complete disorganization of business that is bound to follow its introduction, the return to the well-tried foreign valuation principle, when it inevitably becomes necessary, will mean further complication and added loss. "American valuation" should not be attempted even on restricted lines, unless we are quite sure that it can be continued wherever it is resorted to or dropped without inconvenience.

That this plan will be exceedingly hard to apply, that the new rates, even after careful preparatory study, will remain disconcertingly doubtful in their effect is recognized by all officials actually familiar with the workings of our customs service. Secretary Hoover admitted these difficulties in their broader aspects in his testimony before the House Ways and Means Committee as early as May 3, 1921. He then testified that in view of the unstable currency and exchange situation he thought there was practically no alternative but "American valuation" as an emergency measure, and added:

"I do not think it would be at all advisable in any other circumstances. I would be glad, indeed, if some one could suggest a device that would be less troublesome to the trade and Government. Its administration will be very difficult. But I have seen no inspiration of a better method of a workable alternative that would meet the wide variation between economic levels and exchange levels."

Secretary Hoover in this carefully qualified manner indorsed "American valuation" purely as an emergency measure, and mistakenly, we think, appears to assume throughout his testimony that it is recommended generally by its advocates simply in order to meet the exceptional conditions described by him. These conditions, he himself admitted, were likely soon to correct themselves, as Germany could not long continue the direct and indirect subsidies to industry which he detailed, and he predicted that Germany would soon be forced, from economic necessity, to abandon these objectionable expedients. Secretary Hoover did not recommend the measure as a permanent policy, as other advocates of the change do, nor on the grounds they allege, namely, first, "because only through American valuation can undervaluation be avoided," and second, "because only through American valuation can we assess the same amount of duty against all countries alike, regardless of their cost of production."

As to the first: The actual amount of fraudulent undervaluation practiced under "ad valorem" duties has always been grossly exaggerated. In the course of years a mass of information has been accumulated on foreign values by our customs service, and appraisers and examiners have acquired remarkable skill in establishing actual dutiable values. Experienced Government officials assert that with an increase in the force of special Treasury agents abroad, fraudulent undervaluation would be made impossible.

As to the second: That neither the American producer nor the consumer can be benefited by imposing a uniform amount of duty on any commodity on which there is competition between different foreign countries in this market is perfectly clear. The country with the lowest manufacturing cost will necessarily still retain that natural advantage as compared with other competitors in this market; the high-cost countries may find their goods entirely excluded.

Can it be denied that the situation with regard to depreciated exchange is exactly parallel? Let us assume for a moment to be true the deliberately untruthful assertion that foreign prices are about the same now as they were before the war. Then the duty collected would really be less now than before the war, on account of the lower exchange rate, but it would still remain a fact that the same amount of duty assessed on the merchandise from a country with low exchange, as on similar goods from countries with less depreciated currencies, will leave undiminished the advantage to the country with the lowest exchange rate. The undeniable result will be unintended discrimination against the countries whose exchange rates are nearest to normal.

It is not true, however, that prices abroad are as low as they were before the war. They have, on the contrary, risen in inverse ratio to the decline of the exchange rates, and are to-day much higher in dollars than in 1914, as was conclusively demonstrated before the Senate Finance Committee, and can be verified at any time.

As exchange rates decline prices advance.

Since when there is no competition no emergency on account of foreign importations can exist, Secretary Hoover would probably indorse Special Agent Davis's suggested compromise, that "American valuation" be made to apply only when the Secretary of the Treasury or some other designated person or body has, after careful investigation, determined that the imported merchandise actually is "similar in material, quality, construction, and kind" to specific American goods, and in competition with them. Such investigation as to the facts is to be made upon request of the American interests claiming destructive competition. This limited adoption of "American valuation" would enable the administration to test the new measure gradually, and would not result in suddenly upsetting our well-tried customs practice and our entire international trade basis, which will place a grave responsibility upon those voting for this revolutionary measure—a measure condemned by leaders in trade and finance.

Is it true that "American valuation" is a specific remedy proposed to meet temporary conditions now prevailing? We do not think so. It is not at all a new proposal. It was urged repeatedly during our fiscal history, when there was no undue depreciation in foreign exchange rates and when there were no

unusual fluctuations of them, and probably by interests similar to those that are sponsoring the plan to-day.

Such a scheme was proposed to the Ways and Means Committee in 1908, then considering the revision of the tariff. It was again presented to the Ways and Means Committee as well as to the Senate Finance Committee during the tariff revision of 1913, and was further urged upon the Tariff Commission in 1917. What the advocates of the measure had then in mind was high protective duties in the guise of apparently low rates. In 1842 a sort of "port valuation" or a modified American-valuation plan became law for two months, but was quickly superseded by the act of August 30, 1842. Now, the experiment is to be repeated, although it is admitted that repeal may again become necessary. The harm done meanwhile will be very much more grave than in 1842, as our financial and trade situation has completely changed since then. We are to-day a creditor Nation, dependent upon interchange of products with all the world for our prosperity.

President Harding has said: "We can not hope to sell where we are not willing to buy."

Certain well-intentioned advocates of the new plan recommend it, not on account of the fraudulent undervaluations which it is alleged are excessive under the present system, but because the activities of some of our foreign special agents have been found objectionable by friendly governments. It is certainly desirable to prevent friction, but why apply a remedy which will hamper our entire foreign trade and probably provoke retaliation?

Our exporters have good reason to fear retaliation; it might take an unpalatable form, such as foreign countries making our wholesale American selling prices the dutiable value, a procedure to which, for obvious reasons, we could not object.

A scarcely disguised purpose of some of the interests that are so eager to have "American valuation" adopted is to maintain the dominating position gained by them during the war because of the virtual exclusion of foreign merchandise. Having enjoyed the privileges of monopoly, they hope to retain them by the proposed scheme, which conceals their real purpose under rates nominally lower than those now prevailing, but often outrageously excesssive.

Under "American valuation" duties will be collected on the importer's cost price plus duty, plus all transportation charges, plus his gross profit, and when the duty is assessed on the value of similar American goods, on the selling price of the American goods, including the manufacturers' gross profits. This domestic gross profit becomes an essential factor in the attempt to arrive at reasonable rates under the Fordney plan, and can not be disregarded. It is therefore a serious omission on the part of the Treasury Department that no provision has been made for ascertaining or recording domestic profits in the instructions to the customs agents, to whom it has assigned the exceedingly difficult task of securing data on American wholesale selling prices. The result is likely to be price advances far beyond what is necessary to protect American industries and labor.

The profits to the beneficiaries of the tariff may be greatly increased; living costs to American labor and all consumers certainly will be.

In themselves foreign and American valuation do not imply either low or high duties. In practice under the new plan it will be impossible, because of administrative difficulties, to adjust rates to the degree of protection sought, and they will tend to be excessive and even prohibitive. The present system is free from these objections.

The value of the emergency tariff to the farmer as a producer of agricultural products has been disputed, but that as a consumer he will have to pay high prices under the Fordney bill can not be denied.

When the rates of duty provided in the "ad valorem" schedules of the Fordney bill were established by the Ways and Means Committee the method apparently adopted was, in the great majority of cases, simply to add the former Payne-Aldrich rate to the foreign value, calling the result the American selling price, and finding what percentage the Payne-Aldrich rate was on the so-called selling price thus ascertained.

In other words, the foreign value plus duty only was considered the selling price, and the rate thus found is very much higher than if a proper allowance had been made for freight, insurance, general expenses, other incidentals, and profit. (See Appendix, Tables 1A and 1B.)

The entire inadequacy of this formula, the application of which has intentionally resulted in the excessive rates of the Fordney bill, is now frankly acknowledged by the Senate Finance Committee, and it is engaged in collecting data in an attempt to rectify them. In order to do so a reasonable percentage of gross profit will have to be adopted in correcting the above formula. This gross profit must be sufficient to cover all expenses of doing business in this country, of taxes, etc., besides a sufficient profit for the merchant.

In submitting data for the national council we have, for the sake of convenience, adopted a gross profit of 33⅓ per cent on the cost on all classes of exhibits, which is equivalent to 25 per cent gross on the selling price. For some classes of merchandise this gross percentage is entirely insufficient; for others it may be somewhat high. But it must be borne in mind that certain lines of goods, by reason of their character, have to be sold at a greater percentage of gross profit to cover hazardous business. The gross profits customary in the trade, dealing in the commodities covered by a schedule, must be allowed for when revising each individual schedule, otherwise unreasonable rates of duty must result.

To adopt a general average rate of gross profit for all schedules can not lead to scientific or fair rates. But even if a fair average percentage of profit was adopted for each individual schedule, derived from the gross profit usual in the trade dealing with the lines concerned, a further element, which is even more important in determining the percentage of the revised rates of duty, remains to be considered.

That element is the percentage of transportation costs on the cost of the goods. This percentage differs greatly as between classes of merchandise, and the many items coming under the same tariff schedule show wide variations in the percentages of transportation costs, according to value and bulk, increasing with the bulk and decreasing with the value. The percentage will be greatest when the bulk is greatest and the value least, and vice versa. On classes of goods, such as toys, the percentages of transportation expenses may vary from 2 per cent to more than 66⅔ per cent of costs.

Necessarily, therefore, to arrive at approximately reasonable rates under "American valuation," the same percentage of transportation cost can not be assumed for all schedules. In the calculation for each schedule due allowance must be made for a percentage of transportation cost usual on the class of goods coming under its provisions.

It is clear that the necessity of providing for these two important and fluctuating factors infinitely complicate the problem of finding reasonable rates of duty under this plan and makes scientific rates quite impossible.

In Table II (see Appendix) we show, for a series of Fordney rates of duty, the effect, expressed in percentages on foreign selling price, of varying percentages (from 5 per cent to 25 per cent) of landing expenses, assuming for convenience a uniform gross profit of 25 per cent on the importer's selling price. Taking 25 per cent as an illustrative rate of duty under the Fordney bill, the table shows that if the landing expenses on foreign value are 5 per cent, the equivalent percentage of duty on foreign cost as compared to 25 per cent Fordney duty on American selling price will be 52 per cent, while if the transportation expenses are 10 per cent it will be 55 per cent; while if the transportation expenses are 15 per cent it will be 58 per cent; while if the transportation expenses are 20 per cent it will be 60 per cent; while if the transportation expenses are 25 per cent it will be 62 per cent, thus indicating an advance of 10 per cent in the rate of the duty expressed on foreign cost as between transportation expenses of 5 per cent and 25 per cent. The higher the rate of duty under the Fordney bill the greater, of course, the corresponding differences as expressed in relation to the foreign cost. A 42 per cent duty under the Fordney bill on a 5 per cent landing expense basis is equivalent to 133 per cent duty on foreign cost; if the landing expense were 25 per cent, then 42 per cent Fordney rate would be equivalent to 159 per cent, or an advance of 26 per cent in the rate of duty, as a result of an advance in transportation expenses from 5 to 25 per cent. As under the lowest transportation percentage, the Fordney duty of 25 per cent results in a percentage of duty on foreign cost of 52 per cent, the effect of these concealed additional duties resulting from higher transportation costs, if not considered in establishing the rate under "American valuation," may be prohibitive.

In order to illustrate on a definite commodity the great variation due to transportation costs, we give in Table III (see Appendix) a characteristic series of toy exhibits, showing how, under "American valuation," a given rate of duty will result in enormous fluctuations in percentages of duty figured on foreign selling price on account of transportation cost differences alone.

The rate of duty under the Fordney bill is 40 per cent on toys, which is equivalent in percentage on the foreign cost to 125 per cent when the transportation expenses are 10 per cent of the selling price, and will be equivalent to 188 per cent when the transportation expenses are 64¼ per cent of the selling price.

This range of percentages is, of course, unexpected—it is at once disconcerting and ridiculous.

The effects of this new plan when duties are assessed on the "ad valorem" basis are objectionable, but when the schedules provide for so-called "compound duties"—"ad valorem" and specific duties together—and both apply on the same articles, the evils described are greatly exaggerated, particularly when the rate of the specific duty operates on a sliding scale of values, as is the case in the cutlery schedule and others. When a sliding scale of specific duties applies a small difference in the selling price may mean a disproportionate increase or decrease in the duty collected. The effect of this on the question of dutiable value is obvious.

Under section 402 absurdities are likely to occur whenever the schedules contain compound rates, as is the case in the examples cited below. According to section 402 the word "value" means the American wholesale selling price. This seems to have been entirely overlooked when these compound schedules were drawn.

Paragraph 354 provides that penknives, and so forth, valued at more than 50 cents per dozen—that is, selling in this country for, say, 51 cents per dozen—are to be assessed 5 cents each, which is equivalent to 60 cents per dozen, and in addition thereto 30 per cent on the American selling price of 51 cents equals 15 cents, a total duty of 75 cents on a knife supposed to sell for 51 cents per dozen. The result on knives over $1.25 and $3 per dozen is equally absurd. Paragraph 357, which provides for scissors, contains similar absurdities. So does paragraph 358 on razors.

Paragraph 365 provides that rifles valued at more than $5 apiece—that is, selling for, say, $5.01 apiece—are to be assessed $4 each, and in addition thereto 35 per cent on the American selling price of $5.01 equals $1.73, a total duty of $5.73 on a rifle supposed to sell at $5.01.

Paragraph 368 provides that clocks valued at more than $1.10 each—that is, selling for, say, $1.11 each—are to be assessed 70 cents each, and in addition thereto 35 per cent on the American selling price of $1.11 equals 38 cents, a total duty of $1.08 on a clock supposed to sell for $1.11.

Surely it is absurd to write schedules which make the duty greater than the selling price, of which it naturally can only be a part.

The plan to publish American wholesale prices on all commodities is a stupendous, and, except on staples, an impossible undertaking, though obviously essential to enable the importer to establish his dutiable values on imported articles of international commerce. It would, however, to the extent it is found feasible, distinctly tend to increase prices to the consumer.

Importers will be induced, when there is no similar American-made article, to make their selling prices agree with the American wholesale selling value of similar imported articles established as dutiable by the examiner whenever such similarity is found. Many imported lines will be so affected, for the great majority of them are imported for the very reason that they are not comparable with American goods; that they differ in some peculiar way. There is a natural desire among purchasers to seek the uncommon. This is not only true of women's wear and men's wear but of many other lines as well.

American manufacturers, on the other hand, will also naturally tend to adopt as their selling price the average selling price published by the Government whenever they discover that their own prices are below such figure. The result must be a legalized form of open-price agreements.

But the domestic manufacturer is likely to act on still another and less innocent possibility. It is a fact that when, as a result of "American valuation," the foreign article has to sell for more than the present wholesale selling price of the American article, domestic manufacturers can often force the import price up still further by advancing their own selling prices and so compelling the importers to pay higher duties while preserving their own competitive advantages under the Fordney bill. They can do so by advancing their prices to near a certain point which will bring about an equalization between the selling prices of the foreign and domestic article, which point will be at a level much above the normal market prices it was intended to protect.

As can be seen by referring to Table IV, this equalization point can readily be calculated by means of a simple formula. The price limit obtained will be reduced somewhat if the importer can either secure a lower price from the foreign manufacturer or can afford to reduce his profit. The probability of American manufacturers resorting to this method of advancing prices will be greatest in those lines which most readily lend themselves to domestic price agreements. That this danger was felt to be real from the first is obvious from the fact that in the earlier drafts formulating the new plan specific legal provision was made to prevent just such an undesirable development.

The illustrations on Table IV show that without losing the selling advantage secured under "American valuation" the domestic manufacturers can actually raise their prices considerably. They can not do so indefinitely, because if they advance their prices beyond the equalization point, they will thereafter expose themselves to being undersold by the importer in a progressively increasing degree. But they can pyramid up to fairly near that point.

These price increases which the domestic manufacturer can force upon the buying public will vary according to the rate of duty, the rate of gross profit, and the original difference in price, under the Fordney bill, between the imported article and the then American wholesale market price.

The undeniable and disquieting fact is that the converging tendency of "American valuation" and the Government action necessary to make even a limited application of it practicable will be toward general price stabilization, elimination of competition, and resulting high cost of living.

The promise:

"More business in Government and less Government in business" was generally acclaimed, yet the plea has been made for this new device that it will help to regulate retail prices. Our women, who do 92 per cent of all household shopping (and they now have the vote), will, it is supposed, gladly pay high prices for their family needs if only they can be sure that those prices have been regulated. But will regulation stop there? We know what "regulation" has done for our railroads. Do our basic industries long for a similar fate?

As it is, under section 402, our appraising officers will have extraordinary and hitherto unheard of discretionary powers, alarming in their scope, to manufacturers and merchants alike.

The difficulty of ascertaining foreign market values under our present system is deliberately exaggerated, while it has been assumed, quite without foundation, that wholesale market values in America can readily be ascertained, and the difficulty of establishing them has been systematically minimized. It seems to be thought that American goods of the same kind are usually sold at the same prices by different American makers, or at the same prices by the same maker, in the different cities of the Union. This is not true even in the same city. The same merchandise is often sold at different prices at the same time on account of competition, because of financial need, greater or less credit risk, freight conditions, interest rates, etc. The "quantity" to be designated as "a wholesale transaction" will depend upon the section of the country in which the sale takes place. What would be considered only a jobbing sale in one section may constitute a large wholesale transaction in another. Such differences are in every respect greater in the United States than they are in the several relatively small European countries we import from.

Unless the dutiable American wholesale selling price of American-made goods similar to the imported merchandise, when similarity and competition have been established, are to be promulgated by the Secretary of the Treasury in advance of importations, for which no provision whatever is made in the Fordney bill, all importers and dealers in imported merchandise must for many months confront a staggering uncertainty as to dutiable values, which can only result in greatly reduced imports and unfavorable economic effects generally.

Our foreign trade, export as well as import, will be paralyzed.

International trade is almost entirely transacted on an advance-order basis. Orders for export as well as for import are usually taken many months ahead of the delivery dates. It is essential, therefore, for manufacturers and merchants alike, when transacting international business, that they be able to estimate with reasonable accuracy what the goods are going to cost them. The more factors of uncertainty and the more elements of risk are eliminated in outgoing and incoming business the more extensive and profitable our world trade will become.

The proposed publication of extensive domestic trade reports on wholesale and retail prices must actually cover a large part of the infinite multitude of articles that enter commerce before these official wholesale prices can be of use for customs purposes to the merchants or customs officials. In fact, as these figures will be mostly out of date when published, their value for customs purposes is doubtful.

The Government is attempting a herculean task, perchance an impossible one. What, then, will the importer do? The vista of his difficulties is indeed discouraging. Dutiable values will never be settled. Litigation with the Government will be inevitable, frequent, and expensive.

Where the importer has so many real problems to solve imaginary ones should not pass unchallenged. It is not true that the importer must pyramid to arrive at his selling price under the Fordney bill. When there is no similar American article and the importer's own selling price is accepted as the dutiable value, this selling price can readily be found arithmetically without any necessity of pyramiding. A simple arithmetical calculation will give the selling price under the Fordney bill on noncomparable imported merchandise when it is not comparable either with other foreign importation and when the cost of transportation and other charges necessary to bring the goods from the foreign country to the United States are known.

In order to arrive at this arithmetically correct selling price under the Fordney bill, the importer can proceed as outlined in Table V.

When the importer's own American selling price is accepted as the dutiable value the application of domestic valuation is arithmetically simple. But what happens if the importer finds after he has paid duty that the selling price declared by him is either too high or too low? On staples the market conditions are usually fairly predictable, but on all other lines, including the many fancy and novelty items, the merchant can have no advance knowledge as to how his purchases are going to sell. If after paying duty on a declared selling price of a newly introduced article he finds within a month that this declared price was too low, can he then advance his selling price in the ordinary way of trade without exposing himself to the charge of undervaluation?

As the market never stands still and as it will be impossible for the Government to claim duty on the price realized on an entire importation, unless it is equally ready to make refunds for excessive duty paid if the price subsequently obtained is lower than the declared value of that entire importation, some period will have to be fixed wherein price changes will either entitle the Government to increased duties or entitle the importer to refunds of duty. This period evidently will have to be greater on seasonable goods than on merchandise less fluctuating in character. Clearly this has to be provided for in the law, and it is equally clear that undervaluation, fraudulent or otherwise, will in no sense be eliminated by "American valuation," which is one of the main claims made for it. It may in fact be said to open up new and greater possibilities of fraud.

Even when the importer's own selling price is the dutiable value, therefore, "domestic valuation" is not an easier or more exact method of assessing and collecting duty than is "foreign valuation," but a much more difficult and uncertain one.

"American" valuation, so called, is not direct, simple, or definite. It is, on the contrary, indirect, complicated, and indefinite; there is nothing to recommend it excepting the name "American."

Uncertainty, difficulty, and doubt will confront and confuse our legislators, customs officials, and merchants alike.

The difficulty of the importer will lie in his uncertainty as to what the appraiser may determine is the dutiable wholesale selling price of such imported merchandise generally in this country, if his own selling price is not accepted as the dutiable value, but that of other importers of similar merchandise.

This difficulty of establishing the dutiable wholesale selling price will be very much greater for the importer as well as the Government when similarity to American goods is found or assumed by the examiner, and the dutiable American wholesale market price must be declared.

This disturbing question as to whether or not there is American merchandise "similar in material, quality, construction, and kind" to the imported article, and what is its wholesale market price, is only one of the many stumbling blocks in the way of applying the new plan, even tentatively, but it is sufficient in itself to condemn it.

Whether American merchandise "similar in material, quality, construction, and kind" is found or not under section 402, the merchant in any case will have to make a prophetic guess when he orders goods as to what the dutiable wholesale value will be when they are actually shipped, because it is the date of exportation that governs the dutiable value.

During a time when business is depressed, financial conditions disturbed, when price fluctuations are sudden, and when it is often found that the price anticipated can not actually be realized, the gross unfairness to the merchant and the importer, of being compelled to guess at a probable dutiable selling price at the time he makes a contract, in order to calculate his duty, is obvious. If too high, this may prevent the importation of the merchandise entirely; but in any case the consumer will have to pay more than he would under the present plan.

As importing will be subjected to so many added hazards it is to be feared that the smaller and financially weaker houses will have to abandon the field, only importers with ample means can venture to incur the increased risks.

Uncertainty of dutiable value will cause delay in making entries; congestion of imported goods at port will necessitate increased public store and warehouse facilities. The question of similarity will require actual opening of a much greater percentage of cases than the present 10 per cent, and a more prolonged examination of goods, so that an increased force of appraisers and examiners will be needed.

Under the foreign valuation plan used for over a century the customs service has in its possession complete records of every single customs transaction in the form of consular invoices. It would be physically impossible to check up the innumerable bills rendered daily covering sales of imported merchandise in this country, no matter how large the number of officers detailed to do such work. As the American selling price is the dutiable value, however, the new plan will not make undervaluation impossible; but it may make its control impossible.

The present depressed state of business, the enforced idleness of a large number of unemployed, which is not only national but world-wide, is frequently advanced as a conclusive and unanswerable argument in favor of the proposed measure, which is intended to hamper and restrict the importation of, if not entirely to exclude, the products of foreign manufacturers. Our mills are idle, or on part time, because the buying power of a large part of our population has been greatly curtailed. This reduction in buying power is in no small measure due to the inability of the foreigner to buy from us the products which he so badly needs and which we have in excess. He can not buy because of his impaired credit and the unfavorable exchange situation. If not permitted to pay in goods, he can not pay at all.

It is true that 85 per cent of our production is sold in the home market, but on the successful disposal abroad of the remaining 15 per cent depends the degree of our national prosperity and affluence.

To provide long-time foreign credits will not suffice to promote our exports unless we are ready to have these credits liquidated in merchandise. The remedy for our present condition lies in promoting our foreign trade, both export and import—and not in adopting a method of assessing duty which must contract and render hazardous an essential part of it, that of importing. We have always prospered under a protective tariff, but our tariff history proves that our prosperity has been greatest when the rates have been reasonable and have aimed to compensate the difference between foreign and domestic labor and production costs, but no more.

The hearings before the Senate Finance Committee demonstrated that the present rates provided in the Fordney tariff bill will, unless reduced, result in a virtual embargo on many commodities. The effect of the Fordney rates, expressed in percentages, on the foreign dutiable value of various commodities, will be found in Table VI in appendix.

Governor Harding, of the Federal Reserve Board, in a recent speech in Charlotte, N. C., said:

"We must continue to buy from foreign countries those things which they can produce better or more cheaply than we can and exchange commodities with them. If we determine to do business with and for ourselves alone, it seems inevitable that we must reduce our production to meet merely American requirements."

The peace treaty with Germany has been ratified by the Senate. Steps are now being taken to arrange for the resumption of commercial relations with this great consumer of much of our agricultural, mining, and manufacturing surplus, the disposal of which, as Secretary Hoover has ably pointed out, is of such importance to American prosperity. To the extent that these efforts are negatived by adverse tariff legislation, our laborers, farmers, and miners will have to suffer. So will the millions of men employed in our great rail and water transportation systems and their feeders.

The "American valuation" plan has been tried before and has been found wanting. What reason is there to assume that this ill-considered renewed experiment, undertaken under the present chaotic conditions, will be any more successful? The passage of the proposed measure will react disastrously upon the party that insists upon passing it, against the practically unanimous opposition of everyone qualified to estimate its particular difficulties and the obvious dangers of putting it into operation. As our great bankers and merchants have returned from foreign tours of inspection and study, one after another has recorded his misgivings as to the proposed legislation and pointed out its inexpediency and danger.

On October 7, the American Bankers' Association adopted a resolution at Los Angeles condemning the "American valuation" plan.

Postmaster General Hays voiced a widespread uneasiness when he said on September 6, in Cleveland, regarding the tariff:

"To thoughtful men there must be approval of a certain hesitation and disposition to be cautious and a determination to be sure-footed in the consideration of this subject. If I were to attempt to express a summing up of the present state of mind of Congress and thoughful men about the tariff, it would seem to me that it amounts to a feeling that the present year is not a good one in which to write a permanent tariff bill to last for many years to come. Conditions throughout the world are too chaotic to be able to foretell exactly what is needed. The very basic condition on which a tariff is built—namely, the cost of manufacturing in various European countries with relation to our own cost of manufacture, and the value of the currency of the various European countries with relation to our own cost of manufacture, and the value of the currency of the various European countries with relation to the value of our own currency—is at the present moment as fluctuating as quicksand and as unforeseeable in the future as the weather.

"A dependable tariff built upon such a foundation is difficult, of course. It has been thought by many that we would overcome these handicaps by a device which we called American valuation, and which provided that all customs duties should be estimated upon the value of goods at the time when they arrive in the United States and in terms of American money. Looking carefully into this, it has been thought that this device might not overcome the handicap, and, further, might have a boomerang effect on our own interests. The end of it has been that we have appropriated $100,000 to investigate this device and otherwise determine what might be done to help us toward writing a permanent tariff. These conditions of fluctuation and instability which make the writing of a permanent tariff so difficult at the moment may in some measure be relieved after the disarmament conference has taken place and we have accomplished steps which the President has in mind for the adjustment of our international relations."

These are wise and prophetic words. They should be heeded by the Nation and our legislators.

NATIONAL COUNCIL OF AMERICAN IMPORTERS AND TRADERS (INC.).

APPENDIX.

TABLE I–A.

Payne-Aldrich rates on foreign values, reduced to equivalent Fordney percentage of duty assessed on American selling prices mentioned in text:

To illustrate text:	
Foreign value	$1.00
Plus Payne-Aldrich rate of duty	.50
Assumed as American selling price	1.50

No allowance has been made for freight, insurance, other incidentals, general expenses, and profit.

Equivalent rate of the assumed selling price was found as follows:

$0.50 divided by $1.50=33⅓ per cent.

	Per cent.
See paragraph 324 Payne-Aldrich Act 1909	50
See paragraph 918 Fordney bill	33

Another illustration at 70 per cent:

Foreign cost	$1.00
Plus Payne-Aldrich rate of duty	.70
	$1.70

$0.70 divided by $1.70=41 3/17 per cent.

	Per cent.
See paragraph 350 Payne-Aldrich Act 1909	70
See paragraph 1429 Fordney bill	42

Percentages of duty on foreign value, Payne-Aldrich, 15 per cent, 20 per cent, 25 per cent, 30 per cent, 35 per cent, 40 per cent, 45 per cent, 50 per cent, 55 per cent, 60 per cent, 70 per cent.

The equivalent percentage on supposed American selling price (cost plus duty only) under Fordney bill, about 13 per cent, 16 per cent, 20 per cent, 23 per cent, 26 per cent, 28 per cent, 31 per cent, 33⅓ per cent, 35 per cent, 37½ per cent, 42 per cent.

Such rates as 23 per cent, 26 per cent, 28 per cent, 33⅓ per cent are applied in many paragraphs, particularly in paragraphs 1310 and 1313.

These rates were clearly arrived at by the objectionable process referred to.

TABLE I–B.

The rates in the Fordney bill are claimed to be equivalent to those of the Payne-Aldrich Act, but the facts show the Fordney rates to be greatly in excess. See below:

NOTE.—Allowing 5 per cent for transportation expenses and 25 per cent gross profit on selling.

Reference by paragraphs.				But actually corresponding on foreign value to—	Commodity.
Fordney bill rates.	Paragraph.	Payne-Aldrich rates.	Paragraph.		
Per cent.		*Per cent.*		*Per cent.*	
13	1405	15	422	22	Unbleached straw braid.
17	203	20	86	26	Cement, n. s. p. f.
20	1401	25	462	38	Manufactures of asbestos, n. s. p. f.
25	319	30	123	46	Iron forgings, n. s. p. f.
26	1313	35	420	52	Manufactures of paper, n. s. p. f.
28	910	40	331	62	Cotton table damask.
35	228	45	108	70	Opera glasses.
33	918	50	324	82	Cotton wearing apparel, n. s. p. f.; silk garters, etc.
33⅓	1207	50	401		
35	915	55	328	91	Cotton hose valued at more than $5 per dozen.
37½	1429	60	349	105	Embroideries.
42	1429	70	350	133	Laces.

Later the rate on laces in the Fordney bill was advanced to 45 per cent, an increase from 133 per cent to 157 per cent on foreign value, showing in this case that a 3 per cent advance in rate on "American valuation" actually means an advance of 24 per cent on foreign valuation.

TABLE II.

Fordney "American valuation" rates, showing equivalent percentages of duty on foreign-value basis, assuming a gross profit of 25 per cent on selling prices and different transportation cost percentages:

A Fordney rate on American selling price of	13%	15%	20%	23%	25%	28%	30%	33⅓	35%	37½%	40%	42%
American selling price	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00
Less duty	.13	.15	.20	.23	.25	.28	.30	.33	.35	.37½	.40	.42
	.87	.85	.80	.77	.75	.72	.70	.67	.65	.62½	.60	.58
Less 25% profit on selling price equal to 33⅓% on landed cost	.25	.25	.25	.25	.25	.25	.25	.25	.25	.25	.25	.25
	.62	.60	.55	.52	.50	.47	.45	.42	.40	.37½	.35	.33
After deducting transportation expenses taken at 5% of foreign value	.590	.571	.523	.495	.476	.447	.428	.40	.381	.357	.33	.314
A Fordney rate on American selling price of	13%	15%	20%	23%	25%	28%	30%	33⅓	35%	37½%	40%	42%
	on American selling prices.											
Therefore is equivalent, if transportation expenses are 5%, to	22%	26%	38%	46%	52%	62%	70%	82%	91%	105%	120%	133%
If 10%, to	23%	28%	40%	49%	55%	66%	73%	86%	96%	110%	126%	140%
If 15%, to	24%	29%	42%	51%	58%	69%	77%	90%	100%	115%	132%	146%
If 20%, to	25%	30%	44%	53%	60%	72%	80%	94%	105%	120%	137%	153%
If 25%, to	26%	31%	45%	55%	62%	74%	83%	98%	109%	125%	143%	159%
	on foreign selling prices.											

TABLE III.

Effect of transportation expenses on the amount of duties collected under the Fordney bill on toys and dolls, which are classified under paragraph 1414 of proposed Fordney tariff bill at 40 per cent of the American value, showing the equivalent percentage on factory selling price, plus packing charges. The difference is due to varying percentage of transportation expense to bring the goods to American port:

Description.	Foreign selling price plus packing charges.	Expenses to bring goods to American port.	Expenses expressed in percentage of foreign selling price.	Percentage of duty on American selling price provided by Fordney bill.	Percentage if figured on foreign selling price.
			Per cent.	*Per cent.*	*Per cent.*
Belgian rubber balloons	$250.72	$25.05	10.4	40	126
English plush animals	132.41	17.13	12.9	40	129
Swiss toy music box	173.11	23.14	13.4	40	129

German toy accordeon	35.23	10.07	28.6	40	147
German wood horses	3.80	1.55	40.8	40	161
German wood boats	8.91	4.13	46.3	40	165
German character babies	1.88	.98	52.1	40	174
German wood sail boats	25.27	13.94	55.2	40	177
German papier-mâché horses	13.20	8.55	64.7	40	188

TABLE IV.

EQUALIZATION FORMULA SHOWING THE LIMIT UP TO WHICH DOMESTIC PRICE ADVANCES CAN FORCE SELLING PRICE OF SIMILAR IMPORTED ARTICLES.

$$\frac{D}{A}+C=E$$

"D" is the amount by which similar domestic article sells cheaper than the foreign article under the Fordney bill.

"A" is the balance left when deducting from 1.00 the rate of duty under the Fordney bill and the gross profit that the importer calculates to make on that duty.

"C" is the price of the similar domestic article at the time the duty is calculated on the foreign article.

"E" is the equalization point for the similar domestic article and the imported article under the Fordney bill, reached by the domestic manufacturer advancing his selling price and forcing the importer to pay higher duties.

Illustration:

No. 217 French piqué kid glove 14":

1. Selling price of similar domestic article "C" which under the Fordney bill establishes the dutiable value for imported article	dozen..	$27.00
2. Selling price of foreign article as result of paying duty on value of domestic article as provided in Fordney bill	do....	41.50
3. Rate of duty, Fordney bill		37½%
4. Percentage of gross profit on cost		33⅓%

To arrive at "A":

Less (3) rate of duty 37½% on 1.00	0.375	
Add (4) gross profit 33⅓% on 0.375	0.125	deduct total 0.50 from 1.00
		leaving 0.50 which is "A"

To arrive at "D":

Selling price foreign article as result of Fordney bill	$41.50
Selling price of similar domestic article	27.00
Difference "D"	$14.50

$$\frac{D}{A}\ \frac{14.50}{.50}+C\ 27.00=E\ \$56.00$$

Domestic manufacturers can therefore advance their price to $56 and force the importer to sell at this figure, including his duty.

Proof:

Fordney bill selling price on foreign article	$41.50
37½ per cent duty on excess of $29 (difference between equalization price $56 and American selling price $27)	10.875
33⅓ per cent profit thereon	3.625
	56.00

ILLUSTRATIONS.

	A similar American article sells for.	Fordney selling price of foreign article based on similar domestic article.	Fordney bill rate.	If overhead and profit is on cost.	Results in equalization point of.
			Per cent.	Per cent.	
219. French kid gloves	$33.00	$55.70	37½	33⅓	$78.40
221. Ladies' fabric glove (German)	6.00	8.55	40	33⅓	11.46
301. Aluminum saucepan (German)	.55	.78	28	33⅓	.91¼

FORMULA FOR ESTABLISHING THE IMPORTER'S SELLING PRICE UNDER "AMERICAN VALUATION" WHEN HIS OWN SELLING PRICE IS THE DUTIABLE VALUE.

Establish the actual c. i. f. cost, which is composed of the price at foreign factory, plus packing, cases, and transportation, as well as other incidental expenses to bring the goods to American destination. This actual c. i. f. cost must be divided by the arithmetical c. i. f. cost. To obtain this arithmetical c. i. f. cost deduct from the figure 1.00 the rate of gross profit that you have to make and the rate of (new) duty proposed in the Fordney bill. Dividing the actual c. i. f. by the arithmetical c. i. f. gives the selling price according to the Fordney bill.

Arithmetical C. I. F.: 1.—As actual C. I. F. : Fordney selling price.

or Formula: $\frac{\text{Actual C. I. F.}}{\text{Arithmetical C. I. F.}}$ = Fordney selling price.

Illustration:

If the actual c. i. f. landing cost of an imported article is $18.86:

To establish arithmetical c. i. f. price		1.00
Less 40% Fordney duty on selling price	0.40	
and 25% gross profit on selling price	0.25	0.65
Arithmetical c. i. f. price		0.35

Divide actual c. i. f. $18.86 by arithmetical c. i. f. 0.35 = $53.88, which is the selling price under the Fordney bill.

To prove: The actual c. i. f. cost is		$18.86
and the selling price arrived at arithmetically is	$53.88	
Less duty, 40%	21.55	
	32.33	
Less profit, 25% on selling price of $53.88	13.47	
Result: Actual c. i. f. cost		$18.86

CITIZENS' MILITARY TRAINING CAMP PARADE.

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of War, which was ordered to lie on the table and to be printed in the RECORD, as follows:

WAR DEPARTMENT,
Washington, August 19, 1922.

The PRESIDENT OF THE SENATE,
Washington, D. C.:

SIR: Thousands of patriotic young Americans from civil life are receiving voluntary training this summer in the citizens' military training camps.

More than 1,000 of these young men from the District of Columbia, Delaware, Pennsylvania, and Maryland, who are representative of all attending these camps this year throughout the United States, will approach the end of their instruction with a parade in the National Capital Monday morning.

This parade has been made possible by the Evening Star Co. in donating $500 to defray the transportation expense of the Infantry from Camp Meade, Md., to Washington and return and through the courtesy of the Washington, Baltimore & Annapolis Electric Railway in greatly reducing its rates. I believe such action truly reflects the public-spirited and generous interest taken by the entire Nation in the welfare of its young manhood.

These young men have been in training for less than three weeks. Their appearance will furnish a splendid opportunity for all to see what has been accomplished in this brief period of time from a military standpoint and the best possible proof of the wisdom in appropriating funds for these annual encampments.

The President and I hope to see the day when 100,000 young Americans will be enrolled annually in the citizens' military training camps. I know from observation that aside from all military considerations—vital as these are—the value to the Nation of the physical, mental, moral, and patriotic training which these young men are receiving is out of all proportion to the amount of money expended.

So confident am I of this assertion that I cordially invite all Members of the Senate and yourself to join with the President and me in reviewing this parade on Monday, August 21, at 11 o'clock, on the White House Ellipse, in order that you may judge with your own eyes the results of the training and honor with your presence the patriotism of these young Americans.

Respectfully,

JOHN W. WEEKS,
Secretary of War.

REPORTS OF COMMITTEES.

Mr. NORBECK, from the Committee on Agriculture and Forestry, to which was referred the bill (S. 3858) to define butter and to provide a standard therefor, reported it without amendment and submitted a report (No. 862) thereon.

Mr. HARRELD, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 1537) for the relief of Furness, Withy & Co. (Ltd.) (Rept. No. 863); and

A bill (S. 3110) for the relief of the Ward Baking Co. (Rept. No. 864).

Mr. HARRELD, from the Committee on Claims, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

A bill (S. 823) for the relief of John Vernon Bouvier (Rept. No. 865); and

A bill (S. 1069) for the relief of Federal Line (Inc.) (Rept. No. 866).

Mr. HARRELD, from the Committee on Claims, to which was referred the bill (S. 3412) authorizing the Secretary of War and the Auditor for the War Department to consider and settle the claim of Mrs. John D. Hall, widow of the late Col. John D. Hall, United States Army, retired, for personal property destroyed in the earthquake at San Francisco, Calif., reported it with amendments and submitted a report (No. 867) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMOOT:

A bill (S. 3926) granting a pension to Alice Ophelia Tunbridge; to the Committee on Pensions.

By Mr. HITCHCOCK:

A bill (S. 3927) to amend the act of Congress approved July 17, 1916, known as the Federal farm loan act; to the Committee on Banking and Currency.

DEATH OF EX-SERGEANT AT ARMS CHARLES P. HIGGINS.

Mr. REED of Missouri. Mr. President, I do not know whether it is in accordance with the usage of the Senate or not, but I feel that, regardless of usage and custom, the Senate will desire to have me make the statement I am about to make.

Charles P. Higgins was Sergeant at Arms of this body from March 16, 1913, to May 19, 1919. During his period of service he endeared himself to the entire membership of the Senate. He performed his duties with rare ability and faithfulness. I wish to announce, very sadly, the fact that Mr. Higgins died on to-day, or late last evening—I have not the exact hour. I thought I ought to be permitted to make this statement. I shall not ask an adjournment of the Senate, for I understand that is contrary to the custom of the Senate; but I wish to express my profound regret at the death of Mr. Higgins, who was regarded as a friend by all of the Members of the Senate.

Mr. ROBINSON. Mr. President, Mr. Higgins was an efficient officer. Every Senator who served in this body during the period of Mr. Higgins's service here respected him for his devotion to duty.

COMPENSATION OF WORLD WAR VETERANS.

Mr. McCUMBER. Mr. President, in accordance with the special order of the Senate made some time ago I move that the adjusted compensation bill be laid before the Senate.

Mr. ROBINSON. I suggest to the Senator from North Dakota that under the order heretofore entered all he needs to do is to ask the Chair to lay the bill before the Senate.

Mr. McCUMBER. I agree with that suggestion.

Mr. ROBINSON. The Senator does not need to make the motion. I suggest that the Chair lay the bill before the Senate.

The PRESIDENT pro tempore. House bill 10874 will now be laid before the Senate and proceeded with.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes, which had been reported from the Committee on Finance with amendments.

Mr. McCUMBER. Mr. President, I understand that the Senate desires to take an adjournment or a recess until next week. I do not know what the desire may be as to the particular time, whether Senators want to meet on Monday or Tuesday or Wednesday. I would be glad to make the motion in accordance with the desire of Senators.

Mr. LODGE. I suggest that adjournment be taken until Wednesday.

Mr. OVERMAN. I object.

Mr. ROBINSON. Mr. President, may I suggest to the Senator from North Dakota that there are a number of Senators—there are several on this side of the Chamber—who have indicated a desire to proceed promptly with the consideration of the bill which is now the unfinished business, the adjusted compensation bill. Several Senators expect to be compelled to leave the city within a few days, a number of whom are going to very remote places and will not be able to return for a long time. Manifestly it would be unjust to them for the Senate to adjourn over until Wednesday and hold no session during the intervening time, thus prolonging their stay in the city of Washington that much longer. If a time could be fixed for a vote upon the adjusted compensation bill, for my part I should be glad to agree to any arrangement that might be suggested to vote at any reasonable time within the early future; but if the bill is to be proceeded with—and I think that that is the conclusion which has been reached by Senators who have had the matter in charge—I think the Senate ought to adjourn until Monday instead of until Wednesday, as suggested by my friend from Massachusetts [Mr. LODGE]. I think that is the attitude also of most of the Senators.

Mr. McCUMBER. Suppose we compromise the matter by adjourning until Tuesday; would that be satisfactory?

Mr. SMITH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arkansas yield to the Senator from South Carolina?

Mr. ROBINSON. I yield to the Senator from South Carolina.

Mr. SMITH. Mr. President, as a matter of course, I would not speak of my personal convenience or attempt to project it here, but there are certain conditions over which some of us have no control, because of which we should be glad if an interim of three or four days could be arranged for. I had hoped that it would be possible for us to have a recess until next Wednesday, and I am sure there are several other Senators in the same condition in which I find myself placed. I had hoped also that we might reach some agreement as to a day certain when we might vote on the adjusted compensation bill. That being impossible, as has been indicated, I imagined that it would not

delay the Senate very much if we should have a three days' interval after the intolerable time that we have gone through in the consideration of the bill which has just been passed. I do not know that it would delay matters very much should we take a recess until Wednesday next.

Mr. McCUMBER. I had hoped that if we should take a recess until Wednesday possibly we could then get an agreement to fix the date on which to vote; but, of course, that is a mere hope; I can not say that there is anything back of it.

Mr. SMITH. If the Senator from Arkansas will allow me, I will say that I do not know that there will be any very great advantage gained should we not take the recess, for I think the Members of the Senate would be in a better working condition if we were allowed to catch up somewhat with some of our affairs which have suffered by virtue of our continuous presence in this Chamber in the consideration of the tariff bill.

Mr. WATSON of Indiana. Will the Senator from Arkansas yield to me?

Mr. ROBINSON. I yield to the Senator from Indiana.

Mr. WATSON of Indiana. I desire to say that every effort was made to enter into an arrangement by which a recess of the Senate might be had until the 15th of September, making the adjusted compensation bill the special order for that date, but there were a large number of Senators who would not agree to enter into that arrangement unless a day beyond that was fixed on which the vote should be taken on the adjusted compensation bill. Several Senators objected to fixing a day, and, of course, that ended the effort to make an arrangement. The only object I had in suggesting Wednesday as the time to which we should adjourn was in order that the Senator from North Dakota, the chairman of the Committee on Finance, particularly, and also the Senator from Utah [Mr. SMOOT], both of whom have labored as no other two men have done for many long years in the history of the Senate, might have a little time to arrange to get the tariff bill into conference and to arrange for the consideration of the adjusted compensation bill. Those two Senators have shouldered great burdens and have labored incessantly day and night. Now to drive them from this bill right into the next bill, while they must prepare to get the tariff bill into conference, seems to me would be unfair. That is the reason why I, amongst others, suggested that we take a recess until Wednesday morning next.

Mr. McCUMBER. If the Senator will allow me, I do not want that to be taken into consideration. So far as I am personally concerned, I can get ready.

Mr. ROBINSON. I thank the Senator from North Dakota for that statement; I apprehended that was the case. However, since some weeks ago, after the tariff bill had been under consideration for a month or two, an arrangement was effected which contemplated taking up the adjusted compensation bill and proceeding with it until its final disposition immediately following the tariff bill. I imagine no very convincing plea can be made for an interval between the disposition of the tariff bill and the taking up for actual final disposition of the adjusted compensation bill.

I have no disposition to be exacting about the matter, but there are a large number of Senators on this side of the Chamber who have engagements of a very important nature, and I am informed also that there are some Senators on the other side of the Chamber who are anxious to get away as soon as possible. I will not object to adjourning until Tuesday. If the Senator from North Dakota sees fit to move to adjourn until Tuesday, I shall reluctantly, so far as I am concerned, consent to that arrangement, although it is very inconvenient.

Mr. POMERENE. Mr. President, will the Senator yield to me for a moment?

Mr. ROBINSON. I yield.

Mr. POMERENE. I had hoped that a recess of the Senate might be taken until Wednesday. I am obliged to be away on Monday and Tuesday.

Mr. ROBINSON. There will be no vote for several days.

Mr. POMERENE. I am not urging my own convenience as any reason why there should be any delay, but I should like to be present when the bill is taken up for consideration.

Mr. ROBINSON. There will be no time when all Senators will find it practicable to be present in the Senate; but two months ago we made this arrangement, and every Senator was warranted in making his engagements based upon the agreement of the Senate that immediately following the tariff bill the adjusted compensation bill would be taken up and finally disposed of. In view of that suggestion and in view of the fact that Senators, like the Senator from New Mexico [Mr. JONES], for instance, have already been detained here long beyond the time they had expected to leave to meet important engagements, I respectfully submit that Senators, considering all the circumstances, ought not to insist that he and other Senators who have made similar arrangements should subordinate their convenience to further the convenience of other Senators. I think that when we make an agreement of this sort we ought to carry it out.

I am perfectly willing to concede that the Senate is tired; I know that some of us have been very much bored with the proceedings on the tariff bill, and we should like to get away and enjoy a rest; and, so far as I am concerned, if an agreement can be made to-day to vote upon the adjusted compensation bill, I am perfectly willing to take a three weeks' or a month's recess; but unless such an agreement can be reached, I certainly do not think that we ought to adjourn to a day beyond Tuesday. So, unless such an arrangement may be entered into, I shall test the sense of the Senate and move to adjourn, so that we will meet again at noon on Monday.

Mr. SMITH. Mr. President——

Mr. ROBINSON. I yield.

Mr. SMITH. Mr. President, before the Senator takes his seat, if we should adjourn until Wednesday there would only be a delay of one day, and it would certainly accommodate more Senators than myself to take the adjournment until that time.

Mr. ROBINSON. The Senator heard my statement concerning the Senator from New Mexico, who has been waiting here for some two weeks, anticipating that an arrangement would be made, to go West to meet engagements that are of the very greatest importance, and a number of other Senators are in the same position.

Mr. SMITH. I submit to the Senator that that one day would make no great difference in any event.

Mr. ROBINSON. If that is so, then I can not see how it would make any great difference to the Senator from South Carolina.

Mr. GLASS. Mr. President, the Senator from New Mexico can hardly assume that we are going to dispose of so great a question as the bonus bill, involving a tax on the American people of $7,000,000,000, in a day or two.

Mr. ROBINSON. I have not said anything which would justify the Senator from Virginia in making such a suggestion. I have not intimated that the Senator from New Mexico or anyone else contemplates that this bill will be disposed of with undue speed.

Mr. GLASS. I understood the Senator to say that the Senator from New Mexico wanted to get away in two or three days.

Mr. ROBINSON. No; I did not. I said if we prolong the consideration of the bill two or three days more it will delay Senators who desire to leave that much longer, and that they have already waited for several days.

Mr. JONES of New Mexico. Mr. President——

Mr. ROBINSON. I yield to the Senator from New Mexico.

Mr. JONES of New Mexico. Mr. President, I desire to say that it has been the understanding that as soon as we concluded the consideration of the tariff bill we would take up and dispose of the adjusted compensation bill. A delay of a day or two can not aid the conferees on the tariff bill, and the chairman of the committee has very frankly told us that, so far as he is concerned, he would not ask any delay by reason of that fact. The American ex-service men have been wiring me to insist that the adjusted compensation bill be disposed of at the earliest practicable day. I have heretofore expressed my views on the subject and they are known to all Senators present.

It would very materially inconvenience me not to have this measure taken up and disposed of, as it can be done in the ordinary course of procedure of the Senate. I do not believe that a delay of a day or two would be anything more than a mere personal opportunity for relaxation to some of the Senators. I have been working rather strenuously and continuously upon the tariff bill, and I, too, should love the best in the world to have a few days' rest; but, aside from the personal inconvenience which it would be to me to have any delay, I believe we owe it to the people of this country to take up the bill and decide it. This question has been pending now before the country for two or three years, and, regardless of how one may feel about it, I think we all recognize that the matter should be disposed of in some way so that the people of the country may understand what the Congress is going to do.

I appeal to Senators to let us take up this matter Monday morning and keep it before the Senate until it is finally disposed of.

Mr. LODGE. Mr. President, I am as anxious to get a vote upon the soldiers' compensation bill as anybody can possibly be. I have been here since June 12, without leaving Washington at all, and it makes no difference to me personally whether we go on on Monday or not; but I am perfectly satisfied, from what I know about Senators and their plans, that nothing will be gained and the bill will not be hastened by insisting, for the convenience of two or three Senators, that we sit on Monday and Tuesday.

I think it is only fair to the Senate, after the time they have been at work on the tariff bill, that they should take a day or two. I should like to see a day fixed for the vote on the compensation bill so as to give those of us who perhaps have to go away an opportunity to know when it will be necessary for them to be here in order to vote; but I believe it is impossible to have that day agreed upon. I should be ready, personally, to agree to any day.

Under the circumstances I am going to take the opinion of the Senate. It seems to me the only way of reaching it, and I move that when the Senate adjourns to-day it adjourn to meet at 12 o'clock on Wednesday.

Mr. ROBINSON. Mr. President, I do not care to prolong the discussion. In view of the agreement that was entered into many weeks ago, I think the Senate ought to proceed now to the consideration of this bill, and that we ought not to waste two days before doing that, which will be the result of the motion of the Senator from Massachusetts.

I therefore move that the Senate adjourn, which I understand to take precedence of the motion of the Senator from Massachusetts.

The PRESIDENT pro tempore. The question is upon the motion of the Senator from Arkansas.

Mr. ROBINSON. Upon that I ask for the yeas and nays.

Mr. SMITH. Mr. President——

Mr. LODGE. The motion is not debatable.

The PRESIDENT pro tempore. The Senator from Arkansas demands the yeas and nays. Is the demand seconded?

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. EDGE (when his name was called). I transfer my pair with the Senator from Oklahoma [Mr. OWEN] to the Senator from Vermont [Mr. PAGE] and will vote. I vote "nay."

Mr. ERNST (when his name was called). I transfer my pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Maryland [Mr. WELLER] and will vote. I vote "nay."

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. BALL], who is absent. I am unable to obtain a transfer, and therefore withhold my vote.

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and will vote. I vote "yea."

Mr. WATSON of Indiana (when his name was called). Making the same transfer as before, I vote "nay."

The roll call was concluded.

Mr. WALSH of Montana (after having voted in the affirmative). I inquire if the Senator from New Jersey [Mr. FRELINGHUYSEN] has voted?

The PRESIDENT pro tempore. That Senator has not voted.

Mr. WALSH of Montana. I have a general pair with that Senator. In his absence, I withdraw my vote.

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from North Dakota [Mr. MCCUMBER] with the Senator from Utah [Mr. KING];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY]; and

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS].

The result was announced—yeas 18, nays 44, as follows:

YEAS—18.

Ashurst	Jones, N. Mex.	Pomerene	Simmons
Broussard	Kendrick	Ransdell	Trammell
Gerry	Lenroot	Robinson	Walsh, Mass.
Harreld	McKellar	Sheppard	
Heflin.	Overman	Shortridge	

NAYS—44.

Borah	Ernst	Moses	Shields
Bursum	Glass	Myers	Smith
Calder	Gooding	Nelson	Smoot
Cameron	Hitchcock	New	Stanfield
Capper	Jones, Wash.	Newberry	Sterling
Colt	Kellogg	Norbeck	Sutherland
Cummins	Keyes	Oddie	Swanson
Curtis	Lodge	Pepper	Underwood
Dial	McCormick	Phipps	Wadsworth
Dillingham	McLean	Rawson	Warren
Edge	McNary	Reed, Pa.	Watson, Ind.

NOT VOTING—34.

Ball	Frelinghuysen	McKinley	Stanley
Brandegee	Hale	Nicholson	Townsend
Caraway	Harris	Norris	Walsh, Mont.
Culberson	Harrison	Owen	Watson, Ga.
du Pont	Johnson	Page	Weller
Elkins	King	Pittman	Williams
Fernald	Ladd	Poindexter	Willis
Fletcher	La Follette	Reed, Mo.	
France	McCumber	Spencer	

So the Senate refused to adjourn.

The PRESIDENT pro tempore. The question now is upon the motion of the Senator from Massachusetts [Mr. LODGE] that when the Senate adjourns, it adjourn until Wednesday next at 12 o'clock.

Mr. ROBINSON. On that I call for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). Making the same announcement as before as to my pair and being unable to obtain a transfer, I withhold my vote.

Mr. POMERENE (when his name was called). Again announcing my pair with my colleague [Mr. WILLIS], I transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and will vote. I vote "yea."

The roll call was concluded.

Mr. ERNST. Transferring my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from Maryland [Mr. WELLER], I vote "yea."

The result was announced—yeas 46, nays 16, as follows:

YEAS—46.

Borah	France	Moses	Smith
Bursum	Glass	Myers	Smoot
Calder	Gooding	Nelson	Stanfield
Cameron	Hitchcock	New	Sterling
Capper	Jones, Wash.	Newberry	Sutherland
Colt	Kellogg	Oddie	Swanson
Cummins	Keyes	Pepper	Underwood
Curtis	Lenroot	Phipps	Wadsworth
Dial	Lodge	Pomerene	Warren
Dillingham	McCormick	Reed, Pa.	Watson, Ind.
Edge	McLean	Shields	
Ernst	McNary	Shortridge	

NAYS—16.

Ashurst	Heflin	Overman	Sheppard
Broussard	Jones, N. Mex.	Ransdell	Trammell
Gerry	Kendrick	Rawson	Walsh, Mass.
Harreld	McKellar	Robinson	Walsh, Mont.

NOT VOTING—34.

Ball	Hale	Nicholson	Spencer
Brandegee	Harris	Norbeck	Stanley
Caraway	Harrison	Norris	Townsend
Culberson	Johnson	Owen	Watson, Ga.
du Pont	King	Page	Weller
Elkins	Ladd	Pittman	Williams
Fernald	La Follette	Poindexter	Willis
Fletcher	McCumber	Reed, Mo.	
Frelinghuysen	McKinley	Simmons	

So Mr. LODGE's motion was agreed to.

Mr. JONES of Washington. Mr. President, I know it is a little late to call up a measure, but I do not think it will take more than four or five minutes to dispose of the one I have in mind. The Senator from North Carolina [Mr. SIMMONS] and the Senator from Massachusetts [Mr. LODGE] expect to be away, and they are both interested in the proposition. So I ask unanimous consent that the unfinished business be temporarily laid aside and that the Senate proceed to consider House bill 10766, which is the legislative river and harbor bill. We passed upon all the amendments to it some little time ago, except two, and there are two or three which I desire to offer. I think there will be no debate at all, objections to them having been withdrawn. I believe the bill can be passed in five minutes.

The PRESIDENT pro tempore. Is there objection?

Mr. DIAL. That is a measure of very great importance, and I think it ought to be discussed. I do not think we need any more canals in this country if we do not have any shipyards. I am on the Committee on Commerce, and heard the testimony, and I believe that the country ought to have the facts before them before any more of the Government money is appropriated. I object.

The PRESIDENT pro tempore. The adjusted compensation bill is in Committee of the Whole and open to amendment.

Mr. SWANSON. We are not considering that. I would like to get a little bill on the calendar through.

Mr. BORAH. Mr. President, if the parties who have charge of this compensation bill do not know what to do with it, I will make a motion.

Mr. SWANSON. It has been temporarily laid aside.

The PRESIDENT pro tempore. It has not been laid aside. The Senator from South Carolina [Mr. DIAL] objected to laying it aside.

Mr. ROBINSON. I do not assume to be in charge of the bill, but I have no objection to the request of the Senator from Washington.

Mr. JONES of Washington. The Senator from South Carolina objected.

The PRESIDENT pro tempore. If Senators will talk one at a time, the Chair may be able to hear.

Mr. LODGE. Mr. President, there being objection——

Mr. DIAL. I make a parliamentary inquiry. What is before the Senate?

Mr. LODGE. Objection is made to laying the unfinished business aside, and we would not think of laying it aside by a vote. Therefore I move that the Senate adjourn.

The motion was agreed to, and (at 4 o'clock and 50 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously made, until Wednesday, August 23, 1922, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

SATURDAY, *August 19, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father in heaven, with a deep sense of obligation to Thee as the giver of all the good gifts of life we make our prayer. We ask that the blessed Spirit consecrate the things of time and sense. Let all deliberations be full of personal thought, direct purpose, and disciplined sympathy. Enable us to understand always that through service and sacrifice, in joy and in sorrow, we are brought nearer and nearer to the likeness of Him who is the world's perfect pattern. O let the day yield to us strength, satisfaction, and the cheer of a glad heart. Amen.

The Journal of the proceedings of yesterday was read and approved.

REVIEW OF CITIZENS FROM MILITARY TRAINING CAMPS.

The SPEAKER. The Chair has received a letter from the War Department stating that on next Monday at 11 o'clock the President and the Secretary of War will, at the ellipse south of the White House, review the men from the District who have been attending the citizens' military training camps, and says they would be very glad if as many Members of the House as possible would be present and assist them in the review.

ORDER OF BUSINESS.

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

Mr. GARRETT of Tennessee. Mr. Speaker, will the gentleman withhold that motion for a moment?

Mr. LONGWORTH. Yes.

Mr. GARRETT of Tennessee. I should like to ask unanimous consent that the gentleman from Alabama [Mr. HUDDLESTON] may proceed for 30 minutes.

Mr. LONGWORTH. I feel hardly justified in withholding my motion for that purpose.

Mr. MONDELL. Mr. Speaker, I did not hear the request of the gentleman from Tennessee.

Mr. GARRETT of Tennessee. I ask unanimous consent that the gentleman from Alabama [Mr. HUDDLESTON] may speak for 30 minutes.

Mr. GREENE of Vermont. I object.

Mr. MONDELL. I doubt if we ought to have discussion this morning, or go into debate this morning, and I move that the House do now adjourn.

Mr. HUDDLESTON. Will the gentleman from Wyoming yield for a question? I should like to know, and I know that every other Member of the House would like to know, if we are going to have anything in the way of congressional activity, or are we to meet and adjourn without doing anything at all.

Mr. MONDELL. I think we will have activity immediately on some of the matters referred to by the President in his message.

Mr. HUDDLESTON. Activity in the House or in the committees?

Mr. MONDELL. I think the gentleman from Alabama will have an opportunity to discuss the matters referred to in the message in connection with measures that are to be brought forward.

Mr. HUDDLESTON. Is there to be a real session of the House on Monday?

Mr. MONDELL. We expect to transact some business; yes.

Mr. HUDDLESTON. Will the gentleman tell us what?

Mr. MONDELL. We hope on Monday, or possibly on Tuesday, to refer the tariff bill to a committee of conference.

Mr. HUDDLESTON. Let me say from my point of view that it is nothing more than fair and just to those who hold views not in full harmony with those expressed by the President that they should have some opportunity to express those views.

The country is entitled to hear the opposing opinion, if there be any. Speaking on behalf of the working people of the country and as a volunteer, I want to assure the gentleman that they are bitterly dissatisfied with what was said yesterday, and they want some chance to have those views put before the country.

Mr. MONDELL. I agree with the gentleman that there should be discussion of the matters that the President referred to in his message. The President himself took the side of the common people, to whom the gentleman refers, and if the gentleman has any further observations to make in that line, of course, we will be glad to hear them.

Mr. GARNER. May I ask the gentleman from Wyoming a question?

Mr. STRONG of Kansas. Mr. Speaker, I demand the regular order.

Mr. GARNER. Mr. Speaker, I ask unanimous consent that I may ask the gentleman from Wyoming a question.

The SPEAKER. The gentleman from Kansas demands the regular order.

Mr. GARNER. What is the regular order?

The SPEAKER. The motion of the gentleman from Wyoming that the House do now adjourn.

Mr. GARRETT of Tennessee. And on that, Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 113, nays 63, answered "present" 2, not voting 249, as follows:

YEAS—113.

Anderson	Dunbar	Kline, N. Y.	Sanders, Ind.

So the motion was agreed to.

The Clerk announced the following pairs:

On the vote:

Mr. Burton (for) with Mr. Oldfield (against).

Mr. Wood of Indiana (for) with Mr. Sisson (against).

Mr. Crowther (for) with Mr. Kitchin (against).

Mr. Nolan (for) with Mr. Riordan (against).

Mr. Dickinson (for) with Mr. Linthicum (against).

Mr. Schall (for) with Mr. Jacoway (against).

Mr. Olpp (for) with Mr. Aswell (against).

Mr. Reed of New York (for) with Mr. Hooker (against).

Mr. White of Kansas (for) with Mr. Bankhead (against).

Mr. Newton of Missouri (for) with Mr. Johnson of Kentucky (against).

Mr. A. P. Nelson (for) with Mr. Ten Eyck (against).

Mr. Patterson of New Jersey (for) with Mr. Gallivan (against).

Mr. Kiess (for) with Mr. London (against).

Mr. Taylor of New Jersey (for) with Mr. Stedman (against).

Mr. Brown of Tennessee (for) with Mr. Mead (against).

Mr. Frear (for) with Mr. Fields (against).

Mr. Luce (for) with Mr. Cullen (against).

Mr. Begg (for) with Mr. Barkley (against).

Mr. Perkins (for) with Mr. Cockran (against).

Mr. Knutson (for) with Mr. Montague (against).

Mr. Hukriede (for) with Mr. Lee of Georgia (against).

Mr. Radcliffe (for) with Mr. Upshaw (against).

Mr. Brooks of Pennsylvania (for) with Mr. Sears (against).

Mr. Evans (for) with Mr. Connally of Texas (against).

Mr. Layton (for) with Mr. Deal (against).

Mr. Keller (for) with Mr. Sabath (against).

Mr. Kahn (for) with Mr. Dupré (against).

Mr. Connolly of Pennsylvania (for) with Mr. Bell (against).

Mr. Kennedy (for) with Mr. Stoll (against).

Mr. Lee of New York (for) with Mr. Carew (against).

Mr. Coughlin (for) with Mr. Taylor of Arkansas (against).

Mr. Graham of Pennsylvania (for) with Mr. Collier (against).

Mr. Bacharach (for) with Mr. Martin (against).

Mr. Ackerman (for) with Mr. Woods of Virginia (against).

Mr. Beck (for) with Mr. Dominick (against).

Mr. Gahn (for) with Mr. Fulmer (against).

Mr. Thompson (for) with Mr. Tague (against).

Mr. Madden (for) with Mr. Brand (against).

Mr. Larson of Minnesota (for) with Mr. Rainey of Illinois (against).

Mr. Anthony (for) with Mr. Rucker (against).

Mr. Winslow (for) with Mr. Swank (against).

Mr. Webster (for) with Mr. Kunz (against).

Mr. Atkeson (for) with Mr. Fisher (against).

Mr. Kline of Pennsylvania (for) with Mr. Collins (against).

Mr. Arentz (for) with Mr. Sullivan (against).

Mr. Crampton (for) with Mr. Logan (against).

Mr. Lineberger (for) with Mr. Goldsborough (against).

Mr. Osborne (for) with Mr. Kindred (against).

Mr. Frothingham (for) with Mr. Raker (against).

Mr. Griest (for) with Mr. Wise (against).

Miss Robertson (for) with Mr. Tyson (against).

Mr. McArthur (for) with Mr. Hawes (against).

Mr. Steenerson (for) with Mr. Blanton (against).

Mr. Funk (for) with Mr. Park of Georgia (against).

Mr. Yates (for) with Mr. Rainey of Alabama (against).

Mr. Kearns (for) with Mr. Carter (against).

Mr. Fish (for) with Mr. Drewry (against).

Mr. Echols (for) with Mr. Crisp (against).

Mr. Mudd (for) with Mr. Griffin (against).

Mr. Nelson of Maine (for) with Mr. Lyon (against).

Mr. Rossdale (for) with Mr. Harrison (against).

Mr. Swing (for) with Mr. Mansfield (against).

Mr. Underhill (for) with Mr. Pou (against).

Mr. Voigt (for) with Mr. Smithwick (against).

Mr. Wyant (for) with Mr. Johnson of Mississippi (against).

Mr. Hutchinson (for) with Mr. Larsen of Georgia (against).

Mr. McCLINTIC and Mr. FREE presented themselves at the bar of the House and asked to be recorded.

The SPEAKER. This is not a quorum vote, but the Chair will cause the presence of the gentlemen to be noted.

The result of the vote was announced as above recorded.

ADJOURNMENT.

Accordingly (at 12 o'clock and 32 minutes p. m.) the House adjourned until Monday, August 21, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

670. Under clause 2 of Rule XXIV, a letter from the Acting Secretary of the Navy transmitting a list covering rentals for Government property under the control of the Secretary of the Navy during the fiscal year ending June 30, 1922, was taken from the Speaker's table and referred to the Committee on Expenditures in the Navy Department.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 12316) granting a pension to Michael Halloran; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 12323) granting a pension to Frank A. Eley; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 12339) granting a pension to Catherine Foster; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. GREENE of Massachusetts: A bill (H. R. 12368) to abolish the inspection districts of Apalachicola, Fla., and Burlington, Vt., and the office of one supervising inspector, Steamboat Inspection Service; to the Committee on the Merchant Marine and Fisheries.

By Mr. HUDSPETH: A bill (H. R. 12369) to repeal the act of Congress approved July 1, 1922, granting the consent of Congress to authorize the construction of a bridge over the Rio Grande between the cities of Del Rio, Tex., and Las Vacas, Mexico; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURROUGHS: A bill (H. R. 12370) granting an increase of pension to Matilda M. Quimby; to the Committee on Invalid Pensions.

By Mr. CHINDBLOM: A bill (H. R. 12371) for the relief of James A. Watrous; to the Committee on Claims.

By Mr. HUDSPETH: A bill (H. R. 12372) for the relief of A. R. Gold; to the Committee on Claims.

By Mr. LONGWORTH: A bill (H. R. 12373) granting a pension to Sarah Dobner; to the Committee on Invalid Pensions.

By Mr. SLEMP: A bill (H. R. 12374) granting an increase of pension to Daniel P. Hyatt; to the Committee on Invalid Pensions.

By Mr. TREADWAY: A bill (H. R. 12375) granting an increase of pension to Clara E. Brass; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII,

6198. Mr. KISSEL presented petitions of the Tea and Coffee Trade Journal and the Pictorial Review Co., both of New York City, urging the passage of House bill 11965; to the Committee on the Post Office and Post Roads.

HOUSE OF REPRESENTATIVES.

MONDAY, *August 21, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

We trust that Thou will hear our prayer with patience and in holy calm, O God, our Heavenly Father. Thou hast mercy to relieve, grace to cleanse, and power to free. May these divine attributes lead us to forget our sins and our infirmities. While we are conscious of failures, may they push us to nobler effort. We would that all our labors be sweetened by the purest motive and exalted by intelligent conviction. Free us from the anxiety and apprehension that limit our powers. O inspire us to keep our faith in God and man, and at the last we shall find that our faith has kept us. In the name of Jesus. Amen.

The Journal of the proceedings of Saturday, August 19, 1922, was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed with amendments the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, had insisted upon its amendments, and had requested a conference with the House, and had appointed Mr. McCUMBER, Mr. SMOOT, Mr. McLEAN, Mr. SIMMONS, and Mr. JONES of New Mexico as conferees on the part of the Senate.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. WOODRUFF, on account of illness in family.

To Mr. BRAND, indefinitely, on account of important business.

To Mr. NOLAN, on account of illness.

CALL OF THE HOUSE.

Mr. STAFFORD. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Wisconsin makes the point of order that there is no quorum present. Evidently there is not.

Mr. MONDELL. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The Clerk called the roll, and the following Members failed to answer to their names:

Ackerman	Fields	Linthicum	Rosenbloom
Anderson	Fitzgerald	Little	Rucker
Andrew, Mass.	Frear	Luce	Ryan
Anthony	Freeman	Luhring	Sabath
Arentz	Fulmer	Lyon	Scott, Mich.
Atkeson	Funk	McArthur	Sears
Barbour	Gahn	McCormick	Siegel
Barkley	Gallivan	McLaughlin, Nebr.	Sinclair

Edmonds	Layton	Riordan	
Fairchild	Lee, N. Y.	Robertson	
Fess	Lineberger	Rogers	

The SPEAKER. Two hundred and forty-eight Members have answered to their names, a quorum.

Mr. MONDELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

EXTENSION OF REMARKS.

Mr. STRONG of Kansas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein the remarks of Secretary of Agriculture Wallace before the farm bureau at Leesburg, Va.

The SPEAKER. Is there objection?

There was no objection.

THE FARMER'S WAGES COMPARED WITH OTHER WAGES.

Mr. STRONG of Kansas. Mr. Speaker, under the leave granted to me to extend my remarks in the RECORD I include the remarks of Secretary of Agriculture Wallace before the farm bureau of Leesburg, Va.

In the course of a talk before the farm bureau at Leesburg, Va., Monday afternoon, Secretary of Agriculture Wallace said:

It is worth while to compare wages in the organized industries with the wages received by the farmer, as represented in the price he gets for the things he grows. The value of income, whether it be in the form of wages or of money received for sales of products, is represented not in dollars and cents but in what that income will buy by its purchasing power.

Take the average wage received by the coal miner for mining a ton of coal. In 1913 this wage per ton would buy 1.1 bushels of corn in Iowa; in 1921 it would buy 2.5 bushels of corn in Iowa. In 1913 the ton wage would buy seven-tenths of a bushel of wheat in North Dakota; in 1921, nine-tenths of a bushel. In 1913 it would buy 4.7 pounds of cotton in Texas; in 1921, 8.5 pounds. In 1913, 7 pounds of hog in Nebraska; in 1921, 14 pounds. In 1913, eight-tenths of a bushel of potatoes in New York; in 1921, 1.2 bushels. In 1913, 11 pounds of sheep in Wyoming; in 1921, 18 pounds. In 1913, 1.6 bushels of oats in Illinois; in 1921, 3.1 bushels. In 1913, 2.4 pounds of butter in Missouri; in 1921, 3.2 pounds.

Taking the average yearly earnings of railroad employees, we find that in 1913 the yearly wage would buy 1,492 bushels of corn in Iowa and in 1921, 4,112 bushels. It would buy 1,028 bushels of wheat in North Dakota in 1913; in 1921, 1,466 bushels. In 1913 it would buy 6,449 pounds of cotton in Texas, and in 1921, 13,934 pounds. It would buy in 1913, 102 hundredweight of hogs in Nebraska, and in 1921, 237 hundredweight. It would buy 148 hundredweight of sheep in Wyoming in 1913, and in 1921, 296 hundredweight. In 1913 it would buy 1,087 bushels of potatoes in New York; in 1921, 1,916 bushels. In 1913, 2,174 bushels of oats in Illinois; in 1921, 5,109 bushels. In 1913, 3,309 pounds of butter in Missouri; in 1921, 5,285 pounds.

In 1913 the freight revenue per ton-mile received by the railroads would buy 1.4 bushels of corn in Iowa; in 1921 this revenue per ton-mile would buy 3.1 bushels of corn in Iowa. In 1913, 1 bushel of wheat in North Dakota; in 1921, 1.1 bushels. In 1913, 6.1 pounds of cotton in Texas; in 1921, 10.5 pounds. In 1913, 10 pounds of hogs in Nebraska; in 1921, 18 pounds. In 1913, 1 bushel of potatoes in New York; in 1921, 1.5 bushels. In 1913, 14 pounds of sheep in Wyoming; in 1921, 22 pounds. In 1913, 2.1 bushels of oats in Illinois; in 1921, 22 pounds. In 1913, 2.1 bushels of oats in Illinois; in 1921, 3.9 bushels. In 1913, 3.1 pounds of butter in Missouri; in 1921, 4 pounds.

In 1913 the price of a ton of coal f. o. b. the mine would buy 2.4 bushels of corn in Iowa; in 1921, 6.2 bushels; in July, 1922, 9.3 bushels. It would buy in 1913, 1.7 bushels of wheat in North Dakota; in 1921, 2.2 bushels; in July, 1922, 4.4 bushels. In 1913 it would buy 10.4 pounds of cotton in Texas; in 1921, 21.1 pounds; in July, 1922, 22.9 pounds. In 1913, 16 pounds of hogs in Nebraska; in 1921, 36 pounds; in July, 1922, 53 pounds. In 1913, 1.8 bushels of potatoes in New York; in 1921, 2.9 bushels; in July, 1922, 4.7 bushels. In 1913, 24 pounds of sheep in Wyoming; in 1921, 45 pounds; in July, 1922, 70 pounds. In 1913, 3.5 bushels of oats in Illinois; in 1921, 7.7 bushels; in July, 1922, 14.2 bushels. In 1913, 5.4 pounds of butter in Missouri; in 1921, 8 pounds; in July, 1922, 16.1 pounds.

In fairness it should be noted that before the corn, wheat, hogs, sheep, cotton, butter, or other farm products get to the consumer's table a good deal has been added to the price the farmer receives. This margin between the farmer and the consumer has considerably increased during the past eight years, but it is also fair to note that a good deal of this increase has been due to the increase in the wages paid the people who handle these products. What these figures show is that the wages of the farmer, as represented by the prices paid for his crops, are lower than his wages were before the war, measured in purchasing power, while the wages of the workman, and especially in organized industries, are considerably higher than they were before the war, whether measured in dollars and cents or in purchasing power. The purchasing power of the wages of the railway employee in 1921 was 51 per cent greater than in 1913. The purchasing power of the wages of the coal miner in 1921 was 30 per cent greater than in 1913. The purchasing power of the farm hand who works for wages in 1921 was 4 per cent less than 1913, while the purchasing power of the farmer himself was on an average from 25 to 45 per cent less than in 1913.

In short, the farmers of the country, numbering almost one-third of our entire population, have borne altogether the heaviest burden of deflation. They have endeavored to get relief by all lawful means. They have appealed to the administration, to Congress, and to every other agency which they thought might be able to help them; but while making these efforts to avoid their heavy losses they have not struck. They have not created disorders. They have kept on producing and in the face of extraordinarily low prices have this year grown one of the largest crops in our entire history. The farmer believes in law and order. He believes in government. He believes in fairness between man and man. He believes in working hard and producing efficiently.

If other groups would do as the farmer has done, our economic troubles would soon be over. Prices would soon be adjusted to their normal relationships. There would be work for everybody and at just wages.

But there are too many people who seem to be thinking only of themselves and how they can profit at the expense of the community at large, and especially at the expense of the farmer. The farmer is sick and tired of this sort of business. He is disgusted with these recurring disputes between capital and labor, especially as connected with the essential industries. He sees no reason why such disputes can not and should not be settled in an orderly and lawful way and without the interruptions of service which cost him so dearly.

The farmer recognizes his obligation to produce food, for people must eat to live. He demands that both the owners of the coal mines and the coal miners recognize their equal obligation to produce coal, and he demands that the management of the railroads and the railroad workmen recognize also their equal obligation to keep trains moving, for unless the food he produces is moved promptly to market the people will starve.

If the various groups in this country are determined to prey upon one another and abandon law and order for strong-arm methods, the farmer can take care of himself. He can reduce his production to his own needs. He can follow the example of some others and refuse to sell what he produces. But he does not believe in that sort of thing. He knows that such a policy would bring about in this great Republic exactly the same sort of conditions that exist in Russia.

The farmer calls upon capital and labor to cease their petty bickerings and resume production, trusting to American institutions and the American sense of fair play to see that justice is done to both of them.

Mr. HUDDLESTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the President's message on the railroad and coal strikes.

The SPEAKER. Is there objection?

There was no objection.

THE PRESIDENT'S ADDRESS UPON THE COAL AND RAILROAD STRIKES.

Mr. HUDDLESTON. Mr. Speaker, it has now been six days since the House convened at the end of the vacation. During that time, notwithstanding the national crisis accompanying the coal and railroad strikes, the Republican leader has been unable to assemble a quorum of the Members. We have done absolutely nothing toward performing the public business. Upon last Friday, August 18, the President addressed a joint session of Congress upon the coal and railroad strikes. Each day I have sought an opportunity to express my views upon the address, but until the present it has been denied me by the majority.

As the President spoke I felt that I knew the unfavorable impression which his address would make upon the laboring men of the country. My thought then has been confirmed during the interval which has elapsed. There have come to me many expressions of indignation and disappointment at the President's statements and the attitude from which he spoke.

I heard the President's address with great sorrow. It made me tremble for the future of my country. I was compelled to visualize the consequences which may follow. The message comes as a firebrand in a house of tinder.

The great employers and financiers are already fired by a class consciousness such as has been heretofore unknown. They appear to have conspired together to put labor under foot, to be determined to drive on with their harsh processes of force until they have the workers completely at their mercy. These powerful groups will draw encouragement from the President's utterances. They will be encouraged to follow on in their headlong and harsh course.

On the other hand, the pressure which has been brought to bear upon them is forcing upon men who work for others something of group consciousness and responsibility. The situation between these great opposing forces is critical—it is even perilous to our national welfare. The President's speech will add fuel to the flame and serve to aggravate the already dangerous situation. Carried to their logical extent, the President's arguments will lead not to peace but to strife; not to compromise but to conflict.

PRESIDENT'S ADDRESS UNTIMELY.

I listened with deep attention to the President's address. I can but characterize it as most untimely. It appears that the coal strike is about to be settled, yet only a small percentage of the disputants have actually agreed. The final effort to settle the rail strike is now at its climax. If settlement fails, it seems probable that other classes of railroad employees will be involved and that a nation-wide stoppage of trains may occur. The strike may easily run to proportions as disastrous as a national war. The President's projection of partisanship and misleading propaganda into the already difficult situation may cause all efforts at settlement to fail.

The evil result which may flow from the President's address is to make worse the present critical situation. Against the deadly harm which may come from the address, contrast the puerile proposals which are made the excuse for it: A coal investigation—what will it avail? It may a year hence afford a basis for legislation—the present situation it can not hope to touch. A coal-distributing agency, which the President states will perhaps handle no coal—a mere gesture against profiteering, vague, intangible, not real price-fixing with "teeth" in it. An act for the protection of the treaty rights of aliens. Why such an act at this time? What has it to do with labor disputes? Oh, it will enable Federal courts to take jurisdiction of strikers charged with violence against aliens, that is why it is desired. The President said so himself.

No; the proposals mentioned in the address are not its reason—they are merely its excuse. The real purposes of the message are: First, for partisan political purposes, to still the rising storm of public criticism of the complacency with which the administration allowed the strikes to come on and the lack of courage and intelligence with which the administration has met them; and, second, to carry on a propaganda against the strikers by discrediting the merits of their cause and holding them up as violent and murderous men.

THE PRESIDENT IS AN "OPEN-SHOPPER."

I heard the President's message in the light of the views upon labor issues which he has heretofore expressed. I weighed its every syllable. I noted the emphasis upon each phrase. I marked his expression during its delivery. I am irresistibly borne to the conviction that, whether so intended or not, it marks his definite alignment with the open-shop movement. It is impossible, from what I heard and saw, to reach any other conclusion. The President is an "open-shopper"—he believes in the movement—he is supporting it—he is lending the great powers of the Government to its consummation. His gesture of toleration toward labor unions becomes meaningless in the light of the hostility shown in every method, mannerism, emphasis, and argument.

Antiunion propagandists will find the President's address most valuable. They will quote from it gleefully. I predict that they will circulate by tons copies of the address and of extracts from it.

The address was full of the methods of the propagandists as they were so highly developed during the World War. There was the front of impartiality upon a basis of deadly distilled partisanship. There was the reiteration and magnification of alleged cruelty and violence by which the merits of an enemy's cause are sought to be obscured. There was the platitudinous phrase intended to weaken the enemy's morale. There was the commendation of treachery to the enemy's cause. Surely such talent should have been recognized by our Bureau of Public Information.

The President commended the loyalty of those members of the shop unions who remained at work when their fellow craftsmen quit. Remember that these men had voluntarily joined the unions. They had pledged themselves with their fellow employees to strike upon a lawful decision being made to that end. They breached their pledged faith, and they did it for their own promotion, so the President says. That action in his mind merits the word "loyally." Men have always despised those who broke faith, who betrayed their fellows. Traitors have been hated in all lands and times. It was his breach of faith that makes Judas as the most despicable of all creatures. Informers, spies, and betrayers have always been despised, even by those who used them, and yet for black treachery the President "loyally" uses the noble word which we employ to describe faithful service of our country.

"I AM THE STATE."

The attitude from which the President spoke is well disclosed by his use of the words "Government" and "I." He used them interchangeably and as synonyms, choosing the one or the other merely as a matter of rhetoric or to avoid tautology. The President might well have referred to himself as the "administration." He is not the Government. In using "Government" as meaning the administration he forgets America in his Old World phraseology. There is no "Government" in or of the United States except that composed of three coordinate branches, of which the President represents only one—the Executive.

In the United States "Government" means Congress, the courts, and the administration. It is a gross presumption for an Executive to assume that he is the Government, that he speaks for the Government, or that he has authority "to use the power of the Government." The President will not use "all the power of the Government to maintain transportation and to sustain the right of men to work." He will use for such purposes merely such authority as Congress has granted him for that purpose. Beyond that the President's peroration is merely idle bluster and rotund platitude.

In his closing words the President promised "to use all the power of the Government to maintain transportation and sustain the right of men to work." Let me remind him that he has no authority in connection with transportation other than such power as Congress, under its constitutional warrant "to regulate interstate commerce," has granted to his office. Let me further remind him that neither President nor Federal Government has any constitutional warrant to protect strike breakers.

The American system of sovereign separate States yet remains. The States having reserved their police powers to themselves are exclusively charged with the preservation of public order. The Federal Government has no right to intervene for the

restoration of order except under section 4 of Article IV of the Constitution in the exercise of the Federal duty to guarantee "a republican form of government," to protect the State "against invasion," and, when invited by the State authorities, to protect the State "against domestic violence." The statutes under which the President may intervene under this section are strict and narrow. In no aspect of the Constitution or law can the President use any of the Federal power for intimidating strikers or for protecting strike breakers. There is, of course, the Federal authority to protect the mails and other property of the Federal Government.

Any attempt upon the part of the President to intervene in the domestic affairs of a State or to busy himself in the preservation of order which may not be in strict conformity to the Constitution and statutes will constitute an usurpation far more serious in its consequences than any disorder of which irresponsible strikers or other persons might be guilty. Such an usurpation, as an act of lawlessness committed by the Chief Executive, would be an offense against our civilization which would overshadow any possible situation of violence at which it might be aimed.

As a statement of the facts concerning the causes for the coal and rail strikes and their progress, the address may be compared to the effort of an adroit plaintiff's attorney. The grievances of the workers were minimized or suppressed while the actions of the employers were placed in a favorable light. Important causes and incidents are ignored entirely. Other factors are exaggerated until the uninformed observer is able to see only a wildly distorted reflection of the true situation.

FACTS AS TO THE COAL STRIKE.

To set the record straight let us examine the facts concerning the coal and rail strikes. By the contract between the coal operators and miners, which expired on April 1, both parties agreed that prior to its expiration they would negotiate for the making of a new contract. The operators refused to comply with this agreement. The President's statement that the miners declined the administration's invitation is most misleading. The miners did not decline; their officials replied that they had no authority to negotiate prior to the national meeting. At that meeting the requisite authority was given, and the miners' officials promptly invited the operators to a conference. The invitation was flatly refused. Again and again the miners' representatives sought a meeting with the operators. Always the latter declined, and so the strike came on.

The President would clear his skirts by recalling the feeble pass made by a member of the administration nearly a year ago, before the miners' officials had authority to negotiate. He ignores the administration's "do nothing" policy during the long following months, when every well-informed person realized that a strike was impending. In January last, in a speech in the House, I called attention to the threatened strike and to the disaster to the public interest which would follow. I implored the President to use the influence of his office to induce the operators to meet and talk with the miners. I then said that—

> common good will and loyalty to the public welfare and to his country demand that the President shall do all that in him lies to prevent this great catastrophe. I say that if the President allows this strike to come on without using his influence with these oppressive employers, without asking the intervention of Congress, without lifting his hand, without doing anything whatsoever, he will mark himself so that he will be known throughout the history of our country.

What I deplored transpired. It remains to be seen whether those responsible will escape the odium which should attach to their conduct.

The real truth about the administration and the coal strike is that the operators had long been seeking a chance to destroy the miners' union. It was their wish that the strike should occur. They desired that the President should not interfere. Some 60,000,000 tons of coal were in reserve. Almost nobody believed that the miners could hold out beyond 30 days. There was plenty of coal for that period. No one would be hurt except the miners themselves, for the operators would be able to sell their reserve coal at an advance.

The administration was complacent toward the coal strike and made no real effort to avert it, because they believed that the operators would win. It was only in June, when production had been cut to a minimum and the reserves were almost exhausted, that the President waked up and began to take an interest in the strike. It was only when the operators and his other big-business friends began to suffer—it was only when the wrong man was down and the ragged and starving miners showed no signs of surrender—that the President intervened.

The President's intervention in the coal strike was practically a proposal that the miners surrender. When they declined he hurled a proclamation like a Jovian thunderbolt at their heads and mouthed threats of soldiers and such stuff. But the miners stuck on. Soldiers dig no coal. There were few strikebreakers for them to guard.

COAL STRIKE WHOLLY UNNECESSARY.

The intervention in the coal strike proved a fiasco, and now a settlement is being made, the same settlement that might have been made months ago. The coal strike was wholly unnecessary. It was undesired by the miners. The pity is that it has caused the poor workers so much suffering. It will cause greater suffering to the public during the coming winter. The blame for it all should be placed, first, upon the operators, whose sole purpose was to destroy the miners' union; and, second, upon a supine national administration, which, out of deference to captains of finance and industry—its friends and advisers—allowed the coal strike to occur.

The rail strike has been threatened for more than a year. It is not about a matter of mere wages, as represented in the President's address. The strike ballots submitted three issues to the workers: "First, the establishment of unjust wages by the recent decision of the Labor Board"; "second, the establishment of unjust working conditions through the amendment by the Labor Board of certain rules of the national agreement"; and, "third, the contracting out of shops and work by a large number of railroads as a means to evading the application of the law to their properties." A strike was voted upon each issue by from 94 per cent to 97 per cent of the workers. Their officials had no alternative but to comply. But it must be understood that the strike vote was cast out of the exasperation of the employees caused by many acts of oppression committed against them by the railroad executives. The employees had been exasperated beyond endurance by the deliberate violation of their rights and by the evasions, floutings, and violations of the Esch-Cummins Act.

THE SOCIALISM OF WALL STREET.

The Esch-Cummins Act was the longest step into socialism ever taken in America. I apologize to all decent socialists for saying this, for the socialism of the Esch-Cummins Act was the socialism of Wall Street. It was a savagely distorted socialism, not a socialism for the public welfare but a socialism for private gain. Under that law, with its mandate for rates which would yield a profit upon hundreds of millions of watered stock, there was in effect a public ownership, but it was a public ownership under private control and for private and selfish purposes. It was in a sense the equivalent of a purchase of the railroads from the Public Treasury, leaving them under the management of wasteful and incompetent executives who had no public responsibility.

The labor sections of the Esch-Cummins Act were forced into it against the unanimous opposition of the employees. The general public neither knew nor cared anything about these sections. The hand that wrote them was guided by the owners of the railroads.

CAUSES OF RAILROAD STRIKE.

Having written the labor sections of the Esch-Cummins Act, it would have been believed that the railroad interests would be prompt in obeying them, but such was not a fact. They had written the law; why should they be expected to obey it? They considered themselves above the law. The law was for the workers, not for the executives.

And so we find that instead of obeying the labor sections of the Esch-Cummins Act, the railroad interests promptly ignored them. From the very beginning great systems like the Pennsylvania, the New York Central, and the Erie began to farm out their shop work to cost-plus contractors at a cost greatly in excess of their own shop costs. This maneuver was performed largely for the purpose of enabling them to discharge shop forces. The Altoona shops of the Pennsylvania were largely shut down during the summer of 1920, while the Pennsylvania's locomotives were being repaired by the Baldwin Locomotive Works. This was during the Government guaranty period. It cost the railroads nothing. Uncle Sam paid the loss.

From the very beginning the railroads carried on a nation-wide propaganda against the employees. Its purpose was to put them in a bad light before the public, to break their morale—in short, to prepare for "the day." The employees were represented as having been unpatriotic during the war, being war profiteers, as receiving excessive wages, as being un-American, and as political radicals. Even the prejudice against aliens was used against them. Blame for excessive rates and charges was placed upon them. In short, neither time nor money was spared to humiliate, ridicule, discredit, and undermine the employees. All this in preparation for the strike which has now come.

Provocation after provocation was given the employees. More than 90 railroads of the United States, beginning in 1920,

have violated the labor sections of the Esch-Cummins Act. Take the case of the Atlanta, Birmingham & Atlantic, which has a terminal in my home city. Eighteen months ago the general manager posted an arbitrary reduction in wages. The employees protested to the Labor Board, which set aside the railroad's arbitrary action and directed it to confer with the employees. The railroad promptly caused a collusive suit to be filed in the Federal court by a creditor whose debt was not yet due. Its general manager was appointed receiver, and in that capacity enforced the cut which as general manager the Labor Board had denied his right to do. The railroad refused to obey the order of the Labor Board. It "struck" against the Labor Board and against the Government.

HOW THE PENNSYLVANIA STRUCK AGAINST THE LABOR BOARD.

More than a year ago the Pennsylvania made an arbitrary change in service rules. On complaint of the employees, the Labor Board suspended the change in rules and ordered the railroad to confer with its employees as to same. After various evasions and attempted frauds upon the law, the Pennsylvania ignored the final order of the Labor Board entirely, and when the board sought to publish its decision as an appeal to public opinion against the railroad's lawlessness, the Pennsylvania obtained an injunction forbidding the board from even so much as expressing its opinion of the railroad. After long months, the court of appeals has now held the injunction to have been unlawful and the railroad has now appealed to the Supreme Court, with further indefinite delay. A year ago the Pennsylvania "struck" against a decision of the Labor Board.

The practice of railroads farming out their shop and other work began with the Erie's Hornell shops some 18 months ago, and has been followed by some 50 railroads, including such important systems as New York Central, Great Northern, Chicago & Alton, and Big Four. This practice is yet being persisted in, although the Labor Board has declared it unlawful.

I will not attempt to deal with the multitude of grievances of which the employees complain. The strike vote was given more out of exasperation than anything else—out of resentment caused by a long series of oppressions and injustices. It speaks more than anything else the employees' determination not to go any further.

The employees hated to strike. They did not want a strike but they were desperate. Their grievances remained unremedied by the Labor Board and unnoticed by the national administration and by the general public. There was also another great moving cause, and I believe that I should frankly state it. The employees believed that the Labor Board had been deliberately packed against them and that they could expect neither justice nor fairness from it. Any opinion as to the strike not formed after considering all of these factors must be warped and inadequate. The employees felt themselves forced to strike, that it was the only thing left for their defense, that their backs were to the wall, and that it was either fight or abjectly surrender to the arbitrary whims and dictation of the railroad executives.

FARCICAL MANEUVERS TO SETTLE STRIKE.

The administration's maneuvers in connection with the rail strike have been farcical. The strike has been brewing for months. The railroad executives wanted it so that they might destroy the unions. For them it was even delayed too long so that there was a measure of business recovery which took many idle workers from the labor market. Everyone who understood the temper of the workers and the exasperations which they had suffered realized months ago that a strike was inevitable. The administration alone seems to have been oblivious to the threatening storm. No effort whatever was made to avert the strike. No influences for mediation were put on foot.

When the strike was already weeks old the administration waked up to the situation. Conferences were had—a settlement which the President approved as fair, just, and reasonable was proposed. The proposal safeguarded the employees' cherished seniority rights, and while they objected to its other features, they agreed to accept. But the railroad executives spurned compromise. The idea of admitting the employees back to the shops under the same conditions as when they had quit was hateful to them. They demanded a surrender. They insisted upon the right to use the seniority privilege as a reward for the treachery of those who had remained at work and for the strike breakers who had slipped in to take the jobs of their fellow workers. They wanted to use the seniority privilege as a punishment, to hold it as a penalty over the heads of transportation employees and other crafts who might hereafter be tempted to strike.

The executives rejected the seniority proposal. Thereupon the President complacently changed his proposal so as to meet the views of his friends, the railroad managers. He took from the settlement the one thing on which the employees had based their all and calmly invited them to agree to leave the seniority issue to the Labor Board. He seemed not to know that the Labor Board had already decided the matter by its proclamation of July 4, outlawing the strikers. The President invited the employees to leave the decision of their case to a board which had already decided it. Think of it!

Of course, the employees did not accept. The terms offered them were little better than if they had lost the strike. They were invited as organizations to kiss the ground under the feet of their unfaithful fellow workers who had refused to strike and of strike breakers who had robbed them of their jobs while they were not looking.

The most dangerous feature of the situation is that the railroad employees feel that the strike has been deliberately provoked, that it was desired by the executives and great financial interests which controlled the railroads. They feel that the struggle in the railroad shops is a twin with the coal-mining dispute, that both are the fruit of the determination of big business men and financiers to destroy all labor unions. This view is generally shared by organized workingmen at large. All view the coal and railroad disputes as merely separate battles of the one great war which is being made on unionism, and believe that the next conflict will probably be with other organizations of railroad employees and that the struggle will proceed as the antilabor forces may be successful from mines and shops into other industries wherever unionism may be found, until organized labor is finally vanquished and destroyed.

I warn those who press forward with their harsh processes against the laboring men of America. I beg them to stay their hands. Their own enlightened self-interest demands it. Every patriotic impulse cries out against them. Every instinct of humanity bids them to forbear.

Mr. SMITH of Michigan. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting therein a short resolution passed by a battalion of G. A. R. in Calhoun County, Mich., in favor of the Bursum pension bill.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, I think that is a very questionable practice, and I object.

Mr. HUDDLESTON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Alabama makes the point of order that there is no quorum present. The Chair will count. [After counting.] Two hundred and twenty-three Members present, a quorum.

CALENDAR FOR UNANIMOUS CONSENT.

The SPEAKER. To-day the Calendar for Unanimous Consent is in order, and the Clerk will call the first bill on the calendar.

IMPRISONMENT OF WOMEN IN STATE REFORMATORIES.

The first business on the Calendar for Unanimous Consent was the bill (S. 1010) to amend sections 5549 and 5550 of the Revised Statutes of the United States.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. HUDDLESTON. Mr. Speaker, reserving the right to object, may I ask whose bill it is?

Mr. STAFFORD. Mr. Speaker, this bill has been on the calendar for the last eight months, more or less, and has been postponed from time to time at the request of the gentleman from Georgia, Mr. CRISP, because of the absence or illness of his colleague, Mr. BRAND, who is interested in the bill. It is a bill to change the Revised Statutes to enable women over the age of 18 who have been convicted of lewdness or similar crimes to be sent to reformatories instead of being confined in the penitentiaries.

Mr. HUDDLESTON. Is the gentleman from Georgia, Mr. BRAND, not now present?

Mr. STAFFORD. I do not see either the gentleman from Georgia, Mr. BRAND, or the gentleman from Georgia, Mr. CRISP. It was my notion that the gentleman from Alabama made his point of order of no quorum a few moments ago for the purpose of bringing these two gentlemen from Georgia, who seem to be interested in the bill, into the Hall of the House.

Mr. HUDDLESTON. Oh, it was my purpose to bring the majority into the Hall of the House.

Mr. STAFFORD. But there was no occasion for the majority being present until to-day, except it was to hear the gentleman

from Alabama address the House, and I regret that he extended his remarks in the RECORD instead of giving the majority present the benefit of hearing him deliver his speech.

Mr. HUDDLESTON. I did that as a matter of necessity, and I shall now prefer my request for unanimous consent to speak upon the subject in the House.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MANN. Mr. Speaker, reserving the right to object, I ask unanimous consent that the bill go over without prejudice.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the bill go over without prejudice. Is there objection?

Mr. STAFFORD. Mr. Speaker, I do not know what the plan of the majority leader is about the next call of the Unanimous Consent Calendar. I am interested in this bill and take issue with the position of the chairman of the Committee on the Judiciary on some amendments that he is proposing. I would like to have it understood that if at the next call of the Calendar for Unanimous Consent this bill is brought up, and I am not present, the bill may go over until the regular session in December. I have been hanging around here to amend this bill for several months. A great many people in the country are interested in the bill. With that understanding I have no objection to its going over.

Mr. HUDDLESTON. Mr. Speaker, I object.

Mr. MANN. I will say to the gentleman from Alabama [Mr. HUDDLESTON] that this is a bill in which the Georgia delegation is very much interested, I think. It is a bill that has passed the Senate, and the gentleman from Georgia [Mr. BRAND] is particularly interested. I hope there will be no objection to passing it over.

Mr. HUDDLESTON. I understood that the gentleman from Georgia has been objecting to the bill.

Mr. MANN. Not at all. He wants to pass it.

Mr. HUDDLESTON. I suggest the bill go over, then.

Mr. MONDELL. If there is a question of these bills going over because gentlemen are interested in them, there is a new element introduced in the matter of unanimous consent. The gentleman from Alabama [Mr. HUDDLESTON] is objecting that some one is interested——

Mr. HUDDLESTON. I object, Mr. Speaker.

Mr. DYER. Mr. Speaker, in the absence of the chairman of the Judiciary Committee, I ask that this bill may go over without prejudice.

The SPEAKER. The gentleman from Missouri asks unanimous consent that this bill go over without prejudice. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, that is with the understanding that a full quorum of the House is present. The chairman of the committee has been here all the last week. This bill has been hanging fire for the last eight months.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. STAFFORD. Mr. Speaker, I object.

Mr. MONDELL. Mr. Speaker, was there objection made?

The SPEAKER. The gentleman from Alabama objected. The Clerk will report the next bill.

Mr. GARNER. Mr. Speaker, the gentleman from Alabama [Mr. HUDDLESTON] did not object to its going over.

The SPEAKER. But the gentleman from Wisconsin objected to its going over.

Mr. GARNER. The RECORD should show just exactly what it is.

MAILS FOR THE BLIND.

The next business on the Calendar for Unanimous Consent was the bill H. R. 10496, to provide for the free transmission through the mails of certain publications for the blind.

The SPEAKER. Is there objection to the consideration of this bill?

Mr. STAFFORD. Mr. Speaker, I ask unanimous consent that this bill go over without prejudice.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent that the bill go over without prejudice. Is there objection? [After a pause.] The Chair hears none.

LAC DU FLAMBEAU BAND OF CHIPPEWAS, WISCONSIN.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6428) for the enrollment and allotment of members of the Lac du Flambeau Band of Lake Superior Chippewas, in the State of Wisconsin, and for other purposes.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. HUDDLESTON. Mr. Speaker, reserving the right to object, I do not think the time of the House ought to be taken up with unanimous-consent bills in the great crisis which is now confronting us. We are here for a purpose, and a very important purpose. The House ought to function. We failed to function for four days of last week when we might have done so.

Mr. DYER. Mr. Speaker, I ask for the regular order.

The SPEAKER. The regular order is, Is there objection?

Mr. HUDDLESTON. I object.

ACCOUNTS OF DIPLOMATIC AND CONSULAR OFFICERS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 7764) authorizing the accounting officers of the Treasury to adjust certain accounts of certain diplomatic and consular officers.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WINGO. Reserving the right to object, what is the nature of this bill?

Mr. STAFFORD. When this bill was last under consideration the gentleman from New Jersey [Mr. ACKERMAN] asked unanimous consent to have it passed over in order to submit to the House additional information. The report from the Committee on Foreign Affairs is as illuminating as most reports from that committee. As the information has not been furnished, I ask unanimous consent that the bill go over without prejudice.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

AMENDMENT TO SECTION 100 OF JUDICIAL CODE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10817) to amend section 100 of the Judicial Code of the United States.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. WINGO. Reserving the right to object, what is the nature of this bill?

Mr. CABLE. It is simply to amend the Judicial Code as to Ohio in order to permit the holding of a term of court at Lima, Ohio. It is a local matter and will entail no additional expense on the Government, because the county has agreed to furnish a courtroom there free of charge.

Mr. HUDDLESTON. Inasmuch as it is a local matter I am not inclined to allow it to be considered, and therefore I am compelled to object.

Mr. Speaker, I make the point of order there is no quorum present.

The SPEAKER. The gentleman from Alabama makes the point of order there is no quorum present. The Chair will count. [After counting.] Two hundred and nineteen Members are present, a quorum. Is there objection to the consideration of the bill?

Mr. HUDDLESTON. Objection to what?

The SPEAKER. To the consideration of the bill?

Mr. HUDDLESTON. I object to it.

Mr. CABLE. Mr. Speaker, I ask unanimous consent that the bill go over without prejudice.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the bill be passed without prejudice. Is there objection? [After a pause.] The Chair hears none.

CLAIMS OF AMERICAN CITIZENS.

The next business on the Calendar for Unanimous Consent was the bill (S. 2235) to confer jurisdiction upon the Court of Claims to adjudicate the claims of American citizens.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. WINGO. Mr. Speaker, reserving the right to object——

Mr. STAFFORD. Mr. Speaker, I object.

RENTS, ETC., FROM LANDS WITHIN NAVAL PETROLEUM RESERVES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11363) granting a portion of the rents, royalties, and bonuses received from lands within naval petroleum reserves to the States within the boundaries of which said reserves are located.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUDDLESTON. Mr. Speaker, I object.

MARKING OF ANCHORAGE GROUNDS IN UNITED STATES WATERS.

The next business on the Calendar for Unanimous Consent was the bill (S. 2199) to provide for the marking of anchorage grounds in waters of the United States.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WINGO. Reserving the right to object, has this anything to do with prohibition?

Mr. PARKER of New York. I will inform the gentleman that it was not put in for that reason.

Mr. WINGO. It has been suggested that this is possibly an indirect amendment to the Volstead Act. Is that true?

Mr. PARKER of New York. No.

Mr. STAFFORD. It provides for rum runners.

Mr. HUDDLESTON. Mr. Speaker, I object to the consideration of the bill.

The SPEAKER. The gentleman from Alabama objects.

Mr. PARKER of New York. Mr. Speaker, I ask unanimous consent that the bill go over without prejudice.

The SPEAKER. The gentleman from New York asks unanimous consent that the bill go over without prejudice. Is there objection?

There was no objection.

BRIDGE ACROSS THE TUG FORK OF THE BIG SANDY RIVER, KY.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11477) granting the consent of Congress to the Freeburn Toll Bridge Co. to construct a bridge across the Tug Fork of the Big Sandy River, in Pike County, Ky.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. HUDDLESTON. I object.

The SPEAKER. The gentleman from Alabama objects. The Clerk will report the next bill.

DAM ACROSS THE MAHONING RIVER, OHIO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11722) granting the consent of Congress to the city of Warren, in the State of Ohio, its successors and assigns, to construct, maintain, and operate a dam across the Mahoning River, in the State of Ohio.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. HUDDLESTON. I object.

The SPEAKER. The gentleman from Alabama objects. The Clerk will report the next bill.

BRIDGE ACROSS THE OHIO RIVER, WEST VIRGINIA AND OHIO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11901) authorizing the construction of a bridge across the Ohio River to connect the city of Benwood, W. Va., and the city of Bellaire, Ohio.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. HUDDLESTON. Mr. Speaker, I object.

The SPEAKER. The gentleman from Alabama objects. The Clerk will report the next bill.

GRANT OF CONCURRENT JURISDICTION TO TERRITORIAL COURTS OF PORTO RICO FOR ENFORCEMENT OF NATIONAL PROHIBITION ACT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 9270) to confer upon the Territorial courts of Porto Rico concurrent jurisdiction with the United States courts of that district of all offenses under the national prohibition act and all acts amendatory thereof or supplementary thereto.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. TOWNER. Mr. Speaker, I ask unanimous consent that the bill go over without prejudice.

The SPEAKER. The gentleman from Iowa asks unanimous consent that the bill go over without prejudice and that it retain its place on the calendar. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the next bill.

EXTENSION OF OIL LEASING ACT TO CERTAIN LANDS IN UTAH.

The next business on the Calendar for Unanimous Consent was the bill (S. 2460) to extend the provisions of section 18A of an act approved February 25, 1920 (41 Stats., p. 437), to certain lands in Utah.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. HUDDLESTON. I object, Mr. Speaker.

The SPEAKER. The gentleman from Alabama objects.

Mr. COLTON. Mr. Speaker, I ask unanimous consent that the bill retain its place on the calendar.

The SPEAKER. The gentleman from Utah asks unanimous consent that the bill retain its place on the calendar. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the next bill.

CANCELLATION OF GOVERNMENT LOANS TO DROUGHT-STRICKEN FARMERS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11966) defining the crop failure in the production of wheat, rye, barley, oats, and flax by those to whom the Government of the United States loaned money, under the act of March 3, 1921, for the purchase of wheat, rye, barley, oats, or flax for seed, and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. WINGO. Mr. Speaker, reserving the right to object, will the gentleman explain the bill? I may be for it.

Mr. STAFFORD. I object.

Mr. WINGO. I hope the gentleman will not object.

The SPEAKER. The gentleman from Wisconsin objects. The Clerk will report the next bill.

FURNISHING MARKET PRICES BY RADIOPHONE TO FARMERS.

The next business on the Calendar for Unanimous Consent was the resolution (H. Res. 357) directing the United States Department of Agriculture and the Post Office Department to investigate the feasibility of furnishing market prices of cotton, corn, wheat, live stock, and dairy products by radiophone to the farmers.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. HUDDLESTON. Mr. Speaker, I object.

The SPEAKER. The gentleman from Alabama objects. The Clerk will report the next bill.

SURVEY OF POTOMAC RIVER BANKS.

The next business on the Calendar for Unanimous Consent was the resolution (S. J. Res. 192) providing for survey of the Potomac River banks and adjacent lands from Washington, D. C., to Great Falls, with a view to possible extension of the District park system.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this resolution?

Mr. DYER. Mr. Speaker, I ask unanimous consent that the resolution may go over without prejudice.

The SPEAKER. The gentleman from Missouri asks unanimous consent that the resolution may go over without prejudice. Is there objection?

Mr. STAFFORD. I object to the consideration of the bill.

The SPEAKER. The gentleman from Wisconsin objects. The Clerk will report the next bill.

CLAIMS OF PRIVATE PARTIES TO THE MARIVELES QUARRY, PHILIPPINE ISLANDS.

The next business on the Calendar for Unanimous Consent was the resolution (S. J. Res. 23) authorizing the Secretary of War to investigate the claims of private parties to the Mariveles Quarry, within the limits of a United States military reservation in the Philippine Islands, and to permit the working thereof by the persons entitled thereto, provided military necessities permit.

The title of the resolution was read.

The SPEAKER. Is there objection to the present consideration of this resolution?

Mr. HUDDLESTON. I object.

The SPEAKER. The gentleman from Alabama objects.

Mr. HILL. Mr. Speaker, I ask unanimous consent that the resolution retain its place on the calendar.

The SPEAKER. The gentleman from Maryland asks unanimous consent that the resolution retain its place on the calendar. Is there objection?

Mr. DYER. I object.

The SPEAKER. The gentleman from Missouri objects. The Clerk will report the next bill.

AMENDMENT OF THE PUBLIC BUILDINGS ACT OF MARCH 4, 1913.

The next business on the Calendar for Unanimous Consent was the bill (S. 3163) to amend an act approved March 4, 1913, entitled "An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the

erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes."

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. LONDON. Mr. Speaker, I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LONDON. Is it in order to object to the entire column at one time?

The SPEAKER. No. One can not object until the bill is reported.

Mr. LONDON. I object.

The SPEAKER. The gentleman from New York objects.

Mr. HUDDLESTON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The Chair does not think a gentleman can compel the Chair to count every five minutes.

Mr. HUDDLESTON. Mr. Speaker, I take the decision of the Chair without a count. It is entirely a matter for the Speaker's conscience.

The SPEAKER. The Chair thinks there would be a quorum here by the time the Chair counted. [Applause.]

Mr. WINGO. Mr. Speaker, in view of that statement I hope the Chair will let a count be made.

The SPEAKER. Of course, any gentleman has the right to have a quorum present, but the Chair believes there is a quorum present, including those in the cloakroom. Every time the Chair has counted there has been considerably more than a quorum.

Mr. WINGO. My only point was that from the Speaker's statement it might be inferred that less than a quorum was present, but that if he counted there would be a quorum by the time he finished counting. I do not care about the count particularly.

The SPEAKER. The Chair thanks the gentleman. The Chair did not intend to intimate that. The Chair thinks there is a quorum present. The Clerk will report the next bill.

FORT MONROE MILITARY RESERVATION.

The next business on the Calendar for Unanimous Consent was Senate Joint Resolution 156, authorizing the Secretary of War to grant a permit to erect and maintain a hotel upon the Fort Monroe Military Reservation in Virginia.

The Clerk read the title of the joint resolution.

Mr. HULL. Mr. Speaker, I ask unanimous consent that this joint resolution be passed over without prejudice.

The SPEAKER. The gentleman from Iowa asks unanimous consent that the joint resolution be passed over without prejudice. Is there objection?

There was no objection.

SURVEY OF POTOMAC RIVER BANKS.

Mr. MOORE of Virginia. Mr. Speaker, I ask unanimous consent that No. 343 on the calendar, which is Senate Joint Resolution 192, providing for a survey of the Potomac River and adjacent lands from Washington, D. C., to Great Falls, retain its place on the calendar.

The SPEAKER. The gentleman from Virginia asks unanimous consent that the bill referred to retain its place on the calendar. Is there objection?

Mr. STAFFORD. What is the title of the bill?

The SPEAKER. It is the bill providing for a survey of the Potomac River from Washington, D. C., to Great Falls.

Mr. STAFFORD. I object.

AMERICAN MATHEMATICAL SOCIETY.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 9218) to incorporate the American Mathematical Society.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUDDLESTON. I object.

Mr. CURRY. I ask unanimous consent that the bill retain its place on the calendar.

The SPEAKER. The gentleman from California asks unanimous consent that the bill retain its place on the calendar. Is there objection?

There was no objection.

WHITE HOUSE POLICE FORCE.

The next business on the Calendar for Unanimous Consent was the bill (S. 3659) to create the White House police force, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUDDLESTON. I object.

Mr. CHINDBLOM. Mr. Speaker, I ask unanimous consent that the bill retain its place on the calendar.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the bill retain its place on the calendar. Is there objection?

There was no objection.

LAC DU FLAMBEAU BAND OF LAKE SUPERIOR CHIPPEWAS.

Mr. CHINDBLOM. Mr. Speaker, I ask unanimous consent that calendar No. 273, which is H. R. 6428, retain its place on the calendar. It is a bill relating to allotments of land to Indians on the Lac du Flambeau Reservation. I was up there recently, and I know from personal knowledge that it is a very meritorious bill. Its author, the gentleman from Wisconsin [Mr. A. P. NELSON], is unavoidably absent to-day, I am informed.

The SPEAKER. The gentleman from Illinois asks unanimous consent that this bill retain its place on the calendar. Is there objection?

There was no objection.

WATER STREET, DISTRICT OF COLUMBIA.

The next business on the Calendar for Unanimous Consent was the bill (S. 813) to authorize the Commissioners of the District of Columbia to close upper Water Street between Twenty-first and Twenty-second Streets NW.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUDDLESTON. I object.

The SPEAKER. The gentleman from Alabama objects. The Clerk will report the next bill.

PRESQUE ISLE, ERIE, PA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10144) conveying the peninsula of Presque Isle, Erie, Pa., to the State of Pennsylvania, its original owner, for public park purposes.

The Clerk read the title of the bill.

Mr. SHREVE. Mr. Speaker, I ask unanimous consent that this bill be passed without prejudice.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that this bill retain its place on the calendar. Is there objection?

There was no objection.

CAREY SEGREGATION NO. 11.

The next business on the Calendar for Unanimous Consent was the bill (S. 3195) to authorize the Secretary of the Interior to accept completion of Carey segregation No. 11 and to issue patent therefor.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUDDLESTON. I object.

Mr. VAILE. I ask unanimous consent that the bill retain its place on the calendar.

The SPEAKER. The gentleman from Colorado asks unanimous consent that this bill retain its place on the calendar. Is there objection?

There was no objection.

CHIEF OF STAFF OF THE ARMY.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11699) relating to the appointment of the Chief of Staff of the Army.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUDDLESTON. I object.

Mr. McKENZIE. Mr. Speaker, I move to suspend the rules and pass this bill.

The SPEAKER. The gentleman from Illinois moves to suspend the rules and pass the bill, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding other provisions of law touching eligibility for appointment and service as Chief of Staff, the present Deputy Chief of Staff may be appointed Chief of Staff, and when so appointed shall be eligible to serve as such for a period of four years, unless sooner relieved.

The SPEAKER. Is a second demanded?

Mr. HUDDLESTON. Mr. Speaker, I demand a second.

Mr. McKENZIE. I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Illinois asks unanimous consent that a second be considered as ordered. Is there objection?

Mr. HUDDLESTON. I object.

The SPEAKER. The gentleman from Alabama objects.

Mr. MCKENZIE and Mr. HUDDLESTON were appointed as tellers.

The House divided, and the tellers reported that there were 140 ayes and no nays.

Mr. HUDDLESTON. Mr. Speaker, I make the point that no quorum is present.

The SPEAKER. The gentleman from Alabama makes the point that no quorum is present, and the Chair will count. [After counting.] One hundred and eighty-one Members present, not a quorum. The Doorkeeper will close the doors, the Sergeant at Arms will bring in the absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 214, nays 30, not voting 183, as follows:

So a second was ordered.

The following pairs were announced:

Mr. Burton with Mr. Oldfield.
Mr. Wood of Indiana with Mr. Sisson.
Mr. Crowther with Mr. Kitchin.
Mr. Nolan with Mr. Riordan.
Mr. Knutson with Mr. Linthicum.
Mr. Reed of New York with Mr. Jacoway.
Mr. Langley with Mr. Clark of Florida.
Mr. Ackerman with Mr. Montague.
Mr. Keller with Mr. Sullivan.
Mr. A. P. Nelson with Mr. Cantrill.
Mr. Olpp with Mr. Kindred.
Mr. Lineberger with Mr. Gallivan.
Mr. Fess with Mr. Larsen of Georgia.
Mr. Atkeson with Mr. Tague.
Mr. Burroughs with Mr. Woods of Virginia.
Mr. McArthur with Mr. Wise.
Mr. Luce with Mr. Carter.
Mr. Kline of Pennsylvania with Mr. Blanton.
Mr. Funk with Mr. Lyon.
Mr. Thompson with Mr. Brand.
Mr. Steenerson with Mr. Deal.
Mr. Timberlake with Mr. Stedman.
Mr. Burtness with Mr. Stoll.
Mr. Graham of Pennsylvania with Mr. Barkley.
Mr. Magee with Mr. Fields.
Mr. Sinclair with Mr. Dupré.
Mr. Ward of New York with Mr. Connally of Texas.
Mr. Beck with Mr. Cockran.
Mr. Gahn with Mr. Kunz.
Mr. Lee of New York with Mr. McSwain.
Mr. Porter with Mr. Rainey of Illinois.
Mr. Arentz with Mr. Logan.
Mr. Coughlin with Mr. Goldsborough.
Mr. Hukriede with Mr. Griffin.
Mr. Codd with Mr. Fulmer.
Mr. Magee with Mr. Martin.
Mr. Webster with Mr. Hawes.
Mr. Yates with Mr. Collier.
Mr. Sinclair with Mr. Hooker.
Mr. Beedy with Mr. Collins.
Mr. Frear with Mr. Dominick.
Mr. Wheeler with Mr. Crisp.
Mr. Hutchinson with Mr. Gilbert.
Mr. Maloney with Mr. Drewry.
Mr. Shelton with Mr. Ten Eyck.
Mr. Bland of Indiana with Mr. Mead.
Mr. Volk with Mr. Bell.
Mr. Slemp with Mr. Taylor of Arkansas.
Mr. Taylor of New Jersey with Mr. Raker.
Mr. Brown of Tennessee with Mr. O'Brien.
Mr. Snyder with Mr. Park of Georgia.
Mr. Perlman with Mr. Sabath.
Mr. Stiness with Mr. Rucker.
Mr. Kahn with Mr. Sears.
Mr. Layton with Mr. Johnson of Kentucky.
Mr. Luhring with Mr. Rainey of Alabama.
Mr. Kearns with Mr. Johnson of Mississippi.
Mr. Cramton with Mr. Harrison.

The result of the vote was announced as above recorded.

A quorum being present, the doors were opened.

The SPEAKER. The gentleman from Illinois [Mr. MCKENZIE] is recognized for 20 minutes and the gentleman from Alabama [Mr. HUDDLESTON] for 20 minutes.

Mr. MCKENZIE. Mr. Speaker and gentlemen of the House, this is a bill to make an exception to a general law which the

members of the Committee on Military Affairs, after examining all of the circumstances, feel the Congress of the United States would be warranted in doing. Under a general law enacted by Congress, all officers in the Army are subject to what is known as the Manchu law. In other words, an officer may be detailed in the city of Washington, and serve in the city of Washington for a term of four years, but after that time he must go out into the field. That is a law which, in my judgment, is not only a wise law for the country but beneficial to the officers in the Army as well. Should General Pershing elect to remain until retired, under the existing law General Harbord, who is now detailed as Acting Chief of Staff, will have to leave the city of Washington, should he be appointed Chief of Staff, soon after his selection, which would be unfortunate. In other words, if General Pershing should decide to remain as Chief of Staff, he has something over two years yet to serve, and at that time General Harbord unquestionably would be made Chief of Staff. In such an event, then, at the expiration of 10 months he would have to give up his position as Chief of Staff and go out of the city of Washington on some other detail.

Mr. HUDDLESTON. Mr. Speaker, will the gentleman yield?

Mr. McKENZIE. Yes.

Mr. HUDDLESTON. I want to ask the gentleman just when General Harbord would have to be detailed elsewhere. When will his four-year period expire?

Mr. McKENZIE. In about 2 years and 10 months, as I understand it.

Mr. HUDDLESTON. The gentleman can not give us the exact date?

Mr. McKENZIE. No; but this bill simply provides that when the President appoints him he may serve for four years as Chief of Staff from date of appointment.

I think the enactment of this law is justified by the fact that General Harbord as an officer in the United States Military Establishment has the unqualified respect and admiration of all the officers of the Army. Not only that, but we were impelled by another reason, and that is the fact that General Harbord came into the military service from private life and entered as an enlisted man. He worked his way up. He is not a West Point graduate. He worked his way from a private to the position which he now holds. As an American citizen I feel that no better example can be set before the young men of this country than to have the Congress of the United States say that this man, who has come up from private life by hard work, study, and application to his profession, qualified himself for the position of Chief of Staff.

I feel that removing the barrier in his way will be a splendid thing for the Army and a good thing for the country generally. I can not conceive of any objection to the bill, because we have limited its provisions to General Harbord alone. We feel that it is an honor that is justly due to General Harbord.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. McKENZIE. Yes.

Mr. MANN. How did General Harbord enter the Army?

Mr. McKENZIE. He enlisted in the Army as a private.

Mr. BANKHEAD. Mr. Speaker, will the gentleman yield?

Mr. McKENZIE. Yes.

Mr. BANKHEAD. What is General Harbord's present rank and age?

Mr. McKENZIE. His present rank is assistant to the Chief of Staff.

Mr. BANKHEAD. He is a major general?

Mr. McKENZIE. Yes.

Mr. BANKHEAD. What is his age?

Mr. McKENZIE. I can not give his age.

Mr. STAFFORD. He is 56 years old.

Mr. McKENZIE. He rendered valuable service to his country over in France. I think it is unnecessary for me to take the time of the House in relating the services of General Harbord, because I believe those services are well known to every American citizen. Mr. Speaker, I reserve the remainder of my time.

Mr. HUDDLESTON. Mr. Speaker, I trust that Members of the House now fully appreciate the purpose and importance of this bill. The gentleman from Illinois [Mr. McKENZIE] has given us a short but lucid explanation and has made a very frank statement which bears upon the pressing and urgent necessity for action upon the bill. He has told us frankly that its purpose is to set aside a general law for the benefit of a single officer of the Army, to wit, General Harbord.

I can not think of anything which would justify the proposed action unless it is true that General Harbord is the only officer of the Army who is fit to be detailed for this duty and who is competent to perform its functions. If there is no other officer who approaches him in qualifications and merit, then perhaps there should be special legislation applying to General Harbord. But, of course, merely to state that proposition is to refute it. I do not doubt that we have other officers who can perform the functions of Chief of Staff comparably with General Harbord. The principle of this legislation is bad. It is equivalent to promotion by special statute. It is equivalent to any other preferential action by Congress in behalf of an individual.

Mr. McKENZIE. Mr. Speaker, will the gentleman yield?

Mr. HUDDLESTON. Yes.

Mr. McKENZIE. I may not have made myself clear, but surely I should disabuse the gentleman's mind of any idea that he may entertain that the Committee on Military Affairs acted upon the bill simply because it was going to be a great favor to General Harbord. We did it because we believed it would be a good thing for the country.

Mr. HUDDLESTON. Oh, yes; I knew that was what the gentleman would say. I did not misunderstand him. None of us think that he is going to present the bill with the cold statement that its purpose is to do a favor for an officer. He would not get far with such a bill. Of course, like all special legislation that is brought into the House, it is for the public benefit. That is the front put on every piece of special legislation that was ever presented in this House.

It is easy to say that a bill is for the public welfare, and it is hard to prove it is not. We have general laws that have equal application to everybody under all circumstances at all times. It is very dangerous, as every legislator knows, to begin to make exceptions to this law and conditions to that for the benefit of a special individual or special interest. Such processes of legislation have brought this country into more trouble than any other species of legislation that we have ever adopted.

That is the meaning of this bill. It ought not to be voted under any circumstances, no matter how pressing the occasion, but here we are, confronted with this situation. This is the sixth legislative day we have been here and only to-day have the majority been able to muster a quorum. At last we have a quorum, and now we wonder what we are here for.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. HUDDLESTON. Yes.

Mr. RANKIN. As I understand it, something like two and one-half or three years must elapse before General Harbord will have to leave Washington, at any rate.

Mr. HUDDLESTON. Two years and ten months, so the gentleman from Illinois [Mr. McKENZIE] states.

Mr. RANKIN. What is the reason for the hurry?

Mr. HUDDLESTON. There is not the slightest reason in the world for it. We can pass this bill at any time within the next two years and ten months, and accomplish exactly the thing the gentleman from Illinois says he wants to accomplish. And that is exactly the reason I made the objection to the bill. I should not ordinarily have concerned myself about this piece of special legislation. There is so much of it that goes through the House. It is not upon me to oppose it, but on the majority to prevent such abuses. I should not have put myself in the position of opposing this bill if it was necessary for the bill to be considered at this time. We have two years and ten months in which to consider it, yet it is brought forward under a procedure to suspend the rules of the House at this time when there is so much of real importance that needs to be considered.

Mr. LONDON. Does not the gentleman consider this legislation safer than tariff legislation?

Mr. HUDDLESTON. It may be safer for the Republican Party than the kind of tariff legislation they are pressing.

But, as I way saying, Members are brought here into the House; we are informed by telegram that the presence of Congress is desired in a great national crisis. We came here on last Tuesday, and have adjourned day after day, and day after day, without a quorum. The majority, although they have more than the number of Members necessary to constitute a quorum of their own, are unable to produce a quorum even to hear a President of their own party deliver his address. But for the consideration of those who thought of demanding the presence of a quorum on last Friday the country would have been humiliated by having the House assembled to hear the President when the Republicans were unable to muster enough Members to hear him. That would have been the situation. The President would have marched up the hill, and then marched ingloriously down again.

But perhaps the majority knew what was going to happen. Perhaps they realized that after all they might just as well have remained at home and read the President's address in the newspapers. Perhaps they realized how the message would be received by the millions of workingmen in this country, who feel that they have been dealt with most unjustly in that message.

Perhaps it might have been better for the majority and their party had they defeated by remaining away the President's desire to choose this forum from which to appeal to public opinion with an unfair, unjust, and unprejudiced statement of the strike situation. And yet we are called here to consider this little trashy bill. That is the sole purpose of Congress having been assembled, so far as we have any reason to know.

Mr. GREENE of Vermont. Did not this Congress last June take a recess definitely until the 15th of August? We are not assembled here for special cause.

Mr. HUDDLESTON. We received a telegram——

Mr. GREENE of Vermont. We adjourned the House definitely until August 15, for the purpose of coming back here with the expectation that the tariff bill would be ready, and not because you received a telegram.

Mr. HUDDLESTON. And gentlemen of the other side are now demonstrating to the country that we might as well have adjourned the House until December.

Mr. GREENE of Vermont. I dare say——

Mr. HUDDLESTON. We have before the country questions of the greatest importance.

Mr. GREENE of Vermont. And the less we talk about them the quicker they will be settled.

Mr. HUDDLESTON. No; but they certainly should be talked about by men who have an understanding of the labor movement. The position of the workers has been challenged in the House by the Chief Executive of the Nation. It may well be that the less he had said the better, but the gentleman from Vermont [Mr. GREENE] should have given that advice to the chief of his party before he came here, and with phrases which well might have been borrowed from paid antiunion propagandists condemned the railroad workers and coal miners——

Mr. COOPER of Ohio. Will the gentleman yield?

Mr. HUDDLESTON. With pleasure.

Mr. COOPER of Ohio. Will the gentleman from Alabama point out one instance where the President made his attack upon the railroad workers in his message which he just spoke of?

Mr. HUDDLESTON. Has the gentleman read the message?

Mr. COOPER of Ohio. Yes; I have. I wish you would point it out to the House where he made an attack upon the railroad workers. Now, the message is here. Point it out to the House.

Mr. HUDDLESTON. The gentleman from Ohio [Mr. COOPER] is himself a member of a most respectable labor organization. He ought to be familiar with the spirit and the disposition of the workers of this country. The President recounted with emphasis and magnifying detail the reports of strike excesses. He asserted, as though indisputably true, that the crimes and acts of violence had been committed by members of the unions. He charges them against the unions. He blamed unionism for the offenses.

The gentleman from Ohio knows how members of unions are fed up on that kind of talk; how they recognize its purpose to put them in a bad light before public opinion; how it is used to distract attention from the merits of their cause. He knows antiunion propaganda when he hears it; always it is the same cry; the propagandists dare not condemn the union, they deplore its abuse of power, they charge it with encouraging violence, and so attack by "side swiping." He heard the President proclaim that he would use all the power of the Government "to maintain transportation and to sustain the right of men to work." [Applause on the Republican side.] Oh, the gentleman from Ohio [Mr. COOPER] may not have understood. But when I hear these gentlemen applauding those supporters of the employer class and employer legislation—these opponents of every thing whatsoever that savors of labor unionism—when I hear this applause from such sources I realize they have not misunderstood.

Mr. GREENE of Vermont. Would you keep the trains running if you had the power?

Mr. HUDDLESTON. Yes; if it was lawful and it was my official duty to do so.

Mr. GREENE of Vermont. Is it not lawful to work at any time? Would you undertake to protect men who are working in the place of men who had struck?

Mr. HUDDLESTON. Not at all. If I were President, I should know that I had not the constitutional authority to do such a thing.

Mr. GREENE of Vermont. All right. I wanted to get your views as clearly before the public as the views of those whom you seek to attack.

Mr. HUDDLESTON. And now we have also got the views of the gentleman from Vermont [Mr. GREENE] very clearly.

Mr. GREENE of Vermont. There is no question about it. I say when this country comes to the point where an honest man can not go and do an honest act of work unmolested by men who do not want to work themselves, the country has gone to pot.

Mr. HUDDLESTON. Under what provision of the Constitution would you protect strike breakers?

Mr. GREENE of Vermont. I am not now discussing the interpretation of law. I am discussing a constitutional right. Every man under the Constitution is guaranteed the right to work.

Mr. HUDDLESTON. The gentleman is not a lawyer?

Mr. GREENE of Vermont. No.

Mr. HUDDLESTON. And hence the gentleman is not supposed to know anything of the Constitution or the law. Let me say for the gentleman's information, then, there is no Federal law and there is nothing in the Federal Constitution which guarantees to any man the right to work. If the President, except in obedience of the mandate of the Constitution and of the laws which Congress has passed, should presume to interfere with the domestic affairs of a State, although for the preservation of order, he would be guilty of usurpation, and its evil effect upon this country would far exceed anything that a lawless private person might do.

As I heard the President say that he would "use all the power of the Government," I wondered whether he considered himself the Government. I wondered whether he would say, "I am the State." Has he that idea in his mind? If he has, it is time that some of his friends disabuse him of it. The President has no authority except what is given to him by the Constitution and except what Congress has clothed him with. He has no authority to run the trains or safeguard any man in his employment.

Mr. GREENE of Vermont. Mr. Speaker, will the gentleman yield there?

Mr. HUDDLESTON. The gentleman will excuse me. We have yet, as perhaps the gentleman from Vermont does not know, a system of sovereign self-governing States in this country. We have yet a system of police powers retained by the several States, and which must be exercised by them. Those powers include, in chief, as I might say, the preservation of order. That is the primary function of a State government. It is only in certain specific instances which I have not the time to point out that the Federal Government may under any circumstances intervene. Any unauthorized intervention is a usurpation which will meet with the indignation of all right-thinking people. Any attempt to interfere with the exercise of the police powers of the States will, as I say, be much more harmful to the public welfare than any mere isolated acts of violence, or even the crime that the President referred to with so much emotion, as illustrating the spirit of union labor, to wit, the tragedy at Herrin, Ill. I would insist that the President stay inside the Constitution.

The SPEAKER pro tempore (Mr. LONGWORTH). The time of the gentleman from Alabama has expired.

Mr. McKENZIE. Mr. Speaker, I yield five minutes to the gentleman from Vermont [Mr. GREENE].

The SPEAKER pro tempore. The gentleman from Vermont is recognized for five minutes.

Mr. GREENE of Vermont. Mr. Speaker, I do not suppose it is necessary to attempt to say any word in explanation of the very lucid and, it seems to me, convincing statement of the purpose of this bill that was made by my colleague from Illinois [Mr. McKENZIE], the acting chairman of the Committee on Military Affairs. It is not a fact, notwithstanding there may be some misunderstanding about it, that this bill was suddenly projected into this atmosphere with intent to take up a piece of business that ought not perhaps now to be thought as timely as anything else. In the calling of the Unanimous Consent Calendar this bill was called automatically, and it being suspension day, it was in order to suspend the rules and pass it. This bill had its place on the calendar, and it has not been the policy of the majority party here on the floor to undertake to do useless business.

Mr. JONES of Texas. Mr. Speaker, will the gentleman yield?

Mr. GREENE of Vermont. Yes.

Mr. JONES of Texas. I was wondering why the Committee on Military Affairs found it desirable to insert the amendment and why is General Harbord practically specified in it? If General Harbord was the destined man for the place, he could be appointed under the language as first drafted.

Mr. GREENE of Vermont. I think I can explain that to the gentleman; at least I will try to. The gentleman will remember that for a good many years we have tried to put an end to an evil that had grown up in the Army of too much detail of officers to Washington, so that the city was filled up with them, as we used to say extravagantly, but with some emphasis; so it was emphasized in the Army reorganization act that when an

officer had performed four years of a detail in Washington, he was, as it was called, "Manchued"; he was not eligible for reappointment to a second four years here, but he must go back to the troops and do service with the troops before he would be eligible to come back to Washington again.

Mr. JONES of Texas. I was not opposed to the general purposes of the bill; but why strike out the general officers of the line?

Mr. GREENE of Vermont. Simply because the committee did not want to repeal that law as a general policy; simply because the committee had in mind the services of General Harbord and the peculiar situation of the War Department with regard to him and the use of his services. I will explain that, I think, to the gentleman's satisfaction. The gentleman will recall that as a tribute of the country's gratitude to General Pershing for his war services this Congress made him in fact a general, an office we have not had before in this generation. Obviously there was no place in the military establishment to which he could be assigned tactically. Except for our desire to honor General Pershing personally we did not have need for a general.

Mr. JONES of Texas. Will the gentleman yield?

Mr. GREENE of Vermont. Just a moment. Perhaps I may get at it in a roundabout way, but I desire to be permitted to explain it in my own way. Obviously we could not put General Pershing under any other person's authority in the Army, so we had, of course, to make him Chief of Staff and put everybody else under him. When I say "we" I mean the Government. General Harbord was the man who might otherwise have been made Chief of Staff, but he had to be made Deputy Chief of Staff in order to get that kind of service out of him which was desired under the circumstance, because he must be ranked subordinate to General Pershing and not be Chief of Staff in his own name. Now, when General Pershing retires in two years, or perhaps sooner if he desires to do so, the Government wishes to be able to make General Harbord Chief of Staff in his own right as an appreciation of his services and as a means of obtaining the use of his distinguished ability, but it will not have the authority to do so under the law unless this act is passed.

The SPEAKER. The time of the gentleman from Vermont has expired.

Mr. McKENZIE. Mr. Speaker, I want to make just one statement for the benefit of some Members who have asked me the question. This legislation does not carry any additional expense to the Government.

Mr. JONES of Texas. Will the gentleman yield for a question?

Mr. McKENZIE. I yield two minutes to the gentleman from Ohio [Mr. COOPER]. [Applause.]

Mr. COOPER of Ohio. Mr. Speaker and gentlemen of the House, the gentleman from Alabama [Mr. HUDDLESTON] a few moments ago made the statement that the President of the United States on last Friday made an attack upon organized labor. I asked him to point out any place in the speech of the President where he had done such a thing. I have asked for these two minutes in order to read a part of the President's address along that line. He said:

> In the weeks of patient conference and attempts at settlement I have come to appraise another element in the engrossing industrial dispute of which it is only fair to take cognizance. It is in some degree responsible for the strikes and has hindered attempts at adjustment. I refer to the warfare on the unions of labor. The Government has no sympathy or approval for this element of discord in the ranks of industry. [Applause.] Any legislation in the future must be as free from this element of trouble making as it is from labor extremists who strive for class domination. We recognize these organizations in the law, and we must accredit them with incalculable contribution to labor's uplift. It is of public interest to preserve them and profit by the good that is in them, but we must check the abuses and the excesses which conflict with public interest, precisely as we have been progressively legislating to prevent capitalistic, corporate, or managerial domination which is contrary to public welfare.

[Applause.]

That was the position the President took on last Friday; and while I asked the gentleman from Alabama [Mr. HUDDLESTON] to point out one single instance in which the President made an attack upon the union railroad men of the country he failed to do so in my opinion. [Applause.]

Mr. McKENZIE. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on the motion of the gentleman from Illinois [Mr. McKENZIE] to suspend the rules and pass the bill as amended.

The question being taken, on a division there were—ayes 106, noes 13.

Mr. HUDDLESTON. Mr. Speaker, I make the point of order that there is no quorum of the House present.

The SPEAKER. The gentleman from Alabama makes the point of order that there is no quorum present. It appears that there is no quorum present. The Doorkeeper will close the doors. The Sergeant at Arms will bring in absent Members. As many as favor the motion to suspend the rules and pass the bill as amended will, as their names are called, answer "yea," those opposed "nay," and the Clerk will call the roll.

The question was taken; and there were—yeas 210, nays 35, not voting 182, as follows:

YEAS—210.

Stedman	Taylor, N. J.	Webster	

So (two-thirds having voted in the affirmative) the bill was passed.

The following additional pairs were announced:

Mr. Boise with Mr. Oliver.

Mr. Sweet with Mr. Aswell.

Mr. Graham of Illinois with Mr. Taylor of Colorado.

Mr. Scott of Michigan with Mr. Ward of North Carolina.

The result of the vote was announced as above recorded.

A quorum being present, the doors were opened.

PRINTING OF THE PRESIDENT'S MESSAGE.

Mr. KIESS. Mr. Speaker, I ask unanimous consent for the present consideration of the following resolution.

The Clerk read as follows:

House Resolution 408.

Resolved, That there be printed for the use of the House of Representatives 60,000 copies of the address delivered by the President of the United States to the Congress on August 18, 1922, to be distributed through the folding room.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. HUDDLESTON. Reserving the right to object, will not the gentleman let it go over until to-morrow? I shall be compelled to object to-day but will not to-morrow.

Mr. GARRETT of Tennessee. We have not finished consideration of the Unanimous Consent Calendar, and the gentleman can have this resolution passed to-morrow as well as to-day.

Mr. MANN. During President Wilson's administration there was no objection made to the printing of the President's message while I was Republican leader on the floor. It was conceded in every case that the message should be printed up to the limit of cost—$500. It seemed to me at that time that it would have been a mighty small man who would object to the printing of the President's message.

Mr. HUDDLESTON. Will the gentleman yield? I was going to ask the gentleman what the haste is about this matter that did not exist on the day the message was delivered, or on Saturday last. Why was not the request made then?

Mr. MANN. Probably it ought to have been made on the day it was delivered.

Mr. HUDDLESTON. Why is it so important that it be brought up to-day?

Mr. MANN. Because it is desirable, if it is to be done at all, that it should be done at once.

Mr. JOHNSON of Washington. And the Senate has ordered the printing.

Mr. HUDDLESTON. The majority has waited so long, and I will make an objection to-day.

Mr. KIESS. Mr. Speaker, I move to suspend the rules and pass the resolution.

Mr. GARRETT of Tennessee. I wish the gentleman would withhold that motion for a moment.

Mr. KIESS. I will.

Mr. GARRETT of Tennessee. I hope that the gentleman from Illinois did not infer from anything I said that I was objecting.

Mr. MANN. I certainly did not, or anyone else.

Mr. GARRETT of Tennessee. I thought, in view of the statement of the gentleman from Alabama, that it could be done by unanimous consent to-morrow. I think it ought to be done by unanimous consent, and not under a motion to suspend the rules. I should personally be glad if the gentleman from Alabama would withhold his objection.

Mr. HUDDLESTON. The remark of the gentleman from Illinois has made it impossible, I regret to say.

Mr. GARRETT of Tennessee. The gentleman from Illinois referred only to the messages of President Wilson. So far as I know, throughout my service which antedates that, there was never an objection to printing the message of any President of the United States, either those of President Taft or President Roosevelt.

Mr. MANN. I think there never was an objection to printing a President's message.

Mr. STEVENSON. Will the gentleman from Pennsylvania yield me a minute?

Mr. KIESS. I will yield to the gentleman.

Mr. STEVENSON. The question was raised as to why this request was not made on the day that the message was delivered. As a member of the Committee on Printing I will say that the Republican members of the Committee on Printing are always courteous to the minority member, and when they want to have anything of this kind done they have consulted me. I apprehend that they waited to consult me because I was not available at that time. I want to express my appreciation of that fact, and I hope there will be no objection because it has been modified on account of a suggestion I made. I think the resolution ought to be passed without any objection at all. [Applause.]

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. HUDDLESTON. Reserving the right to object, the gentleman from Illinois has indulged in a remark that makes it necessary that I should object.

Mr. KIESS. Mr. Speaker, I move to suspend the rules and pass the resolution.

The Clerk read the resolution, as follows:

Resolved, That there be printed for the use of the House of Representatives 60,000 copies of the address delivered by the President of the United States to the Congress on August 18, 1922, to be distributed through the folding room.

The SPEAKER. Is a second demanded?

There was no demand for a second.

The SPEAKER. The question is on passing the resolution.

The question was taken; and, two-thirds having voted in favor thereof, the resolution was passed.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that August 19 they had presented to the President of the United States for his approval the following bills:

H. R. 11233. An act authorizing the Secretary of Commerce to convey certain land to the county of Muscatine, Iowa;

H. R. 11054. An act to validate certain deeds executed by members of the Five Civilized Tribes, and for other purposes;

H. R. 10957. An act to rebuild the school building of the Indian school near Tomah, Wis.;

H. R. 10517. An act providing for the confirmation of title of certain purchasers from the State of Louisiana of lands formerly included in the Fort Sabine Military Reservation, in Cameron Parish, La., now abandoned;

H. R. 9814. An act amending the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service;

H. R. 9746. An act for the relief of Emmett Otto Cooney;

H. R. 9257. An act to permit adjustment of conflicting claims to certain lands in Mohave County, Ariz.;

H. R. 9048. An act to authorize the California Débris Commission to reimburse the city of Sacramento, Calif., for money expended by said city in the construction of the Sacramento weir;

H. R. 8845. An act for the relief of Mattie Alexander;

H. R. 8244. An act permitting Frances Mack Mann to purchase certain public lands;

H. R. 7812. An act to extend the time for cutting timber in the Coconino and Tusayan National Forests, Ariz.;

H. R. 7598. An act authorizing the Secretary of the Interior to dedicate and set apart as a national monument certain lands in Riverside County, Calif.;

H. R. 6817. An act to authorize the Secretary of the Interior to issue patent to the State of Michigan, in trust, of a certain described tract of land to be used as a game refuge;

H. R. 314. An act for the relief of Forrest R. Black;

H. J. Res. 316. Joint resolution authorizing the reappointment of Frederick Mears as a commissioned officer of the Regular Army and making him available, when so reappointed, for service as chairman and chief engineer of the Alaskan Engineering Commission; and

H. J. Res. 170. Joint resolution to approve the holding of a national and international exhibition in the city of Philadelphia in 1926 upon the Fairmount Park and parkway site selected by the Sesquicentennial Exhibition Association, and lands contiguous thereto that may be acquired for that purpose, as an appropriate celebration of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence.

MARIVELES QUARRY.

Mr. TOWNER. Mr. Speaker, I ask unanimous consent that Senate Joint Resolution 23, being No. 344 on the Calendar for Unanimous Consent, authorizing the Secretary of War to investigate the claims of private parties to the Mariveles Quarry within the limit of the United States military reservation in the Philippine Islands, and so forth, to the consideration of which to-day objection was made, be restored to the calendar, just as it was before.

The SPEAKER. The gentleman from Iowa asks unanimous consent that No. 344 on the calendar retain its place on the calendar. Is there objection?

There was no objection.

BRIDGE ACROSS OHIO RIVER AT BENWOOD, W. VA.

Mr. MURPHY. Mr. Speaker, I ask unanimous consent that the bill (H. R. 11901) authorizing the construction of a bridge across the Ohio River to connect the city of Benwood, W. Va., and the city of Bellaire, Ohio, being No. 338 on the Calendar for Unanimous Consent, retain its place on the calendar.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the next bill on the Calendar for Unanimous Consent.

FLOATING DRYDOCK AT NAVAL STATION, NEW ORLEANS, LA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 9053) to provide for leasing of the floating dry dock at the naval station, New Orleans, La.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUDDLESTON. Mr. Speaker, I object.

Mr. O'CONNOR. Mr. Speaker, I ask unanimous consent that the bill retain its place on the calendar.

The SPEAKER. Is there objection?

There was no objection.

NATIONAL LEPER HOME.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12105) providing funds for the erection of additional suitable and necessary buildings for the national leper home.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUDDLESTON. Mr. Speaker, I object.

Mr. CHINDBLOM. Mr. Speaker, I ask unanimous consent that the bill retain its place on the calendar.

The SPEAKER. Is there objection?

There was no objection.

CREDIT FOR MILITARY SERVICE IN HOMESTEAD ENTRIES.

The next business on the Calendar for Unanimous Consent was House Joint Resolution 180, extending the provisions of the act of February 25, 1919, allowing credit for military service during the war with Germany in homestead entries, and of Public Resolution No. 29, approved February 14, 1920, allowing a preferred right of entry for at least 60 days after the date of opening in connection with lands opened or restored to entry, to citizens of the United States who served with the allied armies during the World War.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. HUDDLESTON. Mr. Speaker, I object.

Mr. FRENCH. Mr. Speaker, I ask unanimous consent that the resolution retain its place on the calendar.

The SPEAKER. Is there objection?

There was no objection.

BOY SCOUTS OF AMERICA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11492) providing for the transfer or sale of Army and Navy equipment to the Boy Scouts of America.

The SPEAKER. Is there objection?

Mr. HUDDLESTON. Mr. Speaker, I object. I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Alabama makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and sixty-one Members present, not a quorum.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 2 o'clock and 32 minutes p. m.) the House adjourned until to-morrow, Tuesday, August 22, 1922, at 12 o'clock noon.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. DICKINSON: A bill (H. R. 12376) to amend section 307 of the transportation act of 1920, approved February 28, 1920; to the Committee on Interstate and Foreign Commerce.

By Mr. WINSLOW: A bill (H. R. 12377) to establish a commission to be known as the United States coal commission for the purpose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HUDSPETH: A bill (H. R. 12378) granting the consent of Congress to maintain a bridge across the Rio Grande River; to the Committee on Interstate and Foreign Commerce.

By Mr. JAMES: Joint resolution (H. J. Res. 372) declaring October 12 a legal public holiday to be known as Columbus Day; to the Committee on the Judiciary.

By Mr. FORDNEY: Resolution (H. Res. 407) sending the tariff bill (H. R. 7456) to conference, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. COLE of Ohio: A bill (H. R. 12379) granting a pension to Sallie Belle Stoll; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12380) granting a pension to John Keller; to the Committee on Invalid Pensions.

By Mr. COLTON: A bill (H. R. 12381) for the relief of H. R. Payton; to the Committee on Claims.

By Mr. DOWELL: A bill (H. R. 12382) granting a pension to Abe Crockett; to the Committee on Pensions.

By Mr. FORDNEY: A bill (H. R. 12383) granting an increase of pension to Eli S. Adams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12384) granting an increase of pension to George H. Leathers; to the Committee on Invalid Pensions.

By Mr. HARDY of Colorado: A bill (H. R. 12385) granting a pension to Freeman H. Johnson; to the Committee on Pensions.

Also, a bill (H. R. 12386) granting a pension to Harriet D. Waterson; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 12387) granting an increase of pension to Emily E. Patison; to the Committee on Invalid Pensions.

By Mr. HENRY: A bill (H. R. 12388) granting a pension to Susan Clark; to the Committee on Invalid Pensions.

By Mr. KIESS: A bill (H. R. 12389) granting a pension to Daniel Engler; to the Committee on Invalid Pensions.

By Mr. O'BRIEN: A bill (H. R. 12390) granting a pension to George Howes; to the Committee on Invalid Pensions.

By Mr. ROBSION: A bill (H. R. 12391) granting a pension to Enoch Cody; to the Committee on Pensions.

By Mr. RYAN: A bill (H. R. 12392) for the relief of Bridget McGrane; to the Committee on Claims.

By Mr. SPEAKS: A bill (H. R. 12393) granting a pension to Leona Stealey; to the Committee on Invalid Pensions.

By Mr. WOODYARD: A bill (H. R. 12394) granting an increase of pension to Helen Calvert; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6199. By Mr. ANSORGE: Petition of Veiling Association of New York City, protesting rate of 90 per cent duty on nets, veils, and veilings; to the Committee on Ways and Means.

6200. Also, petition of Henry Johnson, of New York City, advocating permanent arbitration courts or boards for the settlement of labor controversies, etc.; to the Committee on Labor.

6201. Also, petition of Hon. Marcus M. Marks, New York City, advocating tariff for protection of American labor from unemployment, but not such as will encourage profiteering; to the Committee on Ways and Means.

6202. Also, petition of C. M. Armstrong & Co., New York City, in regard to Schedule 1, paragraph 1, of the tariff act of 1922, edible lactic acid of a strength above 55 per cent by weight, opposing increase by Senate from 5 cents to 9 cents a pound, and advocating House rate of 5 cents a pound; to the Committee on Ways and Means.

6203. By Mr. COLE of Ohio: Petition of the Ohio Farm Bureau Federation, protesting against the miners' and railroad shopmen's strikes and urging settlement; to the Committee on Interstate and Foreign Commerce.

6204. By Mr. KISSEL: Petition of the American Protective Tariff League, New York City, recommending the omission of paragraph 1526 from House bill 7456; to the Committee on Ways and Means.

6205. By Mr. LINTHICUM: Petition of Admiral W. S. Schley Post, No. 65, of Baltimore, asking support of House bill 11623; to the Committee on the Judiciary.

6206. By Mr. STRONG of Pennsylvania: Petition of Armstrong County and Kiskiminetas Valley insurance agents, of Pennsylvania, opposing the enactment of House bill 10034, to create the District of Columbia insurance fund; to the Committee on the District of Columbia.

HOUSE OF REPRESENTATIVES.

TUESDAY, *August 22, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Lord our God, in whom we have our being and our hope, help us to cherish Thy precepts and be determined to walk in their light and promise. Give us motive power of the noblest ambition, of great thoughts and of big outlooks. Fill our lives with compelling purpose and passion for God and our dear native land. O bless and direct all Members of this Chamber. Pour into the veins of our fellow citizens a new life, rich in courage and determination. Bestow upon our families blessings of health and happiness. Let the Father's love soften every stroke of hardship, and may all sad experiences pass into that beauty of life which is the music of heaven. For the sake of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

SETH J. HARRIS, JIMMIE LOU MARTIN, AND OTHERS.

Mr. LEE of Georgia. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 2694 and agree to the Senate amendments.

The SPEAKER. The gentleman from Georgia calls up the House bill (H. R. 2694) with Senate amendments. The Clerk will report the Senate amendments.

The Senate amendments were read.

Mr. MONDELL. What is the nature of these Senate amendments?

Mr. LEE of Georgia. This bill read that the Secretary of the Treasury "be, and is hereby, authorized" to pay to the emergency employees compensation. They have a fund of their own, and we simply strike out "Secretary of the Treasury."

Mr. MONDELL. That is the only change?

Mr. LEE of Georgia. That is the only change; yes, sir. This is recommended by the House and the Senate both. It passed the House unanimously, and was only amended in the respect which I have mentioned in the Senate.

The SPEAKER. The question is on agreeing to the Senate amendments.

The amendments were agreed to.

THE TARIFF.

Mr. CAMPBELL of Kansas. Mr. Speaker, I submit a privileged report from the Committee on Rules.

The SPEAKER. The gentleman from Kansas, from the Committee on Rules, submits a privileged report which the Clerk will read.

The Clerk read as follows:

House Resolution 407.

Resolved, That immediately upon the adoption of this resolution the bill H. R. 7456, together with the amendments of the Senate thereto, be taken from the Speaker's table; that the amendments of the Senate thereto be disagreed to in gross; that the conference asked by the Senate be agreed to; and that the Speaker, without intervening motion, appoint managers on the part of the House; and said committee shall have authority to join with the Senate committee in renumbering the paragraphs and sections of said bill when finally agreed upon.

Mr. CAMPBELL of Kansas. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. SNELL].

Mr. SNELL. Mr. Speaker, I shall not occupy the time of the House except for a very few minutes, and simply desire to explain the parliamentary situation and the reason and intent of presenting this rule at the present time. The Fordney tariff bill passed this House 13 months ago. It passed the Senate last Saturday, and is now before us with about 2,500 amendments. This rule proposes to take the bill, with Senate amendments, from the Speaker's table, disagree to the Senate amendments in gross, agree to the conference asked by the Senate, and appoint conferees with full power to act for the House in these matters.

I want to say for the information of the gentlemen of the House that this is exactly the same procedure that has been used in sending tariff bills to conference from 1883 down to the present time. It is practically the same rule that was used in sending the Underwood tariff bill to conference; the same one that was used in sending the Payne-Aldrich and the Dingley bills to conference, and every other one, right along down through. I know that the complaint will be made that on account of the great number of amendments to this bill that they should be read and considered individually in the House. But every thinking man well knows that it would be practically a physical impossibility to do this, besides it would take weeks and months to do it, and what the country wants now is action, and not talk, and, furthermore, that they would not get the careful consideration that they will get in the conference committee by the various members of that committee, who are well informed on the various schedules and know how to treat these individual amendments.

In looking over the proceedings in connection with the sending to conference of tariff bills, I find that there were 28 Members of the present minority in the Sixty-third Congress that voted for exactly the same rule when the Underwood tariff bill was sent to conference on October 11, 1917. Nearly all of these men made speeches in favor of practically the identical rule that is presented here by your Rules Committee to-day, and they gave just the same reasons for presenting the rule and sending the bill to conference in this manner that I have already given, namely, that it was the logical, orderly way to do it, though I expect that some of the same gentlemen will probably make a speech here against sending this tariff bill to conference under this rule.

As I look at the situation confronting us at present, time for debate is passed. The Republican majority is here for a definite, distinct purpose, and that purpose is to facilitate and hasten the passage of this tariff bill. [Applause on the Republican side.] I believe that the only dissatisfaction there is throughout the country in connection with this tariff bill is because of the delay in making it a law and putting it upon the statute books of this country. There is nothing new in this procedure, but it is the regular, businesslike, sensible thing to do in connection with this bill, and I simply call upon the Members of this House to pass the rule and do all they can——

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. SNELL. In a moment.

I hope the Members of this House will pass this rule and do all they can to facilitate the public business by sending the bill to conference immediately and again put the country on the road to that prosperity it has always enjoyed under a protective tariff.

Now, I yield to the gentleman from Wisconsin.

Mr. COOPER of Wisconsin. The gentleman said that the rule was practically the same as those adopted in the consideration of other tariff bills. What are the differences?

Mr. SNELL. The only difference there has been at any time before was that some of the rules provided to move to do it, but we took a direct way to send it to conference and it is entitled to the support of every Member of the majority.

Mr. BUTLER. Will the gentleman yield?

Mr. SNELL. I will.

Mr. BUTLER. How many amendments are there to this bill?

Mr. SNELL. Around 2,500.

I yield back the balance of my time, Mr. Speaker.

Mr. CAMPBELL of Kansas. Mr. Speaker, I yield 30 minutes to the gentleman from North Carolina [Mr. POU].

Mr. POU. Mr. Speaker, I would like to be notified at the end of 10 minutes.

Mr. Speaker, if we did not know the purpose of those in control in this Congress one would not suppose that such a bill as this could pass. Now, here is a bill that you are going to send to the conference committee by this rule, which is enthusiastically supported by nobody. There is not a man on the Republican side of the Chamber, who, in my humble judgment, is enthusiastic for the passage of the bill, nevertheless it is going to pass. If the chairman of the Committee on Ways and Means were to express his real sentiment about this bill, his remarks would have to be stricken from the RECORD. They would not bear printing. I believe that the same is true with respect to gentlemen on the other side of the Chamber.

It is a bill which passed the House more than a year ago. It is a bill, which, I venture to predict, you do not intend to pass before the election. I may be a false prophet, but I hazard the prediction here and now that this bill is going to be in conference until after the November election. So I say it is a bill that nobody really wants. There is no enthusiasm for it in the Congress. There is nothing but resentment throughout the Nation by those who have studied the bill.

Yet it is going to be sent to the conference committee because some time in the past the great political party in power pledged the people it would reform the tariff. You will not pass it before the election, in my humble judgment, because you do not want to take the risk of having a leaflet sent to every home in America showing the increased cost of the necessaries of life that this bill is going to bring about.

Mr. MONDELL. Mr. Speaker, will the gentleman yield?

Mr. POU. I yield.

Mr. MONDELL. The gentleman says there is no enthusiasm for the measure. Does the gentleman think that the three Democratic Senators who voted for the measure were opposed to it?

Mr. POU. Is the gentleman himself enthusiastic for this particular bill?

Mr. MONDELL. I am enthusiastic for a proper measure and in the main for the House bill.

Mr. POU. Yes. The gentleman is enthusiastic for the House bill. But this is not the House bill.

Mr. MONDELL. The Democratic Senators voted for the Senate bill.

Mr. POU. I ask the gentleman this direct question: Will he stand there and say for himself that he is enthusiastic for the bill that has come from the Senate?

Mr. MONDELL. When it has been modified. But were the Democratic Senators who voted for the bill in the Senate as it passed the Senate enthusiastic for the bill when they voted for it?

Mr. POU. I do not care to answer that question when the gentleman himself has practically admitted that his enthusiasm for the bill is but a feeble enthusiasm.

Mr. MONDELL. I have admitted nothing of the sort. I have great enthusiasm for a tariff bill when perfected.

Mr. POU. Now this measure, Mr. Speaker, is the great constructive legislation that the Republican Party promised the country. One peculiar thing about the consideration of this measure is that the only effort, so far as I can ascertain, to keep down these ridiculously high rates that have been written in the House bill has come from some great manufacturing interests of this country which are selling abroad. They have in some measure called a halt. They know the foreign market is being destroyed. It seems our Republican friends can never learn that the great industries of America have become so great that they can more than supply the American market.

Well, we are willing to take the chance if you are. You did hand the farmer a gold brick. When he examines it carefully he will come to the conclusion that it is a brick made of fools' gold. When we are sending abroad the products of the farms it is nothing short of absurdity to put a tariff upon the things that the farmer produces.

So I conclude, Mr. Speaker, by saying we shall, of course, record our protest against this measure, which is the most vicious that has ever been presented to any Congress in the history of this Government. If you are willing to take the risk of going before the American people with such a bill as the House bill or such a bill as the Senate bill, the result in November will tell the tale. We certainly are willing to take the risk. [Applause on the Democratic side.]

Mr. Speaker, I reserve the remainder of my time.

The SPEAKER. The gentleman has 23 minutes remaining.

Mr. CAMPBELL of Kansas. Mr. Speaker, I yield five minutes to the gentleman from Michigan [Mr. FORDNEY].

The SPEAKER. The gentleman from Michigan is recognized for five minutes.

Mr. FORDNEY. Mr. Speaker and gentlemen, I will be very brief in what I have to say regarding the sending of this bill to conference. This bill has slumbered in the Senate for over 13 months, and I am delighted to welcome it back to the House once more. As the tariff bill is returned to the House by the Senate it contains some very important changes, the most important of which, perhaps, is the change of the basis for levying ad valorem duties from the American valuation to the foreign valuation. That is, in my judgment, the most important change in the bill.

The bill now also gives to the President the power to lower or to raise rates of duty provided for in the bill, to meet conditions necessary to properly protect American industries and American labor. That is another very important change. In the Senate bill both in the matter of specific duties and of ad valorem duties the rates are greatly increased over the House rates, and in some instances—one in particular that I have in mind—the Senate increased the rates from 100 to 600 per cent above the House rates. I think these matters are of very great importance, and it may require considerable time to adjust them in conference.

The gentleman from Texas [Mr. GARNER] smiles. The gentleman from Texas yesterday asked me if it were not true that all of the conferees would be called in for conference that were honest men. "Certainly," I said, "all the honest Members will be [laughter], and all the conferees will finally be called in after the honest Members, the Republicans, have agreed upon the differences between the House and Senate." [Laughter.] If appointed as one of the conferees, I shall go to the conference and insist upon the House rates. [Applause.]

I believe the bill as it left the House is a better bill, especially as to rates, than the bill as it comes back from the Senate. I yield back the balance of my time.

Mr. CAMPBELL of Kansas. Will the gentleman from North Carolina use the remainder of his time?

Mr. POU. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. GARNER].

The SPEAKER. The gentleman from Texas is recognized for five minutes.

Mr. GARNER. Mr. Speaker and gentlemen of the House, I did not intend to occupy any of the time of the House in the discussion of the rule, contemplating probably that my friend from Michigan [Mr. FORDNEY] would recommend to the Speaker my appointment on the conference committee, and that he and the gentleman from Ohio [Mr. LONGWORTH] might be good enough to invite in, as he says, all honest conferees in the full consideration of this measure.

But since the gentleman from Michigan has stated that he does not intend to hold a conference of the conferees, except Republican membership, I thought I would say something about the probable effect of that conference. He complains bitterly and justly that the Senate has dillydallied for 13 months, having kept it in committee more than eight months, considered by the Republicans alone, which will characterize the conference in this instance. I predict now that the gentleman from Michigan and other gentlemen will be considering this bill in conference longer than any other tariff bill in the history of this country. This bill has been characterized by delay, by consideration always by the Republicans alone, and the result is a longevity three times what any other tariff bill has had in the history of the country. It will continue to be considered in that way by Republicans alone. You have not the capacity to legislate now, because there is no harmony between the West and the East. The gentleman from Wyoming speaks about not being enthusiastic for the Senate bill. I want to say to him that he will accept the Senate bill or he will not get any tariff bill at all. You are going to take the Senate bill or you will have no bill.

Mr. MONDELL. Has the gentleman from Texas any license to pose as a prophet and soothsayer?

Mr. GARNER. Up to date my prophecies have been true concerning the tariff, and therefore I think I have a right to prophesy what is going to be done in the future in respect to this bill. Let me make a little prediction now. You will come back here, and the gentleman from Wyoming and the gentleman from Michigan will be pleading with you gentlemen to undo what you did about American valuation in order that we may have a bill. The Senate will never surrender on the question of valuation. So if you are to have any legislation upon this subject at all, you will be compelled to come back here, swallow your words, and say, for the sake of having legislation, that you must give up your American valuation. Will you do it?

Mr. FORDNEY. Will the gentleman from Texas be greatly disappointed if the Senate should yield on the question of foreign valuation?

Mr. GARNER. I would say to the gentleman that whenever the question comes up as to the foreign or American valuation, I am going to vote for foreign valuation. I criticized the American valuation matter when the bill passed here, and I shall continue to do so.

The Senate considered the tariff bill, but the House did not. You gentlemen will remember that you did not consider the tariff bill. You did not have enough time to consider it. You could not offer an amendment. You did not have an opportunity to consider amendments, but the Senate did consider the tariff bill. Who will say that the Senate ever gave more deliberate consideration to any bill in its history than it has to this bill? In doing so it changed many of the provisions that the Finance Committee of the Senate recommended; it changed many of the provisions that that committee did not want to have changed. So it was really a deliberative body. In this deliberation and consideration they adopted a foreign valuation, because they know that no party in this country could long maintain its existence and have an American valuation plan under the scheme outlined by the gentleman from Michigan [Mr. FORDNEY].

I wonder if the gentleman from Michigan is going to accept the flexible provision with reference to the President. Is the gentleman in favor of that?

Mr. FORDNEY. I am in favor of the House bill, as I told the gentleman when I had the floor, and I am going to insist upon the House bill.

Mr. GARNER. Then the gentleman is opposed to the flexible provision as applied to the Executive, because that provision was not in the bill as it passed the House. The gentleman is going to take that, too, before he gets through with it. The

gentleman is going to accept that. Some of you gentlemen are going to have to account for that provision. Let me tell you what is going to happen. I know the way you gentlemen are fixed. None of you want to defend this legislation before your constituents.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. POU. Mr. Speaker, I yield the gentleman three minutes more.

Mr. GARNER. None of you want to go home and defend this legislation as it will be placed on the statute books. You want to do just as the gentleman from Wyoming [Mr. MONDELL]. You want to hedge, you want to say, "I am for it as it passed the House," but you are afraid to pass it and place it on the statute books, because you would have to defend it as a whole in that event, and the result is that you do not want it to go on the statute books before election. The gentleman from Wyoming wants to go to Wyoming and the gentleman from Michigan wants to go to Michigan, as does the gentleman from Indiana want to go to Indiana, and they all want to say, "Here is what I stand for; the bill is in conference and we will finally get that." You want to make your own tariff bill in your campaign this fall. The result is that you do not want any bill at this time. I think you will adjourn or take a recess until after the elections. I think that is your purpose in mind now. You will then tell the people that immediately after the election you will come back and that the conferees will then have finished their work, and that you will put the law on the statute books, each one of you making his own tariff bill in his own way in his own district. [Laughter.] And that is what you intend to do. You have always deceived the people and you intend to continue to do it. That is the most artistic way in which you can do it. The gentleman from Ohio [Mr. LONGWORTH], whom I see smiling over there, knows that naturally the tariff will have a bad effect upon the country, in its reaction, if you pass the bill now, much less 30 days from now, and if his performance as a conferee is in proportion to the performance of the Senate and the House on this bill, the snow will fall several times in this Capital City before we have a report on the bill from the conference committee. When are you going to come back to determine the question of American valuation? How long before you are going to come back to the House to ask for instructions? A week—10 days—2 weeks—a month? In the meantime what are you going to do? Do you expect to hold these gentlemen here? If you do, you will be disappointed. You will not keep them here. My friend from Kansas [Mr. CAMPBELL] smiles. He may stay here, but some of these boys want a certificate, and they are going back home to get it. [Laughter.]

You can not hold men in this Hall when an election is approaching in November and their constituents demand their presence at home. So you may just as well arrange your matters now, because we are not going to continue to furnish a larger proportion of Democrats than you do of Republicans, as we have been doing for the past week.

The SPEAKER. The time of the gentleman from Texas has again expired.

Mr. POU. Mr. Speaker, I yield 10 minutes to the gentleman from Tennessee [Mr. GARRETT].

Mr. GARRETT of Tennessee. Mr. Speaker, I have thought frequently during recent weeks of the peculiar attitude that this bill is in and promises to be in. If the almost universal practice is followed, the bill will be known as the Fordney-McCumber bill.

To the very great regret of every Member of the House, the gentleman from Michigan [Mr. FORDNEY], whose name it will bear on behalf of the House, announced his voluntary retirement from Congress. The gentleman whose name it will bear on the part of the Senate was defeated in the primaries, and, therefore, the bill is an orphan before it is born. [Laughter.]

Mr. Speaker, I am not going to enter the realm of prophecy as to what will happen with regard to the passage of the bill or as to when that event will occur. The important thing before the House now is the question of whether it will be sent to conference, or whether it should go to the Committee on Ways and Means and be returned to the House for the consideration of the Senate amendments. Of course, I am perfectly well aware of the fact that the practice usually has been to send these revenue bills to conference without their being brought back before the House for the consideration of Senate amendments, but a different situation exists with regard to this bill than with those with the history of which I am familiar.

A very fundamental difference is involved as between the Senate and the House in respect to the question of American valuation as adopted by the House and foreign valuation as adopted by the Senate. It seems to me that the Members of the House would be justified and are justified, therefore, in insisting that the bill shall be sent to the Committee on Ways and Means and reported back to the House, in order that there may be another test upon that question. It may as well be understood by all that, of course, the conferees can make no progress until that question of the basis of valuation is determined. I think all will admit that; and why not have that test at once? Why should the bill be sent to conference with this fundamental question pending, when it will have to be voted upon before a single rate can be touched by the conferees?

Mr. LONGWORTH. Will the gentleman yield?

Mr. GARRETT of Tennessee. Certainly.

Mr. LONGWORTH. The gentleman realizes that the valuation proposition applies to not exceeding 20 per cent of the articles enumerated in the bill?

Mr. GARRETT of Tennessee. I am willing to take the gentleman's statement for that; I do not know, and he does. Does the gentleman think that there can be progress made by the conferees upon this matter until the question of the basis of valuation is determined?

Mr. LONGWORTH. I think substantial progress can be made, for the reason that the larger majority of the duties provided in the bill are not dependent on it. Not over 20 per cent of the duties depend on an American valuation or foreign valuation.

Mr. GARRETT of Tennessee. But the ad valorem duties of a tariff are so substantial in character and related to the whole bill——

Mr. LONGWORTH. I will agree that no final conclusion can be reached until it is settled, but in the meantime substantial progress could be made without reaching the question of valuation.

Mr. GARRETT of Tennessee. The gentleman has stated that there can be no final conclusion until that question is decided. So far as what you may call the fundamental difference between the two bodies, it is a question of the basis of valuation. It seems to me that the fundamental principle should be dealt with first, and that it ought to go to the committee.

Mr. LONGWORTH. Will the gentleman yield?

Mr. GARRETT of Tennessee. Certainly.

Mr. LONGWORTH. I understood the gentleman to say that it was idle to send the bill to conference until the question of valuation was determined, and I suggest that substantial progress could be made with reference to 80 per cent of the bill, and then the final agreement on that question.

Mr. GARRETT of Tennessee. But, upon the gentleman's own statement that no final conclusion could be reached until this question of basis of valuation is determined that is the fundamental difference between the two bodies, why should not that question be taken up first? Why should the question of specific rates be taken up until you have determined this substantial question that revolves around the fundamental principle? I shall vote against the rule and sending it to conference, because I think very properly it should come back to the House. [Applause.]

Mr. CAMPBELL of Kansas. Does the gentleman from North Carolina desire to use the remainder of his time?

Mr. POU. Mr. Speaker, I will yield five minutes to the gentleman from New York [Mr. LONDON].

Mr. LONDON. Mr. Speaker and gentlemen of the House, by this time the country is more or less familiar with the character of the proposed tariff bill, and since the tariff is an ancient subject, and my time is very limited, I shall not attempt to enter into a discussion of the respective merits or demerits of the Senate and the House tariff bills.

The thing I wish to call your special attention to in connection with the pending tariff legislation is the manner in which its authors have been treated by the people and the press. Particularly during the discussion in the Senate, leading Republican papers openly accused Members of that august body, statesmen all of them, patriots every one of them, idealists every mother's son of them, leading Republican newspapers accused Members of Congress of voting to enrich themselves, of voting into their own pockets. Leading spokesmen of the Republican press charge Members of the highest legislative body of the country with using their important offices, not for the benefit of the people of the United States but, on the contrary, to the injury of the whole people and for the promotion of the individual and selfish interests of the legislators.

The newspapers were not a bit bashful. They mentioned names. They named the particular interests which these men represented. According to these charges the principal indus-

tries have not only spokesmen in the highest legislative body of the country but personally, selfishly, and financially interested partisans.

It is a severe indictment that is presented against the lawmaking body. Is it possible that our lawmakers, instead of legislating for the entire people, are the mere servants and agents of particular financial or industrial groups? What confidence can the people have in the lawmaking body if these accusations be true?

Would it not be advisable to adopt a stringent sedition law so that these merciless attacks upon the Congress may properly be punished by adequate terms of imprisonment? If the Representatives of the 48 sovereign States have so lost all sense of honor that they vote to promote private interests only, who can have confidence in Congress or in the laws which it may enact? Can we permit the press to destroy the faith of the people in the honor and wisdom of Congress, their national lawmaking body? It is strange that I hear no suggestion of the necessity of a new sedition law which would prohibit the undermining of American institutions by slanderous and libelous attacks upon the highest authorities of the land.

But let us be serious. We all know that tariff legislation, in all countries, is primarily for the benefit of certain interests at the expense of the rest of the people. That is why after every tariff act there is a reaction. How are tariffs made? How was this bill made in the House? The House has 435 Members. How many Members participated in the shaping of the bill? The Committee on Ways and Means has 25 members, of whom 17 are Republicans. After the Republican members had agreed among themselves on the schedules they invited the Democrats and told them what bill they were going to report. Although the revision of the tariff was supposed to be one of the principal objects for which the special session had been called, no opportunity was offered to the individual Member to amend the tariff bill on the floor of the House, except on three or four items upon which the Republican members of the Ways and Means Committee had failed to reach an agreement in the committee.

Now the bill comes from the Senate with 2,435 amendments. Is the House to be given an opportunity to discuss the amendments or to modify them? No; not at all. The bill will be sent to conference, according to this rule—and the rule itself can be debated for only one hour—and the 10 conferees, of whom I assume 6 will be Republicans and 4 will be Democrats, will have it within their power to practically rewrite the bill. When the conference report will come up the individual Member will be called upon to vote for an acceptance or a rejection of the entire conference report. The individual Member, of the House particularly, does not count in the situation at all. What an opportunity for bargaining, for manipulation, for logrolling tariff making offers to the selfish and the unscrupulous.

It has been the almost uniform experience of the country that after every important tariff act there was a revolt against its authors on the part of the people, the simple reason being that the very process of manufacturing a tariff law enables a small group to legislate in its own interests and against the rest of the country. And it is very seldom that selfish groups have intelligence or foresightedness enough not to abuse the opportunity.

In this particular case the people have begun to hate the proposed tariff law while it is being made. The bill is so long in the making and the diverse and conflicting groups so bitter and so open in their mutual denunciation that the people have necessarily lost confidence in the bill and its authors. When wool says to sugar, "You are a thief," and sugar says to oil, "You are a robber," and oil says to lumber, "You are a pirate," and they say it openly and loudly, as has been done during the discussion of this bill, the people can reach only one conclusion, and that is that all the advocates of high tariffs are out for loot.

I am afraid I am crediting the people with too much intelligence. What has really happened is that while heretofore all the plutocratic interests—except importers—favored prohibitive tariffs, the situation is such that many large financial and manufacturing interests are now, for purely selfish reasons, opposed to high tariffs. Enormous loans have been made by American capital to Europe. The American financier would like to see Europe enabled to repay its loans, and he realizes that he must give to the European manufacturer a chance to sell his product in America. Another and a very substantial plutocratic group have been buying enormous factories, plants, and mines in Europe, and they do not want to pay a tariff on the goods of their own manufacture.

You know plutocracy is an internationalist when internationalism is profitable. And so we find plutocracy divided. And when plutocracy is dissatisfied with Congress it does not mince words, and it is not going to restrain itself by sedition acts. Money talks, and is not afraid to talk.

In my previous addresses on the subject I warned you that the country did not need changes in the tariff now, that you could not rebuild a world wrecked through international strife by adding obstructions to the world's commerce. What we need is not new barriers, new obstacles, new diffculties, but the opening and the broadening of the channels of communication between the peoples of the earth.

It is a sad state of affairs. Bury this tariff bill of yours. There is already a reaction against it. There is distrust. Nobody is for it. Forget about it. Do not send it to conference. Let it die the ignominious death which it deserves. [Applause on the Democratic side.]

Mr. CAMPBELL of Kansas. Mr. Speaker, I yield two minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, the gentlemen on the Democratic side are much disposed to prophesy relative to the outcome of the tariff bill, as to when it may be enacted, and as to what it may contain when finally approved by the President. Their prophecies of to-day are probably just as far from the mark as their prophecies ordinarily are. The conferees on the part of the House go into a full and free conference, charged with the responsibility of presenting the view of the House touching policy and votes. That they will do it honestly and faithfully, I have no manner of doubt. At the same time they will go into conference, I am sure, with open minds touching the changes that have been made by the Senate.

In the case of this bill, as in the case of all important measures, there will be changes and modifications in conference beyond all question; there must be a compromise of differing opinions, of course. We of the House are hopeful that in the main the bill when it is adopted will bear the imprint of the view of the House, particularly in regard to certain high rates on manufactured products rather than the view as expressed at the other end of the Capitol. Also with regard to important basic features of the measure. As to certain items no doubt the Senate rates will be agreed to in whole or in part.

We can not, of course, say how long it may take the conferees to agree. They will approach their tasks good-naturedly and earnestly, with the desire to come to a fair and proper adjustment of differences and wise conclusion and solution as soon as possible. When that may be, we can not say, but we hope it will be at no distant date. [Applause.]

Mr. CAMPBELL of Kansas. Mr. Speaker—— [Applause, the Members rising.] Gentlemen, I thank you.

I have been very much concerned about the tariff legislation that it was the necessary duty for this Congress to enact. I urged at the first opportunity that the permanent law should be enacted at the earliest possible date after the convening of the special session of the Congress now a year and a half ago. I regret that it took so long as it did to pass the bill through the House. The delay in the Senate has been distressing to the country and to everyone interested in the policies and principles embodied or to be embodied in the tariff law. That there has been unusual occasion for delay no one will deny. The economic, the industrial, and financial conditions throughout the world have been altogether unusual. No such condition has been presented since that following the Napoleonic wars. It was impossible for the House or the Senate either to fix economic relations with the outside world upon the old basis of competition in our markets in competitive products. The conditions of labor, the conditions of industry, the conditions of finance have all been so materially different from any ever before presented that there has been this unusual delay—may I say this necessary delay? The world conditions as they have changed from month to month have made the differences between the provisions of the House bill and the bill as it passed the Senate. It will take a great deal of time to adjust those differences. The gentleman from Texas [Mr. GARNER] has prophesied that the bill would not pass or be agreed to until after the November election. That brings me to a statement that I think it is not improper I should make in this connection. It will be a great disappointment to our Democratic brethren in the House and in the Senate and in the country if this bill is not presented to the country along about the middle of October, for the Democratic campaign managers have arranged a very cunning campaign to be inaugurated the day after the tariff bill becomes a law. Already the arrangements are made, the stage is set, the prices are fixed. Advances are to be made in the price of every article covered in this bill by either specific or ad valorem duty. The price is to be advanced on the orders of the importers down through to the retail dealers.

Mr. GARNER. Will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. GARNER. On what day shall we proceed?

Mr. CAMPBELL of Kansas. Well, the industrial and financial conditions of the world have delayed the bill up to this time. Political exigencies arise that concern both sides of the House, to the great disadvantage of the Republican Party, on account of having misrepresentations made of every item in the bill on the eve of the election, and to the great advantage of the Democratic Party, for by making misrepresentations about the bill on the eve of the election, without time for the bill to justify itself before the country, the poison is spread. Notwithstanding this the bill should become a law as soon as a good law can be agreed upon.

Mr. LONGWORTH. Will the gentleman yield?

Mr. CAMPBELL of Kansas. I will.

Mr. LONGWORTH. I think the gentleman might answer the question of the gentleman from Texas further by saying that a beginning has been made already. The gentleman undoubtedly saw a full-page advertisement the other day in a Washington paper that said that on account of the increased duties on wool the price of clothing would have to be advanced, whereas, as the gentleman knows and the gentleman from Texas [Mr. GARNER] knows, every man on that side of the House knows, that even if the Senate duties, high as they are—too high, in my opinion—were adopted, the duties on wool would be less under the new tariff bill than they are at present. [Applause on the Republican side.]

Mr. GARNER. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL of Kansas. In just a moment. That fact standing in the law would not deter Democratic campaign managers, working through the importers, who have already agreed upon the method of campaign that should be adopted and the things that shall be done—the mere fact standing in the way will not prevent the campaign from going on upon misrepresentation.

Mr. GARNER. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. GARNER. Since he has had the assistance of the gentleman from Ohio, I again ask the gentleman from Kansas to tell the House when he expects we shall begin our campaign?

Mr. CAMPBELL of Kansas. I shall not be upon the conference committee.

Mr. GARNER. Do you think it is going to pass before the election?

Mr. CAMPBELL of Kansas. I have no prophecy to make, but I will say this to the gentleman from Texas: I would rather have this bill when finally agreed to restore the sound principle of protection to American industry and American labor, to maintain a high scale of American wages and a high standard of American living, if it took until the 3d day of March, than to have it pass next week without these essential matters being well adjusted. [Applause on the Republican side.]

Mr. GARNER. Which, if interpreted correctly, means that you do not think we shall have any bill before election?

Mr. CAMPBELL of Kansas. I do not know.

Mr. GARRETT of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL of Kansas. Yes.

Mr. GARRETT of Tennessee. I want to ask the gentleman from Ohio [Mr. LONGWORTH] if, in referring to the wool tariff a moment ago and comparing the rates, he did not compare the emergency tariff, so called, with the present rates, or the rates included in this bill?

Mr. LONGWORTH. I presumed the gentleman from Tennessee knew what was the law now in force, the law which the gentleman from Texas [Mr. GARNER] supported. [Laughter.]

Mr. GARRETT of Tennessee. Well the gentleman from Ohio also supported it, I believe.

Mr. LONGWORTH. Oh, surely.

Mr. GARRETT of Tennessee. And now is the gentleman going to vote to lower those duties?

Mr. LONGWORTH. I am.

Mr. GARRETT of Tennessee. I congratulate the gentleman.

Mr. LONGWORTH. I am, because I think they were too high, higher than the necessary protective rates. They were passed as an emergency, but they have answered the emergency, both in Texas and in the West.

Mr. GARRETT of Tennessee. It was voted as an emergency measure, but the gentleman from Ohio voted to make it permanent. The gentleman from Texas voted against making it permanent.

Mr. CAMPBELL of Kansas. But, Mr. Speaker, the essential question in connection with this matter is the fact that on account of the passage of the permanent tariff law, which in any event will bear lower rates upon wool than the present law—notwithstanding that, the Democratic Party will go before the country urging the necessity of repudiating the Republican Party because of the increased cost of clothing on account of the permanent tariff law. It is the hope of the Democratic Party that the increases may be made along about the middle of October. They will be made any time the bill passes before election.

This is not a new species of campaign by the Democratic Party. They did the same thing in 1890, when they sent tin cups and tin plates and pie pans and dinner pails all over the country, had them ready the day after the bill was passed, with 30 or 40 per cent increase in the price. Within six months after that bill became a law tin buckets, dinner pails, and tin cups and pie pans were selling for less than they had ever been sold for, and they were made out of American tin. [Applause on the Republican side.] They were produced in American industries by American labor. We will give the American farmer, the American laborer, and the American manufacturer the opportunity to supply the American consumer and to maintain the American scale of wages and the American standard of living, and maintain the high place of our country in the economic and financial world that we occupy to-day. Our high place in the world to-day is the result of over 100 years of a policy of taxing foreign producers for the privilege of selling their products in our markets. This bill, when it becomes a law, will restore that policy to the American people and will remain upon the statute books as long as the people of the United States want to maintain a high place in the world, in the labor world, the economic world, and in the financial world. [Applause.]

Mr. Speaker, I move the previous question on the adoption of the resolution.

The SPEAKER. The gentleman from Kansas moves the previous question on the adoption of the resolution. The question is on agreeing to that motion.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

Mr. GARRETT of Tennessee. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. As many as are in favor of agreeing to the resolution will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 198, nays 69, not voting 160, as follows:

YEAS—198.

Andrews, Nebr.	Dyer	King	Patterson, N. J.

Until further notice:

Mr. Langley with Mr. Clark of Florida.

Mr. Temple with Mr. Deal.

Mr. Larson of Minnesota with Mr. Sears.

Mr. Fess with Mr. Jacoway.

Mr. Sweet with Mr. Rucker.

General pairs:

Mr. Dunn with Mr. Taylor of Arkansas.

Mr. Ogden with Mr. Rainey of Alabama.

The result of the vote was announced as above recorded.

The SPEAKER appointed the following conferees: Mr. FORDNEY, Mr. GREEN of Iowa, Mr. LONGWORTH, Mr. GARNER, and Mr. COLLIER.

ADDITIONAL COPIES OF TARIFF BILL.

Mr. KIESS. Mr. Speaker, I offer the following privileged resolution from the Committee on Printing, which I send to the desk and ask to have read.

The Clerk read as follows:

House Concurrent Resolution 65.

Resolved by the House of Representatives (the Senate concurring), That there be printed 6,000 additional copies of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, of which 4,000 copies shall be for the House document room and 2,000 copies for the Senate document room.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. KIESS. Yes.

Mr. STAFFORD. As I gather from the reading of the resolution it does not provide for the printing of the bill with the Senate amendments. Does the resolution in its present form provide for the printing of the bill with the Senate amendments? In the Senate the other day the resolution provided for the printing of the bill with the Senate amendments numbered.

Mr. MANN. This will amount to the same thing.

Mr. KIESS. It is understood that this provides for a reprint of the bill as it was printed for the House. That includes the Senate amendments numbered.

Mr. STAFFORD. The resolution does not say so.

Mr. KIESS. "Additional copies" means the same thing.

Mr. MANN. The Senate amendments are already numbered and printed.

The SPEAKER. The Chair thinks there is no question about that. The question is on agreeing to the resolution.

The resolution was agreed to.

LEAVE OF ABSENCE.

By unanimous consent leave of absence was granted to—

Mr. MCSWAIN, at the request of Mr. GARRETT, on account of important business.

Mr. WINGO, at the request of Mr. DRIVER, on account of sickness in family.

Mr. WISE, for two weeks, on account of important business.

Mr. BRAND, for two weeks, on account of important business.

Mr. PATTERSON of New Jersey, indefinitely, on account of trouble with his eyes.

WITHDRAWAL OF PAPERS.

By unanimous consent leave was granted to Mr. MACGREGOR to withdraw from the files of the House without leaving copies, papers in the case of Rose S. Emke (H. R. 10081, 66th Cong.), no adverse report having been made thereon.

Also, in the case of Rose H. Knell (H. R. 10082, 66th Cong.), no adverse report having been made thereon.

ELECTION OF MEMBER TO A COMMITTEE.

Mr. GARNER. Mr. Speaker, I offer the following privileged resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 409.

Resolved, That PATRICK HENRY DREWRY, Member of Congress from the fourth district of Virginia, be, and he is hereby, elected a member of the standing Committee of the House on Naval Affairs.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

EXTENSION OF REMARKS.

Mr. LONDON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the tariff.

The SPEAKER. Is there objection?

There was no objection.

OMNIBUS PENSIONS.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 4) granting relief to soldiers and sailors of the war with Spain, the Philippine insurrection, and the Chinese Boxer rebellion, and so forth, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to take from the Speaker's table the bill H. R. 4, an omnibus pension bill, disagree to the Senate amendments, and ask for a conference. Is there objection?

There was no objection.

The SPEAKER appointed the following conferees: Mr. KNUTSON, Mr. ROBSION, and Mr. UPSHAW.

ORDER OF BUSINESS.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Speaker, the Committee on Interstate and Foreign Commerce, as I understand it, has reported a bill introduced by the chairman of the committee, providing for a fact-finding commission as suggested and recommended in the recent message of the President of the United States. The committee will ask for a rule for the consideration of that measure to-morrow. Should the rule be granted, the measure will be taken up for consideration, and, we hope, disposed of to-morrow.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 1 o'clock and 36 minutes p. m.) the House adjourned until to-morrow, Wednesday, August 23, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

671. Under clause 2 of Rule XXIV, a letter from the Acting Secretary of the Navy, transmitting a proposed draft of a bill for the relief of J. W. Cook, was taken from the Speaker's table and referred to the Committee on Claims.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. VOLSTEAD: Committee on the Judiciary. H. R. 12356. A bill to amend section 51 of chapter 4 of the Judicial Code; without amendment (Rept. No. 1179). Referred to the House Calendar.

Mr. DYER: Committee on the Judiciary. S. J. Res. 216. A resolution providing for the consent of the Congress of the United States of America to a compact and agreement between the State of Kansas and the State of Missouri respecting the erection, maintenance, and operation of the waterworks plants of the cities of Kansas City, Kans., and Kansas City, Mo.; the taxation thereof and exercise of eminent domain in connection therewith by each State; with an amendment (Rept. No. 1180). Referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. HENRY: A bill (H. R. 12395) providing for the erection of a public building at the village of Bath, N. Y.; to the Committee on Public Buildings and Grounds.

By Mr. TUCKER: A bill (H. R. 12396) for the erection of a Federal building at Buena Vista, Va.; to the Committee on Public Buildings and Grounds.

By Mr. WILLIAMSON: A bill (H. R. 12397) to rebuild the boys' dormitory at the Indian school, Rapid City, S. Dak.; to the Committee on Appropriations.

By Mr. CURRY: A bill (H. R. 12398) to amend an act entitled "An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes," approved June 30, 1922; to the Committee on Military Affairs.

By Mr. WINSLOW: A resolution (H. Res. 410) for the immediate consideration of House bill 12377, establishing a United States coal commission; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEGG: A bill (H. R. 12399) for the relief of Josephus C. McColley; to the Committee on Claims.

Also, a bill (H. R. 12400) granting a pension to Mark Gilliam; to the Committee on Invalid Pensions.

By Mr. GERNERD: A bill (H. R. 12401) granting a pension to Irvin R. Troxell; to the Committee on Pensions.

By Mr. HENRY: A bill (H. R. 12402) for the relief of Frank Ayers; to the Committee on Invalid Pensions.

By Mr. JAMES: A bill (H. R. 12403) granting a pension to William A. Lyons; to the Committee on Pensions.

By Mr. McLAUGHLIN of Michigan: A bill (H. R. 12404) granting a pension to Caroline Hazen; to the Committee on Invalid Pensions.

By Mr. MORGAN: A bill (H. R. 12405) granting an increase of pension to Mary J. Belt; to the Committee on Invalid Pensions.

By Mr. STEENERSON: A bill (H. R. 12406) for the relief of Emil L. Flaten; to the Committee on Claims.

By Mr. STEPHENS: A bill (H. R. 12407) for the relief of J. W. Cook; to the Committee on Naval Affairs.

By Mr. WURZBACH: A bill (H. R. 12408) for the relief of M. Castanola & Son; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6207. By the SPEAKER (by request): Petition of the Federated Trades Council of Milwaukee, urging recognition of the Mexican Government; to the Committee on Foreign Affairs.

6208. By Mr. KISSEL: Petition of Frank L. Young Co., Boston, Mass., protesting against soya-bean oil being put on the free list; to the Committee on Ways and Means.

6209. By Mr. ANSORGE: Petition of Benjamin Rosenthal, president Russell Playing Card Co., New York City, in reference to the pending tariff bill; to the Committee on Ways and Means.

6210. Also, petition of Edward W. Dickinson, New York City, in reference to the labor question; to the Committee on Labor.

6211. Also, petition of Aeronautical Chamber of Commerce of America (Inc.) favoring the passage of the Wadsworth bill (S. 3076) providing for a bureau of civil aeronautics in the Department of Commerce; to the Committee on Interstate and Foreign Commerce.

6212. By Mr. FENN: Petition of Cora S. T. Sage and others, of Unionville, Conn., for increase of pensions of veterans of the Civil War and of widows of veterans of the Civil War; to the Committee on Invalid Pensions.

6213. By Mr. KISSEL: Petition of the New York State Coal Commission, New York City, N. Y., favoring the carrying out of the President's recommendations regarding the coal commission; to the Committee on Interstate and Foreign Commerce.

6214. Also, petition of Richmond Storage Warehouse & Van Co., West New Brighton, N. Y., favoring legislation for the protection of the Mississippi Valley; to the Committee on Flood Control.

6215. Also, petition of Oliver Bros. (Inc.), New York City, N. Y., opposing the Kelly bill, which provides for a reduction in second-class mail rates; to the Committee on the Post Office and Post Roads.

6216. By Mr. KNUTSON: Petition of sundry citizens of Blackduck, Minn., opposing the Sunday observance bill (H. R. 4388); to the Committee on the District of Columbia.

6217. By Mr. LINTHICUM: Petition of Northeastern Loan & Savings Association, Reliance Loan & Savings Association, and Druid Hill Permanent Building & Savings Association, all of the city of Baltimore, opposing the passage of H. R. 9950, regarding income tax on building associations; to the Committee on Banking and Currency.

SENATE.

WEDNESDAY, *August 23, 1922.*

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Our Father and our God, we give Thee thanks for the brightness of the morning and for all the privileges of life which have been continued unto us. We pray that in the midst of the duties of the day there may be brought to us the consciousness of the largest responsibility, so that the things which are highest and best shall be chiefly in our thought and dominate our action. We pray Thy blessing constantly upon each one who bears these anxious moments of care, wondering which way is the best to take. We ask Thee to blaze the path, and when there is uncertainty give direction, we beseech of Thee.

Remember, we would ask this morning, the stricken home of one so long related to the other House of Congress. We pray, in the multitude of Thy mercies, vouchsafe the comforts of Thy infinite consolation, and thus guide us all, whether in brightness or in gloom, along the pathway that leads to the life eternal. We ask through Jesus Christ our Lord. Amen.

On request of Mr. MCCUMBER, and by unanimous consent, the reading of the Journal of the proceedings of the legislative day of Thursday, August 3, 1922, was dispensed with and the Journal was approved.

FOREIGN COMMERCE AND THE LAW.

Mr. FLETCHER. I move that the paper which I hold in my hand, entitled "Jus Gentium, a Stepping Stone to Better Law and Lawyers," by Henry C. Clark, member of the Jacksonville, Fla., bar and of the bar of the Supreme Court of the United States, with a foreword by William Reynolds Vance, be printed as a Senate document, and I ask that the motion, with the paper, be referred to the Committee on Printing.

The PRESIDENT pro tempore. It is so ordered.

ADDRESS BY THE VICE PRESIDENT.

Mr. SHORTRIDGE. Mr. President, at a meeting of the American Bar Association held at San Francisco, Calif., the Vice President delivered a masterly address. I think it is worthy of reproduction, and I ask unanimous consent that it be printed in the RECORD in the larger type.

Mr. ROBINSON. I inquire of the Senator from California what is the subject matter of the address?

Mr. SHORTRIDGE. The subject matter of the address, broadly and generally speaking, is government, laws, constitutional forms, and the observance and enforcement of the laws of our land.

Mr. ROBINSON. I have no objection to the Senator's request.

Mr. SHORTRIDGE. I think it will meet the approval in sentiment of every Senator and of the people, quite regardless of any differences upon other matters.

There being no objection, the address was ordered to be printed in the RECORD in 8-point type, as follows:

ADDRESS BY THE VICE PRESIDENT BEFORE THE AMERICAN BAR ASSOCIATION AT SAN FRANCISCO, CALIF., AUGUST 10, 1922.

The growing multiplicity of laws has often been observed. The National and State Legislatures pass acts, and their courts deliver opinions, which each year run into scores of thousands. A part of this is due to the increasing complexity of an advancing civilization. As new forces come into existence new relationships are created, new rights and obligations arise, which require establishment and definition by legislation and decision. These are all the natural and inevitable consequences of the growth of great cities, the development of steam and electricity, the use of the corporation as the leading factor in the transaction of business, and the attendant regulation and control of the powers created by these new and mighty agencies.

This has imposed a legal burden against which men of affairs have been wont to complain. But it is a burden which does not differ in its nature from the public requirement for security, sanitation, education, the maintenance of highways, or the other activities of government necessary to support present standards. It is all a part of the inescapable burden of existence. It follows the stream of events. It does not attempt to precede it. As human experience is broadened, it broadens with it. It represents a growth altogether natural. To resist it is to resist progress.

But there is another part of the great accumulating body of our laws that has been rapidly increasing of late, which is the result of other motives. Broadly speaking, it is the attempt to raise the moral standard of society by legislation.

The spirit of reform is altogether encouraging. The organized effort and insistent desire for an equitable distribution of the rewards of industry, for a wider justice, for a more consistent righteousness in human affairs, is one of the most stimulating and hopeful signs of the present era. There ought to be a militant public demand for progress in this direction. The society which is satisfied is lost. But in the accomplishment of these ends there needs to be a better understanding of the province of legislative and judicial action. There is danger of disappointment and disaster unless there be a wider comprehension of the limitations of the law.

The attempt to regulate, control, and prescribe all manner of conduct and social relations is very old. It was always the practice of primitive peoples. Such governments assumed jurisdiction over the action, property, life, and even religious convictions of their citizens down to the minutest detail. A large part of the history of free institutions is the history of the people struggling to emancipate themselves from all of this bondage.

I do not mean by this that there has been, or can be, any progress in an attempt of the people to exist without a strong and vigorous government. That is the only foundation and the only support of all civilization. But progress has been made by the people relieving themselves of the unwarranted and unnecessary impositions of government. There exists, and must always exist, the righteous authority of the state. That is the sole source of the liberty of the individual, but it does not mean an inquisitive and officious intermeddling by attempted government action in all the affairs of the people. There is no justification for public interference with purely private concerns.

Those who founded and established the American Government had a very clear understanding of this principle. They had suffered many painful experiences from too much public supervision of their private affairs. The people of that period were very jealous of all authority. It was only the statesmanship and resourcefulness of Hamilton, aided by the great influence of the wisdom and character of Washington, and the sound reasoning of the very limited circle of their associates that succeeded in proposing and adopting the American Constitution. It established a vital Government of broad powers, but within distinct and prescribed limitations. Under the policy of implied powers adopted by the Federal party its authority tended to enlarge. But under the administration of Jefferson, who, by word, though not so much by deed, questioned and resented almost all the powers of government, its authority tended to diminish and, but for the great judicial decisions of John Marshall, might have become very uncertain. But while there is ground for criticism in the belittling attitude of Jefferson toward established government, there is even larger ground for approval of his policy of preserving to the people the largest possible jurisdiction and authority. After all, ours is an experiment in self-government by the people themselves, and self-government can not be reposed wholly in some distant capital; it has to be exercised in part by the people in their own homes.

So intent were the founding fathers on establishing a Constitution which was confined to the fundamental principles of government that they did not turn aside even to deal with the great moral question of slavery. That they comprehended it and regarded it as an evil was clearly demonstrated by Lincoln in his Cooper Union speech when he showed that substantially all of them had at some time by public action made clear their opposition to the continuation of this great wrong. The early amendments were all in diminution of the power of the Government and declaratory of an enlarged sovereignty of the people.

It was thus that our institutions stood for the better part of a century. There were the centralizing tendencies and the amendments arising out of the War of '61. But while they increased to some degree the power of the National Government, they were in chief great charters of liberty, confirming rights already enjoyed by the majority and undertaking to extend and guarantee like rights to those formerly deprived of equal protection of the laws. During most of this long period the trend of public opinion and of legislation ran in the same direction. This was exemplified in the executive and legislative refusal to renew the United States Bank charter before the war, and in the judicial decision in the Slaughterhouse cases after the war. This decision has been both criticized and condemned in equally high places, but the result of it was perfectly clear. It was on the side of leaving to the people of the several States, and to their legislatures and courts, jurisdiction over

the privileges and immunities of themselves and their own citizens.

During the past 30 years the trend has been in the opposite direction. Urged on by the force of public opinion, national legislation has been very broadly extended for the purpose of promoting the general welfare. New powers have been delegated to the Congress by constitutional amendments and former grants have been so interpreted as to extend legislation into new fields. This has run its course from the Interstate Commerce act of the late eighties, through the various regulatory acts under the commerce and tax clauses, down to the maternity aid law which recently went into effect. Much of this has been accompanied by the establishment of various commissions and boards, often clothed with much delegated power, and by providing those already in existence with new and additional authority. The National Government has extended the scope of its legislation to include many kinds of regulation, the determination of traffic rates, hours of labor, wages, sumptuary laws, and into the domain of oversight of the public morals.

This has not been accomplished without what is virtually a change in the form, and actually a change in the process, of our Government. The power of legislation has been to a large extent recast, for the old order looked on these increased activities with much concern. This has proceeded on the theory that it would be for the public benefit to have government to a greater degree the direct action of the people. The outcome of this doctrine has been the adoption of the direct primary, the direct election of United States Senators, the curtailment of the power of the Speaker of the House, and a constant agitation for breaking down the authority of decisions of the courts. This is not the Government which was put into form by Washington and Hamilton and popularized by Jefferson. Some of the stabilizing safeguards which they had provided have been weakened. The representative element has been diminished and the democratic element has been increased; but it is still constitutional government; it still requires time, due deliberation, and the consent of the States to change or modify the fundamental law of the Nation.

Advancing along this same line of centralization, of more and more legislation, of more and more power on the part of the National Government, there have been proposals from time to time which would make this field almost unlimited. The authority to make laws is conferred by the very first article and section of the Constitution, but it is not general; it is limited. It is not "All legislative powers," but it is "All legislative powers herein granted shall be vested in a Congress of the United States." The purpose of that limitation was in part to prevent encroachment on the authority of the States, but more especially to safeguard and protect the liberties of the people. The men of that day proposed to be the custodians of their own freedom. In the tyrannical acts of the British Parliament they had seen enough of a legislative body claiming to be clothed with unlimited powers.

For the purpose of protecting the people in all their rights so dearly bought and so solemnly declared, the third article established one Supreme Court and vested it with judicial power over all cases arising under the Constitution. It is that court which has stood as the guardian and protector of our form of government, the guaranty of the perpetuity of the Constitution, and above all the great champion of the freedom and the liberty of the people. No other known tribunal has ever been devised in which the people could put their faith and confidence, to which they could intrust their choicest treasure, with a like assurance that there it would be secure and safe. There is no power, no influence, great enough to sway its judgments. There is no petitioner humble enough to be denied the full protection of its great authority. This court is human, and therefore not infallible; but in the more than 130 years of its existence its decisions which have not withstood the questioning of criticism could almost be counted upon one hand. In it the people have the warrant of stability, of progress, and of humanity. Wherever there is a final authority it must be vested in mortal men. There has not been discovered a more worthy lodging place for such authority than the Supreme Court of the United States.

Such is the legislative and judicial power that the people have established in their Government. Recognizing the latent forces of the Constitution, which, in accordance with the spirit of the times, have been drawn on for the purpose of promoting the public welfare, it has been very seldom that the court has been compelled to find that any humanitarian legislation was beyond the power which the people had granted to the Congress. When such a decision has been made, as in the recent case of the child labor law, it does not mean that the court or Nation wants child labor, but it simply means that the Congress has gone outside of the limitations prescribed for it by the people in their Constitution and attempted to legislate on a subject which the several States and the people themselves have chosen to keep under their own control.

Should the people desire to have the Congress pass laws relating to that over which they have not yet granted to it any jurisdiction, the way is open and plain to proceed in the same method that was taken in relation to income taxes, direct election of Senators, equal suffrage, or prohibition, by an amendment to the Constitution.

One of the proposals for enlarging the present field of legislation has been to give the Congress authority to make valid a proposed law which the Supreme Court had declared was outside the authority granted by the people by the simple device of reenacting it. Such a provision would make the Congress finally supreme. In the last resort its powers practically would be unlimited. This would be to do away with the great main principle of our written Constitution, which regards the people as sovereign and the Government as their agent, and would tend to make the legislative body sovereign and the people its subjects. It would to an extent substitute for the will of the people, definitely and permanently expressed in their written Constitution, the changing and uncertain will of the Congress. That would radically alter our form of government and take from it its chief guaranty of freedom.

This enlarging magnitude of legislation, these continual proposals for changes under which laws might become very excessive, whether they result from the praiseworthy motive of promoting general reform or whether they reflect the raising of the general standard of human relationship, require a new attitude on the part of the people toward their Government. Our country has adopted this course. The choice has been made. It could not withdraw now if it would. But it makes it necessary to guard against the dangers which arise from this new position. It makes it necessary to keep in mind the limitation of what can be accomplished by law. It makes it necessary to adopt a new vigilance. It is not sufficient to secure legislation of this nature and leave it to go alone. It can not execute itself. Oftentimes it will not be competently administered without the assistance of vigorous support. There must not be permitted any substitution of private will for public authority. There is required a renewed and enlarged determination to secure the observance and enforcement of the law.

So long as the National Government confined itself to providing those fundamentals of liberty, order, and justice for which it was primarily established, its course was reasonably clear and plain. No large amount of revenue was required. No great swarms of public employees were necessary. There was little clash of special interests or different sections, and what there was of this nature consisted not of petty details but of broad principles. There was time for the consideration of great questions of policy. There was an opportunity for mature deliberation. What the Government undertook to do it could perform with a fair degree of accuracy and precision.

But this has all been changed by embarking on a policy of a general exercise of police powers, by the public control of much private enterprise and private conduct, and of furnishing a public supply for much private need. Here are these enormous obligations which the people found they themselves were imperfectly discharging. They therefore undertook to lay their burdens on the National Government. Under this weight the former accuracy of administration breaks down. The Government has not at its disposal a supply of ability, honesty, and character necessary for the solution of all these problems, or an executive capacity great enough for their perfect administration. Nor is it in the possession of a wisdom which enables it to take great enterprises and manage them with no ground for criticism. We can not rid ourselves of the human element in our affairs by an act of legislation which places them under the jurisdiction of a public commission.

The same limit of the law is manifest in the exercise of the police authority. There can be no perfect control of personal conduct by national legislation. Its attempt must be accompanied with the full expectation of very many failures. The problem of preventing vice and crime and of restraining personal and organized selfishness is as old as human experience. We shall not find for it an immediate and complete solution in an amendment to the Federal Constitution, an act of Congress, or in the findings of a new board or commission. There is no magic in government not possessed by the public at large by which these things can be done. The people can not divest themselves of their really great burdens by undertaking to provide that they shall hereafter be borne by the Government.

When provision is made for far-reaching action by public authority, whether it be in the nature of an expenditure of a large

sum from the Treasury or the participation in a great moral reform, it all means the imposing of large additional obligations upon the people. In the last resort it is the people who must respond. They are the military power, they are the financial power, they are the moral power of the Government. There is and can be no other. When a broad rule of action is laid down by law it is they who must perform.

If this conclusion be sound it becomes necessary to avoid the danger of asking of the people more than they can do. The times are not without evidence of a deep-seated discontent not confined to any one locality or walk of life, but shared in generally by those who contribute by the toil of their hand and brain to the carrying on of American enterprise. This is not the muttering of agitators, it is the conviction of the intelligence, industry, and character of the Nation. There is a state of alarm, however unwarranted, on the part of many people lest they be unable to maintain themselves in their present positions. There is an apparent fear of loss of wages, loss of profits, and loss of place. There is a discernible physical and nervous exhaustion which leaves the country with little elasticity to adjust itself to the strain of events.

As the standard of civilization rises there is necessity for a larger and larger outlay to maintain the cost of existence. As the activities of government increase, as it extends its field of operations, the initial tax which it requires becomes manifolded many times when it is finally paid by the ultimate consumer. When there is added to this aggravated financial condition an increasing amount of regulation and police control, the burden of it all becomes very great.

Behind very many of these enlarging activities lies the untenable theory that there is some short cut to perfection. It is conceived that there can be a horizontal elevation of the standards of the Nation, immediate and perceptible, by the simple device of new laws. This has never been the case in human experience. Progress is slow and the result of a long and arduous process of self-discipline. It is not conferred upon the people, it comes from the people. In a republic the law reflects rather than makes the standard of conduct and the state of public opinion. Real reform does not begin with a law, it ends with a law. The attempt to dragoon the body when the need is to convince the soul will end only in revolt.

Under the attempt to perform the impossible there sets in a general disintegration. When legislation fails, those who look upon it as a sovereign remedy simply cry out for more legislation. A sound and wise statesmanship which recognizes and attempts to abide by its limitations will undoubtedly find itself displaced by that type of public official who promises much, talks much, legislates much, expends much, but accomplishes little. The deliberate, sound judgment of the country is likely to find it has been superseded by a popular whim. The independence of the legislator is broken down. The enforcement of the law becomes uncertain. The courts fail in their function of speedy and accurate justice; their judgments are questioned and their independence is threatened. The law, changed and changeable on slight provocation, loses its sanctity and authority. A continuation of this condition opens the road to chaos.

These dangers must be recognized. These limits must be observed. Having embarked the Government upon the enterprise of reform and regulation it must be realized that unaided and alone it can accomplish very little. It is only one element, and that not the most powerful in the promotion of progress. When it goes into this broad field it can furnish to the people only what the people furnish to it. Its measure of success is limited by the measure of their service.

This is very far from being a conclusion of discouragement. It is very far from being a conclusion that what legislation can not do for the people they can not do for themselves. The limit of what can be done by the law is soon reached, but the limit of what can be done by an aroused and vigorous citizenship has never been exhausted. In undertaking to bear these burdens and solve these problems the Government needs the continuing indulgence, cooperation, and support of the people. When the public understands that there must be an increased and increasing effort, such effort will be forthcoming. They are not ignorant of the personal equation in the administration of their affairs. When trouble arises in any quarter they do not inquire what sort of a law they have there, but they inquire what sort of a governor and sheriff they have there. They will not long fail to observe that what kind of government they have depends upon what kind of citizens they have.

It is time to supplement the appeal to law, which is limited, with an appeal to the spirit of the people, which is unlimited. Some unsettlements disturb, but they are temporary. Some factious elements exist, but they are small. No assessment of the material conditions of Americans can warrant anything but the highest courage and the deepest faith. No reliance upon the national character has ever been betrayed. No survey which goes below the surface can fail to discover a solid and substantial foundation for satisfaction. But our countrymen must remember that they have and can have no dependence save themselves. Our institutions are their institutions. Our Government is their Government. Our laws are their laws. It is for them to enforce, support, and obey. If in this they fail, there are none who can succeed. The sanctity of duly constituted tribunals must be maintained. Undivided allegiance to public authority must be required. With a citizenship which voluntarily establishes and defends these, the cause of America is secure. Without that all else is of little avail.

RESULTS OF PROHIBITION ENFORCEMENT IN MASSACHUSETTS.

Mr. JONES of Washington. Mr. President, we hear a great deal these days about the bootlegger and violations of the Volstead Act. There seems to be much anxiety for those who would run some risk in violating the law, and but little concern for those who benefit by the law. We do not hear very much about the good results growing out of that act. I hold in my hand an impartial survey made by the Scientific Temperance Federation of conditions in Massachusetts, a great industrial State. I understand Massachusetts has no State enforcement law, and the enforcement of prohibition there is carried out entirely under the national law. The results of the survey are very strikingly like the results which have come in other States where prohibition has been in effect. The survey is too long to print in full in the RECORD, so I have had a concise summary made of it, which I ask may be printed in the RECORD in 8-point type.

There being no objection, the summary was ordered to be printed in the RECORD in 8-point type, as follows:

WET AND DRY YEARS IN A DECADE OF MASSACHUSETTS PUBLIC RECORDS.

A study of the principal social phases of human life in the past 10 years is revealed by Massachusetts public documents. This report, compiled by the Scientific Temperance Federation, compares two prohibition years with seven preceding nonprohibition years and the half-prohibition year 1919. It includes information concerning public disorder, drunkenness, crime, sickness, and mortality, conditions of women and children, thrift, pauperism, and poverty in the most eventful period in the world's history and its social and economic changes; also the conditions in two periods of business depression.

"The object of this inquiry into public records," says Robert A. Woods in a foreword to the report, "is highly important, because it provides the large perspective in which the whole matter must be viewed and measured. If it is clear beyond peradventure that the net total result of prohibition is largely and uniformly, or almost uniformly, favorable, there can be little question but that an increasing majority will support it on its merits. This report will serve effectively to adjourn the discussion of the subject from the region of casual impression and hearsay to that of the comprehensive and total facts. It can leave no doubt in the open mind what the facts to date are."

The more than 100 tables of statistics published in the 50-page report cover a 10-year period. They show that when the year 1921 is compared with the seven successive "wet" years of the decade in more than three-quarters of the items conditions in 1921 were either the most favorable of the decade or better than any of the wet years, or they were better than the average of the wet years. The average for the two dry years is better than the average for the seven wet years in all but less than a dozen cases.

ARRESTS.

Arrests for drunkenness, for all causes, for serious offenses, despite unemployment and unrest following the war, were all far lower in 1921—from 12 to 69 per cent—than in the wet period, either absolutely or in proportion to the population. Arrests for drunkenness had steadily mounted in Massachusetts until in 1917 there were 129,455. In 1921 there were but 59,595. Arrests for all offenses had averaged 178,072 annually in Massachusetts in the wet years of the decade. In 1921 there were 152,066. Boston figures show that arrests for drunkenness among the foreign born fell off 60 per cent, while the general decrease was 55 per cent.

PENAL INSTITUTIONS.

The population of the penal institutions was from 9 to 64 per cent lower in 1921 than in the average wet year; 3,252 (September 30, 1921), as compared with an average of 5,839 in the seven wet years. The State farm, which, until prohibition came, was "one of the most populous prison farms for drunkards and vagrants in the United States" (Kelso), had only 440 prisoners September 30, 1921, as compared with an average of 1,258 in the wet years. Five jails closed in 1920. During the wet

period the courts sent to the Boston house of correction an average of 4,281 offenders for drunkenness a year; in 1921 the cases numbered 665. The total commitments to this institution dropped from an average of 6,339 in the wet years to an average of 1,023 in the dry years—83 per cent. In early 1919 the women's quarters were seriously overcrowded; 10 months later the board reported "there were nearly as many matrons as inmates," and the building was soon closed.

CONDITIONS OF HOME AND CHILDREN.

The number of women and children caught in the machinery of the law has markedly fallen. Arrests of women for all offenses in Massachusetts decreased 39 per cent as compared with a general decrease of 24 per cent. In arrests for drunkenness, the decrease among women was 69 per cent as compared with a general decrease of 55 per cent. There were but 314 women in the penal institutions of the State September 30, 1921; the average for wet years was 732. There were 839 in the preceding hard-times year, 1915.

Total arrests for offenses against chastity in Boston (both sexes) were 1,881 in 1921, a smaller number than in any of the seven wet years.

The number of children under 15 years of age arrested in Boston was the smallest of the decade, 600 fewer than the wet years' average. There was the smallest number of neglected, wayward, and delinquent children arrested in Boston (2,442), a decrease of almost 700 from the wet years' average. The Boston juvenile court saw the fewest cases begun in the decade except in 1916. Probation officers ascribe the improvement to better conditions in the homes due to prohibition. Parental drunkenness is nearly absent in cases of dependent and neglected children given into the care of the Boston Child Welfare Division. The number of neglected children thus admitted was smaller in 1921, as was the number of neglected children before the Massachusetts lower courts and the Boston juvenile court.

The Massachusetts Society for the Prevention of Cruelty to Children showed in 1921 a decrease of two-thirds in the proportion of cases in which intemperance was an important factor in cases of cruelty to children as compared with 1916. The Boston Family Welfare Society found intemperance a conspicuous factor in only about four cases in one hundred in 1921 as compared with twenty-seven per one hundred in 1917.

HEALTH AND MORTALITY.

Massachusetts and Boston have shared with the rest of the country the remarkable decline in general and infant mortality which began in 1919. The report recognizes the influence of general movements for the promotion of health and prevention of premature mortality. It also points out that the improved conditions where affected by prohibition may be due partly to decreased drinking; partly to improvement in home surroundings, food, care, recreation, and freedom from worry following economic conditions resulting from saving money formerly spent for drink.

Deaths from alcoholism in Boston and in Massachusetts in 1921 were the fewest of the decade except for 1919 and 1920, both prohibition or part prohibition years—97 deaths from this cause in Massachusetts in 1921; the wet years' average was 225. In Boston the number of deaths from accidents in 1921 was the smallest in the decade; of homicides, one less than the wet years' average. There were 102 suicides; the average number in the wet years was 126; in the previous hard-times year, 1915, there were 140. The 694 alcoholics admitted to the Washington Home in 1921 represent a genuine gain over the average of 955 admissions in the seven wet years during which about the same number were entering the former State Inebriate Hospital, which is now discontinued and used for injured soldiers. There were also formerly 11 small private hospitals for inebriates in Massachusetts; now there are but two.

In the Boston city hospital cases of delirium tremens in 1921 were the fewest since 1915. The number of admissions of alcoholics presents the only conspicuously unfavorable table of the report. But there are no comparable figures for the full seven years of the wet period, as the hospital's policy in handling and recording alcoholics was changed in 1916. The patients are largely confirmed drinkers, a legacy from preprohibition days, many of them idlers and ne'er-do-wells. The present number suggests an illegal source of liquor supply, one of the results of absence of a prohibition enforcement law in Massachusetts, while the effect of liquor and the methods of drinking seem now to make not only drunk but sick the drinker in the class taken to the hospital. The women drunkards who used to be sent to the city hospital from dance halls and cheap hotels have practically disappeared.

ALCOHOLIC INSANITY.

Alcoholic insanity was responsible for but 151 first admissions to public and McLean hospitals in 1921; there was an annual average of 340 in the seven wet years. The total number of first admissions of all insane was the lowest since 1912, except for 1920, also a prohibition year. Alcoholic insanity was responsible for 10.3 per cent of all first admissions in the average wet year; the two dry years' average was 4.24 per cent.

"Evidently bad liquor does not kill so many as we have been led to suppose. From the health standpoint, the lessening of deaths from alcohol and accidents goes hand in hand with the decrease of alcoholic insanity and chronic alcoholism," says Dr. Richard C. Cabot, of Harvard University, in a foreword to the report.

THRIFT.

Total deposits increased in Massachusetts savings banks 2.5 per cent in 1921, although withdrawals had been heavy owing to hard times. An increase of even 2 per cent for all New England was declared by the Federal reserve bank "a remarkably good performance in view of the depressed industrial conditions." Cooperative banks made the largest gain in any one year and their assets reported were the greatest in their history. Credit unions, in spite of heavy withdrawals, were reported by the bank commissioner as more substantially established than at any period since they began in the State. Foreign banks, which serve foreign-born desiring to send money home, forwarded over $15,000,000 to other countries in 1921; in the three years 1919–1921, over $49,000,000. The largest amount sent previous to 1919 had been $10,000,000. Through the school savings banks, children's pennies turned into the regular savings banks of Massachusetts over $243,000 in 1921. One Boston teacher remarked that children's savings were now going into the savings bank from homes that before prohibition had drawn on children's pennies and dimes to help pay the family grocery bill.

PAUPERISM AND POVERTY.

The latest figures available on pauperism and poverty, those for 1921, show a marked improvement over the wet period. After the winter of 1921, when unemployment had been the worst of the decade, the State and local almshouses had on March 31, 1921, the smallest population of the decade; it was only about one-half that for the seven wet years, three of which had been years of full employment and high wages. Outside relief was given by cities and towns in the year 1920–21 to nearly 10,000 fewer cases than in the average wet year and to 34,000 fewer cases than in the previous hard-times winter of 1915. Outside relief was given by the State to only 543 persons per 100,000 population, as compared with 638 per 100,000 population in 1915.

"The outstanding conclusion from this report is, I think, that to the poor prohibition in Massachusetts has been a signal blessing. The rich may, for all we know, be as foolish as ever, but beyond any question the poor are better off," says Dr. Richard C. Cabot in his foreword to the report.

The evidence thus far quoted compares the single year 1921 with the seven wet years of the decade. When the average of the two prohibition years, 1920 and 1921, is compared with the average of the seven wet years, the gain of the prohibition period is even more conspicuous. The record of 1919 and 1920, when prohibition first went into effect, shows what well-observed and well-enforced prohibition may mean to public order, health, and welfare.

Some of the facts shown by comparing the two periods are the following:

Arrests for drunkenness are less than one-half.

Arrests for drunkenness in women are less than one-third.

Marked decline in arrests for offenses against chastity.

Commitments to the State farm are only one-quarter.

Total prison population is less than one-half.

Great decrease in neglected children before courts.

Where before prohibition 18 per cent of the dependent children had drunken fathers and 3 per cent drunken mothers, now only 1 per cent have drunken fathers and there were no drunken mothers of dependent children in either 1920 or 1921.

School attendance has improved.

Children are better fed and better clothed.

Two funds for buying clothing for children who needed it to go to school had no applicants last winter.

Deaths from alcoholism more than cut in two.

Great decrease in alcoholic patients in the hospitals.

The family man has largely dropped out from the drinkers' ranks.

Great decrease in sex diseases.

Marked gain in general health of the community.

Increase in savings deposits despite industrial depression.
Alcoholic insanity cut in two.
Almshouse population nearly cut in two.

In view of the fact that Boston was a consistently wet city, that there has been no adequate State law to assist local officials who desired to make prohibition thoroughly effective in Boston and throughout the State, the results so far are both significant and encouraging. Social welfare organizations find that "family life continues on an infinitely sounder basis"; that "many men who were complete wrecks are coming in sober and clear in mind, healthier in body, and clean of attire"; "many of the men are taking an interest and pride in seeing their children on an equal footing with their thrifty neighbors"; "there is a greater interest in the home as the result of closing the saloon; a larger number of people spend the evenings at home who formerly spent them in the saloon; a greater interest is developed for the provision of those in the home." One institution reports that Monday morning applications for loans to redeem clothing, shoes, and so forth, pawned in the Saturday night-Sunday debauch has been reduced by four-fifths. The welfare societies are able now to give more time to constructive work, helping men and families to help themselves, instead of spending so much time and effort in patching up the results of intemperance in the homes.

Massachusetts has been handicapped in the enforcement of prohibition by the lack of an adequate State enforcement law. But liquor-law violation did not spring into existence with prohibition. It existed along with the licensed saloon. In 1919 there were 1,218 legal license holders in Boston, but 1,605 persons paid Federal taxes for selling, showing that at least 387 were selling illegally. In 16 Massachusetts cities in 1910 there were 2,586 liquor licenses granted, but there were 3,627 persons who paid Federal internal-revenue liquor taxes, a thousand traceable illegal sellers in only 16 cities, or about 40 per cent as many illegal places as legal places. Thus liquor-law violation went on before prohibition, when ample provision had been made for legal traffic in alcoholic liquors.

In view of the fact that Boston was a consistently wet city, that there had been during the period reviewed no adequate State law to assist honest officials who desired to make prohibition thoroughly effective in Boston and throughout the State, the results so far apparent are both significant and encouraging. The situation in 1921, in so far as it is an improvement over the old régime, as it is in all but a small minority of points, is cause for distinct encouragement. In so far as it is less favorable than in 1920, it is a challenge to defeat the menace of a traffic which organizes for lawless purposes at the expense of public welfare and to support loyally a law that in a brief time has brought so much benefit to the community and to individuals. What has been done the State and city can continue to do.

The words of Dr. Charles W. Eliot, president emeritus of Harvard University, in a letter written February, 1922, to be read at a hearing on a bill providing a State enforcement code, will summarize the whole matter:

"Evidence has accumulated on every hand that prohibition has promoted public health, public happiness, and industrial efficiency. This evidence comes from manufacturers, physicians, nurses of all sorts, school, factory, hospital, and district, and from social workers of many races and religions laboring daily in a great variety of fields. This testimony also demonstrates beyond a doubt that prohibition is sapping the terrible force of disease, poverty, crime, and vice. These results are obtained in spite of imperfect enforcement in some communities of the eighteenth amendment. * * * Let Massachusetts at once take her whole share in putting into execution these prohibitory measures, which are sure to promote public health, public happiness, and industrial efficiency throughout the country and to eliminate the chief causes of poverty, crime, and misery among our people."

Extracts from tables.

[The full report gives the figures for each year of the decade.]

ARRESTS FOR DRUNKENNESS.

	Boston.	All cities.	Entire State.
Average 7 wet years 1912-1918	59,308	98,328	108,123
Average 2 dry years 1920-21	26,293	44,333	48,372
Decrease (per cent)	55	55	55

ARRESTS ALL OFFENSES.

	Boston.	Massachusetts.
Average 7 wet years 1912-1918	90,079	178,072
Average 2 dry years 1920-21	65,489	133,846
Decrease (per cent)	27	24

Extracts from tables—Continued.

ARRESTS OF WOMEN.

	Boston.		Massachusetts.	
	All causes.	Drunkenness.	All causes.	Drunkenness.
Average 7 wet years 1912-1918	8,231	4,743	12,943	7,273
Average 2 dry years 1920-21	4,652	1,494	7,884	2,251
Decrease (per cent)	43	68	39	69

ARREST OF YOUTHS—BOSTON.

	Under 15 years.	Drunkenness.	Wayward.
Average 7 wet years 1912-1918	2,426	663	3,124
Average 2 dry years 1920-21	1,818	436	2,484
Decrease (per cent)	25	34	20

COMMITMENTS BY COURT, DEER ISLAND, BOSTON, SUFFOLK COUNTY HOUSE OF CORRECTION.

	All causes.	Drunkenness.
Average 7 wet years, 1912-1918	6,339	4,281
Average 2 dry years, 1920-21	1,023	508
Decrease (per cent)	83	88

PRISON POPULATION.

	State farm court commitments			Population in all penal institutions on Sept. 30.	
	Total.	Drunkenness.	Vagrancy.	Total.	Women.
Average 7 wet years, 1912-1918	2,959	2,483	347	5,829	732
Average 2 dry years, 1920-21	507	344	136	2,819	291

Average, 2 dry years, 1920–21	4,317	11,762	2.52	24,025

THE LIQUOR TRAFFIC.

Mr. SHEPPARD. Mr. President, at the request of the committee on temperance and social service of the Methodist Episcopal Church South, I ask unanimous consent to have printed in the RECORD resolutions adopted by that committee at a meeting held at Lake Junaluska, N. C., on July 8, 1922.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

At a meeting of the committee on temperance and social service of the Methodist Episcopal Church South, held at Lake Junaluska on July 8, 1922, the following action was taken:

1. The commission indorsed the position taken by the Anti-Saloon League of America: That the prohibition law be enforced within all territory subject to the jurisdiction of the United States, including ships carrying the American flag and especially ships under the control of the United States Shipping Board; approving the adoption of legislation excluding all ships selling or possessing beverage intoxicants on the high seas from entering our ports, such legislation to comply with our treaties which require that we treat the ships of all nations alike, thus putting foreign and American vessels on the same basis in this regard as far as it is legally possible to do so; approving the adoption of the Sterling amendment extending the jurisdiction of the law enforcement officials to 18 miles from the coast of the United States to prevent the smuggling of liquor into the United States. The liquor traffic though outlawed and a criminal before the law is as desperate, defiant, and murderous as it has always been. The legislation proposed above will surely meet the approval of all who really desire the effective enforcement of the prohibition amendment. Our people are urged to write their Senators and Congressmen requesting their support of this legislation.

2. This commission has read with amazement the statements attributed to Hon. John W. Weeks, the Secretary of War of the United States, in the secular press. We have waited to see whether Secretary Weeks would repudiate these press reports of his speech to the graduates of the Pennsylvania Military College at Chester. As he has not done so, it is fair to suppose that he was correctly reported by the press.

We condemn these utterances of Secretary Weeks as ill timed, as unsupported by facts, and as an appeal for practical nullification of the Constitution of the United States, which he has sworn to defend. It was ill timed to attack the Constitution of the United States in an address to a body of students. The declaration that there is "a general sentiment in favor of an amendment to the Volstead Act," that "the people want beer and light wine," are sweeping, reckless statements for which no proof is presented. Doubtless many people, like Secretary Weeks, who have always opposed prohibition "want beer and light wines," but the declaration that "the people want beer and light wines" is a contemptuous dismissal of the sentiment of the great mass of the moral citizenship of the Nation which is unbecoming in a high official of the people, all of whom he is supposed to represent. Finally, it is a distinct declaration in favor of nullification of the eighteenth amendment, which prohibits the manufacture and sale of all "intoxicating" beverages. It is undeniable that light wine is intoxicating and so is the beer which is wanted by the people to whom Secretary Weeks refers. To authorize its manufacture and sale would nullify the plain provision of the Constitution, and yet a Cabinet officer goes out of his way to advocate such nullifying legislation.

We appeal to the President of the United States to request the members of his Cabinet to refrain from public utterances which by implication, if not directly, favor the nullification of the Constitution. Every citizen has the right to advocate the repeal of the eighteenth amendment, but no officer of the Government has the right to openly advocate a policy of nullifying the Constitution, which he has sworn to uphold and defend.

The chairman of the commission is instructed to communicate this action to President Harding and to send a copy of the same to Senator MORRIS SHEPPARD and to Congressman W. D. UPSHAW, to be presented to both Houses of Congress for entry on the Journal and reference to the proper committees.

JAMES CANNON, Jr., *Chairman.*
F. S. PARKER, *Secretary.*

PETITIONS AND MEMORIALS.

Mr. ROBINSON presented letters and telegrams in the nature of petitions from members of Dugon Browning American Legion Post, No. 153, of Decatur; E. A. Stephens, post commander, of Jonesboro; the executive committee of Roy V. Kinard Post, No. 10, American Legion, of Eldorado; Mineral Springs Post, No. 86, American Legion, of Nashville; and sundry citizens of Bradford, all in the State of Arkansas, praying for the prompt passage of the so-called soldiers' adjusted compensation bill, which were ordered to lie on the table.

Mr. McCUMBER presented petitions of sundry citizens of Kathryn, Fingal, Fort Ransom, Valley City, and Underwood, all in the State of North Dakota, praying for the passage of Senate bill 3727, to authorize the War Finance Corporation to make advances to cooperative grain elevator associations, which were referred to the Committee on Finance.

Mr. JONES of Washington presented resolutions adopted at a mass meeting of more than 350 citizens of the Yakima Valley, Wash., representing all interests in the said valley, favoring the use of all the powers of the Government to continue the movement of interstate commerce and to protect the right of every man to labor, which were referred to the Committee on Interstate Commerce.

Mr. NELSON presented a memorial of 183 citizens of Blackduck and vicinity, in the State of Minnesota, remonstrating against the enactment of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

REPORTS OF COMMITTEES.

Mr. NELSON, from the Committee on the Judiciary, to which was referred the bill (S. 3917) to amend section 876 of the Revised Statutes, reported it with an amendment and submitted a report (No. 868) thereon.

Mr. BORAH, from the Committee on Education and Labor, to which was referred the bill (S. 3865) to establish a commission to be known as the United States Coal Commission, reported it with amendments.

Mr. WATSON of Georgia, from the Committee on Claims, to which were referred the following bills, reported them each with amendments, and submitted reports thereon:

A bill (S. 652) for the relief of Janie Beasley (Rept. No. 869); and

A bill (S. 2858) authorizing the Treasurer of the United States to pay to S. C. Davis the sum of $617.70 as full compensation for services rendered as a member of the local draft board for Bibb County, Ga. (Rept. No. 870).

Mr. CAPPER, from the Committee on Agriculture and Forestry, to which was referred the joint resolution (S. J. Res. 226) authorizing the acceptance of title to certain land within the Shasta National Forest, Calif., reported it without amendment and submitted a report (No. 872) thereon.

Mr. MYERS, from the Committee on Public Lands and Surveys, to which was referred the bill (S. 2832) authorizing the Secretary of the Interior to allow the additional homestead application of Otha Potter, reported it without amendment and submitted a report (No. 873) thereon.

Mr. KEYES, from the Committee on Agriculture and Forestry, to which was referred the bill (H. R. 10672) to amend the act of July 24, 1919, entitled "An act making an appropriation for the Department of Agriculture for the fiscal year ending June 30, 1920," reported it with an amendment and submitted a report (No. 874) thereon.

Mr. HEFLIN, from the Committee on Agriculture and Forestry, to which was referred the resolution (S. Res. 335) directing the Federal Reserve Board to require the Federal Reserve Banks of Atlanta, Dallas, St. Louis, and Kansas City to report to the Senate the rates of interest charged by them on loans and discounts in 1920 and 1921, reported it without amendment.

Mr. NEW, from the Committee on Claims, to which was referred the bill (S. 2078) for the relief of the estate of C. C. Spiller, deceased, reported it without amendment and submitted a report (No. 875) thereon.

REPEAL OF ST. MARYS RIVER BRIDGE ACT.

Mr. JONES of Washington. From the Committee on Commerce I report back favorably without amendment the bill (S. 3878) to repeal an act entitled "An act to authorize the construction of a bridge across the St. Marys River, at or near Wilds Landing Ferry, between Camden County, Ga., and Nassau County, Fla.," approved October 13, 1921.

It is a bill repealing a bridge act which we have passed. The repeal of the act is entirely satisfactory to the Senators from both the States affected. I ask for the present consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole and it was read as follows:

Be it enacted, etc., That an act entitled "An act to authorize the construction of a bridge across the St. Marys River, at or near Wilds Landing Ferry, between Camden County, Ga., and Nassau County, Fla.," approved October 13, 1921, be, and the same is hereby, repealed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REGULATION OF FUTURES TRADING IN GRAIN.

Mr. CAPPER. Mr. President, from the Committee on Agriculture and Forestry, I report back favorably with amendments the bill (H. R. 11843) for the prevention and removal of obstructions and burdens upon interstate commerce in grain by regulating transactions on grain futures exchanges, and for other purposes, and I submit a report (No. 871) thereon. It is legislation made necessary by reason of the recent decision of the Supreme Court in which certain provisions of the futures trading act, passed a year ago by Congress, were declared unconstitutional. The House has passed the bill and the Secretary of Agriculture is now asking for prompt action by the Senate on the measure. The law is still being administered, but by reason of the fact that a part of the law has been emasculated by the Supreme Court the administration of it can not be effective or efficient. Therefore, the Secretary of Agriculture asks for its early consideration.

I wish to give notice that at the earliest opportunity, during the morning hour some time this week, I shall ask for the consideration of the bill.

The PRESIDENT pro tempore. The bill will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. KENDRICK:

A bill (S. 3928) granting a pension to William J. Swift (with accompanying papers); to the Committee on Pensions.

By Mr. FLETCHER:

A bill (S. 3929) authorizing the Secretary of the Interior to equitably determine and confirm by patent the title to lots in the city of Pensacola, Fla.; to the Committee on Public Lands and Surveys.

By Mr. McCUMBER:

A bill (S. 3930) for the relief of the Bowers Southern Dredging Co.;

A bill (S. 3931) for the relief of the North American Dredging Co.; and

A bill (S. 3932) for the relief of A. W. Duckett & Co.; to the Committee on Claims.

By Mr. McNARY:

A bill (S. 3933) granting a pension to William L. Curry; to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3934) appropriating $15,000 for the extermination of bean beetles, etc., in the State of New Mexico; to the Committee on Appropriations.

By Mr. STERLING:

A bill (S. 3935) to prevent the willful obstruction of the movement of trains in interstate commerce, and for other purposes; to the Committee on Interstate Commerce.

A bill (S. 3936) to rebuild the boys' dormitory at the Indian school, Rapid City, S. Dak.; to the Committee on Indian Affairs.

By Mr. RANSDELL (for Mr. KING):

A bill (S. 3937) authorizing the Secretary of War to enlarge the facilities at the military post at Fort Douglas, Utah, to provide permanent accommodations for one brigade of troops; to the Committee on Military Affairs.

FLOODS AND LEVEES OF THE MISSISSIPPI RIVER.

Mr. RANSDELL submitted the following concurrent resolution (S. Con. Res. 28), which was referred to the Committee on Printing:

Resolved by the Senate (the House of Representatives concurring), That there be printed 1,000 copies of part 2 of House Report No. 300, Sixty-third Congress, second session, entitled "Floods and Levees of the Mississippi River," for the use of the Senate document room.

INVESTIGATION OF CROP INSURANCE.

Mr. McNARY submitted the following resolution (S. Res. 341), which was referred to the Committee on Agriculture and Forestry:

Resolved, That a committee, to be composed of three Senators appointed by the President of the Senate, is authorized and directed to investigate the subject of crop insurance, particularly with reference to (1) the kinds and costs of insurance now obtainable; (2) the adequacy of the protection afforded by such insurance; (3) the desirability of and practical methods for extending the scope of such insurance; and (4) the availability and sufficiency of statistics necessary to properly and safely issue additional crop insurance. Within six months after the adoption of this resolution the committee shall report to the Congress the results of its investigations, together with its recommendations, if any, upon the most practical and efficient methods whereby the farm can obtain, at a reasonable cost, adequate and safe crop insurance.

Such committee is authorized to hold hearings at such times and places as it may deem advisable, to send for persons and papers, to administer oaths, to employ actuarial and other experts, and to employ stenographers to report such hearings at a cost not exceeding $1.25 per printed page. The expenses of the committee, including necessary traveling expenses, shall be paid from the contingent fund of the Senate.

RESOLUTIONS OVER UNDER THE RULE.

The PRESIDENT pro tempore. The Chair lays before the Senate resolutions coming over from a previous day, which will be stated in their order.

The READING CLERK. Senate Resolution 297, by Mr. STERLING, directing the Committee on Civil Service to investigate and report upon the activities, methods, and procedure of the United States Bureau of Efficiency.

Mr. STERLING. Let the resolution go over.

The PRESIDENT pro tempore. Does the Senator from South Dakota desire to have it lie on the table?

Mr. STERLING. Let it lie on the table.

The PRESIDENT pro tempore. The resolution will lie on the table. The next resolution which went over under the rule will be stated.

The READING CLERK. Senate Resolution 306, by Mr. WALSH of Montana, calling upon the Attorney General for information relative to an alleged conspiracy among importers to exact exorbitant prices.

Mr. CURTIS. Let that go over, please.

The PRESIDENT pro tempore. The resolution will lie on the table.

The READING CLERK. Senate Resolution 321, by Mr. HEFLIN, disapproving the conduct of Governor Harding, of the Federal Reserve Board, in the matter of the circulation of a speech made by the Senator from Virginia, Mr. GLASS.

Mr. MOSES. Let that go over.

The PRESIDENT pro tempore. The resolution will lie on the table.

The READING CLERK. Senate Resolution 331, by Mr. HARRISON, expressing the sense of the Senate relative to voting where the private interests of a Member are concerned.

Mr. SMOOT. Let that go over.

The PRESIDENT pro tempore. The resolution will lie on the table.

The READING CLERK. Senate Resolution 334, by Mr. HARRISON, providing for an investigation of charges relative to the sugar schedule of the pending tariff bill.

Mr. MOSES. Let that go over.

The PRESIDENT pro tempore. The resolution will lie on the table.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House disagreed to the amendments of the Senate to the bill (H. R. 4) granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses, requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. KNUTSON, Mr. ROBSION, and Mr. UPSHAW were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes; agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. FORDNEY, Mr. GREEN of Iowa, Mr. LONGWORTH, Mr. GARNER, and Mr. COLLIER were appointed managers on the part of the House at the conference.

The message further announced that the House had passed a bill (H. R. 11699) relating to the appointment of the Chief of Staff of the Army, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 65) providing for the printing of 6,000 additional copies of House bill 7456, the tariff bill.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the enrolled bill (H. R. 2694) for the relief of Seth J. Harris, Jimmie Lou Martin, Mary Holloman, and William Henry Coleman, and it was thereupon signed by the President pro tempore.

HOUSE BILL REFERRED.

The bill (H. R. 11699) relating to the appointment of the Chief of Staff of the Army was read twice by its title and referred to the Committee on Military Affairs.

PENSIONS AND INCREASE OF PENSIONS.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 4) granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses.

Mr. BURSUM. I move that the Senate insist upon its amendments, agree to the conference asked for by the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. BURSUM, Mr. SMOOT, and Mr. WALSH of Montana conferees on the part of the Senate.

ADDITIONAL COPIES OF TARIFF BILL.

The PRESIDING OFFICER laid before the Senate the concurrent resolution (H. Con. Res. 65), which was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed 6,000 additional copies of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, of which 4,000 copies shall be for the House document room and 2,000 for the Senate document room.

Mr. MOSES. I move that the Senate concur in the resolution.

The concurrent resolution was considered by unanimous consent and agreed to.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on August 23, 1922, the President approved and signed the act (S. 848) to amend section 22 of the interstate commerce act as amended.

POLITICAL VIEWS OF SENATOR M'KELLAR.

Mr. MCKELLAR. Mr. President, in the last few days and weeks much has been said about the accomplishments and failures of the party in power.

The Republican Party have been in virtual control of the Government for three years and five months. They have been in control of both Houses of Congress since March 4, 1919, and of all branches of the Government since March 4, 1921, a period now of nearly 18 months.

THEIR FAILURES.

They have failed to restore normalcy.
They have failed to restore prosperity.
They have failed to keep up our merchant marine.
They have failed to keep our foreign trade.
They have failed to keep their promises to labor.
They have failed to keep their promises to capital.
They have failed to keep faith with the ex-service men.
They have failed to keep their promises to the farmers.
They have failed to keep their promises to the business men.
They have failed to maintain law and order in the country.
They have failed to protect the country against criminal trusts.
They have failed in their management of the coal industry.
They have failed utterly in the management of the railroads.
They have failed to take the Government out of business.
They have failed to put business into Government.
They have failed to enforce the prohibition laws.
They have failed to restore peace and trade with Mexico.
They have failed in their conduct of the Department of Justice.
They have failed in their conduct of the Department of Commerce.
They have failed in their conduct of the Department of Labor.
They have failed in their conduct of the Department of State.
They have failed in bringing about any effective adjustment of our foreign relations.
They have failed to obtain any settlement of our foreign indebtedness, amounting to more than $11,000,000,000.
They have failed to lower the tax burdens on the people generally.
They have failed utterly in their conduct of the executive department of the Government, it being but a succession of wiggles and wobbles.
They have failed utterly in their conduct of the legislative department of the Government, it being also a succession of wiggles and wobbles.

THEIR ACCOMPLISHMENTS.

In the Newberry case the Senate majority officially found:

The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free government, such excessive expenditures are hereby severely condemned and disapproved.

Then they seated NEWBERRY in violation of their own findings. They have thus established the precedent of purchasing a seat in the United States Senate when one is sorely needed.

They have amended by construction the civil service laws by which they have given the ex-soldiers the preference and the professional politicians the post offices, and many other civil service offices.

They have modified by construction the eighteenth amendment and the Volstead law so as to enforce it as to prohibitionists and allow it to be violated by all others.

They have established a system of oil leasing by which the Oil Trusts, domestic and foreign, have secured a great part of the oil supply of the United States.

They have brought wheat down, by the passage of the emergency tariff bill, to the lowest price it has sold for in many years.

They have established, by the emergency tariff bill and other tinkering with the tariff, a system by which the cattle raisers can get substantially nothing for their hides, while shoes and other leather goods are higher than they have ever been in peace time.

They have made the lobbyists to flourish like a green bay tree.
They have made profiteering eminently respectable.
They have made bootlegging an honorable business.
They have substituted innocuous conferences at the White House for Executive action.
In their tariff bill they have taken away from the legislative department the power of taxation and turned it over to the Executive without constitutional right or authority.
They have largely reduced taxes on the rich.
They have fed the interests with a bountiful hand.
They have stood by the trusts.
They have knocked the life out of business.
They have taken the zest out of pleasure.
They have raised railroad passenger rates so high that the people can not afford to travel.
They have raised railroad freight rates so high that the interchange of commodities is made a losing business.
They have passed a budget bill which increases the cost of government and pleases no one.
They have paid to foreign governments and foreign peoples all they claimed and collected nothing of what foreign governments and foreign peoples owe us.
They have fooled the people about an association of nations and made a treaty of peace with Germany from which the United States could not possibly derive any benefit.
They have entered into disarmament treaties which do not disarm and into treaties of alliance which do not ally, and from none of which our people get any benefit.
They have professed, in their treaties, to be for peace, and at the same time have been most vociferous in their appeals for greater preparation and greater appropriations for war.
They passed an Army reorganization bill with which no one is satisfied, and in which officers are many and enlisted men are few, and all at the highest cost in our history.
Their House has passed one tariff bill and their Senate has passed another, both so different and so outrageously high, and they find the people so disgusted with what they have already done, that it is now proposed that their conferees shall pass a third. The bills already passed provide for the highest tariff taxes in all history, and whatever bill is passed will tax the American people, already overburdened with taxation, at least $2,000,000,000 a year additional, out of which the Government will get perhaps an additional $50,000,000 from our tariff, the rest going to the special interests.
They have raised the price of everything that a farmer buys and lowered the price of everything that a farmer sells.
They got the labor vote in 1920, and they are now repaying labor by depriving it of its every right.
They have furnished labor strikes in abundance.
They have furnished the ex-service men with millions of cases of unemployment.
They have furnished the business men with bankruptcy.
They have dillydallied over a year about the coal strike, but they have given us Mr. Hoover to raise the price of coal to the coallers and to coldest this winter. He will soon tell us how we can break the coal lumps into smaller pieces and keep warmer, just as he used to tell us how we could get greater good from slices of bread if we made them thinner.
They have given us a rotten, broken-down transportation system which sometimes carries the public and sometimes not, but always holds them up.
They have given us a splendid merchant marine, tied up securely and rotting in the various harbors of our country, and have turned over our splendid commerce to English ships.
They have virtually abandoned our foreign trade.
They have made money tighter to the business man and looser to the speculator, but as an offset they still furnish the American business man the right of bankruptcy.
They have raised the cost of electing a President to nine millions of dollars. It is a large price, but we all know it is worth it, and besides, as soon as the tariff law is passed, the American people will then joyfully pay it back to the interests who furnished it in increased tariff taxes for their special benefit.
They elected the President by 7,000,000 majority and no doubt will secure unanimous consent for his retirement at the proper time.
They have taken the iron fence from around the botanical gardens in Washington.
And then they have made Laddie Boy famous.
These are some of the remarkable accomplishments of the Grand Old Party during its three and a half years of rule.

ADDITIONAL DISTRICT JUDGES.

Mr. CUMMINS. I ask unanimous consent that the Senate now proceed to the consideration of the conference report upon what is ordinarily known as the judges' bill, being the bill (H. R. 9103) for the appointment of additional district judges for certain courts of the United States, to provide for annual conferences of certain judges of United States courts, to authorize the designation, assignment, and appointment of judges outside their districts, and for other purposes.

The PRESIDING OFFICER. The Senator from Iowa asks unanimous consent for the immediate consideration of the conference report on the bill named by him. Is there objection?

Mr. SHIELDS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	Moses	Sheppard
Borah	Heflin	Myers	Shields
Brandegee	Hitchcock	Nelson	Shortridge
Bursum	Jones, N. Mex.	New	Smoot
Cameron	Jones, Wash.	Nicholson	Stanfield
Capper	Kendrick	Oddie	Sterling
Culberson	Keyes	Phipps	Underwood
Cummins	Lenroot	Pittman	Wadsworth
Curtis	McCumber	Ransdell	Warren
Dillingham	McKellar	Rawson	Watson, Ga.
Fletcher	McLean	Reed, Pa.	
Gooding	McNary	Robinson	

Mr. CURTIS. I desire to announce that the junior Senator from Ohio [Mr. WILLIS] is necessarily absent on account of illness in his family.

The PRESIDING OFFICER. Forty-six Senators have answered to their names. There is not a quorum present. The Secretary will call the names of the absent Senators.

The reading clerk called the names of the absent Senators, and the following Senators answered to their names when called:

Trammell Walsh, Mass. Walsh, Mont.

The following Senators entered the Chamber and answered to their names:

Gerry Kellogg Norbeck

The PRESIDING OFFICER. Fifty-two Senators have answered to their names. A quorum is present. The Chair will declare the morning business closed. The Senator from Iowa asks unanimous consent for the present consideration of the conference report on the judiciary bill. Is there objection?

Mr. SHIELDS. I object.

The PRESIDING OFFICER. The Senator from Tennessee objects.

Mr. CUMMINS. I move that the Senate proceed to the consideration of the conference report.

The PRESIDING OFFICER. The question is on the motion of the Senator from Iowa that the Senate proceed to the consideration of the conference report.

Mr. SHIELDS. I ask for the yeas and nays.

The yeas and nays were ordered, and the reading clerk proceeded to call the roll.

The PRESIDING OFFICER (when the name of Mr. JONES of Washington was called). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent for the day, and the present occupant of the chair has promised to pair with him. He finds, however, that he can transfer the pair to the junior Senator from Vermont [Mr. PAGE] and does so, and votes "yea."

Mr. KELLOGG (when his name was called). I transfer my pair with the senior Senator from North Carolina [Mr. SIMMONS] to the junior Senator from Maryland [Mr. WELLER] and will vote. I vote "yea."

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Utah [Mr. KING], which I transfer to the junior Senator from Washington [Mr. POINDEXTER] and will vote. I vote "yea."

Mr. PHIPPS (when his name was called). I have a pair with the junior Senator from South Carolina [Mr. DIAL], which I transfer to the senior Senator from Michigan [Mr. TOWNSEND] and will vote. I vote "yea."

Mr. ROBINSON (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. SUTHERLAND] to the Senator from Louisiana [Mr. BROUSSARD], and will vote. I vote "nay."

Mr. STERLING (when his name was called). I transfer my pair with the Senator from South Carolina [Mr. SMITH] to the Senator from Delaware [Mr. DU PONT], and will vote. I vote "yea."

Mr. WALSH of Montana (when his name was called). I have a pair with the senior Senator from New Jersey [Mr. FRELINGHUYSEN]. Being unable to secure a transfer, I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. WARREN (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. OVER-

MAN]. I transfer that pair to the senior Senator from Maryland [Mr. FRANCE], and will vote. I vote "yea."

Mr. WATSON of Georgia (when his name was called). I have a general pair with the Senator from California [Mr. JOHNSON], who, if present, would vote "yea." In his absence I withhold my vote. If at liberty to vote, I should vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. I transfer my pair with the Senator from Virginia [Mr. GLASS] to the Senator from Pennsylvania [Mr. PEPPER], and will vote. I vote "yea."

Mr. FLETCHER (after having voted in the affirmative). I have a general pair with the Senator from Delaware [Mr. BALL], who is absent. I understand that, if present, he would vote the same way that I have voted, and I will therefore allow my vote to stand.

Mr. TRAMMELL (after having voted in the affirmative). Since voting, I find that my pair, the senior Senator from Rhode Island [Mr. COLT], is absent; but being informed that, if present, he would vote as I have voted, I will allow my vote to stand.

Mr. JONES of Mew Mexico (after having voted in the affirmative). I desire to announce that I am informed that my pair, the Senator from Maine [Mr. FERNALD], would, if present, vote as I have voted. I will therefore permit my vote to stand.

Mr. STANLEY. Has the junior Senator from Kentucky [Mr. ERNST] voted?

The PRESIDING OFFICER. He has not.

Mr. STANLEY. I have a pair with the junior Senator from Kentucky. Being unable to secure a transfer, I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. UNDERWOOD (after having voted in the negative). I note from the recapitulation of the vote that the senior Senator from Massachusetts [Mr. LODGE] has not voted. I have a general pair with him and am unable to get a transfer, and I therefore withdraw my vote.

Mr. CURTIS. I have been requested to announce the following general pairs:

The Senator from New Jersey [Mr. EDGE] with the Senator from Oklahoma [Mr. OWEN];

The Senator from West Virginia [Mr. ELKINS] with the Senator from Mississippi [Mr. HARRISON];

The Senator from Illinois [Mr. MCKINLEY] with the Senator from Arkansas [Mr. CARAWAY];

The Senator from Missouri [Mr. SPENCER] with the Senator from Georgia [Mr. HARRIS];

The junior Senator from Ohio [Mr. WILLIS] with the senior Senator from Ohio [Mr. POMERENE]; and

The Senator from Indiana [Mr. WATSON] with the Senator from Mississippi [Mr. WILLIAMS].

The roll call resulted—yeas 35, nays 11, as follows:

YEAS—35.

Ashurst	Gooding	McLean	Reed, Pa.
Brandegee	Hale	Moses	Shortridge
Bursum	Harreld	Myers	Smoot
Cameron	Jones, N. Mex.	Nelson	Stanfield
Capper	Jones, Wash.	Nicholson	Sterling
Cummins	Kellogg	Norbeck	Trammell
Curtis	Keyes	Oddie	Wadsworth
Dillingham	Lenroot	Phipps	Warren
Fletcher	McCumber	Rawson	

NAYS—11.

Gerry	McKellar	Pittman	Shields
Heflin	McNary	Robinson	Walsh, Mass.
Kendrick	New	Sheppard	

NOT VOTING—50.

Ball	France	Newberry	Stanley
Borah	Frelinghuysen	Norris	Sutherland
Broussard	Glass	Overman	Swanson
Calder	Harris	Owen	Townsend
Caraway	Harrison	Page	Underwood
Colt	Hitchcock	Pepper	Walsh, Mont.
Culberson	Johnson	Poindexter	Watson, Ga.
Dial	King	Pomerene	Watson, Ind.
du Pont	Ladd	Ransdell	Weller
Edge	La Follette	Reed, Mo.	Williams
Elkins	Lodge	Simmons	Willis
Ernst	McCormick	Smith	
Fernald	McKinley	Spencer	

The PRESIDING OFFICER. On the motion of the Senator from Iowa, the yeas are 35, the nays are 11. Senators UNDERWOOD, WALSH of Montana, WATSON of Georgia, and STANLEY are present and paired. A quorum is present, and the motion prevails. The Chair lays before the Senate the conference report on House bill 9103, for the appointment of additional district judges for certain courts of the United States, to provide for annual conferences of certain judges of United States courts, to authorize the designation, assignment, and appointment of judges outside their districts, and for other purposes. The Chair is informed that this conference report has been read, and, without objection, another reading will be dispensed with.

Mr. CUMMINS. Mr. President, I shall make the briefest possible explanation of the report of the conference committee.

The House bill authorized the President to appoint 22 additional district judges. Among them was an additional judge for the eastern district of Illinois and a judge for the middle district of Tennessee. The Senate eliminated both these districts from the appointments to be made, but it added three district judges and one circuit judge. It added a district judge for the district of New Jersey, a district judge for the northern and the southern districts of Georgia, and a judge for the district of New Mexico. It also added a circuit judge for the fourth judicial circuit.

These differences between the action of the House and the action of the Senate constituted the only substantial controversy before the conference committee. There are other provisions of the bill; but the House provisions and the Senate provisions, with the exceptions I have stated, are substantially similar, although they differ in the method of expression.

The total number of district judges agreed upon in the conference committee is 24. The Senate conferees were constrained to recede from the difference with respect to the eastern district of Illinois and the middle district of Tennessee, and the House receded from its controversy with respect to the district of New Jersey and the district of New Mexico. The bill reported from the conference committee, therefore, provides for 24 additional district judges, and it provides for one additional circuit judge for the fourth judicial circuit. That is the circuit which comprises Maryland, Virginia, West Virginia, North Carolina, and South Carolina.

I do not intend to repeat the argument I made upon the passage of the bill with respect to the imperative necessity of additional district judges. Senators who were here will remember the lamentable delay which has occurred and is occurring in the disposition of cases brought in the district courts of the United States. But a few days ago I asked the Attorney General to give me any additional information that he had at his command—that is, additional to the information which was laid before the committee and before the Senate, and additional because of the change in the situation since that time—and I intend to read it.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Georgia?

Mr. CUMMINS. I yield to the Senator from Georgia.

Mr. WATSON of Georgia. I should like to ask the Senator from Iowa, granting his contention that there is a need for more judges, why the bill for the additional judges should not have been confined to those districts or those States where the new judges were needed, and why this revolutionary change in the whole system?

Mr. CUMMINS. There is no change in the system, but there are natural differences of opinion with regard to the necessity of judges in particular districts. My personal opinion did not conform to the opinions that were held by certain other Senators. All I can say in response to the question of the Senator from Georgia is that somebody in the Senate and the House, and indeed a majority of both the Senate and the House, felt that there is a necessity for every judge provided for in the conference report.

The letter to which I have just referred, from the Attorney General, I will read. It is dated August 17:

MY DEAR SENATOR: The necessity for the prompt passage of H. R. 9103—

That being the number of the bill—

a bill providing for additional United States judges, daily becomes more urgent. Recent estimates show an increase of 30,000 cases pending and undisposed of over the fiscal year 1921—

And it was at the close of the fiscal year 1921 that the investigation of the committee came to an end—

or an average of 1,250 cases per judge if the 24 new judges are authorized. Of this 30,000 increase but 10,000 are criminal cases, thereby verifying my prediction of a few months ago that a very substantial increase in civil business for the future is inevitable. This congestion encumbers the court dockets with a total of more—

Mark you, now—

of more than 172,000 cases pending and undisposed of on June 30, 1922, as compared with 142,402 cases pending on June 30, 1921, and this notwithstanding that for the same period there was an increase of 17,718 in cases disposed of.

I can not too strongly impress upon you the seriousness of the situation. Important civil and criminal cases can not be tried. The department is, of course, proud of our Federal judiciary, and naturally faces with regret a situation which, if permitted to continue, must inevitably undermine the high standards of the Federal courts.

There are now 103 United States trial judges for 110,000,000 people. Surely an increase of 24 judges is moderate, in view of the constantly increasing burdens which have been placed upon the Federal courts through new legislation, as well as old, without a corresponding increase in the number of judges. In fact, with one or two exceptions, there have been no increases in the Federal judiciary in a quarter of a century.

Our Federal courts need immediate relief. The burdens are enormous and the situation throughout the country daily becomes more alarming. Congress can not provide for the increase in judges with the conference and the elastic features embodied in H. R. 9103 any too soon if irreparable damage is not to be done to the administration of justice and respect for law in the United States.

One of the high officials of the Department of Justice in conversation with me a few days ago said that if all the 24 judges proposed to be added to the judiciary in this bill were to do nothing for two years but try criminal cases in which it is alleged there has been a violation of the postal laws, and mainly a violation of the laws which are intended to prevent the transmission of matter through the mails in furtherance of a conspiracy to defraud, it would take two years for these additional judges to clear the dockets of that one class of cases alone. It is a situation which every true American and every lover of justice must deeply deplore, and I sincerely hope that the judgment of both the Senate and the House as heretofore expressed will be reaffirmed in the vote about to be had upon the conference report.

I have not mentioned the one addition to the number of circuit judges. The fourth circuit is the only circuit in the United States which has but two regular circuit judges. There is one circuit judge assigned to the fourth circuit, Judge Knapp, who was originally appointed as a member of the Commerce Court, which was afterwards abolished. He is advanced in years, and when he retires there will be but two judges in that circuit. That is not fair to the circuit. The judges are unable to perform speedily the duties which are cast upon them, and I have not heard anyone who has made the least objection to the additional circuit judge in the fourth circuit.

There may be some difference of opinion with regard to the need of judges when you compare the necessities of the various districts. I concede there is room for difference of opinion with respect to that. But the Senate did the best it could, exercised the best judgment of which it was capable, and the conference committee, after long and persistent labor, reached the conclusion I have stated. It required a month, possibly two months, for the conference committee to reach a conclusion. I hope that the conference report may be agreed to, and speedily agreed to, because it must be a shame and a humiliation to every American citizen when he looks upon the business in these courts that is undisposed of and which can not be disposed of for years to come unless we fortify the judiciary by the appointment of additional judges.

Mr. SHIELDS. Mr. President, the Senator in charge of the bill [Mr. CUMMINS] has made some remarks upon the merits of the bill and has read a letter recently received by him from the Attorney General. The remarks of the Senator are largely an epitome of the speech made in presenting the bill, without going into detail. I offered some observations at that time which I think met the statements of the Senator from Iowa and showed that the generalizations in which he dealt can not be sustained upon the concrete facts. The Senator himself then admitted and now admits that in his opinion there are a number of judgeships provided for in the bill which the business of the districts does not require or demand. Of course, there was a difference in opinion upon the subject. The Senators from those States for which judges were provided were anxious to have the judgeships, and they felt that there was a necessity. I am not going to challenge their sincerity.

The Attorney General appeared before the committees of both the House and the Senate having jurisdiction of the bill and made statements in its interest. There also appeared some of his assistants and some district attorneys from certain districts of the United States. Then the Chief Justice of the Supreme Court of the United States appeared and insisted that certain provisions in the bill as first introduced—some of which were omitted and some of which still appear—were required for the proper dispatch of business and asked for the legislation, although it was a matter in which under the Constitution he was not allowed to interfere. It was beyond the functions of the judiciary, and solely and purely within the function of the the legislative department of the Government. The impropriety of the action of the Chief Justice is obvious and indefensible.

The Attorney General then made statements similar to those contained in the letter just read. I answered those statements by quoting from the report which he had made under his oath of office, as required by an act of Congress, of the litigation disposed of by the Federal courts of the United States for the previous year, which in detail showed that no such congestion as his general statements would seem to show, in fact, existed. Now, so much for the merits of the bill. At the proper time I want to go into detail in regard to these matters, and I shall do so.

Mr. President, I believe that this is a most grievous assault upon the judiciary of the country. I believe it is largely a political bill providing for political friends of the administration. I believe there is no necessity for more than one-half of the judges provided. I believe that it is imposing an unjust burden upon the taxpayers of the country. I believe there are provisions giving the Chief Justice power over the lower courts which was never contemplated by our system of government and which is in direct conflict with it and will seriously injure the usefulness and efficiency of the judges of the inferior courts. I consider it a very serious assault upon the independence and dignity of the several judges of the district courts of the United States. But I am not now going into that matter because there are certain questions which I believe will require the bill to be recommitted.

Mr. President, I desire to make a point of order upon the conference report.

The PRESIDING OFFICER (Mr. MCNARY in the chair). The Senator will state the point of order.

Mr. SHIELDS. Mr. President, the point I make is predicated upon what is known as the Curtis amendment to Rule XXVII. While this rule is entirely familiar to everyone, including the Presiding Officer, yet I am going to read it. It is section 2:

Conferees shall not insert in their report matter not committed to them by either House, nor shall they strike from the bill matter agreed to by both Houses. If new matter is inserted in the report, or if matter which was agreed to by both Houses is stricken from the bill, a point of order may be made against the report, and if the point of order is sustained, the report shall be recommitted to the committee of conference.

Mr. President, it will be remembered that previous to this amendment it had been held by the Presiding Officers of this body that the elimination of matter or the insertion of new legislation was not the subject of a point of order, but this changes the rule.

The points I make go both to the elimination of matter contained in the bill as it passed the House, for the bill originated in the House, and as it was amended and passed by the Senate, and to the inclusion of matter that was not in the bill as it passed the House or as it passed the Senate. Therefore, the several points of order, I may say, that I am raising—and I am willing to dispose of them all at once to economize time—present a question both of the elimination of material matter from the bill as it passed the two Houses and of the insertion of new matter.

I have made a memorandum of the places in the bill where this appears and if it would assist the Presiding Officer I can furnish him with a copy of the memorandum so as to aid him in following me. I send a copy of the memorandum to the desk for the Presiding Officer.

I ask the Presiding Officer to have before him the bill as it was reported to the Senate by the Judiciary Committee, for that print contains both the House text and the Senate amendments, and they can both be referred to in the same document.

Mr. SHEPPARD. Mr. President——

Mr. SHIELDS. I yield to the Senator from Texas.

Mr. SHEPPARD. Would it not be advisable to have that memorandum published in the RECORD?

Mr. SHIELDS. I frankly say that the memorandum was prepared some time ago, when the report was first presented, and I have never read it. I do not know that it is in condition to go into the RECORD, but I have no objection to it.

The PRESIDING OFFICER. Does the Chair understand that the Senator from Tennessee is making request that the memorandum be published in the RECORD?

Mr. SHIELDS. Not now. I shall insert it at the end of my remarks for the convenience of Senators. Has the Chair a copy of the print containing both bills?

The PRESIDING OFFICER. It is before the Chair.

Mr. SHIELDS. The first point of elimination is the provision which appears upon page 4 of the House text, lines 17 to 22, inclusive.

Mr. CUMMINS. What section?

Mr. SHIELDS. Section 2.

The PRESIDING OFFICER. Will the Senator state what part of the text he claims was improperly eliminated?

Mr. SHIELDS. I am proceeding to do that now. It reads as follows:

The Attorney General shall, upon request of the Chief Justice, report to said conference on matters relating to the business of the several courts of the United States, with particular reference to causes or proceedings to which the United States may be a party, together with such recommendations or requests as may be deemed proper.

That language, Mr. President, was contained in the bill as it passed the House of Representatives. Now, I will ask the Presiding Officer to refer to this Senate bill, page 12 of this print, lines 16 to 30, inclusive, where the same provision which I have read from the House bill appears in these words:

The Attorney General shall, upon request of the Chief Justice, report to said conference on matters relating to the business of the several courts of the United States, with particular reference to causes or proceedings in which the United States may be a party.

This provision was entirely left out of the bill as reported by the conferees.

Mr. President, I should say here, if the Chair has not already observed it, that the conferees redrafted the bill, and they report—I do not mean in substance but in form—an entirely new bill, of which they recommend the passage, which is set in full in the report. The provision in regard to the report of the Attorney General, as I have stated, while appearing in the bill as it passed the House and as it passed the Senate, does not appear in the bill as redrafted by the conferees and set forth in their report.

Whether or not the question of materiality in such matters can be raised, it is not necessary to be discussed in this particular case. But I am of opinion that the question of materiality is not one for the Presiding Officer under this rule; that is a question that is submitted to the two Houses of Congress; and when they have joined in inserting a provision in the bill it is conclusively presumed to be material, and the Presiding Officer has no discretion to consider it with a view of determining whether it is material. Otherwise he would take upon himself the power of legislation as against the opinion and the will of the two Houses as expressed by them in the solemn enactment of a law.

This, however, is a material provision; it was in all the bills, for there were several that were before the Judiciary Committee; and it was insisted upon by the officers of the Department of Justice appearing and urging the passage of the bill. Indeed, the provision in the bill as originally introduced, and which had been favored by the Chief Justice and the Attorney General upon this subject, was much broader and gave the Attorney General the status of a member of the conference to which he should report and the right to participate in its deliberations and conclusions; but in both the House and the Senate the bill was amended so as to be in the words which I have read to the Chair.

Mr. JONES of Washington took the chair.

Mr. SHIELDS. I notice that since I have called attention to the omission in the conference report and made my observations in reference to that omission the occupant of the chair has changed. I should like to know if the present Presiding Officer was in the Chamber and understands the exact point which I am making?

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The present occupant of the chair was not in the chair at the time the Senator from Tennessee made the observations to which he has referred, and consequently did not know the point of order had been made.

Mr. CUMMINS. I ask the Senator from Tennessee to yield to me in order that I may make a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Iowa will state his parliamentary inquiry.

Mr. CUMMINS. Is the point of order which is now being made by the Senator from Tennessee [Mr. SHIELDS] debatable?

The PRESIDING OFFICER. The Chair is not advised with reference to that matter just now.

Mr. SHIELDS. Is there any point of order which is not debatable? What is the difference between this and other points of order? I am astonished that the Senator from Iowa, who represented the Senate on the conference committee, should desire to cut off argument assailing his own report.

Mr. CUMMINS. I do not. I am simply attempting to provide myself with some assurance that I, too, may be permitted to debate the point of order as well as the Senator from Tennessee.

Mr. SHIELDS. I assure the Senator from Iowa that I shall not raise any objection to his discussing the matter.

Mr. CUMMINS. It is true that every point of order is debatable. I am not objecting to debate, but I wish to know whether or not the Chair holds that this point of order is debatable.

The PRESIDING OFFICER. The Chair will say that he should like to have the point of order debated in order that he may understand what it is. Otherwise the Chair would have to read both the bills to which the Senator from Tennessee has referred.

Mr. CUMMINS. That is the difficulty. The Senator from Tennessee is interweaving his statement of the point of order with his argument in support of the point of order.

Mr. SHIELDS. I am debating it; at any rate, I hope that what I have said is not to be considered beneath the dignity of an argument.

Mr. CUMMINS. Oh, no; but there is one thing that ought to be understood by the Chair, and possibly he is not familiar with the progress of the procedure on this bill. The House passed the bill and the Senate struck out everything in that bill after the enacting clause.

Mr. SHIELDS. Mr. President, I am not willing to yield for a speech to be injected into my argument upon this matter.

Mr. CUMMINS. I desire the Chair to understand what the situation is.

Mr. SHIELDS. The Senator may later reply to what I say about it.

Mr. CUMMINS. I am not going to argue the matter, but I am simply going to state the situation.

Mr. SHIELDS. The Senator may state it when he comes to his argument.

Mr. CUMMINS. There will be——

The PRESIDING OFFICER. The Senator from Tennessee declines to yield any further.

Mr. CURTIS. Will the Senator from Tennessee yield until I may call to the attention of the Chair a ruling of a former Presiding Officer holding that it is the practice for the Presiding Officer to hear debate if he so desires on a point of order?

The PRESIDING OFFICER. The present occupant of the chair should insist upon hearing debate; otherwise he would not be prepared to pass upon the point of order.

Mr. CUMMINS. When I myself have been presiding I have often asked for debate upon a point of order, but it is not true that debate on a point of order is in every case in order as a matter of right.

The PRESIDING OFFICER. The Senator from Tennessee has the floor.

Mr. SHIELDS. I regret to consume the time, but I am very earnest, Mr. President, in the point I am making against this report, and as the present Presiding Officer was not in the Chamber and has not heard the point I have been making, I am under the necessity of repeating it.

The PRESIDING OFFICER. The Chair would like the Senator to state what his point of order is against the report.

Mr. SHIELDS. Certainly. Mr. President, this is very much like presenting a question of law; indeed, it involves law and fact, and the only intelligent way to consider it is to call the attention of the Chair to the particular parts of the record upon which I base the point of order.

In the opening of my remarks upon this subject I read to the then occupant of the chair the rule upon which this point is predicated, and, if the Presiding Officer is not entirely familiar with it, I will reread it. It is the Curtis amendment to Rule XXIX.

The PRESIDING OFFICER. The Chair remembers that amendment to the rule.

Mr. SHIELDS. I have a copy of it, and if the Chair desires I will send it to him.

The PRESIDING OFFICER. The Chair has the rule before him.

Mr. SHIELDS. Mr. President, there are several what I might call branches to the point of order I am making against the report; in other words, my point is based on four different grounds. Two of them are addressed to the elimination of important provisions of the bill as it passed the House and as it passed the Senate. Matter appearing in the bill as it passed the House and as amended and passed by the Senate does not appear in the bill reported by the conferees.

I should here call the attention of the Chair, if it has not already challenged his attention, that the conferees prepared a new bill containing much of the substance of the bill as it passed the two Houses and set it out verbatim in their report. I will ask the Chair whether he has a copy of the print of the bill before him as reported to the Senate?

The PRESIDING OFFICER. The Chair has.

Mr. SHIELDS. The point I am making can best be understood by consulting the two bills, that of the House and that reported to the Senate, as embraced in the one print.

Mr. President, I call attention to the first point of elimination to page 4 of the House bill, lines 17 to 23, inclusive, which read:

The Attorney General shall, upon request of the Chief Justice, report to said conference the matters relating to the business of the several courts in the United States with particular reference to the

causes or proceedings to which the United States may be a party, together with such recommendations or requests as may be deemed proper.

I will ask the Chair to turn to page 12 of the same print, lines 16 to 20, which read:

The Attorney General shall, upon the request of the Chief Justice, report to said conference on matters relating to the business of the several courts of the United States, with particular reference to causes or proceedings in which the United States may be a party.

Mr. President, the question of materiality, in my opinion, does not arise.

The Chair can not pass upon that question. The House and the Senate deemed this provision material and proper in this bill. If the Chair should say that it is immaterial, and that it may be eliminated by the conferees in violation of this rule, and the bill thus passed, in my opinion it would be a usurpation of the powers of legislation of both Houses of Congress. The House and the Senate will not be presumed to have inserted and concurred in a substantive provision in a bill that was not material, or that they—and they are the sole judges of the question—did not deem a provision material.

The bill provides for a conference of the circuit judges, to be called by the Chief Justice of the United States, to consider the condition of the dockets of all the Federal courts.

The PRESIDING OFFICER. The Senator contends that there is no provision in the bill as reported by the conference committee requiring the Attorney General upon request of the Chief Justice to submit a report to Congress?

Mr. SHIELDS. There is none. I suppose that will be conceded.

Mr. CUMMINS. There is nothing upon that subject. The provision made by the House was wholly different from the provision made by the Senate, and the conference committee eliminated the provision of the Senate bill, and the House conferees agreed to the elimination of that part of the House bill; but they are not the same.

Mr. SHIELDS. Mr. President, it is thus conceded that there is no provision in the new bill reported by the conferees requiring any sort of a report by the Attorney General. The language of the two provisions, which I have called to the direct attention of the Chair, is nearly the same. Whether they are identical or not, I have not noticed, and I do not think it is necessary; but the substance of both of these provisions is identical.

They both call for a report from the Attorney General upon material and important matters—the direct matters which the conference is called to consider—which is necessary in its deliberations. It is immaterial that there may be some difference in the wording of the provisions of the House and the Senate; it is the substance which is material.

I am willing to concede that if the conferees had put in their report a provision in substance the same, although not in the same language, it would have obviated this point; but they absolutely ignored it. They eliminated the whole thing. Who is to decide that this is unimportant? It would be a violent presumption and one that the courts of the country would not indulge in, that when the two Houses of Congress solemnly provide a certain thing in a bill as passed by each one of them, they did not mean it, that it was immaterial and frivolous; and I do not think the Presiding Officer will usurp that power.

The conferees eliminated another matter which is equally important, if not more so, because it conflicts with the long-established custom of the Congress in creating district judgeships, and one which I deem vitally important for the proper administration of justice. I will ask the Chair if his attention has been called to a memorandum upon this subject that I presented?

The PRESIDING OFFICER. It has. The Chair has it before him.

Mr. SHIELDS. Mr. President, the bill as it passed the House, on page 2, line 12, provided:

Said judges shall be residents of the districts for which appointed.

Then the bill as it passed the Senate, page 14, line 8, in a paragraph relating to certain matters, contains the same provision in the words:

Every judge shall reside in the district or circuit or one of the districts or circuits for which he is appointed.

There is no such provision in the bill reported by the conferees.

Mr. President, there is no more important provision in the general statute found in the Judicial Code in regard to the appointment of district judges, and I will venture to say in every statute enacted for any particular district creating the office of district judge, than that the judge shall reside in the district over which he is appointed and commissioned to preside.

Mr. CUMMINS. Mr. President, may I interrupt for a moment there?

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Iowa?

Mr. SHIELDS. I do.

Mr. CUMMINS. That is the law now. It applies to these judges as well as to any others.

Mr. SHIELDS. Mr. President, I am fully aware that the Judicial Code in the general provisions upon the subject provides that the permanent judges there provided for shall reside in their districts. This is not a bill creating permanent judgeships, but a bill providing for the appointment of additional judges to relieve for the most part an imaginary congestion in the Federal courts, and it is so denominated in its caption, both in the House and the Senate, and also in the bill reported by the conferees. The special bills creating judgeships, so far as I have examined them, always contain this provision. The bill as it passed the House contained it. The bill as it passed the Senate contained it.

I ask the Presiding Officer to read the captions of all these bills—the House bill and the Senate bill and the bill as reported by the conferees—as to the character of this legislation. I am well aware that the title is no part of the legislation which is being enacted, but it may be and often is referred to by the courts to explain an ambiguity appearing upon the face of the bill; and to that I will later refer in another point of order I am going to make in regard to a subsequent part of the bill.

The PRESIDING OFFICER. The Chair desires to suggest to the Senator from Tennessee that he has been unable to find any provision in the bill as it passed the Senate requiring the district judges to reside in their districts. The Chair has looked it over rather carefully.

Mr. SHIELDS. I have read it, and I will reread it to the Chair.

The PRESIDING OFFICER. It is not on the page that has been mentioned.

Mr. SHIELDS. Page 14, line 12.

Every judge shall reside in the district or circuit or one of the districts or circuits for which he is appointed.

The clause then proceeds as to other matters, but that is a substantive and distinct proposition presented in the clause. The Chair has a different print from that which I am using.

The PRESIDING OFFICER. There are several different prints. The Chair finds that now in another print.

Mr. SHIELDS. I do not think there will be any controversy upon that subject. There can not be any.

The PRESIDING OFFICER. Very well.

Mr. SHIELDS. Mr. President, that omission from the bill as reported by the conferees is very pertinent when we look at the history of this legislation. The Chair doubtless remembers that the bill as introduced, I believe, in both Houses—certainly in the Senate—did not provide for the creation of judges in the several districts where it was supposed that a congestion of business existed but in the bill prepared in the Department of Justice, I understand, but approved by the Chief Justice of the United States and by the Attorney General, and in advocacy of which both of them appeared before the Judiciary Committees of the House and of the Senate more than once, it was provided that there should be created, or—to use the language of the bill—that there should be appointed by the President, to be confirmed by the Senate, 18 judges, 2 from each judicial circuit, to be known as judges at large, who might be, who could be, who were to be, assigned, designated, ordered about by the Chief Justice from coast to coast, from ocean to ocean, from Lakes to Gulf, as he at his sweet will might determine.

Before the committee, that was attacked by the majority, regardless of party affiliations. It was denounced as providing a flying squadron of judges, as introducing a new practice and a new principle in the judiciary of the United States, and it was stricken out.

It appears in the hearings, as I remember, that the real proposition was for 27 of these peripatetic judges, of this flying squadron, but finally it was gotten down to 18. But the Committee on the Judiciary would not stand for such a proposition by a large majority, and it was knocked out. Then the bill was remodeled so as to authorize the President to appoint additional judges in certain districts, not what may be called principal judges. It was provided in the Senate bill that no successors to them should be appointed. They were to meet a temporary emergency.

In view of that proposition, to have 18 judges from the Nation at large, 2 from each judicial district, the provision as to residence should not have been eliminated. I do not believe the general provision in the code would be applicable to this. I do not believe it would control the President in making his appointments. The provision in the code did

not escape me. I was, of course, familiar with it, and I considered it along with this bill, and as applicable to judges whose successors are to be appointed, and who may be called permanent judges. There is an express provision in the Senate bill that no successors shall be appointed to these emergency judges. In the conferees' bill it is provided that if a vacancy occurs more than two years after the enactment of the law there shall be no successor, with the exception of New Mexico and of Tennessee, to which I will refer later.

Mr. WALSH of Montana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Montana?

Mr. SHIELDS. I yield.

Mr. WALSH of Montana. If the Chair will give me his attention, I would rather address these remarks to the Chair. If we assume that the case is correctly covered by the general statute, the House, for some reason satisfactory to itself, concluded that it would be wise to reenact that provision, if the provision already covers the case. The Senator suggests that perhaps it does not, and the Senate, for some reason satisfactory to it, concluded that it would be wise to incorporate the provision.

As a rule, are we to consider that the conference committee is entitled, under those circumstances, to leave the matter out of the conference report, even though it is covered in the statute? Is not the rule just exactly as applicable whether the case is already covered by the law or whether it is not covered by the law; and is the conference vested with the authority to say that it is covered by the law and therefore need not be incorporated, when the rule expressly provides that conferees shall not insert in their report matter not committed to them by either House, nor strike from a bill matter agreed to by both Houses?

There is no exception to that at all, even though it is covered by the existing law. It occurs to me that it is a matter of no consequence whether it is or whether it is not covered by existing law. The Houses have put it in, and the rule says that the conferees must not strike it out.

Mr. SHIELDS. Mr. President, I thank the Senator from Montana for his contribution. That is a reason I had not advanced, and it seems a very strong point and seems to me conclusive of the question.

It would be a question, to say the least, whether the general law would apply. As the Senator has observed, both the House and the Senate thought, we must presume, that it did not apply, certainly that there was a doubt about it, and to remove that doubt they both put this provision in. That would be a question to go to the courts for interpretation and construction. It certainly is not a question for the Presiding Officer of this body to determine. The rule has no exception, and it allows the Chair no discretion, but says that matter that is contained in a bill as passed by the Senate and the House can not be omitted.

Who will say that this is not a material provision? Who in this country who believes in local self-government, who believes in government by the people, who believes in the people having a voice in the selection of their officers, of their judges, will say that it is not material?

The requirement that a judge shall be appointed from the district in which he is to preside, or that he shall reside in the district, is the nearest provision found in our laws in regard to the will and voice of the people in the selection and appointment of United States district judges.

Mr. President, a judge should come from the district or from the circuit where he is given the power to determine and pass upon the lives, liberties, and fortunes of the people. A nonresident, a stranger, who is not familiar with the laws of the district, who is not familiar with the people, does not feel the responsibility felt by a man who resides and lives among them, whose fathers perhaps have lived there, and whose children are expected to reside there, should not be appointed a judge for those people. This is a most important provision. It is one which, so far as I have examined, has never been omitted from any statute of this kind, and one which ought never to be omitted.

I am not going to assault the provision of our Constitution providing for the appointment of judges by the President, subject to confirmation by the Senate. There are some objections to it, but there are many things in its favor; and looking back over the history of the Federal judiciary I am of the opinion that it is wise, and that it has operated well for this country. I would not consent to any alteration in the Constitution in that respect. But, in so far as the people can be given a voice, or a quasi voice in the appointment of their judges, I am in favor of it. I am in favor not only of maintaining the present safeguards, but I am in favor of extending them as far as possible consistent with the Constitution, for I believe in local self-government.

I regret and deplore the tendency in these times toward encroachment upon the sovereignty of the States in their domestic matters. I deplore the tendency to concentrate all power in Washington and have the people governed and controlled by departments and bureaus, largely by clerks. While this power is generally vested in the President, or in the head of a department, yet in practice we know that they can not and do not, on account of the multiplicity of their duties so imposed, give them personal attention and that the matters are investigated, considered, determined, and in a manner executed by clerks of whom the people have never heard, officers whom they did not elect, who are unknown to them, who know nothing of their necessities, who know nothing of matters relating to particular localities.

I hope that we have reached the end of such legislation. While I remain a Member of this body I shall oppose every measure which in any way withdraws from the States the right to govern in their local matters or withdraws from the people the right to select and elect their own officers. Practically, the police power of the States has been destroyed. There are measures now being proposed and pending upon the calendar of this body to further encroach upon them.

I do not believe it is necessary for me to elaborate this question to the present Presiding Officer of this body, for I know he fully realizes the right of the people to govern themselves and believes in preserving their rights and in public officers being responsible to their constituencies.

You might say these are temporary judges, that it does not apply to the permanent judgeships; but it is the first step in breaking in upon the rule of having the judges come from the particular districts or localities where they are to officiate, and being of the people whose rights they are called upon to adjudicate, and that first step ought not to be taken.

In my opinion, Mr. President, no more material and important provision was put in this bill. It was deemed important by the House, it was deemed important by the Senate, and both of those bodies solemnly asserted that the judge should come from the district where he was to act, and I say that these five conferees, with the presiding officer of the two bodies, have no right to overturn the expressed will of the House and the Senate upon this important subject.

Mr. President, there are two other points of order, the discussion of which, of course, I could not finish in the half minute before the morning hour will have expired, and I therefore suspend my remarks for the present.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The READING CLERK. A bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	Moses	Shields
Borah	Harreld	Myers	Shortridge
Broussard	Heflin	Nelson	Smoot
Bursum	Hitchcock	New	Stanfield
Cameron	Jones, N. Mex.	Nicholson	Sterling
Capper	Jones, Wash.	Oddie	Sutherland
Culberson	Kellogg	Pittman	Trammell
Cummins	Kendrick	Ransdell	Underwood
Curtis	Lenroot	Rawson	Wadsworth
Dillingham	McCumber	Reed, Mo.	Walsh, Mont.
Fletcher	McKellar	Reed, Pa.	Warren
Gerry	McLean	Robinson	Watson, Ga.
Gooding	McNary	Sheppard	

The PRESIDING OFFICER. Fifty-one Senators have answered to their names. A quorum is present.

JUDICIAL PRACTICE IN APPEALS.

Mr. REED of Missouri. Mr. President, out of order, I ask unanimous consent to report back favorably without amendment, on behalf of the Committee on the Judiciary, the bill (S. 3618) to amend section 135 of the Judicial Code, and I ask unanimous consent for its present consideration. I think it will lead to no debate at all.

The PRESIDING OFFICER. Is there objection to the receipt of the report? The Chair hears none, and the report is received. Is there objection to the present consideration of the bill?

Mr. SMOOT. I would like to have the bill reported.

Mr. McCUMBER. I do not object to it if it will not require debate.

Mr. SMOOT. Before I give consent I would like to have just a brief statement from the Senator from Missouri as to what the bill is.

Mr. REED of Missouri. I can give it. The bill relates wholly to practice in the matter of appeals. At the present time, under the state of the law, it is very difficult for attorneys to tell whether an appeal lies to the Supreme Court of the United States or to the Court of Appeals. It is a very puzzling situation. The bill simply provides that if they lodge their appeal and it goes to a court which determines that it is the wrong tribunal, instead of dismissing the appeal they transfer it to the other court. It simply wipes out a technicality.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That section 135 of the Judicial Code is hereby amended by adding at the end thereof the following paragraph:

"If an appeal or writ of error has been or shall be taken to, or issued out of, any circuit court of appeals in a case wherein such appeal or writ of error should have been taken to or issued out of the Supreme Court; or if an appeal or writ of error has been or shall be taken to, or issued out of, the Supreme Court in a case wherein such appeal or writ of error should have been taken to, or issued out of, a circuit court of appeals, such appeal or writ of error shall not for such reason be dismissed, but shall be transferred to the proper court, which shall thereupon be possessed of the same and shall proceed to the determination thereof, with the same force and effect as if such appeal or writ of error had been duly taken to, or issued out of, the court to which it is so transferred."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COMPENSATION OF WORLD WAR VETERANS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. McCUMBER. Mr. President, as I desire that the remarks I shall make upon the pending bill shall be logical in both form and substance, I ask not to be interrupted until I shall have concluded.

Mr. President, for the third time the soldiers' compensation bill is before the Senate of the United States. This bill passed the House and came to the Senate just prior to the adjournment of Congress in 1920. It reached the Senate too late to receive that consideration which its importance demanded before the time agreed upon for the adjournment of Congress.

I, however, am fully justified in making the most positive assertion that the Congress of the United States, the American people, and the American soldier each and all understood that this bill would be taken up and passed early in the following session. I am equally justified in the assertion that up to that time the proposal had been hailed with approval by the press of the country.

Wherever the people of any State had been given an opportunity to express themselves, they had voted with almost unanimity to tax themselves whatever might be necessary to meet what they believed to be justly due the soldiers of their respective States. And, Mr. President, notwithstanding the objection of those people who reaped their millions during the war now to share a most meager percentage of their gains with those whose soldier services made those gains possible, I am certain that the great mass of the American people demand that this adjusted compensation bill shall be enacted into law. The millions of petitions that are coming to the Senate not only show that the heart of the American people has not grown cold toward the country's defenders but that it recognizes a just financial obligation and asks the country to meet it.

Upon the reassembling of Congress the Finance Committee, conforming to this general understanding throughout the country that the compensation bill should be crystallized into law, began the consideration of the bill, which has been delayed only because of the adjournment of Congress, and after making amendments thereto reported it favorably.

In charge of the proposed measure, I had addressed the Senate at some length. The debate, however, had scarcely begun when the President of the United States, guided in his judgment by the report of his Secretary of the Treasury, appeared before the Senate and asked that the bill might be referred back to the committee and its consideration postponed until either special provision should be made to meet its obligations or the seven billions of short-time obligations which fell due in 1923 could be refunded. In deference to the views of the President, by a vote of 47 to 29, the bill was referred back to the committee.

Believing that the American soldier was entitled to know just what this reference of the bill back to the committee meant, although I did not concur in the views of the Secretary of the Treasury and the President, I made this statement on the floor of the Senate:

The President, upon information furnished him by the Secretary of the Treasury, has asked that Congress defer action for a time on this bill. "How long defer?" you may properly ask. I answer, "Until the tax bill and the tariff bill are enacted into law and the foreign indebtedness to the United States has been funded."

In the matter of the foreign debt the President, in his address to the Senate, states—

I now quote from the President's address—

Even were there not the threatened paralysis of our Treasury, with its fatal reflexes on all our activities which concern our prosperity, would it not be better to await the settlement of our foreign loans? At such a time it would be a bestowal on the part of our Government when it is able to bestow.

That was the gist of his argument—to postpone the measure until a time when the Government would be able to make the bestowal. Resuming the quotation from my address—

In a nutshell the President asks us to hold this matter in abeyance until we fund these foreign obligations; and, as I have said before, the interest on these obligations will more than doubly take care of the highest annual payment which will accrue when the bill becomes a law.

We will, of course, pass both the revenue and the tariff bills at this special session. A bill is now before the Finance Committee giving the Secretary of the Treasury all needful authority to fund into long-time bonds the principal and interest due us from foreign countries. That authority will be given. I can therefore see no reason in the world why this funding settlement should not be completed by the time we have passed the other two bills.

So I can say with absolute assurance to the American people and the American soldier that this bill will be enacted into law, and I am certain that it will be enacted into law in sufficient time that the date at which it becomes effective will not have to be extended; in other words, that the delay will not deprive the veterans of a single important right they would otherwise obtain under the bill.

That was my statement just after the bill had been referred back to the committee.

Mr. President, the revenue bill was before the Senate so long that we were not able to pass the tariff bill during that session, as was expected, and that bill has only now gone to conference; but we can still make good my prophecy, and, notwithstanding the unforeseen conflicts between bonding and taxes to meet its requirements, which arose after my assurance, we can still make the bill become effective about the same time as was provided in the previous bill.

To be sure, Mr. President, we have not yet funded our foreign loans. To my mind there has been an unnecessary delay in funding those obligations. The law providing for a commission to settle those obligations was approved February 9, 1922, and the last of the appointees on that commission was confirmed by the Senate on April 11, 1922. I, therefore, can see no reason in the world why we should not at least have a settlement with our principal debtors, Great Britain, France, and Italy, before January 1, 1923. But, irrespective of this funding, Great Britain is preparing to meet the interest due this fall, and if she does so we shall have in advance a sufficient sum from that source alone more than sufficient to meet the first two years' obligations under this measure. And, Mr. President, that assurance meets the substance if not the letter of the President's request for delay. It answers his query, "Would it not be better to wait the settlement of our foreign loans?"

The British Government recognizes that interest on its obligations to the United States will be due in September of this year. The British Government has included in its budget of expense for the ensuing year an item to cover the interest due the United States. That sum is just as much assured as though the actual bonds had been issued. That answers the President's request for delay. From the source indicated by the President we can meet the 1923 obligation of this bill and meet it nearly three times over without either issuing bonds or levying additional taxes.

After the bill was referred back to the Finance Committee and in the discussion which followed between the Executive and the Ways and Means Committee of the House and the Finance Committee of the Senate, the President insisted that provision must be made in the bill for raising by taxation the revenue to meet the obligations which should be created by the measure. Members of the two committees proposed that instead of a further tax levy at this time, if it should become absolutely necessary, short-time certificates of indebtedness should be issued and sold to meet the first year's payment and thereafter the indebtedness be cared for by the sale of any foreign securities. This was not quite satisfactory to the President, who held that we might as well issue Government bonds as to sell the foreign Government bonds; that the one would

be as much of a strain on our banking resources as the other, and that we needed all our banking resources to meet our own funding requirements.

As all revenue bills must originate in the House of Representatives, the Committee on Ways and Means thereupon proceeded to draft a bill for raising additional revenue by a sales tax, but as soon as it became known that an additional tax was proposed upon any commodity, a most earnest protest against such a tax was made by the dealers in and the users of the commodity. The protest was not against the proposal to extend this benefit to the American soldier, but against any additional taxes being levied at this time.

So, Mr. President, the soldiers' compensation bill found itself in this position: The President approved of the measure provided the Congress passed additional revenue to meet its obligations. The Congress approved the measure provided there should be no tax measure attached to it. The President, while favoring the purpose generally, was not willing to create any further bonded indebtedness to meet the requirements of the bill. The Congress, while favoring the bill, was not willing to levy additional taxes to meet its requirements.

In despair the members of the Ways and Means Committee, in order to avoid both these objections, had to carve out a different course. So they provided that the Government should not be required to expend anything, except administrative expenses, until after the 1st day of October, 1922. The Finance Committee, by its proposed amendment to the House bill, postpones the principal expenses incident to the proposed legislation to 1923, a time sufficiently removed to prevent any interference with the refunding of the obligations maturing in 1923, and also to a time sufficiently removed to enable a future Congress to provide any additional means of revenue if such additional means should become necessary. I, however, believe that it will not be necessary to provide any further revenue to meet the requirements of this soldiers' compensation bill.

A close examination of the bill will show an estimated expense for the calendar year of 1923 of $77,440,889; for the calendar year of 1924 of $92,177,729; for the calendar year of 1925 of $73,100,962. (See report, Appendix A.)

The largest amount required will be in 1926. By 1930 it will drop to $21,000,000, and will be only a very few millions thereafter until 1943.

If, Mr. President, our income should fall below our proposed expenditures for the next few years, there are a great many places in which we could practice economy to bring our expenses within our income and still meet all our just and honorable debts without either increasing taxes or issuing Government obligations. I can mention a single item which might be delayed a year, if necessary, and which would far more than take care of the obligations of this bill. I certainly am a believer in good roads, but if it were necessary for me to make a choice between paying out to our soldiers $78,000,000 in 1923 and paying out $125,000,000 for our good roads, I would unhesitatingly say, postpone the road expense. I could probably find many other smaller items which we could well postpone and still go on with the good-roads' work and also meet the obligations created by this bill.

The letter of the Secretary of the Treasury which was the basis of the President's request for delay stressed the fact that there were about $7,000,000,000 of short-time obligations maturing on or before 1923. This letter evidences the caution of an experienced business man and banker. He feared that this increase of governmental obligations might make the funding of these short-time obligations most difficult. I, however, call his attention to the fact that this bill as modified avoids this danger, first, in that the obligations will not exceed $100,000,000 per year for the first three years and can be met through the interest due on foreign obligations, and, in case that interest should fail, through current revenues; and if the latter should fail, then through the sale of a very small part of our foreign bonds.

I call attention to the further fact that we have the greater part of all of the gold of the world in our vaults; that we are now the greatest creditor nation on earth; that our banks are filled to overflowing; that they are looking not for an opportunity to loan a hundred million but for an opportunity to loan billions to foreign countries. All on earth they want is proper security, and the cash will leap from the banks for any kind of profitable investment.

Let me further call attention to the fact that since 1919 we have reduced our national indebtedness more than $3,000,000,000. Would we have felt it if we had reduced it a little hundred million less? Would we feel it if for the next three years the reduction should only be $2,700,000,000 per annum?

Let me again call attention to the fact that we have already refunded about a billion dollars of those short-time obligations before they became due, and if we can fund seven billions of short-time obligations gradually, as we are now doing, without a ripple in the sea of finance, is it possible that we must look for a financial earthquake if our national indebtedness should even be increased a little $78,000,000 in any year? Twenty millions given in charity to Russia, twenty-five millions to salve Colombian sentiment, twenty millions for ship subsidy, cause not a ripple of comment. We talk of $125,000,000 for good roads, of two or three hundred millions to assist railways, all in a single year, as if they amounted to nothing. We do not dream of suggesting a special tax to meet this $125,000,000. Why on earth, then, should we approach this soldiers' compensation bill, the payments under which may be scattered over half a century, and the 1923 payment being only a little over half that sum, as though it were an obligation requiring a special tax levy or one endangering the refunding of short-time obligations?

Mr. President, if the financial situation of the country as it appeared to the vision of the Secretary of the Treasury as he viewed the horizon of the future in 1921 seemed to justify his note of extreme caution—if it seemed to him of sufficient importance to justify the raising of the danger signal—I submit, in all candor and assurance, that the time which has elapsed since the writing of that letter has entirely dissipated those clouds of danger. The Secretary feared at that time that the creation of a new obligation, which might have amounted to five billions as the bill was then drawn but the greater portion of which was not payable until the expiration of 20 years, might render it extremely difficult to float the necessary bonds to take up short-time obligations, which would amount to about $7,000,000,000 by 1923.

Mr. President, to show that he could easily have floated many times that sum, and that he will find no difficulty in floating any amount of bonds now, I want to call attention to an article in the Sunday Post of June 4. This article is headed:

"Forty billion dollars in banks wait the call of business—Easy money and plenty of it a help to restore country's commercial and industrial activities to normal conditions—Striking contrasts with year ago, when credit was hard to get—Oversubscribe loans quickly."

This article states:

Twenty-five billion dollars of unused credit lies in American bank vaults to-day, according to last week's statement of the Federal Reserve Board.

Twenty-five billions—more than the entire bonded indebtedness of the United States.

Savings and State banks have another huge fund which they are most eager to lend. While there is no method of measuring that sum, the Nation's banks probably have, all told, an untapped total of $40,000,000,000 of credit available for business enterprise.

Mr. WATSON of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. I requested when I started that I should not be asked to yield until I had closed my remarks, if the Senator will kindly excuse me.

Continuing the quotation:

This great reservoir of unused credit has been filling rapidly within the past year, and stands to-day at the highest mark ever reached in the history of American banking. It has brought about a situation virtually without parallel in our economic history. The man or firm who wanted to borrow money a year ago had difficulty in obtaining it at high interest rates; to-day he is courted by banks and investment houses. Hungry dollars are strenuously seeking his employ and at low rates of interest. The only thing he need have to get all the money he wants is prime security for his loan.

It was about a year ago that the Secretary sounded his note of caution. Need we to-day fear to draw $78,000,000 against this $40,000,000,000 credit?

Every issue of securities, big or little, offered the Nation's investors by reputable houses within the past month or so has been snapped up with an eagerness born of hunger. Foreign and domestic issues alike are oversubscribed again and again. For instance, a $24,000,000 issue of bonds of the Republic of Bolivia was offered investors Friday. The subscription books were opened at 10.30 o'clock. Five minutes later they were closed. The issue has been heavily oversubscribed.

The Treasury's offering of $200,000,000 in securities paying 3½ per cent interest was oversubscribed in every district last week. The Farm Loan Board's offering of $75,000,000 of 4½ per cent tax-free bonds, offered a few weeks back, was so heavily oversubscribed on the day it was offered that the board issued a few days later another $42,000,000 bond issue, put on the market about a month ago, disappointed thousands of investors in that they could not get a share of it.

Industrial offerings of prime value meet the same response. During the present week the New England Telephone & Telegraph Co. offered $35,000,000 of first-mortgage 30-year 5 per cent bonds. The books were opened and closed immediately, with an enormous oversubscription. The Virginia-Carolina Chemical Co.'s $22,500,000 of first-mortgage 25-year 7 per cent bonds were absorbed within an hour.

Does this look, Mr. President, as though $78,000,000 would seriously affect the country's credit in the year 1923?

Admitting, Mr. President, the lowering skies in the financial world of a year ago, I ask the Secretary of the Treasury and the President of the United States to view this proposed legislation in the light of present-day conditions, and these changed conditions certainly must appeal to the judgment for a revision of the views of a year ago. Mr. President, we can meet every dollar this bill will call for without additional tax levy and without in the slightest degree affecting the refunding of any unpaid short-time obligations.

We now come directly to the proposition, Is there a moral obligation on the part of the American people to adjust the compensation that the American soldier received during the war to make it more nearly conform to the added compensation received by every other American citizen during that war? And remember that is all there is to this question.

The opponents of the soldiers' adjusted compensation bill may shout their cry of commercializing patriotism just as often as they see fit. They know there is not another question in this proposition but the single question of whether or not there is a moral obligation to increase the pay which the soldier received to more nearly reach the compensation which every stay-at-home received while the soldier was fighting his country's battles.

This bill, Mr. President, is not a bonus bill. That designation is a misnomer. It is not a gift. I know the American soldier well enough, and the Senators know him well enough, to fully realize he is not asking this as a gift but as a matter of actual financial justice.

This bill is exactly what it purports to be—an adjusted compensation bill. When one person owes a debt to another there is a court to pass upon its validity in case of dispute and a law to enforce its collection. When a government owes a debt there is neither court nor process to enforce it. Congress alone has the power to determine its equity and whether it shall be paid. That question is now squarely before the American Congress.

Now, Mr. President, I am willing to lay aside for the purpose of discussion every sentiment of patriotic impulse and rest this case entirely on the question whether or not there is a just moral obligation on the part of the Government to increase the compensation of those who fought our battles to make that compensation more nearly equal the pay of those who stayed at home. If two men labor side by side for an employer, doing the same kind of work, one under a contract to receive a specified sum for his services, the other having no contract, and it is established by competent evidence that the wage received by the man under contract is the going wage paid for such service, then under the rule of quantum meruit, the man with no contract can recover for his service the same pay that is paid the other. That is not only common law but also common justice.

When we entered the war a portion of our men were called to battle. Another portion were called to provide means to support those who fought. Now, if we base the claim for equal compensation on the cold proposition as to whether the soldier should receive a compensation equal to that of the one who remained at home, could there be any division of opinion? Could anyone for a moment insist that the soldier was entitled to less compensation than the one who remained out of danger to supply his needs? And if that is admitted, must not everyone also admit that if the stay-at-home received more than the soldier, there is, to say the very least, an inequality that ought to be righted, and does not every principle of law as well as of equity demand that it should be righted?

This proposition is not answered by the reply that soldiers have never been paid as much as civilians in case of war. We do not need to go back very far in the history of the world to a time when the soldier was paid nothing whatever. But those were days when he shared in the loot of conquest, in the robbery of civilian multitudes. Civilized warfare has stayed to a considerable extent at least the hand of mere plunder. Only the stay-at-homes are accorded that privilege now. But let the profiteers of the great World War enjoy as best they may the plunder of their own Government. It is my candid opinion that if we ever enter into another great war the whole population will be drafted, and the attempt of any man to enrich himself at the expense of his Government will be dealt with as the military deals with the soldier who would steal and sell to the enemy munitions of war.

I want the American Congress and the American people to answer this simple, straight question: Is not the cause of the country in time of war just as much the cause of the stay-at-home citizen as of the soldier citizen? Are the duties and obligations resting upon the latter one whit greater than those resting upon the former? If, therefore, the soldier has no right to take advantage of the desperate situation of his country in time of war to further his own financial interest, has the stay-at-home the right to double and treble and quadruple his income at the expense of the country during such war? Yes or no?

And if the stay-at-home does that very thing and thereby creates a mighty indebtedness against his country which the home-coming soldier must help to pay, then should he not pay a portion at least of these unlawful gains taken by him from his Government—gains which piled this indebtedness mountain high, to help this home-coming soldier to meet the very national indebtedness created by this holding up of the Government?

Mr. President, there can be but one answer to this question. Yes; everlastingly, yes. Let us simplify this proposition.

If the average earnings of male citizens of the United States between the ages of 18 and 45 years were, say, $3 per day at the time we entered the war, and one-fifth of those citizens were called to do battle for the country, to suffer all the hardships, agonies, and death itself, and were required to be satisfied with the sum of $3 per day or its equivalent, and while they were thus suffering and battling for their country, while they were thus defending the honor and the life of their country, the Government allowed those who remained at home, the other four-fifths, to exact and receive a compensation averaging $9 per day, and not having the money to pay this increase, the Government had to borrow the money to meet it and then turn around and charge a proportionate amount of the sum so borrowed to the soldier who had received not a penny of it, how in heaven's name can you escape the righteous conclusion that the home-staying citizen should divide his excess earnings with the soldier-citizen? The soldier having received not a single penny of the billions borrowed by the Government to give the stay-at-home this extra compensation, can the stay-at-home do less than relieve the soldier from the debt so imposed? And as that can not be done, can this stay-at-home do less than hand over to the soldier a sufficient portion of his excess earnings to enable the soldier to meet his proportionate share of that debt? If a court of equity were sitting on this case, that is exactly the order which would be made.

I want to make this proposition so clear that he who runs may read.

Here are two boys serving the same autocratic employer for, say, $3 per day. The employer, whose word is law, says to one of them, "You must take a rifle, face my enemies, and fight my battles. I will continue your wage at $3 per day." He says to the other, "You shall stay at home out of danger, relieved from hardships, and I will increase your wage to $9 per day. But as I have not the cash to pay you more than $3 per day I will be compelled to borrow the extra $6 per day, and as this fight for which I am paying your former coworker $3 per day will last about 400 days, I want your note for this extra $6 per day for 400 days, which will amount to $2,400. I will pay you that $2,400 extra in cash, but you must give me your note for that sum, and you must also sign the name of your fighting brother to that note."

At the end of 400 days the fighting boy comes home from the battle. He finds not only his position gone but he also finds that his citizen brother has drawn $2,400 during those 400 days, more than he, the soldier, has drawn. Nor is this all. He finds that his name has been signed to a $2,400 note and he must pay his part, although he has not received a cent of it.

Now, you metropolitan papers who are damning this soldiers' compensation bill, lying about its costs, falsifying the soldier's motives and his honor, just look this soldier boy in the face and then call him a grafter when he calls for some kind of a settlement that will look as though the Government realized the wrong committed against him, and then continue to charge those Senators and Congressmen who look at this question in the same light that the soldiers look at it—look at it in exactly the same light in which I have presented it, look on it in exactly the same light that the people have looked at it wherever they have had an opportunity to express themselves—to charge them with attempting to buy the soldier vote.

In a previous discussion of the soldiers' compensation bill I called attention to the flagrant violation of every principle of honorable business dealing in contracts made with and in work performed for the Government during the war from contractor down to the lowest laborer. I pointed out the scandalous profiteering on the part of both employer and laborer. I called attention to the fact that the contractors engaged in the construction of all our war buildings under the cost-plus contract system encouraged idleness, padded their pay rolls, and added

enormously to the expense of work because by so doing they increased their own compensation. I called attention to the fact that in the construction of the buildings surrounding the Capitol not more than one-third of the men were working at any one time. There is not a single building constructed in this city during the war that did not cost at least five times what it should have cost. I called attention to the fact that at that time when we were in the most dangerous situation during the war, when on account of the ravages of the U-boats, when the scales of success or failure were almost evenly balanced, a riveting gang in one of our principal shipyards, which had averaged the setting of 400 rivets a day when they were paid about $5 per day, after they had had their wages increased to nearly $14 per day set but 51 rivets per day. This matter was published in detail by one of our great magazines. I called attention to the fact that there was not a single shipyard in which the amount of work turned out per man would equal 50 per cent of normal. I called attention to the fact that in the building of some of our cantonments, sick soldiers were left without decent shelter while thousands and thousands of men were drawing big wages, $8 and $10 per day and $20 on Sundays, and that thousands and thousands of soldiers died because of this neglect. I called attention to the extent of the looting of the Treasury everywhere, of the awful wastefulness, of the destruction of property, of the billions that were being piled up in bonded indebtedness to meet this Saturnalia, this wild, drunken orgy of extravagance.

What were these great papers that are now condemning Congress and damning the soldiers for asking for their just rights saying at that time? Did a single one of them come out and condemn this looting of the Treasury? Did a single one of them attempt to bring before the American public any idea of what was going on in the United States in piling up without any tangible result an enormous indebtedness which must some day be paid with heavy taxes? Did any one of them call attention to this crime against the American soldiers who were dying in France or in cantonments? Did any of them call attention to the fact that a day of reckoning would surely come? Were they all too busy in gathering in the shekels incident to the extravagance that followed this opening of the Treasury to almost bandit hands to call attention of the public to this criminal looting of the Treasury when the country most needed that publicity which alone could awaken the conscience of the country and check this lawless raid?

It cost us for one year of our participation in the war more than it cost France for four and a half years, with three times the number of men actually engaged in the conflict. We got to the front only about half of our men and our small arms. Our soldiers were for the most part transported by British vessels and supplied from French and British war stores. And yet our average daily expenditure for each man under arms was four times that of Great Britain, six times that of France, and ten times that of Italy. There was no earthly excuse for these colossal differences.

I know the excuses that were at the time made and have since been made for this unheard-of extravagance. But the excuses are wholly without foundation. They say the Government could not protect itself against this raid on the Treasury, that the Government must pay such extravagant commissions as the consciences of contractors would allow them to take; that the country could not protect itself against strikes and the ever-pressing demand for greater and greater wages by those who were working for the Government to supply the soldiers in the field; that the Government could not protect itself against padding of the pay rolls or against idleness.

Let us analyze that for a moment. Is it not a fact that the Government did take every bushel of wheat in the United States and say to every farmer, "You shall receive just so much for this wheat and not one penny more"? It said to the miller, "You must sell your flour for just so much per barrel and not one penny more." It said to the miner of copper, "You shall sell your copper for so many cents per pound and not one penny more." It fixed the price of sugar; it fixed the price of a number of other articles. And in the exercise of every one of these price-fixing activities it acted within its war powers. By controlling the price of these commodities it controlled the earnings of fully one-third of the population of the United States. And while it was controlling this one-third it allowed the other two-thirds to actually unlock the vaults of the National Treasury and help themselves.

The condition of Europe and the demand for breadstuffs would have raised the price of the American wheat to a value unheard of. But the American farmer did not ask it. He asked only such price as would give his product something like the purchasing value that it had had in times of peace. He failed to get one-half of that. He is not complaining. What the Government should have done was this: It should have said to every manufacturing establishment in the United States, to every contractor: "This is war. No patriotic citizen will attempt to take advantage of his country during a life-and-death struggle, and no citizen will be allowed to do so. We will allow the contractor the usual profits derived from his business when economically conducted, and no more." The Government should have said to every manufacturer: "Keep your mills running. The Government will not allow you to charge any additional prices for your commodities." It should have said to the workman: "Your brothers are on the battle line and you are working for them. You are not entitled to a compensation any greater than you have been receiving. And as they must do their full duty we call upon you to do a full and honest day's work for good and honest pay." Had we followed that rule the money that we raised by taxation alone, without any bonds, would have nearly taken care of our expenses.

This much, Mr. President, on the moral obligation of the Government.

There is another reason, Mr. President, why this Congress should enact this bill into law at this session. That portion of the press which is aligning itself against any soldiers' compensation legislation is charging that such legislation is being urged as a bid for the soldier vote. The absolute silliness of this contention is apparent. Let the soldier look over the list of those who have voted for this measure and see if he can find any partisanship in the vote. Let him see if he does not find just as many Democrats as Republicans ready to do him this partial justice. He will see that no matter what party advantage may be attempted by individuals, the Congress of the United States in voting this compensation has acted as it did in the war, as an American Congress and not as a partisan Congress.

The enactment of this soldiers' legislation will not make the difference of a single vote for either party on the part of the American soldiers. The failure, however, to enact this legislation will, and very properly so, subject this Congress to the accusation that when the House passed the soldiers' compensation just before the election in 1920 and assured the American soldiers that it would be passed by the other House as early as possible in the next succeeding session they were playing politics.

I am certain that such a thought was never in the mind of a single Senator or Representative. All know the history of the proposed legislation since that time. The time has now arrived for the American Congress to show that it was acting in good faith; that it was not attempting to play politics with the American soldier. The President in his campaign in 1920 declared in favor of some kind of soldiers' compensation bill. Republicans both in the campaign and on the floor of the Senate have reiterated their determination to make good these promises. They were made in good faith, and that good faith will be manifested in the vote on this measure.

Mr. President, will this $78,000,000 for the year 1923, $92,000,000 for the year 1924, and $73,000,000 for the year 1925 be an extravagant obligation for a Government of 110,000,000 people? I want to insert in the RECORD at this point a table showing the population, wealth, indebtedness, debt in per cent of wealth, and per capita indebtedness of each one of the principal countries engaged as allies in the late war and also of Germany.

The PRESIDING OFFICER. Without objection, permission is granted.

The table referred to is as follows:

Country.	Population, 1919.	Wealth.	Debt (amount).	Debt in per cent of wealth.	Debt per capita.
United States	105,683,000	$204,393,000,000	$23,922,000,000	11.7	$226.35
United Kingdom	40,089,000	70,564,250,000	36,854,004,000	52.2	799.62
France	41,476,000	58,398,000,000	55,165,769,000	94.4	1,330.06
Belgium	7,658,000	14,307,510,000	3,781,155,000	26.4	493.75
Italy	36,740,000	21,801,920,000	18,630,000,000	85.5	507.62
Canada	8,361,000	11,119,953,000	2,234,496,916	20.1	267.25
Australia	4,981,000	7,445,745,000	1,859,003,000	25.0	373.22
Germany	67,812,000	80,540,575,000	71,400,000,000	88.6	1,051.92

Mr. McCUMBER. Mr. President, I desire to call attention to the fact that France owes 94.4 cents for every dollar of her national wealth, that Italy owes 85.5 cents for every dollar of her national wealth, that Germany owes 86.6 cents for every dollar of her national wealth, and that the United States owes 11.7 cents for each dollar of her national wealth. I wish to supplement the table just referred to with another, which I ask to

have inserted in the RECORD, showing the per capita tax imposed in the United States and specified foreign countries.

The PRESIDING OFFICER. Without objection, permission is granted.

The table referred to is as follows:

Per capita tax imposedin the United States and specified foreign countries.

[Source: Statesman's Year Book.]

Country.	1914	1920
United States	$6.79	$49.41
United Kingdom	17.22	107.18
France	19.96	86.85
Italy	6.54	25.92
Germany	7.45	105.72

NOTE.—Foreign currency converted into dollars at par of exchange.

Mr. McCUMBER. I wish to call attention to the fact that in 1920 every man, woman, and child in Great Britain paid $107.18; in Germany, $105.72; in the United States, $49.41.

In the light of this almost negligible indebtedness, as compared with wealth in the United States, of the per capita tax paid in this country as compared with that paid in Great Britain, Germany, and France, let us examine into what these other countries have done for their soldiers over and above the regular soldier's compensation.

Great Britain, although she could not pay us anything on the debts which she owed us, nevertheless, in her gratitude for the services of her soldiers and with a population one-third of ours and a debt equal to 52.2 per cent of her wealth, has granted an additional compensation to her men and officers amounting to $275,910,446, an average of $101.50 each; Canada $147,600,000, an average of $540 each—more than this bill will pay to our soldiers—Australia, $105,000,000, an average of $409.50 each; New Zealand, $18,290,650, an average of $409.50 each; France, $372,371,150, an average of $95.25 each; Belgium, $10,592,250, an average of $287 each.

Even Germany, crushed as she was, found means to salve the wounds of defeat by granting her soldiers some additional pay.

And here stands the great United States, the wealthiest country on God's earth, with a little 11 per cent indebtedness; the United States which reaped enormous benefits during the three years the war was in progress before we entered it, which went into the war more or less a debtor nation and came out of it with nearly all the gold on the face of the earth and with every important nation on earth owing her, quibbling over this little sum which she honestly owes the soldier. And the great capitalists of the country, whose fortunes were doubled and trebled and quadrupled during this war, are, through their medium of speech—the great metropolitan press—whining because they are to be called upon to pay a trifling little tax out of their immense fortunes to meet the compensation due the soldier who made it possible for them to amass and hold their fortunes. Even if the flood tide of their avarice has overwhelmed their patriotic impulses, it ought not to entirely submerge the element of shame.

Oh, Mr. President, how shortsighted our avarice and selfishness sometimes makes us. In these times of great unrest, of lawlessness heretofore never heard of, of crime rampant throughout the land, when the sacred rights of life, liberty, and property are being denied and defied as never before in the history of our country, to whom in the end must we look for the final arbiter between individual right and mob power—between the supremacy of law on the one hand and the supremacy of anarchy on the other? We must look to those very boys who stood for their country on the field of battle—who carried its flag and whose comrades died for its honor. We must look to those boys, the constitution of whose organization declares:

> For God and country we associate ourselves together for the following purposes: To uphold and defend the Constitution of the United States of America; to maintain law and order; * * * to inculcate a sense of individual obligation to the community, State, and Nation to combat the autocracy of both the classes and the masses; to safeguard and transmit to posterity the principles of justice, freedom, and democracy.

Let me tell you, Mr. President, that we will need these boys with their loyalty to country and Constitution and the sacred rights declared by the Constitution; we will need them more—a thousand times more—than we will need the few dollars we would save by denying this little element of justice. Let those boys who thus swear to defend their country and their Constitution and who stand for right and justice feel that their country has not, to save a few paltry dollars, failed to extend to them the same right and justice for which they so loyally pledge themselves.

Mr. President, the Government ought in justice and square dealing to pay in cash to the soldiers this $1 and $1.25 per day for each day's service, as provided in the bill. If it did this, the entire cash cost would not exceed $1,561,000,000; but as the Government has not the cash on hand, the Congress, acting as the agent of the Government, says to the soldier: "Let us fix on some basis of payment that will give the Government an extension of time in which to make this payment." So they sit down at the table, and the soldier says: "I will not ask the Government to pay a penny for 20 years, if I live that long. So give me a paid-up insurance, the equivalent of the cash due me with interest, for those 20 years. Most of our number will take that plan. But as there may be some few who may wish to purchase a home or land, we ask you to help those few to fulfill their purchase-price engagements. They will not be many. We desire, however, the right to borrow upon our certificates, but for the first three years we are willing to take our borrowing chances with the banks of the country, if we shall be pressed for cash. After that, if we borrow from you, we shall pay you the same per cent of interest which you allow us.

"Many of our number may never call upon you for anything. Many others will not call upon you for years yet to come. So whatever obligation is created may be scattered over 40 or even 50 years."

Mr. President, this is a fair bill, just to the country, just to the soldier, or, at least, satisfactory to the soldier. It ought not to be materially changed. This is the way, under the provisions of this bill, in which the Government is to meet the soldiers' compensation obligations:

It will allow the soldier $1 for each day's service in the United States and $1.25 for each day's service overseas, after deducting from such service the 60 days for which we have already appropriated and paid him.

We estimate that 75 per cent will take the insurance plan.

Another plan is the adjusted service pay. This plan, however, is limited to veterans whose adjusted service credit is not more than $50.

The next plan is the vocational training aid. Under this plan the Government will advance the amount due the soldier to be applied toward his vocational training. I think the ages of the soldiers generally now are such that very few, indeed, will apply under this plan.

The next is the farm or home aid. Under this plan the sum found due the soldier will be advanced to him as may be necessary to be applied toward the purchase price of a home or farm.

The committee has recommended the elimination of the land-settlement provision of the House bill for the following reasons, which are set out in the report:

> (1) Any reclamation scheme will be exceedingly expensive and will in the end necessitate the expenditure of millions of dollars; (2) it will be many years before a veteran will be able to determine whether or not he could secure any rights under such plan and where the projects will be located; and (3) in making an application for such aid the veteran would not know anything relative to the location, cost, or advantage of the project.
>
> Your committee recommends a land-settlement plan which will give the veteran a preference on the opening of public or Indian lands to entry or the restoration to entry of public lands, and on all reclamation projects now in existence or hereafter established, whether such reclamation is made by irrigation, drainage, or otherwise.

Mr. President, many arguments and extravagant statements have been made from time to time on this floor and in the press as to the cost to the country of this compensation bill. Let me give the actual facts:

The cash-payment plan is eliminated under the provisions of this bill, except where the amount due the veteran is $50 or under, and this cash payment will amount to only about $16,000,000, and this, of course, would be paid in the first year.

We have inserted in our report tables showing the maximum actual cost to the Government if every veteran applied for that plan which would be most costly in the end to the Government, viz, the certificate of insurance plan. If every veteran entitled to the benefits of this proposed law should so apply, the cost could not exceed $4,500,000,000, and this scattered over 40 years. But, Mr. President, there will be thousands who never will apply, and thousands more who will not apply until late in life, and the Government will have an extension of 20 years from the date of these later applications.

Upon the evidence submitted the committee estimate that about 75 per cent of those who make application will select the insurance plan, 22½ per cent farm, home, and land-settlement aid, and 2½ per cent vocational-training aid. If every man entitled to make a claim avails himself immediately of his rights, the cost to the Government by 1966 would total the sum of $3,845,000,000 in round numbers, and the bulk of the burden would fall not upon this generation, which has shouldered the heavy taxation to maintain a great World War, not upon a Nation of 110,000,000 people but on a Nation of 200,000,000 people.

While it is absolutely certain that the burden can not reach above the figures I have mentioned, it can and will fall far below them. A fair, conservative estimate would place the final cost at $3,500,000,000, scattered along the pathway of 40 years.

I ask that the table, Appendix A of the committee report, be printed at the close of my remarks.

Mr. President, to my mind, every precept of financial justice and every principle of political honor demand that this soldiers' compensation bill be passed into a law at this session of Congress, and I am certain, in accordance with resolutions which have heretofore been passed, that it will so be crystalized into law.

APPENDIX.

Cost to Government on basis of 75 per cent certificate plan, 22½ farm, home, and land settlement aid, and 2½ per cent vocational training, after deducting the cash payments of $16,900,000.

Calendar year.	Certificate plan.	Farm, home, and land settlement aid.	Vocational training.	Cash.	Total.
1923	$13,265,889	$22,500,000	$31,675,000	$10,000,000	$77,440,889
1924	19,927,729	47,250,000	20,000,000	5,000,000	92,177,729
1925	21,950,962	49,500,000	650,000	1,000,000	73,100,962
1926	289,229,885	81,000,000			370,229,885
1927	61,212,215	87,750,000			148,962,215
1928	43,064,284	94,500,000			137,564,284
1929	62,251,417	29,925,000			92,176,417
1930	36,372,946				36,372,946
1931	25,466,117				25,466,117
1932	21,955,771				21,955,771
1933	18,503,421				18,503,421
1934	18,788,137				18,788,137
1935	19,136,157				19,136,157
1936	19,488,037				19,488,037
1937	27,405,210				27,405,210
1938	27,854,752				27,854,752
1939	28,409,290				28,409,290
1940	13,991,518				13,991,518
1941	−7,783,804				−7,783,804
1942	−104,498,263				−104,498,263
Total to 1943	655,991,670	412,425,000	52,325,000	16,000,000	1,136,741,670
1943 to 1966	2,708,917,811				2,708,917,811
Total	3,364,909,481	412,425,000	52,325,000	16,000,000	3,845,659,481

Mr. ROBINSON. Mr. President, the Senator from North Dakota indicated at the beginning of his remarks his desire not to be interrupted. He has just made a forceful and comprehensive presentation of the issues involved in the pending bill.

During the course of his remarks the Senator from North Dakota assured the Senate that the time is near when this bill will become a law. He reviewed the history of the delays which have occurred since the bill was first considered by the Congress, and recalled the pledges the President made during his campaign in connection with the subject, giving the Senate assurance that the bill will become law.

When the President appeared before the Senate a year ago and urged delay in the legislation he justified his position on financial considerations. The Senator from North Dakota has discussed that aspect of the case fully and clearly.

For many months the press of the Nation has indicated a belief that there is in the mind of the Chief Executive a purpose to veto this bill unless it carries with it a specific measure or method for raising the revenue necessary to meet the obligations which it imposes. The remarks which the Senator made during the course of his very able address indicated a conviction upon the part of the Senator from North Dakota that the Chief Executive will not exercise the veto power in the event the bill passes the Senate.

I inquire of the Senator from North Dakota, with no disposition or desire whatever to embarrass him, whether he has any information on the subject which he is prepared to submit to the Senate and to the country as to whether, in the event this bill passes as proposed by the Finance Committee, with no provision in it for raising the funds necessary to meet the expenditures which it contemplates, it will probably encounter a presidential veto?

Mr. McCUMBER. Mr. President, I have no information whatever as to what the President will do. All I can say is that the conditions which actuated, or seemed to actuate, both the President and the Secretary of the Treasury in 1921 no longer exist, and the change in the bill under which there is only a small sum to be paid each year for the next three years would seem to me to meet every objection which the President and the Secretary then urged against it. I can see no reason why the President should veto this bill as it is drawn.

Mr. ROBINSON. Mr. President, during the course of his address the Senator from North Dakota discussed the question relating to the ability of the Government to meet the payments contemplated by the bill without any necessity for a specific tax levy for that purpose, and I regret that so few Senators remained in the Chamber to hear the Senator's discussion. It leads me to this conviction, that in all probability little is to be accomplished by a prolonged debate in the Senate respecting this subject. Senators have had three years to deliberate upon it. Some of them apparently have found occasion and justification for changing their conclusions and their decisions respecting it, but the Senator from North Dakota has this afternoon demonstrated the fact that their is nothing in the financial condition of the Government of the United States that justifies either a further postponement of this legislation or an Executive veto.

When the President was before the Senate a year ago and asked delay for the reasons he then stated, it was asserted by some of us here that that movement was attributable to a powerful and organized effort upon the part of great financial influences to encompass the defeat of adjusted-compensation legislation through the influence of propaganda, deliberately and systematically conducted in the press of the Nation, and through other methods. Never in the history of this country has any measure been subjected to more deliberate, more powerful, more well-directed influence in opposition.

Mr. WALSH of Massachusetts. And it has not ceased.

Mr. ROBINSON. As suggested by the Senator from Massachusetts, that propaganda is still in progress, still gathering force and volume. Certainly the time has come when the Senate of the United States should make final disposition of this bill. It ought to have been disposed of in the beginning.

If the Government of the United States owes consideration to the men who uplifted into light on foreign battle fields the flag of this Republic and carried it to victory, that obligation ought not to be discredited, ought not to be repudiated, ought not to be grudgingly discharged. It ought to be met promptly, cheerfully, gratefully. It ought to have been met a year ago.

Say what you please, print what you please, there is a feeling in the breasts of those who represent the ex-service men of the country that the authorities of the United States and the organized representatives of the wealth of the Nation are growing increasingly ungrateful of their services, rendered under circumstances, as set forth by the Senator from North Dakota, that ought to attract the unbounded, the uncompromising, the undying, and enthusiastic gratitude of the people of this Nation.

Mr. BURSUM. Mr. President, I offer an amendment to the bill, which I ask to have printed and lie on the table.

The PRESIDENT pro tempore. The proposed amendment will be printed and lie on the table.

Mr. ASHURST. Mr. President, I have a letter which I received from the national commander of the Disabled Veterans of the World War. I ask that the Secretary may read the same.

The PRESIDENT pro tempore. Without objection, the Secretary will read the communication presented by the Senator from Arizona.

The reading clerk read as follows:

THE DISABLED AMERICAN VETERANS OF THE WORLD WAR,
Washington, August 22, 1922.

Hon. HENRY F. ASHURST,
United States Senate, Washington, D. C.

MY DEAR SENATOR: As the national commander of the Disabled American Veterans of the World War, I wish to inform you officially that at the annual encampment of the Disabled American Veterans of the World War, held recently, resolutions were adopted unanimously calling upon the Congress to enact the adjusted compensation bill.

The Disabled Veterans of the World War have a membership of 120,000 men, which includes a majority of the soldiers, sailors, and marines who have survived the disabilities received during the fighting.

Speaking for the disabled veterans, I wish to state that service men of the true stripe—whether disabled or not—stick together. They stuck together over there, and they have done so over here. Before our own organization of disabled was banded together the American Legion, practically alone, fought our battles with Government incompetence and neglect.

Since the adjusted compensation bill has become an important issue before the country, organizations and individuals who profited much during the halcyon days of war contracts have suddenly evidenced an acute interest in our welfare.

They say America is not rich enough, big enough, and strong enough to pay what we owe to our soldiers who gave only their time, their opportunity of war profits—who risked only their lives for their country. They say, by inference, should we do justice to the well, we can not care for the wounded.

I wish to say to you, Mr. Senator, that the disabled soldiers do not believe this.

The country has demonstrated that it has had sufficient to pay an adjustment of compensation to the Federal employees, to the Regular Army and Navy, to the railroad, and to the war contractors.

Has the Congress of the United States exhausted its country's resources on these, so it must tell its soldiers that peace hath its victories greater than war's; that service is more sure of recognition in the factory than in the trench?

The impending passage of the adjusted compensation bill has at last awakened the war profiteer, the man of large business and swollen income, to the plight of the disabled. That is a good thing to happen at last, and it took the adjusted compensation bill to do it. And the war cripples needed the assistance of these as much three years ago as they do now.

But these business men and organizations—where were they when the Legion was fighting for the passage of the hospital bills and for other legislation for the aid of the disabled soldiers? At no time that I can recall has the Chamber of Commerce of the United States officially appeared before a senatorial or congressional committee to ask for relief for the disabled.

Yet the interests who profited most during the war are now banded together in a concerted effort—a tremendous effort—these people who heretofore had forgotten the war-wrecked young manhood of the Nation except to speak of their plight with sympathy on proper occasions—they are now striving to impress the Senate with their power and their desire to defeat the compensation bill.

And they are trying to make it appear that the disabled oppose this just bill.

It is the belief of the disabled war veterans that the men whose profit was greatest and whose risk was nothing during the war should at least have the grace now to stand aside in favor of the men who risked all and sought nothing but the safety of their country.

I have come down to Washington to help put an end to the bogy that the disabled soldier opposes adjusted compensation. This false argument has been used long enough.

I have joined Commander MacNider, of the Legion, here so that all may know that we are standing firmly behind him and his organization.

The disabled soldiers want their buddies to receive justice, and they want the Senate of the United States to know that they want the adjusted compensation bill passed, and passed without further delay.

Yours very truly,

C. HAMILTON COOK,
National Commander D. A. V. of W. W.

The PRESIDENT pro tempore. The bill having been reported from the Committee on Finance with amendments, the Secretary will report the first committee amendment.

The first amendment of the Committee on Finance was, under the subhead "Application by veteran," on page 7, after line 4, to strike out "(b) Such application shall be made on or before July 1, 1923, and if not made on or before such date shall be held void; but if application for land settlement aid is made on or before such date, the time for receiving the credits and exercising the preferences provided for in Title VIII shall be as specified in such title," and in lieu thereof to insert:

(b) Such application may be made at any time after the passage of this act.

The amendment was agreed to.

The next amendment was, under the subhead "Proof of veteran's choice of plan," on page 8, line 5, after the word "the," to strike out "National Veterans' Settlement Board" and to insert "Secretary of the Interior," so as to read:

SEC. 303. (a) As soon as practicable after the receipt of a valid application the Secretary of War or the Secretary of the Navy, as the case may be, shall transmit to the Secretary of the Treasury, if the veteran has chosen an adjusted service certificate, or to the Director of the United States Veterans' Bureau if the veteran has chosen vocational training aid, or to the Secretary of the Interior if the veteran has chosen farm or home aid or land settlement aid, a certificate setting forth—

The amendment was agreed to.

The next amendment was, on page 8, line 12, after the word "officer," to strike out "or board," so as to read:

(b) Upon receipt of such certificate the officer to which it is transmitted shall proceed to extend to the veteran the benefits conferred by the plan chosen, as provided for in this act.

The amendment was agreed to.

The next amendment was, under the subhead "Publicity," on page 9, line 3, after the word "officer," to strike out "or board," and in line 8, after the word "officer," to strike out "or board," so as to read:

(b) The officer having charge of the administration of any plan or part thereof enumerated in section 301 shall transmit to the Secretary of War and the Secretary of the Navy as soon as practicable after the passage of this act full information and explanations as to the matters of which such officer has charge, which shall be considered by the Secretary of War and the Secretary of the Navy in preparing the publications referred to in subdivision (a).

The amendment was agreed to.

The next amendment was, under the subhead "Reports," on page 10, line 7, after the word "officer," to strike out "or board," so as to read:

SEC. 307. Any officer charged with the administration of any plan under this act, or of any part thereof, shall make a full report to Congress on the first Monday of December of each year.

The amendment was agreed to.

The next amendment was, under the head "Title V.—Adjusted service certificates," on page 12, line 14, after the words "as of," to strike out "October 1, 1922," and to insert "the 1st day of January or July (whichever first occurs) next succeeding the date of filing the application, but in no case before January 1, 1923"; in line 21, after the word "certificate," to strike out "has been," and to insert "is"; in line 22, after the word "veteran," to strike out "on September 30, 1942," and to insert "20 years after the date of the certificate"; and in line 24, after the word "prior," to strike out "thereto" and to insert "to the expiration of such 20-year period," so as to make the section read:

SEC. 501. The Secretary of the Treasury, upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, is hereby directed to issue without cost to the veteran designated therein an adjusted service certificate (hereinafter in this title referred to as a "certificate") of a face value equal to the sum of (1) the adjusted service credit of the veteran increased by 25 per cent, plus (2) interest thereon for 20 years at the rate of 4½ per cent per annum, compounded annually (such amount being approximately equal to 3.015 times the adjusted service credit of the veteran). The certificate shall be dated, and all rights conferred under the provisions of this title shall take effect as of the 1st day of January or July (whichever first occurs) next succeeding the date of filing the application, but in no case before January 1, 1923. The veteran shall name the beneficiary of the certificate and may from time to time, with the approval of the Secretary of the Treasury, alter such beneficiary. The amount of the face value of the certificate (unless the certificate is canceled as hereinafter in this title provided) shall be payable (1) to the veteran 20 years after the date of the certificate, or (2) upon the death of the veteran prior to the expiration of such 20-year period, to the beneficiary named; except that if such beneficiary dies before the veteran and no new beneficiary is named, or if the beneficiary in the first instance has not yet been named, the amount of the face value of the certificate shall be paid to the estate of the veteran.

The amendment was agreed to.

The next amendment was, on page 13, line 5, after the word "before," to strike out "October 1, 1925," and to insert "January 1, 1926," so as to make the subhead read:

Loan privileges before January 1, 1926.

The amendment was agreed to.

The next amendment was, on page 13, at the beginning of line 8, to insert "holding a certificate," and in the same line after the word "to," to strike out "September 30, 1925," and to insert "January 1, 1926," so as to read:

SEC. 502. (a) A loan may be made to any veteran holding a certificate prior to January 1, 1926, upon his adjusted service certificate only in accordance with the provisions of this section.

The amendment was agreed to.

The next amendment was, on page 13, line 19, after the word "before," to strike out "September 30, 1925," and to insert "December 31, 1925," so as to read:

(b) Any national bank, or any bank or trust company incorporated under the laws of any State, Territory, possession, or the District of Columbia (hereinafter in this section called "bank"), is authorized to loan to any veteran upon his promissory note secured by his adjusted service certificate (with or without the consent of the beneficiary thereof) any amount not in excess of 50 per cent of the loan basis (as defined in subdivision (f) of this section) of the certificate, such loan to mature on or before December 31, 1925. The rate of interest charged upon the loan by the bank shall not exceed, by more than 2 per cent per annum, the rate charged at the date of the loan for the discount of commercial paper under section 13 of the Federal reserve act, by the Federal reserve bank for the Federal reserve district in which the bank is located. Any bank holding a note for a loan under this section, secured by a certificate (whether the bank originally making the loan or a bank to which the note and certificate have been transferred) may sell the note to, or discount or rediscount it with, any bank authorized to make a loan to a veteran under this section, and transfer the certificate to such bank. In case the note is sold the bank making the sale shall promptly notify the veteran.

The amendment was agreed to.

The next amendment was, on page 14, line 11, after the word "before," to strike out "September 30, 1925," and to insert "December 31, 1925"; in line 12, after the word "after," to strike out "March" and to insert "June"; in line 14, after the word "than," to strike out "May 30, 1925," and to insert "August 31, 1925"; in line 15, after the word "than," to strike out "October 15, 1925," and to insert "January 15, 1926"; in line 16, after the word "note," to strike out "and the certificate"; and in line 20, after the word "bank," to strike out "The difference between 80 per cent of the loan basis of the certificate at the time of its receipt by the Secretary and the amount so paid to the bank shall be immediately paid by the Secretary to the veteran, if living. If the veteran dies before such difference can be paid to him, it shall be paid to the beneficiary under the certificate; except that if such beneficiary dies before the veteran and no new beneficiary is named, or if the beneficiary in the first instance has not yet been named, then the payment shall be made to the estate of the veteran" and in lieu thereof to insert: "The Secretary shall restore the certificate to the veteran at any time prior to its maturity upon receipt from him of (1) the amount paid by the United States to the bank in cancellation of his note and (2) interest on such amount from the time of such payment to the date of such receipt, at 4½ per cent per annum, compounded annually," so as to read:

(c) If the veteran does not pay the principal and interest of the loan within six months after its maturity (or on or before December 31, 1925, if the loan matures on or after June 30, 1925), the bank holding the note and certificate shall present them to the Secretary of the Treasury not earlier than August 31, 1925, and not later than

January 15, 1926. The Secretary shall thereupon cancel the note and pay to the bank the amount of the unpaid principal due it, and the unpaid interest accrued, at the rate fixed in the note, up to the date of the check issued to the bank. The Secretary shall restore the certificate to the veteran at any time prior to its maturity upon receipt from him of (1) the amount paid by the United States to the bank in cancellation of his note and (2) interest on such amount from the time of such payment to the date of such receipt, at 4½ per cent per annum, compounded annually.

The amendment was agreed to.

The next amendment was, on page 15, line 16, after the word "after," to strike out "March 30, 1925," and to insert "June 30, 1925"; and in line 18, after the word "before," to strike out "October 1, 1925" and to insert "January 1, 1926," so as to read:

(d) If the veteran dies before the maturity of the loan the amount of the unpaid principal and the unpaid interest accrued up to the date of his death shall be immediately due and payable. In such case, or if the veteran dies on the day the loan matures or within six months thereafter, or, in case the loan matures on or after June 30, 1925, if he dies on or after the day the loan matures but before January 1, 1926, the bank holding the note and certicate shall, upon notice of the death, present them to the Secretary, who shall thereupon cancel the note (but not the certificate) and pay to the bank, in full satisfaction of its claim, the amount of the unpaid principal and unpaid interest, at the rate fixed in the note, accrued up to the date of the check issued to the bank; except that if, prior to the payment, the bank is notified of the death by the Secretary of the Treasury and fails to present the certificate and note to the Secretary within 15 days after the notice, such interest shall be only up to the 15th day after such notice. The Secretary shall deduct the amount so paid from the face value (as determined under section 501) of the certificate and pay the remainder in accordance with the provisions of section 501.

The amendment was agreed to.

The next amendment was, on page 16, line 14, after the word "from," to strike out "October 1, 1922" and to insert "the date of the certificate," so as to read:

(f) The loan basis of any certificate at any time shall, for the purposes of this section, be the amount of the adjusted service credit, plus interest thereon, from the date of the certificate to such time, at the rate of 4½ per cent per annum, compounded annually.

The amendment was agreed to.

The next amendment was, on page 17, line 8, after the word "after," to strike out "September 30, 1925" and to insert "January 1, 1926," so as to make the subhead read:

Loan privileges after January 1, 1926.

The amendment was agreed to.

The next amendment was, on page 19, after line 2, to strike out:

(b) If the veteran fails to make any payment when due, and such default continues for the period of one year, thereupon the Secretary of the Treasury shall declare the certificate of the veteran to be forfeited and cancel and surrender the note to the veteran; but if the Secretary of the Treasury subsequently finds any such certificate was forfeited by mistake, or under any misapprehension of fact, he shall reinstate the same upon payment of the amount then due the Government on the loan, and upon the receipt of a new note from the veteran on the same terms as the original note for the remaining amount due.

The amendment was agreed to.

The next amendment was, on page 19, after line 13, to strike out:

(c) If the veteran is in default and his certificate is forfeited, when he has borrowed an amount less than the maximum authorized under either subdivision (a) or (b) of section 505, the Secretary of the Treasury shall pay to him 80 per cent of the difference between what he has borrowed and the maximum which he was authorized to borrow under either subdivision (a) or (b) of section 505. If the veteran dies before such 80 per cent can be paid to him, it shall be paid to the beneficiary under the certificate; except that if such beneficiary dies before the veteran and no new beneficiary is named, or if the beneficiary in the first instance has not yet been named, then the payment shall be made to the estate of the veteran.

The amendment was agreed to.

The next amendment was, on page 20, after line 2, to insert:

(b) If the veteran fails to make any payment when due, the Secretary of the Treasury at any time prior to the maturity of the certificate shall cancel the note and restore the certificate to the veteran, upon the receipt of all installments in arrears, together with interest at 4½ per cent per annum, compounded annually, upon each such installment from the time when due.

The amendment was agreed to.

The next amendment was, on page 20, line 10, after the word "No," to strike out "Government"; in the same line, after the word "made," to insert "by the United States"; and in line 11, after the words "prior to," to strike out "October 1, 1925," and to insert "January 1, 1926," so as to read:

SEC. 505. No loan shall be made by the United States upon any certificate prior to January 1, 1926. The amount of such loans to any one veteran outstanding at any time shall not exceed.

The amendment was agreed to.

The next amendment was, on page 20, after line 13, to strike out:

(a) If the loan is made on or after October 1, 1925, and before October 1, 1928, 85 per cent of the sum of (1) the adjusted service credit of the veteran plus (2) interest thereon, from October 1, 1922, to the date of the making of the loan, at the rate of 4½ per cent per annum, compounded annually, or.

The amendment was agreed to.

The next amendment was, on page 20, after line 19, to insert:

(a) If the loan is made on or after January 1, 1926, and at any time not more than three years after the date of the certificate, 50 per cent of the sum of (1) the adjusted service credit of the veteran plus (2) interest thereon from the date of the certificate to the date of the making of the loan, at the rate of 4½ per cent per annum, compounded annually; or.

The amendment was agreed to.

The next amendment was, on page 21, after line 2, to insert:

(b) If the loan is made at any time more than three years after and not more than six years after the date of the certificate, 85 per cent of the sum of (1) the adjusted service credit of the veteran plus (2) interest thereon from the date of the certificate to the date of the making of the loan at the rate of 4½ per cent per annum, compounded annually; or.

The amendment was agreed to.

The next amendment was, on page 21, at the beginning of line 10, to strike out "(b)," and to insert "(c)"; in the same line, after the word "made," to strike out "on or after October 1, 1928, and before October 1, 1942," and to insert "at any time more than six years after the date of certificate," and in line 14, after the word "from," to strike out "October 1, 1922," and to insert "the date of the certificate," so as to read:

(c) If the loan is made at any time more than six years after the date of certificate, 70 per cent of the sum of (1) the adjusted service credit of the veteran increased by 25 per cent plus (2) interest thereon from the date of the certificate to the date of the making of the loan, at the rate of 4½ per cent per annum, compounded annually.

The amendment was agreed to.

The next amendment was, on page 21, line 24, after the word "veteran," to strike out "or the forfeiture of his certificate" and to insert "before the maturity of the loan"; on page 22, line 2, after the word "and," to strike out "in case such loan has been canceled as a result of the death of the veteran"; and in line 7, after the word "made," to insert "and the remainder shall be paid by the Secretary of the Treasury to the beneficiary named, or if no beneficiary is named, to the estate of the veteran," so as to make the section read:

SEC. 507. In the case of the death of the veteran before the maturity of the loan, any Government loan made upon the certificate, and the note in respect thereto, shall be canceled; and the Secretary of the Treasury shall deduct the amount of the unpaid principal and interest of the loan from the amount of the face value of the certificate in respect to which the loan is made, and the remainder shall be paid by the Secretary of the Treasury to the beneficiary named, or if no beneficiary is named, to the estate of the veteran.

The amendment was agreed to.

The next amendment was, on page 22, line 15, after the numeral "302," to strike out "and before October 1, 1922," and insert "and before the issuance of a certificate to him"; and in line 18, after the word "to," to strike out "his estate" and to insert "the beneficiary named, or if no beneficiary is named, to the estate of the veteran," so as to make the section read:

SEC. 509. If the veteran dies after making application in accordance with the provisions of section 302 and before the issuance of a certificate to him, the amount of the adjusted service credit of the veteran shall be paid by the Secretary of the Treasury to the beneficiary named, or if no beneficiary is named, to the estate of the veteran.

The amendment was agreed to.

The next amendment was, on page 22, after line 20, to insert a new section, as follows:

SEC. 510. The certificate shall be canceled (a) if the veteran fails to redeem his certificate before its maturity, or (b) if he fails to make any payment when due and such default continues to his death.

The amendment was agreed to.

The next amendment was, under the head "Title VII.—Farm or Home Aid," on page 25, line 20; after the word "The," to strike out "National Veterans' Settlement Board created by Title VIII (hereinafter in this title referred to as the 'board')" and insert "Secretary of the Interior"; and on page 26, line 1, after the word "to," to strike out "his adjusted service credit increased by 25 per cent" and to insert "the following percentage of his adjusted service credit," so as to read:

SEC. 701. (a) The Secretary of the Interior upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, is hereby directed, on or after July 1, 1923, to pay to the veteran designated therein, in one payment or in installments, an amount equal to the following percentage of his adjusted service credit:

The amendment was agreed to.

The next amendment was, on page 26, after line 3, to insert:

One hundred per cent, if the payment or the first installment thereof is made during the calendar year 1923;
One hundred and five per cent, if the payment or the first installment thereof is made during the calendar year 1924;
One hundred and ten per cent, if the payment or the first installment thereof is made during the calendar year 1925;
One hundred and twenty per cent, if the payment or the first installment thereof is made during the calendar year 1926;
One hundred and thirty per cent, if the payment or the first installment thereof is made during the calendar year 1927; and
One hundred and forty per cent, if the payment is made during the calendar year 1928 or thereafter.

The amendment was agreed to.

The next amendment was, on page 26, line 18, after the word "home," to strike out "or a farm not selected under Title VIII"; and in line 20, after the word "farm," to insert "or to pay off indebtedness existing on such a home or farm prior to the date of the application by the veteran under section 302," so as to read:

(b) Such payment shall be made for the purpose, and only for the purpose, of enabling the veteran to make improvements on a city or suburban home, or to purchase or make payments on such a home or farm, or to pay off indebtedness existing on such a home or farm prior to the date of the application by the veteran under section 302.

The amendment was agreed to.

The next amendment was, on page 26, line 24, after the word "the," to strike out "board" and to insert "Secretary of the Interior"; on page 27, line 2, after the word "The," to strike out "board" and to insert "Secretary of the Interior"; in the same line, after the word "may," to insert "on his own motion, or"; and in line 3, after the word "veteran," to strike out "or on its own motion," so as to make the section read:

SEC. 702. No such payment shall be made unless and until the Secretary of the Interior has approved the purpose for which it is desired by the veteran, and has suitable assurance that the money will be expended for such purpose. The Secretary of the Interior may, on his own motion, or at the option of the veteran, make the payment directly to the vendor or other person to whom such payment is due from the veteran.

The amendment was agreed to.

The next amendment was, on page 27, at the end of line 7, to strike out "board" and to insert "Secretary of the Interior," and in line 10, before the word "board," to strike out "latter," so as to make the section read:

SEC. 703. For the purpose of enabling him to pass upon the desirability of the investment, the Secretary of the Interior may make use of the services of land bank appraisers of the Federal Farm Loan Board, to be designated by the board.

The amendment was agreed to.

The next amendment was, on page 27, line 14, after the word "the," to strike out "board" and insert "Secretary of the Interior," and in line 16, after the word "the," to strike out "board" and insert "Secretary of the Interior," so as to make the section read:

SEC. 704. (a) If the veteran dies, after making application in accordance with the provisions of section 302 for farm or home aid and before a contract has been entered into with the approval of the Secretary of the Interior, the amount of his adjusted service credit shall be paid by the Secretary of the Interior to his estate; but no such payment shall be made if the veteran has been separated from the military or naval forces under other than honorable conditions or discharged therefrom on account of his alienage.

The amendment was agreed to.

The next amendment was, on page 27, line 22, after the words "approval of the," to strike out "board" and insert "Secretary of the Interior," and in line 24, after the word "the," to strike out "board" and insert "Secretary of the Interior," so as to read:

(b) If before the veteran's death a contract has been entered into with the approval of the Secretary of the Interior, and payments under this title on such contract are still due, such payments shall be made by the Secretary of the Interior to the vendor or other person to whom such payments are due from the veteran.

The amendment was agreed to.

The next amendment was, under the head "Title VIII.—Land settlement," on page 28, after line 3, to strike out:

NATIONAL VETERANS' SETTLEMENT BOARD.

SEC. 801. (a) There is hereby established a board to be known as the "National Veterans' Settlement Board" (hereinafter in this title called the "board") and to be composed of five members, as follows:

(1) The Secretary of the Interior (hereinafter in this title called the "Secretary"), and

(2) Four members to be appointed by the President by and with the advice and consent of the Senate.

(b) No veteran retired for age or longevity of service from active service in the military or naval forces shall be eligible for appointment to, or remain eligible for membership upon, the board. Any vacancy in the office of an appointed member shall be filled in the same manner and under the same limitations as in the case of the original appointment.

(c) The Secretary shall be the executive and administrative officer to carry out the plans and purposes adopted by the board under the provisions of Title VII and of this title. The members of the board, except the Secretary, shall receive an annual salary of $7,500. Of the members appointed to the board in the first instance, one shall be appointed for a term of two years, one for three years, one for four years, and one for five years. Their successors shall hold office for terms of five years; except that any member appointed to fill a vacancy shall be appointed only for the unexpired term of the member whom he succeeds.

The amendment was agreed to.

The next amendment was, on page 29, after line 5, to strike out:

ESTABLISHMENT OF PROJECTS.

SEC. 802. The board is hereby authorized to establish veteran settlement projects (hereinafter in this title called "projects") for the reclamation and settlement of lands by means of irrigation, drainage, or other manner or method of development and improvement thereof, including the building of necessary public roads within the projects. Projects shall be selected by the board with a view to the development of one or more projects in each of the several States where the establishment of a project is feasible.

SEC. 803. (a) The board may by gift, purchase, deed in trust, or otherwise acquire lands suitable for any project; but no project shall be finally selected, and no lands shall be acquired by purchase, unless the price and other conditions of acquisition have been submitted to and approved by (1) the governor of the State in which the lands are located, (2) as to price only, a land bank appraiser to be designated by the Federal Farm Loan Board, and (3) the board. If the governor of the State fails to signify his approval or disapproval within such time as the board by regulation shall determine, the land commissioner, or if there is in the State no official of such title, then the agency which under the laws of the State is authorized to perform the functions ordinarily exercised by a land commissioner, may act in lieu of the governor.

(b) In case any project includes privately owned land, no construction work shall be commenced upon the project until the owners of all such land in the project have each conveyed or agreed to convey to the United States title to all land owned by him in excess of a farm unit as established for the project under the provisions of section 806.

(c) The Secretary (1) may withdraw from location, sale, settlement, entry, or other disposition and place under the control of the board, such unappropriated public lands as he deems necessary for any project, and (2) shall restore to public entry lands so withdrawn, if subsequently the board finds that such lands are not so required.

(d) The board may in its discretion contract with any irrigation or drainage district or other public corporation organized under the laws of the State in which the project is located to establish, develop, improve, and otherwise cooperate (in accordance with the provisions of this title) in the execution of, and the administration of the affairs of, any project comprising only the lands of such district or corporation.

The amendment was agreed to.

The next amendment was, at the top of page 31, to strike out:

COOPERATION WITH FEDERAL AND STATE AGENCIES.

SEC. 804. The board may, in executing the provisions of this title—

(a) Make use of, cooperate with, and allot moneys appropriated for its use to, any existing agency of the Federal Government which agrees to act as the agent of the board. Such agency is hereby authorized, within the limits of the moneys allotted it and under the direction of the board, to perform work in connection with any project.

(b) Whenever a State provides funds to be expended by the board in the establishment, development, and improvement of any project within the State, the board may contract with the State, or any agency thereof designated by the governor, to cooperate with the board, to such extent as the board deems advisable in the work in connection with the project. The board may further establish a branch office in the State to administer matters arising in connection with projects in the State.

(c) Whenever a State provides not less than 25 per cent of the amount of the funds which are, in the opinion of the board, necessary to be expended by it in the establishment, development, and improvement of any project within the State, the board shall authorize the State, or any agency thereof designated by the governor, to undertake, subject to the general supervision of the board, (1) the selection, acquisition, and subdivision of lands for, and the improvement of farms within, any project, and (2) the development thereof after the project is open to settlement.

SEC. 805. So far as practicable, veterans shall be employed and their services utilized in the administrative and field work necessary to the establishment and development of any project by the board and all Federal agencies cooperating therewith. All contracts or other agreements of the board with any cooperating State or agency thereof shall contain a like stipulation. At the earliest practicable date each veteran so employed upon a project shall be allowed to select and shall be allotted, as hereinafter in this title provided, a farm unit upon which he may construct a dwelling and make other improvements.

The amendment was agreed to.

The next amendment was, on page 32, after line 14, to strike out:

ALLOTMENT AND SALE OF LANDS.

SEC. 806. (a) The board shall establish for each project or portion thereof (1) farm units of an acreage sufficient, in the opinion of the board, for cultivation by and the support of a family, and (2) farm worker's units of a small acreage sufficient, in the opinion of the board, for part-time cultivation by a farm worker's family.

(b) The board may set apart and reserve tracts within any project for use free from all charge for community and other public purposes, but the title to such lands shall remain in the United States. Whenever any such tract fails to be used for the purpose for which it was set apart and reserved, the board shall, after due notice and hearing, declare the tract forfeited to the United States. Such tract shall thereupon resume its original status.

(c) The board may establish town sites within any project and develop and sell lots therein, to veterans and repatriates only, under such regulations and upon such terms as it shall prescribe.

SEC. 807. (a) When used in this title, the term "repatriate" includes (1) any citizen of the United States who has served with the military or naval forces of any nation allied against the German Government or its allies without loss of citizenship, and (2) any former citizen of the United States who has so served with loss of such citizenship but has since been repatriated; except that such term shall not include a veteran or any individual who has separated from such forces under other than honorable conditions.

(b) Whenever in the opinion of the board farm units or farm workers' units within any project are available for settlement, the board shall give public notice and description thereof, together with a statement of the construction charges and other conditions incident thereto, and shall mail individual notices to any veteran whose name has been certified to the board under the provisions of section 303. The board shall allot a farm unit or a farm worker's unit to any such veteran or repatriate who applies therefor in such manner as the board shall by regulation prescribe. As between applicants, preference in making allotments shall be given, first, to a veteran who has been employed upon and who has rendered substantial service in the development of any project; and, second, to a veteran or repatriate who, in the opinion of the board, is least likely to fail in his enterprise or to cause the United States loss.

(c) The board shall allot farm units, farm worker's units, and town lots to veterans and repatriates only.

SEC. 808. (a) The cost of construction, including the purchase price of any lands acquired for the project, but excluding administrative expenses and the expenses of maintaining general offices and exercising general supervision over projects, shall be apportioned equitably among the farm units, farm worker's units, town lots, and other tracts within the project in proportion to the selling value of each unit, lot, or tract; and the total sale price of all lands within the project shall be fixed with a view of repaying the total of such construction cost of the project.

(b) Each allottee of a farm unit or farm worker's unit shall pay to the board such price as the board shall fix for the unit in pursuance of the provisions of subdivision (a) of this section; except that in case the allottee is a veteran there shall be deducted from such price the amount of his adjusted service credit.

(c) A veteran or repatriate may at his option, in lieu of payment in full at the time of entry, pay all balances due upon the purchase price for his unit upon an amortization plan by means of a fixed number of annual installments sufficient to cover (1) interest on the unpaid principal at the rate of 5 per cent per annum, and (2) such amount of the principal as will extinguish the debt within an agreed period not exceeding 25 years from the making of the contract of purchase. In the case of a veteran, the installments shall be so arranged that he will not be required to pay any installment until two years after the making of the contract of purchase. The board may in its discretion, whenever it is of the opinion that any emergency has caused default in the payment of any installment of the veteran or repatriate, postpone the payment of such installment until such date as it deems expedient. Such postponed payments shall continue to bear interest on the unpaid principal at the rate of 5 per cent per annum from the date of the contract of purchase. The board shall make such regulations as to residence upon, and use or cultivation of, units by a veteran or repatriate as in the opinion of the board will carry out the purpose of making the unit his permanent home.

SEC. 809. A patent or deed, as the case demands, shall immediately be issued to a purchaser who has paid the full price for his unit, and may be issued at any time more than five years after the date of purchase to any purchaser under the amortization plan who has met all payments then due from him to the board and has observed all conditions prescribed by regulations issued under the provisions of subdivision (c) of section 808. Each such patent or deed shall expressly reserve to the United States a prior lien on the land patented or deeded, superior to all other liens, claims, or demands whatsoever, for the repayment of all sums due or to become due to the board.

SEC. 810. (a) If the veteran dies after making application in accordance with the provisions of section 302 for land settlement aid and before having entered into a contract of purchase under section 808, the amount of his adjusted service credit shall be paid by the board to his estate, but no such payment shall be made if the veteran has been separated from the military or naval forces under other than honorable conditions or discharged therefrom on account of his alienage.

(b) If the veteran or repatriate dies previous to the completion of his contract of purchase, the successor by law to his interest in the land, if a widow or heir at law, may assume the contract of purchase. If the successor is other than a widow or heir at law, the balance due the board under the contract of purchase shall be due immediately and shall be paid the board within such time after the death of the veteran as the board shall by regulation prescribe.

SEC. 811. No lands within any project shall in any event become liable to the satisfaction of any debt contracted prior to the issue of the deed or patent therefor. No transfer, assignment, mortgage, or lease of the interest of any purchaser of a unit shall, unless approved by the board, be valid previous to the issue of the deed or patent for the land, or within five years after the date of purchase.

SEC. 812. Prior to the issue of a deed or patent, as the case may be, for any unit, lot, or tract within a project, such unit, lot, or tract shall be subject to taxation by any State, or political subdivision thereof, but only upon the appraised value of the owner's interest in the land and improvements thereon. If the owner fails to pay any such tax or assessment, the board is authorized to pay such tax or assessment and to include the amount of the payment, together with interest and penalties at the rate provided by law for delinquent taxes in the State in which the land is located, in the installments payable under the contract of purchase.

SEC. 813. Upon the default of any payment due to the board under, or upon the violation of, the provisions of subdivision (c) of section 808, or of section 810, 811, or 812, the interest of the purchaser in the unit shall revert to the United States free of all encumbrances, but subject to the right of the defaulting debtor, or any mortgagee, lien holder, judgment creditor, or subsequent purchaser, to redeem the land, within one year after the board gives notice of such default, by payment of all moneys due with interest at 8 per cent per annum from the date of default, and costs. The board, at its option, may cause the land to be sold at any time after such failure to redeem. From the proceeds of the sale the board shall retain all moneys due, with interest as provided, and costs. The balance of the proceeds, if any, shall be the property of the defaulting debtor or his assignee. In the case of sale after failure to redeem under this section, the board is authorized to bid in such land at not more than the amount in default, including interest and costs.

SEC. 814. In case a veteran has entered upon land reclaimed under the reclamation law, the board shall, upon application of the veteran, pay to the reclamation fund the amount of the adjusted service credit of the veteran, and the Secretary of the Interior shall thereupon credit such sum to the amount payable to the fund by the veteran.

The amendment was agreed to.

The next amendment was, one page 38, after line 22, to strike out:

RECEIPTS FROM PROJECTS.

SEC. 815. All moneys received by the board as payments in respect to lands within any project shall be covered into the Treasury of the United States as miscellaneous receipts; except that from such receipts shall be deducted the amounts required to make such repayment or reimbursement to any State or designated agency thereof, or to any district or other public corporation, as is necessary to carry into effect the provisions of subdivision (d) of section 803 and of subdivisions (b) and (c) of section 804.

The amendment was agreed to.

The next amendment was, on page 39, after line 7, to strike out:

APPLICABILITY OF RECLAMATION LAW.

SEC. 816. The board shall, so far as possible, in executing the provisions of this title, make use of existing agencies in the Department of the Interior and comply with the reclamation law in so far as such law is applicable and not inconsistent with the provisions of this title. Such reclamation law shall, for the purposes of this title, be deemed applicable to the reclamation of lands by drainage or by any other manner or method, as well as to reclamation by irrigation. This section shall not be construed to give the board any control over the disposition of moneys in the reclamation fund.

The amendment was agreed to.

The next amendment was, on page 39, after line 19, to strike out:

EFFECTIVE DATE.

SEC. 817. Sections 802 to 816, both inclusive, shall take effect on January 1, 1923.

The amendment was agreed to.

The next amendment was, on page 39, after line 22, to insert:

SEC. 801. On the opening of public or Indian lands to entry, or the restoration to entry of public lands theretofore withdrawn from entry, such opening or restoration shall, in the order therefor, provide for a period of not less than 60 days before the general opening of such lands to disposal, in which period veterans who have chosen the benefits of this title shall have a preferred right of entry under the homestead or desert land laws, if qualified thereunder, except as against prior existing valid settlement rights and as against preference rights conferred by existing laws or equitable claims subject to allowance and confirmation.

Such preference right to a veteran for such period shall also be accorded to him on all reclamation projects in existence at the time of the passage of this act, or hereafter established, whether such reclamation is made by irrigation, drainage, or other method.

Upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, approved by the Secretary of the Interior, there shall be paid by the Secretary of the Treasury, on or after July 1, 1923, to the veteran designated therein, in one payment or in installments, an amount equal to his adjusted service credit increased by 25 per cent. Such payment shall be made for the purpose, and only for the purpose, of enabling the veteran to make payments in connection with the lands as to which preference has been given under this section, or for the improvement of any such land, and shall be made only if the Secretary of the Interior has suitable assurance that the money will be expended for such purpose.

The amendment was agreed to.

The next amendment was, under the head "Title IX.—Miscellaneous provisions," on page 41, line 4, after the word "officers," to strike out "and boards," so as to read:

SEC. 901. The officers having charge of the administration of any of the provisions of this act are authorized to appoint such officers, employees, and agents in the District of Columbia and elsewhere, and to make such expenditures for rent, furniture, office equipment, printing, binding, telegrams, telephone, law books, books of reference, stationery, motor-propelled vehicles or trucks used for official purposes, traveling expenses and per diem in lieu of subsistence at not exceeding $4 for officers, agents, and other employees, for the purchase of reports and materials for publications, and for other contingent and miscellaneous expenses as may be necessary efficiently to execute the purposes of this act and as may be provided for by the Congress from time to time. With the exception of such special experts as may be found necessary for the conduct of the work, all such appointments shall be made subject to the civil-service laws; but for the purposes of carrying out the provisions of section 305 such appointments may be made without regard to such laws until the services of persons duly qualified under such laws are available. In all appointments under this section preference shall, so far as practicable, be given to veterans.

The amendment was agreed to:

The next amendment was, on page 42, line 13, after the word "Navy," to insert "the Secretary of the Interior, and," and, in line 15, after the word "Bureau," to strike out the comma and the words "and the National Veterans' Settlement Board," so as to make the section read:

SEC. 904. The Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, and the Director of the United States Veterans' Bureau shall severally submit to Congress in the manner provided by law estimates of the amounts necessary to be expended in carrying out such provisions of this act as each is charged with administering, and there is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, amounts sufficient to defray such expenditures.

The amendment was agreed to.

The PRESIDENT pro tempore. This completes the action of the Senate on the committee amendments. The bill is as in Committee of the Whole, and open to further amendment.

Mr. WADSWORTH. Mr. President, I do not desire to address the Senate upon this occasion on the bill itself, but I wish to put a question to the Senator in charge of the bill. In reading the bill over I encounter paragraph (e), on page 4, which commences on line 12 and reads:

(e) Any commissioned or warrant officer performing home service not with troops and receiving commutation of quarters or of subsistence—for the period of such service.

The insertion of a paragraph of that character in section 202, as I understand, is for the purpose of excluding from the benefits of this bill any commissioned officer who, while in the United States, drew commutation of quarters or subsistence. Of course, commissioned officers did not draw subsistence at that time. I should like to know, assuming for the purpose of the question only that this bill is a good one in principle, on

what basis or theory a commissioned officer sent to a detached place and drawing under the statute commutation of quarters should not be treated in exactly the same way as are other commissioned officers?

Mr. McCUMBER. The Senator will observe, on page 3, section 202, there is set forth a list of those who will not be entitled to compensation under this bill. The list includes:

(a) Any commissioned officer above the grade of captain in the Army or Marine Corps, lieutenant in the Navy, first lieutenant or first lieutenant of engineers in the Coast Guard, or passed assistant surgeon in the Public Health Service, or having the pay and allowances, if not the rank, of any officer superior in rank to any of such grades—in each case for the period of service as such;

(b) Any individual holding a permanent or provisional commission or permanent or acting warrant in any branch of the military or naval forces, or (while holding such commission or warrant) serving under a temporary commission in a higher grade—in each case for the period of service under such commission or warrant or in such higher grade after the accrual of the right to pay thereunder. This subdivision shall not apply to any noncommissioned officer;

(c) Any civilian officer or employee of any branch of the military or naval forces, contract surgeon, cadet of the United States Military Academy, midshipman, cadet of the Coast Guard, member of the Reserve Officers' Training Corps, member of the Students' Army Training Corps (except an enlisted man detailed thereto), Philippine Scout, member of the Philippine Guard, member of the Philippine Constabulary, member of the Porto Rico Regiment of Infantry, member of the National Guard of Hawaii, member of the insular force of the Navy, member of the Samoan native guard and band of the Navy, or Indian Scout—in each case for the period of service as such;

(d) Any individual entering the military or naval forces after November 11, 1918—for any period after such entrance;

(e) Any commissioned or warrant officer——

Mr. WADSWORTH. The Senator from North Dakota has just reached the paragraph about which I asked him. I understood about the others.

Mr. McCUMBER. I simply desire to show that there are a long list of those to whom under the provisions of the bill the committee of the House and the House itself by its vote indicated they did not intend should receive compensation, and amongst those are:

(e) Any commissioned or warrant officer performing home service not with troops and receiving commutation of quarters or of subsistence for the period of such service.

Of course, that exception is based on the assumption that the commutation gave such officers that much greater return for their service.

Mr. WADSWORTH. I assume that the Senator from North Dakota knows that all officers in the war received commutation of quarters under the law. The bill, therefore, makes no remarkable distinction in that respect.

Mr. McCUMBER. Yes; but the exception applies to commissioned and warrant officers performing home service not with troops.

Mr. WADSWORTH. Yes; but they received commutation of quarters, whether they were with troops or not.

Mr. McCUMBER. In other words, if the Senator will observe, this is to take care of those who were made officers by the thousands and who served here in the department, doing merely clerical work, and such officers as might have been detailed from time to time to perform work of that character. I do not know how many of them there were, but undoubtedly that was the reason for the exemption.

Mr. WADSWORTH. It is very easy for the Senator from North Dakota to characterize by a wave of his hand thousands and thousands of officers who in large measure were compelled to do this kind of work who would have much preferred to have gone abroad.

Mr. McCUMBER. I assume that most of them would.

Mr. WADSWORTH. This bill, as I understand, will give to any second lieutenant or first lieutenant or captain who served in the United States at a camp with troops the benefits of the proposed act, but it will deny to any lieutenant or first lieutenant or captain who was ordered to a place other than a camp at which troops were situated and who was compelled to do duty of the kind such as was needed to be performed the benefits of this act. I wish to know why?

Both classes of officers drew commutation of quarters, both those serving with troops and those serving away from troops; they were both treated exactly alike in the statute and the pay schedules. Why differentiate between them now?

Mr. FLETCHER. May I ask the Senator from New York about how many of the warrant officers there would be?

Mr. WADSWORTH. There were very few warrant officers. There was no such thing as a warrant officer in the Army of the United States at that time except in the Army mine-planter service, where, I think, there were somewhere in the neighborhood of—well, I could not say how many emergency warrant officers there were; there were not over a hundred or so in the Regulars, but, of course, the Regulars are left out of this bill.

Mr. FLETCHER. I thought there were very few warrant officers who would be affected by the proposal.

Mr. WADSWORTH. I am speaking of commissioned officers; and I assume the committee had a special reason for making this exemption.

Mr. FLETCHER. Can the Senator from New York state how many commissioned officers would be affected?

Mr. WADSWORTH. Hundreds and hundreds of young men who, according to the theory of the bill, should have their compensation adjusted just as much as the young men who served with troops in the United States and did not go abroad. They made exactly the same sacrifices; they had to live on exactly the same salary. I am wondering why the distinction.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. The bill is before the Senate as in Committee of the Whole and is open to further amendment.

Mr. BURSUM. I offer the amendment which I send to the desk in the nature of a substitute, and ask that it may be read.

The PRESIDENT pro tempore. The amendment proposed by the Senator from New Mexico will be stated.

The READING CLERK. It is proposed to strike out all of the enacting clause, and in lieu thereof to insert the following:

Amendment in the nature of a substitute proposed by Mr. BURSUM to the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes, viz: Strike out all after the enacting clause and insert in lieu thereof the following:

TITLE I.—DEFINITIONS.

SECTION 1. That this act may be cited as the World War adjusted compensation act.

SEC. 2. That as used in this act—

(a) The term "veteran" includes any individual, a member of the military or naval forces of the United States at any time after April 5, 1917, and before November 12, 1918; but does not include (1) any individual at any time during such period or thereafter separated from such forces under other than honorable conditions, (2) any conscientious objector who performed no military duty whatever or refused to wear the uniform, or (3) any alien at any time during such period or thereafter discharged from the military or naval forces on account of his alienage;

(b) The term "oversea service" means service on shore in Europe or Asia, exclusive of China, Japan, and the Philippine Islands; and service afloat, not on receiving ships; including in either case the period from the date of embarkation for such service to the date of disembarkation on return from such service, both dates inclusive;

(c) The term "home service" means all service not oversea service;

(d) The term "adjusted service credit" means the amount of the credit computed under the provisions of Title II; and

(e) The term "person" includes a partnership, corporation, or association, as well as an individual.

TITLE II.—ADJUSTED SERVICE CREDIT.

SEC. 201. That the amount of adjusted service credit shall be computed by allowing the following sums for each day of active service in excess of 60 days in the military or naval forces of the United States after April 5, 1917, and before July 1, 1919, as shown by the service or other record of the veteran: One dollar and twenty-five cents for each day of oversea service and $1 for each day of home service; but the amount of the credit of a veteran who performed no oversea service shall not exceed $500, and the amount of the credit of a veteran who performed any oversea service shall not exceed $625.

SEC. 202. That in computing the adjusted service credit no allowance shall be made to—

(a) Any commissioned officer above the grade of captain in the Army or Marine Corps, lieutenant in the Navy, first lieutenant or first lieutenant of engineers in the Coast Guard, or passed assistant surgeon in the Public Health Service, or having the pay and allowances, if not the rank, of any officer superior in rank to any of such grades—in each case for the period of service as such;

(b) Any individual holding a permanent or provisional commission or permanent or acting warrant in any branch of the military or naval forces, or (while holding such commission or warrant) serving under a temporary commission in a higher grade—in each case for the period of service under such commission or warrant or in such higher grade after the accrual of the right to pay thereunder. This subdivision shall not apply to any noncommissioned officer;

(c) Any civilian officer or employee of any branch of the military or naval forces, contract surgeon, cadet of the United States Military Academy, midshipman, cadet of the Coast Guard, member of the Reserve Officers' Training Corps, member of the Students' Army Training Corps (except an enlisted man detailed thereto), Philippine Scout, member of the Philippine Guard, member of the Philippine Constabulary, member of the Porto Rico Regiment of Infantry, member of the National Guard of Hawaii, member of the insular force of the Navy, member of the Samoan native guard and band of the Navy, or Indian Scout—in each case for the period of service as such;

(d) Any individual entering the military or naval forces after November 11, 1918—for any period after such entrance;

(e) Any commissioned or warrant officer performing home service not with troops and receiving commutation of quarters or of subsistence—for the period of such service;

(f) Any member of the Public Health Service—for any period during which he was not detailed for duty with the Army or Navy;

(g) Any individual granted a farm or industrial furlough—for the period of such furlough; or

(h) Any individual detailed for work on roads or other highway construction or repair work—for the period during which his pay was equalized to conform to the compensation paid to civilian employees in the same or like employment, pursuant to the provisions of section 9 of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1920, and for other purposes," approved February 28, 1919.

SEC. 203. (a) The periods referred to in subdivision (e) of section 202 may be included in the case of any individual if and to the extent

that the Secretary of War and the Secretary of the Navy jointly find that such service subjected such individual to exceptional hazard. A full statement of all action under this subdivision shall be included in the reports of the Secretary of War and the Secretary of the Navy required by section 307.

(b) In computing the credit to any veteran under this title effect shall be given to all subdivisions of section 202 which are applicable.

(c) If part of the service is overseas service and part is home service, the home service shall first be used in computing the 60 days' period referred to in section 201.

(d) For the purpose of computing the 60 days' period referred to in section 201, any period of service after April 5, 1917, and before July 1, 1919, in the military or naval forces in any capacity may be included, notwithstanding allowance of credit for such period, or a part thereof, is prohibited under the provisions of section 202, except that the periods referred to in subdivisions (b), (c), and (d) of that section shall not be included.

(e) For the purposes of section 201, in the case of members of the National Guard or of the National Guard Reserve called into service by the proclamation of the President dated July 3, 1917, the time of service between the date of call into the service as specified in such proclamation and August 5, 1917, both dates inclusive, shall be deemed to be active service in the military or naval forces of the United States.

TITLE III.—GENERAL PROVISIONS.

OPTIONAL PLANS.

SEC. 301. (a) Each veteran shall have the right to avail himself of one or both of the following plans:

(1) To receive "adjusted service pay," as provided in Title IV;

(2) To receive "land purchase aid," as provided in Title VII.

(b) Each veteran shall have the right to avail himself of any one and only one of the following plans:

(1) To receive "vocational training aid," as provided in Title V;

(2) To receive "farm or home aid," as provided in Title VI.

APPLICATION BY VETERAN.

SEC. 302. (a) The veteran's choice among the plans enumerated in section 301 shall be made by application filed with the Secretary of War, if he is serving in, or his last service was with, the military forces; or with the Secretary of the Navy, if he is serving in, or his last service was with, the naval forces.

(b) Such application shall be made on or before July 1, 1923, and if not made on or before such date shall be held void.

(c) An application shall be made (1) personally by the veteran, or (2) in case physical or mental incapacity prevents the making of a personal application, then by such representative of the veteran and in such manner as the Secretary of War and the Secretary of the Navy shall jointly by regulation prescribe. An application made by a representative other than one authorized by any such regulation shall be held void.

(d) The Secretary of War and the Secretary of the Navy shall jointly make any regulations necessary to the efficient administration of the provisions of this section.

PROOF OF VETERAN'S CHOICE OF PLAN.

SEC. 303. (a) As soon as practicable after the receipt of a valid application the Secretary of War or the Secretary of the Navy, as the case may be, shall transmit to the Secretary of the Treasury if the veteran is entitled to a certificate of indebtedness, or to the Director of the United States Veterans' Bureau if the veteran has chosen vocational training aid, or to the Secretary of the Interior if the veteran has chosen farm or home aid, a certificate setting forth—

(1) That the applicant is a veteran;

(2) His name and address;

(3) The plan or plans chosen; and

(4) The amount of his adjusted service credit.

(b) Upon receipt of such certificate the officer to which it is transmitted shall proceed to extend to the veteran the benefits conferred by the plan or plans chosen, as provided for in this act.

PUBLICITY.

SEC. 304. (a) The Secretary of War and the Secretary of the Navy shall, as soon as practicable after the passage of this act, jointly prepare and publish a pamphlet or pamphlets containing a digest and explanation of the provisions of this act, accompanied by such statements as to the comparative advantages of each of the plans enumerated in section 301 as may be of assistance to veterans in making their choice among such plans; and shall from time to time thereafter jointly prepare and publish such additional or supplementary information as may be found necessary.

(b) The officer having charge of the administration of any plan or part thereof enumerated in section 301 shall transmit to the Secretary of War and the Secretary of the Navy as soon as practicable after the passage of this act full information and explanations as to the matters of which such officer has charge, which shall be considered by the Secretary of War and the Secretary of the Navy in preparing the publications referred to in subdivision (a).

(c) The publications provided for in subdivision (a) shall be distributed in such manner as the Secretary of War and the Secretary of the Navy may determine to be most effective to inform veterans of their rights under this act.

STATISTICS.

SEC. 305. That immediately upon the passage of this act the Secretary of War and the Secretary of the Navy shall ascertain the individuals who are veterans as defined in section 2 and, as to each veteran, the number of days of overseas service and of home service, as defined in section 2, for which he is entitled to receive adjusted service credit; and their decisions shall not be subject to review by the General Accounting Office.

ADMINISTRATIVE REGULATIONS.

SEC. 306. That any officer charged with any function under this act shall make such regulations, not inconsistent with this act, as may be necessary to the efficient administration of such function.

REPORTS.

SEC. 307. That any officer charged with the administration of any plan under this act, or of any part thereof, shall make a full report to Congress on the first Monday in December of each year.

EXEMPTION FROM ATTACHMENT AND TAXATION.

SEC. 308. That no sum payable under this act to a veteran, or to his estate, and no certificate of indebtedness shall be subject to attachment, levy, or seizure under any legal or equitable process, or to National or State taxation.

UNLAWFUL FEES.

SEC. 309. That any person who charges or collects, or attempts to charge or collect, either directly or indirectly, any fee or other compensation for assisting in any manner a veteran in obtaining any of the benefits or privileges to which he is entitled under the provisions of this act shall, upon conviction thereof, be subject to a fine of not more than $500, or imprisonment for not more than one year, or both.

TITLE IV.—ADJUSTED SERVICE PAY.

SEC. 401. That there shall be paid to any veteran, as soon as practicable after the receipt of an application in accordance with the provisions of section 302, and in addition to any other amounts due him in pursuance of law, 50 per cent of the amount of his adjusted service credit or 100 per cent of the amount of his adjusted service credit if, and only if, such credit is not more than $50.

SEC. 402. (a) That payment shall be made by the Secretary of War if the veteran is serving in or his last service was with the military forces, and by the Secretary of the Navy if he is serving in or his last service was with the naval forces.

(b) If there remains to the veteran any adjusted service credit after payment to him in accordance with the terms of section 401, the Secretary of War or the Secretary of the Navy, as the case may be, shall transmit to the Secretary of the Treasury, in accordance with the provisions of section 303, a certificate which shall set forth in addition to the other requirements of such section the amount of such adjusted service credit which remains to such veteran.

SEC. 403. That the Secretary of the Treasury, upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 402, is hereby directed to issue without cost to the veteran designated therein a certificate of indebtedness of the face value equal to the sum of (1) the adjusted service credit of the veteran, plus (2) interest thereon for five years at the rate of 3½ per cent per annum. The certificate shall be dated and all rights conferred under the provisions of this title shall take effect as of October 1, 1923. The amount of the face value of the certificate of indebtedness shall be payable (1) to the veteran on September 30, 1928, or (2) upon the death of the veteran prior thereto to the estate of the veteran on September 30, 1928.

SEC. 404. That if the veteran dies after making application in accordance with the provisions of section 302 for adjusted service pay and before receiving payment, payment shall be made to his estate.

SEC. 405. That no right to adjusted service pay or to a certificate of indebtedness under the provisions of this act shall be assignable or serve as security for any loan. Any assignment or loan made in violation of the provisions of this section shall be held void. The Secretary of War and the Secretary of the Navy shall not pay the amount of adjusted service pay to any person other than the veteran or his estate or such representative of the veteran as the Secretary of War and the Secretary of the Navy shall jointly by regulation prescribe.

TITLE V.—VOCATIONAL TRAINING AID.

SEC. 501. That the Director of the United States Veterans' Bureau (hereinafter in this title referred to as the director) upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, is hereby directed to pay to the veteran designated therein (if he is not receiving the benefits of the vocational rehabilitation act, as amended) the sum of $1.75 for each day of his attendance (on or after January 1, 1923) on a course of vocational training previously approved by the director as suitable for such veteran. Such payments shall be made without deductions for Sundays, holidays, or vacations not exceeding two weeks in duration, or for absence for other cause which the director deems justifiable; but the total payment shall not exceed 140 per cent of the amount of the adjusted service credit of the veteran.

Payments under this section shall be made monthly, or at more frequent intervals, as the director may determine generally or in special cases.

SEC. 502. That the director shall establish such regulations as will insure the regular attendance of the veteran on his course of training, and no sum or sums shall be payable under this title unless the director has been furnished proof of such regular attendance. For each day of unjustifiable absence the veteran shall forfeit the sum payable for that day and shall receive no reimbursement for it in any other form.

SEC. 503. That if the payment under section 501 plus the amounts forfeited under section 502 is less than 140 per cent of the adjusted-service credit, either by reason of the duration of the course approved or by reason of the veteran's discontinuing, with the approval of the director, his attendance on his course of training, he shall be entitled to receive an amount equal to the difference between (1) his adjusted-service credit and (2) that proportion thereof which the payments made or accrued under section 501 plus the amounts forfeited under section 502 bear to 140 per cent of his adjusted-service credit: *Provided*, That from the amount thus computed there shall be deducted an amount equal to the sums forfeited under section 502.

SEC. 504. That if before the completion of the payments under this title the veteran is separated from the military or naval forces under other than honorable conditions or is discharged therefrom on account of his alienage no further payments shall be made under this title.

SEC. 505. (a) If the veteran dies after making application in accordance with the provisions of section 302, and before any payments have been made or have accrued under this title, the amount of the adjusted-service credit of the veteran shall be paid by the director to his estate.

(b) If the veteran dies after the course of training has begun, his estate shall be paid by the director the same amount as would have been paid to the veteran under section 503, treating for such purposes the date of his death as the date of discontinuance of attendance on his course of training.

SEC. 506. (a) The director is hereby authorized to cooperate with State boards for vocational education in such manner as will secure their assistance in the approval of courses of training for veterans and other assistance in carrying out the provisions of this title.

(b) Whenever any State provides funds for assistance to veterans in attendance upon approved courses or provides for free tuition in approved educational institutions, the director is authorized and directed to cooperate with the State board for vocational education of such State in securing the maximum educational opportunities to veterans entitled to the benefits of this title.

TITLE VI.—FARM OR HOME AID.

SEC. 601. (a) The Secretary of the Interior (hereinafter in this title referred to as the "Secretary") upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, is hereby directed, on or after October 1, 1923, to pay to the veteran desig-

nated therein, in one payment or in installments, an amount equal to his adjusted service credit increased by 25 per cent.

(b) Such payment shall be made for the purpose, and only for the purpose, of enabling the veteran to make improvements on a city or suburban home or a farm, or to purchase or make payments on such a home or farm.

SEC. 602. No such payment shall be made unless and until the Secretary has approved the purpose for which it is desired by the veteran and has suitable assurance that the money will be expended for such purpose. The Secretary may, at the option of the veteran or on his own motion, make the payment directly to the vendor or other person to whom such payment is due from the veteran.

SEC. 603. For the purpose of enabling him to pass upon the desirability of the investment the Secretary may make use of the services of land-bank appraisers of the Federal Farm Loan Board to be designated by the board.

SEC. 604. (a) If the veteran dies, after making application in accordance with the provisions of section 302 for farm or home aid and before a contract has been entered into with the approval of the Secretary, the amount of his adjusted service credit shall be paid by the Secretary to his estate; but no such payment shall be made if the veteran has been separated from the military or naval forces under other than honorable conditions or discharged therefrom on account of his alienage.

(b) If before the veteran's death a contract has been entered into with the approval of the Secretary, and payments under this title on such contract are still due, such payments shall be made by the Secretary to the vendor or other person to whom such payments are due from the veteran.

TITLE VII.—LAND PURCHASE AID.

SEC. 701. That any veteran holding a certificate of indebtedness issued to him under the terms of section 403 may make a homestead entry upon any public lands of the United States subject to entry under the provisions of the homestead laws. After entry and upon application, a patent for such lands entered shall be granted to such veteran upon payment by him, as hereinafter provided, at the rate of $1.25 per acre.

SEC. 702. That payment shall be made to the register and receiver of the local land office for the district in which such land is located, and such land shall not be patented to a veteran under the provisions of this title except upon payment by him with such certificate of indebtedness; but if the total cost of the land exceeds the face value of the certificate, payment of the remainder owing upon such land by such veteran shall be made upon such terms and conditions as the Secretary of the Interior may prescribe. If the face value of the certificate of indebtedness exceeds the total cost of the land, the register and receiver (1) shall accept such certificate as payment for the land, (2) shall compute the excess owing to the veteran, and (3) shall issue to the veteran a receipt for such certificate of indebtedness, upon which receipt shall be indorsed by such register and receiver the amount of the excess owing to the veteran.

SEC. 703. That such certificate of indebtedness, with a copy of the receipt issued to such veteran, shall be transmitted to the Secretary of the Interior by such register and receiver. The Secretary of the Interior shall cancel the certificate of indebtedness, and if there remains to such veteran any excess after deducting the total cost of the land from the amount of the face value of the certificate of indebtedness, he shall transmit a certificate to the Secretary of the Treasury in the manner provided in paragraph (b) of section 404, which shall state the amount of the excess.

SEC. 704. That upon receipt of such certificate the Secretary of the Treasury shall issue to such veteran a certificate of indebtedness of a face value equal to the sum of such excess which remains to the veteran. The certificate of indebtedness shall be dated to correspond to the date of the receipt issued to the veteran (as provided for in section 702); shall stipulate that such certificate can not be used for land purchase aid; and shall state that the amount of the face value of such certificate shall be payable only (1) to the veteran on September 30, 1928, or (2) upon the death of the veteran prior thereto, to the estate of the veteran on September 30, 1927.

TITLE VIII.—MISCELLANEOUS PROVISIONS.

SEC. 801. That the officers having charge of the administration of any of the provisions of this act are authorized to appoint such officers, employees, and agents in the District of Columbia and elsewhere, and to make such expenditures for rent, furniture, office equipment, printing, binding, telegrams, telephone, law books, books of reference, stationery, motor-propelled vehicles or trucks used for official purposes, traveling expenses, and per diem in lieu of subsistence at not exceeding $4 for officers, agents, and other employees, for the purchase of reports and materials for publications, and for other contingent and miscellaneous expenses as may be necessary efficiently to execute the purposes of this act and as may be provided for by the Congress from time to time. With the exception of such special experts as may be found necessary for the conduct of the work, all such appointments shall be made subject to the civil-service laws; but for the purposes of carrying out the provisions of section 305 such appointments may be made without regard to such laws until the services of persons duly qualified under such laws are available. In all appointments under this section preference shall, so far as practicable, be given to veterans.

SEC. 802. That if any provision of this act or the application thereof to any person or circumstances is held invalid, the validity of the remainder of the act and of the application of such provision to other persons and circumstances shall not be affected thereby.

SEC. 803. That whoever knowingly makes any false or fraudulent statement of a material fact in any application, certificate, or document made under the provisions of Title III, IV, V, VI, or VII, or of any regulation made under any such title, shall, upon conviction thereof, be fined not more than $1,000 or imprisoned not more than five years, or both.

SEC. 804. That the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Director of the United States Veterans' Bureau, and the Secretary of the Interior shall severally submit to Congress in the manner provided by law estimates of the amounts necessary to be expended in carrying out such provisions of this act as each is charged with administering, and there is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, amounts sufficient to defray such expenditures.

SEC. 805. That whenever it is deemed to be for the best interests of the United States, the Secretary of the Treasury, with the approval of the President, is authorized to sell any bonds or other obligations of any foreign government refunded or converted by the World War Foreign Debt Commission under authority of the act entitled "An act to create a commission authorized under certain conditions to refund or convert obligations of foreign governments held by the United States of America, and for other purposes," approved February 9, 1922, upon such terms and conditions as such Secretary may prescribe, and to apply the proceeds of such sales, and any payments received on account of the principal of such bonds and other obligations, to defray any expenditures incurred under the provisions of this act.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was rejected.

Mr. BURSUM. Mr. President, was that the amendment that I offered?

The PRESIDENT pro tempore. The vote just taken was upon the amendment offered by the Senator from New Mexico.

Mr. BURSUM. Are we to have no debate upon it?

The PRESIDENT pro tempore. There can be debate upon it in the Senate.

Mr. WADSWORTH. I ask unanimous consent that the vote by which the amendment was apparently defeated be reconsidered.

The PRESIDENT pro tempore. The Senator from New York asks unanimous consent that the vote by which the amendment was rejected be reconsidered. Is there objection? The Chair hears none, and the vote is reconsidered. The question now is upon agreeing to the amendment.

Mr. BURSUM. Mr. President, I had intended to speak upon this amendment, and I had understood that other Senators desired to be heard on the bill, and I expected to speak upon it to-morrow. I ask that the amendment go over until to-morrow, when I can be heard upon it. Certainly the amendment is of such great importance that it ought to be considered by the whole Senate. It involves a distinctly different settlement from the provisions of the bill itself. The amendment would involve a saving to the country, in my judgment, if its principles are adopted, of something like $3,000,000,000. Three billion dollars is not such a small affair that the Senate can not take a little time to consider it; and to dispose of the amendment without any consideration and without any debate would not be doing justice to it. I ask that the amendment go over until to-morrow, and be considered then.

The PRESIDENT pro tempore. The Senator from New Mexico asks unanimous consent that the amendment which he has proposed shall not be considered until to-morrow.

Mr. LENROOT. The Senator can accomplish the same purpose by withdrawing it.

Mr. BURSUM. I should only be willing to withdraw it provided the bill is not going to be pressed for a vote to-night.

Mr. McCUMBER. Mr. President, I understand that the Senator from Oregon [Mr. McNARY] wishes to present a matter that will take only a few minutes. We are getting very close to the usual time for adjourning, and if the Senator will ask to have the unfinished business temporarily laid aside, I shall not object.

Mr. McNARY. I ask that the unfinished business be temporarily laid aside for the purpose of taking up another bill.

The PRESIDENT pro tempore. The Senator from Oregon asks unanimous consent that the unfinished business, being the bill under consideration, shall be temporarily laid aside.

Mr. LENROOT. May I inquire what the bill is to which the Senator refers?

Mr. McNARY. It is a bill to protect the bee industry of the country. I can explain it in just a word.

Mr. LENROOT. I have no objection.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the unfinished business is temporarily laid aside.

IMPORTATION OF THE ADULT HONEYBEE.

Mr. McNARY. I ask unanimous consent for the present consideration of House bill 11396 to regulate foreign commerce in the importation into the United States of the adult honeybee. The bill has passed the House.

The PRESIDENT pro tempore. The Senator from Oregon asks unanimous consent that the Senate may proceed to the consideration of House bill 11396.

Mr. UNDERWOOD. Let it be read, Mr. President.

The PRESIDENT pro tempore. The Secretary will read the bill for the information of the Senate.

The reading clerk read the bill (H. R. 11396) to regulate foreign commerce in the importation into the United States of the adult honeybee (Apis mellifica), as follows:

Be it enacted, etc., That, in order to prevent the introduction and spread of diseases dangerous to the adult honeybee, the importation into the United States of the honeybee (Apis mellifica) in its adult stage is hereby prohibited, and all adult honeybees offered for import into the United States shall be destroyed if not immediately exported: *Provided*, That such adult honeybees may be imported into the United States for experimental or scientific purposes by the United States Department of Agriculture: *And provided further*, That such adult honeybees may be imported into the United States from countries in which the Secretary

of Agriculture shall determine that no diseases dangerous to adult honeybees exist, under rules and regulations prescribed by the Secretary of Agriculture.

SEC. 2. That any person who shall violate any of the provisions of this act shall be deemed guilty of a misdemeanor and shall, upon conviction thereof, be punished by a fine not exceeding $500 or by imprisonment not exceeding one year, or both such fine and imprisonment, in the discretion of the court.

The PRESIDENT pro tempore. Is there objection to the request made by the Senator from Oregon?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CHIEF OF STAFF OF THE ARMY.

Mr. WADSWORTH. Mr. President, out of order I ask unanimous consent to report back favorably, from the Committee on Military Affairs, without amendment, House bill 11699.

The PRESIDENT pro tempore. Is there objection? The Chair hears none.

Mr. WADSWORTH. I ask unanimous consent for the present consideration of the bill.

Mr. CURTIS. Let it be read.

Mr. WADSWORTH. Of course, the bill should be read to the Senate before the request is put.

The PRESIDENT pro tempore. The Senator from New York asks unanimous consent for the present consideration of the bill just reported, which will be read for the information of the Senate.

The reading clerk read the bill (H. R. 11699) relating to the appointment of the Chief of Staff of the Army, as follows:

Be it enacted, etc., That, notwithstanding other provisions of law touching eligibility for appointment and service as Chief of Staff, the present Deputy Chief of Staff may be appointed Chief of Staff, and when so appointed shall be eligible to serve as such for a period of four years unless sooner relieved.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ADDRESS BY SENATOR KELLOGG.

Mr. RANSDELL. I ask unanimous consent to have printed in the RECORD a very important address delivered by the junior Senator from Minnesota [Mr. KELLOGG] at Duluth, Minn., on the 8th of this month, on the Great Lakes-St. Lawrence deep waterway. It is a highly interesting and instructive contribution to this very important subject. I ask that it be printed in 8-point type.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The address is as follows:

SPEECH OF SENATOR FRANK B. KELLOGG ON THE GREAT LAKES-ST. LAWRENCE DEEP WATERWAY DELIVERED AT DULUTH AUGUST 8, 1922.

I came here to-day to urge the people of the Northwest to do everything in their power toward the consummation of one of the greatest projects ever conceived by the genius of modern times, and yet one obviously of such surpassing benefit to the whole people that it would seem it should be undertaken and carried to completion without a moment's delay.

De Lesseps built the Suez Canal, which linked the east with the west. It fell to the lot of the United States to realize the dream of the ages in the construction of a canal which linked the Atlantic with the Pacific. Since that memorable day of September 25, 1513, on which Balboa looked out upon the Pacific from the heights of the Isthmus, the search for a through route to the Orient has engaged the attention and stirred the imagination of men. For more than a hundred years past, the consummation of this project, the construction of a canal to link the two oceans, engrossed the leading nations of the world. There came a day when there was a man occupying the presidential chair, with vision, with determination, who saw clearly the pathway of duty and what it would mean to this country and to the world to accomplish this great object. He conceived and carried through the project. It has been and will be of inestimable value to the Nation as a whole and to all the nations of the world, in opening up a short route between the eastern and western coasts of North and South America and from western Europe to the Orient.

The point I desire to make here is this: That this was a great national project, not in the interest of any particular part of the country, but in the interest of the whole people. It is undoubtedly true that the Panama Canal is not directly a benefit to us in Minnesota and in the neighboring Central and Western States. It only benefits us as it benefits the entire Nation. It has reduced the freight rates, I might say the distance, from the Atlantic to the Pacific coast, and it enables the coast cities like Boston, New York, Philadelphia, Baltimore, Charleston, and the whole country as far west as Buffalo and Pittsburgh, to get an advantage which we in the Northwest can not avail ourselves of. In fact, the Panama Canal has imposed a handicap on certain lines of interior production, and yet the West supported this project, paid its share of the taxes, western Members of Congress voted for it, and no one has ever been heard to suggest their action was regretted.

All we ask now is that the Nation as a whole heartily support the construction of another waterway improvement which will give the Central West the same facilities enjoyed by the South through the Gulf of Mexico and by the East and the western part of the country through the Panama Canal. We are now facing the problem of the construction of this canal, the consummation of this great plan which will open a deep waterway 1,500 miles into the heart of the continent, to the very center of agricultural and manufacturing production.

On the south of this country is the Gulf of Mexico, reaching all the ports for more than 1,000 miles into the rich land bordering upon the South. On the north is the chain of Great Lakes, unsurpassed in the opportunity they furnish for cheap transportation, reaching almost into the center of the United States and Canada. Only a comparatively short distance in the St. Lawrence River must be made navigable to bring ocean-going vessels from all parts of the world to Chicago, Milwaukee, Duluth, Superior, and other cities on the Lakes.

The growth and advancement of the civilizations of the world have followed the avenues of water transportation. In the Ægean Sea and the Adriatic, on the Mediterranean and the Nile, along the Bosphorus, in the North Sea, everywhere water transportation has played the most important part in the development and growth of national life. The British Empire owes its vast domain and national power to its ocean commerce. The same might be said to a lesser degree of all the western nations of Europe. I believe no other country in the world would for 130 years allow a great avenue of commerce like the Lakes to remain closed to the ships of all nations by a few miles of a river. Remember that ocean-going vessels now reach Montreal—that only 34 miles of canal and the improvement of 148 miles of river is necessary to open up an entire lake region, thereby connecting the deep-water transportation of the Lakes with the ocean and enabling ships of ocean size to run to Duluth and all the other lake ports and carry an enormous tonnage of freight.

We stop to think about the cost. Who to-day reckons the cost of the Panama Canal, which was $400,000,000—a little more than one-tenth of the cost of running the Government for one year? The St. Lawrence Canal can be built for less than the United States Government has appropriated to aid in the building of roads since I have been in the Senate. The total cost of this project, as I will show, developing a water power that will ultimately pay for the entire improvement, is only about $250,000,000; and if we paid two-thirds of it, this would be $175,000,000 for the United States—not 10 per cent of the money the United States lost in operating the railroads in the two years and two months; and yet certain interests in a very limited part of the United States, principally in New York, are opposing this project because they believe that they will not be directly the beneficiaries of the improvement; that some of the commerce of the West will go by their doors, will not pay tribute to the port of New York. Had that attitude been taken by the Middle Western States it would have blocked the construction of the Panama Canal, and it is my firm belief that the prosperity of the city of New York is too much dependent upon the prosperity of the great West to, in the end, permit them to take such a provincial view of this subject. We are all proud of our great seaport and financial center. It is undoubtedly necessary to the proper development of the commerce and business of the whole country, but it is dependent upon that business and commerce. Western business interests, western farms, western manufacturers pay their tribute to New York, and when a national improvement of this kind is projected they are entitled to the support of the New York interests.

For a moment let us consider the nature of the country and the industrial development which this ocean canal is projected to reach. Along the great natural pathway of the Lakes lies one of the most magnificent agricultural areas in the world. The center of the food-producing section of the United States lies tributary to the western end of these Lakes. From Ohio to Colorado, from Missouri to Minnesota and North Dakota, is the valley of the Mississippi and the Ohio Rivers—of unsur-

passed fertility and marvelous production. It is peopled with a virile race of men and women, filled with wonderful cities and industrial centers. It appears by the report of the commission that the center of the wheat production of the United States is southeastern Nebraska; corn in Illinois; oats in southeastern Iowa; potatoes in Wisconsin; wool in Wyoming; swine in Illinois; cattle in Kansas; butter in Illinois; cheese in Wisconsin; farm acreage generally in central Missouri; farm values in Iowa; meat packing in Iowa; iron ore in Minnesota; and the largest manufacturing district lies along the Great Lakes from Duluth to Cleveland. Here alone in 1920, tributary to Chicago, was an agricultural, mineral, and manufacturing production of more than $16,000,000,000, to say nothing about the production and commerce tributary to other places. Here is produced the most of our agricultural products which are exported to Europe in the form of wheat, flour, and meat products. Tributary to Lake Superior is produced 75 per cent of the iron ore which goes into the manufacture of the iron and steel products of the United States, and from Pittsburgh west to Chicago is produced the larger part of the manufactured articles of iron and steel. Here is produced all kinds of machinery, in the manufacture of which we have no peer in the world, and it is in those markets that we wish to sell our surplus.

I had the honor of supporting an amendment to the rivers and harbors bill of March 2, 1919, which directed the International Joint Commission to investigate what further improvement of the St. Lawrence River between Montreal and Lake Ontario was necessary to make the river navigable for ocean-going vessels, together with the estimated cost. Pursuant to a treaty existing between the United States and Canada and this act of Congress, the Governments of the United States and the Dominion of Canada submitted to the International Joint Commission and a board of engineers the question of what further improvement in the St. Lawrence River between Montreal and Lake Ontario was necessary to make the same navigable for deep-draft vessels of either the lake or ocean going type, what draft of water was recommended, and what was the estimated cost. A board of engineers of the two Governments was constituted to take charge of the surveys and examination.

The joint commission consisted of ex-Senators Clarence D. Clark, of Wyoming, and Marcus A. Smith, of Arizona, and Mr. Obadiah Gardner, of Maine, for the United States, and Charles A. Magrath, Henry A. Powell, and Sir William Hearst for Canada. The board of engineers was headed by W. P. Wooten, colonel, Corps of Engineers, United States Army, and W. A. Bowden, chief engineer of railways and canals, Canada. They gave to every phase of this subject very careful consideration and made an elaborate report, which was submitted by the President to the Congress

I shall briefly review the conclusions and findings of the commission and board of engineers, but, for the moment, it is sufficient to say that the commissioners and the engineers unanimously conclude not only that the scheme is practical and wise but recommend that it be at once undertaken by the two Governments, and that the income from the power developed will ultimately pay for the entire project. The commissioners recommend that the first step to be taken is for the Governments of the United States and Canada to enter into an arrangement, by way of a treaty, for this scheme of improvement of the St. Lawrence River between Montreal and Lake Ontario. The President, through the Secretary of State, has proposed to the Canadian Government that the two Governments enter into a treaty for the improvement of the St. Lawrence River. The Canadian Government has replied that it deems the present time inopportune to take up the subject, but I believe it is only temporarily postponed and that there is no question that the two Governments will construct this deep waterway and power plant, which must be of inestimable value to the people of the whole Nation.

What is needed by the people of Minnesota—in fact, of the entire Northwest and of the Nation—is cheaper transportation, which must, to some extent, come through the development of our great waterways. During the war, when the Government took over the railroads and during Government operation, the cost of transportation was enormously increased as a result of this operation, freight rates being increased about 60 per cent and passenger rates nearly 50 per cent, and during this time the railroads were not improved and expanded to make them adequate to the demands of growing transportation needs. It is true that railroad rates are gradually coming down and have decreased on an average about 11 per cent, amounting to about $500,000,000 per annum since private operation was resumed; but they are still high and impose an enormous burden especially on the farmers of the Middle West, and I know of no project—no improvement in transportation—that can possibly equal the opening of this deep waterway to the very heart of the agricultural West.

The commission finds a fact which is known to everyone—that at various times for years there has been abnormal congestion on the railroads, which has cost the Nation hundreds of millions of dollars; that there is great congestion in the terminals at the Atlantic coast, like New York; that the transshipment charges at such terminals are unreasonable. In fact, I know from my own knowledge that for many years the cost of transshipping a bushel of wheat in the New York Harbor was greater than the entire cost of transportation from Duluth to Buffalo. It is a fact well known to everyone that it is impossible for the roads leading to the agricultural-producing West to adequately handle the export business through the ports of Boston, New York, and Baltimore. These places will always remain as the principal ports of entry and export for many of the products of the country, especially those higher priced and less bulky products of commerce. It is estimated by the commission—another fact which is well known—that it will require from one to two billion dollars' investment per annum to keep the railroads abreast the growing demands of the country, while this deep waterway can be constructed at a cost to both nations not exceeding $252,000,000, and develop a water power which will ultimately pay the entire amount and cost of operation.

After stating that the great centers of agricultural and manufactured products are tributary to the Great Lakes, the commission finds that the Middle West and Western States are equipped in every way to take full advantage of the transportation facilities promised by the deep waterway for the development both of the Atlantic and Pacific seaboards of the United States and with overseas countries, and that we are almost compelled to seek this new outlet by reason of the fact that existing transportation agencies are inadequate to handle the situation; that the project is entirely feasible both from a transportation, commercial, and a physical standpoint; that the proposed depth of canal will accommodate the prevailing ocean-going vessels; that 81.45 per cent of all ocean-going vessels have a draft of 25 feet and less, and that 99.32 per cent have a draft of 30 feet and less, and it is only a few large ocean passenger ships which could not use the proposed canal and which would not in any event; that the fact that the canal would be open only seven and one-half months in the year is not an obstacle, because the Lake transportation is only open substantially the same time, and this fact, of course, is true of all other inland northern routes. It is true of the Erie Canal and of the route to Montreal, which is closed for four months of the year, and yet that city has become one of the great seaports of the Western Hemisphere. The opponents of this route also claim that the presence of icebergs and fogs makes it hazardous for ocean-going ships. This would apply to the route to Montreal, which is shown to be one of the safest and best routes. Everyone knows that there is just as much danger of icebergs and fogs off the Grand Banks in the route from New York as there is in the route to Montreal. The commission also finds, after very careful examination, that the further inland they can penetrate the greater will be the resulting economy and the more extensive the area benefited, and that the experience of other countries has developed that ocean-going ships may economically travel far inland. This is true notably in the Amazon, the Yangtse-Kiang, the Rhine, the Danube, the Columbia and Willamette, the Delaware, the lower Mississippi, and the St. Lawrence itself. It must be remembered that in England a ship canal was built to Manchester in order that ocean-going vessels might discharge their freight in this great manufacturing town. The rates of freight do not increase with the distance in the same way as they do with rail transportation, because there are no highway fixed charges and only the cost of operation to be considered. A notable example is that the freight rates from New York to Bombay are the same as from New York to Calcutta, though the latter port is 2,000 miles farther away and involves 90 miles of travel by a tortuous river channel much more difficult than the St. Lawrence.

When we stop to consider that the power, the wealth, and the influence of the British Empire were largely produced by its water commerce with the rest of the world, that ocean-going commerce has been the foundation of the rise of nations since the dawn of history, that we are a great surplus-producing country, with yet vast undeveloped resources, it is incomprehensible that such an avenue of water transportation, which could be built for so small a cost, should remain undeveloped.

We produce in Minnesota, Michigan, and Wisconsin probably 75 per cent of the iron ore used in the United States, and our manufactories are large and growing, yet Minnesota is and will be essentially an agricultural country and our products of grain,

flour, meats, butter, and cheese must reach not only the large eastern cities but Europe and Asia. What this means to the farmers of the great West is almost incomprehensible. When we realize that this fertile region may be placed upon a seaport the difference in rates of grain and flour alone by this route would mean millions of dollars annually to the Northwest, and the fact that we have a deep waterway reaching every port in the world means a potential power toward the growth of our cities and the country that we little realize to-day. Chicago, Milwaukee, Duluth, St. Paul, Minneapolis, and the country tributary already owe to a very large degree their growth to the Lake waterways, which would be very greatly enhanced by connecting the Lakes with the ocean.

As I stated before, the only opposition comes from New England and New York, principally from the latter place. The Associated Industries of Massachusetts passed a resolution indorsing the project, and I believe sentiment is generally growing in its favor throughout New England. The particular objection raised by New York is that it will make Chicago, Milwaukee, Duluth, and Superior deep-water ports and will take a certain amount of traffic away from the port of New York. They also claim that this would tend to build up Montreal as the seaport, and suggest that if a deep waterway is to be built, it should be entirely on American territory. The only suggestion they make is to use the Erie Barge Canal from Oswego to the Hudson River or build a canal from Lake St. Francis, 15 miles west of Montreal, to Lake Champlain, running through Lake Champlain to the Hudson Canal, improving the Hudson Canal and connecting with the Hudson River. It would hardly seem necessary to argue that these routes would not meet the demands, are probably prohibitive on account of the cost and engineering difficulties, and would not relieve the congestion of the New York port. They would be subject to all the objections which the New York interests raise to the St. Lawrence River, and many more. New York has already spent in the neighborhood of $300,000,000 upon its canals and has a depth of only 12 feet, which would accommodate boats 150 feet long. What it would cost to deepen the barge canal from Lake Ontario to the Hudson River is problematical, but Col. Clark S. Smith, Corps of Engineers, reports that the cost would be staggering. Various engineers have made reports upon this project, but they do not recommend such an improvement. In fact, the last report made was, in pursuance of authority of Congress, by the War Department, which reported adversely to both New York projects.

It would hardly need argument to sustain these various reports that the deepening of the barge canal or the building of the Lake Champlain Canal is utterly impractical. In the first place, the canal from Oswego to the Hudson River still would require this Government to make some arrangement for the use of the Welland Canal between Lake Erie and Lake Ontario. It would require a 25-foot channel from Oswego to the Hudson River, a distance of about 170 miles, which is nearly as long as the canal and the river from Lake Ontario to Montreal, and of that distance only 34 miles is a canal. But the other route from Lake St. Francis down through Lake Champlain is still more impractical. To use this route would require the construction of practically all of the canal and the improvement of the River St. Lawrence, which is now contemplated, and in addition the building of the canal from Lake St. Francis to the Hudson River through Lake Champlain. The construction of the New York Barge Canal from Buffalo and from Oswego to New York by way of the Hudson River has not relieved the congestion of traffic on the railroads. The total capacity of this canal is only about 10,000,000 tons of freight each way, taking the estimates of those most favorable to the canal, and this is not 5 per cent of the tonnage now moving eastward in this dense traffic area. It has been found not a substantial factor in the reduction of the rates between Buffalo and New York, for the railroad rates there are as high as the rates west of Buffalo.

If it is true, as they claim, that ocean vessels will not use the long inland waterway, it is all the more true that they would not use these long canals, reaching across the State of New York, or north to Lake St. Francis. This project may be dismissed. It is simply put forward as an argument to beat the St. Lawrence River project.

Their main argument, however, is upon the fact that the St. Lawrence Canal is impracticable, and on this problem let me invite your attention to the engineer's report. Not only do the engineers report the plan entirely feasible, but the commission, after hearing testimony from the best experts in the country and giving careful consideration to the subject, also make the same report. The engineers' report is as follows:

"A. That the physical conditions are favorable for improvements for navigation, which will be permanent and will have very low upkeep costs.

"B. That improvement of the entire reach from Montreal to Lake Ontario for navigation alone is feasible, but the loss of the power that can be generated as a by-product in some reaches is not warranted.

"C. That the development of nearly all the potential power in the river, amounting to approximately 4,100,000 horsepower, can be made as coordinate parts of schemes for the improvement of navigation.

"D. That the simultaneous development of such a vast quantity of power is not a sound economic procedure, as a market to take this output is not now in existence and can not be expected to spring into being at once.

"E. That the sound method of procedure is to improve for navigation alone those reaches where side canals and locks can most economically be used, and where the development of the power at some future time is not interfered with by the proposed improvement; and in that part of the river where the construction of locks and dams offers the most feasible means of improving navigation to provide for the development of the incidental power obtainable as a result of the heads created by the dams."

The engineers divide the river into five subdivisions and treat each one separately. It is unnecessary for me here to go into these details, but simply to say that they recommend the construction of canals, locks, and power dams between Lake Ontario and St. Regis on the international boundary, and a canal alone from St. Regis to Montreal, the power plant to develop about 1,464,000 horsepower. They also report that this plan would make possible at any time the development of additional horsepower in that part of the canal between St. Regis and Montreal, making an aggregate horsepower of 4,100,000. They report that the total cost of a 25-foot canal, with locks to be built for an ultimate 30-foot depth, will cost $252,728,200, will develop a horsepower of 1,464,000, that the cost of operation and maintenance will be $2,562,000, and that of this sum $1,457,000 is properly chargeable to power plants and that the power plants will ultimately pay for and support the entire project. They estimate that to deepen the canal to 30 feet will cost only $17,986,180.

The commission recommend that the new Welland Canal be embodied as a part of the scheme. I believe the cost of this canal from its inception with the improvements now being made is estimated at about $75,000,000. If this canal was included and the United States was to pay its share of the cost, it would make the total about $325,000,000. The commission recommends that the cost of the canals be divided on a basis of use and that the cost of the power be divided equally between the two countries. I shall not go into a discussion of the distribution of cost. If the entire amount was to be paid by the United States it would nowhere equal the Panama Canal, and it would ultimately be paid for entirely by the use of the power. But assume that $200,000,000 of the amount should, in the first instance, be paid by the United States. This is not much over 10 per cent of what the Government lost in the operation of the railways in two years. It is not over 20 per cent of what it will be necessary to spend on the railroads each year in order to bring them up to that point of efficiency necessary to take care of the growing commerce of the nation. It is less than the amount appropriated by the Government to aid the States in constructing the roads for two years, and for this amount of money there will be obtained for all time a national highway reaching more than 1,500 miles into the interior and a power plant to start with of nearly a million and a half horsepower for use by the industries of the two countries. When we stop to think of the increased cost of coal and the necessity for power in the growing industries of the country it is not an unimportant factor that here, lying near the great center of population, is a project that, incidental to the transportation feature, will produce a million and a half to four million horsepower per annum. The best information I can get is that the total horsepower now developed in the United States is only about 10,000,000, and as this horsepower can be transmitted two or three hundred miles, it indicates the great public benefit this would be.

Every single argument against this project which has been advanced by its opponents is met by the masterly report of the commission and the findings of the engineers. These men approached this subject from a perfectly impartial standpoint, without any local selfish interest affecting their judgment. No one can deny the ability and standing of the members of the commission or the board of engineers, and their report covers

every question which would need to be settled before determining upon the canal construction. It shows that the traffic is sufficient to make the canal a success from the beginning; that the development of 1,464,000 horsepower can immediately be availed of on a profitable basis, which will ultimately pay for the canal and its operation, to say nothing of the additional horsepower which can be developed along the canal; that the congestion of railway traffic in periods of peak loads can not for this western country be relieved in any other manner than by development of this and other water transportation; that ocean-going vessels can and will use the canal; that the reduction in freight rates and the increase in transportation facilities will fully justify the expenditure and will be a potential power in the increase of production in the western country, greater than any other factor; that the physical objections which have been raised, such as fogs and ice obstruction of long stretches of inland navigation, do not, in the opinion of the engineers or the commission, afford a reasonable objection to the project; that there is no other alternative route adequately meeting the demands for transportation within the bounds of any reasonable cost. These conclusions are sustained by a mass of testimony and expert opinion. It is probably true that for some years to come greater use will be made of the canal for transportation by the United States than by Canada, but we must remember that Canada has a vast and fertile region yet but partially developed. Its use will increase much more rapidly than that of the United States, and while I believe the United States alone could afford to build the canal—if it paid the entire cost—I firmly believe it is in the interest of Canada and the United States to join in the construction of this canal and water power. It is no objection that part of it is upon foreign territory. By treaties we have a right to the navigation of the St. Lawrence River and boundary waters. The two countries have used these boundary waters, have built canals at the Soo, have improved the rivers; Canada has built the Welland Canal and has permitted the use of it by United States shipping interests upon equal terms, and we are equally interested in the improvement and development of the lakes, rivers, and canals. For more than a hundred years the two countries have lived at peace, have grown and developed side by side; we are two great peoples speaking the same language, having the same hopes and aspirations, and governed by similar laws. I believe the next few years will see these two countries further cemented in interest by the construction and operation of this great waterway, which will further open up the interior of the continent to the markets of the world.

The Panama Canal was conceived and constructed during the administrations of President Roosevelt and President Taft. Its completion was an event in the history of the Western Hemisphere, a monument to the memory of Roosevelt, and a great accomplishment for the Nation. I can say to you that President Harding proposes to make the construction of this St. Lawrence project one of the great accomplishments of his administration. He has recommended it in two messages to Congress, in his speech to the Agricultural Conference, and he will now do all in his power to further an agreement between the United States and Canada for the construction of the canal and water power. He realizes the necessity for the extension of our water transportation facilities. To-day transportation is the foundation of all national prosperity. The farmer, the merchant, the manufacturer can not transport their products to market or receive the daily necessities of life without adequate systems of transportation, and the President believes that a national waterway to the very center of population and production in the United States will be a great factor in the growth and development and prosperity of the Nation.

MISSOURI RIVER BRIDGE.

Mr. REED of Missouri. Out of order, I ask unanimous consent to introduce a bill for reference to the Committee on Commerce.

There being no objection, the bill (S. 3938) granting the consent of Congress to the county courts of Lafayette and Ray Counties, in the State of Missouri, to construct a bridge across the Missouri River, was read twice by its title and referred to the Committee on Commerce.

Mr. SHEPPARD. Mr. President, the bill introduced by the Senator from Missouri is a bridge bill in the ordinary form. The War Department has made a favorable report on a similar bill in the House, and by authority of the Commerce Committee I ask permission to report back the bill favorably for enactment by the Senate.

Mr. CURTIS. Was authority given by the committee to report back the bill?

Mr. SHEPPARD. It was.

The PRESIDENT pro tempore. Without objection, the report will be received.

Mr. REED of Missouri. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the county courts of Lafayette and Ray Counties, in the State of Missouri, to construct, maintain, and operate a bridge and approaches thereto across the Missouri River at a point suitable to the interests of navigation at or near the city of Lexington, in the county of Lafayette and State of Missouri, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COMPENSATION OF WORLD WAR VETERANS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. BURSUM. Mr. President, I have made some changes in the amendment which I introduced, and I think it ought to be reprinted for the information of the Senate. I ask unanimous consent that the amendment may be ordered reprinted, so that it will be available to-morrow.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 4 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Thursday, August 24, 1922, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate August 23, 1922.

APPOINTMENTS IN THE CONSULAR SERVICE.

CONSUL GENERAL OF CLASS 3.

Ralph J. Totten, of Tennessee, now a consul general at large, to be a consul general of class 3.

CONSUL GENERAL AT LARGE.

Edward J. Norton, of Tennessee, now a consul of class 3, to be a consul general at large.

APPRAISER OF MERCHANDISE.

Sophie McCord, of St. Louis, Mo., to be appraiser of merchandise in customs collection district No. 45, with headquarters at St. Louis, Mo., in place of Frank H. Sosey.

RECEIVER OF PUBLIC MONEYS.

Charles S. Reed, of South Dakota, to be receiver of public moneys at Rapid City, S. Dak., vice William H. Tompkins, resigned, effective October 1, 1922.

UNITED STATES PUBLIC HEALTH SERVICE.

Dr. Henry A. Rasmussen to be assistant surgeon in the United States Public Health Service, to take effect from date of oath. This doctor has passed the examination required by law.

COAST AND GEODETIC SURVEY.

James Donald Crichton, of New York, to be hydrographic and geodetic engineer, with relative rank of lieutenant in the Navy, in the Coast and Geodetic Survey, by promotion from junior hydrographic and geodetic engineer, with relative rank of lieutenant (junior grade) in the Navy, vice C. H. Ober, resigned.

PROMOTIONS IN THE REGULAR ARMY.

MEDICAL CORPS.

First Lieut. George Francis Cooper to be captain in the Medical Corps from August 12, 1922.

CHAPLAIN.

Chaplain George Foreman Rixey to be chaplain, with the rank of captain, from August 16, 1922.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY.

CORPS OF ENGINEERS.

Second Lieut. Paschal Neilson Strong, jr., Air Service, with rank from June 13, 1922.

SIGNAL CORPS.

Second Lieut. Gilbert Hayden, Air Service, with rank from June 14, 1922.

FIELD ARTILLERY.

Second Lieut. Frederick Stevens Lee, Infantry, with rank from June 13, 1922.

COAST ARTILLERY CORPS.

Second Lieut. Richard Wilson Johnson, Air Service, with rank from June 13, 1922.

INFANTRY.

Second Lieut. Kenneth Francis Pughe, Air Service, with rank from June 13, 1922.

Second Lieut. Frederick William Hein, Air Service, with rank from June 13, 1922.

AIR SERVICE.

Maj. Karl Hartman Gorman, Cavalry, with rank from November 14, 1920.

First Lieut. James Edmund Parker, Field Artillery, with rank from November 3, 1919.

Second Lieut. William Beck Goddard, 3d, Coast Artillery Corps, with rank from June 14, 1922.

PROMOTIONS IN THE NAVY.

The following-named captains to be rear admirals in the Navy from the 3d day of June, 1922:

George R. Marvell.

Henry J. Ziegemeier.

Commander William N. Jeffers to be a captain in the Navy from the 11th day of February, 1922.

The following-named commanders to be captains in the Navy from the 3d day of June 1922:

Harry K. Cage.
Frank D. Berrien.
Hugo W. Osterhaus.
Richard D. White.

Commander Fletcher L. Sheffield, an additional number in grade, to be a captain in the Navy from the 3d day of June, 1922.

Commander William K. Riddle to be a captain in the Navy from the 12th day of July, 1922.

The following-named lieutenant commanders to be commanders in the Navy from the 3d day of June, 1922:

Harold M. Bemis.

Ernest D. McWhorter.

The following-named lieutenants (junior grade) to be lieutenants in the Navy from the 31st day of December, 1921:

Orie H. Small.

Homer E. Curlee.

The following-named lieutenants (junior grade) to be lieutenants in the Navy from the 1st day of January, 1922:

Oliver H. Briggs.

Charles A. Goebel.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 31st day of December, 1921:

Charles H. Gordon.

James A. Martin.

Robert S. Savin.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 7th day of June, 1922:

Henry S. Nielson.
Karl J. Christoph.
Jack E. Hurff.
Richard R. Hartung.
Harold F. Fick.
John E. Gingrich.
Augustus H. Donaldson.
Willard M. Downes.

The following-named passed assistant surgeons to be surgeons in the Navy with the rank of lieutenant commander from the 3d day of June, 1922.

William W. Wickersham.
Joel T. Boone.
William A. Stoops.
Henry M. Stenhouse.
Henry McDonald.

The following-named assistant paymasters to be passed assistant paymasters in the Navy with the rank of lieutenant from the 3d day of June, 1922:

William J. Dean.

Isaac W. Thompson.

Civil Engineer Greer A. Duncan to be a civil engineer in the Navy with the rank of commander from the 2d day of December, 1921.

The following-named gunners to be chief gunners in the Navy, to rank with but after ensign, from the 27th day of March, 1922:

John S. Conover.
Joseph M. Gately.
Alexander Anderson.
Joseph H. Gerrior.
Frederick Clifford.

POSTMASTERS.

ALABAMA.

Annie J. McArthur to be postmaster at Riderwood, Ala., in place of A. J. McArthur. Office became third class January 1, 1921.

CALIFORNIA.

Charles A. French to be postmaster at Brentwood, Calif., in place of C. E. Berry, resigned.

Martha Holway to be postmaster at Byron, Calif., in place of Alex. Chaim, resigned.

Wooster B. Cartmill to be postmaster at Tulare, Calif., in place of J. J. Mitchell, resigned.

Alfred A. True to be postmaster at Barstow, Calif., in place of A. L. Doran, resigned.

COLORADO.

Talitha B. Utterback to be postmaster at Mesa, Colo., in place of S. H. Moss. Office became third class April 1, 1922.

CONNECTICUT.

Helen S. Ladd to be postmaster at Bloomfield, Conn. Office became presidential January 1, 1921.

FLORIDA.

Benjamin F. Hargis to be postmaster at Umatilla, Fla., in place of F. H. Price. Incumbent's commission expired April 6, 1922.

ILLINOIS.

Charles D. Ragsdale to be postmaster at De Soto, Ill. Office became presidential April 1, 1922.

Arvil C. Allen to be postmaster at Elkhart, Ill. Office became presidential January 1, 1922.

Otto Rexses to be postmaster at Des Plaines, Ill., in place of John Kray. Incumbent's commission expired July 3, 1920.

Chris C. Wendt to be postmaster at Dundee, Ill., in place of W. C. F. Albrecht. Incumbent's commission expired June 23, 1920.

Laurence R. Sutter to be postmaster at Hammond, Ill., in place of W. L. South, resigned.

Thomas W. Collins to be postmaster at Knoxville, Ill., in place of C. W. Brewer. Incumbent's commission expired February 4, 1922.

John O. Biggs to be postmaster at Westfield, Ill., in place of M. L. Briscoe, removed.

INDIANA.

Albert Neuenschwander to be postmaster at Grabill, Ind., in place of E. C. Martz. Office became third class January 1, 1921.

Harry W. Baals to be postmaster at Fort Wayne, Ind., in place of E. C. Miller, resigned.

Haskell Lett to be postmaster at Seymour, Ind., in place of Allen Swope, removed.

IOWA.

Lyman H. Henry to be postmaster at Charles City, Iowa, in place of T. M. Fitzgerald, resigned.

KANSAS.

William Dancaster to be postmaster at Richmond, Kans. Office became presidential October 1, 1920.

Lot S. Hadley to be postmaster at Glen Elder, Kans., in place of O. A. Granger. Incumbent's commission expired April 6, 1922.

Judson M. Cramer to be postmaster at Gardner, Kans., in place of L. E. Perkins, resigned.

Henry N. Jessen to be postmaster at White Water, Kans., in place of H. O. Mellor, appointee declined.

KENTUCKY.

Robert L. Jenkins to be postmaster at Upton, Ky., in place of B. F. Rider. Office became third class July 1, 1920.

Lenard W. Thrasher to be postmaster at Burkesville, Ky., in place of C. W. Alexander, jr., resigned.

Walter C. Swift to be postmaster at Morehead, Ky., in place of H. H. Candill. Incumbent's commission expired March 8, 1922.

MARYLAND.

Harry S. Clements to be postmaster at Oella, Md. Office became presidential April 1, 1922.

Charles J. Benedict to be postmaster at Silver Spring, Md., in place of D. E. Clark, removed.

MASSACHUSETTS.

Albert Holway to be postmaster at Bournedale, Mass. Office became presidential January 1, 1922.

MICHIGAN.

Henry Bristow to be postmaster at Flat Rock, Mich. Office became presidential April 1, 1922.

John P. Robertson to be postmaster at Metamora, Mich. Office became presidential January 1, 1921.

MINNESOTA.

Nels E. Nelson to be postmaster at Fergus Falls, Minn., in place of H. M. Wheelock. Incumbent's commission expires September 13, 1922.

Edwin W. Bergman to be postmaster at McGrath, Minn., in place of E. W. Bergman. Office became third class April 1, 1922.

Bertha Finch to be postmaster at Butterfield, Minn., in place of A. M. Anderson, resigned.

MISSISSIPPI.

Arthur L. Stanford to be postmaster at Ripley, Miss., in place of J. A. Smallwood, resigned.

Annie B. Sherman to be postmaster at Brookhaven, Miss., in place of W. P. Cassedy. Incumbent's commission expired January 24, 1922.

Thomas P. Barr to be postmaster at Jackson, Miss., in place of T. P. Barr. Incumbent's commission expired January 24, 1922.

MISSOURI.

William H. Yarnell to be postmaster at Exeter, Mo. Office became presidential July 1, 1920.

William F. Clardy to be postmaster at Ethel, Mo., in place of A. L. Hogenson; appointee failed to qualify.

NEBRASKA.

Minnie C. Burch to be postmaster at Bellwood, Nebr., in place of Henrietta Andrews, appointee declined.

NEW HAMPSHIRE.

Morris M. Cheney to be postmaster at Bennington, N. H. Office became presidential January 1, 1921.

Josiah K. Rand to be postmaster at Fitzwilliam, N. H. Office became presidential July 1, 1922.

George D. Roberts to be postmaster at Jefferson, N. H. Office became presidential January 1, 1921.

NEW YORK.

Le Roy Krom to be postmaster at High Falls, N. Y. Office became presidential January 1, 1921.

John K. Lathrop to be postmaster at Minnewaska, N. Y. Office became presidential January 1, 1921.

Fred Tears to be postmaster at Starlake, N. Y. Office became presidential April 1, 1922.

Adolph Frees to be postmaster at Thornwood, N. Y. Office became presidential October 1, 1920.

Mildred H. Smith to be postmaster at Lawrence, N. Y., in place of F. S. Duncan, declined.

Ross K. Pierce to be postmaster at Dolgeville, N. Y., in place of B. E. Ogden, resigned.

Edmund E. Westerman to be postmaster at Pittsford, N. Y., in place of W. J. Powers, resigned.

NORTH CAROLINA.

Nollie M. Patton to be postmaster at Morganton, N. C., in place of Hamilton Erwin. Incumbent's commission expires September 5, 1922.

William B. Duncan to be postmaster at Raleigh, N. C., in place of B. M. Gatling, removed.

Ross Matheson to be postmaster at Taylorsville, N. C., in place of J. B. Robinette. Incumbent's commission expired June 13, 1922.

OHIO.

Arch D. Spellman to be postmaster at Williamsfield, Ohio, in place of A. D. Spellman. Office became third class July 1, 1922.

J. Schuyler Hossler to be postmaster at Bloomville, Ohio, in place of C. A. Weidaw. Incumbent's commission expired January 31, 1922.

OKLAHOMA.

Charles A. Smith to be postmaster at Healdton, Okla., in place of R. A. Chapman, resigned.

Jonas R. Cartwright to be postmaster at Shattuck, Okla., in place of A. A. Puckett, declined.

John H. Hammer to be postmaster at Eufaula, Okla., in place of J. L. Homan, jr., resigned.

PENNSYLVANIA.

Lawrence G. Weller to be postmaster at Bechtelsville, Pa. Office became presidential April 1, 1922.

Mary M. Arrison to be postmaster at Mount Morris, Pa. Office became presidential April 1, 1921.

Elma C. Dryden to be postmaster at New Galilee, Pa. Office became presidential July 1, 1920.

Henry Daugherty to be postmaster at Red Hill, Pa. Office became presidential April 1, 1921.

William J. Wilson to be postmaster at Bentleyville, Pa., in place of W. H. Hartman, resigned.

James S. Crawford to be postmaster at Freeland, Pa., in place of E. J. Doggett. Incumbent's commission expired December 17, 1919.

James S. Fennell to be postmaster at Salina, Pa., in place of John Itzel, declined.

Richard W. Edmunds to be postmaster at Braddock, Pa., in place of W. J. McBeth, removed.

Everett E. McBride to be postmaster at Dravosburg, Pa., in place of B. M. McCauley, resigned.

Frank H. McCully to be postmaster at Osceola, Pa., in place of A. L. Edwards, appointee declined.

Stephen J. Downs to be postmaster at Union City, Pa., in place of S. J. Downs. Incumbent's commission expired July 24, 1920.

SOUTH CAROLINA.

Maebelle Orvin to be postmaster at St. Stephen, S. C., in place of A. V. Locklear. Office became third class July 1, 1921.

TENNESSEE.

D. Garfield Chambers to be postmaster at Huntsville, Tenn. Office became presidential October 1, 1921.

McHenry Jackson to be postmaster at Russellville, Tenn. Office became presidential April 1, 1922.

Edward C. Roberts to be postmaster at Harriman, Tenn., in place of E. T. St. John. Incumbent's commission expired February 4, 1922.

TEXAS.

Joe R. Taylor to be postmaster at Rhome, Tex., in place of C. E. Shaw. Office became third class January 1, 1921.

Edwin C. Hill to be postmaster at El Campo, Tex., in place of E. L. Correll. Incumbent's commission expired January 24, 1922.

Will K. Davis to be postmaster at Gonzales, Tex., in place of D. U. Ramsay. Incumbent's commission expired July 21, 1921.

James W. McBee to be postmaster at Lavernia, Tex., in place of C. A. Tiner, resigned.

VIRGINIA.

Denton T. Watthall to be postmaster at Alberta, Va. Office became presidential July 1, 1921.

Robert M. Bradshaw to be postmaster at Rice, Va. Office became presidential July 1, 1921.

Abram K. Sampson to be postmaster at Burkeville, Va., in place of J. S. Agnew, resigned.

Rankin L. Hervey to be postmaster at Chase City, Va., in place of W. A. Broocks. Incumbent's commission expired July 21, 1921.

Susie F. Jarratt to be postmaster at Jarratt, Va., in place of G. G. Browder. Incumbent's commission expired January 24, 1922.

WEST VIRGINIA.

Ola B. Long to be postmaster at Mill Creek, W. Va. Office became presidential January 1, 1921.

John W. Fortney to be postmaster at Lumberport, W. Va., in place of E. P. Boggess, resigned.

WISCONSIN.

John M. Albers to be postmaster at Thiensville, Wis., in place of Harry Mollier. Office became third class July 1, 1920.

WYOMING.

Hedwig C. Hurtt to be postmaster at Sundance, Wyo., in place of H. M. Brown. Incumbent's commission expired June 3, 1922.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 23, 1922.

CONSULAR SERVICE.

CONSUL OF CLASS 3.

Mahlon Fay Perkins.

CONSULS OF CLASS 4.

James B. Young.
Arthur C. Frost.
Edward A. Dow.
John R. Putnam.
Harry Campbell.

CONSULS OF CLASS 5.

James B. Stewart.
Carl R. Loop.
George C. Hanson.
Lucien Memminger.
Clement S. Edwards.
Donald D. Shepard.
Lowell C. Pinkerton.
Harold B. Quarton.
Felix Cole.

CONSULS OF CLASS 6.

Parker W. Buhrman.
Dayle C. McDonough.
John R. Bradley.
Paul C. Squire.
H. Merle Cochran.
Joseph F. McGurk.
Charles J. Pisar.
George A. Makinson.
Renwick S. McNiece.
John D. Johnson.

POSTMASTERS.

COLORADO.

Henry R. Pilati, Aguilar.
Alma Geist, Caddoa.
James C. Wilson, Yampa.

ILLINOIS.

Fanny E. Roles, Fisher.

IOWA.

Ralph M. Tyler, Ladora.

MISSOURI.

Emmet L. Gaffney, Craig.
Addie Erwin, Thayer.

NEW YORK.

Arthur N. Fero, Esperance.
George E. Hoare, Watkins.

NORTH CAROLINA.

John L. Vest, Rosemary.
Charles A. Bland, Wadesboro.

OKLAHOMA.

Everette L. Richison, Bokoshe.
William W. Wagner, Orlando.
Charles F. Rice, Texola.

PENNSYLVANIA.

Margaret E. Warnock, Darlington.
Mark M. Merritt, Granville Summit.
George W. Murphy, Hawley.
Ralph P. Holloway, Pottstown.
Milton W. Lowry, Scranton.

TEXAS.

Samuel G. Hampton, Goree.
Willie L. Gottschalk, Gulf.
Albert T. Cook, Manor.
Hugh G. Koether, Shiner.
Charles H. Branton, Tuscola.

VIRGINIA.

Grace C. Collins, Drakes Branch.
Della L. Fuller, Honaker.
John W. Ketron, jr., Lebanon.
Elihu T. Kiser, Roaringfork.
Charles E. Fulgham, Windsor.

WITHDRAWALS.

Executive nominations withdrawn from the Senate August 23, 1922.

POSTMASTERS.

MASSACHUSETTS.

Albert H. Holoway to be postmaster at Bournedale, in the State of Massachusetts.

WYOMING.

James C. Hurtt to be postmaster at Sundance, in the State of Wyoming.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *August 23, 1922.*

The House met at 12 o'clock noon.

The chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father in heaven, we trust that all hearts unite in the spirit of devout adoration in saying: "Holy, holy, holy, Lord God Almighty, heaven and earth are full of Thy glory; glory be to Thy name, O Lord most high." Thy mercy gathers all mankind in its embrace and shows us God is love. As we return to our daily tasks we pause in memory of him who has folded his tent and left. This place is made sacred by his devout step, his reverent approach, and his lofty appeals to the God of our Nation. A message for all men glowed on the altar of his great heart, and Thou didst hear it. The light of destiny was set in the lines of his blind face and Thou didst put them there. In the shades of his earthly night the halo of Thy glory rested on his white brow. O bless unto this Assembly the faith, resignation, and patience of this servant of Thine. Stricken with blindness, burdened with suffering, smitten with affliction, staggering in the darkness, this friend of man, lover of his country, and apostle of God, is now glorified in the unmixed light of eternal day. We thank Thee, blessed Lord, for the life, the character, and the victory. We pray in the name of Him who said this mortal shall put on immortality. Amen.

The Journal of the proceedings of yesterday was read and approved.

DR. HENRY N. COUDEN.

Mr. MANN. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for two minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, the chaplain in his prayer has already referred in beautiful language to the passing of Doctor Couden, who for nearly 28 years was connected with the House as its chaplain and its chaplain emeritus. A veteran of the Civil War, he came to the House as chaplain and endeared himself to the heart of every Member of the House who served under his administration, and to the country as well. It seems to me that it would be appropriate that the House should be represented at his funeral exercises, and I therefore ask unanimous consent that the Speaker designate a committee of the House to attend the funeral services of Doctor Couden in charge of the Sergeant at Arms.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ENROLLED BILL SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 2694. An act for the relief of Seth J. Harris, Jimmie Lou Martin, Mary Holloman, and William Henry Coleman.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message in writing from the President of the United States, by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills and joint resolutions of the following titles:

On June 17, 1922:

H. R. 7052. An act for the relief of G. C. Caldwell; and

H. R. 11407. An act to amend an act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920.

On June 19, 1922:

H. R. 9859. An act making appropriations for the Post Office Department for the fiscal year ending June 30, 1923, and for other purposes.

On June 21, 1922:

H. J. Res. 127. Joint resolution to reerect the statue of Abraham Lincoln upon its original site;

H. R. 8785. An act granting the consent of Congress to the Mobridge Bridge Co., of Mobridge, S. Dak., to construct a pontoon bridge across the Missouri River;

H. R. 10330. An act to extend the time for the construction of a bridge across Lake St. Croix at or near the city of Prescott, in the State of Wisconsin;

H. R. 11265. An act to authorize the maintenance of a bridge constructed across the Pend Oreille River at the town of Usk in the State of Washington;

H. R. 11345. An act authorizing the construction of a bridge across the Allegheny River at or near Freeport, Pa.;

H. R. 11646. An act authorizing the construction of a bridge across the Ohio River near Steubenville, Ohio; and

H. R. 11827. An act granting the consent of Congress to the county courts of Howard and Saline Counties, in the State of Missouri, to construct a bridge across the Missouri River.

On June 22, 1922:

H. R. 6313. An act authorizing the Secretary of Commerce to grant a right of way for a public highway to the county of Skagit, Wash.

On June 26, 1922:

H. J. Res. 313. Joint resolution providing for the disposal of articles produced by patients in the United States Veterans' Bureau.

On June 29, 1922:

H. R. 10101. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District

for the fiscal year ending June 30, 1923, and for other purposes;

H. R. 11393. An act to abolish the office of Superintendent of the Library Building and Grounds and to transfer the duties thereof to the Architect of the Capitol and the Librarian of Congress; and

H. R. 12073. An act to provide additional compensation for certain civilian employees of the Governments of the United States and the District of Columbia during the fiscal year ending June 30, 1923.

On June 30, 1922:

H. J. Res. 344. Joint resolution to authorize the Secretary of the Treasury to detail four persons paid from the appropriation for the collection of customs; and

H. R. 10871. An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1923, and for other purposes.

On July 1, 1922:

H. R. 9527. An act to amend section 5136, Revised Statutes of the United States, relating to corporate powers of associations, so as to provide succession thereof for a period of 99 years or until dissolved, and to apply said section as so amended to all national banking associations;

H. J. Res. 297. Joint resolution requesting the President of the United States to call a conference of maritime nations with a view to the adoption of effective means for the prevention of pollution of navigable waters by oil-burning and oil-carrying steamers by the dumping into such waters of oil waste, fuel oil, oil sludge, oil slop, tar residue, and water ballast;

H. R. 11228. An act making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1923, and for other purposes;

H. R. 12090. An act making appropriations to supply deficiencies in appropriations for the fiscal year ending June 30, 1922, and prior fiscal years, supplemental appropriations for the fiscal year ending June 30, 1923, and for other purposes;

H. J. Res. 337. Joint resolution granting consent of Congress and authority to the Port of New York Authority to execute the comprehensive plan approved by the States of New York and New Jersey by chapter 43, Laws of New York, 1922, and chapter 9, Laws of New Jersey, 1922;

H. R. 6110. An act amending section 97 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911;

H. R. 10770. An act to legalize a bridge across the south arm of Pokegama Lake, in Itasca County, State of Minnesota;

H. R. 11128. An act to authorize the construction of a bridge over the Rio Grande between the cities of Del Rio, Tex., and Las Vacas, Mexico;

H. R. 11214. An act authorizing the President to scrap certain vessels in conformity with the provisions of the treaty limiting naval armament, and for other purposes;

H. R. 11244. An act authorizing the construction of a bridge across White River in the State of Arkansas;

H. R. 11298. An act amending existing law which authorizes the construction of a public building at Paris, Tex., so as to authorize and empower the Secretary of the Treasury to acquire a new site for same by exchanging therefor land and property now owned by the United States Government in said city; and to authorize the erection on said new site, when acquired, of a public building suitable for post-office purposes, and for other purposes;

H. R. 11450. An act to provide for the printing and distribution of the Supreme Court Reports, and amending sections 225, 226, 227, and 228 of the Judicial Code;

H. R. 11588. An act to amend an act entitled "An act to authorize the Secretary of the Treasury to provide hospital and sanatorium facilities for discharged sick and disabled soldiers, sailors, and marines";

H. R. 11634. An act granting the consent of Congress to the county of Norman and the town and village of Halstad, in said county, in the State of Minnesota, and the county of Traill and the town of Herberg, in said county, in the State of North Dakota, to construct a bridge across the Red River of the North on the boundary line between said States;

H. R. 12092. An act granting the consent of Congress to the Louisiana Development Co. to construct a bridge across the Red River at or near Grand Ecore, La.;

H. R. 12120. An act granting the consent of Congress to the county court of Lafayette County, in the State of Missouri, to construct a bridge across the Missouri River; and

H. R. 12121. An act granting the consent of Congress to the county court of Saline County, in the State of Missouri, to construct a bridge across the Missouri River.

On July 8, 1922:

H. J. Res. 353. Joint resolution authorizing the Secretary of War to loan certain tents, cots, chairs, etc., to the executive committee of the Louisiana Department of the American Legion for use at the national convention of the American Legion to be held at New Orleans, La., in October, 1922; and

H. R. 8767. An act for the relief of F. E. Taylor and B. C. Broom.

CALENDAR WEDNESDAY.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that the business of Calendar Wednesday to-day be dispensed with.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that the business in order on Calendar Wednesday to-day be dispensed with. Is there objection?

Mr. GARRETT of Tennessee. Reserving the right to object, may I ask the gentleman what is proposed to be taken up?

Mr. MONDELL. We expect to take up for consideration legislation along the lines suggested by the President.

Mr. GARRETT of Tennessee. May I ask the gentleman if he has had a report from the Rules Committee within the last few minutes?

Mr. MONDELL. I have not had a report from the Rules Committee.

The SPEAKER. Is there objection?

Mr. GARNER. Mr. Speaker, let us have some definite information as to the legislation that they intend to consider.

Mr. MONDELL. We intend to consider legislation recommended by the President—providing for the appointment of a fact-finding coal commission.

Mr. GARNER. Well, that is something definite. The President made three different and distinct suggestions, and I merely wanted to know which one you wanted to consider.

Mr. GARRETT of Tennessee. Mr. Speaker, I have just come from the Rules Committee. I have an idea that the gentleman from Wyoming has not had an opportunity to confer with his side about the matter. I trust that I am not assuming any responsibility, but I know the fact that the committee is not in a position to present a rule at this moment.

Mr. MONDELL. Mr. Speaker, we are now prepared to take up Calendar Wednesday business. I withdraw my request.

Mr. STAFFORD. Mr. Speaker, I make the point that no quorum is present.

The SPEAKER. The gentleman from Wisconsin makes the point of order that there is no quorum present. Evidently there is no quorum present.

Mr. MONDELL. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The Clerk called the roll, and the following Members failed to answer to their names:

Ackerman	Fess	Lineberger	Reber
Anderson	Fields	Linthicum	Reed, N. Y.
Andrew, Mass.	Fish	Little	Riddick
Arentz	Frear	Logan	Riordan
Atkeson	Free	Luce	Robertson
Barbour	Fulmer	Lyon	Rucker
Barkley	Funk	McArthur	Sabath
Beck	Gahn	McCormick	Scott, Mich.
Beedy	Gallivan	McLaughlin, Pa.	Sears
Bell	Gensman	McPherson	Shelton
Blakeney	Goldsborough	McSwain	Sinclair
Blanton	Gould	Maloney	Sisson
Brand	Griffin	Martin	Smithwick
Brown, Tenn.	Harrison	Mead	Stedman
Browne, Wis.	Hawes	Merritt	Steenerson
Burroughs	Herrick	Michaelson	Stiness
Burtness	Hogan	Miller	Stoll
Burton	Hukriede	Montague	Sullivan
Byrns, Tenn.	Husted	Montoya	Summers, Wash.
Cantrill	Hutchinson	Morin	Sweet
Carter	Jacoway	Mott	Swing
Classon	Jefferis, Nebr.	Nelson, Me.	Tague
Cockran	Johnson, Ky.	Nelson, A. P.	Taylor, Ark.
Codd	Johnson, Miss.	Nelson, J. M.	Temple
Collins	Johnson, S. Dak.	Newton, Mo.	Thompson
Connally, Tex.	Jones, Pa.	Nolan	Tilson
Connell	Kahn	O'Brien	Voigt
Copley	Keller	Ogden	Volk
Crago	Kelley, Mich.	Oldfield	Ward, N. Y.
Cramton	Kiess	Olpp	Webster
Crowther	Kitchin	Overstreet	White, Me.
Deal	Kleczka	Patterson, N. J.	Williamson
Dominick	Knight	Radcliffe	Wise
Dunbar	Kunz	Rainey, Ala.	Woodruff
Dunn	Langley	Rainey, Ill.	Woods, Va.
Dupré	Larsen, Ga.	Raker	Yates
Fairchild	Larson, Minn.	Ramseyer	

The SPEAKER. On this vote 280 Members have answered to their names. A quorum is present.

Mr. MONDELL. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors. To-day is Calendar Wednesday, and the Clerk will call the committees.

The Clerk proceeded with the call of the committees.

UNITED STATES COAL COMMISSION.

Mr. WINSLOW (when the Committee on Interstate and Foreign Commerce was called). Mr. Speaker, I desire to call up the bill H. R. 12377.

The SPEAKER. The gentleman from Massachusetts calls up a bill which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 12377) to establish a commission to be known as the United States Coal Commission for the purpose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes.

The SPEAKER. This bill is on the Union Calendar, and the House automatically resolves itself into the Committee of the Whole House on the state of the Union.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 12377, with Mr. CAMPBELL of Kansas in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 12377, which the Clerk will report.

The title of the bill was read by the Clerk.

Mr. WINSLOW. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

Mr. GARRETT of Tennessee. Mr. Chairman, reserving the right to object, may I ask the gentleman what his disposition will be touching the matter of debate upon the bill?

Mr. WINSLOW. The rule, as I understand it, allows an hour on each side, if there are two sides. It had been my purpose, if the gentleman from Tennessee had not made the inquiry, to undertake to find out what the disposition of the Members is in regard to a negative side. If there is one, we will divide the time accordingly. If otherwise, between the two sides of the House.

Mr. GARRETT of Tennessee. If I understand the situation correctly, this bill will be subject, in the way it is being considered now, to limited amendment. The gentleman from Indiana [Mr. BLAND] I think will have some important amendments to present. I do not know what his feeling is upon this bill if the amendments that are to be presented by him are not adopted. It occurs to me——

Mr. BLAND of Indiana. If the gentleman from Massachusetts will permit, I understand the gentleman to say that under the present procedure your motion to amend by substituting all after the enacting clause would not be in order?

Mr. GARRETT of Tennessee. No; I did not state that. But the amendments that can be offered to separate sections of the bill are more limited by reason of the condition in which the bill comes before the House. The original bill was stricken out, and so there is just one amendment, which of course will be offered, and then there can only be one amendment to the amendment offered under the general rules of the House.

Mr. SANDERS of Indiana. That is, pending at one time?

Mr. GARRETT of Tennessee. Pending at one time. And, of course, it lies within the power of gentlemen to move to close debate at any time. In other words, you have not the power of general amendment that you ordinarily have under the rules of the House.

Mr. BLAND of Indiana. I do not know of any remedy to suggest.

Mr. GARRETT of Tennessee. I will say to the gentleman from Massachusetts [Mr. WINSLOW] that I am opposed to the bill.

Mr. WINSLOW. Does the gentleman desire to take control of one hour?

Mr. GARRETT of Tennessee. Yes; I will take control of the time in opposition.

The CHAIRMAN. The gentleman from Massachusetts [Mr. WINSLOW] asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

Mr. WINGO. Mr. Chairman, this is an important bill, just reported, and I think it ought to go into the RECORD. I object.

The CHAIRMAN. The gentleman from Arkansas objects, and the Clerk will read the bill.

The Clerk read as follows:

Be it enacted, etc., That for the purpose of securing information in connection with questions relative to interstate commerce in coal and other questions and problems arising out of and connected with the coal industry, there is hereby established a governmental agency to be known as the United States Coal Commission, to be composed of not more than nine members to be appointed by the President of the United States. No Member of the United States Senate or of the House of Representatives or person who has any interest in or is connected with the coal industry shall be eligible to serve on said commission. Each member of said commission shall receive a salary of $10,000 a year. Said commission shall cease to exist one year after the taking effect of this act.

It shall be the duty of said commission to investigate and to ascertain facts in the coal industry as to ownership of coal mines, prices of coal, wages, wage contracts, conditions of employment, distribution, waste of coal, profits realized by owners or operators of coal mines or by other persons or corporations having to do with the production, distribution, or sale of coal, and any other material facts in connection with the coal industry generally and the organizations and persons connected with it. Said commission shall report to the President and to Congress its findings of fact and such recommendations as to methods and measures as in its judgment will promote continuity of production and efficiency in mining and distribution and maintain the uninterrupted movement of coal in interstate commerce and safeguard the interests of the workers, operators, and the general public. Said commission shall submit its first report not later than the 1st day of January, 1923.

The said commission shall have power to administer oaths, subpœna and examine witnesses, and to compel the production of any books, paper, document, or other evidence, and to take the deposition of any person before any person having power to administer oaths. In the case of a deposition the testimony shall be reduced to writing by the person taking the deposition or under his direction and be subscribed to by the deponent. The same fees and mileage as are paid in the courts of the United States shall be paid in the case of witnesses subpœnaed or depositions taken under this act.

No person shall be excused from so attending and testifying and deposing, or from producing any book, paper, document, or other evidence on the ground that the testimony or evidence, documentary or otherwise, may tend to incriminate him or subject him to a penalty or forfeiture; but no testimony, deposition, or evidence taken under this act shall be elsewhere used in any prosecution of any person who has so testified, deposed, or produced any such book, document, or other evidence. But no person shall be exempt from prosecution and punishment for perjury committed in so testifying, and this act shall not be construed as exempting any person from attending and testifying elsewhere or as denying the right to compel the production of any book, document, or other evidence elsewhere in any action or prosecution.

Any member of the commission or agent of the commission duly authorized in writing shall at all reasonable times, for the purposes of examination, have access to and the right to copy any book, account, record, document, correspondence, or paper relating to any matter which the commission is authorized by this act to investigate.

Any person who shall willfully refuse to attend and testify or depose, or to produce or permit access to any book, account, record, document, correspondence, or paper, as herein provided for, or who shall testify or depose falsely in any material particular, shall, upon conviction, be punished by a fine of not more than $5,000 or by imprisonment for not more than one year, or by both such fine and imprisonment.

The commission may appoint, remove, and fix the compensation of such employees, make such expenditures, and make such rules and regulations as may be necessary for the efficient administration of this act. The necessary expenses of the commission shall be allowed and paid upon the presentation of itemized vouchers therefor, approved by the chairman of the commission.

There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $500,000, or so much thereof as may be necessary, to be available until expended, for carrying out the provisions of this act.

Also the following committee amendment was read:

Strike out all after the enacting clause and insert:

"That for the purpose of securing information in connection with questions relative to interstate commerce in coal and other questions and problems arising out of and connected with the coal industry, there is hereby established a governmental agency to be known as the United States Coal Commission, to be composed of not more than nine members to be appointed by the President of the United States, by and with the advice and consent of the Senate. No Member of the United States Senate or of the House of Representatives or person who has any interest in or is connected with the coal industry shall be eligible to serve on said commission. Said commission shall elect a chairman by majority vote of its members, shall maintain central offices in the District of Columbia, but may, whenever it deems it necessary, meet at such other places as it may determine. It shall have power to form itself into subdivisions for the purpose of hearing testimony and making investigations, but all reports to the Congress and to the President shall be made by majority action of said commission. A member of the commission may be removed by the President for neglect of duty or malfeasance in office, but for no other cause. Each member of said commission shall receive a salary of $10,000 a year. Any vacancy on the commission shall be filled in the same manner as the original appointment. Said commission shall cease to exist one year after the taking effect of this act.

"SEC. 2. That it shall be the duty of said commission to investigate and to ascertain facts in the coal industry as to ownership of coal mines, prices of coal, wages, wage contracts, conditions of employment, distribution, waste of coal, profits realized by owners or operators of coal mines or by other persons or corporations having to do with the production, distribution, or sale of coal, and any other material facts in connection with the coal industry generally and the organizations and persons connected with it. Said commission shall report to the President and to Congress its findings of fact and such recommendations as to methods and measures as in its judgment will promote continuity or production and efficiency in mining and distribution and maintain the uninterrupted movement of coal in interstate commerce and safeguard the interests of the workers, operators, and the consuming and general public. Said commission shall submit its first report not later than the 1st day of January, 1923.

"SEC. 3. That any member of said commission shall have power to administer oaths, to subpœna and examine witnesses, and to compel the production of any book, paper, document, or other evidence, from any place in the United States, at any designated place of hearing, and to take or authorize the taking of the deposition of any person before any person having power to administer oaths. In the case of a deposition the testimony shall be reduced to writing by the person taking the deposition or under his direction and be subscribed to by

the deponent. The same fees and mileage as are paid in the courts of the United States shall be paid in the case of witnesses subpœnaed or depositions taken under this act.

"SEC. 4. That no person shall be excused from so attending and testifying and deposing, or from producing any book, paper, document, or other evidence on the ground that the testimony or evidence, documentary or otherwise, may tend to incriminate him or subject him to a penalty or forfeiture; but no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may be compelled to testify or to produce evidence, documentary or otherwise, before said commission, or in obedience to its subpœna or the subpœna of either of them: *Provided*, That no person shall be exempt from prosecution and punishment for perjury committed in so testifying.

"SEC. 5. That in case of failure to comply with any subpœna, or in case of the contumacy of any witness appearing before the commission, the commission may invoke the aid of any United States district court. Such court may thereupon order the witness to comply with the requirements of such subpœna, or to give evidence touching the matter in question, as the case may be. Any failure to obey such order may be punished by such court as a contempt thereof.

"SEC. 6. That the commission and, when duly authorized in writing by the commission, any commissioner or agent of the commission shall at all reasonable times, for the purposes of examination, have access to and the right to copy any book, account, record, document, correspondence, or paper relating to any matter which the commission is authorized by this act to investigate.

"SEC. 7. That any person who shall willfully neglect or refuse to attend and testify or depose, or to produce or permit access to any book, account, record, document, correspondence, or paper, as herein provided for, shall be guilty of an offense and upon conviction thereof be punished by a fine of not more than $5,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

"SEC. 8. That every officer or employee of the United States whenever requested by the commission shall supply it with any data or information pertaining to any investigation by the commission which may be contained in the records of the office of such officer or employee.

"SEC. 9. That any officer or employee of the commission who shall make public any information obtained by the commission without its authority, unless directed by a court, shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both such fine and imprisonment, in the discretion of the court.

"SEC. 10. That the commission may appoint and remove such officers, employees, and agents; and make such expenditures for rent, printing, telegrams, telephone, law books, books of reference, periodicals, furniture, stationery, office equipment, and other supplies and expenses, including salaries, traveling expenses of its members, secretary, officers, employees, and agents, and witness fees, as are necessary for the efficient execution of the functions vested in the commission by this act and as may be provided for by Congress from time to time, and make such rules and regulations as may be necessary for the efficient administration of this act. All of the expenditures of the commission shall be allowed and paid upon the presentation of itemized vouchers therefor approved by the chairman of the commission.

"SEC. 11. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $500,000, or so much thereof as may be necessary, to be available until expended, for carrying out the provisions of this act."

The CHAIRMAN. The gentleman from Massachusetts [Mr. WINSLOW] is recognized for one hour.

Mr. WINSLOW. Mr. Chairman and gentlemen of the committee, the purpose of this bill is to give the President and the Congress of the United States, and so, by indirection, the people of this country, an opportunity to be satisfied, if they can be, as to the condition of the coal business, as a business, in all its ramifications—and you may make that term as elastic as you choose, and then feel that the bill is reported to cover all you would have it cover.

We have had a lot of trouble in our coal situation in one form and another for a good many years. That trouble has become more and more acute as time has gone on, until now it would seem that the public is expressing its indignation over what it regards as an unusual method, to put it mildly, of doing business as manifested to them. The President of the United States evidently became imbued with the idea that the time had come when there should be a review of this industry from bottom to top, from one end to the other, the whole thing included, and accordingly he made an appeal to the Congress to afford him power to appoint a commission for certain definite purposes which he set forth in his message to the Congress on the 18th of August. The paragraphs in his message which bear on the subject have been printed in the report on this bill, which you can get. It will be a waste of time for me to read them. Boiled down, they suggest the creation of a commission to look into this coal question. And the result of it all has been that a bill has been drafted, perfected, and reported out, and so on, by the Committee on Interstate and Foreign Commerce, and it is now before us. Apparently there was not in the President's mind, nor has there been in the minds of the committee, any desire to try to run the coal business under the provisions of this legislation. It is purely a commission to find out real facts, and as many as possible, in order that everybody may know what there is to this much-discussed line of industry. So you must bear in mind that we are not gunning for any kind of legislation which might provide more or less for the management of the coal business or for the correction of any particular trouble or the establishment of any body to be permanent in its character, to go on with the coal question.

We are simply desirous of creating a commission to be appointed by the President which will put its nose into the business, and if it has the wit and ability to bring forth a report and suggestions, if they please, which will tell the world, particularly the President and the Congress, just what they think is the trouble with the thing and what the facts are.

Now, if you will accept that statement as being descriptive of the purposes of the bill, it seems as if by reading it you can get a very direct line on its provisions. The bill will come up for discussion under the five-minute debate, and if any question should come up at that time which may require explanation there will be some one at hand competent to explain.

I think the bill is so simple and straightforward that anybody can understand it. There are no jokers in it nor funny work of any kind. It is a plain proposition to appoint a commission of not to exceed nine men, who will be paid a definite rate of salary annually for work upon the commission, which must be terminated within a year; and then the bill goes on with the usual provisions for getting information and sets out the duties of the commission and prescribes methods of getting testimony and penalties for not giving it, and ultimately winds up with the suggestion of an appropriation to cover the expenses of the work. That will all naturally come out in the five-minute debate.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. WINSLOW. I will yield.

Mr. SNYDER. Is it definitely fixed in the bill that the term of the commission expires at the end of one year?

Mr. WINSLOW. Yes. That is provided in the first paragraph of the bill.

I am not going to take further time just now, but I reserve my time and serve notice on those who want to speak that I mean to reserve time at the end of the hour allotted to me for making a further statement if it is necessary to have one made and if it seems best for me to make it. What I understand the committee will try to do is to explain the bill in detail, and in that way let you learn from one or another just what it is about.

Mr. Chairman, how much time have I taken?

The CHAIRMAN. The gentleman has occupied seven minutes.

Mr. WINSLOW. I would like to ask the other side to proceed at this time.

Mr. GARRETT of Tennessee. Mr. Chairman, I yield 30 minutes to the gentleman from Indiana [Mr. BLAND].

The CHAIRMAN. The gentleman from Indiana is recognized for 30 minutes.

Mr. BLAND of Indiana. Mr. Chairman and gentlemen of the committee, the Committee on Labor gave four or five months to the study of the great coal problem that to-day is one of the gravest concerns of the Nation. We had before us representatives of the miners' organization and all the various operators' organizations as well as various representatives of different public interests. We summoned before us the best legal brains connected with the Federal service in order that we might report to Congress a fact-finding agency bill, that would not only bring the results desired by most of the public but that would stand the tests of the courts; and permit me to say in this connection that one of the gravest legal problems to-day is to see fashioned a law of this kind that may meet with the approval of our courts.

The Committee on Labor of the House early recognized the deplorable lack of definite, reliable, and truthful facts concerning this great coal industry which means so much to the industrial life of the Nation, and it realized that not only must we make an effort to report a bill which would reflect the good intentions of the committee to promote the fullest giving up of facts in the coal industry but one that would meet the constitutional objections which had been interposed.

Operators had been selling coal since the first of the year until the strike began in most instances at a loss. A strike or a lockout until mining conditions improved and the price of coal was increased was most inevitable. We did our level best to bring the contending factions together. The miners' organization was anxious to meet the operators and agree upon a wage scale for the resumption of work on the 1st day of April. An agreement had been entered into between the miners and operators with the advice and consent and at the instance of the Government agents that prior to the 1st day of April the United Mine Workers' organization and the representatives of the operators of the central competitive field would meet and negotiate a wage scale. It early developed that the operators, for various reasons, real and pretended reasons, would refuse to meet the miners, and, therefore, breach their agreement. More than four months of industrial strife and mining

inactivity resulted to the tremendous economical loss of the country, and I am glad to note by the morning paper that the beginning of the end of this conflict, for the present at least, is over and that the Nation will again be permitted to have its supply of fuel, which is so essential to its industrial prosperity.

This bill to-day brought forth by the committee nor the one which I proposed and which has been reported by the Labor Committee of the House will not bring redress for the four months that are lost forever, but if the proper kind of measure is passed here to-day I am hopeful that it will have the result of making it possible that the coal industry may be stabilized and that the recurrence of periodical shutdowns and strikes and exorbitant prices of coal upon the consuming public may not prevail in the years to come.

The Labor Committee gave it their best thought, with the result that a bill was reported with teeth in it, and it had been most carefully scrutinized with a view of making it meet with the court's approval in their defense of the constitutional rights of property owners. I will here insert a copy of my bill, which was reported by the Labor Committee:

A bill (H. R. 11022) to establish a commission to inquire into labor conditions in the coal industry.

Be it enacted, etc., That when used in this act—

(a) The term "person" means individual, partnership, corporation, or association; and

(b) The term "coal" means anthracite, bituminous, and other coal, lignite, coke, and culm, whether in place, extracted, or banked.

SEC. 2. (a) That there is hereby established a governmental agency to be known as the "coal investigation agency," and to be composed of 10 members, as follows:

(1) The Director of the Geological Survey, the Director of the Bureau of Mines, the Director of the Bureau of the Census, and the Commissioner of Labor Statistics;

(2) Two members constituting the public group, representing the public, to be appointed by the President, by and with the advice and consent of the Senate;

(3) Two members constituting the miners' group, representing the employees of coal mine operators, to be appointed by the President, by and with the advice and consent of the Senate, from four nominees presented to the President by the president of the United Mine Workers of America; and

(4) Two members constituting the operators' group, representing the coal mine operators, to be appointed by the President, by and with the advice and consent of the Senate, one to be appointed from two nominees presented to the President by the president of the National Coal Association, and one to be appointed from two nominees presented to the President jointly by the president of the Anthracite Bureau of Information and the president of the Anthracite Coal Operators' Association.

(b) Any vacancy in the office of an appointed member of the coal investigation agency shall be filled in the same manner as the original appointment. The appointed members shall each receive a salary of $6,000 a year. The members specified in paragraph (1) of subdivision (a) shall receive no additional salary for their services as members.

(c) If the president of any organization specified in subdivision (a) fails to present nominees to the President in accordance with such subdivision within 30 days after the passage of this act, or, in case of a vacancy, within 30 days after the vacancy occurs, the President of the United States shall thereupon directly make the appointment, by and with the advice and consent of the Senate. In making any such appointment the President shall select an individual associated in interest with the employees or coal mine operators, whichever he is to represent.

(d) The coal investigation agency shall cease to exist two years after the passage of this act.

SEC. 3. That for the purpose of providing information for the Congress as a basis for legislation (a) to settle industrial disputes in and prevent the overdevelopment of the coal industry, (b) to stabilize such industry and levy taxes in respect thereto, (c) to regulate commerce in coal among the several States and with foreign nations, (d) to provide a coal supply for the maintenance of the Navy and the merchant marine, and (e) to protect the coal supply for the District of Columbia, and forts, magazines, arsenals, dockyards, and other public buildings of the United States outside the District of Columbia, the coal investigation agency is authorized and directed to require and obtain from any person such data, information, and reports as it deems desirable for such purpose, including among other matters data, information, and reports (1) as to the supply, production, distribution, storage, and consumption of coal and its grading and economic utilization, (2) as to the relations between operators of coal mines and washeries and their employees with particular reference to wages, hours of labor, and working conditions, and (3) as to the ownership and value of coal lands, and of property of operators or owners which is of use in the operation of coal mines or washeries.

SEC. 4. That the coal investigation agency shall make such reports to the Congress and to the President from time to time as it deems advisable, and shall make to the Congress and to the President a final report not later than two years after the passage of this act. All data or information obtained by the coal investigation agency shall not be made public except in such reports to the Congress and to the President, or in compliance with the subpœna or order of a court of competent jurisdiction. Such reports shall not contain any such data or information which would disclose the trade secrets of any person. Any officer or employee of the coal investigation agency who shall make public any data or information in violation of the provisions of this section shall, upon conviction thereof, be punished by a fine of not more than $5,000 or imprisoned for not more than one year, or both.

SEC. 5. (a) That for the efficient administration of the functions vested in the coal investigation agency by this act, the agency may require by subpœna, issued and signed by the chairman, the attendance of any witness and the production of any book, paper, document, or other evidence from any place in the United States at any designated place of hearing, and the taking of a deposition before any designated person having power to administer oaths. In the case of a deposition the testimony shall be reduced to writing by the person taking the deposition or under his direction, and shall then be subscribed by the deponent. Any member of the coal investigation agency may administer oaths and examine any witness. Any witness summoned or whose deposition is taken under this act shall be paid the same fees and mileage as are paid witnesses in the courts of the United States.

(b) In case of failure to comply with any subpœna or in case of the contumacy of any witness before the coal investigation agency, the agency may invoke the aid of any United States district court. Such court may thereupon order the witness to comply with the requirements of such subpœna, and to give evidence touching the matter in question. If the court makes such order it may also fix in the order the time for compliance therewith, and enjoin the witness from shipping or receiving from shipment in commerce among the several States or with foreign nations any coal after the time so fixed and before his obedience to the order. Any failure to obey such order or injunction may be punished by the court as a contempt thereof.

(c) No person shall be excused from so attending and testifying and deposing, or from so producing any book, paper, document, or other evidence on the ground that the testimony or evidence, documentary or otherwise, may tend to incriminate him or subject him to a penalty or forfeiture; but no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing as to which, in obedience to a subpœna and under oath, he may so testify or produce in evidence; except that no person shall be exempt from prosecution and punishment for perjury committed in so testifying.

SEC. 6. That for the efficient administration of the functions vested in the coal investigation agency by this act, any member, officer, or employee thereof, duly authorized in writing by the agency, shall, at all reasonable times for the purpose of examination, have access to and the right to copy any book, account, record, paper, or correspondence relating to any matter which the coal investigation agency is authorized by this act to investigate.

SEC. 7. That every officer or employee of the United States whenever requested by the coal investigation agency shall supply it with any data or information pertaining to any investigation by the agency, which may be contained in the records of the office of such officer or employee.

SEC. 8. (a) That no person shall willfully (1) fail or refuse to make any report required by the coal investigation agency, (2) make in any such report any statement which is false in any material particular, or (3) deny any duly authorized person any right granted by section 6. Any person who violates this subdivision shall, upon conviction thereof, be fined not more than $5,000 or imprisoned for not more than one year, or both.

(b) In construing and enforcing the provisions of this act the act, omission, or failure of any person acting for or employed by any individual, partnership, corporation, or association, within the scope of his employment or office, shall in every case also be deemed the act, omission, or failure of such individual, partnership, corporation, or association as well as of such person.

SEC. 9. That for the efficient administration of the provisions of this act, the coal investigation agency may make such regulations as it deems necessary.

SEC. 10. (a) That the coal investigation agency may appoint, remove, and fix the compensation of such employees, and make such expenditures, including salaries, traveling expenses, per diem rates of allowance in lieu of subsistence, and witness fees, as are necessary for the efficient administration of the functions vested in the agency by this act, and as may be provided for by the Congress from time to time. All the expenses of the coal investigation agency shall be allowed and paid upon the presentation of itemized vouchers therefor, approved by the chairman of the agency.

(b) There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $50,000, or so much thereof as may be necessary, to be available until June 30, 1923. Such sum shall be expended by the coal investigation agency, in the District of Columbia or elsewhere, for defraying the expenses of the maintenance and establishment of the agency, including the payment of salaries.

SEC. 11. If any provision of this act or the application thereof to any person or circumstance is held invalid, the validity of the remainder of the act and of the application of such provision to other persons and circumstances shall not be affected thereby.

Amend the title so as to read: "A bill to establish a temporary governmental agency to investigate and report to the Congress and to the President in respect to labor or other conditions in the coal industry."

The President in a message to this Congress a few days ago from almost this identical position said to you that we must have a fact-finding agency in the coal industry. The administration had become convinced that no solution of this great problem can be made until scientifically prepared data and statistics of the whole industry are prepared and submitted to Congress. No one knows what the production cost of coal in this country is unless it be those who brazenly refused to give the facts to the Government. Those who are most familiar with the facts will agree that there is no solution of this problem, nor can there be an intelligent attempt at its solution until the facts concerning the industry, including the cost of production, labor costs, overhead expense, and the thousand and one facts concerning the business have been carefully gathered, compiled, and submitted in an understanding way.

The President is right in demanding that legislation of this character be passed, and I pride myself upon the fact that many months ago I advocated on the floor of the House that the first step essential to the curing of the disease of the industry was the establishment of a properly constituted Federal fact-finding agency to which must be given all the powers the Federal Constitution would permit. The Labor Committee counseled with the best legal brains in the Federal service in order that my bill might stand the constitutional test, and on May 5 the committee reported it to the Congress. It had received months of consideration as well as the approval of many bright and disinterested minds, but your Committee on Rules refused

to give consideration for it on the floor of the House, and the chairman of the committee stated to the press that he was opposed to commissions. His attitude seems to have changed lately. In this bill it was proposed that a commission be formed of two miners, two operators, two members of the public, who should receive pay, and that with them should be associated the Director of the Geological Survey, the Director of the Bureau of Mines, the Director of the Bureau of the Census, and the Commissioner of Labor Statistics. It was the thought of the committee that representation of the miners and operators of both bituminous and anthracite districts would insure, by reason of prejudice and interest, the fullest giving up of the facts, and that the result obtained would necessarily be acquiesced in by those two great elements of interest in the industry.

The President in his message to Congress proposed that a commission, similar to the one I had suggested, be formed with similar powers, but that no representation of employer or employee in the industry be permitted, and the Committee on Labor bill was sidetracked and the Committee on Interstate and Foreign Commerce were called upon to present to Congress a bill embodying the ideas of the President. To my astonishment I find this great committee reporting a bill without having had hearings or without advice and counsel of any legal talent whatever. This bill not only denies representation to the miners and the operators but, in my opinion, does not bestow, under the Constitution, the power which will enable the commission to perform the investigation for which it is being created. I think most of you before me are lawyers, and those who are not, from your experience in legislative matters, have learned to weigh the meaning of the phraseology of bills. Let us digest for a moment the provisions of the Winslow bill that is being hurried through here without consideration. The Winslow bill grants to the commission no powers not already given to the Federal Trade Commission, and I venture to assert that none of the lawyers of the Interstate Commerce Committee will produce one scintilla of argument to the effect that more powers are granted to this commission than are now held by the Federal Trade Commission. The Federal Trade Commission, under its interstate commerce rights, was empowered to investigate the coal industry and to find facts concerning it, but bear it in mind that it is only given power under the interstate commerce clause of the Constitution. The Maynard Coal Co., after 51 mines had reported, obtained a restraining order in the District Court of the District of Columbia restraining the Federal Trade Commission from requiring answers to questions concerning production in the States, upon the theory that the production of coal does not pertain to interstate commerce, but that it is entirely intrastate. Two years have passed since the Federal Trade Commission was halted in its attempt to carry out the orders of Congress, and yet we have a great committee in Congress bringing out a bill in which it relies solely upon the interstate commerce powers of Congress to give this commission the right to inquire into the question of production within the States.

Is it possible that the framers of this law do not know what the courts have decided, or are they butting their heads against a stone wall to see how thick their skulls are? The chairman of this committee, Mr. WINSLOW, said we will have to take a chance on that.

Mr. WINSLOW. Will the gentleman yield?

Mr. BLAND of Indiana. Yes; if the gentleman takes any exception to my statement.

Mr. WINSLOW. I do not want to interrupt the gentleman. He talked to me without reply on my part for about 10 minutes. And as he was leaving I said as a good-by, "We will have to take a chance."

Mr. BLAND of Indiana. Yes, he said, "We will have to take a chance on that." We do not have to take a chance, for I tell you there are other powers of the Constitution that can be invoked, and you could put them in this bill if you wanted to. I am hopeful that provisions may be put in this bill to-day that will give full powers to this commission under the Constitution to go into the States and obtain the facts essential to this great industrial problem. You ask me how it can be done. Read the bill that I shall propose as a substitute for this misfit and you will find that I invoke powers under the Constitution other than interstate commerce powers. Can anyone in the sound of my voice deny that we have the right to go into the States to inquire into any industry for the purpose of Federal taxation? The Constitution specifically gives us that right. Can anyone contend that the Government does not have the right to protect the coal supply for its Navy, for its ports, for its arsenals and its institutions in the District of Columbia? If we have that power, why not invoke it in this law, because the courts have indicated that under a guise of obtaining information you can not fish for facts, but that the Congress must indicate what facts they want and what they are for. In this connection I would like to refer you to 237 U. S., page 434.

In the Maynard Coal Co. case it was held that the production of coal within a State was not interstate commerce, and yet in the first sentence of the Winslow bill it says, "for the purpose of securing information in connection with interstate commerce in coal," and any court in the land will construe that the Congress only intends to invoke the interstate powers of the Constitution in order to reach the production of coal within the States. If you will read the bill which was reported by the Labor Committee, and which for some strange reason has been mysteriously avoided in the preparation of this bill, except an absolute copy of certain less important items, you will find that it provides:

> That for the purpose of providing information for the Congress as a basis for legislation (a) to settle industrial disputes in and prevent the overdevelopment of the coal industry, (b) to stabilize such industry and levy taxes in respect thereto, (c) to regulate commerce in coal among the several States and with foreign nations, (d) to provide a coal supply for the maintenance of the Navy and the merchant marine, and (e) to protect the coal supply for the District of Columbia and forts, magazines, arsenals, dockyards, and other public buildings of the United States outside the District of Columbia, the coal investigation agency is authorized and directed to require and obtain from any person—

And so forth.

Not only does the Labor Committee bill confer and call into action all the powers that the Federal Government has but it provides the machinery and the penalties that will bring forth the fullest disclosure of the facts.

My colleagues, as I look you in the face, and as man to man, I want to say to you that the Winslow bill has no teeth in it; it has no adequate penalty clause, and will be hailed with delight by every coal producer who desires to conceal the facts concerning the cost of production of his article. What does a great coal corporation making its millions—now, I am not speaking of the little fellow—in the pinch months care for the possibility of a $5,000 fine at the end of a long-drawn-out criminal lawsuit?

I wish the chairman of this committee would tell you now why it was that he has left out of this bill the section contained in the Labor Committee bill which denies to the coal producer who refuses to answer the questions of his Government the right to interstate commerce for his product. The Labor Committee bill authorizes the Federal court, as a part of its verdict, to make it a criminal offense for the delinquent coal company to ship its product in interstate commerce, and it makes it an offense for a railroad to receive its product in such shipment. Ah, my colleagues, the teeth has been pulled from the bill. They can wear you out with criminal trials; they can stand a few fines, and a few thousand dollars would not make much difference to them. But if the court orders a railroad company not to receive for interstate shipment their product until they have purged themselves of contempt and answered the questions that the Government asks them, then you will get results. Why this pussyfooting on so important a question? Why take the chance, Mr. WINSLOW, if you really want the facts?

The President of this great Republic says he must have the facts. The operators that have come before the Labor Committee, the Federal Trade Commission, and before the Senate committee have brazenly refused to divulge the facts. Do you want the facts? If you do, my suggestion is that you accept an amendment to this Winslow bill which will not only promote the fullest voluntary giving up of facts but will be adequate to force their submission. I do not believe that President Harding knows the contents of this bill aside of its provision for the personnel of the board, and permit me to say, in passing, that I am now, and have been in the past, one of his most ardent admirers. He is honest; he is courageous, and has a heart full of love for the American Republic. He believes that the best interests will be conserved by leaving off the representation of miners and operators. In this I believe he has been wrongly advised. How can you hope to settle satisfactorily the facts regarding one of the greatest industries in the history of civilization, unless you at least give representation to those who are most vitally concerned and who know the facts better than anybody on earth. I have not asked that either operators or miners, or both, have control of this commission. My bill proposes a commission of 10, 2 operators, 2 miners, representing both the bituminous and the anthracite fields. Their knowledge of the industry and its many intricacies and ramifications will not be available to such a committee as the Winslow bill pro-

poses. The Winslow bill says that no person who has interest in or is connected with the coal industry shall be eligible to serve on the commission. I can not disabuse my mind of the fact that growing out of this great industrial strike which, thank God, ends to-day, a prejudice has been engendered against the industry. This kind of commission if named in a spirit of prejudice can not be helpful to the solution of the coal problem, but will tend further to disrupt and prevent any hope of peaceful, constructive stabilization, such as is desired by every patriotic American citizen.

If the President of the United States knew the Winslow bill gave no additional powers than are given to the Federal Trade Commission, and that the courts of the land have stopped the Federal Trade Commission from obtaining facts under those powers granted by Congress, and if he knew, as I believe he does, the decision of our courts which would point the road to us as to how we could bestow additional powers upon the commission, I believe he would unhesitatingly say that the Winslow bill should be radically amended.

I wish you would read section 2 of the Winslow bill. You lawyers who are in the habit of scrutinizing legislative acts will see that the word "production," except where it is casually used, is omitted from the field of investigation of the agency, and it was the word "production" that stopped the Federal Trade Commission in its inquiry. Why this omission if results are desired? Is some one acting with their fingers crossed in pretending to obey the mandates of the President? You may construe, from reading this section, that they will have the right to inquire into production when they are inquiring into profits, but I know of no good reason, in view of the legal uncertainty, for not definitely saying that the commission has the right to inquire into the production of coal, and on this subject I am fearful that the genial chairman of this committee will be as silent as the bones of Job in the valley and stolidly refuse to accept the amendment.

I venture to assert that no member of this committee since the introduction of this bill has read the Minnesota Rate case nor the Maynard Coal County case, the Shreveport case nor the Claire Furnace Co. case. If we are to profit from our mistakes when stopped by the courts, why not attempt to frame the law to conform to the courts' notion as to what our constitutional rights are if you really want to get facts?

Our Democratic friends on the other side of the aisle have charged, with certain justness, that in this piece of legislation we are camouflaging the public before the election and that we are passing a gold brick out to the public. I do not believe the President wants us to do that, and I do not believe the majority of you want us to do that, and I am not impugning the motives of any of my colleagues, but I do say that whether Mr. Hoover or any other man prepared this bill he did not know the law or he would have couched it in different language, and the day will come when our failure at this hour to insert in this bill the proper provisions will confront us in a most embarrassing way.

Some of the minor provisions of my bill have been bodily lifted out and put in this bill, but I note with great disappointment that the teeth in my bill have not been put in this bill, and I am informed, and have good reason to believe, that the Interstate Commerce Committee had the opportunity to put them in, but deliberately voted them down. I understand, gentlemen, that with an overwhelmingly Republican House—and I am glad it is overwhelmingly Republican—and with the President and administration generally behind this bill it will be difficult, regardless of the merits of the controversy, to convince you that it should be changed, but I am going to discharge my duty as a Representative in the American Congress and advocate what I believe to be to the best interest of my country, and in that advocacy I most earnestly appeal to you, gentlemen, if you are wedded to the thought that there should be no miners or operators on this board, that you should at least give heed to the verbiage of the bill, so that you may confer upon your alleged impartial board all the power which you intend to confer.

Mr. STEVENSON. Mr. Chairman, will the gentleman yield?

Mr. BLAND of Indiana. I can not yield at this time. I am sorry. Later I will be glad to yield.

The Supreme Court, gentlemen, has held, and I think correctly so, that if legislation granting certain inquisitorial powers has been enacted that power can not be used for the purpose of fishing for information, but that only the information in contemplation by Congress at the time the act was passed can be obtained under its provisions. Why not say in this act that you empower this commission to get these facts for the purpose of levying taxation and for the other purposes enumerated in section 3 of the bill which I offer for a substitute? Do you know of any reason why you should not include them? If you want to get the facts, can it hurt anything?

Remember that you are hanging your whole case upon the possibility of the court of appeals or the Supreme Court of the United States holding in the far distant future that the Federal Government under its commerce powers can inquire into the production of coal within the State even if that production is purely intrastate. Now, I shall not stultify myself as a lawyer, nor hide from you my real views on this proposition. I believe that the courts should hold, and I hope they will hold, that coal and its production are so essentially a part of interstate commerce that they are of Federal concern and that under the interstate commerce powers they will be permitted to inquire into them. But why take the chance of the court rendering such an opinion in the future when you can give these powers to it now? I will venture to say that no lawyer backing the bill in the sound of my voice will say that we have not the right to go into the State and inquire for the purpose of cost of production for the purpose of legislation on the question of taxation, and the refusal to place this provision in the bill is an admission that you do not want the facts or that you are indifferent and careless in the construction of the law which you hope will obtain facts. No one will contend that it could be hurtful to invoke these rights even if I were wrong in my legal premises.

Mr. JOHNSON of South Dakota. Will the gentleman insert that decision in his remarks?

Mr. BLAND of Indiana. I will be very glad to do so, and I would like to insert also this decision here that you must specifically say in the act for what purpose you are obtaining the information.

It is Ellis *v.* The Interstate Commerce Commission (237 U. S., pp. 444–5.)

A part of the Maynard decision reads as follows:

> In the case of a corporation doing a wholly intrastate business could it be said that Congress has any visitorial power under the commerce clause of the Constitution of the United States? Clearly it has not. The fact that it happens to be the same corporation in this instance which mines and ships the coal does not give Congress any greater powers to regulate production and the intrastate commerce of such corporation. The visitorial power of Congress is limited to that part of the business over which it has control and which under the Constitution it has the power to regulate.
>
> The mere fact that a corporation engaged in mining ships a portion of its product to other States does not subject its business of production or its intrastate commerce to the powers of Congress. Doubtless the business of every coal-mining corporation, whether engaged in interstate business or not, to some extent affects interstate prices and commerce, but, as stated in United States *v.* Kind (156 U. S. 1), above: "The power to control the manufacture of a given thing involves in a certain sense the control of its disposition, but this is a secondary and not the primary sense." No sound reason is given why there is any difference in the business of coal mining of a corporation which ships its coal to another State and that of a corporation which does not. Interstate commerce is not affected any more in the one case than in the other.

Mr. MILLS. Will the gentleman yield?

Mr. BLAND of Indiana. I will.

Mr. MILLS. Does the gentleman contend that we could, by reciting that we were trying to obtain information for the purpose of taxation, get the information which we otherwise could not get?

Mr. BLAND of Indiana. Yes; but you are not confined to that right. On the contrary, if you say you are going in to get facts which the Constitution permits, the Supreme Court has held that you are not fishing but you have a right to have the information.

Mr. MILLS. But the Supreme Court has held that where the taxing power has been used as a mere subterfuge, the mere fact that you are doing it under the taxing clause of the Constitution does not render it constitutional.

Mr. BLAND of Indiana. If you pass a law saying that you want to get the facts for taxing purposes, it can not be held unconstitutional, if you try to get facts for that purpose. The gentleman has in mind the child-labor case, in which they attempted to regulate child labor by taxation; but this is information for the purpose of taxation, and when you once obtain it you may use it for any purpose. The question is, Have you a right to obtain the information for legislative purposes? You have. This bill does not say a word in reference to obtaining it for legislative purposes.

Mr. MILLS. Will the gentleman yield for one more question?

Mr. BLAND of Indiana. Yes.

Mr. MILLS. It is a fact that we are investigating the coal situation because of the strike. Does the gentleman think that if we state in the resolution that we are doing it for taxing purposes the Supreme Court will not do what it did in the child-labor case—look at the real facts?

Mr. BLAND of Indiana. The gentleman does not state a fact when he says we are doing it on account of the strike. If the

gentleman will study the situation a little more, he will see that the coal industry is sick from other causes than the strike. The coal industry is overdeveloped.

It has one-third too many coal miners and it has one-third too many coal mines. And then again it has its seasons, and the result is that when the pinch months come the operators and dealers raise the price to $10 and $12 a ton, as is being doing now. There ought to be a condition brought about where the industry would be stabilized, where the efficient mines would compete. As long as the industry is seasonal we are going to have a little mine on the side hill where the miner sits idle most of the time, and only works about 120 days in the year, and when he does work he must have wages enough to keep him the year round. We ought to have an act that will get the facts. Pass a law that has teeth in it. If there is anything wrong about the industry or the organization of the men who work in it, let us go after the facts, both as to the miners and operators.

Mr. STEVENSON. Mr. Chairman, will the gentleman yield?

Mr. BLAND of Indiana. Yes.

Mr. STEVENSON. The gentleman stated awhile ago that the facts which the public and the Government have are false, and that the reports were made deliberately false. I want to get at who promulgated these facts and false statements.

Mr. BLAND of Indiana. Oh, the operators who were making unusual profits claimed that the cost of production was higher than it really was. They made the statement that the labor cost of production is $1.96 a ton, and we know better. We investigated the matter far enough to find that out; but if they can say that their labor cost is $1.96 a ton and that their overhead is another $1.96 a ton, then they can make you gentlemen think it will cost a great deal to produce coal. Then they are prone, during labor controversies, to lay it on the miner who gets only $1.08 a ton, and do you blame the miner for wanting representation upon this board. This is not to be a regulatory body, it is not a governing body, it is not a price-fixing body, it is not a wage-fixing body; it is a body to find facts, and if you want to find facts put men on that commission whose interest and prejudices will insure that the facts will come out.

Mr. THOMAS. Mr. Chairman, I wish the gentleman from Indiana would please read the part of the decision that he speaks of.

Mr. BLAND of Indiana. I would like to do it, but I have not the decision here; some one has carried it away. I shall put it in the RECORD.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. BLAND of Indiana. Yes.

Mr. MOORE of Virginia. I notice that your bill, which is similar to this bill in a general way, was reported to the House on May 5 last, I think, after the coal strike began.

Mr. BLAND of Indiana. Yes.

Mr. MOORE of Virginia. It never has been considered. Does the gentleman know why the House has not considered the bill?

Mr. BLAND of Indiana. I have been storming the Rules Committee for a rule. I am not responsible for the delay. I assure the gentleman that the press of the country has been anxious to have this legislation considered. This legislation has been featured by some of the biggest daily papers in the country as being the most necessary legislation before the American people to-day, but I am not responsible for its not coming up. I do know this: I know that the President of the United States realized that he could not get any facts under existing laws because they were not obtainable, and he realized when this strike situation began to cool off that we ought to constitute an agency which would clear up the facts. I think the gentleman should understand that if my bill had passed some time ago it would have had little or no effect upon the strike, because it will take more than the year's time given by this bill to get these facts. It will take a longer period than that. It could not help this strike, but, God knows, we may avert others.

Mr. MOORE of Virginia. If the gentleman's bill would not have affected this strike, then surely this bill would not.

Mr. BLAND of Indiana. I do not think it is contended that it can do anything toward affecting this strike.

Mr. POU. Is it a fact that the gentleman almost got a rule reporting out his own bill this morning?

Mr. BLAND of Indiana. Oh, I do not want to be bitter about this thing at all. I have no feeling about it. I would not impugn the motives of anyone. I know that all are interested just as much as I am. I know that the men who prepared this bill could not have been familiar with these questions, because, if so, they would not have brought out this bill if they wanted to get the facts.

Mr. JOHNSON of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. BLAND of Indiana. Yes.

Mr. JOHNSON of South Dakota. Is it not a fact that if this bill that is brought out by the Interstate and Foreign Commerce Committee is adopted by the Congress the operators could go before this same court that issued the injunction against the Federal Trade Commission and nullify this statute?

Mr. BLAND of Indiana. That court could make no other ruling on this bill than what they have already made on the Federal Trade Commission bill.

Mr. JOHNSON of South Dakota. If the court was consistent it would have to make the same ruling.

Mr. BLAND of Indiana. Yes.

Mr. JOHNSON of South Dakota. Then that means that the passage of this bill would be just an empty gesture to the country?

Mr. BLAND of Indiana. Absolutely. To be fair, however, as I said before, there is the argument that the interstate commerce clause of the Constitution entitles us to go into the production of coal, but the courts holding in the contrary, it would seem to me to be wise to invoke all of the powers that we have under the law. Why leave them out if you want the facts?

Mr. WARD of North Carolina. Mr. Chairman, will the gentleman yield there to permit me to ask a legal question?

Mr. BLAND of Indiana. Yes.

Mr. WARD of North Carolina. The bill provides that the commission shall report its findings of facts and such recommendations as to methods and measures as in its judgment will promote continuity of production and efficiency in mining and distribution and maintain the uninterrupted movement of coal in interstate commerce and safeguard the interests of the workers, operators, and the consuming and general public. I want the gentleman's opinion upon the question whether that would not give to the investigating committee sufficient power and authority to meet the point of the gentleman's argument. I do not say that it will or that it will not, but it impresses me that it goes a long way toward doing it.

Mr. BLAND of Indiana. That section merely goes toward the report, and it does not add anything to the powers specified in the bill.

Mr. JOHNSON of South Dakota. Will not the gentleman make the proper motion to insert his complete measure, or the Labor Committee measure, as an amendment to this bill?

Mr. BLAND of Indiana. I am glad the gentleman suggested it. At the proper time I want to move to strike out all after the enacting clause and insert the bill from the Labor Committee. I want to say as to that bill I do not care what the politics of any member of the Labor Committee may be, or if you will talk to the chief counsel of the Interstate Commerce Commission, who helped write this bill, or the chairman of the Federal Trade Commission, who recognized his hopelessness under existing law, if you will talk to them they will tell you that the Labor Committee bill will do the work and has teeth in it, and that such powers of the Federal Government will be invoked as will get the facts. Why do you want to take chances?

Mr. TINCHER. Will the gentleman yield?

Mr. BLAND of Indiana. I will.

Mr. TINCHER. Is not one of the terms of the settlement of the strike that the operators and miners have agreed to have a commission to investigate these questions?

Mr. BLAND of Indiana. I am glad the gentleman reminded me of that. The Cleveland agreement was—if I am not right, I hope the gentleman from Illinois [Mr. WILLIAMS], who has a copy of same, will correct me—that they were to have an investigation of the coal industry, and that the miners and operators will appoint and the President shall approve a commission. You saw in the papers a telegram, which I have not here, from Mr. Lewis on that subject. He regrets that this law is not giving representation to the miners. If this law is passed here, the President is not going to sanction any other commission to investigate the coal industry, and therefore the miners and operators will not get into the investigation. Furthermore, under existing law the miners and operators could not get the facts any more than the Federal Trade Commission could.

Mr. TINCHER. Then I understand you are seriously contending that the only way to get the proper kind of facts is to have it from prejudiced people—people directly interested?

Mr. BLAND of Indiana. The gentleman does not understand me correctly.

Mr. TINCHER. We are finding facts and I submit that under our form of government we would not think under any circumstances of putting an interested party on the jury.

Mr. BLAND of Indiana. If the gentleman will pardon me, there is no industry in this country that is so little known about as the coal industry. There has been an industrious hiding of facts, changing of facts, and a perversion of truth concerning the industry, and it is time the Government was unearthing them, and you can not do it under a law that is already held unconstitutional. If you want to realize what you say you are after, put some teeth in the bill.

Mr. BYRNES of South Carolina. The bill introduced by the gentleman from Massachusetts calls for $500,000. What is appropriated by your bill?

Mr. BLAND of Indiana. The same amount. It is for a two years' period, and it provides that they shall make a report from time to time. Furthermore, we have limited their salaries to $6,000, but in this bill the salaries are $10,000, and that means $90,000 in one year to a commission that has no power.

Mr. HARDY of Texas. Will the gentleman yield?

Mr. BLAND of Indiana. I will.

Mr. HARDY of Texas. Is it not true that in order to bring about the truth you must have opposing interests investigating?

Mr. BLAND of Indiana. Yes; Judge HARDY, I think so, even if it is a regulatory body.

Mr. HARDY of Texas. It seems to me it would be absolutely necessary.

Mr. BLAND of Indiana. This is a fact-finding agency and surely interested parties should be on the commission.

Mr. STAFFORD. Does the gentleman believe that the $50,000 as provided in his bill, section 10, would be adequate to meet the expenses of his commission before June 30, 1923?

Mr. BLAND of Indiana. To start off with.

Mr. STAFFORD. I understand the gentleman says the same amount is appropriated in his bill as asked for?

Mr. BLAND of Indiana. That was the amount we contemplated would be expended.

Mr. GRAHAM of Illinois. I have a copy of the bill in my hand which calls for $50,000.

Mr. BLAND of Indiana. It is estimated that it will take $500,000 to do the job, but I do not think my bill appropriated that amount at the time, but we probably would have to appropriate that amount later.

Mr. DENISON. I think the gentleman ought to emphasize the fact that the commission we are attempting to appoint is in no sense a jury. A jury is a body appointed to determine and adjudge in a controversy between different parties. This is an independent fact-finding commission, and it seems to me, and has seemed to me all the time, that it would be proper and appropriate to at least have some representative on the commission who knows something about the business from actual experience.

Mr. BLAND of Indiana. I think the gentleman is absolutely right.

Mr. MAPES. Will the gentleman yield?

The CHAIRMAN. The time of the gentleman from Indiana [Mr. BLAND] has expired. [Applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. SANDERS of Indiana having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had insisted upon its amendments to the bill (H. R. 4) granting relief to soldiers and sailors of the War with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. BURSUM, Mr. SMOOT, and Mr. WALSH of Montana as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment the following resolution:

House Concurrent Resolution 65.

Resolved by the House of Representatives (the Senate concurring), That there be printed 6,000 additional copies of the bill (H. R. 7456) to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes, of which 4,000 copies shall be for the House document room and 2,000 copies for the Senate document room.

UNITED STATES COAL COMMISSION.

The committee resumed its session.

Mr. WINSLOW. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. HOCH].

Mr. HOCH. Mr. Chairman and gentlemen of the committee, of course it is impossible to do very much on a question like this in five minutes. I take it that there is no difference of opinion as to the necessity of a fact-finding commission and a commission which shall, as the result of the facts as found, make recommendations that will be of benefit to the Congress and to the American people.

The gentleman from Indiana [Mr. BLAND] raises two or three specific objections to the bill before the committee. In the first place, he contends that the bill is not constitutional because of this reason, that it does not set out in what might be called the preamble all the reasons why the Congress seeks to get this information. Now, I think the question of the gentleman from New York [Mr. MILLS] was very pertinent. Certainly the question of the power of Congress to do this thing, to get these facts, rests upon the statement of powers within the Constitution itself and not upon any recitals we may make as to our purposes in getting the information. I can not believe that a mere recital in the preamble of some of the things that men have in their minds as to what are the purposes for which we are getting the facts can be controlling as determining the question of whether Congress has the power.

Mr. EVANS. Mr. Chairman, will the gentleman yield?

Mr. HOCH. In a moment. I want to finish. I have only five minutes.

But in reading this bill you will notice that in the opening it says:

That for the purpose of securing information in connection with questions relative to interstate commerce in coal and other questions and problems arising out of and in connection with the coal industry.

Now if you can frame words broader than those as to the purpose that Congress has in its mind, I do not know what those words would be. But speaking personally, I would certainly have no objection to the incorporation there of other words to indicate that we have a desire to obtain the facts for the use, among other things, of the Government in obtaining coal for the Army and the Navy or for any other purpose. That could be done in a very simple amendment. I believe it can be shown that 90 per cent of the coal movements in this country are interstate in character, and, if that is the case, certainly Congress has the right to acquire information as to interstate movements of coal; and, if 90 per cent of the coal movements in this country are interstate in character, certainly no court will on that specific question decide that Congress does not have the power to ascertain the facts concerning interstate commerce in 90 per cent of the coal movements of the country. If there be any doubt about it at all, and I do not believe there is, the objection can be met by very simple amendment. That suggestion, however, it seems to me, from any angle, does not require, and need not be given, very earnest consideration when it comes to the matter of the real substance of this bill.

Another objection is urged to the way in which the personnel of this commission is to be formed. With all due respect to the gentleman from Indiana [Mr. BLAND], and I certainly concede his sincerity and the sincerity of anyone who believes as he does, I disagree with him fundamentally upon that proposition. I think what the American people want is not an investigation by interested parties but an investigation of disinterested parties in the interest of the people of the whole country. [Applause.] In my judgment, if you constitute this commission and start out in the first place with the idea that it has upon it representatives of this group and representatives of that group, you necessarily create an impression in the minds of the American people—you create the idea at the outset—that you have a board of arbitration to arbitrate differences, wherein one side will argue its case, and the other side will argue its case. In my judgment, you will have a cat fight at the very start of this commission. I hope the President will appoint, if this bill is enacted—I am sure he will—men of such high standing and character in this country, so disinterested in their patriotism, of such wide experience and understanding and sympathy that they will at once command the confidence of the country and the confidence that we are going to have a searching investigation of the facts of the coal industry from start to finish by a body which is wholly disinterested.

Why, gentleman, to hear the gentleman from Indiana you would think that we are not going to have any expert testimony. Are there to be no witnesses before this commission? Are not the miners to be represented, with all the evidence that they can present? Are not the operators to be represented?

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. HOCH. May I have two minutes more?

Mr. WINSLOW. Mr. Chairman, I yield to the gentleman two minutes more.

The CHAIRMAN. The gentleman from Kansas is recognized for two minutes more.

Mr. HOCH. Why, gentlemen, is it possible that men of large experience, sitting upon what may be said properly to be analogous to a jury, finding the facts as juries find the facts—will it be said that these gentlemen will be unable out of their large experience and great knowledge to understand the things that the witnesses tell them? Is it possible that when we go to have a commission to find facts everybody who wants to present facts before it will have to be represented on the commission? I think the difficulty with respect to courts of arbitration is in their tendency to resolve themselves into a question of who gets the third man, and I think it would be a fundamental mistake to make that possible in this case. I think the President properly stated the case in his message when he asked for a disinterested commission. We should have a commission wholly disinterested, who will give all due consideration to the representations of labor—organized labor and unorganized labor—and all due consideration to the representations of the owners and operators of the great coal industry, and who, having these interests before them and all that testimony before them, will come before the American people with a finding of facts and recommendations which will command at once the respect of the American people and which I believe will ultimately be of vast benefit to the people in helping to make impossible the recurrence of the coal situation which confronts the country and the unconscionable profiteering which is now rampant. I want still further legislation, every possible legislation, to curb the profiteers. And I believe this bill is the proper start in the right direction. [Applause.]

Mr. GARRETT of Tennessee. Mr. Chairman, I have used more time than the gentleman from Massachusetts [Mr. WINSLOW]. I suggest that the gentleman use some time.

Mr. WINSLOW. Mr. Chairman, I yield five minutes to the gentleman from Michigan [Mr. MAPES].

The CHAIRMAN. The gentleman from Michigan is recognized for five minutes.

Mr. MAPES. Mr. Chairman and gentlemen of the committee, the gentleman from Indiana [Mr. BLAND] has unquestionably given a good deal of study to the coal question and, of course, has a natural pride in the bill which he introduced. But in his zeal I think he has made some general, broad statements here which would be hard to sustain upon a careful investigation of the subject.

The gentleman from Kansas [Mr. HOCH] has answered the criticism of the provision of the pending bill fixing the personnel of this proposed commission. I want to add just one word to what the gentleman from Kansas has said. The gentleman from Indiana would leave the impression that the Winslow bill makes it impossible to put anybody on this commission who has knowledge of the coal industry. That is far from the fact. The bill simply provides that no "person who has any interest in or is connected with the coal industry" can serve upon the commission. A man may have been in the coal business, may have studied it, and may have worked in the coal mines all his life, but if he goes upon this commission he must sever his connection with the coal business before he goes upon the commission. I do not believe that any unprejudiced man here will say that that would prevent the President from appointing a man upon the commission who knows anything about the industry.

The gentleman from Indiana naturally wants his bill put through Congress instead of the bill reported and recommended by the Committee on Interstate and Foreign Commerce. I am in favor of the legislation. Everybody realizes the need of it. I think it is the psychological time to put through the bill introduced by the chairman of the Committee on Interstate and Foreign Commerce and recommended by the President, and I do not believe that the same thing can be said of the Bland bill, and for one, I am supporting the committee bill that is before the House to-day and the one that I think stands a chance of being enacted into law. I would like to say for the benefit of those who are sincerely in earnest in their desire to have legislation passed creating a fact-finding commission that it was the purpose of the Committee on Interstate and Foreign Commerce in framing and reporting this bill to make the provisions of the bill broad enough to cover the investigation of every phase of the coal industry. There was no attempt to take the teeth out of any bill. There was no attempt to limit the scope of the investigation; but on the contrary the attempt of the committee was just the opposite. It was to make the language of the bill broad enough so that this commission could investigate every phase of the subject, and it was the attempt of the committee to make the penalty clauses severe enough to make it effective. The gentleman says that we have provided a penalty of $5,000, but he omitted to state that we also provide a penalty of imprisonment for one year, or both such fine and imprisonment, if a man refuses to answer any material question that the commission may ask under this bill.

What the gentleman from Indiana says in regard to the lack of information on the part of the public and its inability to get accurate information in connection with the coal business is only too true. It is a lamentable fact that the public and the Congress and the Government do not know and have been unable to find out what the real facts are in connection with this essential industry. [Applause.]

The President recommended unequivocally the passage of two very concrete pieces of legislation relating to the coal problem—first, that a commission be created clothed with "authority to reveal every phase of coal production, sale, and distribution," and, second, "immediate provision for a temporary national coal agency, with needed capital, to purchase, sell, and distribute coal which is carried in interstate shipment."

I am very much in favor of the passage of legislation to put into effect both these recommendations of the President. The enactment of this bill will put into effect fully and completely the first recommendation, and I hope that Congress will pass with equal promptness legislation putting into effect the second recommendation. I read with a great deal of pleasure in one of the afternoon papers of yesterday and again in the morning papers that a bill was being drafted to carry out this second recommendation. The prompt passage of these two measures will go a long way toward reassuring the public and toward putting a wholesome respect for decency and fair dealing into the conscience of the profiteering coal operators.

It may be true, as some say, that the passage of this bill creating this so-called fact-finding commission, and its subsequent findings of fact, will cause more lasting benefit and accomplish more good in the long run than a Government agency created to buy, sell, and distribute coal during the present emergency only. No doubt the country has a right to know more about the real conditions, the real facts, surrounding the coal business than it has ever been able to ascertain. No doubt that publicity and a knowledge of those facts by the consuming public will cure many of the evils which now exist and do away with a large part of the abnormal profits which are now being made by coal operators. But that will not help the consumers this fall who are now obliged to pay two and three prices for their coal and sometimes more.

The purchasing agent of one of the large consumers of coal in my district told me only yesterday that the company which he represents has been obliged recently to pay as high as $8.50 per ton for coal at the mines when it was buying the same grade of coal from the same mines a few months ago for from 90 cents to $1.50 a ton, and I dare say that there has been no material increase, if any, in the cost of production during that time. Anyone who is at all acquainted with the situation can multiply instances that are just as bad or worse that have come to his attention. Unfortunately such instances of profiteering in the coal industry are altogether too common.

To relieve the large consumers of coal as well as the individual domestic consumers from being held up right now, or this fall and winter, something else is necessary than the creation of this fact-finding commission, which it is expected will not be able to make its first preliminary report until the 1st of January. To stop with the passage of this bill will put Congress somewhat in the position of the man who locked his barn after his horse was stolen.

It may be conceded that it is not a proper function of government under ordinary conditions to buy, sell, and distribute coal. But the Government is not functioning properly if it permits those who control the output of an essential industry like coal to profiteer off of its people without adopting every reasonable means to prevent it. This is no time to get into any hair-splitting controversy about what is and what is not a proper function of government. The President recommends it, and no one in my presence has ever accused the President of being in favor of having the Government interfere unduly with private business.

It may be, as the President said, that it will not be necessary for this agency to function. Perhaps the psychological effect will be sufficient to accomplish the desired result, but I believe with the President that it should be created to function if necessary. It will cost the Government nothing in any event, as it will be reimbursed for any money expended by the sale of its coal.

Such legislation is not without its precedent, if precedent is needed. It has its counterpart, it seems to me, in the legisla-

tion creating the War Finance Corporation and the United States Grain Corporation.

Both of these other Government agencies have more than justified their existence, and they serve, directly at least, only a fraction of the people as compared with those who are consumers of coal.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. WINSLOW. Is the gentleman from Tennessee prepared to yield further time?

Mr. GARRETT of Tennessee. I am prepared to do so if the gentleman desires, but we have used more time on this side than the gentleman's side has used.

Mr. WINSLOW. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. GRAHAM].

Mr. GRAHAM of Illinois. Mr. Chairman, this is the bill that has been asked for by the President, who perhaps has more definite and accurate information on this subject than anyone else. The bill has his approval. Before one votes against it and for some substitute measure he ought to have the best and most conclusive of reasons to sustain him in departing from the judgment of the Chief Executive in this matter. The only two contentions made by the gentleman from Indiana [Mr. BLAND] about this bill are contentions which it seems to me have but little merit when it comes to the real question of the consideration of whether this bill shall pass or whether it shall not. The gentleman from Indiana [Mr. BLAND] says, in the first place, that we have taken some of the teeth out of this measure because we have not put into it certain provisions that were in his bill originally. These provisions are those stating that the commission is formed for the purpose of obtaining information for legislative purposes and to help the War Department and the Navy Department get coal and the District of Columbia to get a coal supply. I do not believe there will be any opposition; I know so far as I personally am concerned as a member of the committee I shall not oppose any amendment including those as additional reasons for this legislation, if the gentleman desires to offer any such amendment; but in my judgment the language of the bill is amply sufficient and broad enough to include all of those purposes, and I do not believe the Supreme Court of the United States will hold this act to be unconstitutional if it can see, in reading its broad powers, that it might cover the definite purpose which would make it constitutional. I believe the court will use a reasonable construction in that respect and will construe it to be constitutional if it can possibly do so. The provisions of the bill to which attention has been called by the gentleman from Kansas [Mr. HOCH] are broad enough; but if the gentleman from Indiana thinks they are not, and if he will offer his amendment putting in the provisions which he has proposed, I can see no objection to them if they will in any way strengthen the bill. So that disposes of that objection. It is a matter that the House can attend to when it comes to considering the bill for amendment.

The other respect in which the gentleman from Indiana [Mr. BLAND] claims that this act is unconstitutional is based upon the theory that no commission can legally do the things and make the inquiries this commission is authorized to do or make. It seems to me that is not borne out by the authorities he cites. I will not have time to go extensively into that question, of course, in the few moments I have, but I want to call your attention to the leading case cited by the gentleman which he says holds that the commission may not inquire into these facts. Let us look at it for a moment. It is found in Two hundred and thirty-seventh United States, at page 434. I will call attention to one or two clauses of the syllabus to show you that the case does not at all bear out the contention of the gentleman from Indiana [Mr. BLAND]. I had not seen the case before coming into the room here, but I have looked at it hastily while sitting here, and I think the case is not at all on all fours with the proposition here. The case is that of Ellis against the Interstate Commerce Commission, and one section of the syllabus says this:

> The Interstate Commerce Commission may not in a mere fishing expedition interrogate a witness in regard to the affairs of a stranger on the chance that something discreditable may be disclosed.

Of course, the Interstate Commerce Commission can not do that. Now, let us look at the opinion briefly. On page 443 this language is used—

> It—
>
> That is the Armour car lines—
>
> has no control over motive power or over the movement of the cars that it furnishes as above, and in short, notwithstanding some arguments to the contrary, it is not a common carrier subject to the act.

First, the Supreme Court holds that it is not a common carrier engaged in interstate commerce, and therefore that the Interstate Commerce Commission has no jurisdiction over it. Then further along it says:

> The appellant's refusal to answer the series of questions put was not based upon any objection to giving much of the information sought but on the ground that the counsel who put them avowed that they were the beginning of an attempt to go into the whole business of the Armour car lines—a fishing expedition into the affairs of a stranger for the chance that something discreditable might turn up.

In other words, the court held in that case that the Armour car lines were a stranger to that case, and hence that the Interstate Commerce Commission could not go into a fishing expedition as to their business.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARRETT of Tennessee. Mr. Chairman, I yield five minutes to the gentleman from California [Mr. LEA].

Mr. LEA of California. Mr. Chairman, I believe it will be a fundamental mistake if this Congress adopts the Bland bill, which would make this an investigation by interested parties. The worth of this bill, if it has any, is going to be in the personnel of the commission. That commission can not, in my judgment, perform a useful function in doing the work this bill confers upon it unless it proceeds within a judicial frame of mind. Its work is essentially judicial. That requires the disinterested members the President has recommended. Whenever we place interested parties on that commission we damn the investigation from the beginning, because its reports can not possibly carry prestige or gain the confidence of the American people. [Applause.]

As to the other provision that is primarily asserted in favor of the Bland bill, that we have not broadly enough asserted the reasons for this investigation, that might be a reason for amending the bill, but it certainly is not a reason for repudiating it.

However, these are not the matters concerning which I desire to address the House. First, I call attention particularly to section 4 of the bill—the immunity section. In effect it provides that no man shall be excused from giving testimony on the ground that it would incriminate himself, but relieves him from subsequent prosecution for crimes about which he may be compelled to testify. That is not a new provision. A similar provision is found in the Federal Trade Commission act and in the Tariff Commission act and in the Labor Board act. It is necessary in order to comply with amendment 5 to the Constitution of the United States, which, among other things, provides:

> No person * * * shall be compelled in any criminal case to be a witness against himself.

There are two fundamental rules which rise out of this constitutional provision. The first is that the legislature may compel a witness to give testimony which may incriminate himself.

The second is, that can be done only when the law gives the witness immunity coextensive with the constitutional guaranty. In other words, it is not sufficient simply to say that the testimony of the witness shall not be used against him, but the legislature must go further and in effect relieve the witness from responsibility for prosecution and conviction of the offenses concerning which he is compelled to testify. The Bland bill is a little different from this bill in this respect. It conforms to the interstate commerce act, which provides that the witness shall be exempt from immunity concerning those matters about which he "may" testify. It will immediately be observed that the interstate commerce act and the Bland bill following that act are each broader in extending immunity than is the bill before the House. This bill provides that the witness shall be excused only when he is "compelled" to give testimony concerning those facts which may incriminate himself. In other words, the Bland bill extends immunity to every witness concerning every matter about which he testifies, whether voluntarily or not, and the bill before the House gives him immunity only when he is compelled to testify as to a particular fact which might otherwise incriminate the witness.

We have not done that blindly. I have attempted in the time available to look up the decisions of the courts. I find that the same language in this bill is embodied in a law in the State of Washington. That law has gone to the supreme court of that State, and it has been sustained. In other words, the immunity that we give, not as broad as that given in the interstate commerce act, is constitutional.

Another provision refuses to grant corporations this immunity. The Supreme Court has decided that a corporation is an instrument, a creature of the State. The State reserves the right to compel it to account in all respects, and therefore a corporation is not entitled to this immunity. I believe this section is just. It in good faith conforms to the constitutional requirements, and yet makes the limit of immunity as narrow as it is possible to draw the line and make it legal and effective. I believe, on the whole, this measure is wholesome and just. It is broad enough in its powers to authorize this commission to collect

every fact that is essential to present to Congress on which to base future legislation. [Applause.]

Mr. WINSLOW. Mr. Chairman, I yield two minutes to the gentleman from Michigan [Mr. BRENNAN.]

Mr. BRENNAN. Mr. Chairman, this bill providing for a fact-finding commission to investigate the coal industry has some value; but, standing alone, it is conceded that it is utterly ineffectual in so far as furnishing a remedy in the present crisis or in so far as preventing the almost inevitable coal shortage of next winter. If Congress can not reopen the mines by legislation, if we can not by law force increased production of coal, we can at least legislate to protect the public with relation to the coal on hand and the restricted amount which will be produced during the next few months. Already serious complaints of profiteering in coal are coming in from all parts of the country. Whether the strike is settled immediately or not, it is certain that there will be suffering and hardship next winter unless Congress immediately takes steps looking toward an equitable distribution of the available coal at a fair and reasonable price. While I shall vote for this inquisitorial measure before us to-day, I would much have preferred to have had the opportunity of voting to-day upon a bill designed to curb profiteering and to prevent unconscionable operators and middlemen from taking advantage of the dire necessities of the consuming public caused by the present famine in fuel.

To me the most urgent appeal in the President's message of last Friday was that which was contained in the following words:

> The almost total exhaustion of stocks of coal, the crippled condition of the railways, the distressed situation that has arisen and might grow worse in our great cities due to the shortage of anthracite, the suffering which might arise in the Northwest through failure to meet winter needs by lake transportation, all these added to the possibility of outrageous price demands, in spite of the most zealous voluntary efforts of the Government to restrain them, make it necessary to ask you to consider at once some form of temporary control of distribution and prices.

As the Republican nominee for President, it was Senator Harding who coined the phrase, later strongly indorsed by the people, that there should be "less government in business." It is convincing proof of the seriousness of the present crisis when the father of these words, now the President of the United States, finds it necessary to ask for the strongest sort of governmental interference in this particular business out of regard for the public welfare.

We must know that the President would be one of the last to ask for this sort of legislation unless he was convinced of the immediate necessity for the same. The bill before us provides that the first report of the coal commission shall be submitted not later than January 1, 1923. Unless some further and more drastic action is taken by Congress at once it may be that the chief value of these reports will be that they will be used by the people in their stoves as a substitute for fuel. Some of the cartoonists of the country, perhaps not over friendly to the party in power, have been likening Congress during the past week to the well-known Roman Emperor who insisted upon rendering a violin solo while Rome burned. The comparison is unfair and inaccurate. There is no danger of the country burning this winter; but, unless this body acts at once, there will be justification for referring to Congress as fiddling while America freezes.

Mr. WINSLOW. Mr. Chairman, I yield two minutes to the gentleman from Minnesota [Mr. KNUTSON].

Mr. KNUTSON. Mr. Chairman, it is plain to be seen that something must be done to relieve the situation existing in the country at the present time. I have not very much confidence in commissions of any character, because in the past they have failed to accomplish anything tangible. However, it seems to me that this House would make a mistake, if we are to have a commission, were we to substitute the Bland bill for the measure reported out by the committee. The gentleman from California [Mr. LEA], who just preceded me, pointed out several very important features of the committee bill which are superior to those contained in the Bland bill, and I for one propose to vote to pass the committee bill.

Something must be done to relieve the acute shortage in coal, and if the commission which this measure proposes to create for the purpose of studying the coal situation can gather some definite data upon which to base legislation to regulate the coal industry it will be worth while.

Ever since I can remember we have had sporadic strikes in the coal fields, and it is my belief that the trouble can largely be laid at the doors of the operators. There are too many mines being operated and also too many miners engaged to supply the needs of the country. The result is that the miners are out of employment a great portion of the year. It would seem that the proper thing for us to do is to have a careful survey made with view to correcting that phase. Let the coal industry be so organized that the miners employed can work the year round. Of course, Congress can not say to A, B, and C, "Close down your mines, for they are not necessary." We can, however, so regulate the business and fix the prices at the mines that the high cost-producing mines will be compelled to shut down until such a time as they can be operated continuously and at a resonable profit.

In my section of the country we are paying around $14 per ton for bituminous coal and $20 for anthracite. The American people can not continue to pay such outrageous prices, and we must do something about it at once. Let us have all the facts so that we can legislate intelligently, and let us have the information at the earliest possible date.

Mr. WINSLOW. Mr. Chairman, I yield two minutes to the gentleman from New Jersey [Mr. PARKER].

Mr. PARKER of New Jersey. Mr. Chairman and gentlemen of the committee, the important question as I understand it about coal is to have continuous mining, as well as transportation when transportation is cheap. If the mining be not continuous, miners do not get regular employment, for too many mines have to be worked at one time and too few at another. There is no fairness in that. Continuity requires storage in large quantities where the coal is to be consumed. I might say the same thing about food. We want the old storeroom as well as the wood pile that carried the family through the winter in order to be saved from distress caused by interruptions of transportation and in order to have any certainty about our life.

One matter has interfered with storage. In our State we once had two enormous coal piles, enough to take care of the city of New York and its neighborhood for months. Those coal piles were useful in keeping up constant mining and distribution, and they no longer exist only because of the fact that the little towns where those coal piles were kept thought it a good thing to get a tax every year from millions of dollars' worth of coal. The railroads and the coal dealers objected that this coal was part of interstate commerce and that it only stopped on the way, but the courts held that it could be taxed by the locality. The great dealers for this reason could not profitably keep up a scheme which was for the benefit of the public, and some investigation should be ordered by this bill not only as to distribution but as to storage as a part of interstate commerce, and some remedy should be found by which such storage near to the consumer may be encouraged. [Applause.]

Mr. WINSLOW. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. DENISON].

Mr. DENISON. Mr. Chairman, I shall vote for this bill if I have to, if it can not be changed from the form in which it was reported. It does not suit me; I would change it if I could, and endeavored to do so in committee. There are a number of provisions that I do not approve of. I do not think that we ought to create a commission of nine men and pay them each $10,000. Five or seven members are plenty, and $7,500 each is an ample salary. I do not think there is any necessity or excuse for more members or more pay than that. I do not think that we ought to appropriate $500,000 to make the investigation. Two hundred and fifty thousand dollars is plenty. I do not think it is necessary or excusable, and if we appropriate that amount a part at least of it will be wasted. We had a committee of the House that spent two years investigating all the war transactions; they went all over this country and Europe and made a thorough investigation of the immense war transactions and only expended about $250,000. So I say it is absolutely inexcusable for us to appropriate $500,000 to make an investigation of a single business in this country.

Let me say that this bill would not be considered now if it were not for the President's message. If the bill is passed the President will be entitled to the credit for it or will he be responsible for it. We have had bills pending before Congress for months asking for a fact-finding commission of this kind. Senator BORAH has had one before the Senate for months. The gentleman from Minnesota [Mr. NEWTON] has had a bill before our committee for months asking for a fact-finding commission and authority to make an investigation of the coal industry. The gentleman from Indiana [Mr. BLAND] has had a similar bill before the House. They were not seriously considered. Now the President comes before Congress with a special message and asks for a fact-finding commission and here we are precipitately passing a bill which I must admit has not had very much serious consideration.

History repeats itself here as elsewhere. In 1916, I think, there was a great strike threatened. The people knew the situation, or Congress did at least. President Wilson came before

us with a special message and demanded instant legislation and Congress hastily bowed to his wishes and passed what is known as the Adamson law. I have heard of some Members who are not very proud of what they did on that occasion.

Here we have another strike and another threatened strike and the President comes before Congress with a special message and asks for certain legislation, and although there has been similar legislation pending before Congress for months without special attention being given it by Congress, yet when the President comes and asks for a fact-finding commission here we are without very serious consideration rushing in to pass a bill. I am in favor of a fact-finding commission to investigate the coal industry, but if we should pass it I think we ought to have done so long before now. I do not think we ought to pass it in the form in which it is now reported if we can get a better measure. I shall vote for this bill if we can not get a better one.

I represent a district in which the largest industry is the coal-mining industry. I shall vote for this bill because I do not want to appear to be afraid of an investigation of that industry, and I do not want to leave the impression upon anyone that the coal operators and the coal miners who are engaged in that great industry in my district are afraid of or object to an investigation. Therefore, I shall vote for the bill if we can not amend it, but I do hope that the committee will amend it in some important respects.

The bill should be amended to provide for a commission of five members. That number will do better and quicker work than nine. We should amend the bill to provide salaries of $7,500 instead of $10,000 for the commissioners.

I think the bill should be amended so as to provide that at least one member of the commission should be an experienced coal miner and one member an experienced coal operator. The industry is entitled to this representation on the commission; and if the industry is not given some fair representation on the commission, both operators and miners will feel that they have not been given fair treatment and will not have much confidence in or respect for the commission's findings and recommendations.

The bill should be amended so as to reduce the amount appropriated. I do not think it is excusable to go into the Public Treasury to the extent of $500,000 and allow this commission to throw money away in making an investigation as to facts of a single industry like the coal industry. The President's message is no excuse for us to lose our heads and forget the Public Treasury. I want to go along with the President and comply with his request. But we can improve this bill by these amendments and still satisfy the President's recommendations.

Mr. WINSLOW. Mr. Chairman, I may be doing the unusual thing, but whenever my committee is attacked by anybody I feel called upon to stand up in my boots and speak for my committee associates. The gentleman who has preceded me is a member of our committee, and he would have you think, from his speech, that he thought that our committee action was hasty and untimely. The gentleman himself, unassociated, prepared a bill to meet the President's call and was prepared to lay it before our committee for consideration, but another bill was taken up instead.

Mr. DENISON. Will the gentleman yield?

Mr. WINSLOW. Certainly.

Mr. DENISON. I did not file my bill after I talked with the chairman and found that he was filing one. I did not ask for consideration of my bill. I was preparing a bill in response to the President's request, but I did not ask for its consideration.

Mr. WINSLOW. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. COOPER].

Mr. COOPER of Ohio. Mr. Chairman and gentlemen of the House, as a member of the committee which had the bill under consideration I shall be very happy to vote for it. Not being a lawyer I shall not attempt to discuss the constitutionality of this measure. I think that has been generally gone over by the lawyers of the committee. I was interested in listening to the remarks of the gentleman from Illinois a few moments ago in which he said that at various times Congress had bowed to the will of the President, and he referred to the action that Congress took on the passage of the Adamson law. It seemed to me that he tried to leave the impression that this bill we are now considering is along the line of the Adamson bill. On last Friday we had the pleasure of listening to the President. He came to talk about the coal question and the railroad labor situation. I believe every Member of this body who looked into his face as he made that wonderful address realized what the President had passed through during the last five or six months. These questions have weighed very heavily on his heart, and I am sure he came to Congress to let us know how he felt about it. He wanted the American people to know what was his position and how hard he had worked and tried to bring out a solution and adjustment of these great questions. In his message he requested Congress to create a commission which might help to solve the coal problem, and I want to read what he said along that line:

> Because of these things, because of the impressions of many cases of unjustifiable profits in the industry, and because public interest demands investigation, and demands the finding of facts be given to the public, I am asking at your hands the authority to create a commission to make a searching investigation into the whole coal industry, with provision for its lawful activities and the bestowal of authority to reveal every phase of coal production, sale, and distribution. I am speaking now on behalf of mine workers, mine operators, and the American public. It will bring protection to all and point the way to continuity of production and the better economic functioning of the industry in the future.

Then he went further on and he said:

> The necessity for such a searching national investigation with constructive recommendation is imperative. At the moment the coal skies are clearing, but unless we find a cure for the economic ills which affect the industry and therein find a basis for righteous relationship, we shall be faced with a like menacing situation on next April 1 on the expiration of the wage contracts which are now being made.

You notice that the President requests that the law provide that the commission shall make a report before January 1, 1923. The Bland bill does not require the commission to report for two years.

The Winslow bill before the House at this time provides that the commission shall make a report not later than next January 1. Now, the President expressly asked that there be some report made in order that we could try to get the information and the facts before Congress by the time the present wage scales expired. I believe that the President has these great problems on his heart, and I think we should stand by him and pass this bill and see if we can not come to some solution in trying to solve these great labor and economic questions before the country at this time. [Applause.]

Mr. GARRETT of Tennessee. Mr. Chairman, I yield five minutes to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Chairman, in June, 1919, I sought to get an investigation of the coal industry. Profiteering in coal was going on then, and I foresaw that we were going to have a riot of profiteering to follow. I introduced a bill providing for a congressional commission to that end. I also introduced a companion bill to limit the price at which coal might be sold. About September, 1917, Senator FRELINGHUYSEN introduced a bill embodying very much the same idea. Under the Frelinghuysen bill a limited investigation was carried on by a committee of the Senate. It disclosed a situation which demanded the attention of the country and legislation by Congress. In the course of the Calder investigation the coal industry was gone into pretty exhaustively by a subcommittee of the Senate committee, of which the subchairman was Senator LA FOLLETTE. Two volumes of hearings were published, carrying a great deal of information concerning the subject. Following upon the report of that committee, Senator FRELINGHUYSEN introduced another bill which embodied almost identically the same idea as this bill. That was about February, 1921.

Early during the present Congress the gentleman from Minnesota [Mr. NEWTON] introduced a bill quite similar to the Frelinghuysen bill. It carried substantially the same idea that is embodied in this bill. The Newton bill has been before the Committee on Interstate and Foreign Commerce for more than a year, yet no hearings have been held upon it. In March, 1922, the gentleman from Indiana [Mr. BLAND] introduced a bill for a coal facts-finding agency—it then appeared that a coal strike was inevitable. The action which is now proposed to be taken might as appropriately have been taken at any time within the last three years. It might even better have been taken at any time before the present, because it can not possibly have the slightest relation to the present coal situation.

This bill is brought forward under the mask that it is a strike measure; that it has some relation to the existing coal situation. It has not the slightest thing in the world to do with the present coal situation, and any pretense that it has is just the purest "bunk" that was ever put out in a "bunk Congress." We are going through our usual performance today of dealing with the bill as though it was a matter of emergency and of the greatest importance. As usual, we are going through the pretense of doing something in connection with the present situation without really doing anything. If the coal industry needs investigation now, it has needed it ever since the war.

Mr. THOMAS. Will the gentleman yield?

Mr. HUDDLESTON. I trust the gentleman will excuse me. An investigation may produce some results. But it must be remembered if any results be produced they will not be of the slightest value to the country within the next 12 months. The

real fact is that this bill is now being put forward for the partisan political purpose of clearing the skirts of the majority and the administration for the neglect——

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARRETT of Tennessee. I yield one minute more to the gentleman.

Mr. HUDDLESTON. The bill is being pressed for the purpose of clearing the skirts of the majority and the administration for their neglect of the coal situation, for the complacency with which they allowed the strike to occur without making an honest effort to avert it, and for their lack of courage and intelligence to deal with it. That is the whole purpose. It is a smoke being raised. Will it do it? No. There will be shivering from cold next winter in many of the homes of this country, industry will suffer, and women and children will want food. The people will have plenty of time to reflect upon the supineness of the administration. They will have time to reflect that those in control of the powers of government have been remiss in their duty. I hope that the blame may be placed where it belongs.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GARRETT of Tennessee. Mr. Chairman, I yield 15 minutes to the gentleman from Kentucky [Mr. THOMAS].

The CHAIRMAN. The gentleman from Kentucky is recognized for 15 minutes.

Mr. THOMAS. Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. THOMAS. Mr. Chairman and gentlemen of the House, it is my purpose to discuss for a brief time the pending coal bill introduced by the gentleman from Massachusetts [Mr. WINSLOW], but I shall discourse more at length on the subject of "The light that failed."

About 18 months ago this administration began with the Harding normalcy prosperity special on the main track. It started with a great blowing of whistles and ringing of bells, but it got stuck in the tunnel of hard times and is 18 months behind time with a dead engine and no fire in the furnace and no water in the tank and has come to a standstill and is unable to proceed.

There is little, if anything, in the Winslow bill. It provides for a commission with large salaries to investigate the coal situation. I suppose it should be adopted because a shot in the dark may be better than nothing. It provides for an investigation of the coal situation by a commission which does not know a thing about the coal business. That commission should consist of practical coal miners and practical coal operators, of men who know what they are to investigate and how to make the investigation. If a person is ill, he sends for a physician and not a blacksmith to attend him. If a person desires to erect a house, he sends for a carpenter and not a druggist to build it. Only miners and operators know or can properly obtain correct information as to the cost of producing coal.

The number of miners employed, their wages, the number of tons of coal mined and the cost of mining it, the upkeep of the mine, the interest on the money invested, and the freight rates are the matters to be determined, to which should be added the cost of the miner's living and the average number of days he is able to obtain employment. These are the matters that should be fairly investigated and determined in the coal-mining industry, but this can not be properly done by a commission which has no practical knowledge of the business. The coal industry at best is a hazardous and dangerous calling. It is almost as dangerous as making a Democratic speech in the Kentucky mountains when the Harding cohorts are on the rampage.

It is a customary pastime and a favorite diversion of the leaders of the Harding administration to proclaim with confident and impudent assurance that the Democratic Party has always been a party of negation, without sufficient ability to enact any legislation of lasting benefit to the country, and they have proclaimed that fable so frequently that they themselves have almost come to believe that their unfounded assertion is the truth. The facts of history refute all such statements.

The conception of American liberty, like Jupiter, from the brain of Minerva, sprang full fledged and panoplied from the masterly intellects of the fathers of the Democratic Party. They founded this Republic on the principles of equal rights to all and exclusive privileges to none and on the doctrine of equal and exact justice and the equality of all men before the law.

While an ancestor of Senator LODGE, leader of the administration forces in the Senate, was being accused of treason to the united Colonies the sunshine of freedom was casting its beneficent beams across the mountain tops of North Carolina and radiating thence to the most distant parts of the land.

Liberty in this land first found open, concerted expression in the adoption of the Mecklenberg declaration of independence, and that action of the valiant North Carolinians set in motion the forces of resistance to England which resulted in the complete emancipation of the Colonies. Thomas Jefferson, a Democrat, was the author of the Declaration of Independence, the greatest chart of human liberty ever conceived by the mind of man, while Madison, another great Democrat, was the father of the Constitution under which we live—the greatest of all constitutions, a constitution that has withstood the assaults of iconoclasm and the mutations of time. The fathers of Democracy erected this Republic on the sure and lasting foundations of the Declaration of Independence and the Constitution, and their labors will be recognized as a perpetual monument to their wise forethought, their genius, and transcendent abilities when the men who assert that the Democratic Party has never produced any statesmen of constructive ability are dead and forgotten.

The Democratic Party has been in power, comparatively, but a short time during the past 50 years, and I never hear administration leaders criticize the administration of Cleveland, but they reserve all their powder and shot for assaults on Mr. Wilson. When Harding came into power "normalcy" was the leading feature pictured at the administration "normalcy" comedy of errors, and Mr. MONDELL, leader of the administration majority, frequently recited in soleman and enthusiastic language how the Democratic Party had never been constructive; how it had never done anything, and how the Republican Party, as he calls it, is possessed of all the intelligence and patriotism in the country and the only party capable of enacting any beneficial legislation. To hear the melancholy looking gentleman declaim about the virtues and wisdom of his party one would think that wisdom and normalcy will die with this administration.

The present administration is not a Republican administration. There is nothing Republican about it. It is a Wall Street administration, and I will not insult the memories of Lincoln and Grant by calling it a Republican administration. Neither Lincoln nor Grant if living would be admitted to a modern Harding primary or caucus, now called conference by Harding adherents because of the bad odor their caucuses emit. Lincoln, with prophetic vision, foresaw the future, and declared that corporations will become enthroned and an era of corruption will follow, and he feared for the safety of his country. He must have foreseen the advent of the Harding administration. The principles, purposes, and actions of the Harding party are as far removed from the teachings of Lincoln and Grant as the farthest and brightest star that sweeps through the immensity of space is distant from this earth.

The administration led its deluded followers to believe during the campaign that if given power it would "make good" and at once restore peace, plenty, and prosperity, but it now blames its lamentable failure on the war, and declares that Wilson bequeathed it a heritage of ills that it will take time to remedy. Its excuses remind me of an experience I had with some Washington druggists. During the war I entered a Washington drug store to purchase a small article for which I usually paid 5 cents.

The druggist charged me 15 cents for it. I inquired why he charged that price. He replied, "It is all on account of the war," and stated that the article was made in Germany, and that no more could be obtained and therefore the price had advanced. Afterwards I went to another drug store to purchase exactly the same article, was charged 20 cents, and told the same falsehood about the article being made in Germany. I went to a third drug store, purchased the same article, and was charged 5 cents. I related to the last druggist my experience with the other two, and he replied, "They told you a falsehood; that article is not made in Germany but is made in Philadelphia, and did not cost me quite 1 cent." So the administration's failure to return to normalcy and its excuse of war as the cause is about on a level with the excuse of the Washington druggists for charging profiteering prices.

Mr. MONDELL, in his keynote address to the House, reciting the alleged accomplishments of the Harding administration in enacting legislation beneficial to the country, called attention to numerous private bills which are of no benefit to anyone except the private individuals in whose interest they were enacted, and many of them are of the most glaring species of graft. He also, with heaving bosom, swelling chest, and great pride, called attention to public bills which are the product of ad-

ministration intelligence. He recited the emergency tariff law, the immigration bill, the Budget bill, the peace resolution, the bill providing for a Treasury deposit of $25,000,000 for the Farm Loan Board, the bill organizing corporations to promote foreign trade, the decentralization of the War Risk Bureau, the bill for Federal supervision of the meat industry, a good roads bill in conference, a bill to extend farm credits through the War Finance Corporation in conference. This is about the sum and substance of nearly four years' labor, as detailed by Mr. MONDELL, and most of this legislation is not constructive but is destructive. It was claimed that the emergency tariff law would remedy all ills of which the farmers and business men are suffering and that prosperity, like the dews of heaven, would fall on all parts of the land.

Mr. MONDELL'S defense of the administration and his claim of prosperity were obviously only a feeble flourish.

If the emergency tariff act, as we were informed, was a cure for all the diseases of the body politic, why pass the Fordney tariff law or any other tariff law at all? The alleged achievements of this administration remind me of Pony Mopps. Pony was a candidate for president of the town board in his village on a platform of normalcy, prosperity, and many reforms. At the end of a year he announced he had made the following reforms:

A talked-of swimming pool.
New courthouse steps contemplated.
A reduction of taxes in the background.
Four new lamp-posts proposed.
A budget system suggested.
A party split almost ironed out.

The emergency tariff law was enacted for the specific purpose of deluding the farmers and other business interests, leading them to believe it would enhance the value of farmers' products and make business better, when, as a matter of fact, most all farm products have declined in value since the passage of that law, and prices still have a downward tendency.

The immigration bill is practically worthless and foreigners are pouring into this country by way of Canada, Cuba, and Mexico, while the law at the port of New York is administered principally by foreigners, and how many who should not enter come in through that port is not known. Whenever the gates to immigration are closed and those who have been in this country more than five years without becoming naturalized citizens are deported, then the immigration question will be settled as it should be. This administration really desires an influx of foreigners into this country that their cheap services may be utilized in competition to American labor by the interests who are the masters of the activities of the Harding administration.

The budget bill is heralded as a masterly piece of constructive legislation. That bill was passed in imitation of the laws of England, France, and other European countries, and, in my opinion, violates the constitutional rights of Members, and is an echo from the dead past of feudal times. The law is a cumbersome piece of autocratic machinery that serves no useful purpose whatever.

All bills authorizing appropriations must be referred to that committee, and no Member can secure the passage of a bill authorizing any appropriation whatever without the approval of that committee. And then, if that committee approves the appropriation it must next run the gauntlet of the millionaire steering committee, composed of seven millionaires. If the steering committee approves the bill it is reported to the House and placed on the calendar or brought up for consideration by a special rule. If it does not meet the approval of the steering committee it is laid aside and passes into that legislative sleep from which it never awakes. Under this administration seven millionaires determine what legislation shall be enacted and what shall be refused, and that is the Budget system, on which the administration lays great stress.

Administration leaders seem to be quite proud of the fact that they decentralized the War Risk Bureau and changed its name to the Veterans' Bureau, and scattered the war records all over the United States, depositing them at 14 different places and increased the number of employees from about 7,000 to about 18,000, and this they claim to have done in the interest of economy. General Dawes, he of "hell and Mariah" notoriety, was imported by Harding to take charge of this important work. He erroneously conceived the idea that he is a great man, especially adapted for the reorganization of that bureau and the entire Government, but since he has completed his reorganization scheme no man can tell heads or tails of that bureau. The service is inefficient and incompetence is in full command, and Congressmen have little, if any, opportunity to examine the records of their soldier constituents. The whole thing was a bungle and mistake. "Hell and Mariah" Dawes came to Washington with a noise like the rushing of many winds and was heralded with a mighty blast of newspaper trumpets, and for a time occupied the front pages with many and picturesque "cuss" words, but he seems to have passed out of public view, while that brave and able warrior, General Sawyer, seems to have replaced him in the confidence and affection of this normalcy administration. General Sawyer struts nobly in his new uniform, which always appears to me to be several sizes too large for him, and when I see him he reminds me of a picture of "puss in boots."

The administration, through Mr. MONDELL, claims credit for the good roads law. For many years the administration party resisted and defeated every effort to appropriate money for the purpose of building good roads, and that law was passed by a Democratic Congress and approved by a Democratic President. All this administration has done in regard to good roads has been to reduce the appropriation from $100,000,000 to $74,000,000, thereby retarding the work of constructing better roads. As a matter of fact, the party of Mr. MONDELL, through all its devious and tortuous history, defeated every attempt to appropriate money for that purpose, and it would not now make any appropriation but for a fear of the righteous wrath of the people.

Harding declared against the League of Nations, and on that issue won the election, although he voted, when in the Senate, a number of times for a league of nations. He called a four-power disarmament conference, consisting of the United States, Great Britain, France, and Japan, and entered into a league of nations with those powers, which differs in no essential respect from the treaty of Versailles. He entered into this treaty on the ground that not to do so the United States would isolate itself from the world and would be compelled to follow a course of nonparticipation in world affairs.

Those nations were invited by Harding to participate in an alleged disarmament conference, and the result so far as disarmament is concerned amounted to nothing except numerous banquets and a lot of cheap advertising. It was agreed not to build any more battleships, as they are defunct and of no service in time of war. But the nations proceed as before in building airships and submarines, strengthening land forces, and manufacturing deadly implements of war, and armies have not been disbanded nor navies scuttled among the nations who signed this compact. The fires are kept burning and the hammers are constantly ringing in the factories which produce the instruments of death.

There is no difference in principle between a four-power league of nations and a league consisting of many powers, and the greater number of nations embraced in such league the more effective it becomes.

Harding's league of nations is a treaty which guarantees the financial assistance of this country to Japan in the event that power is attacked by a foreign foe. There is no essential difference between the much discussed "article 10" of the treaty of Versailles and "article 2" of Harding's four-power league of nations.

The European conspirators outwitted Harding and the foliage-faced Secretary of State and secured a treaty which will leave this country to the mercy of the combined naval power of the other three parties to the compact.

The first disarmament treaty to which the United States was ever a party was the Rush-Bagot treaty of 1818, which was negotiated by a Democrat and approved by James Monroe, a Democratic President. That treaty was made with Great Britain and provided for disarmament on the northern lakes, dividing the two countries; and no additional vessels were to be built. One vessel of a hundred tons was permitted on Lake Ontario, and one on Lake Champlain, and two each on the other Great Lakes. As a result of the wise statesmanship of a Democratic President that treaty has been in effect for more than a hundred years to the mutual benefit and advantage of both countries. In the face of this history Harding adherents claim that his four-power league of nations was the first thing of the kind ever proposed and acclaim his idea the greatest achievement of ancient or modern statesmanship.

The emergency tariff law was enacted with the express promise that it would bring instant and permanent relief to the agricultural class, but the American farmer has yet to experience his first period of high prices under that tariff law and this normalcy administration. In ancient Egypt there were seven fat years and seven lean years, but since the advent of Harding into the Presidency the farmer has experienced nothing but lean periods.

For a time wheat advanced in price, but the advance in the cost of farm machinery and farm implements and other farm necessities have been much greater than the advance in the

price of wheat, so that the profits on wheat raising have not only decreased but have almost disappeared.

That able and experienced agriculturist, President Harding, declared in a speech in the United States Senate, July 19, 1917, that—

in this latter day farming has become an occupation for profit; and I happen to know that under normal conditions dollar wheat makes it a very profitable occupation.

The man who states that under normal conditions wheat can be profitably raised for a dollar a bushel in the State of Ohio or elsewhere on land that cost from $150 to $200 per acre does not know what he is talking about or anything about farming.

The most I can learn from Harding's congressional biography is that he was never a farmer, but entered into the newspaper business when 19 years of age, and there remained until elected to the United States Senate, and consequently does not know anything about farming or the cost of agricultural products. Prior to his entry into the newspaper business, if newspaper reports be correct, he spent much of his time tooting a horn in the village brass band, and consequently was never in position to give farmers advice about raising wheat.

According to the report of the Secretary of Agriculture, the total value of the principal farm products for the year 1921 was $5,675,000,000, while for the year 1920 their value was $9,075,000,000, and the two years prior to that time their value was $13,675,000,000. The income of the agricultural class under this "normalcy" administration for that short period was reduced $800,000,000. It is estimated that industrial workers lost, in 1921, $500,000,000 through lack of employment, and in addition many more millions were lost because of a reduction of wages. The producers of the country since Harding's presidential incumbency have been unjustly deprived of a sum sufficient to pay the entire national debt.

Wheat has fallen to a dollar a bushel and less since Harding has been President, while the price of bread and flour has fallen but little, if any. Under present conditions it costs about $20 per acre to raise wheat, and even if a farmer could raise 20 bushels to the acre, which can be done only in rare instances and on the best wheat land, he would only come out even, raising a-dollar-a-bushel wheat.

Western farmers are burning corn for fuel, and deflation of the currency, brought about by this administration in the interest of big business, prevents the agricultural classes from obtaining credit at the banks, while the monopolist can obtain all the credit he desires. He operates his business on short time, and by cooperation with his fellow conspirators and skillfully evading the antitrust laws he maintains the price of his products at exorbitant figures, while the farmer, for lack of proper credit, is compelled to sell his products for any price he can obtain.

The Secretary of Agriculture does not have any remedy to suggest, although he claims to be a farmer, but his farming activities since he has been Secretary of Agriculture have been mostly confined to swivel-chair advice.

According to a report of the Secretary of Commerce, the United States in 1920 sold to foreign customers 218,000,000 bushels of wheat and 269,000,000 bushels during 11 months of the year 1921; and although our wheat exports increased over 50,000,000 bushels during that period, the price of wheat went down.

This condition of affairs was brought about by the ignorance or willful mismanagement of the Harding managers of the Federal reserve system, which oppressed the small banks and denied the farmers credit, so they were compelled to dispose of their crops for any price they could obtain, while the millers and speculators were pocketing the profits that should have gone to the farmers, and "normalcy" was the light that failed.

Our foreign trade has steadily decreased under Harding's fiscal policy. For the fiscal year ending June 30, 1922, our foreign trade amounted to $6,378,000,000. These figures show a decrease of $3,792,000,000 compared with 1921, when our foreign trade amounted to $10,170,000,000; and a prohibitive tariff, such as is proposed by the Fordney bill, will add millions to the cost of living, while the most stupendous railway strike in the world is paralyzing the commercial life of the Nation and great business concerns are closing down for lack of fuel, thus depriving thousands of employment, and "normalcy" is the light that failed.

While the Secretary of Agriculture was informing the country that the total value of farm products in the United States would not exceed $5,670,000,000, the Secretary of the Treasury was testifying that the yearly expenses of the Government under Harding's "normalcy" policy was $5,440,000,000. The value of farm products I believe are much greater than the sum cited if the farmers could have obtained fair prices for their products, while the expense of running the Government was much greater, but a thimblerig method of bookkeeping reduced the amount, I believe, actually expended.

Agricultural products have reached a low level, and if a farmer takes a cowhide to the country village for sale he is in luck if he returns home with a hame string in place of the hide he took to market. I heard of a farmer in South Dakota, where great crops of oats are grown, getting his back broken while in a field at work. Friends had gathered around to aid and console him when a stranger passing by inquired how the accident happened, and the reply was, "He broke his back trying to lift 25 cents worth of Harding oats." Millions of dollars more are wasted on the Agricultural Department than the benefit derived. I once heard a story of a conversation between a farmer and one of the verdant expert "bugologists" of the Agricultural Department, in which the old experienced farmer expressed his opinion to the effect that "when a farmer must learn the botanical name of what he is raising, and the entomological name of the insect that eats it, and the pharmaceutical name of the chemical which will kill it, somebody has got to pay."

Under the administration of Harding the "crown of thorns" presses heavily down on the brow of labor. The empty dinner pail, the empty coal bin, the depleted pocketbook, and the hungry stomach are a few of the results that now confront the country, and this administration is, in my opinion, the most sinister danger that in 500 years has cast its baleful shadow across the pathway of human progress.

Under the administration of Wilson prosperity was never so abundant and was shared by all classes. The farmer received double the price for his products he formerly got. The merchant saw his business expand until it was no longer a question of getting customers, but a question of waiting on those who voluntarily came to purchase. The deposits of the banker doubled and trebled, and the credit system was almost unknown, while the laboring man enjoyed a degree of prosperity never pictured in his wildest fancy. Judged by the present ability of the people to buy there are now in this country—

More feet than shoes.
More necks than collars.
More heads than hats.
More mouths than food.
More bodies than clothing.
More furnaces than coal.
More families than houses.
More homes than furniture.

The people may forget the President who kept us out of war, but it will be many years before they forget the President who kept us out of work.

A situation nearing national calamity prevails in the coal mining region, and Governor Davis, of Ohio, recently declared in a proclamation that "general depression in the coal trade has brought enforced idleness, and with it privation to thousands of miners. Large numbers verge on the brink of starvation. Miners have not appealed for charity, but ask that they be given a chance to fight want through work."

The Fordney tariff bill places a duty of 1.6 cents per pound on sugar imported from Cuba, and refined sugar may be imported at the rate of 1.2 cents per pound for every pound of sugar the American Sugar Trust refines. That trust refines nearly all the sugar refined in this country and is the only beneficiary of the rebate which will take about $20,000,000 out of the pockets of the American sugar users and add it to the swollen profits of the sugar refiners, while the price of sugar will advance, and the light of "normalcy" will fail, so far as the sugar buyer is concerned.

Before the war, according to the Manufacturers' Record, the labor cost of a pair of $3.50 shoes was about 60 cents; and during the war the labor cost increased about 40 cents, but the retail price advanced to $8.50. The labor cost of a pair of $18 shoes is $1.30; yet the manufacturers of shoes, while still maintaining their profiteering prices, are clamoring for a reduction of wages.

The administration revenue bill places a tax of 15 per cent on all corporations instead of the graduated excess-profits tax, thereby increasing the taxes of corporations making small profits and decreasing the taxes of large corporations which make large gains and contribute liberally to the campaign fund. The taxes of corporations which make profits of $100,000 or more are reduced, while the smaller corporations have had their taxes increased. Under this administration every scheme

of exploitation that inventive rascality can conceive has been used to gouge the public and levy tribute on the people.

The Fordney tariff bill lays a higher tribute on the necessaries used by the public than any tariff bill ever enacted. The average duties are higher than those of the Payne bill, which wrecked the political fortunes of President Taft, and the robbery will be resented by the people regardless of party affiliations.

During the Harding campaign the people were led to believe that the President had the power to declare war and that President Wilson did declare war against Germany. The power to declare war is by the Constitution vested alone in Congress, and Congress and not President Wilson passed the war resolution. Harding adherents had been clamoring for war for two years, and the war resolution was piloted through the House by Mr. KAHN, a Harding supporter; and so was the draft bill, the recommendation of the Democratic committee having been ignored in the matter. These measures were approved almost unanimously by Harding supporters, and yet the public has been led to believe that the war was the work of Wilson alone.

Harding's campaign was pitched on a platform declaring against the League of Nations and foreign alliances, but his administration negotiated a four-power league of nations and has been engaged in foreign entanglements since its beginning.

Wilson was criticized and abused for keeping soldiers in Germany and in Haiti, and although Harding has been in office nearly two years soldiers of this Republic still keep watch on the Rhine and the American flag still waves over German territory. Marines are stationed in Haiti to protect profiteering sugar interests, and this administration has meddled with the affairs of a number of South American countries. It authorized Costa Rica to seize and exercise jurisdiction over territory in dispute between that country and Panama which was in possession of Panama, and dispatched ships and armed marines to take up advantageous positions near the territory in dispute. It meddled in the affairs of Venezuela and received a curt note from that country to the effect it would be time enough for Harding to intervene in the affairs of that land when he established a republican and constitutional government in the feudal barony of West Virginia.

The Democratic Party, according to the statement of the inspired apostle of "normalcy," "has never done nothing nohow" and his party has accomplished all things that are good and grand and great. It is true his party freed the negroes, and they ought to have been freed, but it was done for the sole purpose of swelling the vote of a discredited party. His party freed the negroes, but the Democrats have fed them; and what is freedom without food? That act is about the sum and substance of all it can claim that is of any importance.

The Democratic Party added to the territory of this Nation the Louisiana Purchase and all the vast empire, except Alaska, west of the Mississippi, a territory richer than the valley of the Nile, and whose fields of waving wheat and corn feed millions of people. The fanes and temples of Democracy will remain forever unimpaired, a place of worship for the common multitudes and a lasting monument to the wisdom of the founders of this Republic when the acts of this administration are lost in the dusty pages of forgotten history.

The Democratic Party has been in power only 16 years during the last 62 years, and part of that time did not have control of all departments of the Government. During those 16 years it has accomplished for the benefit of the people, for progress and good government, more than the Harding administration and other like administrations have accomplished in all history. And during the Presidency of Mr. Wilson more beneficial laws were enacted than Harding's party ever enacted in all its life. To recite, a few of those laws were:

Income tax law.
Election of Senators by the people.
Federal reserve bank law.
Parcels post law.
Rural credit banks.
Antitrust law.
Corrupt practice act.
The shipping bill.
Eight hour day law and 13 other labor bills.
Child labor law.

To this list might be added many more good laws which the people approve.

Mr. MONDELL, in his recitation of legislation passed by the Harding administration, either through a lapse of memory or innate modesty, neglected to call attention to the Esch-Cummins bill, the great railroad strike, the great coal strike, and general unemployment now aboard the fast-running "normalcy" special. I presume he would have done so, but "normalcy" is the light that failed.

On second thought, the administration has done some things; it has coined a new peace dollar with an eagle on one side and a rising sun on the other. Instead of an eagle there should have been a crow cawing at normalcy, a four-power league of nations, and numerous foreign entanglements, strikes, and unemployment.

The troubles of the farmer under "normalcy" are many and serious. They range from cheap farm products to 8 per cent notes, and from large land depreciation to big pocketbook deflation. During the war the slogan of the laboring man was "no beer no work," and now he has neither.

To my mind there was never a more unjust or unfair law passed by an American Congress than the Esch-Cummins railroad law, passed by this administration.

For six months after the railroads were returned to private individuals a rental amounting to $475,400,000 was guaranteed by the Government. The bill provides for a 6 per cent return on a valuation of $18,900,000,000, or $1,134,000,000 annually, $8,000,000,000 of which is watered stock. The bill appropriated $200,000,000 to cover deficiencies.

Freight rates have been increased from 35 to 40 per cent and passenger rates 20 per cent, with a surcharge of 50 per cent on Pullman passengers, and rates have been "boosted" on baggage and express that the roads may make more money, and wages have been reduced.

And it is now proposed by this "normalcy" administration to donate at once another $500,000,000 to the roads, and Director General Davis declares $200,000,000 more will be needed before the end of the year.

Taxes are high, but forget it, because the railroads want more money to pay large dividends on watered stock, and this administration will assist them to the utmost of its ability to "put over" any nefarious proposition for that purpose.

While the managers of the big roads are endeavoring to reduce the wages of its employees down as low as $2.20 per day in some departments, Henry Ford has raised wages on the road owned by him to a minimum of $6 per day and proposes a reduction of freight rates.

This is a constructive administration, but the construction has all been in the interest of big business. On every hand the public is met by the rent gouger, the food profiteer, the coal pirate, the street, gas, and manufacturing bandit, and every human scheme of exploitation to rob the people flourishes under Harding.

The railroads are operated not for the benefit of the public or for purposes of transportation but for the profit of the stock market, and railroad profiteering has been reduced to a fine art.

Had it not been for the interference of Harding and the Labor Board presided over by the gentleman from the rabbit ridges of east Tennessee, a gentleman of great "anagosity and general understanding throughout the neighborhood" in which he resides, the coal strike and the railroad strike would have been settled long ago. Neither made any suggestion in regard to a settlement of those strikes that was worth a "tinker's dam," and all their suggestions, if they can be called such, were rejected by everybody connected with the strikes, and the parties to the controversy have about settled the questions among themselves, and Harding takes credit, through administration leaders, when he had nothing to do with the settlement, and no credit is due him whatever.

When strikes were threatened Mr. Wilson called the parties together, and readjustments were made before any strikes were called. That is the difference between statesmanship and incompetent mediocrity.

The "handwriting is on the wall" and the Belshazzar feast of Harding will end. He can see it if he reads unprejudiced newspapers; but perhaps he does not.

And this reminds me of a story of a commercial traveler and a waitress at a village hotel. It was raining very heavily and the traveler, addressing the waitress, after the manner peculiar to commercial men, said, "Dearie, it looks like the flood," "I don't know," replied the waitress, "I haven't seen a newspaper for three days." Perhaps Harding has not seen an unprejudiced newspaper for some time, but when he does he will find the "flood" is coming.

This is evidently a "golf" administration. The President owns a lavish supply of trousers—50 pairs—no doubt combining all the hues of the rainbow, or maybe the variegated colors of the historical coat of biblical Joseph. The minutest details of his arduous duties in playing golf and engaging in other innocent diversions are forcefully portrayed in the Washington Court Journal. We are informed that the President spends many hours playing golf, and also on frequent occasions bravely sails the turbulent waters of the wave-lashed Potomac, aboard the *Mayflower*, and frequently has the picture of Laddie Boy

and himself taken together, and Laddie Boy works his ears and wags his tail in appreciation of the great honor conferred.

The President, we are informed, likes eggs, we do not know whether soft or hard boiled, or fried, and that he delights in batter cakes and loves to meet with debutantes and talk about the little birds and sweet flowers that bloom in the springtime, when he should be in his office discharging his duties and considering the grave problems that confront the Nation every day in the week.

A constructive administration, why certainly, if catering to big business is constructive.

Every financial panic, every period of "hard times" has been brought about by Mr. MONDELL'S party of constructive normalcy.

In September, 1873, Jay Cooke & Co. failed in New York, and then at once followed a great financial panic. The big financial institutions in New York, Philadelphia, Chicago, St. Louis, and other large cities went to the wall, and left thousands of people stranded. Banks all over the country failed and toppled over like toy temples and one unparalleled period of ruin and depression followed.

The so-called Cleveland panic began under Harrison's administration in May, before Cleveland was nominated, and the Homestead riots occurred before Cleveland was elected and unemployment and hard times were all over the country before Cleveland was inaugurated. Other panics followed, and during the Roosevelt panic of 1907 a man could not draw his own money out of bank on his own check.

The pretense of economy under this administration is a fraud and a sham. Appropriations under this administration for the present year are $5,360,000,000 more than under the Wilson administration for the year 1915 for the actual necessary expenses of running the Government, including war-time obligations. The appropriations, so far as known, for the fiscal year 1923 are now, leaving out war-time debts, $319,000,000 less than in 1922, but the greater part was a saving made by reducing Army and Navy appropriations and charging the good-roads item to the postal appropriations. Excluding all after war expenses, the legitimate expenses of the Government this year are $1,320,000,000, as against $793,000,000 for 1915.

Mr. MANN, former administration leader, before the election, in a speech delivered in the House in August, 1912, and which is still circulated as a canon of the true faith, predicted that the wage earners would have to endure "hell" if a Democratic President should be elected. Mr. MANN evidently got his wires crossed and will have to publish an administration bible of recantation.

These administration leaders are like the colored preacher who was requested by his congregation to resign but wanted to know the reason why. He said to the "brudders," "Ain't I argufied wid de sinners?" "Yes, brudder, you has been long on argufication," replied one of the deacons. "An' ain't ah sputified concerning of de Scripture?" demanded the parson. "Yes, brudder," admitted another, "you are powerful strong on sputification." "Den what am de matter wid mah services?" demanded the reverend one. "Well," replied one of the church board, scratching his woolly pate, "it am like dis, you argufy and sputify, but yo' don't specify wharin."

So, Mr. MONDELL argufies and sputifies as to the great legislative enactments of this Congress, but he is unable to specify much "wharin." Millions of idle men are walking the streets of the cities of the North, hand in hand with normalcy, but "normalcy," they find, is the light that failed.

Harding, when a Member of the Senate, let few occasions pass on which he failed, with caustic tongue to abuse President Wilson and criticize his administration, but if anyone dares to criticize Harding the administration leaders are up in arms in his defense, and declare it a shame for anyone to speak disrespectfully of their king, who can do no wrong.

Mr. Wilson was, by his arduous services, as surely wounded as any soldier who fell on the field of battle. He consecrated his very life to winning the war. He sent over nearly 4,000,000 of men to the battle front across the sea without the loss of a man carried on an American ship, and without a financial panic.

Seneca declared it to be the practice of little minds to bark at great men as little dogs do at strangers, and Wilson has certainly been pursued by a snarling, yelping pack; but the sick and silent sufferer of the city of magnificent distances, with courtly reserve disdains to notice the envious comments of his malicious detractors.

The people who voted for Harding are getting what is justly coming to them. They demanded a change and they got it. Unemployment holds high but hungry carnival. Wages have been reduced, agricultural products have gone down, and the light of "normalcy" has failed.

There is nothing in tobacco,
  Nothing in your stock,
Nothing in your harvest,
  Nothing in your flock.
Hogs have gone to nothing,
  And corn ain't worth a darn;
Trusts have got the Nation
  And debts have got the farm.
Harding tells us nothing,
  Wall Street now is king.
Money magnates whistle
  And Swift and Armour sing.
There's plenty in this story,
  And as your homestead rocks,
Just whistle like you whistled
  When you sandbagged Jimmy Cox.

This administration promised the soldiers a bonus, but the proposed bonus bill makes no provision by which the soldiers will be paid. A promissory note without any real or expected assets to discharge the obligation is of little value. Harding is opposed to a bonus of any kind, and so is a majority of the administration leaders, but they stand in fear of the soldier vote. Harding read a message to the Senate in opposition to the passage of a bonus bill if it does not make such provisions for payment as he in his superior wisdom thinks ought to be made. He favors a sales tax, which will be oppressive on the public and compel the soldiers in part to pay their own bonus. Big business is opposed to any kind of bonus, and Harding is in favor of any kind of big business and afraid of the soldier vote. He is drifting between the Scylla and Charybdis of pitiful indecision.

Some of the patriots who stand when the Star-Spangled Banner is sung, and go to church on Sunday and sit in the amen corner wearing a button they got for buying a $50 Liberty bond, and who sing "Praise God from Whom all blessings flow" louder than anyone, are opposed to a soldier bonus because they are afraid it might cost them something; but, at the same time, would sell out the national honor for which the boys fought, and many died, at a bargain sale if they could realize a profit from the transaction. The bonus bill as proposed is a political gold brick. The soldiers asked the "normalcy" administration for bread and have been given a stone.

They say that the soldiers if given a bonus will spend it. Suppose they do. It will be theirs to spend and they earned it with their services, their blood, and by their courage. Why is it the profiteers, to defend whose property the soldiers fought, are willing to have them to defend the Nation's honor and are unwilling to trust them to spend a bonus as they see fit?

The bonus should be paid with the interest on the money we loaned to England, France, and other European countries, but this administration discarded that proposition, as that money is needed to pay the interest on foreign bonds held by big business interests in this country.

There are many reasons why this bonus should be paid.

First. The American people owe a debt of gratitude to the men who defended the national honor and no amount of money can really discharge that debt.

Second. The men who went to the front and to insanitary camps, and gave up their positions for $30 per month, while those who did not enter the service but remained at home in safety and comfort and drew large salaries, are entitled to an equalizing compensation.

Third. Because this great Nation, the richest on earth, is amply able, if it will collect the debts owed it by European countries, to satisfy the obligation it owes to those who rendered dangerous services of superlative value.

As to whether Harding will sign a bonus bill, there is not anyone who knows, and I doubt if he knows himself. He will consider, in my opinion, the political advantages in the matter, and act accordingly. He has no confidence in himself as to what his action will be.

He reminds me of a rhyme about the war:

Absolute confidence have I none,
  But my aunt's charwoman's son
Heard a policeman on his beat
  Say to the housemaid in Downing Street,
That he had a brother who had a friend
  Who knew when the war was going to end.

No braver soldiers ever followed a flag than the American doughboys who went to war and those who were compelled to remain in camps, ready and anxious to go.

Hannibal, among the greatest of all commanders, who swore eternal emnity against Rome at the bier of Hamilcar, led his victorious legions to the gates of the seven-hilled city. Alexander the Great conquered the then known world and wept because there were no more worlds for him to conquer. Alaric, King of the Visigoths, sprang from his northern lair and led his

triumphant soldiers across the everlasting Alps and planted his victorious banners on the battlements of the conquered Palatine. The conscript boys of France, with the shout of "long live the Emperor," charged the dauntless English infantry on the field of Waterloo, and their tread shook the earth, and they died with smiles on their pallid lips; but the courage of none of these equaled the bravery of the American doughboys on the red fields of Europe.

They never retreated, but stood by their colors and died unafraid. They charged over trenches wet with the blood of their dead comrades; over riddled trees and roofless huts; through gun-swept fields and over shattered walls; and thousands of them turned sightless eyes, "that will shine no more, toward stars that will shine forever." St. Mihiel, the Argonne, and all the battle fronts of France are deathless monuments to their unequaled valor and indomitable courage.

Many of them sleep the sleep that knows no waking in Flanders fields, between the crosses where the poppies grow and the roses bloom, but their deeds of valor will live forever in the memory of a grateful Nation.

Mr. WINSLOW. Will the Chair kindly inform me how much time remains?

The CHAIRMAN (Mr. CAMPBELL of Kansas). The gentleman from Massachusetts has 13 minutes remaining and the gentleman from Tennessee has 4 minutes.

Mr. WINSLOW. Is the gentleman from Tennessee ready to yield some time?

Mr. GARRETT of Tennessee. Will the gentleman go ahead with one more speech?

Mr. WINSLOW. Yes; I yield eight minutes to the gentleman from Minnesota [Mr. NEWTON]. [Applause.]

Mr. NEWTON of Minnesota. Mr. Chairman, for four months this country has been going through one of its periodic coal strikes. Think what this means. For to run our factories, transport products, and heat our homes we consume over 500,000,000 tons of coal per year. During this four months but a small fraction of this quantity has been mined. The reserves have been exhausted and the country is practically out of coal. The industrial life of the Nation is being strangled, and if something is not done, and done quickly, many of us in the northern part of our country will freeze. I am using the term "strangle" advisedly, for yesterday I received word that 23 industrial plants in my neighboring State of Wisconsin had closed down for lack of coal.

In my country we must have coal. Eight months of the year we require it in our homes. Industrially it is a necessity, of course, the year around. This coal comes to us by rail, lake and rail, and by all rail. Probably 80 per cent of it comes by way of the Great Lakes to Duluth. There it is stored in great docks and shipped throughout the fall and winter. The lake season closes about December 1. To-day these docks should have several million tons on hand. They have about 200,000. Winter is but three months away.

Gentlemen, that is our situation. Not only our property but our very lives are at stake.

I brought this to the attention of the House last March. I did not then expect operators and miners to get together and I advocated Federal regulation in the form of a fact-finding agency with power to investigate and report as to all phases of the industry. Nothing was done.

For four months operator and miner have come to no agreement. Collective bargaining has failed. Governments exist to protect life and property, and it is high time for the Federal Government to step in and see that coal, the "lifeblood of transportation and the staff of life of industry," is again being produced.

We can not longer leave this to operator and miner. Both have long since demonstrated in preceding strikes that they care not one whit for the public.

The President offered arbitration, but that was turned down. It is time for legislation, and real legislation. The President has requested legislation for a fact-finding commission to ascertain the facts and make report thereof to him and to Congress for legislation. For myself I feel that we as a Nation can not longer tolerate this holding up of the Nation every year by either the United Mine Workers, the National Coal Association, or both. There are many of us who are now commencing to think that there is collusion between them.

The anthracite industry is a monopoly in every sense of the word, and the public suffers because of it. The bituminous industry is too highly competitive at times, and the public pays the bill. Let us find the facts, and with accurate information then let us legislate. The President has asked for this legislation, and with the President's request in mind the Committee on Interstate and Foreign Commerce has reported a bill establishing such a commission. This commission is to find all the facts from ownership, investment, and production to ultimate distribution, and report its findings and recommendation to Congress by January 1 next.

The commission must report then, for there is almost a certainty of a repetition of present conditions by another strike if adequate legislation is not enacted by that time. Time, therefore, is of the essence.

What are the objections to the bill? The gentleman from Indiana [Mr. BLAND] has a bill of his own. He objects to the bill as being unconstitutional, as having no teeth in it, and for not having miner and operator represented upon it. He thinks it would be improved if it contained the provisions of his bill. I do not blame the gentleman for being proud of his own child. All fathers are. I have had a fact-finding regulatory coal bill before the committee myself for over a year. I think it is the best bill in Congress. But, gentlemen, it is time to forget about our individual interests and act quickly for the benefit of the entire country. [Applause.] Again let me say time is of the essence.

Let us consider his objections. The gentleman from Indiana would have upon the board two members representing the anthracite and bituminous coal operators. In other words, he would place upon this commission nominees of these associations who have so outrageously gouged the public during the past few years. I submitted figures in my speech of March 8 where the dividends of the anthracite operators during a period of nine years ran as high as 550 per cent. I say, keep such men and their nominees off the commission.

Furthermore, he provides that two of the members must be appointed from nominees of the United Mine Workers. No provision is made for the nonmember of that organization without whose help to-day the country would be absolutely without any coal whatever.

Mr. Chairman, we know that if groups are to be represented that we will have nothing but fighting and bickering from the start. For one, I want to see the President free to appoint only those men in whom he has implicit confidence. In this crisis I am not willing to restrict him as to the men whom he shall appoint to this commission. [Applause.]

Mr. BLAND of Indiana. Will the gentleman yield?

Mr. NEWTON of Minnesota. Yes.

Mr. BLAND of Indiana. Does not the bill restrict the President in his appointive power? Does not the bill restrict him so that he can not appoint either a miner, an operator, or a Member of Congress to this commission?

Mr. NEWTON of Minnesota. Because the President does not want to appoint them, for a very good reason. The President has seen miner and operator trying to get together for four months, and thinking only of themselves and caring nothing for the public. [Applause.] We say leave them off the commission. Let both sides appear before the commission with the facts and testify upon oath. But as we value our country, as we love our people who are facing this winter with a lack of coal, let us not put upon that commission special advocates thinking of no one else but their own special interests. [Applause.]

Mr. COOPER of Ohio. There is nothing in this bill of the committee that would prohibit the miner and the operator from coming before the commission and giving the facts?

Mr. NEWTON of Minnesota. No; they would be invited to come, but when they come they will find unprejudiced men sitting there as a jury to hear them. There will be no special pleaders sitting on the bench.

Mr. KNUTSON. The intention of the committee bill is to have the commission composed of disinterested people, is it not?

Mr. NEWTON of Minnesota. Yes; just like any court.

Mr. VAILE. The miners and the operators are going to be subpœnaed to appear before the commission, are they not?

Mr. NEWTON of Minnesota. Yes; and some of them are going to be subpœnaed very quickly before they can avoid service.

The gentleman claims that our bill has no teeth. Let us see. Both are fact-finding measures. The committee bill compels the giving of evidence under constitutional guaranties and punishes by contempt proceedings and by a heavy fine and prison sentence. His bill punishes only by contempt, but contains no fine or prison penalty.

The gentleman claims the bill is unconstitutional and bases it upon the decision of a district judge, an ordinary Federal trial court in the District of Columbia, in the so-called Maynard case. This court held that the Federal Trade Commission had no power to inquire as to costs of production of coal. This upon the grounds it was not interstate commerce. An appeal was taken from the decision and that appeal is still pending.

Ninety per cent of our coal moves in interstate commerce. Twenty-five per cent is used in transportation itself. Interstate commerce, as we know it, could not be without coal, its principal motive power. I can not agree with this decision. The gentleman is willing to lie down upon this decision of a trial court. Undoubtedly this court has been wrong before and has been reversed. In any event, I can not accede to that proposition until the Supreme Court of the United States says so.

Furthermore, the operators themselves have little confidence in the decision. The National Coal Association, whom the gentleman wants to see represented upon this commission, was back of this Maynard case. They advised their members to refuse to give information as to production costs, and so forth, to the Federal Trade Commission. They objected in the Maynard case because the production of coal was intrastate commerce. Shortly thereafter the Indiana State Commission passed some regulatory order regarding coal and its production and information regarding it. This same association appeared in this Vandalia case and contended that the production of coal was interstate commerce. It is in this manner that this association and its members keep faith with the public. Again I say, keep them off the commission. [Applause.]

But, Mr. Chairman, under this bill there is no attempt to rest solely upon the interstate commerce clause. Under the Constitution numerous powers are granted to Congress. This bill is designed to aid Congress in legislating on this broad question by furnishing us with information. The bill is based upon the right of Congress to ascertain facts and legislate under any one of its many powers. There is no necessity of enumerating them.

Mr. GARRETT of Tennessee. Mr. Chairman, I yield half a minute to the gentleman from New York [Mr. SNELL].

Mr. SNELL. Mr. Chairman, I ask unanimous consent to print in the RECORD a telegram from Leroy T. Harkness, of the New York Coal Commission, on the coal situation in that city.

The CHAIRMAN. The gentleman from New York asks unanimous consent to print in the RECORD the telegram referred to. Is there objection?

There was no objection.

The telegram is as follows:

NEW YORK, N. Y., *August 22, 1922.*

Hon. OGDEN L. MILLS,
United States House of Representatives, Washington, D. C.:

The New York State Coal Commission very earnestly urges upon you the necessity for prompt action in carrying out the President's recommendations for a governmental agency to control the distribution and price of coal and for vesting in that agency all the power the Congress can give it. The situation in New York State this fall and winter will be very acute at the best; nearly five months of anthracite coal production has already been lost, and even though all the mines were opened to-morrow, some time must necessarily elapse before they can be operated to full capacity. The greatest difficulty is being experienced in getting through shipments out of the very reduced supply of bituminous coal. The governor has called the legislature in special session for next Monday, and legislation will undoubtedly be enacted clothing the New York State Fuel Administration with all the powers the State can give it. The benefit of such action will largely be lost unless the Federal Government on its part promptly constitutes a strong central agency to secure the coal and get it to the several States. The necessity for the investigation of the entire coal situation as recommended by the President is apparent, but even more imperative is the need for prompt action on his recommendation for a governmental coal agency; unless effective and vigorous measures are taken to develop to the utmost the supply and distribution of coal, especially anthracite coal, New York faces a coal shortage even worse than that of the winter of 1917–18. New York is absolutely dependent upon anthracite coal to keep warm, aside from the needs of industry. A shortage in anthracite affects every household in the cities of the State, and a serious shortage spells sickness and intense suffering, especially in the tenements and poorer districts; the prospects of winter being so near and the State almost denuded of anthracite is alarming in this emergency. The coal commission believes it should call this matter to the attention of the New York delegation in Congress and urge upon it vigorous and united effort to secure immediate action.

LEROY T. HARKNESS,
For the New York State Coal Commission.

Mr. GARRETT of Tennessee. Mr. Chairman, I do not know, of course, to what extent the agencies of government are eventually going to have to go in dealing with the coal question. In my opinion, it would probably be unwise to venture a prediction along that line. I do feel absolutely sure that this bill offers no relief to the present situation, nor can I see anything in it that holds out the slightest promise of relieving similar situations that may arise in the future. It seems to me that it may be very well designated as a subterfuge, which will cost half a million dollars without there being any practical, tangible result accomplished for the relief of the present situation or for the prevention of any such situation arising in the future. For that reason I shall vote against this bill at this time.

Mr. WINSLOW. Mr. Chairman, has the time been exhausted on the other side?

The CHAIRMAN. The time has been exhausted, and the gentleman from Massachusetts has four minutes remaining.

Mr. WINSLOW. Mr. Chairman and gentlemen of the committee, it has been a great pleasure to note that in the discussion of this bill to-day no one so far as I can recall has undertaken to bring any politics into the debate. We have had before us this proposition, and I think we have all considered it fairly and squarely. I am of the mind that everybody in this Chamber has felt the necessity of doing something in respect of the coal business. We have wallowed around in this country for half a dozen years and when disturbances have arisen we have had one way of looking at it now and another way again; we have been patient and patient, and over again patient, all the time hoping that the miners and the operators and all the others who had to do with the control of the coal situation would find some way of settling conditions and finally going on their way in such a manner as to give us all a fair deal in coal. We have not had it. We have tried one way and another without avail until now comes the President of the United States—I do not care whether he be a Democrat or a Republican—I know he has been in a sweatshop with these men for weeks going through, I believe, the torments of hell, the torments of which we have no conception, trying to do something. Whether he has done it or not is a matter of opinion. Evidently he thinks as a result of his experience that he has not obtained the information which he feels he ought to have and that Congress ought to have and that the people of the country ought to have. After his experience, after having had his nose on the grindstone, he ought to come pretty near having an idea as to the size of the instruments that are working upon him and something of an idea of what the public is up against. Looking to the well-being of the public, the bill is framed cautiously so that it will not preclude your support of it—it is for the Congress and the President to get the facts, and we all know, even the gentleman from Indiana [Mr. BLAND] knows and admits, that we the public are entitled to know what is going on. If we can find out for such a little sum as $500,000 I think it would be the cheapest bill that the Government has paid for many a day. In 1920 when things were running along without the present-day annoyances there were mined in this country 665,333,200 tons of coal. Why, my friends, if you were to save even a paltry dime on every one of those tons of coal you would be saving over sixty-six and a half million dollars. I am willing at this time to take the word of the leader of the American people who has had the best opportunity to find out what we want and to follow him in his desire to go to the bottom of everything. We should gladly pass his recommendation if only as a hope that it may accomplish the result. [Applause.]

The CHAIRMAN. All time for debate has expired, and the Clerk will read the bill.

The Clerk again read the bill, with the committee amendment.

At the conclusion of the reading of section 11 of the committee amendment,

Mr. MOORE of Virginia and Mr. BLAND of Indiana rose.

The CHAIRMAN. For what purpose does the gentleman from Virginia rise?

Mr. MOORE of Virginia. Mr. Chairman, I move to amend section 11, the section just read, by striking out the sum of $500,000 and inserting in lieu thereof the sum of $200,000, and I desire to be heard upon that amendment.

Mr. BLAND of Indiana. Mr. Chairman, as I understand it, the gentleman has not been recognized to offer an amendment as yet.

The CHAIRMAN. The Chair asked the gentleman from Virginia for what purpose he rose.

Mr. MOORE of Virginia. And I stated I rose to propose an amendment to the section that had just been read immediately before I took the floor, without further reading by the Clerk.

The CHAIRMAN. But the Chair has not yet stated the pending question. The question is on agreeing to the committee amendment.

Mr. BLAND of Indiana. Mr. Chairman, I move as a substitute for the committee amendment the following, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. BLAND of Indiana: Strike out all after the enacting clause and insert in lieu thereof the following:

"That when used in this act—

"(a) The term 'person' means individual, partnership, corporation, or association; and

"(b) The term 'coal' means anthracite, bituminous, and other coal, lignite, coke, and culm, whether in place, extracted, or banked.

"SEC. 2. (a) That there is hereby established a governmental agency to be known as the 'coal investigation agency,' and to be composed of 10 members, as follows:

"(1) The Director of the Geological Survey, the Director of the Bureau of Mines, the Director of the Bureau of the Census, and the Commissioner of Labor Statistics;

"(2) Two members constituting the public group, representing the public, to be appointed by the President, by and with the advice and consent of the Senate;

"(3) Two members constituting the miners' group, representing the employees of coal-mine operators, to be appointed by the President, by and with the advice and consent of the Senate, from four nominees presented to the President by the president of the United Mine Workers of America; and

"(4) Two members constituting the operators' group, representing the coal-mine operators, to be appointed by the President, by and with the advice and consent of the Senate, one to be appointed from two nominees presented to the President by the president of the National Coal Association, and one to be appointed from two nominees presented to the President jointly by the president of the Anthracite Bureau of Information and the president of the Anthracite Coal Operators' Association.

"(b) Any vacancy in the office of an appointed member of the coal investigation agency shall be filled in the same manner as the original appointment. The appointed members shall each receive a salary of $6,000 a year. The members specified in paragraph (1) of subdivision (a) shall receive no additional salary for their services as members.

"(c) If the president of any organization specified in subdivision (a) fails to present nominees to the President in accordance with such subdivision within 30 days after the passage of this act, or, in case of a vacancy, within 30 days after the vacancy occurs, the President of the United States shall thereupon directly make the appointment, by and with the advice and consent of the Senate. In making any such appointment the President shall select an individual associated in interest with the employees or coal-mine operators, whichever he is to represent.

"(d) The coal investigation agency shall cease to exist two years after the passage of this act.

"SEC. 3. That for the purpose of providing information for the Congress as a basis for legislation (a) to settle industrial disputes in and prevent the overdevelopment of the coal industry, (b) to stabilize such industry and levy taxes in respect thereto, (c) to regulate commerce in coal among the several States and with foreign nations, (d) to provide a coal supply for the maintenance of the Navy and the merchant marine, and (e) to protect the coal supply for the District of Columbia, and forts, magazines, arsenals, dockyards, and other public buildings of the United States outside the District of Columbia, the coal investigation agency is authorized and directed to require and obtain from any person such data, information, and reports as it deems desirable for such purpose, including among other matters data, information, and reports (1) as to the supply, production, distribution, storage, and consumption of coal and its grading and economic utilization, (2) as to the relations between operators of coal mines and washeries and their employees with particular reference to wages, hours of labor, and working conditions, and (3) as to the ownership and value of coal lands, and of property of operators or owners which is of use in the operation of coal mines or washeries.

"SEC. 4. That the coal investigation agency shall make such reports to the Congress and to the President from time to time as it deems advisable, and shall make to the Congress and to the President a final report not later than two years after the passage of this act. All data or information obtained by the coal investigation agency shall not be made public except in such reports to the Congress and to the President, or in compliance with the subpœna or order of a court of competent jurisdiction. Such reports shall not contain any such data or information which would disclose the trade secrets of any person. Any officer or employee of the coal investigation agency who shall make public any data or information in violation of the provisions of this section shall, upon conviction thereof, be punished by a fine of not more than $5,000 or imprisoned for not more than one year, or both.

"SEC. 5. (a) That for the efficient administration of the functions vested in the coal investigation agency by this act, the agency may require by subpœna, issued and signed by the chairman, the attendance of any witness and the production of any book, paper, document, or other evidence from any place in the United States at any designated place of hearing, and the taking of a deposition before any designated person having power to administer oaths. In the case of a deposition the testimony shall be reduced to writing by the person taking the deposition or under his direction, and shall then be subscribed by the deponent. Any member of the coal investigation agency may administer oaths and examine any witness. Any witness summoned or whose deposition is taken under this act shall be paid the same fees and mileage as are paid witnesses in the courts of the United States.

"(b) In case of failure to comply with any subpœna or in case of the contumacy of any witness before the coal investigation agency, the agency may invoke the aid of any United States district court. Such court may thereupon order the witness to comply with the requirements of such subpœna, and to give evidence touching the matter in question. If the court makes such order it may also fix in the order the time for compliance therewith, and enjoin the witness from shipping or receiving from shipment in commerce among the several States or with foreign nations any coal after the time so fixed and before his obedience to the order. Any failure to obey such order or injunction may be punished by the court as a contempt thereof.

"(c) No person shall be excused from so attending and testifying and deposing, or from so producing any book, paper, document, or other evidence on the ground that the testimony or evidence, documentary or otherwise, may tend to incriminate him or subject him to a penalty or forfeiture; but no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing as to which, in obedience to a subpœna and under oath, he may so testify or produce in evidence; except that no person shall be exempt from prosecution and punishment for perjury committed in so testifying.

"SEC. 6. That for the efficient administration of the functions vested in the Coal Investigation Agency by this act, any member, officer, or employee thereof, duly authorized in writing by the agency, shall, at all reasonable times, for the purpose of examination, have access to and the right to copy any book, account, record, paper, or correspondence relating to any matter which the Coal Investigation Agency is authorized by this act to investigate.

"SEC. 7. That every officer or employee of the United States, whenever requested by the Coal Investigation Agency, shall supply it with any data or information pertaining to any investigation by the agency, which may be contained in the records of the office of such officer or employee.

"SEC. 8. (a) That no person shall willfully (1) fail or refuse to make any report required by the Coal Investigation Agency, (2) make in any such report any statement which is false in any material particular, or (3) deny any duly authorized person any right granted by section 6. Any person who violates this subdivision shall, upon conviction thereof, be fined not more than $5,000 or imprisoned for not more than one year, or both.

"(b) In construing and enforcing the provisions of this act the act, omission, or failure of any person acting for or employed by any individual, partnership, corporation, or association, within the scope of his employment or office, shall in every case also be deemed the act, omission, or failure of such individual, partnership, corporation, or association as well as of such person.

"SEC. 9. That for the efficient administration of the provisions of this act the Coal Investigation Agency may make such regulations as it deems necessary.

"SEC. 10. (a) That the Coal Investigation Agency may appoint, remove, and fix the compensation of such employees, and make such expenditures, including salaries, traveling expenses, per diem rates of allowance in lieu of subsistence, and witness fees, as are necessary for the efficient administration of the functions vested in the agency by this act, and as may be provided for by the Congress from time to time. All the expenses of the Coal Investigation Agency shall be allowed and paid upon the presentation of itemized vouchers therefor approved by the chairman of the agency.

"(b) There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $500,000, or so much thereof as may be necessary, to be available until June 30, 1923. Such sum shall be expended by the Coal Investigation Agency, in the District of Columbia or elsewhere, for defraying the expenses of the maintenance and establishment of the agency, including the payment of salaries.

"SEC. 11. If any provision of this act or the application thereof to any person or circumstance is held invalid, the validity of the remainder of the act and of the application of such provision to other persons and circumstances shall not be affected thereby."

Mr. STAFFORD. Mr. Chairman, I make the point of order on the amendment offered, that a substitute to the committee substitute is not in order at this time, that only perfecting amendments either to the original bill which is before the House for consideration, or perfecting amendments to the substitute, are in order; that the House must be given an opportunity, first, to either perfect the original bill which the committee recommends be stricken out and a substitute considered instead, or to amend the committee substitute. It is fundamental that you can not have amendments in the third degree. It is fundamental that you may have a substitute for the original proposition pending under consideration. What is the original proposition here pending for consideration? We have the original bill which the committee recommends be stricken out. It is within the privilege or should be within the privilege of any Member of the House, if he sees fit, to offer first a perfecting amendment to the original bill. Then it would be within the privilege of the members of the committee before that perfecting amendment had been voted on to perfect the amendment to the substitute. What is the hiatus you are going to be confronted with if the Chair holds that any Member, even the gentleman from Indiana, has the right to offer an entirely different substitute to that offered by the committee? What is the status to-day, if the Chair holds that his amendment is in order in respect to the degree in which it is held to the committee substitute? It must be held to be an amendment in the second degree. Then, if it is an amendment in the second degree, there will be no opportunity for any Member in the House to offer any perfecting amendment, because it would be in the third degree. We would be obliged then to be without the privilege of perfecting either the committee substitute or the substitute offered to the substitute by the gentleman from Indiana, or we might obviate that by voting down the amendment offered by the gentleman from Indiana, but the committee would not have any opportunity whatsoever to perfect it. If we voted it up, then after we adopted it as a whole the committee has not any opportunity even to perfect that, because it is beyond that stage, as the committee has acted upon the entire matter embodied in the amendment offered by the gentleman.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. MANN. Has the gentleman recently read Rule XIX?

Mr. STAFFORD. I would not say recently, because I have been away on a vacation. I have not looked at my legislative bible for some weeks.

Mr. MANN. Will the gentleman permit me to read it to him?

Mr. STAFFORD. Certainly.

Mr. MANN. Rule XIX reads as follows:

When a motion or proposition is under consideration a motion to amend and a motion to amend that amendment shall be in order, and it shall also be in order to offer a further amendment by way of substitute, to which one amendment may be offered, but which shall not be voted on until the original matter is perfected, but either may be withdrawn before amendment or decision is had thereon.

Does not that entirely cover all of the questions which the gentleman has discussed? Here is an original proposition before the House, the original bill, to which the committee has offered an amendment. An amendment may be offered to that amendment under this rule, and a substitute may be offered to the committee amendment under that rule. An

amendment may be offered to the substitute under that rule, but the original text shall be perfected before these substitute amendments are voted on. Does not that absolutely cover the case?

Mr. STAFFORD. I take issue with the gentleman. Then the committee would have three propositions pending before it for consideration.

Mr. MANN. It might have five at once.

Mr. STAFFORD. Oh, you can not have more than four. You can not have more than two original propositions at one time.

Mr. MANN. Oh, you can have an original proposition, an amendment to it, and amendment to the amendment, a substitute, and an amendment to the substitute. That makes five.

Mr. STAFFORD. I take issue with the gentleman there.

Mr. MANN. Perhaps my mathematics are wrong.

Mr. STAFFORD. You can have an original proposition, an amendment to that proposition, and you can have a substitute and an an amendment to the substitute, and that is all; but this proposes that you shall have three main substantive propositions before the committee, the original proposition, the substitute offered by the committee, and the substitute to the substitute offered by the gentleman from Indiana.

Mr. TOWNER. Mr. Chairman, there is no particular difficulty regarding this matter. An amendment perfecting the original text may be offered at this time, and amendments to perfect the committee amendment may be offered at this time. Amendments even to perfect the substitute may be offered at this time.

But the order in which this may be voted on has been determined by the rule read by the gentleman from Illinois [Mr. MANN]. The perfecting amendments to both the original text and to the amendment to the original text must be voted on before the substitute can be voted on. But at this time, Mr. Chairman, the Chair has not passed upon the question.

Mr. LONGWORTH. However, would not the committee amendment take precedence over the motion to amend the original text?

Mr. TOWNER. It certainly would. Has the Chair passed upon the point of order?

The CHAIRMAN. The text is the original proposition. The committee offers a substitute in the nature of an amendment, or an amendment in the nature of a substitute. And the late practice of the House has used the committee substitute or amendment by interchangeable terms. There may be a substitute for the committee amendment; there may be an amendment to the substitute; there may be an amendment to the committee amendment as the matter now stands. So the Chair thinks that we may proceed in order to the consideration of the substitute offered by the gentleman from Indiana [Mr. BLAND] for the committee amendment. And the Chair overrules the point of order.

Mr. TOWNER. Mr. Chairman, I offer a preferential perfecting amendment to the amendment offered to the committee amendment.

The CHAIRMAN. The gentleman from Iowa offers a preferential amendment, which the Clerk will report.

Mr. TOWNER. I move to strike out the word "other" in the second line, page 5, and substitute in place of that the word "all." I do not think it needs any explanation.

The CHAIRMAN. The Clerk will report the amendment.

Mr. BLAND of Indiana. Has the Chair ruled that that is a preferential motion?

The CHAIRMAN. As perfecting the amendment.

The Clerk read as follows:

Mr. TOWNER moves to amend the committee amendment by striking out on page 5, line 2, the word "other" and inserting in lieu thereof the word "all."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. BLAND of Indiana. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BLAND of Indiana. I understand that you vote on the committee substitute amendment before you vote upon the substitute for the committee amendment. If you are going to substitute for the amendment you should vote on it first. Which text are you going to perfect first?

The CHAIRMAN. The text of the committee amendment.

The question is on agreeing to the amendment offered by the gentleman from Iowa [Mr. TOWNER].

The question was taken and the amendment was agreed to.

Mr. LONDON. Mr. Chairman, I offer a preferential amendment.

Mr. MOORE of Virginia. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Virginia. In the event of the Bland substitute being rejected, will there be then the right to offer an amendment to the committee amendment?

The CHAIRMAN. Certainly; germane amendments.

Mr. MOORE of Virginia. Subsequent to the action?

The CHAIRMAN. Subsequent to the action of either rejecting or accepting the amendment.

Mr. KINCHELOE. The gentleman from Virginia [Mr. MOORE] undertook to get recognition for the purpose of offering an amendment to the committee substitute. Would not that take precedence over any committee amendment by way of substitute that the gentleman from Indiana indicated?

The CHAIRMAN. It is a question of orderly procedure. The gentleman from Indiana [Mr. BLAND] has been recognized to offer his substitute.

Mr. KINCHELOE. I mean by order of voting.

The CHAIRMAN. The vote may be had upon that amendment and without prejudice to the amendment to be offered later by the gentleman.

Mr. LONDON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LONDON. In order to offer an amendment to the committee amendment, is it in order to offer it now?

The CHAIRMAN. It would be in order if the gentleman had the floor. The gentleman from Indiana [Mr. BLAND] has the floor.

Mr. WINSLOW. What is the right as to time or debate on this question?

The CHAIRMAN. Five minutes on each side.

Mr. BLAND of Indiana. Mr. Chairman, I do not care to go into details, because of my discussion on the same question at length in general debate, but I made the statement that you would not be convinced when this argument was over that any more power was conferred on this commission under the committee bill than was already given to the Federal Trade Commission, and I assume you gentlemen who have sat here and heard this argument and have listened carefully enough to know that not a single argument has been adduced to show that more power has been conferred than the Federal Trade Commission now has. Of all the array of lawyers before me here—who never considered this bill very seriously—none of them has convinced you that more power is conferred in this bill than we already have.

The minority leader could well talk of leaving this to the Federal Trade Commission under existing law. There is no miner or operator on the Federal Trade Commission. They are an impartial tribunal, and they have got to admit that the Federal Trade Commission, under the organic act, has the same powers that this bill seeks to confer on the commission. Do you want to be hung up again for two or three years in getting these facts? The Federal Trade Commission has been stopped for two years by a decision which the gentleman from Minnesota says he would not "lie down on."

Mr. MAPES. Will the gentleman yield?

Mr. BLAND of Indiana. I can not yield when I have only five minutes. I am sorry. If you will put in there that you are going out over the country to ascertain coal facts for the purpose of taxation and the other matters we have put in the Labor Committee bill, you will have the right under the decisions to get the facts. More than that, if they refuse to give you the facts you will have a law that has some teeth in it that will make them squirm until they give you the facts.

I represent both operators and miners in my district. I know that some of the operators in my district will refuse to give the facts to the Federal Trade Commission or to any other commission if they think they can evade the law, because they have done it, and I know we will be confronted with the same procedure we are confronted with now. And while I am not impugning the motives of the men that have brought this bill up, and their loyalty to the President, I wish to say that their lack of time for bringing out a bill is responsible for the inadequacy of it, and that it will not do the work it purports to do. I am a mighty good Republican; I am an original Harding man. I like him, but I am not willing as a legislator to shirk my own responsibility and take some bill that they say the President is for when he knows nothing about its contents except as to the personnel of the board.

I say it is an absurd thing to do to try to have a commission of people that know nothing about this industry which we all know so little about, and concerning which it is so hard to get information function in so important a matter. You put a good coal miner on there, a man who is shrewd and keen, and if he

finds they are not bringing out the facts he will know where to go and find them. The same is true if you put an operator on as pertaining to the wages and working conditions of the coal miner.

But, my friends, what about a man who does not know a thing about a coal mine or anything about the coal industry? He does not know where to get the facts. The operator will bring the facts out as regards operating costs, and he will show them to be as high as he can. We want the facts. You can not get them unless you pass a bill that is carefully drawn.

None of these gentlemen here have given any argument to show that this bill gives more power than is given to the Federal Trade Commission. It is a correct assumption that this legislation is subject to the same objections in consequence of which the Federal Trade Commission has been stalled for two years now.

Mr. MAPES. Mr. Chairman, will the gentleman yield?

Mr. BLAND of Indiana. I regret I can not yield.

The CHAIRMAN. The gentleman declines to yield.

Mr. BLAND of Indiana. Are you going in your haste to adopt this makeshift, or are you going to adopt a substitute which in your heart of hearts you know will not get real results? [Applause.]

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. WINSLOW. Mr. Chairman, I wish I had the time to answer seriatim the great number of incorrect—inaccurate, I may say—statements which have been made easily by the gentleman from Indiana [Mr. BLAND]. He has known more of what has happened in our committee than any of our members and has stated these inaccuracies to the House. I have not the time to discuss them.

I do think it is pertinent, however, to answer one statement that he has just made, in that it involves so great and good a man as the President of the United States. If I mistake not, the gentleman from Indiana said to us that he did not believe the President knew anything that was in this bill except the provision as to the personnel. I have undertaken to-day previously to say something in the hope that I would impress it upon the members of the committee, and I wish to say it again in answer to the statement of the gentleman from Indiana. I sat at the President's desk while he read every word that was in the original bill. There have been two or three unimportant changes made in it to round it up and, as we say, perfect it. You must know that if this bill goes through it goes through essentially approved by the President of the United States after having had something to do with its preparation and finally reading it within an hour and a half before the time it went into the hands of the committee. There has been nothing of real importance changed in it since. I do not mean to assume or to arrogate to myself the right to represent the President, but I do not like to have his part in a performance of this kind flippantly referred to or waved aside as though it were a small matter to be conjured with.

If any member of the committee is of a mind that this bill does not, in the form in which it is presented here, carry with it an authority to go through with everything that has to do with this coal business from bottom to top, I think you will now realize that by virtue of the adoption of the amendment proposed by the gentleman from Iowa [Mr. TOWNER] the language is so perfected that the commission can tackle almost anything that the human mind can devise in connection with the coal business. That provision will read:

> That for the purpose of securing information in connection with questions relative to interstate commerce in coal and all questions and problems arising out of and connected with the coal industry.

That ought to be satisfactory to everybody, no matter what his opinion of the bill may be in other respects.

The committee has put before you gentlemen a bill which it believes—and others outside of the committee who have a right to be consulted believe, and lawyers who hitherto have been regarded as worthy of confidence and approval believe—will furnish sufficient power to the commission to carry out what we intend to have them carry out. For that reason and in view of the fact that the amendment as proposed by the substitution of the so-called Bland amendment will merely disturb the conditions of the bill that we have put in in compliance with the appeal of the President, and in view of the fact that it will introduce other problems that we are probably not here of a mind to take up to-day, I trust that you will stand by the amendment of the committee and oppose the proposed substitution. [Applause.]

Mr. SANDERS of Indiana. Mr. Chairman, I ask unanimous consent to proceed for five minutes on the Bland amendment.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to proceed for five minutes on the Bland amendment. Is there objection?

There was no objection.

Mr. SANDERS of Indiana. Mr. Chairman, the thing about which the people of the country are anxious is that we create such a fact-finding commission as will give us the information which the Constitution of the United States empowers the Congress to obtain. My colleague, Mr. BLAND, invented this idea of a fact-finding commission many months ago. He has devoted months of work to it. His committee held hearings, and I hold in my hand these voluminous printed hearings on the Bland bill. The committee with which he is connected reported a bill, and it has been in such status that it could be brought before the House at any time.

Personally, although I would like to make two or three changes, if the bill could be amended, here before the committee, I prefer the Bland bill. I think it has had more consideration than this bill has had, although this bill has had as careful consideration as could be given by our committee in the time which we had to give it. I doubt if we have constitutional powers to go quite as far as the Winslow bill provides. My colleague, Mr. BLAND, cited an authority from a Federal court holding that some of the lengths to which we go in this bill are not in accord with the Constitution.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. SANDERS of Indiana. I have just five minutes, if the gentleman will pardon me.

The CHAIRMAN. The gentleman declines to yield.

Mr. SANDERS of Indiana. But it is important for this Congress to pass a measure providing for a fact-finding commission, and we go just as far as our constitutional powers will permit us. I think it is better to adopt a bill which will afford a member from the coal-mining industry, representing coal operators and also representing the miners, because this is not a commission that adjudicates rights or that passes upon anything. This is a commission to find facts; and with a membership of nine, if you have some members on that commission who know something about the industry, it will find a better avenue to obtain facts. We need some one on the commission that knows something about the industry. We have a provision in this measure which I will undertake to move to strike out if the Bland bill is not adopted. This provision that I hope to strike out is to the effect that no man who is connected with the coal industry can be a member of the commission. We want some one on that commission who knows something about the industry, first, from the standpoint of the mine workers, and, second, from the standpoint of the mine operators.

The people of this country want to stop coal profiteering. As far as I am concerned, I wish that the United States Government had the power and the authority that each State government has, so that we could deal with the question of coal profiteering in the only effective way to deal with it. I have studied this question very carefully, and I am very much afraid that there is no power in the National Congress to undertake in time of peace to fix the price of coal, and I very much fear that if we undertake to deal with that question we shall be simply going in a direction that will not reach any definite results, but that will mislead the States, so that the States which have that authority under their sovereignty will fail to exercise it. Of course, as a matter of fact, the law of supply and demand is going to cut these profiteering prices down, but for a few weeks we are going to have the rankest profiteering that the country has ever experienced unless by the creation of this fact-finding commission, clothing it with constitutional authority, to go out to the coal operators and the dealers in coal and get the facts, that action shall help to prevent it.

I think when those in the private industry who fix the price of coal know that they will soon have to appear and tell under oath the profits made they will hesitate before fixing unconscionable prices.

It is important to safeguard the law so that it shall be constitutional. In nine cases out of ten the operators are not responsible for the high prices that you pay for coal out in Minnesota. It is the middleman, the dealer, and the speculator, and the "sales company" that is organized sometimes by some of the choice stockholders of the producing company to sell the coal.

It is the seller of the coal rather than the producer who is responsible for much of the profiteering. So, Mr. Chairman, whether we adopt the Bland bill or the Winslow bill it is important to-day to pass this measure and clothe this commission with constitutional authority to get the facts and submit them

as promptly as possible to the Congress, so that the country and the public may be protected as far as our constitutional power will permit.

The fact that a considerable majority of the coal producers have voluntarily agreed to the fair prices makes the action of the minority who sell at exorbitant prices more abominable.

The public demands that coal profiteering shall stop. It must stop. If the State governments turn out to be powerless to prevent unconscionable prices wrung from a shivering public there will be a demand that the strong arm of the Federal Government reach out and regulate the charges as charges for transportation are now regulated. We are not going beyond our constitutional powers, but if the evil shall require heroic methods we shall amend the Constitution.

I much prefer that private industry shall furnish to the country its fuel and its transportation, but let no one be deceived; if failure is at hand society, the public, the Government will care for its own.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last word. I do not think that the pending measure at all meets the real, pressing question before the country. This morning I saw Mr. Spencer, the Federal fuel distributer. He said that one-half of all the coal mined in eastern Kentucky and the western half of West Virginia has been ordered to Lake Erie ports to be sent to Lakes Michigan and Superior ports for distribution. Last week they sent 250,000 tons. This week they expect to send 400,000 tons; but he told me that 12,000,000 tons will be needed up there before the 1st of December. Telegrams are pouring in, as the gentleman from Minnesota [Mr. NEWTON] said a few minutes ago, telling of firms stopping business—23 I think he said—in my State of Wisconsin because of lack of coal. This bill does not touch this real, pressing problem. But President Harding touched it in his message when he asked Congress to do something to help get coal to the people now and at a price lower than that which the coal profiteers are sure to demand. Here is what the President said:

> The possibility of outrageous price demands in spite of the most zealous voluntary efforts of the Government to restrain them make it necessary to ask you to consider at once some form of temporary control of distribution and prices.

I listened carefully to the President, and when he came to the statement I have just read I thought it the most immediately important thing in all the message. It brought back vividly an incident that is strongly impressed on my memory. I was out of Congress from March 4, 1919, until March 4, 1921. In January, 1921, I attended a small dinner party at one of the leading hotels in Chicago. After the dinner I conversed with one of the guests, a wealthy manufacturer, who made his money honestly, as all of his friends and acquaintances without exception believe. I never heard it intimated that in his accumulation of riches there was a dishonest penny. I said to him: "Last week I received from the finance committee of the common council of the city of Beloit—a city of 22,000 people in my district—a letter accompanied by a letter from the city attorney of Beloit, both communications imploring me to see that something be done to lower the price of anthracite coal there, it being $22.50 a ton."

Beloit is about 100 miles from Chicago, at a junction of the Chicago, Milwaukee & St. Paul and the Chicago & North Western Railway, two of the great trunk systems of the United States. Now, somebody has put on more than $17 a ton between the mine and the consumer in Beloit. When I told this wealthy man that story he said "COOPER, I was at a dinner a few weeks ago in this very hotel at which one of the greatest members of the coal trust was a guest. One of the group, as we were conversing after dinner, said to this leading member of the Coal Trust"—my friend gave me his name, which I do not care to mention, though I know it well—"we think it an outrage that you are charging such high prices for coal. Fortunately this is a mild winter; but if it were as severe as the awful winter of 1917–18, when war was raging in Europe and this country was in such distress, there might be dangerous consequences." In describing this incident to me my friend said that the coal-trust man "chuckled"—that is the word he used, "chuckled"—and replied: "Well, we have got the coal and if they want it I guess they will pay our prices." My friend remarked to me, "COOPER, I know as well as I can know anything about another's business, and I know his pretty well, this man has for several months been making an average of a million dollars a month. He has been making lavish expenditures. He is making a million dollars a month."

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I ask for five minutes more.

Mr. ASWELL. Mr. Chairman, I object.

Mr. GRAHAM of Illinois. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. ASWELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. ASWELL. Has not the time for debate closed on this amendment?

The CHAIRMAN. The pro forma amendment offered by the gentleman from Wisconsin [Mr. COOPER] has been debated on the affirmative side only. The gentleman from Illinois [Mr. GRAHAM] rises in opposition to the pro forma amendment.

Mr. ASWELL. This will end it?

The CHAIRMAN. This will end the debate on the pro forma amendment.

Mr. GRAHAM of Illinois. Mr. Chairman and gentlemen of the committee, knowing the desire of the House to reach a conclusion of this matter, I would not have arisen at this time if it had not been for the remarks of the gentleman from Indiana [Mr. SANDERS]. His remarks always carry conviction in the House because of his studious and able character as a debater. The gentleman from Indiana [Mr. SANDERS] says that, in his judgment, there may be some doubt about the constitutionality of the Winslow measure, that it perhaps goes too far, and in the same breath he says that he prefers the Bland measure. Now, one is as broad as another so far as the inquisitorial measures are concerned. The Bland measure provides that this coal investigating agency may bring in or obtain from any person data, information, or report it deems desirable for the purpose, and gives in section 5 the right to issue subpœnas, bring them in, compel them to answer, and makes it unlawful if they do not answer, and provides that they can not engage in interstate commerce while they are in contempt of court, which, in my judgment, is an unworkable condition. The Winslow bill makes provision that the person can not be prosecuted for any crime growing out of the facts to which they testified and makes it a crime punishable by indictment and imprisonment if they do not testify. This is the direct way to get at it. So if there is any doubt in the mind of the gentleman from Indiana as to the constitutionality of the measure, it extends to the Bland measure as well.

Now, in my judgment the opinion of the Federal judge of the District of Columbia is not good law. If you read the Maynard case, it is a decision of the District court, and on its face you will find that if you carry it to its logical conclusion Congress could not investigate about the production of any article in the United States. We could not go into the investigation of anything. Carried to its logical conclusion, it would deprive the United States from getting almost any information it desired to get. I do not believe the Supreme Court of the United States will ever hold in a matter so essential to interstate commerce as coal that the Congress of the United States can not, exercising any of its powers, find out the facts about it.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. GRAHAM of Illinois. Yes.

Mr. GREEN of Iowa. I agree with the gentleman that the Maynard case is not decisive of the constitutionality of this bill. The Maynard case does not hold that Congress can not authorize the investigation of any subject, but, on the contrary, holds that it may investigate or have investigated any subject it wishes, although this case places limitations on the way the information may be obtained. Unless the matter is one over which the Constitution gives Congress authority, it can not compel the production of private books and papers. Now, coming back to the objection the gentleman made to the Bland bill, suppose Congress had no authority to compel the witness in the first instance to come before the commission, would it have the right to penalize the man by depriving him of the privilege of interstate commerce, as proposed by the gentleman from Indiana [Mr. BLAND]?

Mr. GRAHAM of Illinois. No; and it seems to me it is unworkable. It seems to me that while the gentleman from Indiana says that his bill is carefully prepared it has not been carefully prepared. This bill has been prepared by men who have sweat blood about this question for weeks, and I think it is better to follow the President of the United States. [Applause.]

The CHAIRMAN. All debate on the pending amendment as a substitute is exhausted.

Mr. MONDELL. I move to strike out the last word.

The CHAIRMAN. And the further motion to strike out the last word is not in order. The question is on agreeing to

the pro forma amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was lost.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I hope the motion to adopt the substitute will not carry. I have no doubt but what that bill is a very excellent measure in its way and for the purpose for which it was intended, but it does not meet the requirements of the President's request to Congress for a commission of disinterested persons to secure facts and lay them before the people of the country. I do not think that for the purposes suggested by the President we ought to name as four of the members of this commission the Director of the Geological Survey, the Director of the Bureau of Mines, the Director of the Bureau of the Census, and the Commissioner of Labor Statistics as proposed in this bill. They are all of them fine gentlemen, but I do not know of any reason why they should be especially named as members of the commission.

The Winslow bill was drawn for the purpose of carrying out the recommendations of the President. As drawn it does carry out the recommendations of the President and would give us a commission that would have no other object or purpose than to present to the American people the facts in regard to the coal industry.

Now just one word in regard to the matter referred to by the gentleman from Wisconsin and others. The gentleman from Wisconsin says that this bill of itself will not cure all of the evils of the present situation. That is undoubtedly true, and my own thought is that, as much as we may regret it, we are confronted with the necessity of considering other legislation to be hereafter presented drawn with the view of making an earnest effort to prevent the profiteering that seems to be almost inevitable unless the Congress shall use all the power of the Federal Government to prevent it. [Applause.] We do not have authority under the Constitution for direct price fixing.

Our authority is more limited than the authority of the people of the States in the control over private business. And yet I believe ways and means can be found within the authority of the Congress, within the four corners of the Constitution, to enact legislation the effect of which will be to very greatly discourage and largely prevent efforts at coal profiteering. I believe we can enact legislation that will protect the American people in the next few months from the efforts that will be made—that are certain to be made—by certain classes of operators and certain classes of dealers to raise the price of fuel to the American people. [Applause.] Within a short period of time we will reach the days of frost and cold, and if all the mines were to be opened to-morrow there would not be coal enough to meet the immediate demand. In that situation there will be every temptation to unreasonably raise prices, and, in my opinion, it is our duty to do the very best we can to prevent that being done. [Applause.]

Mr. DENISON. Mr. Chairman, I want to offer an amendment to perfect the substitute offered by the committee. I want to do it at the proper time.

The CHAIRMAN. It is in order to offer it at this time.

Mr. DENISON. Mr. Chairman, I offer the following amendment to the committee amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. DENISON to the committee amendment: Page 5, line 6, strike out the word "nine" and insert in lieu thereof the word "five."

Mr. DENISON. Mr. Chairman, the bill of the committee eliminated the idea of having anyone upon the commission who has been identified in any way with either the operators or the miners, so that it provides for the appointment of nine wholly disinterested people for this commission. My own thought has been that that is an unnecessary number, and that the business of the commission will be expedited and transacted better if we have a less number on the commission. Also, it will be a matter of economy. I think if we want to get quick action, as we evidently do, and get a report before the 1st of January of next year, a commission of five, if they are going to be all disinterested, would be enough to conduct this investigation. The argument in favor of the number nine was that the commission may be divided up into subcommittees, and one of them go to one part of the country, say, three members, three to another part of the country, and three to another part of the country, and in that way carry on separate investigations. The result of that is going to be that you are going to have facts found and recommendations made by three men instead of by the commission. That is the practical effect of it, and I think it would be better to let the commission as a whole make the investigation and have the judgment and recommendations of five men on all these propositions, rather than have the investigation spread out over the country in that way and then get only the judgment of three men.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. DENISON. Yes.

Mr. KNUTSON. By having a membership as provided in the committee bill, would it not be possible to hold hearings on the anthracite and the bituminous situations at the same time?

Mr. DENISON. I think it would; yes. The idea of appointing a commission of five was embodied in the draft of a bill which I prepared. I apologize for referring to it, and would not do so but for the fact that the chairman of the committee referred to it a moment ago when he was speaking. After the President's message I conferred with a number of Members of the House, particularly with the majority leader, as the chairman of the committee [Mr. WINSLOW] was not in town. Neither was the next ranking man on the committee [Mr. PARKER]. I could not find the next ranking member. As I was the next ranking man on the committee in town, I thought some one ought to prepare a bill to be submitted to our committee, in view of the fact that it was the judgment of most of those whom I consulted that this legislation proposed by the President should come from the Committee on Interstate and Foreign Commerce. Therefore, I drafted a bill providing for a commission of five members, but withheld the filing of it until the chairman of our committee should come to the city. I even refused to give the contents of it to the press. After the chairman came to town I refused to file it until I first consulted him. I did so and found that he was preparing a bill himself, and, deferring to his wishes, as I always try to do, I said that I would not file mine but would present my views to the committee, and I did so by trying to amend the committee bill, as I have stated. That is the substance of the matter to which the chairman of the committee referred a moment ago. I had no thought of trying to rush the bill through if members of the committee desired hearings. The draft of the bill I prepared provided for a commission of five members, and I think that is a more desirable number than nine.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. WINSLOW. Mr. Chairman, the only matter that I care to answer or speak about is the question of the number of persons on the commission. The bill which was originally drafted to meet this situation contained the number five, as the gentleman from Illinois [Mr. DENISON] has indicated. It seemed to those who brought together the first two or three bills that five was a very reasonable and a proper number. When we began to study the matter, however, and undertook to go through a little to see where it might land it became apparent that while five might be a very satisfactory number, yet, on the other hand, it might be an unwise number, a number which would be a handicap to the operation of legislation. Then came up the question about increasing the number, and an odd number was thought of, naturally. The number jumped up to seven, and as that number was considered it seemed that nine would be a better number, and for this reason: The centers of coal production are numerous and wide apart. We are asking the commission to make a report to us on the 1st of January. They naturally will have to work fast. We thought in the end, as did all those who were consulted, that if it turned out in the selection of commissioners and the development of work and the general procedure under the legislation that they would like to be investigating in different parts of the country, it would be wise to have a number sufficient that the commission could be divided up, one-third, say, in the southern section, one-third in Illinois, and so on. They could then get their facts together and work out, maybe, something practical in the way of suggestion much better and quicker than they could if they had too small a number. So those who had to do with preparing the bill—and I, the one who introduced it—came to the conclusion that the safe thing to do was to provide an elastic arrangement so as to allow a number up to nine and let the President do as he wished. I think the question of numbers is a matter of small concern, so long as we have at least five.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired. The question is on agreeing to the amendment offered by the gentleman from Illinois to the committee amendment.

The amendment to the amendment was rejected.

Mr. SANDERS of Indiana. Mr. Chairman, I desire to offer an amendment, which I send to the desk.

Mr. WINSLOW. Mr. Chairman, I ask unanimous consent that all debate upon the Bland amendment do now close.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that all debate upon the Bland amendment and all amendments thereto be now closed. Is there objection?

Mr. BLAND of Indiana. That includes the committee amendment as well?

The CHAIRMAN. No. Is there objection?

Mr. TUCKER. Mr. Chairman, I object.

Mr. WINSLOW. Then, Mr. Chairman, I move that all debate upon the Bland substitute and all amendments thereto be now closed.

The motion was agreed to.

The CHAIRMAN. The question now recurs on the substitute offered by the gentleman from Indiana [Mr. BLAND] for the committee amendment.

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. BLAND of Indiana. Mr. Chairman, I demand tellers.

The CHAIRMAN. Does the gentleman from Indiana demand a division?

Mr. BLAND of Indiana. I call for a division first.

The committee divided; and there were—ayes 75, noes 126.

Mr. BLAND of Indiana. I demand tellers, Mr. Chairman.

Tellers were refused.

So the substitute was rejected.

Mr. BANKHEAD. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Alabama rise?

Mr. BANKHEAD. I desire to offer an amendment.

The CHAIRMAN. The gentleman from Alabama offers an amendment which the Clerk will report.

Mr. BANKHEAD. Mr. Chairman, on page 5, line 22, I move to strike out "$10,000 a year," and insert in lieu thereof "$7,500 a year."

The CHAIRMAN. The gentleman from Alabama offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BANKHEAD to the committee amendment: Page 5, line 22, strike out the figures "10,000" and insert in lieu thereof the figures "7,500."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. BANKHEAD. Mr. Chairman, I desire to say a few words in reference to this amendment. I shall not consume the five minutes allotted under the rule. It will be observed by the terms of this bill the members of this commission are not required to devote their full time and attention to the duties of this investigation. It is no doubt probable that the President of the United States in the event this bill should pass will appoint on this commission nine men of some character of substantial business, and this annuity of $10,000 as proposed in this bill would be merely an additional compensation to their regular income. All the expenses of the members of the commission are paid under the terms of the bill, and it seems to me that a salary of $7,500 a year under the circumstances would be entirely ample. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. BANKHEAD].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. BANKHEAD. Mr. Chairman, I ask for a division.

The committee divided; and there were—yeas 116, noes 72.

So the amendment was agreed to.

Mr. MOORE of Virginia. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

Mr. MOORE of Virginia. To strike out the sum of $500,000 in line 20, page 9, and insert the sum of $300,000.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Virginia to the committee amendment: On page 9, line 20, strike out the figures "$500,000" and insert in lieu thereof "$300,000."

Mr. MOORE of Virginia. Mr. Chairman, it seems to me that to provide an additional appropriation of $500,000 would simply invite wasteful expenditure. This is said in view of the experience we have all had with governmental operations. It can certainly do no harm to specify a less amount, because if $300,000 should prove insufficient, Congress, being almost constantly in session, that amount could be increased at nearly any time. If the distinguished chairman of the Committee on Appropriations [Mr. MADDEN] is here, he will surely indorse my statement that it is incumbent upon us to economize at every step. Here is a chance to work a possible economy. I expect to vote for the bill, but not because I have any great confidence in the result that will be accomplished by the investigation. I believe we are in possession of most, if not all, of the ascertainable facts, and that what we ought to be doing now is not to become excited about opening the door for a further inquiry but rather to take the facts that we have and legislate upon the basis of those facts to relieve to any extent that is possible the great and dangerous emergency that exists in this country. [Applause.] I shall vote for the bill in deference to those who are convinced that there are unrevealed facts which should be ascertained.

I find, however, in looking back that the coal industry has been investigated almost continuously. In 1898 the Industrial Commission, with Senator Penrose as chairman, was created, which investigated the coal and other industries. In 1912 the Committee on Industrial Relations, with Mr. WALSH as chairman, was created, that made another investigation which included the coal industry. Those commissions took an immense mass of evidence and submitted voluminous reports of a very exhaustive character. The Interstate Commerce Commission in 1917 and 1918 conducted a most elaborate investigation dealing with the whole coal situation and all conditions pertaining to it in the territory between the Mississippi River and the Atlantic Ocean, wherever coal is mined. The Labor Board has investigated. The Department of Labor has investigated. The Trade Commission has investigated. And there have been the Colorado, the West Virginia, and perhaps other more limited investigations. The difficulty is that the accumulated facts which are within the reach of all of us are not considered by any of us, or certainly not by many of us. And now we are engaged in doing something less important than the work of dealing with the great emergency which confronts us. That is a matter of incalculable importance and urgency.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. WINSLOW. Mr. Chairman, I wish to say in behalf of the committee, that after consultation I find as to the amount of $300,000 we have no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. MOORE].

The question was taken, and the amendment was agreed to.

Mr. WINSLOW. Mr. Chairman, I would like to call attention on page 9, line 17, to the spelling of the word "aproved."

The CHAIRMAN. Without objection, the spelling will be corrected to "approved."

There was no objection.

Mr. SANDERS of Indiana. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SANDERS of Indiana: On page 5, line 11, after the first word, "Commission," insert: "One of such members shall be an experienced coal miner and one such member shall be an experienced coal operator."

Mr. SANDERS of Indiana. Mr. Chairman, I do not care to say anything on the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana [Mr. SANDERS].

The question was taken, and the amendment was rejected.

Mr. BLAND of Indiana. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLAND of Indiana: Page 5, line 1, after the word "information," insert "for the Congress as a basis for legislation on matters pertaining to taxation and."

The CHAIRMAN. Does the gentleman from Indiana desire to be recognized?

Mr. BLAND of Indiana. Just for one minute. As to this amendment, in which I am seeking to try to express the purpose of the legislation, the title of the bill indicates that the commission is "for the purpose of securing information in connection with and relative to the question of interstate commerce in coal, and for other purposes." I think it entirely proper to state another purpose for which you are getting information. I believe it is important also to include that purpose, since you say it is for interstate commerce. I think it is important to include the additional purpose that you want this information for by saying it is to include tax legislation.

Mr. WINSLOW. Mr. Chairman and gentlemen, if the purpose of the amendment were merely to emphasize the desire to have information as an aid to legislation and for the study of the taxation question, I am sure the committee would not offer much if any objection. Under the proposed phrasing, however, we might limit the potentialities of the commission to the points where the items set forth in the amendment could only be considered. So at the moment the committee objects to the amendment.

Mr. BLAND of Indiana. You also say, "For other purposes."

Mr. WINSLOW. I know; but this might be a very delicately put-up job, or it might be merely an accident. I think it is an accident, but at the same time I do not want to take any chances.

Mr. HOCH. Mr. Chairman, may we have the amendment again reported?

The CHAIRMAN. Without objection, the pending amendment will again be reported.

The Clerk read as follows:

Amendment offered by Mr. BLAND of Indiana: Page 5, line 1, after the word "information," insert "for the Congress as a basis for legislation and matters pertaining to taxation and," so that the paragraph will read: "That for the purpose of securing information for the Congress as a basis for legislation and matters pertaining to taxation and in connection with questions relative to questions of interstate commerce in coal and all questions and problems arising out of and connected with the coal industry," etc.

The CHAIRMAN. The debate on the amendment is exhausted. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. SUMNERS of Texas. Mr. Chairman, I ask unanimous consent to submit a question to the chairman of the committee for information.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to submit a question to the chairman of the committee for information. Is there objection?

There was no objection.

Mr. SUMNERS of Texas. On page 6, beginning with line 18, it seems that that language creates nine different commissioners. Each member of this commission, under that language, would have the power to set up an investigation of his own, uncontrolled by the commission. I was just wondering whether or not the committee has carefully examined that language.

Mr. WINSLOW. I would say to the gentleman from Texas that the committee spent a considerable time over that feature, and finally concluded, in view of the precedents set in the case of the Interstate Commerce Commission and Federal Trade Commission and other commissions, with respect to the latitude covered by them, that we would make the same arrangement here.

Mr. SUMNERS of Texas. Does not the chairman think there ought to be added, after the word "commission," the words "authorized so to do by the commission"? That is in line 18. The members of this commission would not be under the control of the commission as a whole. Any one member of this commission could go off down to Tennessee or to Kentucky or wherever else he wanted to go and set up entirely inquisitorial proceedings of his own and the commission could not control him.

Mr. WINSLOW. The language follows the provisions of the other commissions, and we saw no impractical feature connected with it.

Mr. SUMNERS of Texas. I do not want to offer an amendment. I just wanted to make inquiry about it.

Mr. BLAND of Indiana. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLAND of Indiana: Page 5, line 8, after the word "Senate," strike out all of lines 8, 9, and 10 down to and including the word "commission" in line 11.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. WINSLOW. Which word "commission" is meant? I suppose, of course, it is the first.

Mr. BLAND of Indiana. Yes.

I would like to explain the amendment. I do not want five minutes. The purpose of it is to eliminate that part of the bill which says you can not have on the commission a Member of Congress—a Member of the House or a Member of the Senate—or a miner, or an operator. It is as plain as day here that you do not want the President to be hampered. For God's sake do not let him be hampered.

Mr. NEWTON of Minnesota. We do not want him to be hampered by coal men and miners asking to be put on the commission.

Mr. BLAND of Indiana. He has got courage, and he will face the issue. Do not be afraid of that.

Mr. STAFFORD. There might be some danger in having some Senator wanting to be on the commission.

Mr. GOODYKOONTZ. Mr. Speaker, the bill under consideration, reported by the Committee on Interstate and Foreign Commerce, is intended to carry into effect the recommendation of the President, made in his recent message to Congress, for the creation of a board of nine members, to be known as the United States coal commission with authority to secure information in relation to the coal industry. The second section of the bill, defining the duties of the commission, reads thus:

That it shall be the duty of said commission to investigate and to ascertain facts in the coal industry as to ownership of coal mines, prices of coal, wages, wage contracts, conditions of employment, distribution, waste of coal, profits realized by owners or operators of coal mines or by other persons or corporations having to do with the production, distribution, or sale of coal, and any other material facts in connection with the coal industry generally and the organization and persons connected with it. Said commission shall report to the President and to Congress its findings of fact and such recommendations as to methods and measures as in its judgment will promote continuity of production and efficiency in mining and distribution and maintain the uninterrupted movement of coal in interstate commerce and safeguard the interests of the workers, operators, and the consuming and general public. Said commission shall submit its first report not later than the 1st day of January, 1923.

The action of the President and of Congress has been prompted by pressure brought to bear by consumers of coal located in every part of the country vitally affected by a coal shortage which not only hampers industry but ominously threatens the comfort, the health, and tolerable existence of the people during the coming winter. It is alleged that even if there were an immediate general resumption of mining operations, that sufficient coal could not be mined and transported to our Northwestern States before navigation closes on the Great Lakes to meet the requirements of that region.

As you very well know, coal mining is West Virginia's greatest industry. The State has suffered immensely by reason of the interruption in mining and delay in the transportation of coal from its mines. Frankly speaking, I have not much faith and but little hope that any good will ever come from the legislation proposed. My colleagues in the House from West Virginia share the same view.

First of all, we believe that there are already too many Government bureaus, boards, and commissions, and that some of these already existing should be abolished and the taxpayers saved the expense of their maintenance; and, secondly, we believe that all the facts in relation to the mining, transportation, and distribution of coal are already fully known.

For years investigation of the coal industry has been going on. All during the war there was a Government Fuel Administration whose investigation covered every phase of the business; the Geological Survey, with every facility that money can provide; and the Federal Trade Bureau, operating at great governmental expense, and with a vast array of expert investigators, have assembled facts as to every branch of the business; and, furthermore, each House of Congress has literally taken thousands of pages of evidence on the problem.

The fundamental facts are known and, indeed, not disputed. Briefly, they are these:

(a) There are 200,000 more miners than are needed.

(b) There are one-fifth more acres of land under development than is necessary.

(c) There has existed since April 1 a strike of the union coal miners.

(d) More recently there has been a strike of certain railway workingmen which has interfered with transportation.

These are the factors involved in the entire question.

The commission will spend thousands of dollars and then solemnly report these elementary facts. For the reasons stated we West Virginia Members of the House are not very enthusiastic concerning the pending measure.

The conclusion to which we have arrived, however, is that since it is West Virginia's chief industry that is to be investigated, and since we have nothing to conceal and everything to gain by a full, fair, and open investigation and exposition of the facts, by a disinterested tribunal, and on account of the vast national interest in the subject, and finally, since the President, speaking for the Nation, earnestly recommends that it be done, we, the Members from West Virginia, have decided to vote for the bill.

There is a matter which cropped out in debate that I should not let pass without comment.

Certain gentlemen from other States, notably from Kentucky [Mr. THOMAS], have accused the coal operators of their respective States of assenting to the price of $3.50 per ton, as fixed by Mr. Hoover, and then of going home and ignoring their agreement by shamefully charging from nine to ten dollars per ton.

It affords me pleasure to tell you that I have it upon the authority of the Department of Commerce, given to me on yesterday, that the operators of smokeless coal in the great Pocahontas, Winding Gulf, Kanawha, New River, and other fields of West Virginia have faithfully kept their agreement with the department, and that of the operators of every class of coal in my State that not to exceed 15 per cent have charged in excess of the Government rate, and that this 15 per cent was

practically made up of little mines—those of a one or two car a day capacity, and farmers and others who operate wagon mines.

The coal operators and working miners of my State I am justly proud of, for they have been truly faithful to the country in the time of a great public need.

I now desire to put in the RECORD the following telegram placed in my hands by the gentleman from Pennsylvania [Mr. EDMONDS]. The message reads:

AUGUST 21, 1922.

P. C. MADEIRA,
President, 900 North American Building, Philadelphia, Pa.:

A meeting was held at Saxton on Saturday, the 19th, between a committee consisting of Messrs. McIntire, Thropp, Gutshall, and Sommerville, appointed by a majority meeting of Broad Top operators and district board members, Taylor district organizer, Donaldson, and Messrs. Fleck and Morgan, representing the United Mine Workers of America, District No. 2. The representative of the miners stated that they would refuse to sign the Cleveland agreement unless the operators of the Broad Top region would enter into a secret agreement not to employ certain men, a list of whose names would be compiled by the secretaries of the various locals, and a complete list for the region to be furnished each operator, and stated that if any of these men were employed the miners would refuse to work with them. The operators must further agree to collect any and all assessments in addition to the check off that the union might order, either for furnishing aid to the nonunion fields or for other purposes; also, any operators owning both union and nonunion mines would be forced to sign up for their nonunion mines before they would sign for or permit their union mines to work. The committee stated that this policy would be insisted on all over district 2. Swope and a few small operators have signed up, apparently on this basis.

J. S. SOMMERVILLE.

You will have noted from the reading of the message that the United Mine Workers' officials refuse to sign the so-called Cleveland agreement with the Pennsylvania operators, except and unless the operators shall enter into a secret—mind you, secret—agreement providing—

First. The operators shall not employ certain men, a list of whose names is to be compiled and furnished the operators by the secretaries of the various locals, and a complete list of whose names for the region to be furnished each operator.

Second. In addition to the check off the operator shall withhold from the pay of the miner any assessment, either for furnishing aid to the nonunion fields or for other purposes, as the union may order.

Third. That operators owning both union and nonunion mines should be forced to sign up for their nonunion mines before they would be allowed to sign for or permitted to work their union mines.

The effect of the first demand, if carried to fruition, is to blacklist any miner who may incur the displeasure of the union officials.

The effect of the second demand, if conceded, would be the securing of funds for carrying on propaganda and maintaining strikes in nonunion territory and to procure funds for political and other purposes the nature of which is not disclosed.

The effect of the third paragraph would be, in case a company such as the Madeira-Hill Coal Mining Co., having mines in two or more States, to require that employer to sign up for all its mines in nonunion as well as union territory and wheresoever situate.

This matter I submit to Congress and to the people for their information, consideration, and judgment. To my mind, it presents a proposition of the gravest concern to the American public.

The CHAIRMAN. The time of the gentleman has expired. The question is on agreeing to the amendment of the gentleman from Indiana [Mr. BLAND].

The question being taken, the amendment was rejected.

Mr. BLAND of Indiana. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLAND of Indiana: On page 6, line 4, after the word "distribution" insert the word "production."

The CHAIRMAN. The question is on agreeing to the amendment.

The question being taken, the amendment was rejected.

Mr. BLAND of Indiana. Mr. Chairman, I have one more amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLAND of Indiana: Page 7, line 5, add a new section, as follows:

"In case of failure to comply with any subpœna or in case of the contumacy of any witness before the coal investigation agency, the agency may invoke the aid of any United States district court. Such court may thereupon order the witness to comply with the requirements of such subpœna and to give evidence touching the matter in question. If the court makes such order it may also fix in the order the time for compliance therewith and enjoin the witness from shipping or receiving from shipment in commerce among the several States or with foreign nations any coal after the time so fixed and before his obedience to the order. Any failure to obey such order or injunction may be punished by the court as a contempt thereof."

Mr. BLAND of Indiana. Mr. Chairman, the amendment purports to impose a penalty upon one who refuses to give information, such a penalty as probably will bring results. I can well understand that one who would make a speech like the one which we heard a moment ago probably would not want that amendment, because he says the facts are already known. Every man knows that the facts are not known, and, Mr. Chairman, we can not get the facts unless you put some teeth in the bill. I am hoping for the passage of this amendment to deny the right of interstate commerce to the coal operator who refuses to give information.

Mr. REED of West Virginia. Will the gentleman yield for a question on that point?

Mr. BLAND of Indiana. Not now. It was said that could not be done. If gentlemen on the Interstate Commerce Committee are familiar with past legislation they know that some of the most effective legislation that has been written into law has been to deny to great corporations the right of interstate commerce unless they complied with the requests of the Government. There are some gentlemen here who do not want that provision to go into the bill. I leave it to you.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Indiana.

The question being taken, the amendment was rejected.

Mr. LONDON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LONDON: On page 5, line 17, after the word "investigation," strike out the comma and insert a period in lieu thereof, and strike out all after the period in line 17 and all on line 18.

Mr. LONDON. Mr. Chairman, the object of this amendment is to permit minority reports. The way I interpret this section only one report will be possible, and minority opinions of members of the commission will be excluded. It is possible that the President may find nine persons who are disinterested so far as the coal industry is concerned, men who live on another planet. Every man in his senses is interested in coal in one way or another. If one is a banker the stability of his bank may depend upon the production of coal. A producer of iron needs coal. The owner of a railroad bond is interested in coal. In short, it is impossible to conceive of anybody who should not be concerned about coal, whether he be a resident of the tenement-house district in New York or a farmer in Oklahoma. Not only does this bill fail to give representation on the commission to organized labor; not only does it exclude as members all persons who have some knowledge of the industry and its difficulties, but it seeks in advance to suppress every minority opinion. I ask the chairman of the committee whether my interpretation of the meaning of lines 17 and 18 on page 5 is not correct?

The CHAIRMAN. The time of gentleman has expired.

The question is on agreeing to the amendment offered by the gentleman from New York [Mr. LONDON].

Mr. GARRETT of Tennessee. I ask for a division. May we have that amendment reported again?

The CHAIRMAN. The gentleman from Tennessee asks for a division, and pending that asks unanimous consent that the amendment may be reported again. Without objection, the amendment will be reported again.

The Clerk again read the amendment.

Mr. MANN. Let the Clerk read the language proposed to be stricken out.

The Clerk read as follows:

Strike out the words "but all reports to the Congress and to the President shall be made by majority action of said commission."

The CHAIRMAN. The gentleman from Tennessee asks for a division on this amendment.

The committee divided, and there were—yeas 60, noes 112.

Accordingly the amendment was rejected.

Mr. YOUNG. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from North Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. YOUNG: Page 5, line 4, after the word "industry," insert "and to aid the Congress to legislate under any of its powers."

The CHAIRMAN. The question is on the amendment of the gentleman from North Dakota.

The question being taken, the amendment was rejected.

The CHAIRMAN. The question is on the committee amendment as amended.

The question was taken, and the committee amendment was agreed to.

Mr. BLAND of Indiana. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BLAND of Indiana. When will a motion to recommit the bill be in order?

The CHAIRMAN. In the House after the bill has been ordered to be read a third time.

Mr. WINSLOW. Mr. Chairman, I move that the committee do now rise and report the bill to the House, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CAMPBELL of Kansas, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 12377, to establish a commission to be known as the United States Coal Commission for the purpose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes, and had directed him to report the same back with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

Mr. WINSLOW. Mr. Speaker, I move the previous question on the bill and amendment to final passage.

The previous question was ordered.

The SPEAKER. The question is on the amendment.

The question was taken, and the amendment was agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. GARRETT of Tennessee. Mr. Speaker, I move to recommit the bill.

Mr. BLAND of Indiana. I have a motion to recommit.

The SPEAKER. Is the gentleman from Tennessee opposed to the bill?

Mr. GARRETT of Tennessee. I am.

The SPEAKER. The gentleman from Tennessee offers a motion to recommit.

The Clerk read as follows:

Mr. GARRETT of Tennessee moves to recommit the bill to the Committee on Interstate and Foreign Commerce, with instructions to report the same back forthwith, with the following amendment: Page 5, line 17, strike out the comma and insert a period in lieu thereof, and strike out all after the period of lines 17 and 18.

Mr. MANN. Mr. Speaker, I make a point of order that a motion to recommit is not in order. Beginning a good many years ago, and perhaps not beginning at that time, Speaker Clark ruled that it was not in order, in a motion to recommit, to move to strike out any part of an amendment which had just been voted upon and agreed to by the House. That ruling has been consistently followed by both Speaker Clark and the present Speaker ever since the original distinct ruling was made, the original distinct ruling having been made on the rulings by prior Speakers. This is a motion to recommit with instructions to strike out a portion of an amendment just voted in and comes clearly within the ruling of Speakers heretofore.

The SPEAKER. The precedents are very clear, and the Chair sustains the point of order. The question is on the passage of the bill.

Mr. BLAND of Indiana. Mr. Speaker, I have a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. BLAND of Indiana. I am in its present form, but I think I shall support the bill.

Mr. LONDON. Mr. Speaker, I am opposed to the bill any way, and I ask for recognition on a motion to recommit.

The SPEAKER. The gentleman will submit his motion.

Mr. LONDON. I make a motion to recommit the bill.

Mr. BANKHEAD. I want to offer a motion to recommit with instructions.

Mr. BLAND of Indiana. Mr. Speaker, does not a motion with a specific recommendation have preference over a motion without any recommendation?

The SPEAKER. No.

Mr. BLAND of Indiana. Where there are two persons both opposed to the bill and neither a member of the committee, does not the one having a motion to recommit with instructions have preference?

The SPEAKER. That case has not arisen.

Mr. BLAND of Indiana. I understand that it has arisen here.

The SPEAKER. The gentleman from New York [Mr. LONDON] said he was opposed to the bill, and he has been recognized.

Mr. BLAND of Indiana. Before the question was put, the gentleman from Alabama said he had a motion to recommit, making specific recommendations. Has not he a right to be heard, and has he not preference over the other gentleman? The gentleman from Tennessee was given the preference over me, and I do not understand how you can play fox and geese in that way.

The SPEAKER. When the gentleman from Tennessee made the motion to recommit the Chair was not aware that any other gentleman had such a motion.

Mr. BLAND of Indiana. I stated that I had a motion to recommit.

The SPEAKER. The Chair did not hear the gentleman until after the gentleman from Tennessee had made his motion. The Chair did not hear the gentleman from Indiana offer his motion until after the point of order had been made on the motion of the gentleman from Tennessee.

Mr. BLAND of Indiana. I had offered it once before. Undoubtedly the Chair did not hear me. The point I wish to ask the Chair about is where two gentlemen are demanding recognition and one says he is opposed to the bill and wants to give specific directions to the committee, and the other says he is opposed to the bill but has no directions, which one has the preference?

The SPEAKER. The Chair does not care to hear any further argument. After the third reading of the bill the gentleman from Tennessee [Mr. GARRETT], so far as the Chair knew, was the only gentleman to offer a motion to recommit. The Chair asked him if he was opposed to the bill, and he said he was. The Chair therefore recognized him. That motion to recommit was ruled out on a point of order. The gentleman from Indiana then offered to make a motion to recommit and the Chair put to him the usual question, not knowing at that time that any other gentleman wishes to make such a motion. The Chair really expected to recognize the gentleman from Indiana, although the gentleman said that he was not opposed to the bill, but did not like its present form, because the Chair did not know that anyone else desired to be recognized. Immediately then—and that was the first time the Chair had any intimation that the gentleman from New York [Mr. LONDON] wanted to make a motion—the gentleman from New York [Mr. LONDON] rose and said that he was opposed to the bill, and offered a motion to recommit. The Chair had no alternative except to recognize him for the purpose of making that motion.

Mr. BLAND of Indiana. I am not saying that it is I who want to make a motion to recommit now. The gentleman from Alabama [Mr. BANKHEAD] wants to offer a motion to recommit with instructions.

The SPEAKER. The Chair has no knowledge whether the gentleman from Alabama was opposed to the bill or that he had a motion to recommit until after the gentleman from New York [Mr. LONDON] had been recognized and had made his motion. The question is on ordering the previous question demanded by the gentleman from Michigan [Mr. MAPES].

The previous question was ordered.

The SPEAKER. The question now is on the motion of the gentleman from New York to recommit the bill.

The question was taken; and on a division (demanded by Mr. BLAND of Indiana) there were—ayes 45, noes 148.

So the motion to recommit was rejected.

The SPEAKER. The question now is on the passage of the bill.

Mr. MONDELL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken and there were—yeas 219, nays 55, not voting 153, as follows:

YEAS—219.

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Ten Eyck (for) with Mr. Mansfield (against).

Mr. Patterson of New Jersey (for) with Mr. Stevenson (against).

Until further notice:

Mr. Maloney with Mr. Gallivan.

Mr. Langley with Mr. Clark of Florida.

Mr. Ramseyer with Mr. Cantrill.

Mr. Burton with Mr. Oldfield.

Mr. Thompson with Mr. Tague.

Mr. Cramton with Mr. Carter.

Mr. Nolan with Mr. Riordan.

Mr. Morin with Mr. Bell.

Mr. Beck with Mr. McSwain.

Mr. Temple with Mr. Woods of Virginia.

Mr. Wood of Indiana with Mr. Sisson.

Mr. Kahn with Mr. Kitchin.

Mr. McArthur with Mr. Overstreet.

Mr. Kiess with Mr. Martin.

Mr. Burroughs with Mr. O'Brien.

Mr. Stiness with Mr. Cockran.

Mr. Olpp with Mr. Brand.

Mr. Steenerson with Mr. Rainey of Illinois.

Mr. Strong of Pennsylvania with Mr. Connally of Texas.

Mr. Rhodes with Mr. Dupré.

Mr. Larson of Minnesota with Mr. Blanton.

Mr. Crowther with Mr. Dominick.

Mr. Newton of Missouri with Mr. Logan.

Mr. Merritt with Mr. Barkley.

Mr. Lineberger with Mr. Wise.

Mr. Hutchinson with Mr. Deal.

Mr. Sinclair with Mr. Taylor of Colorado.

Mr. Yates with Mr. Rucker.

Mr. Fish with Mr. Rainey of Alabama.

Mr. Henry with Mr. Fields.

Mr. Beedy with Mr. Raker.

Mr. Jones of Pennsylvania with Mr. Park of Georgia.

Mr. Reed of New York with Mr. Hawes.

Mr. White of Maine with Mr. Fulmer.

Mr. Nelson of Maine with Mr. Mead.

Mr. Michaelson with Mr. Lyon.

Mr. Anderson with Mr. Johnson of Mississippi.

Mr. Burtness with Mr. Goldsborough.

Miss Robertson with Mr. Stedman.

Mr. Ward of New York with Mr. Collins.

Mr. McPherson with Mr. Griffin.

Mr. Montoya with Mr. Sabath.

Mr. Codd with Mr. Montague.

Mr. Scott of Michigan with Mr. Johnson of Kentucky.

Mr. Shelton with Mr. Linthicum.

Mr. Nelson, A. P., with Mr. Byrns of Tennessee.

Mr. Fess with Mr. Kunz.

Mr. Gahn with Mr. Larsen of Georgia.

Mr. Kleczka with Mr. Sears.

Mr. Summers of Washington with Mr. Taylor of Arkansas.

Mr. Hukriede with Mr. Sullivan.

Mr. Sweet with Mr. Stoll.

Mr. Husted with Mr. Jacoway.

Mr. MAPES. Mr. Speaker, I am requested to announce that if my colleague, Mr. CRAMTON, were here he would vote "yea."

The result of the vote was announced as above recorded.

On motion of Mr. WINSLOW, a motion to reconsider the vote by which the bill was passed was laid on the table.

COMMITTEE TO ATTEND FUNERAL OF LATE CHAPLAIN HENRY N. COUDEN.

The SPEAKER appointed as members of the committee to attend the funeral of Doctor Couden, the following: Mr. MANN, Mr. CANNON, Mr. COOPER of Wisconsin, Mr. PARKER of New Jersey, Mr. JOHNSON of Washington, Mr. OSBORNE, Mr. TUCKER, Mr. CRISP, and Mr. STEAGALL.

EXTENSION OF REMARKS.

Mr. WINSLOW. Mr. Speaker, I would like to ask that all of those who spoke on the bill before the House committee to-day be allowed five days in which to extend their remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

PENSIONS.

Mr. KNUTSON, from the Committee on Pensions, submitted a conference report on the bill H. R. 4, entitled "An act granting relief to the soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses," for printing under the rules.

TRANSFER OF DIPLOMATIC REPRESENTATION AT LUXEMBURG.

The SPEAKER laid before the House the following message from the President of the United States, which was read and referred to the Committee on Foreign Affairs:

The Senate and House of Representatives:

I transmit a report by the Secretary of State in regard to the advisability of transferring United States diplomatic representation at Luxemburg from the minister at The Hague to the ambassador at Brussels, on account of the economical union which has been established between Belgium and Luxemburg by treaty.

I concur in the recommendation of the Secretary of State that legislation be enacted which will enable this to be done, and in view of the reason advanced and the further fact that all the

other Governments having diplomatic representation at Luxemburg, except Portugal, have made the transfer I request of Congress early action that in place of an "envoy extraordinary and minister plenipotentiary to the Netherlands and Luxemburg" and an "ambassador extraordinary and plenipotentiary to Belgium," as at present, will provide for an "envoy extraordinary and minister plenipotentiary to the Netherlands" and an "ambassador extraordinary and plenipotentiary to Belgium, who shall also be envoy extraordinary and minister plenipotentiary to Luxemburg."

WARREN G. HARDING.

THE WHITE HOUSE,
Washington, July 18, 1922.

EXTENSION OF REMARKS.

Mr. WILLIAMS of Illinois. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill just passed.

Mr. ROBSION. Mr. Speaker, I make the same request.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. ROSSDALE. Mr. Speaker, I ask unanimous consent to print in the RECORD an address delivered in Washington recently by my colleague, the Hon. ISAAC SIEGEL, on the subject of immigration.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The extension of remarks referred to are here printed in full as follows:

Mr. ROSSDALE. Mr. Speaker, Congressman ISAAC SIEGEL, of New York, has led the fight for liberal immigration in the Sixty-fourth, Sixty-fifth, Sixty-sixth, and Sixty-seventh Congresses. It is admitted by those who have given the subject thorough study that he knows as much of immigration, naturalization, and Americanization as any man in the United States. For nearly 30 years he has studied the question from every angle. His latest view of this important subject appeared in the Washington Times of July 23, 1922, and the article was copied in a large number of newspapers throughout the country. I know that the Members will be interested in having it in full, because it contains material which they should have at hand and which will help them to further study this important question. The article as it appeared in the Washington Times is as follows:

[From the Washington Times, Sunday, July 23, 1922.]

IMMIGRATION PROBLEM, INVOLVING NATIONAL WELFARE AND HUMAN HAPPINESS, DISCUSSED BY COMMITTEE CHIEF—ISAAC SIEGEL, M. C., OF NEW YORK, LONG STUDENT OF PUZZLE—THOUGH 3 PER CENT QUOTA LAW ADMITTEDLY WORKS INDIVIDUAL HARDSHIPS, RANKING MEMBER OF IMMIGRATION COMMITTEE IS OPTIMISTIC OVER ITS ADMINISTRATION—PRESENT LAWS O. K., BUT DEMAND STRICT, SANE ENFORCEMENT—REGULATIONS ARE ADEQUATE, SAYS SIEGEL, BUT SHOULD BE AIDED BY GREATER PROVISION FOR REAL AMERICANIZATION WORK, THROUGH ADDITIONAL NATURALIZATION COURTS AND CLERKS.

(By Maurice S. Hyland.)

What are we going to do about immigration?

Certainly it is one of our most important problems.

One of the foremost authorities on this subject is Congressman ISAAC SIEGEL, of New York, ranking member of the Immigration Committee and chairman of the Census Committee. A keen observer and lifelong student of economics, Mr. SIEGEL's views on immigration will receive the earnest attention of all thoughtful persons.

That he has also devoted considerable time to politics is apparent. He is serving his fourth term in Congress, attracting national attention by defeating Morris Hillquit, the noted Socialist, at each election.

By virtue of his official position, he has unusual opportunities of studying human nature. More, he has studied it as it is affected by soil and climate, and by the pressure of men upon each other. Of course, if Mr. SIEGEL thus studies immigrants so closely, it is, perhaps, because he has recognized in them a new mode in the operations of intellect.

Mr. SIEGEL believes that civilization can increase and morality exist as a controlling force only in the measure in which liberty exists.

He is convinced that pursuit and capture of this liberty is one of the primary causes of immigration.

Throughout the interview the Congressman displayed marked optimism as to the operation of present and future immigration laws.

EXTREME HARDSHIP.

"In many cases the present 3 per cent law has resulted in extreme hardship in the division of families," he said. "Up to May 3 of this year 2,787 were turned back solely on account of excess quotas. The total number arriving in the United States from June 30, 1921, to May 3, 1922, was 230,537. There were admitted temporarily, on account of hardships of the 3 per cent law, 2,787. For failure to pass the literacy test and for physical and mental reasons 11,066 immigrants were debarred during the 11 months.

"Under the 3 per cent immigration law the basis of calculation is the country of nativity and not of residence.

"Here is a typical case: Last year a man came to America with his wife. He was born in Poland, but he lived in England for many years. He served in the English Army and he thought he was an Englishman. When he reached Ellis Island the officials regarded him as a Pole. The Polish quota was full, so he had to go back to England. His wife was born in England; the officials said she could come into America. Of course she did not wish to be separated from her husband, so she returned to England with him.

"Last October I wrote to President Harding on this phase of the subject. He admitted the law led to great hardships and offered to help remedy the situation.

"It seems to me this law will remain in effect for two years. Then an attempt will be made to reduce the 3 per cent to 2 per cent. Such a reduction would be an economic blunder. In a conversation last week with one of the highest Government officials he assured me that within 60 to 90 days this country will experience the greatest business revival it has ever known—if we except the war period. He declared frankly that there would be a serious shortage of laborers.

LABOR SHORTAGE.

"His prophecy is borne out by the semimonthly report just issued by the Pennsylvania State department of labor and industry, which states that for the first time in two years an acute shortage of labor exists. The demand for labor in the building trades, metals, and mines far exceeds the supply. Because of this demand rates of pay in some localities has increased from 25 cents an hour to 35 and 40 cents.

"It is true that immigrants entering America are, at least temporarily, working under unfamiliar conditions. The work is new to them, and often they are willing at the start to work for wages that are lower than received by American workingmen. But they rapidly adjust themselves to existing conditions and make useful and permanent citizens."

"What are your views on naturalization, and what interest does the immigrant exhibit in public affairs?" Mr. Siegel was asked.

"There would be a larger increase in naturalization if sufficient courts and clerks for that purpose were provided. In cities like New York, Chicago, Philadelphia, Boston, and Pittsburgh there are insufficient courts and clerks. Application for citizenship is a costly proposition, because the applicant is obliged to appear frequently, with witnesses, and in most cases it is necessary for him to pay the amount of wages lost by the witnesses while attending court. The Federal Government receives all the money paid by the applicants for naturalization. The money goes into the Treasury. More than 6,000,000 persons in the United States are unnaturalized. Of these 1,032,000 reside in the city of New York.

"Since each nation has its own peculiar form of government it is rather difficult to say just what interest immigrants, as a whole, exhibit in public affairs.

ADOPT UNITED STATES IDEAS.

"Temporarily, at least, immigrants observe the customs of the land from which they came. In time, of course, they are assimilated and change their views to conform to American ideas. My observation shows that many of the most prominent men in the United States have come from foreign countries. Take the case of Harry Fischel, for instance:

"Fischel landed in New York about 35 years ago with $1.37, a saw, and a hammer. To-day he is a director in many of the leading institutions of New York. He is the owner of the Holland House and valuable real estate along Park Avenue and Fifth Avenue. He recently purchased the Astor Library and remodeled it. The building is now used to aid immigrants. It is known as the Hebrew Sheltering and Immigration Aid Society.

"Or the case of Joseph S. Marcus:

"Forty years ago Marcus first saw New York. His wealth was exactly $2. Embarking in the clothing line he soon obtained a reputation for honesty, and was able to get credit. He organized the Public National Bank of New York, and later sold his shares in the bank for $1,000,000. He also organized the Bank of the United States, with many branches. He is to-day worth many millions of dollars.

"Certainly these two men took much interest in public affairs. Of course, such instances could be multiplied."

The Japanese problem, according to the Congressman, will likely be settled by diplomacy between now and the next session of Congress, since it is most probable that Congress will enact an immigration law in the winter of 1922–23 providing that no immigrant who intends to remain permanently in the United States shall be allowed to enter unless he is eligible to citizenship.

"The question of illiteracy," observed Mr. SIEGEL, "is a most interesting one. According to the 1920 census our country stands first in illiteracy. The examinations held by the Army and Navy officials during the draft showed there were approximately 26 per cent of those drafted unable to use the English language.

POLISH-JEW WON PRIZE.

"From figures at my disposal I should say there are about 6,000,000 illiterates in the United States. There are about 2,000,000 of these illiterates scattered through the Southern States. But there should be a sharp reduction in this number very soon, as the immigrants now arriving in this country must pass the literacy test. Recently the Daughters of the American Revolution offered a prize for the best essay on 'George Washington.' The prize was won by a Polish-Jewish lad who arrived in America just about one year ago. That is progress.

"The illiteracy problem is a big factor in our economic and political scheme. Immigrants who arrive here in childhood or early manhood, soon become voters, and they exercise great influence in the results of our elections. Then, too, large numbers of women have become voters through their husbands having obtained citizenship. To obtain citizenship, the husband must be able to read and write, show that he understands the Constitution; in fact, prove that he intends to become a good citizen. The wife, however, is not obliged to undergo this test at the present time. But the House will shortly pass a bill providing for the same test for women. In New York City, in 1910, there were 870,140 foreign-born women. Of these, 360,255 were citizens, in the majority of cases through naturalization of their husbands."

Living conditions in the large cities of the country, despite heavy immigration, have improved to a very large extent. The enactment of tenement house laws during recent years has given to most of the tenements baths, electric lights, hot water, and steam heat. Faulty sanitation has been corrected. An adequate water supply has been provided. Streets in the congested sections are cleaned more frequently. Sewerage and drainage conditions have been improved.

The cold-water flats, so far as the larger cities are concerned, are gradually passing away. The telephone has come into such great use in the city of New York that there is hardly a tenement that has not at least one telephone.

Furthermore, there has been a great development as a result of increased transportation facilities, of suburban territory around the big cities. Mark the sharp increase in the Borough of the Bronx.

BRONX BOOMING.

It now has a population of over 800,000; in 1910 it had a population of 400,000. There has been a perceptible rise in population in the Borough of Queens, which is part of the city of New York. Similar increases are noted in Chicago, Buffalo, and Milwaukee.

"A little over 960,000 children of immigrants attend the public schools in the city of New York alone," the Congressman replied, in answer to my question as to the school attendance and progress of children of immigrants.

"It is an admited fact," he continued, "that where the foreign born or their descendants have settled there is an increased attendance in school. It is worth noting that in the College of the City of New York 92 per cent of those who are attending the college are either foreign born or are of the first generation of foreign born."

Duluth, Minn., and Chelsea, Mass., with 74.1 per cent, were found to have the greatest number of pupils with foreign-born fathers. New York City, with 71.5 per cent, was third; Chicago, with 67.3 per cent, was fourth; and Boston, with 63.5 per cent, was fifth.

In the greater cities where there is a larger attendance of the children of foreign born it is apparent how important is the assimilative force of the public schools in determining the effect of these future citizens in Government affairs.

This assimilative force is very great. So much so that in a second generation the majority of these pupils become Americanized.

"There is a surprisingly regular attendance on the part of foreign-born children," the Congressman declared. "That is a sign that they desire to become citizens—a sign of progress, in fact. I have seen numbers of these children when they landed at Ellis Island and have kept in touch with many of them. The transformation even in two or three months is remarkable. And at the end of a year's residence here the change is startling.

"The appearance of these children on landing excites the greatest sympathy.

FORLORN FIGURES.

"Many are undernourished, stooped, and with suffering pictured strongly in their pinched faces. Forlorn little figures they are, cowering and shivering, gazing with a curious, timid stare at their new surroundings. The liberty they never knew in their own country is hidden from their gaze. But the beauties they are to behold and the improvement they are to experience, both mental and physical, starts almost immediately after they reach their destination.

"Is it any wonder they make every effort to become citizens?

"Is it any wonder that of the 4,600,000 warriors sent abroad by the Army and Navy in the recent war, 495,000 came from New York alone?

"Psychological speculation may extend the range of these observations.

"The number of nationalities attending a single school is almost unbelievable. Secretary of Labor Davis addressed two of the schools in my district on June 15. Twenty-seven nationalities were represented. There are 42 different languages spoken by as many peoples in New York City."

"Are new immigration laws needed?" I queried.

"Our immigration laws are adequate," the Congressman declared. "And on the whole I would say they are administered satisfactorily. A strict enforcement of the immigration act of 1917, plus the amendments previous to the quota law, is really all that is necessary. The law would be aided if greater provision for Americanization work and more naturalization courts and clerks were established. It will interest your readers to learn that the Treasury of the United States has received and retained above all appropriations from the head tax more than $6,000,000. Ultimately some of this money will be used in creating more naturalization courts and clerks."

SAFE FROM DISEASE.

It is possible that slight changes in administration methods may be made, the Congressman stated. We are pretty well protected so far as contagious diseases are concerned. There is little need of further legislation as to paupers.

The law affecting the admission of immoral persons and criminals could be made more stringent, perhaps, both as to those coming as passengers and as immigrants. Especial attention should be paid to alien seamen, especially those who desire to enter the country by deserting their ships. The 1917 act did much to remedy these evils.

"What is the attitude of foreign governments toward immigration," I asked.

"Of course," observed the Congressman, "foreign governments, especially European, seem to regard it as inevitable that a certain percentage of their subjects will emigrate soon or late. Their attitude is one of tolerance, although foreign governments insist that all obligations be discharged before embarking for another country. This applies particularly to military duty. And if the subject has evaded that duty he is liable to arrest should he return. After all, the economic factor is the most important."

"A discussion of the ship subsidy bill would be interesting," I reminded the Congressman.

HUGE PROFIT IN FARES.

"It would," he agreed. "The most important feature of the bill is the requirement that 50 per cent of our immigration from each country must be carried on American ships. Under the 3 per cent law we expect about 250,000 immigrants. At $50 a head this will amount to a splendid sum. It will be a real profit to owners of American vessels and at no expense to our taxpayers. It is a most profitable business. I think the average immigrant fare at present is about $85. At the hearings on the merchant marine bill shipping men asserted that practically one-half of this amount was profit.

"Unfortunately we have very few ships for this purpose. We have about 50, according to Chairman Lasker, of the Shipping Board, whereas Great Britain has more than 200."

"Will you mention some of the causes of immigration, Congressman?"

"Certainly," he replied. "I should say more persons emigrate on account of religious or political persecution than from any other cause.

"But one should not overlook the fact that very many immigrants are influenced by the superior advantages America offers.

"The standard of living abroad is very much below that of America. So, often immigrants depart from their native lands to improve not only their own condition but the condition of their children as well."

LOOK TO HEALTH.

In concluding, the Congressman advised all foreign-born who desire to fetch relatives and friends to America to see that their health is good before they start. The trip to America from their native land is usually a long one. Unless the parents and children are strong before they leave they are liable to become sick on the way. Sickness will cause weakness. Therefore, with lowered vitality, death may result.

Mr. THOMAS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Kentucky asks unanimous consent to extend his remarks in the RECORD.

Mr. JOHNSON of Washington. On the bill just passed?

Mr. THOMAS. Yes.

Mr. JOHNSON of Washington. Without reference to the five-day limit?

There was no objection.

RESIGNATION FROM COMMITTEES.

The SPEAKER laid before the House the following communication:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE TERRITORIES,
Washington, D. C., August 23, 1922.

Hon. FREDERICK H. GILLETT,
Speaker of the House of Representatives, Washington, D. C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Committee on Expenditures in the Navy Department, of the Committee on Insular Affairs, and of the Committee on Territories.

Respectfully yours, P. H. DREWRY.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. BYRNS of Tennessee, indefinitely, on account of important business.

To Mr. STRONG of Pennsylvania, indefinitely, on account of sickness.

To Mr. PORTER, for 30 days, to attend the Brazilian centennial as a member of the commission appointed to represent the United States.

To Mr. LANGLEY, for an indefinite period, on account of personal business.

EXTENSION OF REMARKS.

Mr. MacGREGOR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of Balfour and the foreign debt.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD on the subject of Balfour and the foreign debt. Is there objection? [After a pause.] The Chair hears none.

BALFOUR AND THE FOREIGN DEBT.

Mr. MacGREGOR. Mr. Speaker, the recent note of Lord Balfour, Acting Secretary of Foreign Affairs of the British Government, addressed to the French Government, is a fine example of British diplomacy. It is addressed to the French, but it can easily be conceived that it was meant for the United States. The substance of the note is that the United States is the deep-dyed villain who is preventing the rehabilitation of the world, because it insists upon the payment of the money lent to England. England owes to the United States practically $4,000,000,000. England lent this to the other Allies, together with other funds amounting in the aggregate to about $17,000,000,000. The United States loaned to the Allies, in addition, about $6,000,000,000, making a total of $10,000,000,000, the proceeds of Liberty bonds subscribed for by the American people, that were loaned to the European Governments for war purposes.

The Balfour note attempts to place England before the other European powers as a benefactor. She is perfectly willing to relinquish her claims, but hard-fisted America is foreclosing the mortgage upon her, and therefore she must demand the money that she lent. She is perfectly willing to be generous if America pays for her generosity. The note in effect says that the United States is lacking in generosity; that the war was fought for the benefit of the United States as well as Europe, and that she should not make any claims for the money that she loaned.

England always has her eye upon the main chance. For centuries she has been adding to her territories and her opportunities for trade development. Immense gains have come to her out of the World War. The Versailles treaty gave to her territorial possessions almost equal to continental United States, and added at least 35,000,000 inhabitants to her Empire. The value of the spoils of the war to her is much greater than any sum that she owes to the United States. She has become the greatest Empire in the history of the world. Greece, Rome, and Egypt were pygmies beside her. The melodramatics of Balfour would be humorous if one could escape the hypocrisy of the situation. His tears shed over the greediness of the United States in contrast with the

generous spirit of Britain do not harmonize with the scene. The stage effect is poor.

America went into the war to maintain her honor, to uphold the dignity of her flag, and to curb the dominance of imperialism. She poured out her treasure and her blood without thought of gain, either of money or territory. After the war her charity toward the suffering peoples of Europe was unstinted. Europe would have starved without her aid. America gave freely and without price.

Nothing strikes deeper than ingratitude. The attempt to portray America now before the world as cold, hard, ungenerous, grasping is steeped in such ingratitude that generous America is incapable of understanding it.

It would be easy for Great Britain to discharge its debt to the United States without the expenditure of a penny. She has an overplus of land for the world's good. It would be a good bargain for both countries if Great Britain in consideration of the cancellation of the debt would cede to the United States the portion of Canada embracing the whole of the Great Lakes and the connecting waters. What a great blessing it would be to that portion of Canada to be a part of our great country. It would make possible the development of both shores of the Great Lakes; it would make both sides of the Niagara River the great industrial center of the world by freeing the development of power at Niagara Falls from boundary questions. The people of that portion of Canada would be immensely enriched and the United States would round out its territory at a point where it would be of benefit to the world and to humanity to be under one jurisdiction.

Balfour must offer something more than sneers to our people before they will be willing to forego a just debt.

EXTENSION OF REMARKS.

Mr. SANDERS of Indiana. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the requested legislation for the relief of the placer claimants on the Red River.

The SPEAKER. Is there objection. [After a pause.] The Chair hears none.

The extension of remarks referred to are here printed in full as follows:

Mr. SANDERS of Indiana. Mr. Speaker, I introduced a bill for the relief of certain persons interested in oil lands lying south of the medial line of the main channel of Red River, in Oklahoma.

The people in my district, more than 700 in number, who are interested in this relief are stockholders in the Burke Divide Oil Co., Consolidated. This oil company is not subsidiary to any other corporation, but is a small independent company with about 1,114 stockholders, approximately 700 of whom live in Vigo County, Ind. They come from all walks of life—from the ranks of clerks, dentists, school-teachers, physicians, surgeons, lawyers, bankers, farmers, railroad employees, merchants, and laborers. Of the seven directors of the company, two are retired farmers, one is an auditor employed by a railroad company, one is a member of a firm engaged in the transfer and taxicab business, one is a lumber merchant, one is a lawyer engaged in general practice, and one is the proprietor of a restaurant. The remaining stockholders live in several States, although most of them reside in St. Louis, Mo. A great many of those living in St. Louis are railroad employees and laboring men and women. The Burke Divide Co. has no agreement, secret or otherwise, to dispose of any land that it may obtain a lease for. In the event it secures a lease from the Government it intends to operate the property for the benefit of its stockholders.

These oil lands were located by the original locators, through whom my people claim, on land lying south of the medial line of the main channel of Red River. The State of Texas has made some specious claim to the south half of the bed of Red River, but the Supreme Court of the United States long ago in a decision held that the Texas boundary line was at the south bank of Red River. Oklahoma had made some claim to the territory, but it was equally clear that Oklahoma had no proprietary interest in the south half of the bed of Red River.

The original locators, having obtained the advice of eminent counsel, located the placer mining claims in this territory and sold, after discovering oil, to the Burke Divide Oil Co., the stockholders of which have paid out some six or seven hundred thousand dollars in the belief that the placer claims were properly located and that the Burke Divide Oil Co. had title to the land.

Just at the time oil was discovered, persons claiming under a pretended permit or lease from the State of Texas, and who knew that the territory in question was not within the limits of the State of Texas, drove away the representatives of the Burke Divide Oil Co., who were in peaceful possession of the territory. They used the Texas Rangers, and not only took complete possession of the oil wells and the territory, but also defied an injunction obtained in a Federal court and maltreated the marshal sent to serve the process.

The case later reached the Supreme Court of the United States, where it was held that although the land in question did belong to the United States, as contended by the Burke Divide Oil Co., yet the lands were not subject to placer locations, and since the Government had title to the land the Burke Divide Co. had none.

The purpose of this measure is to grant relief by placing the parties in the same situation as they would have been if the land had actually been subject to placer locations.

A detailed statement of the occurrences follows:

As soon as the Burke Divide Co. had discovered oil a man named Sam Sparks, a citizen of Texas, set up a claim to the land, claiming under an alleged lease or permit from the State of Texas. Within a few days thereafter, and within a few days after the Burke Divide Co. discovered the oil, a large force of Texas Rangers, by order and direction of the Governor of the State of Texas, came upon the property armed with rifles and revolvers, and by force of arms drove from the premises all the employees of the Burke Divide Co. and turned over possession of the property to the said Sam Sparks and his assignees.

In February, 1920, the Burke Divide Co. caused suits to be commenced in the District Court of the United States for the Western District of Oklahoma to regain possession of the property and to enjoin the Texas persons from interfering with the Burke Divide Co.'s possession of the land. Three such suits were commenced, one for each of the three claims. One of the cases, that of the Judsonia placer claim, was heard and tried. Attorneys for the defendants appeared and asked the court for permission to participate in the trial, to introduce evidence, and to argue the case without making any formal appearance for their clients, claiming that the court was without jurisdiction of the persons of the defendants. The district court decided in favor of the plaintiffs and issued an injunctional order mandatory and prohibitive directing the return of all drilling machinery and other property and the surrender of possession of the land, and prohibiting further interference by the Texas defendants. This order was placed in the hands of the United States marshal, who with his deputies attempted to serve the same. The Texas Rangers, armed with rifles, prevented the United States marshal from entering upon the land and prevented him from executing the court's decree, while the Governor of the State of Texas issued and published at the same time a proclamation directing that a sufficient number of Texas Rangers be assembled by the adjutant general of Texas to prevent the said United States marshal from enforcing the order of the United States District Court for the Western District of Oklahoma.

The controversy eventually found its way into the Supreme Court of the United States. A suit in equity was brought by the State of Oklahoma against the State of Texas to prevent the Texans from in any way interfering and to definitely fix the boundary between the two States. The Burke Divide Co. and a large number of other placer claimants in like situation were permitted to intervene in the case in the Supreme Court of the United States, after the latter court had appointed a receiver for the territory then in dispute. On April 11, 1922, the Supreme Court of the United States reaffirmed the former decision made by that court in 1896, in which it was held that the north boundary of the State of Texas was along the south bank of Red River, and held that the case decided in 1896 was res adjudicata; and on May 2, 1922, the Supreme Court gave another decision to the effect that the land between the south bank of Red River and the medial line of the main channel of the same river belongs to the United States, but that it had never been subject to location and appropriation under the mining laws of the United States, nor indeed any of the land laws of the United States. This last decision of the Supreme Court makes remedial legislation necessary in order that justice may be done.

REMEDIAL LEGISLATION.

There are numerous precedents for such remedial legislation.

In the case of Conlin *v.* Kelly, decided by the Secretary of the Interior, January 2, 1891 (12 L. D. 1), it was held that stone that is useful only for general building purposes does not render land containing same subject to appropriation under the mining laws, nor except it from preemption entry. Prior to that decision a very large number of placer claims had been located in the Western States on land chiefly valuable for building stone. On many of these claims large sums of money had been spent making quarries. To protect bona fide placer

claimants holding such quarries, Congress passed a bill—Senate bill 1273, in the Fifty-second Congress—granting relief to persons who had located placer claims for the purpose of making quarries of building stone. The chairman of the Senate Committee on Public Lands, in reporting the bill last mentioned, said, referring to the above case of Conlin against Kelly:

This decision has brought dismay and threatened ruin and disaster to many citizens who in good faith, relying on the settled and long-continued procedure of the General Land Office, had invested large sums of money in the development of stone quarries upon the public lands, expecting to obtain patents under the mining laws. It changes what had become a recognized rule of property, and the committee think this is a matter which justly demands the action of Congress to fix the status of such lands without the possibility of doubt. * * * No one can be injured by its passage, while great relief will be given to bona fide investors and claimants.

The bill above referred to was subsequently passed and became the act of August 4, 1892. This act reads in part as follows:

Be it enacted, etc., That any person authorized to enter lands under the mining laws of the United States may enter lands that are chiefly valuable for building stone under the provisions of the law in relation to placer-mineral claims; * * *.

On August 27, 1896, the Secretary of the Interior, in the case of the Union Oil Co. (23 L. D. 222), held that lands containing petroleum, and no other mineral, were not subject to entry and patent under the placer mining laws. Prior to this last decision a large number of placer claims had been located in California, and perhaps in other States, on lands containing petroleum but no other kind of mineral. To meet the decision of the Secretary in the Union Oil Co. case and to protect the equitable rights of persons who had located placer claims on oil lands, and who had spent large sums of money thereon, Congress passed the act of February 11, 1897, which act validated all such placer claims theretofore made on land that contained no mineral other than petroleum.

In reporting the bill of January 27, 1897, the House Committee on Public Lands said in its report, among other things, referring to the decision in the Union Oil Co. case, as follows:

The effect of the above-cited decision of August 27, 1896, is to preclude the possibility of obtaining title to lands containing oils, and as there are large areas of such lands in various of the public-land States, and as upon these lands in many instances large expenditures have already been made, and as it is manifestly for the public good that there should be some provision whereby these lands may be held and patented, the committee believe this bill should pass.

The honorable Commissioner of the General Land Office, to whom the bill was referred, states that there is urgent necessity for some legislation on this subject, and in this view the Secretary of the Interior concurs. The bill simply provides by legislation for procedure in the entry and patenting of these lands along the lines that have been pursued in the past under the decisions of the General Land Office, so that there is no departure whatever from the procedure in the past for the development and acquirement of such properties.

In order to encourage and protect the holders of oil placer claims that were located on lands chiefly valuable for petroleum, Congress passed, on February 12, 1903, an act reading as follows:

Be it enacted, etc., That where oil lands are located under the provisions of Title 32, chapter 6, Revised Statutes of the United States, as placer mining claims, the annual assessment labor upon such claims may be done upon any one of a group of claims lying contiguous and owned by the same person or corporation, not exceeding five claims in all: *Provided*, That said labor will tend to the development or to determine the oil-bearing character of such contiguous claims.

In commenting upon the act of February 12, 1903, above quoted, the Supreme Court of the United States, in the case of the Union Oil Co. *v.* Smith (249 U. S. 337), uses the following language:

Hence the declaration in the act of 1903 that where oil lands are located as placer mining claims "the annual assessment labor upon such claims lying contiguous and owned by the same person," indicates simply the legislative purpose that the necessary assessment work, if done upon one of the group, should have the same effect as if properly distributed among the several claims; that is to say, the effect of preserving the exclusive right of possession and enjoyment conferred by section 2322 with respect to unpatented claims based upon a previous discovery of oil.

The act of June 25, 1910, commonly known as the Pickett Act, shows the continuing policy of Congress to protect persons who had located oil-placer claims. Section 2 of the Pickett Act contains the following language:

That the rights of any person who, at the date of any order of withdrawal heretofore or hereafter made, is a bona fide occupant or claimant of oil or gas bearing lands, and who, at such date, is in diligent prosecution of work leading to discovery of oil or gas, shall not be affected or impaired by such order, so long as such occupant or claimant shall continue in diligent prosecution of said work: *And provided further*, That this act shall not be construed as a recognition, abridgment, or enlargement of any asserted rights or claims initiated upon any oil or gas bearing lands after any withdrawal of such lands made prior to the passage of this act.

The same policy is pursued in the act of March 2, 1911, which reads, in part, as follows:

SECTION 1. That in no case shall patent be denied to or for any lands heretofore located or claimed under the mining laws of the United States containing petroleum, mineral oil, or gas solely because of any transfer or assignment thereof or of any interest or interests therein by the original locator or locators, or any of them, to any qualified persons or person or corporation prior to discovery of oil or gas therein. * * *

The policy of Congress in respect to the development of the mineral resources of the United States is further shown in the act for the relief of the holders of placer claims on phosphate lands. In the act of January 11, 1915, are the following provisions:

Be it enacted, etc., That where public lands containing deposits of phosphate rock have heretofore been located in good faith under the placer-mining laws of the United States and upon which assessment work has been annually performed, such locations shall be valid and may be perfected under the provisions of said placer-mining laws, and patents, whether heretofore or hereafter issued thereon, shall give title to and possession of such deposits: *Provided*, That this act shall not apply to any locations made subsequent to the withdrawal of such lands from location, nor shall it apply to lands included in an adverse or conflicting lode location unless such adverse or conflicting location is abandoned.

It will be seen by reference to the acts of Congress herein referred to that it has long been the policy of the Government to grant relief to persons who in good faith but under a mistaken belief as to the meaning of the law have entered upon any part of the public domain to develop the mining industry of the United States. Indeed, it has been many times declared by the Supreme Court of the United States as well as other courts of high standing that it has been the policy of the Government since the discovery of gold in California in 1849 to encourage the citizens to develop the mining resources of the country. The mining law itself has many times been declared to be an invitation to citizens to develop the undeveloped public domain and thus add to the wealth of the country.

EARLY ACTION BY CONGRESS IS URGED.

It is well known that the life of an oil field is usually not more than four or five years. Oil is fugitive in character and can be drawn a long distance by means of suction pumps. There are more than 200 wells immediately south of the south bank of Red River. For nearly two and a half years these wells have been pumping day and night, and they are drawing oil from the adjacent ground immediately north of the south bank of Red River. Unless relief is granted to the placer locators and their successors very soon, it can not be granted at all, because it will not be long until very little oil will remain in property. I am reliably informed that suction pumps have been used for many months in the 200 wells in Texas near the boundary line. Many of these wells are within 20 feet of the boundary line and are what are commonly called offset wells. It is earnestly urged, therefore, that this is a case in which there should be no delay in granting relief, because, as before stated, unless relief is granted now, it can not be given.

Mr. Speaker, many of my constituents have invested the savings of a lifetime in the stock of this company. It was controlled by men of the highest character and finest business integrity. Eminent lawyers who gave careful study to the legal phase of the question said there was no question about the validity of the title in the Burke Divide Oil Co. It was the industry and perseverance of these locators which led to the discovery of these oil wells. The United States Government should do justice and equity and grant the relief prayed for in this measure.

THE LEGISLATIVE PROGRAM.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent to address the House on the legislative program.

The SPEAKER. Is there objection. [After a pause.] The Chair hears none.

Mr. MONDELL. Mr. Speaker, I can not say at this time that the House will be called upon to take up any important legislation to-morrow, but I trust that we may have a quorum present, as there are matters of moment that may come up. It is my present expectation to ask unanimous consent that when we adjourn to-morrow we adjourn to meet on Monday following. I desire to say to the Members of the House that we shall undoubtedly have important legislation the early part of next week, and I think it highly important that all Members be here.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 33 minutes p. m.) the House adjourned until Thursday, August 24, 1922, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. WINSLOW: Committee on Interstate and Foreign Commerce. H. R. 12377. A bill to establish a commission to be known as the United States Coal Commission for the purpose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes, with an amendment (Rept. No. 1181). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on the Post Office and Post Roads was discharged from the consideration of the bill (H. R. 12406) for the relief of Emil L. Flaten, and the same was referred to the Committee on Claims.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SPROUL: A bill (H. R. 12409) to promote the public health; to the Committee on Interstate and Foreign Commerce.

By Mr. HOGAN: A bill (H. R. 12410) to authorize the Secretary of War to reinstate warrant officers of the Army Mine Planter Service; to the Committee on Military Affairs.

By Mr. HAYS: A bill (H. R. 12411) to provide for the purchase of a site and for the erection of a public building thereon at Charleston, Mo.; to the Committee on Public Buildings and Grounds.

By Mr. MACGREGOR: A bill (H. R. 12412) to prevent commercialism in the military and naval institutions of the United States; to the Committee on Military Affairs.

By Mr. BRIGGS: A bill (H. R. 12413) providing for a survey of the Trinity River, Tex., with a view to the control of its floods; to the Committee on Flood Control.

By Mr. DYER: A bill (H. R. 12414) to amend the Revised Statutes of the United States relating to branch banks under the national bank act; to the Committee on Banking and Currency.

By Mr. McFADDEN: A bill (H. R. 12415) to amend section 5190 of the Revised Statutes of the United States, relating to branches of national banking associations, and for other purposes; to the Committee on Banking and Currency.

By Mr. GERNERD: A bill (H. R. 12416) declaring the burial ground of the Revolutionary soldiers at Bethlehem, Pa., a national military park upon the acquisition of the site at a cost not exceeding $10,000; to the Committee on Military Affairs.

By Mr. MACGREGOR: Joint resolution (H. J. Res. 373) providing for the suspension of the requirements of annual assessment work for the year 1922 on the mining claims of the Little Nell Mining Co.; to the Committee on Mines and Mining.

By Mr. FROTHINGHAM: Joint resolution (H. J. Res. 374) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. VOLSTEAD: Resolution (H. Res. 411) for the immediate consideration of H. R. 12356, a bill amending section 51, chapter 4, of the Judicial Code; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. APPLEBY: A bill (H. R. 12417) for the relief of the estate of Thomas N. Avery, deceased; to the Committee on Claims.

By Mr. CAMPBELL of Kansas: A bill (H. R. 12418) granting a pension to Louisa H. Rush; to the Committee on Invalid Pensions.

By Mr. CROWTHER: A bill (H. R. 12419) granting a pension to Amanda L. Hill; to the Committee on Invalid Pensions.

By Mr. DEMPSEY: A bill (H. R. 12420) granting an increase of pension to Mary L. Hagan; to the Committee on Pensions.

By Mr. DICKINSON: A bill (H. R. 12421) for the relief of Liberty loan subscribers of the City Bank of Jefferson, Iowa; to the Committee on Claims.

By Mr. ELLIOTT: A bill (H. R. 12422) granting a pension to John C. Harr; to the Committee on Invalid Pensions.

By Mr. GOULD: A bill (H. R. 12423) granting a pension to Esther A. Deyo; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12424) granting a pension to Mary E. Conley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12425) granting a pension to Perry Williams, alias David Williams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12426) granting a pension to Harriet A. Fitzwater; to the Committee on Invalid Pensions.

By Mr. HAYS: A bill (H. R. 12427) granting an increase of pension to Christopher S. Alvord; to the Committee on Pensions.

By Mr. HIMES: A bill (H. R. 12428) granting a pension to Jessie Parsons; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12429) granting a pension to Emma A. Kline; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12430) granting a pension to Theodore Silas Steffy; to the Committee on Invalid Pensions.

By Mr. JAMES: A bill (H. R. 12431) granting a pension to Charles H. Brown; to the Committee on Pensions.

By Mr. KETCHAM: A bill (H. R. 12432) granting a pension to James Howard; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12433) granting a pension to Elizabeth Tice; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12434) granting a pension to Addie Peck; to the Committee on Invalid Pensions.

By Mr. KRAUS: A bill (H. R. 12435) granting a pension to Spica A. Barber; to the Committee on Invalid Pensions.

By Mr. KUNZ: A bill (H. R. 12436) granting a pension to James McDonough; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: A bill (H. R. 12437) granting a pension to George H. Nicholson; to the Committee on Pensions.

Also, a bill (H. R. 12438) granting an increase of pension to Georgianna M. Burroughs; to the Committeee on Invalid Pensions.

By Mr. McPHERSON: A bill (H. R. 12439) granting a pension to Melissa S. Omans; to the Committee on Invalid Pensions.

By Mr. MORGAN: A bill (H. R. 12440) granting an increase of pension to Sarah E. Newlon; to the Committee on Invalid Pensions.

By Mr. PERLMAN: A bill (H. R. 12441) for the relief of Carl Wordelman; to the Committee on Claims.

By Mr. REECE: A bill (H. R. 12442) granting a pension to Isabella L. Williamson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12443) granting an increase of pension to Orville Harvey; to the Committee on Pensions.

By Mr. ROBSION: A bill (H. R. 12444) granting a pension to Howard Hines; to the Committee on Pensions.

By Mr. MANN: Resolution (H. Res. 412) for the relief of the widow of Dr. Henry N. Couden, late Chaplain Emeritus of the House of Representatives; to the Committee on Accounts.

SENATE.

THURSDAY, *August 24, 1922.*

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Our Father, we believe in the reality of things. We believe in our need of Thee. Without Thee we can accomplish nothing that will be lasting for human good. We therefore ask this morning that the consciousness of Thy presence may be very evident, that we may see things in the larger light, and understand what Thou wouldst have us do in every crisis of life in our Nation as well as in our individual affairs. We ask in Jesus' name. Amen.

The reading clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House had passed a bill (H. R. 12377) to establish a commission, to be known as the United States Coal Commission, for the purpose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes, in which it requested the concurrence of the Senate.

Mr. BORAH. I ask that the bill may lie on the table for the present.

The PRESIDENT pro tempore. Without objection it will lie on the table.

SUPPRESSION OF MOB VIOLENCE.

The PRESIDENT pro tempore. The Chair lays before the Senate a resolution in the nature of a memorial adopted by the International Conference of Prince Hall Masons of the United States advocating the passage of the Dyer antilynching bill, which, as a Senator from Iowa, I ask may be printed in the RECORD with the accompanying letter and lie on the table.

There being no objection, the resolution and letter were ordered to lie on the table and to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION FOR ADVANCEMENT OF COLORED PEOPLE,
New York, August 17, 1922.

Hon. CALVIN COOLIDGE,
President United States Senate, Washington, D. C.

MY DEAR MR. COOLIDGE: I am transmitting to you herewith at their request resolutions adopted by the International Conference of Grand Masters, Past Grand Masters, Grand Secretaries, etc., of the Prince Hall Masons of the United States, representing 184,000 United States citizens who are members of that order, indorsing the Dyer antilynching bill now pending before the Senate, and urging its immediate enactment by that body. These resolutions were passed at the conference of this fraternal organization recently held in the city of Washington.

Very sincerely yours,

WALTER F. WHITE,
Assistant Secretary.

We, the members of the International Conference of Grand Masters, Past Grand Masters, Grand Secretaries, etc., Prince Hall Masons of the United States, having the administration of the law by Government at heart and representing the grand jurisdictions of various States of the United States, sincerely believe that the United States Senate now in session should be waited upon by a committee from this body to convey the unanimous sense of this body, that we are in hearty support of the Dyer antilynching bill as passed by the House of Representatives by an overwhelming vote of 230 to 119. We believe the passage and enactment into law of the said Dyer antilynching bill would correct certain abuses and barbarous treatment meted out to the citizens of this Republic.

Therefore, this conference has gone on record that the United States Senate, by virtue of the high respect it has always received from foreign nations, should keep up these glorious traditions and endeavor to correct the lamentable and alarming conditions which now exist. In foreign countries the belief is common the Government is indifferent to punish the evildoers, and we regret that the reports on lynching will tender to lower the respect and esteem which the Nation enjoys, because of the savagery so commonly and ruthlessly inflicted on defenseless citizens.

We further believe that as citizens of the various States of the Nation this stain should be eradicated from the land and the dignity of the laws upheld.

Respectfully yours,

E. H. HOLMES,
Grand Master of Masons, State of Washington,
H. I. MONROE,
Grand Master of Masons, State of Kansas,
A. A. SCHOMBURG,
Grand Secretary, State of New York,
Members Committee on Resolutions.

CALL OF THE ROLL.

Mr. HEFLIN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll and the following Senators answered to their names:

Ashurst	Gooding	Nelson	Smoot
Borah	Hale	New	Stanfield
Brandegee	Harreld	Nicholson	Stanley
Broussard	Heflin	Norbeck	Sterling
Bursum	Hitchcock	Oddie	Sutherland
Calder	Jones, N. Mex.	Phipps	Trammell
Cameron	Jones, Wash.	Pittman	Underwood
Capper	Kellogg	Pomerene	Wadsworth
Culberson	Kendrick	Rawson	Walsh, Mass.
Cummins	Keyes	Reed, Mo.	Walsh, Mont.
Curtis	Lenroot	Reed, Pa.	Warren
Dillingham	McCumber	Robinson	Watson, Ga.
Edge	McKellar	Sheppard	
Ernst	McNary	Shields	
Gerry	Moses	Shortridge	

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Fifty-seven Senators having answered to their names, there is a quorum present. The presentation of petitions and memorials is in order.

THE AMERICAN-VALUATION PLAN.

Mr. ODDIE. Mr. President, I ask unanimous consent to have printed in the RECORD a brief statement containing a synopsis of the names of those who have petitioned Congress for the American-valuation plan.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada?

Mr. WALSH of Massachusetts. I do not care to object, but the document which was sent me, apparently of a similar nature, contains thousands and thousands of names from all over the country. It seems to me it would take too many pages of the RECORD to print the names.

Mr. ODDIE. My request does not include the whole document, but simply a brief description of it; and I wish to submit a few remarks with reference to it.

Mr. WALSH of Massachusetts. I have no objection if it is a communication of reasonable size.

Mr. CUMMINS. What is the request of the Senator from Nevada?

The PRESIDING OFFICER. The request of the Senator from Nevada is, as the Chair understood it, to have printed in the RECORD a synopsis of the names of those petitioning with reference to the American-valuation plan.

Mr. CUMMINS. It is highly important this morning that we adhere to the regular order. I ask for the regular order.

The PRESIDING OFFICER. The regular order is the presentation of petitions and memorials. The Senator from Nevada asks unanimous consent to present the document in the nature of a petition and have it printed.

Mr. ROBINSON. Reserving the right to object, I inquire of the Senator from Nevada the purpose of encumbering the RECORD with the names of those who favor the American-valuation plan. I further inquire of the Senator from Nevada if this is deemed pertinent to the action of the Senate touching the tariff bill, why it was not presented while the tariff bill was under consideration?

Mr. ODDIE. This does not contain all the names by any means. It contains a synopsis of the organizations, and I want to introduce it with a few remarks by way of suggesting a compromise on the American-valuation matter, which will take only a few minutes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada, coupled with which is the request to submit a few remarks to the Senate for three or four minutes.

Mr. CUMMINS. I think it is highly necessary that we should proceed with the regular order this morning. There will be other opportunity, and therefore I object.

Mr. ODDIE. This is proceeding under the regular order, I understand.

The PRESIDING OFFICER. Under the regular order it can not be done without unanimous consent.

Mr. ODDIE. Very well.

PETITION.

Mr. ROBINSON presented a telegram in the nature of a petition from the Charles L. Jenkins Post, of Batesville, Ark., praying for the prompt passage of the so-called soldiers' adjusted compensation bill, which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. MCNARY, from the Committee on Agriculture and Forestry, to which was referred the resolution (S. Res. 341) providing for an investigation of the subject of crop insurance, reported it with an amendment and moved that it be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, which was agreed to.

Mr. ROBINSON, from the Committee on Claims, to which was referred the bill (S. 1988) for the relief of Faxon, Horton & Gallagher; Long Bros. Grocery Co.; A. Rieger; Rothenberg & Schloss; Ryley, Wilson & Co.; and Van Noy News Co., reported it without amendment and submitted a report (No. 876).

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. EDGE (for Mr. FRELINGHUYSEN):

A bill (S. 3939) granting a pension to Charles Schlipf; to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 3941) to amend the Revised Statutes of the United States relating to branch banks under the national bank act; to the Committee on Banking and Currency.

By Mr. HARRELD:

A bill (S. 3942) for the relief of John H. McAtee; to the Committee on Military Affairs.

By Mr. PITTMAN:

A bill (S. 3943) to amend section 5 of the act approved March 2, 1919, entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes"; to the Committee on Mines and Mining.

By Mr. WALSH of Montana:

A bill (S. 3944) authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle with the Sioux Indians in which the commands of Major Reno and Major Benteen were engaged; to the Committee on Public Lands and Surveys.

By Mr. CURTIS:

A bill (S. 3945) granting a pension to Charles E. Mann (with accompanying papers);

A bill (S. 3946) granting a pension to Ellen W. Inman (with accompanying papers);

A bill (S. 3947) granting a pension to Malinda Johnson (with accompanying papers);

A bill (S. 3948) granting a pension to Tillie M. Smith (with accompanying papers); and

A bill (S. 3949) granting a pension to Kissire Hotchkiss (with accompanying papers); to the Committee on Pensions.

By Mr. MOSES:

A bill (S. 3950) granting a pension to Sylvanus Chapman (with accompanying papers); to the Committee on Pensions.

By Mr. CALDER:

A bill (S. 3951) to authorize the Secretary of War to reinstate warrant officers of the Army mine planter service; to the Committee on Military Affairs.

REGULATION OF COAL PRICES.

Mr. CUMMINS. I introduce a bill for consideration, which relates to the emergency which now exists in the coal situation. The bill is in nowise connected with or in conflict with the bill which has heretofore been reported by the Senator from Idaho [Mr. BORAH] from the Committee on Education and Labor. It is merely intended to prevent the sale or distribution of coal at unreasonably high prices during the present emergency. I ask that the bill may be referred to the Committee on Interstate Commerce.

The bill (S. 3940) to declare an emergency respecting the production, distribution, and price of coal and other fuel, to create an additional agency of the United States with respect thereto, to enlarge the powers of the Interstate Commerce Commission in establishing priorities and embargoes in the transportation of coal and other fuel in interstate commerce in order to prevent the exaction of unreasonably high prices for these commodities, and for other purposes, was read twice by its title and referred to the Committee on Interstate Commerce.

PENSIONS AND INCREASE OF PENSIONS—CONFERENCE REPORT.

Mr. BURSUM. Mr. President, I ask unanimous consent of the Senate on a matter which will take but a moment and is of great importance. It is the conference report on House bill 4, the pension bill, with reference to which there is no controversy.

The PRESIDING OFFICER. Does the Senator desire to present the conference report?

Mr. BURSUM. I desire to present it and have it acted upon.

The PRESIDING OFFICER. The Senator has a right to present it at the present time.

Mr. CUMMINS. I ask the Senator from New Mexico whether it will lead to any discussion?

Mr. BURSUM. I think there will be no discussion. There is no controversy over it. There is no change except in one amendment, known as the Smoot amendment, which was agreed to by the author of the amendment and which limits the scope of the amendment. That is the only change. The veterans are now in session at Los Angeles, and I should like to see the conference report agreed to at this time.

Mr. CUMMINS. Reserving the right to object, I ask for a statement of what the report is.

Mr. ROBINSON. I inquire of the Senator from New Mexico what is the subject matter of the bill? He has not yet stated it.

Mr. BURSUM. It is the bill (H. R. 4) granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign, to widows, former widows, and dependent parents of such soldiers and sailors, and to certain Army nurses. There was one amendment added in the Senate with reference to the pensioning of Indian war veterans. That particular amendment was curtailed in the House and limited and the change agreed to by the author of the amendment. I can see no reason for any controversy. Otherwise the bill is as it was passed by the Senate.

Mr. ROBINSON. What was the limitation placed by the amendment of the other House?

Mr. BURSUM. The limitation of the amendment was with reference to the offering of testimony. Under the amendment as adopted by the Senate provision was made for specific methods of presenting evidence which was made prima facie evidence, such as the records of the States, congressional memorials, and so forth. Those provisions were eliminated, and in lieu thereof it was provided that in case such records had been destroyed or burned the applicant should give testimony to the satisfaction of the Commissioner of Pensions.

The PRESIDING OFFICER. If the Senator will suspend for a moment, the Chair desires to state that he is advised by the Secretary that the papers in connection with this matter are not in the Senate, and the Chair would suggest to the Senator that he look into it.

Mr. BURSUM. Very well.

Mr. BURSUM subsequently presented the report, and it was considered and agreed to, as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4) granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, and 6, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "or died in service due to disability or disease incurred in the service"; and the Senate agreed to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: Strike out all of the matter inserted by said amendment after the word "archives," in line 16, down to and including the word "widows," in line 22, and insert in lieu thereof the following: ";fourth, where there is not muster roll or pay roll on file in the several State or territorial archives showing service of the beneficiary or same has been destroyed by fire or otherwise lost, and no record of service has been made in the War Department or Treasury Department, the applicant may make proof of service by furnishing evidence satisfactory to the Commissioner of Pensions"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the title of the bill, and agree to the same.

H. O. BURSUM,
REED SMOOT,
T. J. WALSH,
Managers on the part of the Senate.

HAROLD KNUTSON,
J. M. ROBSION,
WILLIAM D. UPSHAW,
Managers on the part of the House.

SENATOR FROM MICHIGAN.

Mr. EDGE. Mr. President, I ask unanimous consent to have printed in the RECORD a letter written by the Secretary of State, Mr. Hughes, to Rev. Dr. Hugh B. MacCauley, a well-known divine of Paterson, N. J., in answer to a request of Doctor MacCauley for a statement by Secretary Hughes as to what was the basis of his defense of the Newberry case before the Supreme Court. The letter of Secretary Hughes, who was acting as counsel for Mr. NEWBERRY at the time, is such a clear exposition of that side of it that I am sure it will be interesting.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

PATERSON, N. J., *August 12, 1922.*

Hon. CHARLES E. HUGHES,
Department of State, Washington, D. C.

DEAR SIR: Allusion to the Newberry case made from time to time by Democratic speakers leads me to ask you if you will not state the facts and the law upon which you made your argument in the Supreme Court of the United States and upon which that court decided the case.

I remember that Mr. Justice McReynolds, a Democrat, handed down the decision of the majority of the court, acquitting Mr. NEWBERRY, and that Chief Justice White, a great Democrat, a great Chief Justice, and a great man, concurred in the decision, but I do not remember having seen published, even in the summary, the substance of their opinion.

I shall be grateful, as I am sure thousands of other citizens will be, if, as I have suggested, you will state the facts and the law and quote for my information the opinions of the justices as well as your own personal opinion.

Very truly yours,

(Signed) HUGH B. MACCAULEY.

1529 EIGHTEENTH STREET,
Washington, D. C., August 16, 1922.

Rev. HUGH B. MACCAULEY, D. D.,
Paterson, N. J.

DEAR SIR: I have received your letter asking me to comment on the facts and the law in the case of Senator NEWBERRY which was decided by the Supreme Court of the United States, and I take pleasure in complying with your request. I regret to say that there seems to be a general misconception of the nature of the litigation and its result, and Senator NEWBERRY has suffered in consequence a most serious injustice.

Senator NEWBERRY, with others, was indicted in the Federal court of Michigan for violating the Federal statute limiting expenditures by a candidate in procuring his nomination and election as a Senator or Representative in Congress. The Federal statute made it unlawful for the candidate to expend an amount in excess of the limit fixed by the State statute, and the limit in Michigan was $3,750 in the case of the nomination and election of a United States Senator.

The conviction of Senator NEWBERRY in the lower court was reversed unanimously by the Supreme Court of the United States.

It should be borne in mind that Senator NEWBERRY's conviction in the lower court was not based on any charge of fraud or corruption or of the use of money for any illegal purposes or of any act involving moral turpitude.

It was based solely on the charge that there was an expenditure in his campaign for nomination and election of over $3,750, the statutory limit, regardless of how the money was used or how innocuous and proper the purposes of the expenditure might have been. To make the point clear, if all the money had been used in hiring halls for the delivery of speeches or in distributing circulars, the conviction under the construction of the trial court would have been just as inevitable, as long as this amount exceeded $3,750. That this was the nature of the case is demonstrated by the explicit instructions which the trial judge gave to the jury.

The point was clearly brought out by Mr. Justice McReynolds in giving the opinion of the Supreme Court of the United States. He said:

"Under the construction of the act urged by the Government and adopted by the court below it is not necessary that the inhibited sum be paid, promised, or expended by the candidate himself or be devoted to any secret or immoral purpose. For example, its open and avowed contribution and use by supporters upon suggestion by him or with his approval and cooperation in order to promote public discussion and debate touching vital questions or to pay necessary expenses of speakers, etc., is enough. And upon such interpretation the conviction below was asked and obtained."

There were six counts or charges in the indictment against Senator NEWBERRY and the other defendants. One of these counts, the fifth, charged a conspiracy to commit a great many offenses, consisting of giving money and things of value to persons to vote for Senator NEWBERRY and of giving valuable considerations to persons to withhold their vote from Henry Ford. It will be remembered that the trial was a very long one and that voluminous evidence was introduced. But despite every effort of the prosecution to show corruption the trial court disposed of this charge and refused to permit the jury to consider it, as there was no evidence whatever to sustain it. There was thus no charge of bribery laid before the jury and the conviction did not proceed upon any such ground.

Upon this point Chief Justice White, in his opinion in the Supreme Court, said:

"At the trial, before the submission of the case to the jury, the court put the fifth count entirely out of the case by instructing the jury to disregard it, as there was no evidence whatever to sustain it. The bribery charge, therefore, disappeared."

There was another count or charge in the indictment, the sixth count, which charged a conspiracy to defraud by use of the mails. But upon that count the jury rendered a verdict of not guilty.

The four remaining counts of the indictment involved substantially the same charge, and these were either eliminated or consolidated with the first count. Thus the question came down to the one point, as I have said, the expenditure, or conspiracy to expend, an amount of money in excess of the statutory limit of $3,750. That was all that was left of the case.

Senator NEWBERRY could not have been convicted, even upon this charge, without what I have always regarded, and so stated in my argument to the Supreme Court, as an extraordinary misapplication of the statute upon which the charge was based.

Senator NEWBERRY, and the other defendants, having been convicted in the manner stated, an appeal was taken directly to the Supreme Court.

The opinion of that court, written by Justice McReynolds, on behalf of the majority of the justices, held that the Federal statute was unconstitutional, as Congress had not been authorized to limit the expenses of a primary or nomination campaign. One of the majority, Justice McKenna, concurred in this opinion on the ground that the act of Congress was enacted prior to the seventeenth amendment, and he reserved the question of the power of Congress under that amendment. With the holding of the statute unconstitutional in its relation to primary campaigns the basis of the prosecution of Senator NEWBERRY, with all its sensational incidents, fell.

There were four of the Justices of the Supreme Court who did not concur in the view that the statute was unconstitutional, but they joined in reversing the judgment of conviction, because the statute had been seriously misconstrued by the trial court. Chief Justice White wrote a separate opinion in which he expressed this view. He said:

"Although I am unable to concur in the conclusion as to the want of power of Congress and in the judgment of reversal as rendered, I am nevertheless of opinion that there should be a judgment of reversal without prejudice to a new trial, because of the grave misapprehension and grievous misapplication of the statute upon which the conviction and sentence below were based."

Justice Pitney also wrote an opinion, in which Justice Brandeis and Justice Clarke concurred, in which, while expressing their view that Congress had power to pass the statute in question, agreed that the statute had been seriously misconstrued and that the conviction of Senator NEWBERRY was erroneous. Accordingly, these justices agreed in the reversal of the judgment.

The point of the "grievous misapplication" of the statute by the trial judge and the grave injury that was thus done to Senator NEWBERRY sufficiently appears from the opinions of these justices. I may say that a more extraordinary misconstruction of a statute has never come under my observation and under this construction hardly any candidate could have escaped violating it.

Chief Justice White in his opinion says that the controlling instruction given by the court to the jury was "in clear conflict with the text of the statute and was necessarily of a seriously prejudicial nature, since in substance it announced the doctrine that, under the statute, although a candidate for the office of Senator might not have contributed a cent to the campaign or caused others to do so, he nevertheless was guilty if he became a candidate or continued as such after acquiring knowledge that more than $3,750 had been contributed and was being expended in the campaign."

The Chief Justice pointed out that there had been a failure to distinguish between contributions and expenditures made or caused to be made by the candidate and the voluntary contributions and expenditures of others. The Chief Justice illustrated the point by showing the absurdity of a construction which would expose the most high-minded candidate to conviction of a criminal offense under the statute if he continued his candidacy with a knowledge that his supporters had put up the necessary moneys to enable him to conduct a legitimate campaign. Thus, Chief Justice White said:

"Under the instruction given in every case where to the knowledge of the candidate a sum in excess of the amount limited by the statute was contributed by citizens to the campaign, the candidate, if he failed to withdraw, would be subject to criminal prosecution and punishment. So, also, contributions by citizens to the expenses of the campaign, if only knowledge could be brought home to them that the aggregate of such contributions would exceed the limit of the statute, would bring them, as illustrated by this case, within the conspiracy statute and accordingly subject to prosecution. Under this view, the greater the public service and the higher the character of the candidate, giving rise to a correspondingly complete and self-sacrificing support by the electorate to his candidacy, the more inevitably would criminality and infamous punishment result both to the candidate and to the citizen who contributed."

Justice Pitney, writing for himself and for Justices Brandeis and Clarke, thus described the effect of the trial court's instruction to the jury:

"The effect of the instruction that was given may well have been to convey to the jury the view that Mr. NEWBERRY's conduct in becoming and remaining a candidate with knowledge that spontaneous contributions and expenditures of money by his supporters would exceed the statutory limit, and his active participation in the campaign were necessarily equivalent to an active participation by him in causing the expenditure and use of an excessive sum of money, and that a combination among defendants having for its object Mr. NEWBERRY's participation in a campaign where money in excess of the prescribed limit was to be expended, even without his participation in the contribution or expenditure of such money, amounted to a conspiracy on their part to commit an offense against the act."

The conviction of Senator NEWBERRY was obtained under a statute held by the majority of the Supreme Court to be invalid; rested upon a ground which did not involve any finding by the jury of moral turpitude; and was effected only by a most serious misconstruction of the statute which exposed him to conviction regardless of any moral offense upon his part and no matter how high-minded he might have been in his conduct in the campaign.

I note that in your letter you refer to Chief Justice White and Justice McReynolds as Democrats. I deprecate any such allusion, as partisan considerations do not enter into the judicial opinions of the Supreme Court.

The plain fact is that Senator NEWBERRY was wrongly and most unjustly convicted and his conviction was set aside. Despite the long period of preparation, the rigid investigation, the careful choosing of their ground, the long-drawn-out trial, the attempt in every possible way to besmirch, and the zeal, ability, and even bitterness of his pursuers, their endeavor to establish a violation of law on the part of Senator NEWBERRY completely failed, and accordingly Senator NEWBERRY stood as a Senator duly elected by the people of the State of Michigan and entitled to his seat in the Senate of the United States.

I remain, very sincerely yours,

CHARLES E. HUGHES.

Mr. ROBINSON subsequently said: I ask unanimous consent to insert in the RECORD, following the letter of Secretary Hughes, which was ordered printed at the instance of the Senator from New Jersey, a statement by Hon. Cordell Hull relative to the Newberry case. I ask that it be printed in the same type in which Secretary Hughes's letter is printed.

The PRESIDENT pro tempore. Is there objection? The Chair hears none.

The statement is as follows:

CHAIRMAN HULL'S STATEMENT IN REPLY TO SECRETARY HUGHES'S LETTER ON NEWBERRY CASE.

WASHINGTON, August 21.—Replying to Secretary Hughes's letter defending seating of Senator TRUMAN H. NEWBERRY, of Michigan, Cordell Hull, chairman of the Democratic National Committee, construes the letter as a plan on the part of Republican leaders to make Newberryism the paramount issue of the campaign as the only means "of diverting public attention from many other issues still more damaging," and declares that they have made a mistake in selecting a civil lawyer like Mr. Hughes when the administration needs the ablest criminal lawyers to defend it.

Chairman Hull's statement in full is as follows:

"The national Republican leaders have decided to make Newberryism the paramount issue in the present national congressional campaign, and have put forward Secretary of State Hughes as the attorney to state the case and offer the chief defense. In selecting Secretary Hughes for this delicate and dangerous task Republican leaders have made a mistake. Secretary Hughes is only a civil lawyer, whereas this national administration needs the ablest criminal lawyers to be found to defend it this year.

"In a desperate effort to check the rising tide of popular indignation, due to the fact that the 18 months' record of this administration and its Congress contains more elements of complete failure than any or all their predecessors, Republican leaders have felt obliged to single out this one issue and make it paramount as the only means of diverting public attention from many other issues deemed still more damaging. It was evidently decided that Secretary Hughes, one of the few Cabinet officers and Republican leaders whose respectability has not been seriously impaired, might dramatize Newberryism in such an attractive way as to draw the attention of the farmer, the business man, and the laborer away from the tremendously destructive effects of the Republican industrial panic of 1921–22, and from the confused, lop-sided, uncertain, and demoralized state of business, industrial, economic, and social conditions of the Nation, which the Republican administration and the Republican Congress have not shown the faintest capacity to deal with.

"With public attention thus focused on Newberryism, the injustices, iniquities, monopolies, and robberies about to be inflicted upon the American people by the most unscientific, unsound, monstrous, and profiteering tariff bill ever enacted might be overlooked or minimized until after the election. The long list of Republican failures and of broken pledges and the notorious breakdown of Republican leadership everywhere might excite less hostile feeling if the voters' attention could be kept riveted upon Mr. Hughes's special pleading in behalf of Newberryism. And in addition, such scandals as the midnight raid on the Bureau of Printing and Engraving, the Teapot Dome oil reserve, the Daugherty case, and Nat Goldsteinism might be viewed less critically with Secretary Hughes in the center of the stage singing the praise of NEWBERRY and chanting the virtues of Newberryism.

"Democrats and good citizens generally, while disappointed that the present Republican leadership is unable to pitch the campaign on a higher level of morals and of decency, feel constrained to accept the issue as tendered through Secretary Hughes. Against this Newberry pronouncement of Secretary Hughes, made unofficially and in a great party emergency which gives it the tinge of narrow partisanship, Democrats will match the solemn official verdict of a Republican judge and Republican jury in Michigan to the effect that in morals and under the law as it then existed and also the facts, NEWBERRY and his associates were guilty of violating the corrupt practices act, and in the language of Senator BORAH, 'the amount expended was intended to and did corruptly affect the result of the primary election.' Against this utterance of Secretary Hughes, which, coming at the time and in the circumstances it does, will create in the public mind at least a strong suspicion of pure partisanship as the motive behind it, Democrats will also match the opposing judicial conclusions of the ablest Republican Senators, who gave all the facts and the law of the entire case the most painstaking investigation. Among these Senators were Borah, Kenyon, Norris, Jones of Washington, Sutherland, and Norbeck.

"The Republican membership of the United States Senate, with a few exceptions, solemnly resolved that 'the expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free Government, such excessive expenditures are hereby condemned and disapproved.' Was even this an exoneration of NEWBERRY? And yet Secretary Hughes finds no difficulty in reaching the conclusion that NEWBERRY 'stood as a Senator duly elected by the people and entitled to his seat in the Senate.'

"If Secretary Hughes does not know that the Newberry seat in the United States Senate was bought, he is the only intelligent person in America who does not know that fact."

UNITED STATES COAL COMMISSION.

Mr. BORAH. I ask unanimous consent that the bill which has come over from the House of Representatives, having for its purpose the creation of a coal commission, may be laid before the Senate for consideration.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Chair lays before the Senate the bill from the House of Representatives.

The bill (H. R. 12377) to establish a commission to be known as the United States Coal Commission for the purpose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes, was read twice by its title.

The PRESIDING OFFICER. What is the request of the Senator from Idaho?

Mr. UNDERWOOD. Before the request of the Senator from Idaho shall be granted, as this bill has just come over from the other House and many of us are unfamiliar with it, I should like to have it read in full, in order that we may be informed.

The PRESIDING OFFICER. The Secretary will read the bill.

The reading clerk read the bill, as follows:

Be it enacted, etc., That for the purpose of securing information in connection with questions relative to interstate commerce in coal and all questions and problems arising out of and connected with the coal industry, there is hereby established a governmental agency to be known as the United States Coal Commission, to be composed of not more than nine members to be appointed by the President of the United States, by and with the advice and consent of the Senate. No Member of the United States Senate or of the House of Representatives or person who has any interest in or is connected with the coal industry shall be eligible to serve on said commission. Said commission shall elect a chairman by majority vote of its members, shall maintain central offices in the District of Columbia, but may, whenever it deems it necessary, meet at such other places as it may determine. It shall have power to form itself into subdivisions for the purpose of hearing testimony and making investigations, but all reports to the Congress and to the President shall be made by majority action of said commission. A member of the commission may be removed by the President for neglect of duty or malfeasance in office, but for no other cause. Each member of said commission shall receive a salary of $7,500 a year. Any vacancy on the commission shall be filled in the same manner as the original appointment. Said commission shall cease to exist one year after the taking effect of this act.

SEC. 2. That it shall be the duty of said commission to investigate and to ascertain facts in the coal industry as to ownership of coal mines, prices of coal, wages, wage contracts, conditions of employment, distribution, waste of coal, profits realized by owners or operators of coal mines or by other persons or corporations having to do with the production, distribution, or sale of coal, and any other material facts in connection with the coal industry generally and the organizations and persons connected with it. Said commission shall report to the President and to Congress its findings of fact and such recommendations as to methods and measures as in its judgment will promote continuity of production and efficiency in mining and distribution and maintain the uninterrupted movement of coal in interstate commerce and safeguard the interests of the workers, operators, and the consuming and general public. Said commission shall submit its first report not later than the 1st day of January, 1923.

SEC. 3. That any member of said commission shall have power to administer oaths, to subpœna and examine witnesses, and to compel the production of any book, paper, document, or other evidence, from any place in the United States, at any designated place of hearing, and to take or authorize the taking of the deposition of any person before any person having power to administer oaths. In the case of a deposition the testimony shall be reduced to writing by the person taking the deposition or under his direction and be subscribed to by the deponent. The same fees and mileage as are paid in the courts of the United States shall be paid in the case of witnesses subpœnaed or depositions taken under this act.

SEC. 4. That no person shall be excused from so attending and testifying and deposing, or from producing any book, paper, document, or other evidence on the ground that the testimony or evidence, documentary or otherwise, may tend to incriminate him or subject him to a penalty or forfeiture; but no natural person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may be compelled to testify or to produce evidence, documentary or otherwise, before said commission, or in obedience to its subpœna or the subpœna of either of them: *Provided*, That no person shall be exempt from prosecution and punishment for perjury committed in so testifying.

SEC. 5. That in case of failure to comply with any subpœna, or in case of the contumacy of any witness appearing before the commission, the commission may invoke the aid of any United States district court. Such court may thereupon order the witness to comply with the requirements of such subpœna, or to give evidence touching the matter in question, as the case may be. Any failure to obey such order may be punished by such court as a contempt thereof.

SEC. 6. That the commission and, when duly authorized in writing by the commission, any commissioner or agent of the commission shall at all reasonable times, for the purposes of examination, have access to and the right to copy any book, account, record, document, correspondence, or paper relating to any matter which the commission is authorized by this act to investigate.

SEC. 7. That any person who shall willfully neglect or refuse to attend and testify or depose, or to produce or permit access to any book, account, record, document, correspondence, or paper, as herein provided for, shall be guilty of an offense and upon conviction thereof be punished by a fine of not more than $5,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

SEC. 8. That every officer or employee of the United States whenever requested by the commission shall supply it with any data or information pertaining to any investigation by the commission which may be contained in the records of the office of such officer or employee.

SEC. 9. That any officer or employee of the commission who shall make public any information obtained by the commission without its authority, unless directed by a court, shall be demed guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both such fine and imprisonment, in the discretion of the court.

SEC. 10. That the commission may appoint and remove such officers, employees, and agents; and make such expenditures for rent, printing, telegrams, telephone, law books, books of reference, periodicals, furniture, stationery, office equipment, and other supplies and expenses, including salaries, traveling expenses of its members, secretary, officers, employees, and agents, and witness fees, as are necessary for the efficient execution of the functions vested in the commission by this act and as may be provided for by Congress from time to time, and make such rules and regulations as may be necessary for the efficient administration of this act. All of the expenditures of the commission shall be allowed and paid upon the presentation of itemized vouchers therefor approved by the chairman of the commission.

SEC. 11. That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $300,000, or so much thereof as may be necessary, to be available until expended, for carrying out the provisions of this act.

The PRESIDING OFFICER. What is the request of the Senator from Idaho?

Mr. BORAH. I ask unanimous consent for the consideration of the measure at this time.

The PRESIDING OFFICER. The Senator from Idaho asks unanimous consent to proceed to the consideration of the bill. Is there objection?

Mr. ROBINSON. Reserving the right to object, I wish to make some inquiries of the Senator from Idaho and to preface the inquiries with a statement.

On yesterday the Senator from Idaho himself reported into the Senate a bill on this subject, which was printed, and which this morning for the first time became available for the use and study of the Senate generally. The bill which the Senator from Idaho reported yesterday from the Committee on Education and Labor is a complete substitute for a bill introduced by the Senator from Idaho [Mr. BORAH] some days ago. This proposed legislation relates to a very important subject, and presents some questions that in my opinion ought to be considered with care by the Senate. I know that the Senator from Idaho has been studying the subject for some days, and for that reason I am very much disposed to grant consent for the present consideration of the bill. The Senate, however, has had no opportunity whatever to make a comparison between the bill reported by the Senate Committee on Education and Labor through the Senator from Idaho, the bill originally introduced by that Senator, and the bill that passed the House on yesterday and which the Senator from Idaho now asks the Senate to take up for immediate consideration and disposition. I am inclined to think that the bill ought to go over until to-morrow so that Senators may have an opportunity of reading and comparing the bills.

The Secretary has just read the House bill, and there is not a Senator in the Chamber who could hear it, or understand, if he heard it, the effect of the provisions read. The confusion in the Chamber was very great, as it usually is when a bill is being read. I have no disposition whatever to delay action on this matter, and I do not like to oppose any request the Senator from Idaho may make.

Mr. BORAH. Mr. President, I am very anxious, of course, to make progress with this matter; but one day is not absolutely essential, and I have no desire whatever to make undue haste and deprive Senators of an opportunity to read the bill.

If they feel that they have not had time to do so, I will not urge it until to-morrow morning.

Mr. ROBINSON. I believe that the Senator would conserve the interests of fair legislation by renewing his request on to-morrow. I want to say to the Senator from Idaho that it is my desire, and the desire of some others of us, to cooperate with him in the consideration and disposition of this subject; but it is very difficult immediately to make the comparisons between these three bills which the Senators ought to have an opportunity of making.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield for a moment?

Mr. ROBINSON. The Senator from Idaho has the floor.

Mr. BORAH. I yield.

Mr. WALSH of Massachusetts. I was going to suggest to the Senator from Arkansas that the Senator from Idaho to-day state just the differences between the bills, which he is prepared to do, and then let the matter go over until to-morrow for further discussion and argument. I am sure he could enlighten the Senate very much about the differences in these bills if he were permitted to address the Senate briefly upon their provisions.

Mr. ROBINSON. I shall be very glad to have the Senator from Idaho do that, if he is ready to do it, and if other Senators are willing that he shall have the opportunity, because it will be helpful to me and to other Senators in the study of the various proposals that are submitted to the Senate.

Mr. WALSH of Massachusetts. Very helpful.

Mr. ROBINSON. We now have three propositions which may be entirely distinct, which undoubtedly are quite different in important particulars; otherwise they would not be presented as separate propositions. If the Senator from Idaho will make an explanatory statement and then let the bill go over until to-morrow, I would prefer that he take that course rather than put me in the attitude of objecting to the consideration of his bill at this time.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from South Dakota?

Mr. BORAH. I do.

Mr. STERLING. I simply wish to join with the Senator from Arkansas in expressing the hope that the Senator from Idaho will be willing that this matter go over until to-morrow.

Mr. BORAH. Very well.

Mr. STERLING. The Senator from Idaho recalls that the bill considered in the Committee on Education and Labor was the Senator's own bill. This comes now as a substitute, which is quite different, I think, from the Senator's bill and the bill considered in the committee; and there has been no time on my part to give this new measure any consideration at all.

Mr. BORAH. I think the request of the Senators is a reasonable one, and I shall not insist upon my request. I shall ask, therefore, instead of this bill being considered at this time, that when I have completed my statement, which will be very brief, the bill be referred to the Committee on Education and Labor, and then we can report it out this afternoon.

Mr. President, there are not, perhaps, any irreconcilable differences. The bill as it comes from the House provides for a commission of nine. The bill as it comes from the Senate committee provides for a commission of five. The bill of the House provides that no appointments shall be made up of persons who are interested in the coal industry, either operators or workers. The bill as it comes from the Senate committee leaves the President free to select whomsoever he will.

Mr. ROBINSON. Mr. President, will the Senator yield for a question in that connection?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Arkansas?

Mr. BORAH. I do.

Mr. ROBINSON. I notice by a brief inspection of the bill which the Senator from Idaho introduced that he at first proposed that the miners and the operators should have representation on the commission; and, as he has just stated, the House bill eliminates that provision and gives the President an entirely free hand in the selection of the commission. No qualifications whatever are prescribed in the House bill, and I think that is true of the substitute reported yesterday by the Senator from Idaho. This particular subject constituted the principal controversy over the bill in the body at the other end of the Capitol, which considered the bill and passed it yesterday. Has the Senator from Idaho reached a conclusion upon the point as to whether the qualifications of members of the commission ought to be prescribed in the act, or whether the President should be left at liberty to make the selections without any limitations in the law?

Mr. BORAH. Mr. President, when I first drew the bill which I introduced I felt that it would be wise to provide for the appointment of an individual from the mine operators, and also a representative of labor, and I have not wholly changed my view in regard to that matter. I recognize, however, the strength of the argument in favor of permitting the President, as the appointing power, to exercise his judgment as to how he should make up this commission.

Mr. ROBINSON. Mr. President, will the Senator yield for a question in that connection?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Arkansas?

Mr. BORAH. I do.

Mr. ROBINSON. I think the Senator, as all Senators, will agree that if one of the parties in interest—treating the mine owners and the mine workers as the two parties in interest—is to have representation on the commission, both should have.

Mr. BORAH. I have so provided.

Mr. ROBINSON. And it is so provided?

Mr. BORAH. The original bill so provided.

Mr. ROBINSON. Yes; but under the House bill the Executive, if he saw fit, could give one of the parties in interest representation and deny it to the other if he chose to do that.

Mr. BORAH. Yes.

Mr. ROBINSON. And that would discredit in the beginning the efforts of the commission, would it not?

Mr. BORAH. I think so.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. BORAH. I yield.

Mr. LENROOT. Under the House bill no one having any interest in the industry on either side could be appointed a member of the commission.

Mr. ROBINSON. Then that question would not arise. Under the House bill the President would be compelled to deny representation on the commission to either the mine workers or the mine owners. He would have to appoint what we call public representatives.

Mr. BORAH. Yes. The distinction between the House bill and the Senate bill is that under the House bill the President is not permitted to choose from anyone who has an interest in the coal industry if he desires to do so, while the Senate bill leaves the matter open for him to appoint anyone that he desires to appoint, whatever their profession or relationship may be to the coal industry. In other words, it leaves the Executive free to make up the commission as he sees fit.

I think in all probability that will be the real bone of contention in regard to this proposition. The House bill also, as I have stated, provides for a commission of nine. The Senate bill provides for a commission of five. The House bill, as originally reported, provided for salaries of $10,000 a year. I think that was amended in the House to $7,500.

Mr. ROBINSON. That is as I remember.

Mr. BORAH. The differences, therefore, between the two bills, after those are stated, arise out of the authorizations found upon page 8 of the bill which is reported from the Senate committee. I do not find in the House bill anything covering these authorizations or provisions, and I will read them.

> Said commission shall also submit recommendations relative to:
> (a) Standardizing the mines upon the basis of their economic productive capacity and having in view the closing down of mines which, by reason of their natural limitations, fall below the standard.

Mr. ROBINSON. Mr. President, will the Senator yield to a question there?

The PRESIDING OFFICER. Does the Senator from Idaho further yield to the Senator from Arkansas?

Mr. BORAH. I do.

Mr. ROBINSON. It is purely a question for information. In the opinion of the Senator, does that language contemplate that if the commission shall find that a given mine or mines can not be operated economically as compared with other mines, the Federal Congress shall legislate to compel the owners of those mines to close them and to prevent them from operating?

Mr. BORAH. No; it is merely a recommendation upon the part of the commission for the information of the Congress—all of this is.

Mr. ROBINSON. I understand that it is not proposed that the commission shall legislate; but, now, suppose the commission says that Mine A in the State of Illinois can not be operated economically as compared with other mines in the same mining region, and recommends that the mine be closed down, and that only the mines that can be more economically operated be continued in operation. How would effect be given by Federal statute or Federal action to any such recommendation?

Mr. BORAH. That would be one of the questions which Congress would have to determine. After we had the facts as to

the condition of the mine, then it would be for Congress to determine, in the light of any suggestion which the commission might make, how to meet that difficulty.

Mr. ROBINSON. To put my question in another form, then, does the Senator think that if a congressional commission finds that under existing conditions a mine can not be operated economically, the mine owner ought not to be permitted to operate it in spite of that fact; that he ought to be in a sense deprived of his property and compelled to close it down, merely because there is a finding to the effect that other mines can be more economically operated?

Mr. BORAH. No.

Mr. ROBINSON. Where is the power under the Constitution for the Congress or any agency of the Congress, either an investigating committee or a legislative body, to require the owner of a property to close it down because it can not be economically operated as compared with other properties?

Mr. BORAH. There is no such power that I know of, but it is one of the difficulties in practical mining which we ought to study.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Minnesota?

Mr. BORAH. I yield.

Mr. KELLOGG. As a matter of fact, under the broad powers of inquiry, at the bottom of page 7 and the first paragraph of page 8, has not the commission full power to inquire into every phase of the coal business and recommend all remedies which the commission believes can be constitutionally enacted by the Congress?

Mr. BORAH. Mr. President, I think in all probability that is true; but I want to say here, in answer to that, that if I should regard this commission such a commission as we have had from time to time with reference to inquiring after facts and then to report them and there end its labors, I would not favor this bill at all. If we are not to get the benefit of the work of the commission in the way of suggestions and recommendations looking to a real constructive program and the building up of a policy to be crystallized into law with reference to the mine industry, I should not be willing to lay out a single dollar upon this proposition.

It was my idea, therefore, to put language in the bill sufficiently explicit to direct the commission's attention to the fact that it was not merely to make an inquiry as to certain facts, most of which have already been ascertained, but that it was appointed for the purpose of crystallizing those facts into a policy as nearly as possible and presenting them to the Congress in the way of a recommendation. Thereafter Congress must deal with it, of course, with full freedom and full independence, because, of course, the commission would not bind the Congress.

Mr. KELLOGG. Mr. President, I agree with the Senator entirely, and I thought he intended by the general language that they should make the inquiry with a view of aiding and assisting and advising Congress in the matter of legislation, as it appears on the bottom of page 7; and, further, the specific investigations and recommendations provided for on page 8 would seem broad enough to cover the special objects proposed.

Mr. BORAH. I am rather anxious not to permit the commission to get away from the proposition that its real duty is to work out a program and not merely inquire into facts and report them to the Senate, the report to be thereafter permitted to remain in the archives unused and unutilized in any way whatever.

Mr. KELLOGG. I agree with that.

Mr. BORAH. I have no interest in a mere investigating committee. We now have sufficient data gathered by different commissions, perhaps, to enable us to proceed; and I doubt if this commission would be required to go very much into original investigations in the way of securing mere facts with reference to the working of the mines, the operation of the mines, and so forth. In all probability 70 or 80 per cent of that information has already been gathered. But I desired, so far as I was concerned—and I think that was the view of the committee—to direct the commission to the proposition that its task was a little larger and more important than that; that it was in a sense working out a constructive program of legislation.

I agree with the Senator from Arkansas that that presents a constitutional question which in all probability we will find insurmountable. But it is one of the very difficult things with which they will have to contend.

Mr. LENROOT. Before the Senator leaves paragraph (a) I would like to ask him whether the phrase "having in view the closing down of the mines" does not contemplate an unconstitutional exercise of power?

Mr. BORAH. I had not considered it in that light. It might be so construed. The language as it originally appeared in the bill was not "having in view" but "taking into consideration," or something of that kind, but it was changed. Of course, I would not want everything in this bill to commit the Congress to a particular course, and before it is finally passed upon by the Senate I should agree to any language which would eliminate that proposition, so far as I am individually concerned.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Arkansas?

Mr. BORAH. I yield.

Mr. ROBINSON. Under my construction of the language employed paragraph (a) can mean nothing else than that if the commission finds that a given mine or certain mines can not be economically administered by reason of natural limitations, compared with other mines which do meet the standardized basis, the same shall be closed down. I do not think there is any power in any agency of the Government to prevent a man from doing business at a loss or to prevent a company from operating a mine which can not be economically operated, and I doubt whether under the police powers of a State any agency could prevent a mine from operating merely because some State committee after an investigation found that it could not be operated as economically as other mines.

The language in this bill, of course, is subject to amendment. It is inconceivable to me that the Congress would pass a provision of that nature in the language embraced in that section.

Mr. McKELLAR. I do not think it was the intention of any member of the committee that the language used should have any such effect as that, and therefore I am quite sure it will be perfectly satisfactory to everybody to have the language changed. The idea was simply to get suggestions from the commission as to the facts.

Mr. ROBINSON. Let me ask the Senator from Tennessee, who seems to have a very decided opinion as to what the language is intended to convey, what it does mean when the committee says that such commission shall submit recommendations relative to "standardizing the mines upon the basis of their economic productive capacity, and having in view the closing down of the mines which, by reason of their natural limitations, fall below the standard"?

The language is so plain that it can not have but one construction. If the commission find, after suggesting a standard, that a certain mine or certain mines can not be economically operated, then it is contemplated some way will be found by Government action or through legislation to compel the closing down of the mines. That raises a question that is more far-reaching than at first appears.

Mr. BORAH. The original language of the bill expressed more nearly the view which I have, "standardizing the mines upon the basis of their productive capacity, and regarding the closing down of the mines."

Mr. JONES of New Mexico. Mr. President, I would like to make the suggestion that there is no question but what that thought has been agitated to some extent throughout the country. My personal view agrees with what evidently is the view of the Senator from Arkansas, that we can not do anything of that sort by Federal legislation. But inasmuch as the question has been agitated throughout the country, I see no objection to this commission making a report upon the subject and a recommendation, and, in all probability, it will be such a report as will put a stamp of disapproval upon anything of that sort. Personally I think it would. I see no way of doing that sort of thing by Federal legislation.

Mr. REED of Missouri. So I suppose we would then have some Federal board down here engaged in the business of destroying some private enterprise by putting the stamp of its disapproval upon that private enterprise. That would be a fine power to lodge in somebody like Hoover.

Mr. JONES of New Mexico. Mr. President, the Senator quite misunderstood me. What I had reference to was the putting of the stamp of disapproval upon the plan or scheme which has been suggested and agitated by some people throughout the country of putting these mines out of business.

Mr. REED of Missouri. That is quite a different proposition.

Mr. BORAH. Senators assume that this board will recommend the closing down of the mines. It might just as well be assumed that it will recommend that it can not be done. My desire was to bring to the attention of the investigating commission these questions, all of which have entered into the discussion of the coal question during the last few months. I should have some difficulty in finding the constitutional power to close a mine, and I presume the commission will have some difficulty in doing that.

Mr. WALSH of Montana. Before we leave that, I venture to suggest that there would be no difficulty at all in doing it with the consent of the owner, and the commission might possibly

recommend some plan for the closing down of mines with the consent of the owners.

Mr. BORAH. As it is now the mine which can not be worked economically is the mine which fixes the price of coal really, and the result of it is that the public is paying for the coal from a mine which produces at the greatest expense. It is a subject which we have to consider.

When I took this up this morning I had an understanding with the Senator from Iowa that I would interrupt him but a few moments.

Mr. EDGE. Mr. President, as I understand it, this discussion surrounds entirely the bill introduced by the Senator from Idaho, but it is his intention, as I understand it, to ask unanimous consent to consider the bill which came over from the House, which does not contain these provisions. Is not that the situation?

Mr. BORAH. Yes; but I am going to offer the bill which was reported from the Senate committee as a substitute; so it is really relevant. I must not, under my understanding with the Senator from Iowa, take much more time, but the differences in the bill, aside from the ones which I have suggested with reference to the size of the commission and the manner of selecting the commission, will be found in the language beginning on line 16, page 8, and ending with line 12 upon page 9. In those paragraphs lettered (a), (b), (c), (d), and (e) will be found the differences between the two propositions, and, as suggested by the Senator from Minnesota, in all probability they are covered in a way by previous provisions of a very general nature.

I close by repeating that if this commission is not to be so constituted and so authorized as to pursue a different line of work from that which commissions generally do, I have no interest in it whatever; I would not care to appropriate one single dollar for it. If the only thing this commission is to do is to gather some more facts and put them in a report and let the report lie idle for all time; if no constructive program is to result, if no statute is to be enacted or no regulation and control to be had, I myself do not care to have any interest in it.

Mr. ROBINSON. Mr. President, I would like to ask the Senator from Idaho another question before he takes his seat. In paragraph (d) of the bill reported yesterday by the Senator from Idaho for his committee the commission is authorized to investigate the advisability or wisdom of nationalizing the coal industry. For some years there has been a discussion of that subject. The term "nationalizing," I believe, means the taking over of the mines by the Government and their operation, either directly or under Government supervision, does it not?

Mr. BORAH. That is my understanding of it?

Mr. ROBINSON. So that when the commission is appointed by the President in all probability the result of the investigation under paragraph (d) will be easily at once determinable from the personnel of the commission?

Mr. BORAH. It may be so. Just a word in regard to that. I think a study of the question of nationalizing is absolutely essential to an intelligent comprehension of the other question—of regulation and control—and I put it in because I want the entire subject matter dealt with. If the commission does not deal with it, it will overlook one of the essential elements of an intelligent comprehension of the coal industry.

The PRESIDING OFFICER. The bill from the House will be referred to the Committee on Education and Labor.

ADDITIONAL DISTRICT JUDGES—CONFERENCE REPORT.

Mr. CUMMINS. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of the conference report on what is known as the judges' bill, being the bill (H. R. 9103) for the appointment of additional district judges for certain courts of the United States, to provide for annual conferences of certain judges of United States courts, to authorize the designation, assignment, and appointment of judges outside their districts, and for other purposes.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The Senator from Iowa asks unanimous consent that the Senate proceed to the consideration of the conference report on the judiciary bill. Is there objection? The Chair hears none.

Mr. ROBINSON. Mr. President, I ask the consent of the Senate to discuss a subject for 10 minutes not intimately related to this bill. I will say to the Senator from Iowa that I have no disposition to delay final action on his bill. My request is made necessary, I believe, by the action of the Senator from New Jersey [Mr. EDGE] while the morning business was being disposed of in inserting in the RECORD a letter by Secretary Hughes touching the Newberry case.

Mr. CUMMINS. Mr. President——

Mr. ROBINSON. I understand that I have the technical right under the bill to proceed with the discussion.

Mr. CUMMINS. Precisely.

Mr. ROBINSON. In my conscientious judgment, the remarks that I shall make are pertinent.

Mr. CUMMINS. All I ask is that before the Senator proceeds the Chair shall lay before the Senate the conference report, so that it may be pending.

The PRESIDING OFFICER. The Chair lays before the Senate the conference report on House bill 9103.

Mr. SHIELDS subsequently said: Mr. President, in discussing the points of order on the conference report on what is known as the judges' bill yesterday, at the request of the Senator from Texas, I thought I placed in the RECORD a statement setting forth the points of order, but I find the RECORD has omitted it. Perhaps I was not clear enough in my statement. I now ask that it be inserted in the RECORD.

The PRESIDENT pro tempore. Without objection, the statement will be printed in the RECORD in accordance with the request of the Senator from Tennessee.

The matter referred to is as follows:

THE JUDGES' BILL.

The report of the conferees is subject to points of order for the elimination of matter contained in the bill as it passed the House and the Senate and for the inclusion of new matter.

PROVISIONS ELIMINATED.

The House bill, page 1, line 10, provided:

"That the judges shall be residents of the districts for which appointed."

The Senate bill, page 14, line 12, provided:

"Every judge shall reside in the district or circuit of one of the districts or circuits for which he is appointed."

This was deemed important by both the House and the Senate, but is eliminated by the conferees.

Second, the House bill, page 4, lines 17 to 24, contained a provision providing for the Attorney General upon the request of the Chief Justice to make a report of the business of the several courts of the United States with particular reference to causes or proceedings to which the United States was a party, together with such recommendations or requests as may be deemed proper.

The Senate bill, page 12, lines 16 and 20, contained the same provision.

These provisions, contained in the bill as it passed the House and the Senate, are omitted in the bill reported by the conferees.

These omissions are in direct violation of the Curtis amendment to Rule 29.

It will not do to say that they are immaterial, because the House and the Senate both deemed them material, and they are, in fact, material and important.

NEW MATTER IN CONFEREES' BILL.

The law now in force applicable to the eastern and middle districts of Tennessee and providing a judge for these districts is as follows:

The Judicial Code, chapter 5, provides:

"SEC. 69. The United States are divided into judicial districts as follows" (p. 44).

"SEC. 107. The State of Tennessee is divided into three districts, to be known as the eastern, middle, and western districts of Tennessee." (Then the names of the several counties included in each of the three districts are set out in full, p. 67.)

Chapter 1, page 1, of the Judicial Code, provides:

"SECTION 1. In each of the districts described in chapter 5 there shall be a court called a district court, for which there shall be appointed one judge to be called a district judge except * * *. There shall be one judge for the eastern and middle districts of Tennessee."

The present bill originated in the House and was passed under the title:

"An act for the appointment of additional district judges for certain courts of the United States, to provide for annual conferences of certain judges of United States courts, to authorize the designation, assignment, and appointment of judges outside their districts, and for other purposes."

And the title to the bill as agreed upon and set forth in the report of the conferees is:

"An act for the appointment of an additional circuit judge for the fourth judicial circuit, for the appointment of additional district judges for certain districts, providing for an annual conference of certain judges, and for other purposes."

Thus it appears this is not a bill to create judges—we may say principal judges—for judicial districts, but additional judges to relieve temporary congestion of business in certain districts, and it is provided in the bill as it passed the Senate that no successors shall be appointed to the judges created, and a similar provision is contained in the bill reported in the conference report, with an exception in favor of the additional judge provided for the middle district of Tennessee.

The first section of the bill, as it passed the House, is in these words:

"That the President be, and he is hereby, authorized to appoint, by and with the advice and consent of the Senate, the following number of district judges for the United States district courts in the districts specified, the said appointments to be in addition to those now authorized by law:

"For the district of Massachusetts * * *."

(And here the additional judges for other districts are set forth.)

"For the middle district of Tennessee, one."

There was no other reference in the House bill than this statement as to the middle district of Tennessee or any other part of Tennessee. The above provision for a Tennessee judge was stricken out by the Senate.

The bill as reported by the conferees, so far as applicable to Tennessee, is in these words:

"That the President be, and he is hereby, authorized to appoint, by and with the advice and consent of the Senate, the following number of district judges for the United States district courts in the districts specified in addition to those now authorized by law."

Then, after setting out the additional judges provided for Massachusetts and other States, it is provided:

"For the middle district of Tennessee, one."

The conclusion of the paragraph provides that when a vacancy occurs in the office of any of the additional judges thus provided "except for the middle district of Tennessee," no successor or successors shall be

appointed; and, after a provision for New Mexico, not necessary here to be discussed, concludes:

"*Provided further*, That from and after the appointment of a district judge for the middle district of Tennessee the present district judge for the eastern and middle districts of said State shall cease to be a district judge for the middle district of Tennessee."

Therefore, it appears that some 24 additional judges are provided for designated districts in a large number of States to meet the present emergency in those districts. As the congestion there is considered temporary, no successors to them are to be appointed; but by the bill as reported by the conferees the additional judge created for the eastern and middle districts of Tennessee is what might be described as a permanent judgeship, the judge to have jurisdiction exclusive of all other district judges in the district of middle Tennessee.

The judge for the middle district of Tennessee, as provided in the House bill, was merely an additional judge for the eastern and middle districts of Tennessee, with jurisdiction confined to the middle district, leaving the judge for the eastern and middle districts, as now provided by law, the senior judge, with jurisdiction over both of those districts.

The conferees' report, by the new matter last quoted, makes the new judge for the middle district exclusive judge of that district and especially repeals the former legislation, giving the present judge for the eastern and middle districts jurisdiction over the middle district.

The provision is:

"That from and after the appointment of a district judge for the middle district of Tennessee the present district judge for the eastern and middle districts of said State shall cease to be a district judge for the middle district of Tennessee."

This is unquestionably new matter and the basis of a point of order upon the conferees' report under rule 27, page 32, of Senate Rules.

It is clear that, under the caption of the House bill, as well as section 1, providing for a judge for the middle district of Tennessee, that that bill only created an additional judge for the middle district of Tennessee and left the present judge for the eastern and middle districts the senior judge, with jurisdiction in both districts.

This is important and material and can not in any sense be said to be a frivolous objection.

There is nothing in the House bill (the Senate had no reference to Tennessee) which indicates in the slightest that the present judge was to be denied his jurisdiction over the middle district, but, on the contrary, it being a bill for additional judges, it clearly follows that he was to retain such jurisdiction.

SENATOR FROM MICHIGAN.

Mr. ROBINSON. Mr. President, the Newberry case was disposed of by the Senate some months ago. There has been no discussion of the case in this body for some weeks. Recently, the Secretary of State, Mr. Hughes, at the instance of the Republican National Committee, according to press reports, caused to be published throughout the land a letter expressing his view of the Newberry case and of the action of the Senate in seating the Senator from Michigan [Mr. NEWBERRY]. This morning the Senator from New Jersey [Mr. EDGE], by unanimous consent, had printed in the RECORD the letter of the Secretary of State. Manifestly the only object the Secretary could have had in mind when he issued the letter and the only object which the Senator from New Jersey [Mr. EDGE] could have sought was political in its nature. I have, therefore, deemed it pertinent, in view of what may be termed the very extraordinary course taken by the Secretary of State in the matter, to make a statement myself.

The letter of Secretary Hughes, skillfully whitewashing the Newberry case, in the judgment of many familiar with the record, discredits the reputation for sincerity and fairness which Mr. Secretary Hughes has long enjoyed. The Secretary has permitted designing Republican politicians to prompt him to an act which, while adding nothing to his standing as a lawyer, detracts from his renown as a public officer of high moral character. By his letter the Secretary approves the reckless and almost unlimited expenditure of moneys in questionable ways by a candidate's relatives and friends if criminal knowledge and complicity on the part of the candidate can not be established according to the rules of trial in criminal cases.

Secretary Hughes was the chief counsel for the defense in the Newberry case, but it is hardly to be contended that his recent political letter, issued at the instance of the Republican national committee, has relationship to his duties as such counsel. The letter is designed to influence public opinion touching a moral issue, concerning which Mr. Hughes, by reason of his former professional relationship to the case, is biased and therefore unable to express a conclusion which the public may rely upon.

Everyone knows that an attorney is not an impartial judge of the conduct or the cause of his client, either in relation to the interests of other individuals or the public welfare.

The Secretary probably is not familiar with the details of the record in the Senate, which is quite different from the court record and which establishes conclusively, among others, the following facts:

1. That the Newberry committee was organized at the suggestion and under the direction of Candidate NEWBERRY.

2. That it conducted a campaign in which was expended approximately one-quarter of a million dollars, something like one-half of the amount being contributed by members of the candidate's own family.

3. That public officers and election officials throughout the State were hired to work for Mr. NEWBERRY's election, and in some instances these hirelings were prompted by members of the committee to make false reports of the amounts received.

4. That prominent Republicans, including the lieutenant governor of the State and the publishers of influential Republican newspapers, openly declared during the campaign that the electors were being debauched through the corrupt practices of the Newberry election committee, and these charges were expressly brought to the attention of the candidate.

5. That Candidate NEWBERRY urged that the publicity campaign, which anyone could see was costing enormous sums, be continued at full pressure, replied to the charges of these prominent Republicans evasively, and in a written communication to his manager boasted that he had evaded answering directly.

6. That the policy of Candidate NEWBERRY, the Secretary's client, was to encourage the kind of campaign conducted by the committee, while pretending to take little interest and to have no knowledge of the methods pursued in his interest.

7. That the public interest is affected detrimentally in the same degree by a money campaign conducted as the Newberry campaign was admittedly carried on as when the candidate himself handles the funds and directs the campaign in detail.

8. That the rule in criminal trials to the effect that the failure of a defendant to testify can not be considered against him does not apply to a controversy wherein the Senate exercises its power to determine the election and qualifications of a Member, and that the failure of the sitting Member, Mr. NEWBERRY, to appear and testify before the Committee on Privileges and Elections is an inexplicable circumstance against the merits of his claim to a seat.

9. That some of the ablest Republican Senators and many of the most influential Republican newspapers of the country unqualifiedly condemned the methods employed in the election.

10. That in order to secure sufficient votes in the Senate to retain the seat by Mr. NEWBERRY it was found necessary to adopt an amendment to the resolution declaring such expenditures as were admittedly made on behalf of Mr. NEWBERRY "contrary to sound public policy, harmful to the honor and integrity of the Senate, and dangerous to the perpetuity of a free government."

Since the publication of the letter by Secretary Hughes many have asserted that his attitude discloses a lawyer's appreciation to his client for a lucrative fee rather than a public officer's sense of duty and responsibility to his Government. It is clear that the Secretary blundered under the inducement of political highbinders who sought to give respectability to a discredited cause by procuring Mr. Hughes's statement, which if originating from a less influential source would be received by the public with open resentment and contempt.

The Secretary of State and the Senator from New Jersey are welcome to all the political capital they can make out of the letter of the Secretary of State.

Mr. POMERENE. Mr. President, if I may be permitted to have a few minutes, I desire to speak briefly on this subject. I am not in the habit of holding post-mortem examinations. I, too, regret that the Secretary of State has seen fit to issue the statement at the time he did. I am reliably informed that the statement was given to the newspapers three or four days before it was finally published. It was published on Monday morning, the day of the Democratic and Republican conventions in Ohio. I read what was in the papers. What I may say will be based on that statement.

As the able Secretary of State discussed the subject, it seemed to me at least that he was discussing the record as it appeared before the Supreme Court. But the record made before the Committee on Privileges and Elections was not the record in the Supreme Court. Every lawyer knows that, particularly in criminal cases, the Supreme Court never considers facts except as it may be necessary in order to elucidate the law involved in the case. Before the Committee on Privileges and Elections there was very much additional testimony.

John S. Newberry appeared in the record for the first time. He testified that he told his confidential man, Frederick P. Smith, that if his brother got into the race he wanted to finance his campaign; that he placed no limitation upon the amount that Frederick Smith should draw from his account for the purposes of the financing; that he never had any statement from this confidential man, his attorney in fact, as to the balances in his account or as to the amount which was drawn from his bank account and turned over to the Newberry senatorial committee.

Frederick P. Smith, the confidential attorney in fact of Senator NEWBERRY, of John S. Newberry, of eight other New-

berry accounts, testified that he had general powers of attorney under which he could draw from any one or all of those accounts and pay over the amounts thus drawn into any other account; that during the campaign he drew from Senator NEWBERRY's account as his attorney in fact, paid that money over into John S. Newberry's account, and then as John S. Newberry's attorney in fact checked it out and paid it to the Newberry senatorial committee. Would any man who is disposed to be fair say that Senator NEWBERRY's money did not finance his campaign? Would anyone suggest after reading the record that Senator NEWBERRY knew nothing about it?

It developed during the criminal trial that a telegram was sent by Smith to NEWBERRY in New York some time in July in which he suggested to NEWBERRY that the primary was in August and not in July; that there was no way of curtailing the expenditures until after the primary date. In the criminal trial the res gestae connected with the sending of the telegram were not known. Smith did not appear in the criminal court, but when Smith, the attorney in fact, was asked before the committee to explain this incident he said that the night before he sent the telegram he and Senator NEWBERRY had had a talk by telephone and that NEWBERRY complained of the heavy drafts upon the Newberry account.

What was he complaining about? He was complaining about the amount of money that it was taking. He evidently must have known of these heavy drafts on their funds; otherwise he would not have made any complaint.

Then followed this significant fact: The books of account of the Newberry campaign committee were either lost or destroyed. Then we asked the Republican members of the Senate committee to subpœna the banks in which the Newberry accounts were kept and to have them bring their books of account, including the deposit slips.

Mr. ASHURST. Will the Senator yield at that point?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Arizona?

Mr. POMERENE. I will yield in just one moment. The Republican members of the subcommittee refused to issue subpœnas for the bank officials to bring their books. Now I yield to the Senator from Arizona.

Mr. ASHURST. Does not the Senator from Ohio recall that the Senator from New Jersey [Mr. EDGE] was a member of the subcommittee which investigated the matter? While he now assists Mr. Hughes in rushing to the defense of Mr. Hughes's client, he himself inveighed against the roundabout underhand methods of keeping the accounts of the Newberry campaign committee.

Mr. POMERENE. I thank the Senator.

Mr. President, every lawyer knows that when books of account are destroyed and he can not get the primary evidence he may seek to get the secondary evidence. When we sought and failed to get the books of the committee, which had been conveniently destroyed or lost, then we asked for the books of the banks, including the deposit slips showing the Newberry accounts; but the Republican members of the committee would not issue the subpœna. If those members of that subcommittee—and I measure my words in what I am going to say—had been sitting as trial judges in a court, does anyone doubt that any judgment they might have rendered would have been set aside by an appellate court on the ground that they erred in refusing to issue the subpœnas?

Mr. EDGE. Mr. President, will the Senator from Ohio yield?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from New Jersey?

Mr. POMERENE. I will not yield now. Does anyone doubt if those judges knew the law and purposely concealed the facts by refusing to issue the subpœnas they would have been impeached if charges had been made against them?

Now, let me go a step further.

Mr. EDGE. Will the Senator yield on that point?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from New Jersey?

Mr. POMERENE. Yes; I yield.

Mr. EDGE. If I understood the Senator from Ohio correctly, I understood him at least to state that the chairman of the subcommittee, the junior Senator from Missouri [Mr. SPENCER], had refused to issue some subpœnas that had been asked for. It is my recollection—and I think I am entirely correct in making the assertion—that every subpœna that was asked for witnesses to appear before the subcommittee was granted and that the subpœnas were sent out. I do not recall that where the name of any witness was suggested he was not sent for.

Mr. POMERENE. Is it possible that the Senator from New Jersey has a lapse of memory?

Mr. EDGE. The Senator from New Jersey does not often have a lapse of memory. What I have stated is my recollection.

Mr. POMERENE. The Senator from New Jersey has a lapse of memory in this instance, and I ask him to get the record.

Mr. EDGE. If the Senator from Ohio means by his assertion that a subpœna was denied for a second appearance, perhaps, of some witness, that might have occurred, but if a subpœna were denied originally for any witness, I certainly do not recall it.

Mr. POMERENE. Mr. President, the Senator from New Jersey owes it to himself and to his constituency to get the record and read it.

Now, let me go a step further. It was known that I, as a member of that subcommittee, had had charge of the subject for a considerable time; I was compelled to be away for a time; but the committee insisted upon going on with its hearings. Former Senator Wolcott, of Delaware, who is now the chancellor of Delaware, appeared as a member of the subcommittee during my absence. He asked for the subpœnaing of certain witnesses, and that request the majority of the subcommittee denied. He also asked that some of these matters be held in abeyance until I could return. When I came back I filed motions asking for the subpœnaing of those witnesses. Another witness whom we wanted, and who had had charge of the books, when it was thought that he could be called here, was so sick that he went across the line into the woods of Canada. Of course, certificates of physicians as to his then condition were brought here; but a month after that, when the subject was taken up by the committee again, and when it was supposed that there was no chance to get him back here, he returned to Detroit and was engaged in building houses and conducting his business as never before.

More than that, we asked the Republican members of the subcommittee to invite Senator NEWBERRY to come before the committee, and that they refused to do. There was a roll-call vote in the subcommittee. These motions were renewed by myself before the full committee. If there ever was a committee which sought to conceal the facts, it was in this case.

When this matter came up for a vote in the Senate the majority of the committee presented the resolution thus—and I will read it all:

(1) That the contest of Henry Ford against Truman H. Newberry be, and it is hereby, dismissed.

The committee were unanimous as to that.

(2) That Truman H. Newberry is hereby declared to be a duly elected Senator from the State of Michigan for the term of six years commencing on the 4th day of March, 1919, and is entitled to hold his seat in the Senate of the United States.

The Republicans were not quite content with that; they needed some more votes, they thought, at least, and so this amendment was suggested:

That whether the amount expended in this primary was $195,000, as was fully reported or openly acknowledged, or whether there were some few thousand dollars in excess, the amount expended was in either case too large, much larger than ought to have been expended.

Now, note the following:

The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free government, such excessive expenditures are hereby severely condemned and disapproved.

That is the equivalent of saying to the country, "Senator NEWBERRY, your expenses were too large; it makes no difference whether you knew about them or not, the result of such expenditures is 'contrary to public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free government, and such excessive expenditures are hereby severely condemned and disapproved,' but, nevertheless, the majority of the Senate, accepting the recitals contained in this resolution, said, in effect, 'Senator NEWBERRY, take your seat; we need you in our business.'"

Then—and I regret to say it, because there is no man in public service for whom I have had a higher regard—the ex-justice of the Supreme Court, the present Secretary of State, gives a certificate of character to Senator NEWBERRY, based on a record in the Supreme Court, when the Supreme Court did not weigh the evidence and before he knew what the evidence was before the committee. Now, I put this question: "Mr. Ex-Justice of the Supreme Court, in view of the fact that the United States Senate by its vote declared that this expenditure was excessive; that it was contrary to public policy; that it was harmful to the honor and the dignity of the Senate and dangerous to the perpetuity of a free government—under these circumstances, do you feel that you were justified in

giving this whitewash to Senator NEWBERRY, or were you trying to whitewash the entire majority in the Senate?"

Mr. President, some Republicans have suggested that this was a very minor matter. Perhaps it is in the minds of some men, but it is very strange that just before conventions are to be held this letter should be issued; it is strange, indeed.

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Missouri?

Mr. POMERENE. I yield to the Senator.

Mr. REED of Missouri. It is not at all strange. The New York Times, which printed the letter on August 21, recited that:

The letter was written in response to a letter addressed to Mr. Hughes by the Rev. Dr. Hugh B. MacCauley, of Paterson, N. J., and was made public to-day by the Republican National Committee.

Of course, that makes it perfectly plain that the Republican National Committee thought it was a good campaign document or a good coat of whitewash that they could spread on at an opportune moment.

Mr. ROBINSON. They made a decoy duck of the preacher.

Mr. REED of Missouri. They employed a preacher to get the letter; but I have not any doubt that the Secretary of State knew when he wrote the preacher the use to which this letter would be put, because it is inconceivable that as busy a man as he is would have taken the trouble otherwise to have written a brief on the case, which is what his letter is. The thing was undoubtedly arranged, and the letter was sprung by the Republican National Committee at the particular moment it was given to the public for the purpose of affecting the election; that is all. I think it is perfectly plain.

Mr. POMERENE. Mr. President, can the Senator advise me whether any prominent Republicans died of surprise because this letter from the Secretary of State was made public?

Mr. REED of Missouri. I have not any doubt that it was all arranged, absolutely.

Mr. POMERENE. Let me ask another question. Can the Senator advise me whether this minister of the Gospel received from on high his inspiration to write the letter?

Mr. REED of Missouri. Probably, if you regard the Republican National Committee as occupying a sufficiently elevated position.

Mr. OWEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. POMERENE. I yield to the Senator.

Mr. OWEN. I merely wanted to suggest that it should not be regarded as strange that this ostentatious defense should be made at the instance of the Republican National Committee, because their obligation to Mr. NEWBERRY was very great. They appear to have drafted him in the first place. They appear to have organized a committee for the purpose of raising money in the second place. Their sympathies were with the expenditure of this money in the third place. In the fourth place, they used the Newberry vote to organize the Senate and to make the Senator from Massachusetts [Mr. LODGE] chairman of the Foreign Relations Committee, with the result that it defeated the Versailles treaty.

Against the bill of health given by the Secretary of State, Hon. Charles E. Hughes, formerly NEWBERRY's attorney, as a guide to all citizens of Republican tendencies, I commend what Hon. William S. Kenyon, then United States Senator, and now justice of the United States Circuit Court of Appeals, said on December 21, 1921, in the United States Senate (CONGRESSIONAL RECORD, pp. 619–625):

I deny that the Newberry case is any test of Republicanism. I deny that the 7,000,000 majority of the Republican Party last fall was a vindication of any such methods. While there will be few Republican votes against Mr. NEWBERRY, I believe these votes will better represent the sentiment of the Republicans of the Nation than the votes here cast for him. The Republican Party can not carry a burden of this kind. I deny the right of a few men in this body to determine what are tests of Republicanism. I hope the day will never come when "'Lorimerism" and "Stephensonism" and "Newberryism" will be a test of Republicanism, and I do not think the day has arrived when a few gentlemen in the Senate of the United States can determine what Republicanism is. If so, God save the Republican Party!

In some respects this case is worse than the Lorimer case. There was some courage there. They went out and bought the election. It is infinitely worse than the Stephenson case, where a poor old man with a large fortune, in old age, almost in his dotage, was flattered into expending his money to become a Member of this body. In this case Mr. NEWBERRY, a man of the highest intelligence and culture, had been a member of a great Cabinet. The personnel is different.

I assert that, under the record, the following conclusions can reasonably, safely, and legitimately be drawn:

That the committee expended approximately $263,000.

That the committee violated the Federal statute and the statutes of Michigan, and that such action entered into the election through the primary.

That the committee was not a voluntary committee. It was picked by Mr. NEWBERRY.

That Mr. NEWBERRY was responsible for the acts of the committee, and that the agency of Cody and King is established beyond question, and he would be responsible in a civil action for debts contracted by them in the campaign.

That Mr. NEWBERRY knew about the campaign, financially and otherwise, and knew of most of the expenditures of the campaign.

That a part of the money spent in the campaign was actually the money of Mr. NEWBERRY.

I appeal to this record to sustain every one of those propositions.

* * * * * * *

This will not be the last of the Newberry case. You can not brush aside a thing of this kind, even though great and mighty international questions are before the people. It goes to the very fundamentals of the Government. The people of this country, who love their Government, are jealous of its integrity and hate the corrupting influences that purchase seats in the Congress. It is even worse to do it in insidious ways than to go out and buy it outright, as was done in the Lorimer case. It requires much more courage to buy elections in that way than it does to buy them in this way. If the price of seats goes up from $107,000 in 1912 to $263,000 in 1921, it certainly ought to reach the $500,000 mark in the next 10 years. What opportunity is there for the average everyday citizen, be he man or woman, to aspire to a seat in this body? You are undermining by the vote in this case the foundations of this Government, and the Republicans are not helping the Republican Party. I doubt if you really are performing a real act of friendship for Mr. NEWBERRY, much as we like him and sorry as we are for his situation. The day is coming when this case will be heard in another court, the only court, save the Supreme Court, with higher jurisdiction, and that is the court of the great American people. There the question of pure elections and the purchase of seats in this body will be tried out. That means out in the places of business, workshops, on farms, on the rostrum and at the firesides of the American people. It will be tried out where men and women are now struggling over the hard vicissitudes of life, with the difficult problem of getting along on meager salaries and small incomes, and are watching the matter of the purchase of seats in the Senate. It will be a trial that will be worth while, because the American people when they understand the question will decide it right. They will know the record even though many Senators do not, and there is little question of the judgment there as there is of the verdict here; but be assured if Mr. NEWBERRY is seated the judgment there will reverse the verdict here.

And in closing on this question (CONGRESSIONAL RECORD, p. 1114) on January 12, 1922, this, one of the noblest, bravest, and best of all the Senators who have ever stood upon this floor, said:

I see a predecessor of the Senator from Ohio [Mr. WILLIS] in the Senate Chamber at this time, Senator Burton. I have his speech in the Lorimer case before me and intended to read a part of it to the Senate, showing where he stood, noble and honest soul that he was, standing for an absolutely uncorrupted electorate.

Justice Miller was right, and when external violence threatened this country 5,000,000 men massed to go out and fight for this country, Make no mistake; when insidious corruption threatens this country, as it does now, with the Senate writing its infamy into this resolution, there will be millions of people with the same courage and with the same love of country who will mass to fight corruption. That is no threat; it is the statement of a fact.

Thank God for the folks at home! Thank God for the men and women in the factories and on the farms and around the firesides of this country who will eventually determine this question! I do not care how it is determined here. I know how it will be determined. I know they have been gathered in; they are ready to sign the directed verdict. Sign it in your infamy!

Mr. POMERENE. Mr. President, I confess that I do not understand why this issue should be presented in this way, unless it be because those "whom the gods would destroy they first make mad."

Mr. President, I do not care to occupy the attention of the Senate further; but if our Republican friends desire this to be one of the chief issues in the campaign, we welcome it.

Mr. WALSH of Montana. Mr. President, I want to say a word on this matter.

When the Newberry case was decided by the Supreme Court a very general conviction was entertained that the Supreme Court had actually determined the merits of the controversy and had decided that there was no act that was reprehensible on the part of Senator NEWBERRY in connection with his election to the United States Senate. The public generally form their views about those matters from the newspaper headlines. I do not mean to say that the papers purposely gave the decision that color, but that is the natural conclusion that is ordinarily drawn from a ruling of the Supreme Court of that character. The ordinary man does not grasp the technicalities, but naturally reaches the conclusion that the case was actually decided upon its merits.

When the cause came before this tribunal for consideration no real claim was made upon the part of the supporters of Mr. NEWBERRY that any such effect could be possibly given to the decision of the Supreme Court. It was conceded on all hands, with the exception of one Senator, that the decision merely held that the law under which the proceedings were instituted was unconstitutional. The court went no further into the question. They did not undertake to determine whether, if the law were valid, the conviction was properly had or was not properly had. The Chief Justice, who wrote the opinion of the minority, declared that error had been committed in the matter of the instructions to the jury—that the law had been misapplied—but if any conclusion whatever is to be drawn from the opinion

of the Supreme Court touching the merits of the case, it must be to the effect that there was enough evidence to warrant a conviction of Senator NEWBERRY, if the law under which the proceedings were instituted had been a valid enactment of Congress.

I say, Mr. President, that the idea that the Supreme Court determined the matter upon its merits was so perfectly untenable that when the matter came before us for consideration here the suggestion was simply made by one Senator upon the floor, and was disregarded. It is perfectly evident that the purpose of the letter of Secretary Hughes is to reinstate in the minds of the public the erroneous idea concerning the effect of the decision to which I have adverted. I refrain from any comment whatever upon the propriety of an effort on the part of a high official of the Government thus to mislead the public mind.

Mr. President, in addition to what has been said here in the Senate concerning this effort on the part of the Secretary of State, I desire to read the comments of Judge Kenyon upon the letter; Judge Kenyon, it will be remembered, having been a Member of the Senate at the time the Newberry case was under consideration here, and having made one of the most powerful addresses delivered in the Senate in recent times against the seating of that Senator. He said, as reported by the press, concerning the Secretary's letter, as follows:

Secretary Hughes omitted to state that the sum admittedly spent by the Newberry forces was near $200,000, although they were charged with having expended much more.

He omitted to state that NEWBERRY had been convicted before a Republican judge by a Republican jury in a Republican State of a violation of the corrupt practices act, then in full force and effect.

He omitted to state that the decision of the Supreme Court nullifying the corrupt practices act as applied to senatorial primaries did not attempt to decide the merits of the case.

He omitted to state that Senator NEWBERRY refused to appear before the Committee on Privileges and Elections to answer the charges against him.

He omitted to tell of the destruction of Newberry campaign records, and the spiriting away of Newberry henchmen beyond the reach of the court.

He omitted to state that after the trial and conviction in a Federal court new evidence was found and used in the trial of Senator NEWBERRY before the Senate—evidence of the most damaging character.

He omitted to state that nine Republican Senators voted to unseat Senator NEWBERRY.

He omitted to state that Senator NEWBERRY had been retained in his seat by only five majority of the Senate, and that this majority was only made possible by the passage of a resolution condemning the expenditures of the Newberryites as "contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free government."

He omitted to say a word in condemnation of this expenditure which a Republican Senate condemned.

Mr. ASHURST. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Arizona?

Mr. WALSH of Montana. I do.

Mr. ASHURST. In view of the number of things the Secretary of State failed to remember it would seem that the only thing he did remember was his fee.

Mr. POMERENE. Mr. President, I referred a moment ago to the motions I had filed before the subcommittee asking the issuance of certain subpœnas. I have not those motions before me now, but I presented substantially the same motions before the full committee. I read into the RECORD these motions or resolutions, and I read from page 73 of the views of the minority, contained in report 277, part 2, Senator from Michigan:

In a meeting of the full Committee on Privileges and Elections the following several resolutions were presented by Mr. POMERENE:

"Resolved by the Committee on Privileges and Elections, That the subcommittee be instructed to subpœna and take the testimony of Frederick P. Smith and such other witnesses as may be suggested by any member of the subcommittee to the end that there may be a full and complete hearing respecting the issues involved in the pending contest.

"Resolved by the Committee on Privileges and Elections, That the subcommittee be instructed to invite Senator NEWBERRY to appear before it to give testimony concerning the charges pending against him involving his title to a seat in the United States Senate.

"Resolved by the Committee on Privileges and Elections, That the attorneys representing the contestant and the contestee in the pending investigation be invited to appear before the full committee to submit oral arguments, on a date to be fixed by the chairman of the committee."

They speak for themselves. Each one of them was denied.

Mr. EDGE. Mr. President, may I ask the Senator from Ohio a question? Did I understand him to say that that was a resolution presented to the full Committee on Privileges and Elections?

Mr. POMERENE. These resolutions were presented before the full committee, and they were substantially duplicates of the resolutions presented by myself before the subcommittee.

Mr. EDGE. When I took issue with the Senator as to a refusal on the part of the subcommittee to send for any witnesses I had no reference to the resolutions which were presented to the full committee. If the Senator from Ohio presented similar resolutions to the subcommittee, I think I am correct in the assertion that they must have been presented after the hearings had been held and after, at the Senator's own suggestion, numerous witnesses were subpœnaed.

I think the list was furnished usually by the Senator from Ohio, and, to the best of my recollection, all of those whose names at any time were presented were subpœnaed. Is not that correct?

Mr. POMERENE. That is not correct.

Mr. EDGE. What person was ever asked to be subpœnaed and not subpœnaed?

Mr. POMERENE. I do not think the record will show that I asked for a single witness to be subpœnaed until after Mr. Ford's attorney had presented his witnesses and the witnesses were presented on behalf of Mr. NEWBERRY, and I asked for the subpœnaing of these witnesses after ex-Senator Wolcott had insisted upon it, after he had asked that the hearings be not closed until I could return to the Senate from Ohio.

Mr. EDGE. Mr. President, I can only speak from memory, but my recollection is pretty clear that the chairman of the subcommittee, the Senator from Missouri [Mr. SPENCER]—and I can not speak for him in his absence—was insistent and ready at all times to subpœna any witnesses suggested either by counsel for the defense or by counsel for the complainant or by members of the committee, and I certainly do not recall the name of a single witness who was not sent for. The introduction of that general resolution I do not question at all. It came before the full committee.

Mr. President, if I have the floor, I do not want to continue the discussion or to retry the Newberry case. It has been tried many times on the floor of the Senate; a vote has been taken and Senator NEWBERRY upheld as a Member of this body.

I simply rise to say just a word because the name of a very eminent divine residing in the State which I represent in part has been brought into the discussion, which was natural, because, seeking information, he wrote a letter to the Secretary of State, who at the time of the trial was of counsel for Senator NEWBERRY.

I resent any imputation as to the Reverend Doctor MacCauley's position in that connection. He has been a minister with a charge in the city of Paterson, I think I am correct in the assertion, for over 25 years. He is a minister who is widely known in New Jersey, and not only in the city of Paterson; a man far above and beyond any suspicion of wrong intent.

It is entirely justifiable that a minister should write the Secretary of State, of counsel, or whatever position he may hold, for any information concerning this much-discussed case; it seems to me entirely unjustifiable that there should be any inference of a wrong intent drawn from his writing that letter.

I do not know what inspired Doctor MacCauley to write the letter. I know nothing about it beyond the fact that the letter was written and the answer received, and upon unanimous consent being asked by me, with a clear explanation of what the letter contained, unanimous consent was granted to have it published in the RECORD. Is that request any different from numerous requests to have editorials and other matter bearing on political questions inserted in the RECORD?

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Missouri?

Mr. EDGE. I yield.

Mr. REED of Missouri. No one denies the right of a minister to write to Secretary Hughes, and no one has; but will the Senator enlighten us as to how this letter to this minister happened to be turned over so promptly to the Republican National Committee?

Mr. EDGE. I can not enlighten the Senator of any of the details of the eminent divine's inspirations, but I can see no evidence of a lack of good intention on the part of a minister or any other citizen in seeking such information. Maybe he was asked by some Republican to write the letter. I do not know; neither do I care. But even if he was it was entirely legitimate. It is information to which the country is entitled.

Mr. REED of Missouri. That is all anybody has said. Nobody has intimated anything against him.

Mr. EDGE. May I repeat, I do not know what inspired him, and do not care.

Mr. REED of Missouri. Nobody has intimated anything against the preacher.

Mr. EDGE. Yes, I think there were some rather slighting remarks made on the other side as to where he received his fee and his divine inspiration, or words to that effect.

Mr. REED of Missouri. Oh, no. If the Senator will pardon me, to clear this up——

Mr. EDGE. I am very glad to hear the Senator say there were no insinuations, because my only object in rising was to make clear and positive that Doctor MacCauley can not be justifiably brought in this matter as having any other interest than an interest in matters of public discussion as any citizen, whether he is a minister or a doctor or otherwise has a perfect right to have.

Mr. REED of Missouri. That is the only question that has been raised. The question of fee was only mentioned in connection with Mr. Hughes's fee, he having been counsel in the case, and no complaint is made about that. I presume the Secretary received a very good fee. I hope he did. I think it was a case where he ought to have received a good fee. He seems to have been willing to render his client very effective and good service in court, and he appears to be willing to continue those services after the case has been decided. We can make no complaint of that, and do not.

I am not criticizing the minister. The Senator states that he may have been asked to write this letter. I presume that is true, and I can see why the Republican National Committee would naturally want to have a minister write this letter. It would for the first time give an odor of sanctity to this case if the correspondence was carried on with a minister of the Gospel.

Mr. WALSH of Massachusetts. Was the letter of the divine printed in the RECORD?

Mr. REED of Missouri. No; the letter of the minister was not put into the RECORD, and it would be interesting if that letter——

Mr. EDGE. The letter of the minister was put into the RECORD by me with the letter of the Secretary of State.

Mr. REED of Missouri. I was not here when the Senator offered it. I am glad we have the complete correspondence.

We are threshing over old straw, but the Senator from New Jersey hauled it down to the machine and insisted on putting it through once more this morning when he introduced the letter of Secretary Hughes. Accordingly it is entirely proper to refer briefly to the situation.

Reading the letter of the Secretary of State with some degree of care, I find it is all aimed at one point, namely, that the court held Mr. NEWBERRY was not guilty of a criminal offense. That was held, I believe, by a majority of one vote, and the majority of the court so voting declared an act of Congress to be unconstitutional.

That has nothing whatever to do with the question of moral turpitude or of improper practices or of violation of the Michigan statute. It goes no further than to hold that Congress did not have jurisdiction to enact a positive statute making that a crime which was already a moral wrong.

The other members of the court held that the statute itself was constitutional, but that in the instructions given by the court or in various matters of procedure error had been committed. If there had been one more judge voting that the statute was constitutional, this case would then have been returned to the nisi prius court, to be there again tried. But, I repeat, the issue in the court was limited to the question of whether a crime had been committed under the law of the State or of the Nation.

That is not the question which now interests the public. The question which was to be determined by this body, the question which will be determined by the electorate of the United States, in so far as this case is pertinent to present political issues, is not whether a certain statute was constitutional or unconstitutional or whether the court erred in applying the law of the case, but the question is whether acts were committed in that election of so gravely wrongful a nature and character that the person elected by virtue of those acts should be entitled to a seat in this body.

That question is not answered by Secretary Hughes's letter. He makes no attempt to answer it, but, with the skill of a very skillful special pleader, he avoids it while apparently, to the casual reader, answering it.

But that question has been answered, and it has been answered by the practically unanimous vote of this body. Eighty-seven Senators voted upon the Newberry resolution. That is about as large an attendance as we ever find in this body. The necessary absences on account of sickness or other causes nearly always take out of this body eight or nine men. So we had a remarkably full session of the Senate. When we came to the vote, 41 Senators voted that Mr. NEWBERRY should not be seated at all. When those Senators voted that he should not be seated at all they necessarily voted that his office was tainted by acts of such immorality and corruption and bad conduct that he was not worthy to a seat in this Chamber, at least until he had obtained an election not thus tainted. That is the inevitable conclusion as to the 41 men who voted against seating Mr. NEWBERRY in the Senate under any circumstances.

There were 46 Senators who voted to seat Mr. NEWBERRY. The 46 Senators who voted to seat Mr. NEWBERRY stated the facts with reference to the Newberry case and solemnly found those facts to be true. What are the facts as recited in the resolution which these 46 Senators solemnly affirmed? They are as follows:

> The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free Government, such excessive expenditures are hereby severely condemned and disapproved.

Making allowance for the somewhat abominable English to be found in this last clause of the resolution, and boiled down it is a recitation that Senator NEWBERRY obtained his election by acts which are dangerous to the perpetuity of this free Government, that they are harmful to the honor and dignity of the Senate, and that they are contrary to sound public policy.

Every one of the 46 Senators who voted to seat NEWBERRY solemnly found those facts, solemnly recited those conclusions, and solemnly bound themselves in the public records to maintain forever the misconduct, the immoral conduct, which brought about the election of Senator NEWBERRY.

The PRESIDING OFFICER. The Senator from Missouri will suspend for a moment. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The READING CLERK. A bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

The PRESIDING OFFICER. The Senator from Missouri will proceed.

Mr. REED of Missouri. Mr. President, the Secretary of State may dip his brush in a hogshead of legal whitewash but he can not obliterate that finding of the Senate. He may split all the legal hairs he desires but the American people will take the unanimous finding of the Senate, for that is what we have, as conclusive evidence that the practices employed in the election of Mr. NEWBERRY were improper practices and as conclusive evidence that those who voted to seat him, after having recited that he had secured his seat by methods contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of free Government, branded themselves so indelibily that the legal whitewash brush of the Secretary of State can never wipe out that record or obliterate that stain.

Mr. President, it seems to me if I had voted for such a resolution, if I had written such an epitaph to my own honor, if I had characterized my vote in advance as an indefensible and infamous vote, I would keep silent. I would not introduce the subject again. I would hope that the dust of time might obliterate it from the memory of man, and I would trust that the recording angel would find some tear of sympathy great enough to blot it out of the records of eternity. Once a lawyer, always a lawyer, seems to be the maxim of the learned Secretary of State.

Mr. HEFLIN. Mr. President, there is no question that can come before this body which is more important to the body itself and to the American people than that of keeping the Senate above reproach and free from charges of graft and corruption here or in efforts to get here. In January last, seven months ago, the question was fought out here as to whether or not Mr. NEWBERRY was entitled to a seat in this body. Forty-odd Senators, Democrats and Republicans, voted to deny him a seat. By a strict party vote the Senator from Michigan [Mr. NEWBERRY] was seated and a resolution passed at that time condemning every act employed in his efforts to obtain a seat in this body. It has been read here to-day and has gone into the RECORD. It was stated at the time that the language had to be used in connection with the act of seating Mr. NEWBERRY in order to obtain three votes on the other side of the Chamber. The language that all of them agreed to vote for in order to carry out their program and seat Mr. NEWBERRY was as follows:

> That whether the amount expended in this primary was $195,000. as was fully reported or openly acknowledged, or whether there were some few thousand dollars in excess, the amount expended was in either case too large, much larger than ought to have been expended. The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free government, such excessive expenditures are hereby severely condemned and disapproved.

Now, the Secretary of State wrote a letter undertaking to exonerate Mr. NEWBERRY and those who voted for him. Mr. President, I regret that more than I am able to tell the Senate. I am exceedingly sorry that Secretary Hughes permitted him-

self to be dragged into the controversy. It will hurt his reputation. It will injure him with the people of the country. Secretary Hughes received a fabulous fee for defending Mr. NEWBERRY, charged with corrupting the vote of a sovereign State, charged with buying a seat in the greatest lawmaking body in the world. Mr. Hughes as a lawyer was employed in the case, accepted a fee from Mr. NEWBERRY, and after the case was disposed of the only thing that kept Mr. NEWBERRY out of the penitentiary was the declaring unconstitutional the corrupt practice act by the Supreme Court of the United States. That is all. If that act had been held to be constitutional and the verdict of the jury in the State sustained, Mr. NEWBERRY would have gone to the penitentiary instead of being given a seat in the United States Senate.

Mr. President, this is a very serious matter. After Mr. Hughes became Secretary of State, sitting at the head of the President's Cabinet, he was called upon to give a statement to condone the crime that had been committed not only against the people of the State of Michigan and the people of the United States but the Senate itself.

This occurred just before the campaign was on and the Republican Senators who voted to seat Mr. NEWBERRY must go back home and meet their people face to face. They will be asked, "Why did you use the power that we had given you to safeguard our interests to confirm the sale of a seat in the Senate? Why did you permit that man to buy a seat in the Senate as he would a seat on the stock exchange? Why did you by your vote sanction what he had done when the lieutenant governor of his State stated that he reminded Mr. NEWBERRY himself that the campaign being conducted in his behalf was the most corrupt in the history of the politics of Michigan; when ex-Governor Osborn, in his State, a Republican himself, told him that if he denied that he knew about it and was a party to it, he was a liar and an ass?"

A grand jury in Michigan thought the matter so grave and serious that it indicted Mr. NEWBERRY, and a petit jury of 12 men, composed of 11 Republicans and 1 Democrat, convicted him, and a Republican judge sentenced him to a term in the penitentiary.

I repeat, I am sorry that Secretary Hughes made the statement he did. I have been told that Mr. NEWBERRY paid Martin W. Littleton a fee of $50,000. I suppose he paid Secretary Hughes fully that much, and it may be more. Mr. Hughes had been at one time a justice of the Supreme Court of the United States, governor of the State of New York, and the Republican nominee for President. A man of his high standing and ability would command a big fee. Having been the lawyer in the case trying to keep Mr. NEWBERRY out of the penitentiary, I submit to the Secretary of State, to the Senate, and to the country that he ought never to have permitted himself to be dragged into this controversy and his statement used for political purposes.

Why did this man in New Jersey wait until seven months had gone by before he asked for anybody's opinion high up in the party's councils as to whether NEWBERRY was guilty of wrongdoing? What purpose did this man have in mind when the letter was written? Why did they not do it immediately after NEWBERRY was seated? Why did they not do it a month afterwards or two months or even three or four months afterwards? Why did they wait until senatorial candidates were going to the polls and the people were calling upon them to give an account of their stewardship and asking for an explanation of their Newberry vote? The Republican leaders know that men and women are saying, "I will not vote for any Senator who voted to confirm the sale of a seat in the Senate."

So they want to be able to say: "Oh, well, you see what Secretary Hughes has said. Secretary Hughes has given NEWBERRY a clean bill of health and said that this thing was all right." Tens of thousands and hundreds of thousands will never know that Mr. Hughes was a lawyer in the case and was paid thousands of dollars to defend Mr. NEWBERRY when he was on trial, when all the powers that the party could muster were brought to bear to seat Mr. NEWBERRY in this body, and did it by a bare margin of three or four votes. Borah, of Idaho, Kenyon, of Iowa, Norris, of Nebraska, La Follette, of Wisconsin, Jones of Washington, and one or two others, I believe, declined to vote for him. They said: "We can not stand for it; we will not stultify ourselves; we will not vote to seat this man who has expended a quarter of a million dollars to corrupt the voters of his State and buy a seat in this body."

Mr. President, what does the stand taken by Secretary Hughes amount to after all? Simply that what Mr. NEWBERRY did was all right; that a man may spend $200,000, $250,000, and more in a race for the Senate, as we claim that Mr. NEWBERRY did. They destroyed the stubs and the books which would have furnished the testimony to disclose the facts; they never presented them, and Mr. NEWBERRY himself never opened his mouth when the cruel charge hung over him for months that he bought his seat with money; he never once went before the committee and denied it; he never denied it on the floor of the Senate. Now the Secretary of State comes and says it is all right.

Mr. President, I submit that if that position is to be accepted the day is not far distant when no man, unless he has got big money himself or those whose subservient tool he will be put the money up for him, will have a seat in this body; the day is not far distant when this will be, indeed, the rendezvous of predatory interests and the counting room of tradesmen. God preserve the Republic against such a day.

Here come two candidates running for the Senate. One of them announces his principles and his platform. He wishes to do that which is best for the people of the State; he wishes to be the respected and trusted servant of the whole people; but he is a man of small means. Here comes another who is the agent of special interests; they put the money back of him; they fill the newspaper columns with stories boosting him and praising him. They secure his election with money; and the other man, the better man, stays at home. The lavish and wrongful use of money has been responsible for the success of the other candidate; money has been the direct cause of the defeat of the better man for the office; money has secured a seat in the Senate and merit has been left at home. That is the effect of the position taken by Secretary Hughes.

Mr. President, it is a deplorable situation which confronts us to-day. When I read the statement of Secretary Hughes I shook my head and said, "I regret that they have caused him to do that. The Senator from New Jersey [Mr. FRELINGHUYSEN] is a candidate for reelection to the Senate; he has to go before the people of New Jersey in November. They will pass upon him at the polls. Here comes a request from that State calling upon a man of high standing in the Nation to whitewash the conduct of the Senator from New Jersey. He voted to seat Mr. NEWBERRY; he is up for reelection and, no doubt, he wishes to be able to say, "Why, here is what Secretary Hughes says about it; he says it is all right."

Mr. President, little by little and bit by bit we are disclosing to the American people that the money power, unbridled and lawless, is more rampant in the country at this hour than ever before in the history of the Republic. Money, money! The center of gravity seems to have shifted to the money side of the Nation. The people who have big money seem to be able to secure nearly anything they want, including seats in the United States Senate.

Mr. President, I only intended to say a few words, but I wish to repeat that if the policy which Secretary Hughes's statement seems to lay down is to be followed a few years from now nobody but the mighty rich may fill places in the Senate. However, I shall not despair of the Republic; I believe in the patriotism, virtue, and intelligence of the masses of the American people, and at their judgment bar this fall we propose to present our cause, where free men and women, intelligent, upstanding American citizens shall have given to them the truth of conditions here. Let them pass upon them. When they come to vote I myself have no doubt what their verdict will be. I do not think they will return to this body Senators who voted here to seat this man NEWBERRY.

I feel very strongly upon this subject, Mr. President. I should like to see the sovereign States elect men to come here who would represent the varied interests of the Republic. I am not objecting to that; I should like to see a fair deal to capital, a fair deal for labor, a fair deal for the common mass. I believe in justice and right for everybody. That is what every one of us in this body ought to try to bring about—justice, pure and simple, for the whole people. We should stand for right principles, and I repeat, Mr. President, when the day comes that only the rich can have seats in this body this Republic will have reached the condition that befell Rome when the emperorship was sold to the highest bidder and public office became a matter of barter. Money! Money!

I have in my possession a letter now quoting a statement in one of the New York papers from one of the big profiteers of that city refusing to contribute, although a Republican, to the Republican campaign fund because the President did not reappoint W. P. G. Harding governor of the Federal Reserve Board. I have been saying here for two years that that man had rendered a service to Wall Street, had put into the pockets of those people not millions, or merely hundreds of millions, but billions of dollars; that by the deflation policy which he carried out he destroyed the business of my people and of the

people of the West and of the great Southwest. When the time came for his term of office to expire those papers howled for him editorially, and they assailed me for the fight which I had made for months and months against him. Now comes one of these purse-proud, pompous individuals of Wall Street, giving as one of his reasons for not contributing to the Republican campaign fund that the President did not reappoint the man who had held up the American masses and permitted the Wall Street interests to go through their pockets and pillage and plunder them.

Money in politics. There it is. Principle and right are flung to the four winds, while stress and emphasis are put altogether on the dollar. That selfish, crafty, avaricious buck just threw himself back in his Wall Street chair and said, "I will not give anything until they reappoint W. P. G. Harding. This man did business for us; and how we did feast upon the cotton producers of Alabama and all through the South; how we did feast upon the business of the average man; how we did feast upon the grain growers of the West and the cattlemen of that section; what a harvest it was for us! We sat back listening to the clink of our gold and clipping our coupons—a glorious time—hurrah for Governor Harding! We will hold him in and when his time is out we will have him reappointed." But the time came when it was known that they could not get him confirmed; that the President did not want to take the responsibility of appointing him in view of the record which I and others have disclosed here and elsewhere. Then this fellow, knowing the power of money in this day and under this régime, sitting back, closes his purse, draws the strings tight, and says, "The only way you can get into that thing now is to reappoint this fellow. You will not get any campaign contribution out of me until you do."

Then, Mr. President, we find the Secretary of State condoning, indorsing, whitewashing what was done in the State of Michigan, although a lieutenant governor denounced it as the most corrupt campaign ever carried on in that State, although an ex-governor of his own party rebuked it and called on the sitting Member to make a clean confession of it and said if he did not do it he was a liar. The resolution that seated him in this body—and I see some Senators here now who were not here a little while ago—said:

> That whether the amount expended in this primary was $195,000, as was fully reported or openly acknowledged, or whether there were some few thousand dollars in excess, the amount expended was in either case too large, much larger than ought to have been expended.
>
> The expenditure of such excessive sums in behalf of a candidate, either with or without his knowledge and consent, being contrary to sound public policy, harmful to the honor and dignity of the Senate, and dangerous to the perpetuity of a free government, such excessive expenditures are hereby severely condemned and disapproved.

That is what the Republican majority said. They said, "We are going to seat you, Mr. NEWBERRY; it is an awful job that we are about to do; we are going to hold our noses when we do it; we are going to condemn the vast expenditure of money that corrupted the people back home, the foul means that were employed to obtain a seat in the Senate, but, in spite of it all, the edict has gone forth to seat you, and we are going to seat you, but we denounce the tactics invoked and the machinery used to elect you." They said what the Mississippi jury said in trying a horse thief: "We, the jury, find the man that stole the horse not guilty." [Laughter.]

THE AMERICAN-VALUATION PLAN.

Mr. ODDIE. Mr. President, I desire to submit for the consideration of the conferees of the Senate and House of Representatives on the tariff bill (H. R. 7456) the following observations and suggestions for a compromise, in order that the measure may be enacted into law at the earliest possible moment before adjournment:

The first important issue facing the conferees is that of the basis of valuation. When the bill under consideration by the conferees was passed by the House all rates were based upon the value of comparable articles in the American market. As the Senate has amended the House bill and changed the basis of valuation to the antiquated system of foreign valuations of imported merchandise, it is obviously imperative that the question of valuation be considered and a compromise obtained which will accomplish what both the Senate and House desired, if this be possible.

I have given both the American and the foreign valuation questions careful study, and have come to the conclusion that both the Fordney plan and the McCumber plan should be displaced by another method of valuation, namely, the wholesale selling price of the imported article in the American market. This basis of valuation will overcome the administrative impracticabilties of the so-called Fordney plan, and it will correct the abuses of undervaluation and the unfair competitive advantages of the foreign producer, whose costs are measured in fluctuating paper currencies, abuses which make foreign valuation an insecure method of computing tariff duties. I would discard both the American-valuation plan as determined by the House and foreign valuation as chosen by the Senate.

In this connection I call the attention of the conferees to the very recent decision of the Board of General Appraisers in the St. Gall lace cases. I should like to offer for publication in the RECORD a brief synopsis of that case.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

DECISIONS BY THE BOARD OF GENERAL APPRAISERS.

(T. D. 39168—G. A. 8543.)

REAPPRAISEMENT OF ST. GALL LACES.

Merchandise exported by its manufacturers in St. Gall, Switzerland, for delivery to American purchasers at agreed prices, which include cost, freight, insurance, and duty, in fulfillment of orders, whether given and accepted by the manufacturers in St. Gall or placed with and accepted by the selling agents of such manufacturers in New York, is sold for export from Switzerland to the United States within the meaning of the language of section 302 of the emergency tariff act of May 27, 1921; and such prices, after deducting therefrom the costs, charges, and expenses, including import duties, incident to bringing the merchandise from the place of shipment in the country of exportation to the place of delivery in the United States, being higher than the prices at which such or similar merchandise is sold or freely offered for sale in the country of exportation, must be taken as the basis for appraisement.

Brown, general appraiser, dissenting, holds (1) that sections 301, 302, and 303 of the emergency act of May 27, 1921, deal only with sales in the home market of the foreign country for export to the United States, making them controlling if higher than sales therein for home consumption, where before they constituted merely part of the evidence from which "foreign market value" in the country of exportation was derived upon appraisement. This act did not radically change the basis of ad valorem value to a United States selling price from which to count back constructive value in the foreign market whenever the result of so doing would be higher than the sales therein for home consumption.

(2) For customs purposes the place where title passes determines whether a sale is made in the foreign market place for export to the United States or, on the other hand, in the domestic market of the United States, irrespective of other terms in the contract f. o. b. or c. i. f., or duty paid vel non, and irrespective of where the negotiations are conducted, and irrespective of whether the goods are sold from an existing stock or by the terms of an executory contract are to be manufactured.

(3) The sales here in question upon which appraisement is based are therefore not "export sales," but sales in the United States market, and the admitted foreign value for "home consumption" should control in taking duty. (United States *v.* Doherty, 27 Fed. 730, cited.)

Mr. ODDIE. This decision, coming at this time, is of vital import to Congress, because the board decided in the case of St. Gall laces, in view of all the frauds and disadvantages of foreign valuation, that the basis of determining duties on such laces shall be changed from foreign valuation to the value of these laces when sold wholesale in the American market.

As the Board of General Appraisers has made a long and careful study of this question of valuation, I believe that its recommendations and decisions in the St. Gall lace cases may be with wisdom embodied at this time in the proposed tariff bill as a basis of valuation. Certainly there can be no objection to levying duties on the basis of the wholesale selling price of foreign articles in the American market, either by the importer or the American manufacturer; and the conferees, I believe, can readily see that it will be easier to determine the wholesale selling price in the American market than it is today for the customs officials to determine the wholesale market price of imported merchandise in 110 different countries whose imports come into this country.

In other words, the decision of the Board of General Appraisers makes possible and points the way to a fair and just compromise between the Senate and House, and removes entirely the stumbling block to the original Fordney proposal.

The advantages of this method, which might be termed the wholesale valuation of foreign merchandise in the domestic market, may be summed up as follows:

1. All foreign nations, irrespective of the condition of their currencies or their costs of production, will pay an equal amount of duty on similar articles. Under the present system of valuation, for example, matches from Sweden, Japan, and Germany pay different amounts of duty because of the differences in the foreign wholesale prices. If our proposal were adopted, the amount of duty would be the same on all comparable articles produced by different countries.

2. As only about 12 per cent of our annual imports are subject to ad valorem duties, and therefore affected by foreign or American valuation, the basing of valuation on the wholesale selling price of foreign articles in the American market would not decrease the bulk of our imports.

3. This method of levying duties would greatly increase the amount of revenue to the Government, because it would make fraudulent invoices useless. Last year, according to the Treas-

ury Department, the customhouses had to advance in value over 6,900 invoices of foreign merchandise.

4. The simplicity of the suggested method of determining a basis of levying duties is obvious. The wholesale selling price of foreign merchandise is known to merchants and jobbers as well as to importers, and could be easily obtained by the Government.

5. The proposed compromise will make it possible for Congress to write lower rates of duty in the pending bill, and make the determination of duty more scientific and accurate.

6. Furthermore, it will make possible a much needed reform in our tariff legislation to overcome the costly disadvantages of foreign valuation both to the Government, the American consumer, and the domestic manufacturer.

In suggesting a compromise program of valuation to the conferees of the Senate and House on the tariff bill, I wish to call the attention of the Senate and the country to the organizations and individuals in the United States who indorse the principle of American valuation and who have petitioned Congress for the immediate enactment of a protective tariff.

Less than two years ago a member of the United States Tariff Commission recommended to Congress the substitution of American valuation as a basis for levying ad valorem tariff duties for the present method of foreign valuation. Since that time several hundred of the leading business, industrial, agricultural, and labor organizations and associations have indorsed the principle of American valuation. On August 1 of this year the American Valuation Association of New York published a book of 1,133 pages containing resolutions, letters, and memorials, and the names of the leading organizations in this country which have voluntarily indorsed the program of that association, namely, the the immediate enactment of a protective tariff based upon the principle of American valuation.

This volume contains the names of organizations and individuals from every State in the Union, and each name is backed by the signed indorsement of the bank, newspaper, manufacturer, business man, farmer, or worker.

In presenting this book to the attention of Congress the association states:

> The compilers of this volume respectfully urge your attention to the vast number and the high character of the indorsers of American valuation named in the following lists. The personnel of these organizations and enterprises, including business executives, agriculturists, the leaders of labor, and public officials, speak with the authority of intimate participation in essentially American endeavors. They speak the voice of America. They are equally the producers and the consumers of the country. They furnish the capital for industry, they direct the industrial activities, and they perform the labor of the Nation in every field of human effort.
>
> They know from experience that the prosperity of the United States depends primarily upon our home market. The tariff is our national prosperity insurance. American valuation makes this insurance valid.
>
> The compilers regret that it has been necessary to abridge these lists in order that they may be placed before you in a manner convenient for your review. The indorsers in some States are so numerous that it has become necessary to indicate them by numbers, although the signatures are all on file for inspection. At the time this volume is given to the printer, each day is adding hundreds of names from every corner of the United States urging the immediate passage of the tariff law with the American valuation principle.
>
> An examination of the general lists and the specific State lists will disclose the fact that the indorsement of American valuation is national and not sectional; that it is supported by an array of producers, industries, labor organizations, and thinkers unparalleled in any previous public expression on tariff legislation. Especial attention is called to the tremendous support it has received in the Democratic South.
>
> These indorsements are, both as to character and volume, evidence of a well-founded conviction that the principle of American valuation is based upon necessity, and is sound. It is nonpartisan. It has drawn to itself wholeheartedly the most widespread approval ever given to any proposed modification of administrative practice urged in connection with a tariff issue in this country.

Twenty-four pages of the book contain the names of organizations indorsing American valuation, organizations extending from the Aberdeen Commercial Club, of South Dakota, to eight international labor organizations, from the Actors' Equity Association, with its 18,000 members, to the 130,000 members of the Painters, Paper Hangers, and Decorators Union, of New York. Among manufacturers there are the Associated Manufacturers of Electrical Supplies, of St. Louis, employing 45,000 workers; the National Association of Manufacturers; the Associated Industries of Maine, Massachusetts, Montana, Washington; the California State Manufacturers' Association; the Braid Manufacturers' Association of the United States, employing 35,000 workers; and the Consolidated Tariff Committee of Cotton Manufacturers, of Massachusetts. Among farmers and agricultural producers there are such formidable organizations as the National Milk Producers' Federation; the National Agricultural Conference, which met in Washington last January at the call of President Harding; the National Wool Growers' Association, of Salt Lake City, Utah; and the poultry and dairy interests of many States.

As copies of this book will be distributed to each Member of the Senate, it will not be necessary for me to speak of the indorsements of individual States. Each Senator will find, however, the names of leading organizations and associations in his own State which are on record in writing indorsing American valuation.

In suggesting, therefore, to the conferees of the Senate and House a compromise between the original Fordney plan and the foreign-valuation program of the Senate, I feel that I can express the sentiment of these hundreds of thousands of the leading industrial, agricultural, and labor organizations in the United States who ask Congress to base tariff rates on the principle of American valuation.

The principle which I have outlined in my compromise proposal, namely, the levying of tariff duties on the wholesale selling price of the foreign article in the domestic market, I believe will meet the expressed wishes of the leading producers in the United States, who need the protection of American laws to enable them to compete with every other country in the world in the American market.

I ask unanimous consent to have printed in the RECORD this synopsis of these organizations, with a number of petitions from organizations and individuals.

The PRESIDENT pro tempore. Is there objection?

Mr. CURTIS. Mr. President, I object to the printing of the entire petition. If the Senator wants it noted in the RECORD and referred to the Committee on Finance, I have no objection; but that petition has been sent to the various Members of the Senate, and there is no use in burdening the RECORD with it.

Mr. ODDIE. Mr. President, I ask the Senator from Kansas if he would object simply to the list of the organizations being printed, with the number of the members?

Mr. CURTIS. It would depend upon how long it is.

Mr. ODDIE. It is just a few pages long—a very few pages.

Mr. CURTIS. I object to it. Let it be noted in the RECORD and referred to the committee.

Mr. ODDIE. Mr. President, I should like to state that this list of organizations is as follows: For instance, the Aberdeen Commercial Club, Aberdeen, S. Dak., with 466 members; and it goes on and gives the names of hundreds of the leading organizations in the United States. I should like to have the Secretary read this statement.

The PRESIDENT pro tempore. Is there objection?

Mr. CURTIS. I object to the Secretary reading it. Let the Senator read it himself in his time.

The PRESIDENT pro tempore. The Senator from Kansas objects.

Mr. ODDIE. The Aberdeen Commercial Club, Aberdeen, S. Dak., with 466 members.

The Actors' Equity Association, New York City, N. Y., with 18,000 members.

The Akron Merchants' Association, Akron, Ohio, with 110 members.

The Alder Commercial Club, Alder, Wash.

The Alexandria Chamber of Commerce, Alexandria, La., with 300 members.

The Allentown Chamber of Commerce, Allentown, Pa., with 650 members.

The Allied Lace & Embroidery Manufacturers, West New York, N. J., with 900 members.

The Allied Printing Trades Council of Philadelphia, Philadelphia, Pa., with 15,000 members.

The Alpaugh Board of Trade, Alpaugh, Calif.

The Amalgamated Association of Street Electric Railway Employees, Division 459, Bridgeport, Conn., with 475 members.

The Amalgamated Clothing Workers of America, Local No. 208, Vineland, N. J., with 515 members.

The Amalgamated Lace Operatives of America, levers section, New York City, with 2,100 members.

The Amalgamated Lithographers of America, New York City, with 5,846 members.

The Amalgamated Lithographers of America, Local No. 17, San Francisco, Calif.

The Amalgamated Meat Cutters and Butcher Workmen of North America, Local Union No. 207, Danbury, Conn., with 75 members.

The Amalgamated Sheet Metal Workers' International Alliance, Local No. 114, Bridgeport, Conn., with 100 members.

The Amalgamated Sheet Metal Workers, Local No. 221, International Alliance, Vallejo, Calif.

The Amalgamated Sheet Metal Workers, Local Union No. 225, New Haven, Conn., with 100 members.

The Amalgamated Society of Carpenters and Joiners, No. 1909, San Diego, Calif.

The Ambridge Board of Trade, 808 Maplewood Avenue, Ambridge, Pa.

The American Cotton Manufacturers' Association, with 1,025 members.

The American Association of Flint and Lime Glass Manufacturers (Inc.), Pittsburgh, Pa., employing 10,000 persons.

The American Association of Woolen and Worsted Manufacturers, New York City, with 204 members.

As I do not want to take the time of the Senate to read all, I will just state the names of some of the largest ones.

The American Federation of Labor, Philadelphia, Pa., with 150,000 members.

The American Feed Manufacturing Association, Chicago, Ill., with 25,000 members.

The American Flint Glass Workers' Union, Toledo, Ohio, with 60,000 workers.

The American Honey Producers' League, San Antonio, Tex., with 800,000 producers.

The American Mining Congress, Washington, D. C., with 4,000 members.

The American Wire Weavers' Protective Association, Holyoke, Mass., with 10,000 workers.

The Asbestos Manufacturers' Association, Ambler, Pa., with 50,000 to 75,000 employees.

The Associated Advertising Clubs of the World, New York City, with 15,000 members.

Mr. President, if I had the time I could go on and name hundreds of the leading organizations and industries in the United States, with many hundreds of thousands of members, contained in this list that have urged the adoption of the American-valuation plan.

COMPENSATION OF WORLD WAR VETERANS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from New Mexico [Mr. BURSUM].

Mr. UNDERWOOD. Mr. President, I desire to address myself for a few minutes to the pending bill.

The bill is entitled "A bill to provide adjusted compensation for veterans of the World War." Of course, this does not mean that the Government of the United States has not lived up to its contract with its soldiers and has not paid them the wage and other compensation that it contracted to pay them when they entered the service. It means, so its advocates say, that it intends to adjust the compensation that they received as soldiers during the war with the compensation that other men received when they stayed at home. That is the argument. Of course, the bill does not do that. The bill provides that our soldiers shall receive $1.25 a day for the time they served abroad and $1 a day for the time they served at home, in no event to exceed $500 for those who served at home or $625 for those who served abroad.

Mr. President, the soldiers during the war were paid $1 a day. Those in foreign service, I believe, received something in excess of that. In addition to their pay, they received their clothes and food and maintenance. A number of other allowances were also given to them by the Government. In the cases of men who had families or dependent relations, the Government made allowances to the wives or dependent relations at home. So the compensation actually allowed to the soldiers during the Great War was far in excess of $1 a day or $30 a month. If you take into account the allowances for families, the furnishing of clothes, quarters, and food, it amounted to as much as many of the men received who remained at home and worked.

Of course, I do not mean to say that this wage compared with the wage of the young mechanic, trained in his business, who worked in the shops or foundries which were producing war material.

The young mechanic not only received a great deal more than the soldier received, but he received a great deal more than the soldier received plus the compensation you propose to give him through this bill. He received that wage because he was a skilled man in a special trade whose services were in great demand during the stress of the period of the war, because we were short of trained mechanics, and without trained mechanics we could not manufacture guns, or ammunition, or automobiles, or flying machines, or any of the other supplies which had to be sent to the front in order that the fighting man might combat the enemy.

But if the average fighting man had remained at home he would not have received compensation equal to that of the skilled mechanic, because comparatively few of them were trained mechanics—if you took the run of the men of military age the number who were trained mechanics would have been small. And we must bear in mind that on account of the great need for skilled mechanics in the factories and foundries of America during the period of the war the Government of the United States exempted the skilled mechanic from service in the Army, and told him that he could serve his Government better by remaining at home in the foundry or the machine shop. Of course some went, but they did not go because they were compelled to go under the draft; they went, not for the dollars in the service, but they went to the front because the patriotic spirit in their breasts compelled them to follow their flag where the fighting was hottest.

So, in analyzing this question of adjusted compensation, we must take all these points into consideration. A vast number of the young men who served in the Army were not trained in trades and had no professions. Many of them were farm boys, and if you compare the wage they received in the Army, after all their expenses had been paid and allowances made for their families, with the wage that the farmer boy got on the farm during the war, where he had to pay his own expenses and meet the high cost of living during the period of the war, I do not think there would be much difference between the two classes of men so far as the actual compensation they received was concerned.

Of course there were men in the ranks who made great sacrifices to be there, men who left trades or professions or business at home which paid them far in excess, not only of their pay and allowances in the Army, but far in excess of what the young skilled mechanics received at home. There were young men in the Army who sacrificed five and six thousand dollars a year by serving for $30 a month and the allowances. Nobody can contend that men of that class will have their compenstion adjusted by our paying them an additional $625.

So, in fact, Mr. President, although this bill is called an adjusted compensation bill, it is not. It does not adjust the compensation if you consider the individual cases. In many cases a man who served received as much in wages and keep in the Army as he would have received if he had stayed at home. On the other hand, there were many men in the ranks who received at home, before they went to war, and would have received if they had stayed during the period of the war, ten times as much as their soldier's pay and allowances with the five or six hundred dollars added. So this is really not an effort to fairly return to the men who served the difference they might have earned if they had remained at home and not served in the ranks.

I think the bill has been properly named by the public. I do not say this in any way to reflect on the bill or those who are the beneficiaries of it, but I state it merely as a matter of fact; it is not an adjusted compensation bill; it is a bonus bill. It is a proposal to give the soldiers who served during the Great War compensation additional to that which the Government agreed to pay them, amounting, in some instances, to as low as a few dollars, on account of the short length of the service, and in the extreme case not to exceed $625.

Far be it from me to say that if the services of these men can be measured in dollars, $625 is too much to give them. If you are going to measure men's services to their country, when they offer their lives as sacrifices, in mere dollars, then to my mind to offer them, on that standard of measure, $625 is an absurd proposition. I know I would not have been willing to be shot at for the Army pay and allowances and $625, if that was all that was involved. I hope that if I had been of the military age I would have had the courage and the patriotism to serve my country in the ranks; but I would not have served it for dollars. If I had served it, I would have served it because I felt that it was my highest duty in life to to defend my country against an enemy's assault, to defend the homes of my family and my people, to protect the great free institutions of Government which have descended to us from our fathers through generations. That is why I would have been willing to serve my country, if I had served, and I believe that is the reason why every man who followed the Stars and Stripes in the Great War served his country, and not for the pay he should receive.

So, to my mind, I can find no reason why I should vote for this bill to adjust a soldier's pay, and I see no reason why I should say that a dollar a day for service by way of a bonus is an adjustment of that great debt which a generous people must always owe to the gallant men who carried their flag in the stress of war.

Mr. President, I have voted for many pension bills for the survivors of many wars during my service in the Congress. I have voted for pension bills to pension men who received in-

juries on the battle field. I have voted for pension bills to pension men who returned home sound and well, but who, by reason of their infirmities of age, their poverty, their inability to take care of themselves, would have been charges on the public if the Government of the United States had not been willing to provide suitable compensation to its old soldiers who needed the Government's aid in the failing days of their lives.

But, Mr. President, since I have been a Member of the Congress of the United States there is one class of pension bills for which I have always refused to vote, and that is what is known as the service pension. I have been compelled at times to vote against a service pension bill in the past under very embarrassing circumstances, but I have always done so. When the war has passed and the decades have gone by some are fortunate on the battle field of life and have acquired competencies and some have grown rich. Others have fallen by the wayside, often without any fault of their own. Sickness or losses or misfortunes have found them tottering to the grave without any sustaining hand to help them. Then is the time, in my judgment, when a great government should remember its soldiers, when a great government should say that the men who have defended its flag are a class unto themselves and that their government will not let them in the time of dire distress fall by the wayside.

But is there any obligation on that same government for the same service to pay to the man who has been fortunate and has a compentency, who has possibly great wealth, that we shall give him also the pittance of a pension to throw away, with which to buy his cigars, money which he does not need, but which is needed by his less fortunate brother in arms? Because, if we do that, there is an end always to the credit of the Government, to its ability to expend, and when we give to him who needs not our help we reduce our ability to take care of the men who really need it.

Therefore I have never believed in a service pension. A pension for injuries, a pension because of need, is a different thing from saying that simply because a man served his country he must be paid in dollars. Dollars, in my judgment, are the last medium through which we can justly pay the men who served their country on the battle fields of France. We can pay them by giving them preferences, as the Government has already done. We can pay them by remembering their service, giving them credit for it when they seek the honors of life in the civil pursuits of their business, their professions, or the high offices of the Government. But to say that we can pay a man in dollars for service is abhorrent to my idea of the high standard that we should have in mind when we seek to reward the man who stood ready to give his all for our country's sake.

Service, Mr. President, should be the greatest ideal of life in any country, and service to a free Republic, service to a Republic that guarantees the liberty, the lives, and the happiness of its citizens is the greatest honor that any man can render unto himself if he is given credit for that service in the hearts and minds of his countrymen.

As I said, I have never voted for a service pension bill and I never shall. I can draw no distinction in my mind between the so-called adjusted compensation bill and a service pension bill. It is not given to the man because he was wounded. It is not given to the man because he suffered injuries on the battle field. It is not given to the man because, since he came out of the service, he has met with misfortune and is sick and in distress. It is given to him merely because he did his duty, responded to his country's call, and offered himself as a sacrifice. As I said awhile ago, that service can not be measured in dollars. It is too great a service to measure in dollars of the Government. No matter whether it is $600 or $6,000 it can not be measured by that standard. It is given to him merely for service.

Mr. President, some of the men need the money; some of them are wounded and in distress. So far as I am concerned, I am willing to go to the limit, and I have in my votes in this Chamber gone to the limit to provide for the men who need their country's help. But why should I vote to take money out of the Treasury and give it as a largess to men who do not need it, who returned home well and sound, without injury to body or character or standing, who have gone back into the civil fields of life and are forging ahead as young Americans should, making their places in the life of the Nation. Why should I give them the pitiful sum of $600 and say, "Take this in payment for the great sacrifice you offered to your Government. You do not take it because you need it. You do not take it because you are worse off than when you went to war. But you take it as a return for the greatest act that any man could render to his country. You offered your life for your flag and your Nation. I give you $600."

Mr. President, I do not say this in criticism of those who do not agree with me. I do not say it in criticism of the soldier or those who advocate the soldiers' cause. I only say it for myself. I can not say to the soldier boys who served on the battle fields of France, who were near and dear to me, that I offer to pay them in dollars for their sacrifice. I can never vote for a bill which asks me to do that. Others may look at the question from a different standpoint, view it from a different angle, but as for myself I owe something to those who went to the battle front, who were near and dear to me, and I can not say this to them.

But, Mr. President, it is not merely the question of our paying these gallant boys. They served their country well in 1917 and 1918, and I know that they are ready to serve their country well in the years which are to come. They are the men who are now becoming the sustaining pillars of the Nation's strength, not in war but in peace, not in arms but in the civil fabric of our Government and its great principles. They are the men who must shape the course of the Nation in the years to follow. They are the men who must carry the burdens of the Nation in the decades to come. They are the men who must be responsible in the future for the safety and the happiness of the Nation. Some of them I think understand the problem which confronts us. Many of them have not given it a further thought and think that this is a gift from their Government for services well performed.

But, Mr. President, there is this problem that will confront these very young men, these soldiers of ours, in the decades yet to come, and that is the safety of their Nation. If we contract the indebtedness necessitated by the passage of the pending bill, which it is estimated by some will amount to $4,000,000,000 and by others to $7,000,000,000, as the years go by the burden of that indebtedness will fall on the men who served as soldiers and to whom we are to give the money now; they will have it to pay in the years to come, with interest piled on interest; but that is not the principal objection to it. So far as I am concerned, if I could vote for the bill at all, I should prefer to vote for a bill that would let this generation pay the tax rather than in the future to put it on the soldier who will receive the money, as the bill now pending does; but, as I said a while ago, I would not vote for a service pension bill under any circumstances, and therefore I would vote against such a bill in either event. I think, however, in ordinary fairness, if we are going to pay these men we should let those who earned their money and prospered during the war pay the taxes instead of passing a bill under which in the years to come those who may be prosperous among our soldiers will have to pay the cost out of their future prosperity.

That, however, is not the main objection that I wish to impress on those who are kind enough to listen to me. Mr. President, the first duty we owe, just as these soldiers recognized that the first duty they owed, is to our Government and our country. The first principle that we must have in mind in serving our Government and our country is our country's safety for the future. We must bear in mind that the conditions of war to-day are not the conditions of war which prevailed a hundred years ago, nor even 50 years ago. All the conditions of waging war have changed, not merely on the battle field but as to a nation's ability to maintain war and to defend itself by force of arms. There was a time, a hundred years or more ago, when the material factor in carrying on war was the man strength of the nation; the ability to put a certain number of men in the ranks with whom to fight the war. The question of equipment and arms was a secondary matter. But conditions have changed. As time rolled by it became not merely a question of a nation's strength and its ability to command the number of men who should serve in the ranks but an equally important factor entered the equation, namely, the nation's ability to supply those men with arms, swords, guns, and cannon, equipment with which to fight the battle of their nation. In former days the cost of equipment was not so great an item. During the War between the States, I think, in the Union Army there were 2,000,000 men; they were supplied with the equipments of war; and yet when the war ended the Nation owed only $3,000,000,000 on account of the expenditures which had been incurred to carry on a war of four years' duration.

Coming down to the great World War, in which we were engaged for less than two years, when we came out of it we found ourselves in debt to the extent of something over $25,000,000,000. Why? Not that it was any more difficult to put 2,000,000 or 4,000,000 men in the field or that the expense of the maintenance of those 4,000,000 men was so great, but war had become an industrial battle as well as a battle of arms, and the preparation behind the industrial column had grown vastly expensive in order to equip our battle

line with improved guns, tanks, flying machines, supplies, and everything else necessary to make the soldier successful on the battle line. If the war had continued for two years longer, we should to-day have been in a grave position as to where we should have obtained the money with which to pay our debts. Fortunately the war was over before the indebtedness growing out of the war had reached such proportions that the American people could not put the burden of the indebtedness on their shoulders and carry it.

What, however, of the future? What does the future hold? I hope there may never be another war; I have used every effort I could when the opportunity afforded itself to insure the guaranties of peace, but, nevertheless, I know that we may try to put wars behind us, to make them difficult of prosecution, to avoid them for longer periods of time; but so long as human nature is constituted as it is, so long as the conflicts of commerce continue to be possible, so long as peoples desire to push themselves onward, forgetting sometimes the rights of others, causes of war will arise, and in the end war will occur again. Then, Mr. President, I ask, Are we as prepared to meet war to-morrow as we were on yesterday?

It may be said that the 4,000,000 men who responded to the country's call are still here. Some may have dropped by the wayside, but their younger brothers have stepped forward to take their places. It may be said that a great industrial column, our furnaces, steel plants, and machine shops are still here ready to supply the equipment of arms. Yes, that may well be said, Mr. President, and it is true; but the third equation is lacking. Successful war to-day must be carried on with men, with industrial organization, and with credit. No government can carry in its coffers sufficient gold to fight a war. It can only fight its wars on its credit.

In 1917, when this great Government of ours went to war with Germany, we had a virgin credit. It is true that we may have owed something like a billion dollars; but it was a mere bagatelle as compared to our great resources. To-day, however, Mr. President, we owe over $22,000,000,000, and it is proposed by this bill to increase that indebtedness by four billion or seven billion more—and I think $7,000,000,000 are nearer the mark than $4,000,000,000. It is proposed to increase it by passing this bill and to make the indebtedness of the United States nearer $30,000,000,000 than $22,000,000,000.

What effect will that have on the national defense? It may be said that the American people are patriotic; that they will again respond to their country's call. Mr. President, it must be borne in mind that when the American people went into their pockets and bought bonds to the extent of $25,000,000,000 they had untapped reserves at hand—their earnings for the decades that were passed. I do not refer to a few rich men here and there, for if they had given their all it would not have amounted to much in the great reservoir of credit we had to command; but the World War was not fought by the dollars of the millionaire; it was fought by the dollars of the great masses of the American people, the people who gave their hundreds and their thousands to carry the country's flag to victory. You have now put the burden of taxation on those people when you gather from their surplus earnings much of what in the past went into the reservoir of savings that could respond to their country's call, and have taken it out of the equation, because you have to use it to pay the debts of to-day.

Mr. President, does any man imagine that if we had owed an indebtedness of between twenty-five and thirty billions of dollars when we declared war against Germany in April, 1917, we could have ever raised the money to build the fleet to carry our soldiers across the sea, to build the guns and the camps and the equipment, to spend money without counting the cost in order to accomplish the miracle of the ages, and put 2,000,000 men in France, 3,000 miles away from their homes, within the space of a little over a year? It would not have been possible, Mr. President, if it had not been that the credit of our Nation was a virgin credit and not burdened with a vast indebtedness.

I say the hour has come for the Nation's safety, the safety of the future, when men who hold a responsibility in public life must bear in mind that it is not merely a question of taxation when you expend money but that it is a question of preserving the safety of your country.

You may say that this does not apply only to a soldiers' compensation bill but that it applies to other matters. It does, Mr. President. It applies to all other expenditures equally as well as it does to this bill, but, of course, this bill is providing for an indebtedness far greater than all the others put together, an indebtedness that may grow; and if these soldier men of ours realized the position in which this bill will put them a decade from now, when they come to a command rank in life—and many of them have already reached it, but I mean as a class—when they come to a command rank in the civil walks of life, when they come to the responsibility of looking after this great Government and carrying its burdens and protecting it against foreign foes and all other dangers, I do not believe that they themselves would approve of a bill which has as its purpose the payment of from four to seven billions of dollars to men who came home whole, without injury, because, even though it goes to some of the injured, they are compensated in another way as well, and they are not given this money for injuries received. I do not believe they would approve of it.

No, Mr. President, these soldiers of ours do not have to be paid in dollars to reward them for the services they rendered. They came back home wearing the crown of a great Republic. They have rendered a service that you and I, Mr. President, might be glad to lay down the honors that the American people have granted us to render, for to be able to say that we had served in the ranks on the battle fields of France to serve our country is the highest honor that can come to any man.

The PRESIDENT pro tempore. The question is upon the amendment proposed by the Senator from New Mexico [Mr. BURSUM].

Mr. WADSWORTH. Mr. President, I assume—in fact, I am well aware—that the Senator from New Mexico [Mr. BURSUM] desires to discuss the amendment which he has proposed to this bill, and as that amendment is the pending question I do not intend at this time to discuss at any length the bill or the principles involved in it. However, as I sat here listening to the Senator from Alabama [Mr. UNDERWOOD] and certain of his observations concerning the pride which young Americans should take, and in my judgment and in his judgment do take, in serving their country in a crisis, I could not help recollecting a passage in the address of the Senator from North Dakota [Mr. MCCUMBER], delivered upon yesterday. I desire to read it to the Senate, not that it has much to do with the merits of this bill, but as indicating the kind of argument which in part, at least, is used in support of the measure. It will be found on the bottom of page 12721 of the CONGRESSIONAL RECORD of Wednesday, August 23. I quote:

> In these times of great unrest, of lawlessness heretofore never heard of, of crime rampant throughout the land, when the sacred rights of life, liberty, and property are being denied and defied as never before in the history of our country, to whom in the end must we look for the final arbiter between individual right and mob power—between the supremacy of law on the one hand and the supremacy of anarchy on the other? We must look to those very boys who stood for their country on the field of battle—who carried its flag and whose comrades died for its honor. We must look to those boys, the constitution of whose organization—

Meaning the American Legion—

> declares:
>
> For God and country we associate ourselves together for the following purposes: To uphold and defend the Constitution of the United States of America; to maintain law and order; * * * to inculcate a sense of individual obligation to the community, State, and Nation to combat the autocracy of both the classes and the masses; to safeguard and transmit to posterity the principles of justice, freedom, and democracy.

The Senator from North Dakota then continued:

> Let me tell you, Mr. President, that we will need these boys with their loyalty to country and Constitution and the sacred rights declared by the Constitution; we will need them more—a thousand times more—than we will need the few dollars we would save by denying this little element of justice.

Mr. President, what is the inference to be drawn from that portion of the address of the Senator from North Dakota? What is the only inference that may be drawn from the inclusion of a declaration or suggestion of that kind in an address upon this bill, soon to be voted upon in this body? The only inference that I can read into it is that if the bonus bill is not passed, in time of crisis, grave, widespread public disorder should their country call upon them these men will not, or there is danger that they will not, respond.

Mr. President, I have no such low opinion of the veterans of this war as would lead me to suggest such a thing either in public or in private. I can not comprehend how such a suggestion could be uttered upon the floor of the Senate or in any public place, indicating as it does a suspicion, at least a fear, at least a doubt, at least as to the loyalty of these men to their country and its institutions, indicating as it does that it would be wiser and safer, in view of possible crises which might overtake the country, for us to pay them an average of three or four hundred dollars.

I know full well that no supporter of this bill can bring himself conscientiously to suggest even indirectly an argument of that kind in its support; and I know full well—yes; even better, for I have more confidence in these men themselves and in their instincts, in their spirit—I know full well that they will never subscribe here to-day, or at any time in the future, as long as they may live, to any such suggestion as that. I take

this occasion, however, to point it out as apparently being deemed important enough by the principal supporter of this bill to be suggested to the Senate as an argument in its behalf and as indicating still further that character of argument which has upon more than one occasion in public and in private been used to gain votes for this proposition.

For one, regardless of the merits of the bill itself and all discussion of its merits, I utterly repudiate it. It can not be true. Therefore, it is not worthy of a moment's consideration.

Mr. HEFLIN. Mr. President, of course these boys who offered to die for their country would not desert it in any crisis. They have shown that they would not do that. They have offered to make the supreme sacrifice. When I think of the treatment that is sought to be accorded to them by some of the interests in this country I am reminded of what Job said under great affliction:

Though He slay me, yet will I trust in Him.

Though there are powers in the country who would deny these boys the bread and the meat that is necessary to keep them alive, the funds necessary to provide shelter for them, these brave boys will suffer and endure, and if a crisis should come upon the country they would respond again.

But I take the position that the great mass of the American people do not stand for the doctrine which would deny to these boys simple justice in the form of adjusted compensation. I believe that if you could stand up the men and women of this country around the Republic, and ask them face to face, "Are you in favor of giving adjusted compensation to our soldiers," at least five out of every six in the Republic would answer in the affirmative.

Senators, there never has been such propaganda carried on as certain big interests are now carrying on in this country against adjusted compensation for the American soldier. Newspapers are being filled with arguments against it. Literature opposing it is being sent broadcast over the country. They are doing everything in their power to defeat this measure.

I accord to every Senator the same right to his opinion that I claim for myself, but I can not keep from recalling what happened when the profiteers of our country, who sold material to the Government in the hour of its peril not at cost, nor even at a small profit, but at prices that took extortionate profits from the Government, and they received the money as the material was provided, and when the war suddenly ended, and while their industries were running full time, accumulated material lay about the premises, the Secretary of War and the Secretary of the Navy said, "We do not need any more material." Perfect droves of them came to Congress and presented their bills for material they had around their factories, for material we could not use, for material that in some instances we never moved off their premises, but left with them to dispose of as they saw fit. This Congress paid to them hundreds of millions of dollars, and not a protest came then from any man who now opposes adjusted compensation for the faithful and yet needy soldiers of the country.

When these men stood here at the door of the Capitol, not willing to yield a point or sacrifice a dollar to help their country, already burdened by war debts, but demanding that they be permitted to run their arms into the Treasury up to the pit, I did not hear any of these Senators protesting then, not one. I did not hear any of them say then, "You sold the Government a vast amount of material. When you started to supplying this material you had but little capital. The Government has already paid you five or six million dollars. You have made out of the Government clear profits amounting to more than $3,000,000. You have been made a millionaire by what the Government has already done for you. The Government can not use that material that you ask pay for. You are a patriot. Will you not give that to your Government, which owes billions of dollars for the conduct of the war?"

The profiteer shook his head. He did not heed the suggestion, but capitalized his patriotism and demanded the pound of flesh from nearest the heart of his Government, and you ordered it cut out by the appropriations of Congress, paid him every dollar that he demanded, and he went his way rejoicing. Not a dollar of indebtedness remained unpaid by the Government to that band of profiteering marauders who held their country up in the time of distress and peril.

They, I presume, are your patriots. You pat them on the back. They stand, swell-chested, before the country now and denounce adjusted compensation for the soldier as an effort to capitalize patriotism. They open their purses and take out money ill gotten from the Government to hire printing presses to run day and night in order to flood the country with their arguments against adjusted compensation for an army which bared its breast to the most destructive war implements ever devised in all the history of human warfare.

I have met upon the streets of Washington some of those boys, and out of my humble means have contributed to help furnish them a place to sleep and something to eat—boys who wore the uniform of my country, carried their guns and battle blades to the firing line in France, and offered to die for me and my country, the greatest Government on the globe. Then we hear men say that they will cheapen their heroism and capitalize their patriotism if they ask for something upon which to live and for shelter to protect them from the storm.

Senators, the people are not going to be deceived about this matter. When the Senator from North Dakota made the statement to which the Senator from New York has referred, he meant that it was even bad policy for the Government to mistreat, deny justice to, and break the morale of these men. The brave spirit and morale of these soldiers are worth more to the Government than the amount of money required to grant them simple justice.

Do you know what it means to so mistreat and refuse justice to the man who loved his country so well that he was willing to walk out where death was raining all around him and offer his life for his country? Imagine yourself in the position of a soldier returned finding those in charge of Congress pursuing a policy that closes industries and you can not find employment, and no plan is devised by which you can even have your claim against the Government adjudicated. What would you think about the sense of justice reposing in those who would treat you in that manner? It is wrong to do anything to shake the faith of one of these brave boys in the respect, love, appreciation, and unfailing gratitude that the Government holds for him.

Senators, it is a crime against every one of them and a crime against the country to do it. You know what the Master said. It were better that a millstone were hanged about your neck than that you should offend one of these little ones. He meant by that that you should do nothing to disturb or undermine their implicit faith and abiding trust.

Mr. President, I am not going to discuss this question now, but I want to make one more statement before I close. What I have said came to my mind in response to the speech of the Senator from New York [Mr. WADSWORTH].

We have loaned to the Allies $10,000,000,000. It amounts now to more than $11,000,000,000 with interest. That would pay half of our war debt. If we collect that, we will have reduced it to $11,000,000,000, and in a great and rich Nation like ours if you turn loose the business instrumentalities of the country, let the people work, let business breathe and live, and let the masses have an opportunity to produce prosperity, as they did in other days not far behind us, it will not take long to clean up that other $11,000,000,000. But the Allies owe us $10,000,000,000 with interest, making over $11,000,000,000. We can collect one-third of it and pay this adjusted compensation to the soldiers of America and settle the debt, wipe the slate clean, and they will still owe us $7,000,000,000 more. You are in the majority over there. Why do you not do that? You have it in your power.

While I speak to you certain American newspaper editors and owners are in Europe working up a propaganda, or aiding and abetting it, to cancel that debt. You see suggestions coming from over there now, and coming from high authority here, that this debt should be canceled. They are working to get this Government to cancel this debt due us by other countries, and we are told that some of the money borrowed from us was used by England and France to pay adjusted compensation to their own soldiers. Yet men stand here and say that we should not even consider the matter of paying adjusted compensation to our soldiers.

Do you suppose that England, the mother country, great nation that she is, insulted the patriotism of her soldiers, cheapened the heroism of those brave men who stood with undaunted courage when General Haig said, "Your backs are to the wall. There is nothing else to do but to die"? Did they feel they were cheapening heroism in them, and capitalizing their patriotism, when those boys accepted that small substantial token at the hands of the Government whose life they had saved?

Oh, Senators, what would happen if a young man should come and help you save your house when it was on fire, and extinguish the flames. You would bring him in, and there would not be anything you could do for him that you would not want to do, and if it should be shown that he did not have a place to live, you would take him in and say, "Young man, you put out this blaze, and you saved the life of my little boy, and I want you to live here. Your board shall cost you nothing, and here is spending money." That is what the individual would do.

The soldiers protected the country, saved the American household of sovereign States with all these ungrateful profiteers in

it, and now they do not want these boys to even have a bite to eat and a place to sleep.

Mr. SHEPPARD. Mr. President, does the Senator recall what the British Government and the British people paid General Haig after the war closed? It was something like $500,000, I think, by way of a bonus or gratuity. Parliament voted him nearly half a million dollars, or £100,000; the King made him an earl, and a country estate was given him by popular subscription. The pending measure, however, does not ask for a bonus or gratuity but for proper adjusted compensation for our soldiers.

Mr. HEFLIN. Mr. President, I thank my good friend from Texas for his very pertinent suggestion. All of the allied Governments have tried to do something in a substantial manner to show their appreciation of the services rendered by their heroic sons. In the instances cited by the able Senator from Texas the British Parliament was not content to vote thanks to General Haig but voted to bestow a sum sufficient to make him comfortable as long as he lived. When our boys came back and were mustered out of the Army, in what condition did they find the country? A Republican Congress was in control. The wheels of the hitherto smooth and wholesome working Democratic administration was now paralyzed. We could do nothing and you would do nothing. The demoralizing hand of a Republican Congress was resting heavily upon everything.

When the boys came back and were mustered out, what did they find? They could not find anything to do. There were no places open for them. The places they had when they left home were in the hands of others.

I contrast their condition and conduct with the condition and conduct of the profiteer who furnished certain materials and who made money hand over fist out of his business. He held up the Government, charged high prices, and made tremendous profits. He collected money for that which was never used and that never benefited the Government. He made money out of the war and made himself rich out of the war. But the soldier worked for practically nothing and went out on the danger line and offered to die for his country.

Think of those two pictures, Senators; one the profiteer who is fighting the adjusted compensation to death and the other the soldier who gave up a position, lost out entirely in that regard, and was paid but a pittance while in the service.

The soldier made no money out of participating in the war, but the profiteer made millions and was all the while far removed from danger. The soldier was in the midst of danger and death and thousands of his comrades died. He was willing to die. Their positions were lost to them when they went away to fight for their country. They were in danger of losing their lives and were losing money all the time. When they came home, as I said, the positions they had were gone and there were no other positions open. In the State of Daniel Webster, the great State of Massachusetts, in which stands the proud and historic monument of Bunker Hill, soldiers who offered their lives for their country found conditions so demoralized and miserable under a Republican administration that they were sold upon the auction block to the highest bidder. And yet some talk about cheapening a man's patriotism and his heroism. When hunger and fatigue demand that he get something to eat and a place to sleep, driven by sheer desperation until he goes to the auctioneer and says, "Sell me into industrial slavery. I want something to do, something to eat, and a place to sleep," the situation is indeed desperate.

Senators, that happened in the State of Massachusetts with some of the more unfortunate boys whose cause I plead to-day. The profiteers are rich and reveling in their rank luxuriance while the boys—thousands, tens of thousands, aye, hundreds of thousands of them—have no adequate means of employment. I am pleading with my Government for simple justice to them. I voted to call them to the colors, and, so help me God, as long as I have the strength to speak and vote I shall demand justice for them in the Senate of the United States.

UNITED STATES COAL COMMISSION.

Mr. CALDER. Mr. President, I send to the desk a telegram from the New York Coal Commission, which I ask to have read and referred to the Committee on Education and Labor.

There being no objection, the telegram was read and referred to the Committee on Education and Labor, as follows:

[Western Union Telegram.]

NEW YORK, N. Y., *August 22, 1922.*

Hon. WILLIAM M. CALDER,
Senate Chamber, Washington, D. C.:

The New York State Coal Commission very earnestly urges upon you the necessity for prompt action in carrying out the President's recommendations for a governmental agency to control the distribution and price of coal and for vesting in that agency all the power the Congress can give it. The situation in New York State this fall and winter will be very acute at the best. Nearly five months of anthracite coal production has already been lost, and even though all the mines were opened to-morrow some time must necessarily elapse before they can be operated to full capacity. The greatest difficulty is being experienced in getting through shipments out of the very reduced supply of bituminous coal. The governor has called the legislature in special session for next Monday, and legislation will undoubtedly be enacted clothing the New York State Fuel Administration with all the powers the State can give it. The benefit of such action will largely be lost unless the Federal Government on its part promptly constitutes a strong central agency to secure the coal and get it to the several States. The necessity for the investigation of the entire coal situation, as recommended by the President, is apparent, but even more imperative is the need for prompt action on his recommendation for a governmental coal agency. Unless effective and vigorous measures are taken to develop to the utmost the supply and distribution of coal, especially anthracite coal, New York faces a coal shortage even worse than that of the winter of 1917–1918. New York is absolutely dependent upon anthracite coal to keep warm, aside from the needs of industry. A shortage in anthracite affects every household in the cities of the State, and a serious shortage spells sickness and intense suffering, especially in the tenements and poorer districts. The prospects of winter being so near and the State almost denuded of anthracite is alarming. In this emergency the coal commission believes it should call this matter to the attention of the New York delegation in Congress and urge upon it vigorous and united effort to secure immediate action.

LEROY T. HARKNESS,
For the New York State Coal Commission.

Mr. CALDER. Mr. President, this telegram calls attention to the imperative need of immediate legislation, providing for a fund which will enable the Federal Government to go into the market, purchase coal and insure its sale to the consumer at a price that will not be exorbitant. Important as is the pending measure, immeasurably more necessary is the control of the price of coal.

Mr. President and Senators, as chairman of a subcommittee of the Senate, I made an exhaustive inquiry into the coal situation throughout the country in 1920. The difficult conditions existing that year were brought about, first, by the strike in the middle western coal fields which extended over a period of several months, and also the heavy coal shipments abroad at prices all out of proportion to what the coal was really worth; in fact, many shipments of coal were sent overseas at a cost to the Europeans at sums exceeding $20 per ton at the mine. This created a coal panic, which increased the price to the consumer in this country and resulted in a speculative riot, which resulted very often in coal passing through six or eight different hands before it finally reached the consumer. Senators may recall that the investigation unearthed the fact that a coal operator in West Virginia, who was a prominent official in the coal association, sold the output of his mine at less than $3 as a mine operator, and then as a coal dealer in Pennsylvania contracted with the War Department at a price exceeding $10 per ton at the mine. I recall distinctly that in one of the transactions in which the War Department was compelled to pay an enormous price the coal passed through seven hands, and every one of the people made a profit.

Following that investigation, a bill was introduced by the committee which if enacted into law would have given to the Department of Commerce a very considerable control over the coal industry. The bill declared that coal was a fundamental necessity to the very life of the people and was charged with public use and necessity. It gave the Department of Commerce power to collect information concerning every phase of the coal business; the amount of coal produced, the cost of production, the sale price, the profits of the coal operator, and to whom the coal was sold. The same rule applied to the wholesale coal dealer. The bill also provided that if coal was handled by a second wholesaler, the profit to such second dealer should be limited to 5 cents per ton. In other words, the bill had for its fundamental principle the furnishing of complete information concerning this industry to a branch of the Federal Government and it made it clear that coal was a commodity that was necessary to the everyday life of the people.

The bill was referred to the Committee on Manufactures, and after hearings extending over several months it was amended and reported favorably. It was reported in the closing days of the Sixty-sixth Congress, but failed of passage. Opposition to the measure came from boards of trade, chambers of commerce, and merchants' associations, and the United States Chamber of Commerce opposed it as vicious and radical, the same action being taken by the New York State Chamber of Commerce. In fact, all over New York State propaganda against it was so widespread that the junior Senator from New York, the author of the bill, was denounced as a radical bordering upon the red, and men who ordinarily think clearly upon legislation pending here were moved to take the ground that this bill was a move on the part of the Government to interfere with private business. We were reminded that we should have "less poli-

tics in business," and that very term was quoted in the resolutions adopted by hundreds of organizations.

I did not reintroduce this measure in the Sixty-seventh Congress, preferring to stand back of the modified fact-finding measure introduced by the Senator from New Jersey [Mr. FRELINGHUYSEN], hopeful that we could get this through and that the Government could obtain information on this subject which would have been so very helpful in the critical situation which we are now facing. Senator FRELINGHUYSEN'S bill was, however, debated on the floor of the Senate for a week in the early days of the present Congress, but it was opposed by influential coal operators and, whether or not as a result of their efforts, the bill was not enacted into law.

Now what do we find? The House yesterday, by a vote of three to one, passed a bill fully as drastic as the one introduced by me and immeasurably more so than the one fathered by the senior Senator from New Jersey.

I shall vote for the pending bill. I believe, too, that the one introduced by me would have accomplished the very same purpose. Mr. President, in my opinion, may I add that the Congress was derelict in its duty both in the last Congress and in the early days of this Congress in failing to provide for the passage of a measure which would have enabled us to have complete information on this subject in a time like the present.

But of what immediate value will this pending measure be in relieving the situation in which we now find ourselves? In the cities of the northern and eastern part of the country practically all of our people burn anthracite coal; they have no facilities in their homes to use any other kind of fuel, for their stoves, ranges, and furnaces are constructed for the use of anthracite.

For five months the anthracite mines have been closed. While some bituminous coal has been mined, my information is that for the period I have indicated not a single ton of hard coal has been taken from the earth. Senators know that anthracite coal is produced in the State of Pennsylvania, and that State has laws which require men in this industry being licensed by the State before they are allowed to work, and a miner must have served as helper or apprentice for several years before he can be licensed. The anthracite coal miners in Pennsylvania are completely unionized.

Stop for a moment to realize just what these conditions really are. For five of the first eight months of this year there has been no hard coal produced, and not more than 10 per cent of the families of the North and East have coal in their bins for the winter. By this time of the year, usually one-half of these people should have their winter supply. The strike still goes on; at the most we are 60 days from the frost period, and during that time, coal must be obtained, or else people will freeze to death this winter. I am not exaggerating the situation when I state that, in my judgment, unless this situation is relieved within a short period there will be riot and perhaps bloodshed in the larger cities of the country this winter.

Mr. BORAH. Mr. President, would it interrupt the Senator if I should ask him a question?

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Idaho?

Mr. CALDER. I yield to the Senator from Idaho.

Mr. BORAH. As I understand from the public prints, the anthracite mine operators and their workmen have quit trying to reach a conclusion, and their meetings have been broken up. I know the Senator from New York has given a great deal of attention to this matter and has been studying it for months. In view of the situation, what can we now do to produce coal? We can provide a price-fixing plan, perhaps, affecting the price of coal after it is produced; but that which, it seems to me, confronts us now is to keep from happening the situation which the Senator from New York has correctly prophesied in all probability will happen. How are we going to produce coal?

Mr. CALDER. Mr. President, the Senator from Idaho has put his finger upon the real question. For the life of me, I can not understand how it is that we have stood here idly by all these months without fully realizing the situation. A desperate situation confronts us. I know there are differences between the men who mine the coal and the men who own the coal mines, which during the past five months have failed in adjustment; but beyond all of these differences are the rights of the people. Is this Government helpless in an emergency of this kind? Do we lack the capacity or power to adjust the situation; shall we stand idly by while disease and death threaten us?

Members of Congress have during all of these months refrained from interfering in the situation; it has been a delicate subject; the President has repeatedly tried to bring together the mine worker and the mine owner in an effort to have them adjust their difficulties. Those of us who have followed these conferences have been hopeful from day to day that the differences might be adjusted, but as the days and weeks and months go on we see no signs of a settlement, while the hardships of the winter are facing us.

Mr. President, the time to act has arrived. These men must settle their differences; they should be told they must agree upon an adjustment forthwith. Forty-eight hours is sufficient notice to them; and if they fail, after receiving such notice, to open up the mines and furnish coal to the people, it will be the duty of this Congress to give to the President full and complete authority to take over the mines and to operate them to their full capacity for the benefit of the American people.

With my colleague from New York, I represent the State of greatest population in the Union. That State contains a city whose population exceeds 6,000,000, and unless relief comes to that city there will be hardships the like of which this Nation has never experienced before in time of peace. I am fearful that these conditions are not fully appreciated because summer is still here, and that some of us fail to realize the approach of autumn in a few weeks; and with winter close upon its heels, the acute conditions to which I have referred will be upon us. Mr. President, on behalf of the 11,000,000 people of New York I insist that the coal miner and the coal operator shall at once adjust their difficulties, if only temporarily, so that we may survive the winter and prevent the conditions of which I have complained.

In my service in the two Houses of Congress I have opposed, in and out of Congress, the Government going into business; I have deplored the day when the railroads and mines should be operated by the Government; but the time has arrived now when the question of governmental operation, control, or ownership in the emergency which exists has become an actual necessity in order to prevent disease and death.

Mr. President, it is no exaggeration to say that the lives of the people of the Nation are at stake; and we can no longer tolerate this disagreement. I shall vote for the measure proposed by the Senator from Idaho creating a coal commission. It is a deplorable fact that Congress has not sooner legislated in this manner; but I think it can be fairly charged to the business men of the United States, generally speaking, that their opposition to the bill introduced by me, and later introduced by the Senator from New Jersey [Mr. FRELINGHUYSEN], has, in a measure, contributed to the conditions confronting us.

I appeal, Mr. President, for immediate action in this body. This matter is infinitely more urgent to the welfare of the Nation at this time than the tariff, the bonus, or any other question which is now pending.

Mr. WALSH of Massachusetts. Mr. President, I was unable to hear all that the distinguished Senator from New York just said. Did I understand him to recommend that the President take over the coal mines and operate them?

Mr. CALDER. I propose that 48 hours' notice be given to the miners and the operators to get together and settle their difficulties; and, if that is not done, I propose then to give the President the power to open the mines and to operate them for the benefit of the people in this emergency.

Mr. WALSH of Massachusetts. Mr. President, early in June the suggestions of the Senator from New York and the situation to which the Senator has referred as existing in New York was called to the attention of Congress and of the country by several Senators. Four Senators, I think, or five, upon this floor at that time declared that it was their opinion that unless the strike was settled within one month the Government should take over the mines and operate them in the public interest. More than two months have elapsed, but nothing has been done.

What the Senator from New York says is true; the coal bins of the people of New York and of New England and of the Northwest are empty and our people are facing a situation during the coming winter which will be worse than that which confronted them at any time during the World War. The situation which has arisen in this country by reason of the inability of the public authorities to settle the controversies involved in the coal strike is pitiful and deplorable. Some one is to blame. The men and women and children who will be shivering next winter, the men and women and children without fires to keep their homes warm, are not going to blame the operators or the strikers, but they are going to blame their Government for failing to fix the responsibility and find a solution and a way to settle this strike or to give them through governmental intervention what they must have in order to preserve their health and enjoy the decent, ordinary comforts of life—coal.

Nothing has been done to restrict profiteering; nothing has been done to supply the people with this very essential necessity of life. We have sat here with folded arms allowing this thing to go from bad to worse. Standing on this floor and call-

ing attention to conditions has been of no avail and is now of no avail. It is time for action; it was time for action weeks ago, yes months ago. The Government could have acted; it should not have hesitated to attempt to take over all of the mines which were necessary to supply our people with coal and to have given notice to the mine owners that their profits would be restricted, and to the striking miners that they would not be the beneficiaries of any action by the Government during the time the Government might be operating the mines, but that the Government, solely interested in supplying our people with coal, would see that that was the first object kept in mind.

Mr. SHIELDS. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Tennessee.

Mr. SHIELDS. Right in that connection will the Senator explain under what authority the Government could seize the coal mines, the private property of the owners, and take possession of them?

Mr. WALSH of Massachusetts. Mr. President, I think there might be some question about the authority, but the Government could at least attempt to secure the authority. The Government obtained authority in emergencies during the war; Congress passed legislation within 24 hours to help win the war and to save and conserve the rights of our people. So the Government now, if it means business, can get through Congress within a very reasonable time any legislation which may be necessary to settle this strike. I should like to see the public man who would stand upon this floor and refuse to vote for reasonable legislation to give our people what they need to protect them against the severity of our winter climate, against disease, and against possible death itself.

But there are some who are of the opinion that there is at present authority for the Government to act. At least, however, the Executive should have suggested—and said it as if he meant it—that such action would be proposed to Congress and that he would undertake so to act if there was not an adjudication or a settlement of the strike.

Mr. SHIELDS. I grant that the condition is deplorable and I am not in any way defending anybody in what I may say——

Mr. WALSH of Massachusetts. I appreciate that.

Mr. SHIELDS. But we have got to proceed, whether it be by legislation or by executive order upon constitutional grounds. We want no nationalization, no sovietism, in this country. We do not want the Government overturned on account of a certain emergency. I think the position of the coal operators and of the miners is reprehensible in the extreme. There are less than half a million of them, I presume, in the United States, and they are imposing upon 110,000,000 people a grievous wrong. The fact is I condemn both of them. The strike is merely a combination between them as to how much tribute they may levy on the general public to be divided between themselves. I think in some way, but it must be upon constitutional grounds and involve no confiscation of property, the matter ought to be settled, but I do not think there is any law now to do it along the lines suggested by the Senator. The President has no power to seize and operate the coal mines. He can protect the owners from violence, preventing them from operating their property.

Mr. WALSH of Massachusetts. Of course, I do not differ with the Senator in the main upon that matter; I do not differ with the Senator as to the abuses of this strike and as to the need of orderly procedure; but what I am asking for is relief, what I am asking for is action. If there is any one thing more than another that is causing unrest in this country it is the growing belief upon the part of our people that in emergencies like this they will be allowed to be mulct, to suffer, and, indeed, to starve without being able to get any aid or relief from their own Government to protect and assist them. If there is anything that is causing unrest in this country more than anything else, it is the growing belief in the incapacity of the Government to grasp a critical situation that threatens their inalienable rights of happiness and the enjoyment of health, and to give relief immediately and quickly when they need it in their hour of trouble and distress. That is the thing about which I am concerned. I am anxious that we show the people of this country that Congress has the power to act and to supply the people with that which they must have in order to live. It is not a question about providing them with a luxury; it is not a question of running a gold mine or conducting a jewelry shop, but of giving them something which they must have in order to live, in order to conserve their health and their strength. All I am asking for is action. I am asking the Government, the representatives of the people here, to protect their health, to protect their strength, to protect them against wrongdoing and mismanagement of an essential industry upon the part of operators and miners alike, if you please, for it is an outrage to have this condition and situation continue. If we have not constitutional authority, let us begin to get it by amending the Constitution. My own State amended its constitution in order to act in emergencies like this.

I fear that some of the Members of this body do not appreciate or realize the extent to which the shortage of coal has developed and how very distressing the situation is. For five months now no hard coal of any kind has been mined; no coal has been moving into the sections of the country which depend upon anthracite coal for cooking purposes and for supplying heat. They can not use any other kind of coal; their furnaces and their stoves are not equipped to burn bituminous coal; they must have anthracite and they ought to have it at a reasonable price and have a sufficient amount of it. How absurd it is to pass laws to protect mothers from dying through want of medical care at the period of maternity and yet be helpless to provide them with heat because of a strike and thus subject them to death by exposure.

Mr. LENROOT. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Wisconsin.

Mr. LENROOT. With reference to the power of Congress, may I remind the Senator from Massachusetts and also the Senator from Tennessee that Chief Justice Taft in the Coronado case, after stating that coal mining is not interstate commerce and that the power of Congress does not extend to its regulation as such, proceeded to cite a number of very recent cases, and then used this language:

> It is clear from these cases that if Congress deems certain recurring practices, though not really part of interstate commerce, likely to obstruct, restrain, or burden it, it has the power to subject them to national supervision and restraint.

Mr. WALSH of Massachusetts. Mr. President, that language has been called to the attention of the Senate on a previous occasion, and I had it in mind when I was speaking of the claim on the part of some that Congress already possessed such power; but I think there may be some question about it, and the objection of the Senator from Tennessee may be pertinent. But why talk about the absence of power? Why not begin now to get it before the next emergency comes?

Mr. SHIELDS. Mr. President, may I make a remark about that extract from the opinion of the Chief Justice in the Coronado case? That is a very startling doctrine, and in that case it was mere dictum. For every action of Congress it has to place its finger upon some provision of the Constitution, and I should have liked to have the Chief Justice point out there the provision on which that pronouncement was predicated. He can not do it.

Mr. CUMMINS. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Iowa.

Mr. CUMMINS. The Senator from Massachusetts is censuring somebody, either the President of the United States or Congress.

Mr. WALSH of Massachuseets. Or both.

Mr. CUMMINS. I know a good deal about the activities of the executive branch of the Government with respect to this coal strike, and I venture to say that the President has exercised all the power that Congress has given him or that the Constitution confers upon him in the endeavor to bring about a settlement between the operators of coal mines and the miners. Therefore, why does the Senator from Massachusetts criticize the President of the United States? What has he left undone that he could have done? I should like to have an answer to that question.

Mr. WALSH of Massachusetts. Mr. President, I am criticizing both the executive and the legislative branches of this Government for their inaction. I am calling attention to a situation to which the Senator from New York [Mr. CALDER] called attention—the condition in his State. I am calling attention to the condition in New England, and I am asking this Government if it is powerless, if it is impotent, if it is unable to cope with this situation. I am asking for action, or for a confession by this Government that it is helpless. I demand that our people know that we are powerless and can only talk. I repeat, action ought to have been taken months ago. Early in June this whole situation was disclosed and discussed on this floor.

The Senator from Wisconsin rose in his place and said that within a month, if something was not done, the Government ought to act and take over the mines. Other Senators, conservative Senators, repeated that demand. Three months almost have transpired. I do not doubt that the President has

done everything he could by suggestions of compromise to settle this strike; but are we to confess to the American people, are we to admit to our people, that a great industry which supplies our people with a necessity of life can become paralyzed and the Government remain helpless, the people left to perish and suffer? There is hardly one other country in the world that would tolerate such a condition to go on without a speedy remedy.

Mr. CUMMINS. No.

Mr. WALSH of Massachusetts. Are we to confess to the people that a great industry can conduct itself in such a manner and in such a way that our people will stand by and die, die because their Government can not find any way of helping them? Is our great democracy less alive to the necessity of safeguarding the rights of its people than the autocracies of Europe?

I tell you that you are not alive to the unrest in this country if you do not appreciate the cry for action upon the part of Congress. I assert that much of the unrest in this country to-day is due to a feeling that here we dillydally, here we make objections, here we protest, here we delay, here we filibuster and never act. Shall we stand here daily and denounce profiteering, condemn it, unable to find language strong enough adequately to condemn it, and then sit with folded arms and say: "What of it? The Constitution prevents us from acting. It is unconstitutional. There is no remedy. Let it go on. Let it go on." Simply talk, talk, talk. Do not you realize that they are beginning to think that we fiddle while they shiver?

I protested in June; but I remained silent and have not opened my lips about the coal situation from the day the President of the United States took this matter in hand. The Senator from Idaho [Mr. BORAH], the chairman of the Committee on Education and Labor, knows that again and again I have talked over the situation with him and he with me; that we have both agreed, and other members of that committee have agreed, to say nothing and to do nothing until every single opportunity was given to the Executive to settle, if he could, this strike. Neither by voice nor by written word have I or any other Member of the Senate on this side of the Chamber raised a single objection to the course taken by the President. We have all waited patiently and anxiously, hoping that he would find some solution of this very difficult problem. Evidently he has failed. Now, I ask are we to tell the people of America, am I to tell the people of Massachusetts, that we have failed?

You say that I criticize the President, but I criticize the Congress as much as the President. Then I say to you the people will criticize us both on election day, because they will have a chance next November, when they find out that they have empty coal bins, that they have no coal to burn, what they think of an administration that confesses impotency to protect them against suffering. You will find out, we will all find out, that they will register then and there their protest against the conditions that have been allowed to go on without any remedy being suggested or any solution applied.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER (Mr. ODDIE in the chair). The Senator from Iowa.

Mr. FLETCHER. Mr. President, I wanted to interrupt the Senator before he finished.

Mr. CUMMINS. I believe I can state my views upon this matter very briefly.

Mr. FLETCHER. Mr. President, will the Senator allow me——

Mr. CUMMINS. I do not yield at the present time.

Mr. FLETCHER. I was asking the Senator from Massachusetts to yield.

Mr. CUMMINS. I supposed I had been recognized.

Mr. FLETCHER. I understood that the Senator from Massachesetts had the floor.

The PRESIDING OFFICER. The Chair was under the impression that the Senator from Massachusetts had concluded.

Mr. FLETCHER. Very well.

Mr. CUMMINS. Mr. President, have I now the floor?

The PRESIDING OFFICER. The Senator from Iowa has the floor.

Mr. CUMMINS. Mr. President, the responsibility for a failure to compose the differences between the mine operators and the coal miners rests neither with the President nor with Congress. The President has no power whatsoever over this subject matter. Early in the controversy the President called before him the representatives of the operators and the representatives of the miners. I believe that he used all the influence he had as a mediator—and that is all the power he had—to induce a settlement of the controversy between them on fair terms, and he has continued to do that from then until now. He has succeeded in practically settling the controversy between the bituminous coal operators and the miners; and from this time forward, as it now appears, there will be no lack of bituminous coal, and our difficulty will be in its distribution and not in its production. A further difficulty will be in the tendency of those who own the coal to charge unreasonable prices for it. That tendency, I hope, may be checked through the instrumentality of a bill that has been introduced in the Senate to-day.

But, Mr. President, there has been no settlement, and there is no likelihood of a settlement, between the anthracite coal-mine operators and the anthracite miners. I have never known a man who so constantly and assiduously and persistently endeavored to bring two opposing interests into harmony as the President of the United States has endeavored to bring together the anthracite-coal operators and the anthracite miners. One week ago it was believed by every person who had any interest in the subject that a settlement had been practically reached between these two interests. However, after a week's deliberations and negotiations, that hope has practically disappeared.

Mr. NELSON. Mr. President, will the Senator yield to me for a moment?

Mr. CUMMINS. I yield to the Senator from Minnesota.

Mr. NELSON. Is it not a fact that the anthracite mines are wholly unionized?

Mr. CUMMINS. They are, practically so.

Mr. NELSON. And is it not a fact that the operators have proposed to the miners' union arbitration, and that they have refused it?

Mr. CUMMINS. That is true. I am not going to enter upon the merits of the controversy between the anthracite operators and the miners. All kinds of propositions have been made on both sides, and it is true that the operators offered to enter into an arrangement with regard to wages which was entirely satisfactory, as I gather it, at the present time, but which contemplated an arbitration between the operators and the miners with regard to wages in the future.

Mr. NELSON. And the miners refused.

Mr. CUMMINS. The miners refused.

Mr. BORAH. But, Mr. President, why did they not accept the proposition at the present time, and get out of this difficulty, and leave the question of arbitration to the future?

Mr. CUMMINS. I am not going into the controversy between them. I think they are both to blame, just as I think both sides are to blame in the present railroad strike. I think it ought to have been composed long ago; but the President had no power to compose it, and he has used all the influence he has and all the power he has to bring order out of chaos. Now I want to ask the Senator from Massachusetts, inasmuch as without legislative authority, the President could not do more than he has done, why did not the Senator from Massachusetts or the Senator from New York introduce months ago a bill that would authorize the President to take over the coal mines and operate them?

Mr. WALSH of Massachusetts. Mr. President, the Senator from New York [Mr. CALDER] introduced two years ago a bill seeking to regulate the coal industry, which has remained here without any action whatever, and the President did not announce the result of that negotiation until a few days ago, when he stated practically that the country was at the mercy of the miners' union. Now, that may be true. I am not entering into a controversy about the facts. I have not criticized the President. I am criticizing the inaction of the Executive and of Congress in not now finding some remedy and some solution.

Mr. CUMMINS. The inaction of the Senator from Massachusetts as well as the inaction of every other Senator, and the inaction of the Senator from New York as well as the inaction of every other Senator.

Mr. WALSH of Massachusetts. Very well. I have at least raised my voice, and there is a bill pending now, presented to-day, to help——

Mr. CUMMINS. There is no bill pending that authorizes the President to take over the coal mines; that is, I do not know of any.

Mr. WALSH of Massachusetts. A bill in accordance with the recommendations of the President was presented this morning by the Senator from Idaho. Another bill has been presented, in accordance with his recommendation, to restrict profiteering, and in my opinion neither of them will get anywhere.

Mr. CUMMINS. The Senator from Massachusetts may not lend his great influence to get them anywhere. I do not know whether he will or not. When I sat here day after day and

heard the irrelevant and immaterial repetitions in the discussion of the tariff bill I was wondering whether the Senate was fairly conscious of the situation which confronted the country. It is infinitely more important, and it was then infinitely more important, that the Senate should take up these subjects and discuss them than that it should proceed with the 2,087 amendments to the tariff bill. I said so then, I believed so then, and I believe so now, and if we do not give our undivided attention to the situation as it now exists, there will be infinite hardship and infinite suffering during the coming winter.

I agree that we ought to use all the power we have under the Constitution, liberally construed, to meet the emergency that is now upon us, but I can not sit silent and hear the Chief Executive censored for our failure to supply him with the instrumentalities or the weapons that are necessary to make the fight.

Mr. CALDER. I have not found fault with the President of the United States in my remarks to-day.

Mr. CUMMINS. I am speaking of the Senator from Massachusetts.

Mr. CALDER. I have called the attention of the Senate and the country to the conditions immediately before the people of my State, and I say now to the Senator I will join with him and with everybody on this floor in enacting legislation which will give the President the power to act in this emergency.

May I add, if the Senator will permit me, that neither the Senator nor anyone else has called attention to the fact that in the State of Pennsylvania they have a law which requires men to be licensed before they can work in the mines? Those are conditions which might be remedied if the Federal Government stepped in to operate the mines.

Mr. CUMMINS. I am not sure about that.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Tennessee?

Mr. CUMMINS. I yield.

Mr. McKELLAR. I merely wish to say to the Senator that a day or two ago the President was before the Congress, and he specifically stated that he did not ask for any additional authority from the Congress to deal with the strike situation.

Mr. CUMMINS. Must the President come to Congress and ask for every bit of legislation which may be required to control and govern the country?

Mr. McKELLAR. He was discussing this subject at that time.

Mr. CUMMINS. That is an idle and, as it seems to me, rather an immaterial observation. I suppose it is our duty to initiate and to adopt such legislation as may be necessary to correct the evils which exist and to protect and guard the people of the United States. I would be sorry to abdicate my own responsibility as a Senator and endeavor to place it on the shoulders of the President of the United States. It is our duty. The Senator from Massachusetts recognizes that as well as I do.

Mr. WALSH of Massachusetts. Certainly; but the President did not hesitate to come here and ask Congress not to pass the bonus bill. But the Senator says it is not his duty to come here and, as the leader of the administration, as the leader of the majority party, ask for relief against this distress complained of.

Mr. CUMMINS. The Senator from Massachusetts is very apt in bringing into the discussion matters which have no relation whatever to the matter we are considering.

Mr. McKELLAR. Mr. President——

Mr. CUMMINS. I yield to the Senator from Tennessee.

Mr. McKELLAR. The Senator says that we can not shirk our duty by not proceeding and giving the President such legislation as may be necessary. The President himself said there was an emergency, but he did not ask for any additional legislation. The Constitution of the United States imposes upon him the duty from time to time to make known to Congress his desires in such matters.

Mr. CUMMINS. The Senator from Tennessee is speaking, I am sure, without deliberate consideration. He is endeavoring now to say that he is relieved from responsibility——

Mr. McKELLAR. Oh, no.

Mr. CUMMINS. Because the President did not long ago recommend some definite legislation. The President has been endeavoring to bring these opposing parties together. He has been endeavoring to secure an agreement between them which would result, and result immediately, in the production of both bituminous and anthracite coal; and if any Senator or any Member of the House felt that the time had come for the measures which are proposed now by the Senator from New York, it was the duty of that Member of the House or that Senator to introduce a bill upon the subject and demand its consideration.

Mr. LENROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Wisconsin?

Mr. CUMMINS. I yield.

Mr. LENROOT. I would like to ask the Senator whether the situation has not actually changed within the past 48 hours? Was it not believed until yesterday that the railroad strike would probably be settled, and was it not believed until day before yesterday that the anthracite strike could be settled?

Mr. CUMMINS. I answer, of course, in the affirmative. No one connected with these negotiations had serious doubt that arrangements had been made which would settle the anthracite strike, and all of us had the most sanguine expectation that the railroad strike would be settled on Wednesday.

Mr. LENROOT. And was there not a just fear that if legislation were inaugurated prior to that time it might interfere with the settlement of the strike?

Mr. CUMMINS. That was the judgement of all who were concerned in the negotiations.

Mr. LENROOT. In view of the changed conditions, of the apparent hopelessness of the settling of the railroad strike, and of the apparent hopelessness of the settlement of the anthracite strike, does not the Senator think the time has now arrived when the President should be given power to take over temporarily both the anthracite mines and the railroads so that he might put himself in the place of one of the parties to the controversy?

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. CUMMINS. I know the language the Senator is about to quote, just as well as the Senator from Tennessee knows it.

Mr. McKELLAR. I should like to put the language in the RECORD at this point.

Mr. CUMMINS. Very well.

Mr. McKELLAR. The President "shall from time to time give to the Congress information of the state of the Union and recommend to their consideration such measures as he shall judge necessary and expedient."

He has just been before the Congress to talk about this very thing, and, in his judgment, it was not necessary for the Congress to give him any additional powers, and he so stated to the Congress. Why should we proceed under those circumstances, with the President so advising the Congress, as he is required to do under the Constitution?

Mr. CUMMINS. If the Senator from Tennessee believed, as the President did, that the influences of conciliation and the possibility of mediation and of compromise were not exhausted, then, of course, he ought not to introduce a bill of the sort recommended or suggested by the Senator from New York, and that is equally true of the Senator from Massachusetts. But if the Senator from Tennessee or the Senator from Massachusetts or the Senator from New York differed from the President in that respect and thought the time had come when these additional powers should be given to the President, it was then their duty to introduce bills which would empower him to do the things which they think he ought to have power to do, and which I think he ought to have the power to do.

I am not questioning the desirability of giving these powers. I introduced a bill this morning which, so far as bituminous coal production is concerned, will give to the Interstate Commerce Commission that extraordinary power which I would not be willing to give it under any other circumstances than those which now exist, so that it may control the profiteer and will insure, so far as law can insure, the distribution of coal at a reasonable price.

Mr. WALSH of Massachusetts. Will the Senator yield a moment?

Mr. CUMMINS. I do not yield; but I do not intend that in any harsh sense.

Mr. WALSH of Massachusetts. I think the Senator ought to permit an interruption, in view of the fact that he has somewhat reflected upon the motives of the Senator who preceded him.

Mr. CUMMINS. I have not reflected on the motives of any Senator.

Mr. WALSH of Massachusetts. I ask the Senator if he does not think that the bill to which he refers, and which I heartily approve of, authorizing the Interstate Commerce Commission to control profiteering in bituminous coal, which is the coal that goes to the industries of the country, should apply to the anthracite coal, which goes into the homes of the country?

Mr. CUMMINS. The Senator from Massachusetts has not read the bill, evidently, because it does apply to anthracite coal just as much as it applies to bituminous coal.

Mr. WALSH of Massachusetts. I took the Senator's word. He referred only to bituminous coal.

Mr. CUMMINS. I said that it would correct the disposition to charge more for bituminous coal than ought to be charged, because we now have, or will have, an abundant supply of bituminous coal. It is of very little value to control the price of anthracite coal when we have none. There is none for sale. There is none being mined and none being transported. But when the time comes that it is being mined and transported, this bill will apply to the anthracite just as fully and completely as it applies to the bituminous coal. It applies also to any other fuel which may be the subject of transportation by the common carriers of the country.

Mr. McKELLAR. Will not the Senator yield to me, because there has been a misapprehension, I think, of what the President said?

Mr. CUMMINS. I yield very gladly.

Mr. McKELLAR. The President on August 18, when he was before the Congress, said:

> It is not my thought to ask Congress to deal with these fundamental problems at this time. No hasty action would contribute to the solution of the present critical situation. There is existing law by which to settle the prevailing disputes.

How much clearer, how much more certain, could we have what the President thought and what he recommended to Congress, as it was his duty to do? Why should we give him legislation when he said it was not necessary?

Mr. CUMMINS. The Senator from Tennessee does not read all the message, and he does not interpret aright what he has read.

Mr. McKELLAR. I will read the rest of this paragraph.

Mr. CUMMINS. I can not yield for the purpose of having the Senator read the message, because we all have read it, and we all know what is in it.

Mr. McKELLAR. Evidently some of us have forgotten it.

Mr. CUMMINS. I will very gladly yield to the Senator from Tennessee to express any criticism or censure he may care to express upon the President of the United States, because I would like to have an opportunity to reply to him.

Mr. McKELLAR. I have not asked the Senator to yield for any such purpose at all.

Mr. CUMMINS. That is the whole purpose of the Senator from Tennessee.

Mr. McKELLAR. I am merely quoting the President as saying that he does not need any additional legislation at this time. He thought he had all the legislation necessary to deal with the critical situation about which the Senator is talking. The President said so himself.

Mr. CUMMINS. The President said nothing of that kind.

Mr. McKELLAR. I have just read it to the Senator.

Mr. CUMMINS. If the Senator from Tennessee is content to put that interpretation upon it, I can do nothing but differ from him. that is all. I think I have read the message just as carefully as has the Senator from Tennessee.

Mr. NELSON. Mr. President——

Mr. CUMMINS. I yield to the Senator from Minnesota.

Mr. NELSON. I would like in this connection to say a few things, if the Senator will allow me.

I have listened to this discussion with much interest, but it seems to me that all Senators have sidestepped the real issue. A skillful physician, before he administers a remedy, looks to the root of the difficulty. The root of this whole difficulty is unionism. Those bituminous coal mines which have been open-shop mines have been running all the time, and supplying us with coal, and they would have supplied us with more but for the railroad strike. Finally some of the bituminous union mines have become open-shop mines.

It is not necessary to have the Government operate the anthracite mines. Throw the mines open, allow them to run under what I call the open-shop principle, and protect them in that, and you will have an abundance of coal.

Gentlemen are afraid to meet the real issue, I think. That is the real issue. Make it so that the anthracite mines can hire miners wherever they like, and run on the open-shop principle, and assure them of protection in that, and you will get plenty of anthracite coal, and, what is more, you will get it at a lower price than when there is union mining.

Mr. CUMMINS. Mr. President, from the standpoint of the Senator from Minnesota he has undoubtedly stated the correct issue. But that is not the issue which I rose to present. I rose simply to consider whether the President of the country had failed in his duty in his attempt——

Mr. NELSON. Mr. President, I dislike to interrupt the Senator, but——

Mr. CUMMINS. I am very glad to be interrupted by the Senator from Minnesota.

Mr. NELSON. I would like to put one question to the Senator from Iowa and to all Senators. Which does he conceive to be the best remedy in the case, for the Government to take over and operate the mines or to say to the mine owners, "You may run an open shop and hire miners wherever you may and we will protect you in it." Which course does the Senator deem the wisest and best?

Mr. CALDER. I will answer that question.

Mr. NELSON. Which course would be best and tend most to give us coal at reasonable prices?

Mr. CALDER. The last proposition would be the best, to open the mines and offer work to all men of the country, whether they belong to the union or not. I agree with the Senator that that can be done.

Mr. NELSON. Yes; it can be done, and we do not need any legislation for it. The administration can assure the anthracite mine owners, "If you will run your mines as an open shop"—I use that expression because we all know what it means—"the Government will furnish you ample protection." Given that assurance, they would run as freely as the nonunion bituminous mines run to-day. There should be no sidestepping the matter——

Mr. CUMMINS. Who is sidestepping it?

Mr. NELSON. I do not mean the Senator from Iowa, particularly; I think he has more of spirit in the matter; but all Senators are afraid to say anything about the unions.

Mr. CUMMINS. Mr. President, I am not afraid to say anything about the unions. I believe and have long believed, and the Senator from Minnesota must know it, that it ought to be a crime for employees to strike whenever the Government undertakes to adjudicate for them the disputes which arise between them and their employers. That is the final remedy, in my opinion. I do not think our civilization can long endure if a body of artisans, composing the whole number of artisans in that class in the country, can leave their employment by concert and conspiracy at the same time. We can not continue our industries under that kind of policy. I would be the last man to take away from employees the right to strike, which is the right to leave employment at a given time in concert, unless the Government undertakes to do for them the justice which they hope to accomplish through the strike. But whenever the Government undertakes to fix wages and working conditions and insure, so far as human institutions can insure, reasonable wages and good working conditions, then it ought to be a crime to paralyze the transportation lines or the other vital industries of the country by abandoning employment at a given time as a whole.

But that is not the question. We are confronted with a situation that needs temporary legislation. I am willing to do a great many things to meet the emergency which now exists which I would not be willing to do as a permanent system of control and regulation. I know what will happen in New York if the anthracite mines are not opened and if the supply is not begun. I doubt very much whether New York and the surrounding community and New England can be supplied now, if the anthracite mines were to be opened up to-morrow, with the coal necessary to make them comfortable and to carry on their industries. I doubt it very much, and I think we are going to see in the coming winter immense hardships, no matter what we do at the present moment.

But we ought not to create in the country a sentiment that the President has failed to do everything in his power to bring these conflicting interests together and secure a just settlement. We ought not to cultivate and ought not to encourage the sentiment that he has failed to perform his full duty. I know, from almost constant association with him, the solicitude he has felt, the thought which he has given to the subject, the earnest endeavor that was made to do exact justice between these parties. If his advice and his recommendations had been accepted—and there was not one of them that was not a fair one—the strikes would have been settled long ago, and transportation would now be normal, and the production of coal, both anthracite and bituminous, would have resumed the customary volume. He has been hoping, and we all have been hoping, that it would not be necessary to resort to the extraordinary measures which are now proposed and with which I am in full sympathy.

Personally I do not think that the Senator from New York [Mr. CALDER] is at fault for not introducing a bill requiring or authorizing or directing the President to take over the anthracite mines. I do not believe the Senator from Massachusetts [Mr. WALSH] has been at fault, because we have all been in that attitude of hope and of expectation, believing that the difficulties would disappear. But it is apparent now that they will not disappear, and that all the authority which the Constitution enables us to give to the Executive or to other

departments of the Government must be given to meet the extraordinary emergency which has appeared and which is now more critical and more menacing than it has ever been before.

Mr. President, I have said so much because I felt it was due to a President who has labored day and night with all the powers of mind and heart to relieve the people of the situation into which they have been forced. I am not going now to take up the differences which exist between employers and employees. There will come a time when the opinions of all the Senators will be asked and undoubtedly will be given upon that subject, for if we are not false to all our duties we will at the next session of Congress take up these industrial problems and do our best to solve them. There will be great difficulty about their solution. There will be vast differences of opinion with regard to the manner in which they ought to be solved, but then will come the time for the discussion of the question as to what place unionism should occupy in the civilization of the United States.

Mr. EDGE. Mr. President, will the Senator yield?

Mr. CUMMINS. I yield.

Mr. EDGE. Now that the solution of the immediate problem seems to be practically in Congress, does the Senator feel that the two pending measures will be sufficient to bring the real relief necessary for the present contingency?

Mr. CUMMINS. I do not quite catch the meaning of the Senator from New Jersey.

Mr. EDGE. There are two pending bills, one the bill providing for an investigation of all the conditions surrounding the industry——

Mr. CUMMINS. The Senator from Idaho and I agree, I think, that investigation does not touch the present emergency. It is of no value in reaching a conclusion within the next week or two weeks or three weeks.

Mr. EDGE. The second bill is the bill which the Senator introduced this morning relating, as I understood from his short explanation, to an embargo if profiteering was indulged in. As I understood it, they are the only two pending measures. We are faced with a situation which compels immediate relief. While I am in favor of both the measures, particularly the one introduced by the Senator from Idaho as compared to the House bill, because I think it is very much more far-reaching and will bring better results ultimately, yet immediately, facing the present winter with the mines closed, has the Senator any further suggestion for immediate relief?

Mr. CUMMINS. So far as the production of anthracite is concerned, the bill which I introduced this morning will not be helpful; that is, it does not help to produce coal. We have to have men at work to produce coal, and when the men refuse to work the coal is not produced. I still have a lingering hope that the anthracite operators will come to an agreement with their employees, but I think that if it is believed that the President by taking over the mines can secure men who will produce coal in the anthracite field, then we ought to give him the power to do it.

Mr. EDGE. I agree with the Senator.

Mr. CUMMINS. It is still to be doubted whether the President would be any more successful in hiring men to enter the coal mines than the operators have been, because when we give to the President the power to take over the coal mines and he goes to employ miners, he will either have to agree to their terms or he may not be able to secure the men. Whether his influence, whether the general sentiment throughout the country, would make him more powerful in that respect than the operators themselves I do not know.

I hope if he does take them over he will be more successful than the operators have been in employing the men required to take out the coal.

Mr. HITCHCOCK. Mr. President——

Mr. CUMMINS. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. I understood the Senator to say that in Pennsylvania the State law provides that only licensed miners may mine anthracite. Is that correct?

Mr. CUMMINS. That is true.

Mr. HITCHCOCK. And that all of the licensed miners are members of the union?

Mr. CUMMINS. Substantially all of them are.

Mr. HITCHCOCK. Would the President of the United States be bound by that law just the same as are the present operators?

Mr. CUMMINS. I venture no opinion upon that question at this moment. The truth is that there are a good many constitutional difficulties, which appear very trivial to some people but very formidable to other people, about taking over the coal mines.

Mr. LENROOT. Will the Senator yield for a suggestion there?

Mr. CUMMINS. I yield.

Mr. LENROOT. Granted our power to take over and operate a mine, does the Senator from Iowa have any doubt that the State could not regulate the Government's operation of its own property?

Mr. CUMMINS. If we have the power to take over a coal mine, if we can operate a coal mine as a public utility and reckon it to be an instrumentality of the Government, then we can do anything with the coal mine that we care to do, and treat it, I suppose, just as we would treat any other property which the Government may own; but the question is not definitely settled at all, even by the decision in the Coronado case, to which the Senator from Wisconsin has referred, that it is in the power of Congress to say that any kind of property may be treated as a public utility and fall completely within the power of acquisition that inheres in the Government with regard to public-utility properties. I do not know, but I suppose on exactly the same theory the Government could take over all the forests, and, if it became necessary, could take over all the iron mines and all the furnaces and factories and every kind of property of that sort. I think it all depends upon the relation which the property comes to sustain to the Government; and that changes with time. What might not have been constitutional five years ago, I believe could be now held to be constitutional if there has been such a change in conditions and circumstances as to make it necessary to consider such property as public property.

Mr. President, I beg a thousand pardons for having consumed the time I have, but I felt constrained to give my views on this very difficult problem.

Mr. BORAH. Mr. President, of course, at this late hour I do not desire to continue the discussion upon the coal question further than to say that I presume when the press reports this discussion to-morrow the public will come to the conclusion that the Congress is going now to legislate, and that Congress is going to find a remedy for this very difficult situation. I presume Congress will legislate, and, in all probability, it will exhaust whatever power it has under the Constitution to effectuate a remedy or to take control of the situation in so far as it can.

In my opinion, however, Mr. President, unless the States take hold of this matter in their respective jurisdictions we are not going to have any remedy which will be sufficient and efficient to deal with the condition which will confront us during the coming winter. If the inference be drawn by the public to-morrow that Congress has sufficient and efficient power to deal with this subject and to give all the relief that is desired, it would be unfortunate, in my judgment. I think Governor Miller is to be congratulated in taking hold of this matter in his State, and I think it will be extremely unfortunate if the other governors in the coal States do not follow the lead of Governor Miller and call their legislatures together and take hold of this matter in the same way.

We have not under the Constitution of the United States sufficient power to do all that ought to be done; we have not the powers which the States have with reference to some features of the situation. Therefore there should be the fullest and completest activity upon the part of the States in dealing with this trouble. If it is left entirely to the National Government to do whatever it can, in my humble judgment it will not be sufficient to deal with the situation completely.

Mr. CUMMINS. Mr. President, if anything I have said should be construed by any person to lead to a conclusion at variance with the statement just made by the Senator from Idaho, I wish now to say that I agree with all that the Senator from Idaho has said. If we meet the situation as we should meet it, in order to prevent the hardships which now bid fair to overcome the people of the country, there must be concurrence and cooperation between the General Government and the several States.

Mr. LENROOT. Mr. President, I wish to say just a word with reference to the comment of the Senator from Tennessee [Mr. MCKELLAR] upon the President's message. I am sure the Senator from Tennessee did not mean to be unfair, and yet, as his remarks will appear in the RECORD, they will be very unfair, for he selected one paragraph out of the President's message in which the President referred to a subject entirely foreign to and different from that of either the production of coal or the profiteering in coal. The President was discussing the question of the right of men to work and the settlement

of disputes between them. Then he said, quoting the language quoted by the Senator from Tennessee:

It is not my thought to ask Congress to deal with these fundamental problems at this time. No hasty action would contribute to the solution of the present critical situation. There is existing law by which to settle the prevailing disputes.

Mr. President, my friend from Tennessee would have the country and the Senate believe that the President was not asking for any legislation in dealing with the present emergency. The Senator from Tennessee must know that the President in the same message asked for two specific pieces of legislation, one to provide for a fact-finding commission, which we will act upon to-morrow, and next he asked for power to create a Federal agency for the purpose of the purchase, the distribution, and the selling of coal.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. LENROOT. I yield.

Mr. McKELLAR. Of course, I did not intend to be unfair at all.

Mr. LENROOT. No; I am sure the Senator did not intend to be.

Mr. McKELLAR. But the President began his address by discussing the coal strike and then suggested two minor measures, not dealing with fundamentals at all, and after he concluded with that, he then discussed the rail strike, and at the end of the discussion of the two he said:

It is not my thought to ask Congress to deal with these fundamental problems at this time—

Evidently, as I construe it, meaning both the fundamental problems of the coal industry and the fundamental problems of the railroad industry, both of which he had been discussing.

Mr. LENROOT. But the Senator must concede that previous to that time the President had asked Congress to deal with the emergency in two specific ways.

Mr. McKELLAR. Yes; but in purely minor ways. He made two suggestions as to the coal industry, which were minor and did not deal with fundamentals at all. It is possible the President may have had in mind just what the Senator says; he may not have had in mind both industries, but he did not say so. His statement—

It is not my thought to ask Congress to deal with these fundamental problems at this time.

He had not merely been talking about the railroad problem; he had been discussing both the railroad problem and the coal problem.

Mr. LENROOT. The only point is that the President did ask Congress to deal with the present emergency in two specified ways, and therefore the intimation the Senator from Tennessee would throw out by quoting an isolated paragraph is not correct. That is the only point I wished to make.

Mr. McKELLAR. I am sorry that I differ with the Senator, for whose opinions I entertain a very high esteem, of course, but I do think that the President had in mind, judging from his language, both the coal industry and the railroad industry.

Mr. LENROOT. Mr. President, just one other word. The situation, as I said awhile ago when the Senator from Iowa yielded to me, has changed very materially in the last 48 hours. Up to 48 hours ago it was the general belief and expectation that both the railroad strike and the anthracite strike could be settled, as the bituminous strike has been settled, and that the only remaining question would be that of the distribution of coal and the prevention of profiteering. The chairman of the Committee on Interstate Commerce [Mr. CUMMINS] introduced a bill this morning which it is believed will prevent profiteering where coal is being produced; but apparently to-day there is no hope of the settlement of the railway strike in the immediate future, and there is no hope of the settlement of the anthracite strike in the immediate future. The people of the United States have the right, it seems to me, Mr. President, to ask if the Government is powerless and if Congress is powerless, or whether there shall be any further efforts made to secure railway transportation, which is lessening every day, and also the production of anthracite. It seems to me, Mr. President, that the time has come when the power should be given to the President, to be exercised by him in his discretion, to take over the railways, or any part of them that he may deem necessary, and to take over the anthracite coal mines, if he deems necessary, so that the Government may be put in the place of one of the parties instead of merely being a mediator between two parties in dispute; in other words, it appears to me that we have reached the point where the public, which is primarily interested, must be something more than a mediator between two parties in dispute.

So I hope, unless both strikes shall be immediately settled, that Congress will speedily give to the President the power in both these respects. I would very much prefer that the President would himself ask that the power be given to him than have any Senator to act upon his own initiative in introducing the necessary legislation.

Mr. McKELLAR. Mr. President——

Mr. LENROOT. I yield.

Mr. McKELLAR. I was just going to suggest to the Senator, in view of the fact that the President has taken the question up in the attitude of a mediator, if it would not be better that whatever legislation might be initiated and carried through should follow some recommendation coming from the Executive under the power given him by the Constitution? Does not the Senator agree with me as to that?

Mr. LENROOT. I have just stated that; but the point of the Senator from Tennessee was impliedly a criticism of the President for not asking for this power before.

Mr. McKELLAR. I specifically stated to the Senator from Idaho that I was not to be put in the attitude in any way of criticizing the President. I was merely stating what the President himself had said.

Mr. LENROOT. The Senator read from the President's message.

Mr. McKELLAR. Exactly.

Mr. LENROOT. At the time the message was delivered it was believed that both the railroad strike and the anthracite strike would be settled. That situation has since changed.

Mr. McKELLAR. Certainly. That merely restates what I have said. I merely read from the message of the President and stated what I thought it meant.

Mr. LENROOT. Yes. I have the greatest esteem for my friend from Tennessee, but his purpose in reading the President's message must have been to convey the impression that the President of the United States did not now believe that he should have any such power.

Mr. McKELLAR. Oh no. What I intended to convey was that on last Friday, when the President appeared before Congress, he did not then believe that he would need any additional legislation, because surely if he had then believed that he needed any additional legislation beyond that which he suggested he would have said so.

Mr. LENROOT. Did the Senator believe that we then needed no additional legislation?

Mr. McKELLAR. I can not answer that question. I do not know whether we needed it or not. I do not know that we need it now. I think if the President would take aggressive action along the lines that he has himself suggested, probably we would not need it.

Mr. LENROOT. Mr. President, this matter is so important, it is so vital to the interests of the country, that I hope it may be conducted, whatever is done by Congress, without any partisanship upon either side of the aisle.

Mr. McKELLAR. Why, of course.

Mr. CURTIS. Mr. President, the Senator from Washington [Mr. JONES] has a bill that he wants to ask unanimous consent to consider, and several Senators desire to present measures; so I ask that the unfinished business be temporarily laid aside.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the unfinished business, House bill 10874, is temporarily laid aside.

OPERATION OF COAL MINES.

Mr. WALSH of Massachusetts. Mr. President, as I do not desire to be longer accused of inaction, I send to the desk a joint resolution which I ask to have read and referred to the Committee on Interstate Commerce.

There being no objection, the joint resolution (S. J. Res. 236) authorizing the President to take over and operate coal mines, and for other purposes, was read the first time by its title and the second time at length, and referred to the Committee on Interstate Commerce, as follows:

Resolved, etc., That the President of the United States be, and he is hereby, authorized to take over and operate in the name of the United States Government the coal mines of the country, part or all of whose products are transported in interstate commerce.

That there is hereby appropriated the sum of $1,000,000 to enable the President to begin the carrying out of this act.

FLOODS AND LEVEES OF THE MISSISSIPPI RIVER.

Mr. MOSES. Out of order, I ask unanimous consent to report a concurrent resolution from the Committee on Printing, and I ask further unanimous consent for its immediate consideration.

Mr. CURTIS. Let it be read.

The PRESIDENT pro tempore. The Secretary will report the resolution for information.

The reading clerk read Senate Concurrent Resolution 28, submitted by Mr. RANSDELL on the 23d instant, and it was considered by unanimous consent and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed 1,000 copies of part 2 of House Report No. 300, Sixty-third Congress, second session, entitled "Floods and levees of the Mississippi River," for the use of the Senate document room.

USE OF BUILDINGS IN ALLEYS.

Mr. JONES of Washington. Mr. President, a short time before the war we passed legislation excluding the use of buildings in alleys in Washington as dwelling houses. It was not to take effect, however, for a certain time. The war came on, and from time to time conditions have required the extension of the time of going into effect of that act. It will go into effect either in October or November of this year, and conditions are such that it seems desirable to give a little further extension of time. The Committee on the District of Columbia have reported a bill extending the time until June, 1923. The chairman of the committee, the Senator from Delaware [Mr. BALL], asked me to try to get the bill through as soon as possible, because it is very desirable that action should be taken by the House before the present law goes into effect. So I ask unanimous consent for the present consideration of the bill, which is Senate bill 2597.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2597) to amend an act entitled "An act to provide, in the interest of public health, comfort, morals, and safety, for the discontinuance of the use as dwellings of buildings situated in the alleys of the District of Columbia," approved September 25, 1914, which had been reported from the Committee on the District of Columbia with an amendment.

The amendment was, on page 2, line 2, after the word "until," to strike out "the expiration of two years following the date of the proclamation by the President of the exchange of ratification of the treaty of peace between the United States and the Imperial German Government" and insert "June 1, 1923," so as to make the bill read:

Be it enacted, etc., That the operation of the second paragraph of section 1, relating to the use or occupation of alley buildings as dwellings, of the act of Congress approved September 25, 1914, entitled "An act to provide, in the interest of public health, comfort, morals, and safety, for the discontinuance of the use as dwellings of buildings situated in the alleys in the District of Columbia," be, and the same hereby is, postponed until June 1, 1923.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ANNIE B. LEE.

Mr. CALDER. From the Committee to Audit and Control the Contingent Expenses of the Senate, I report back favorably Senate Resolution 303, to pay six months' salary to the widow of a late employee of the Senate, and ask unanimous consent for its present consideration.

The resolution (S. Res. 303) submitted by Mr. CALDER June 7, 1922, was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay from the miscellaneous items of the contingent fund of the Senate, fiscal year 1921, to Annie B. Lee, widow of George L. Lee, late a laborer in the employ of the Senate, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

COMPENSATION OF WORLD WAR VETERANS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 5 o'clock and 40 minutes p. m.) the Senate adjourned until to-morrow, Friday, August 25, 1922, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate August 24, 1922.

ASSISTANT APPRAISER OF MERCHANDISE.

Charles Marks, of Reading, Pa., to be assistant appraiser of merchandise in Customs Collection District No. 11, with headquarters at Philadelphia, Pa., to fill an existing vacancy.

POSTMASTERS.

CALIFORNIA.

Don C. Saunders to be postmaster at Lompoc, Calif., in place of D. C. Saunders. Incumbent's commission expired January 24, 1922.

James B. Rickard to be postmaster at Santa Barbara, Calif., in place of T. M. Storke, resigned.

CONNECTICUT.

Edmund E. Crowe to be postmaster at South Norwalk, Conn., in place of Andrew Leary. Incumbent's commission expires September 5, 1922.

ILLINOIS.

Fuller Green to be postmaster at Kenney, Ill. Office became presidential October 1, 1920.

INDIANA.

Nell Manley to be postmaster at Laurel, Ind., in place of H. C. Jones. Incumbent's commission expires September 5, 1922.

Joseph Corzetto to be postmaster at St. Mary-of-the-Woods, Ind., in place of W. A. Michael, resigned.

IOWA.

Bessie Wyllie to be postmaster at Bridgewater, Iowa. Office became presidential January 1, 1921.

Arthur H. Ricke to be postmaster at Breda, Iowa, in place of J. H. Schulte. Incumbent's commission expired January 24, 1922.

KANSAS.

Madison Hinchman to be postmaster at Beverly, Kans. Office became presidential July 1, 1920.

MARYLAND.

Harry M. Kimmey to be postmaster at Westminster, Md., in place of T. J. Coonan, deceased.

MICHIGAN.

Ethel P. Colwell to be postmaster at Harrisville, Mich., in place of Duncan McRae, declined.

MINNESOTA.

Carl J. Johnson to be postmaster at Hendricks, Minn., in place of C. O. Holtey, failed to qualify.

MISSISSIPPI.

Thomas F. Kirkpatrick to be postmaster at Hollandale, Miss., in place of A. M. Furniss, resigned.

MISSOURI.

Henry C. Brantley to be postmaster at Newtown, Mo. Office became presidential April 1, 1920.

NEW HAMPSHIRE.

Willard C. Fogg to be postmaster at Lincoln, N. H., in place of N. R. Dowd, resigned.

NEW JERSEY.

Reid Howell to be postmaster at Rutherford, N. J., in place of S. Dan Ely, resigned.

NEW YORK.

Frank Davis to be postmaster at Stone Ridge, N. Y. Office became presidential April 1, 1920.

Mamie A. Davies to be postmaster at Holland Patent, N. Y., in place of F. K. Roberts, deceased.

Scott E. Gage to be postmaster at Morris, N. Y., in place of C. T. Backus, failed to qualify.

Thomas L. Wright to be postmaster at Schoharie, N. Y., in place of G. W. Snyder. Incumbent's commission expired March 17, 1921.

NORTH DAKOTA.

Frank W. Lovestrom to be postmaster at Adams, N. Dak., in place of Maebelle Fletcher, resigned.

Ivah M. Shuley to be postmaster at Edinburg, N. Dak., in place of L. B. Ness, resigned.

OKLAHOMA.

Robert B. Hill to be postmaster at Alex, Okla. Office became presidential January 1, 1920.

Sam A. Snyder to be postmaster at Hennessey, Okla., in place of S. A. Snyder, deceased.

PENNSYLVANIA.

Arthur R. Lovell to be postmaster at Blandburg, Pa. Office became presidential July 1, 1920.

John Stephenson to be postmaster at Elmora, Pa. Office became presidential July 1, 1920.

Charles W. Goss to be postmaster at Expedit, Pa. Office became presidential October 1, 1920.

Charles H. Potter to be postmaster at Titusville, Pa., in place of C. L. Gibbs, deceased.

SOUTH DAKOTA.

Philip S. Feldmeyer to be postmaster at Garden City, S. Dak. Office became presidential January 1, 1921.

Floyd V. Stephens to be postmaster at Canover, S. Dak., in place of S. E. Lawver, failed to qualify.

TEXAS.

Clark A. Fortner to be postmaster at Crosby, Tex. Office became presidential January 1, 1920.

Bessie E. Fairless to be postmaster at Palo Pinto, Tex. Office became presidential January 1, 1922.

Leo W. Cox to be postmaster at Buda, Tex., in place of G. C. W. Wayland, deceased.

William T. Henderson to be postmaster at Odessa, Tex., in place of W. T. Henderson. Incumbent's commission expired June 30, 1920.

VERMONT.

Bertram F. Atherton to be postmaster at Waterbury, Vt., in place of W. J. O'Neill. Incumbent's commission expires September 19, 1922.

VIRGINIA.

John W. Rodgers to be postmaster at Hampden Sidney, Va. Office became presidential April 1, 1921.

Lela O'N. Scott to be postmaster at Amelia Court House, Va., in place of S. A. Southall, resigned.

Clinton L. Wright to be postmaster at Norfolk, Va., in place of J. A. Lesner, removed.

WASHINGTON.

Adam G. Cook to be postmaster at McKenna, Wash. Office became presidential July 1, 1922.

WISCONSIN.

Herman Rau to be postmaster at Chilton, Wis., in place of W. A. Hume. Incumbent's commission expires September 5, 1922.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 24, 1922.

POSTMASTERS.

INDIANA.

Lloyd S. Norton, Hope.
Fred D. Price, Plymouth.

IOWA.

Carl G. Anderson, Arthur.

MINNESOTA.

Margaret E. Gillespie, Carlton.
James P. Lund, Jasper.
Arch Coleman, Minneapolis.
Otis T. Wentzell, Moorhead.

NEW JERSEY.

Ada E. Holmes, Sayreville.

NEW YORK.

Harry C. Teich, Leeds.
William S. Elwyn, Woodstock.

OHIO.

Ross H. Hartsock, Waynesville.

PENNSYLVANIA.

Ralph H. Scott, Conway.
Warren F. Leister, Curtisville.
Harry C. Koller, Myerstown.
Luna J. Sturdevant, North Warren.
Isaac L. Shilling, Reedsville.
Edward D. Hannum, Rosedale.
Beula E. Giesy, Russellton.
George F. Carling, Sayre.
Frank Shupp, Shillington.
John F. Hawbaker, West Fairview.

VIRGINIA.

James K. Carter, Clinchport.
Isabelle R. Damron, Clintwood.
Louise J. Nottingham, Eastville.
Nellie D. Swan, Gordonsville.
Annie G. Smith, Purcellville.
William H. Moatz, Round Hill.
Elton H. Finks, Somerset.

WEST VIRGINIA.

Woodford G. Whitman, Monaville.

HOUSE OF REPRESENTATIVES.

THURSDAY, *August 24, 1922.*

The House met at 12 o'clock noon, and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, we thank Thee that our times are in Thy hands. Our hope reposes in Thy Fatherhood. Give us a deep insight into this relationship that we may interpret wisely our own lives. Deliver us from all temptations which so often assail. May we enter into our duties with a strong sense of responsibility and to administer our trusts with true hearts. O do Thou bring forth by the power of Thy truth a fairer country and a better citizenship. When the day's experiences are hard and difficult bless and restrain them. Through Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

ALFRED P. RECK.

Mr. CABLE. Mr. Speaker, I move to take from the Speaker's table House bill 858, with Senate amendments, and agree to the Senate amendments.

The SPEAKER. The gentleman from Ohio moves to take from the Speaker's table a House bill with Senate amendments and agree to the Senate amendments. The Clerk will report the bill and the Senate amendments.

The Clerk read as follows:

A bill (H. R. 858) for the relief of Alfred P. Reck.

The Senate amendments were read.

Mr. GARNER. Mr. Speaker, will the gentleman yield?

Mr. CABLE. I yield.

Mr. GARNER. If the gentleman will yield to me two or three minutes, I want to make an inquiry.

Mr. CABLE. I will yield for an inquiry on the bill.

Mr. GARNER. I do not care to make the inquiry on the bill. The gentleman has an hour's time.

The SPEAKER. The discussion has to be confined to the bill.

Mr. GARNER. Then I will ask unanimous consent to proceed out of order for three minutes.

Mr. CABLE. I yield to the gentleman three minutes.

The SPEAKER. The gentleman from Texas asks unanimous consent to proceed out of order for three minutes. Is there objection?

There was no objection.

ORDER OF BUSINESS.

Mr. GARNER. I wish to do this for the purpose of asking the gentleman from Wyoming [Mr. MONDELL] if he will not be good enough to tell the House of Representatives what he expects to do next week, so that the Members of the House will be informed. I notice in the RECORD this morning that the gentleman from Wyoming says that next week there will probably be important business. The gentleman ought to take us into his confidence and say what he expects to do, inasmuch as many Members want to go home. There is nothing here to do now. The tariff bill has been sent to conference, and the President's message has been acted upon with reference to the Coal Commission. It seems to me the gentleman ought to tell the House, so that the membership may be informed, just exactly what he expects to do next week or at this session of Congress.

Mr. MONDELL. I regret that the gentleman from Texas was not present and did not hear what I said last evening, when I informed the House regarding legislation. It is my present purpose, as soon as we can dispose of some bills on the Speaker's table, to ask unanimous consent that when the House adjourns to-day it adjourn until Monday. It is my hope and my expectation that by Monday the Committee on Interstate and Foreign Commerce may be prepared to report a bill making provision, as suggested by the President, to prevent, so far as we may be able to do, profiteering in coal. Such a measure will be, I trust, reported to the House and we may be in a position to take it up as early as Monday. At least I think we should take up the consideration of such a measure as soon as possible; if not on Monday, then Tuesday. We expect the bill that we passed yesterday to be returned to the House from the Senate in the very near future. Of course, we want to be here to dispose of that. The Senate has under consideration the bonus bill. I do not know, of course, how long the consideration of that bill will require in the Senate, but we should be here and prepared to act upon the measure, should it come to us. These matters are likely to be ready for our consideration and atten-

tion early next week, so that I hope all the Members will be here, in the fore part of the week, at least.

Mr. GARNER. May I ask the gentleman, after he gets through with the measure he speaks of, is it the intention to take a recess until the conferees get through with the tariff or to continue from day to day to adjourn?

Mr. MONDELL. My hope is—and, of course, I am only one Member and can not settle these things or determine them—my hope is that after we shall have disposed of the matters I have referred to we may be able to secure a recess until such time as the conferees may be ready to report on the tariff bill.

Mr. MOORE of Virginia. May I ask the gentleman a question?

Mr. MONDELL. Yes.

Mr. MOORE of Virginia. The President made other recommendations. Among them he urgently advised action on a bill that has been pending for some time, designed to afford protection to aliens, as he stated it.

Mr. MONDELL. Yes.

Mr. MOORE of Virginia. Is it the purpose to attempt to take that bill up prior to the recess?

Mr. MONDELL. My own thought is that the antilynching bill, which is now in the Senate, and which gives the Federal Government jurisdiction in cases of mob violence, would cover the situation as regards aliens who were victims of mob violence.

Mr. MOORE of Virginia. Without approving or disapproving anything in advance, I beg leave to suggest to my friend that that is hardly a correct conclusion. It does not seem to me that that bill has anything like the scope of the measure which the President said should be passed, and which, perhaps, at this time is represented by a bill introduced by Senator KELLOGG.

Mr. MONDELL. I confess I have not read the bill introduced by the Senator from Minnesota, to which the gentleman refers, and therefore I am not able to compare it with the antilynching bill. If that bill contains certain provisions it is claimed to contain, I should not be disposed to support it. But I believe that the antilynching bill would cover the case of aliens. If enacted into law, it would be possible under Federal authority to punish those who violate the laws as members of mobs, whether citizens or aliens were injured.

Mr. HUMPHREYS. That is only where a man is mobbed after he has been accused of some offense.

Mr. MONDELL. I think in every case where aliens have been the subject of mob violence they have been accused of some offense.

Mr. McKENZIE. Will the gentleman yield for a question?

Mr. MONDELL. Yes.

Mr. McKENZIE. The gentleman from California [Mr. CURRY] has introduced a very important bill affecting officers discharged from the Army, to remedy what is asserted to be an error in the Army appropriation bill.

Mr. MADDEN. I deny that there is any error in the Army appropriation bill.

Mr. MONDELL. If the gentleman will allow me——

Mr. STAFFORD. The gentleman from Illinois is casting reflections on the Senate conferees on the Army appropriation bill as well as the House conferees, and I resent that.

Mr. McKENZIE. I do not think it is up to the gentleman from Wisconsin to interject himself into this colloquy.

Mr. STAFFORD. I will do so in due time.

Mr. McKENZIE. I am not casting reflections on anyone, but I simply want to ask the gentleman from Wyoming if it is to be the policy that bills that are now pending before the Committee on Military Affairs—and there are a number of very important ones—are not to be considered by the House even if the committee should remain here to report those bills? Is it to be the policy that these bills are not to be taken up until the regular session in December?

Mr. MONDELL. I will say to the gentleman that there are a number of bills which gentlemen consider quite important. I am inclined to think that there are a very few measures before the House that are in the nature of emergency measures, and I think those measures ought to be acted upon. Of course there is a difference of opinion with regard to the urgency of the measure that the gentleman refers to and a number of other measures.

These matters will all have consideration, and it will be for the House and the committees of the House to determine how much we shall do before we recess; but I believe that the Members generally are very anxious to have a recess at as early a date as possible [applause], and they do not care to take up anything at this time unless it be a matter of very great urgency.

Mr. DUNBAR. Will the gentleman yield?

Mr. MONDELL. I yield to the gentleman from Indiana.

Mr. DUNBAR. Apropos to the question asked by the gentleman from Texas regarding the antilynching bill, would its provisions apply to the families of those persons who were killed at Herrin, Ill.?

Mr. MONDELL. I think the gentleman can answer that as well as I can. The bill would not, of course, apply to anything that has occurred heretofore. It is a measure of general application, intended to arm the Federal Government to discourage and punish mob violence and mob crime.

Mr. DUNBAR. Will the gentleman yield further?

Mr. GARRETT of Tennessee. Mr. Speaker, I ask for the regular order.

The SPEAKER. The regular order is demanded. The regular order is the motion of the gentleman from Ohio [Mr. CABLE] to concur in the Senate amendments to the bill (H. R. 858) for the relief of Alfred P. Reck.

Mr. CABLE. Mr. Speaker, this bill has already passed the House. It passed the Senate with a reduction in the amount carried in the bill. It affects a young soldier, Alfred P. Reck, who was in the second battle of the Marne. He was wounded by liquid fire, captured and unable to accept his appointment. The Senate has cut down the amount allowed from $672.41 to $529.34. That is the only important amendment. The others are minor ones. I would like to have the House concur in the Senate amendment.

The SPEAKER. The question is on agreeing to the Senate amendments.

The Senate amendments were concurred in.

LIBERTY LOAN SUBSCRIBERS OF CERTAIN BANKS.

Mr. EDMONDS. Mr. Speaker, I move to take from the Speaker's table the bill (H. R. 5775) for the relief of Liberty loan subscribers of the North Penn Bank, of Philadelphia, Pa.; Santa Rosa National Bank, Santa Rosa, Calif.; Mineral City Bank, Mineral City, Ohio; Robbinsdale State Bank, Robbinsdale, Minn.; and Farmers & Merchants State Bank, Kenmare, N. Dak., and concur in the Senate amendments to the bill.

The SPEAKER. The gentleman from Pennsylvania moves to take from the Speaker's table a bill which the Clerk will report and to concur in the Senate amendments.

The Clerk read the title of the bill.

Mr. EDMONDS. Mr. Speaker, these amendments simply change the carrying out of this act, which has been before the House and the Senate, from the auditing department of the Treasury to the Comptroller General. There is nothing else in the amendments.

The SPEAKER. The question is on concurring in the Senate amendments.

The Senate amendments were concurred in.

SOLDIERS AND SAILORS OF THE WAR WITH SPAIN.

Mr. KNUTSON. Mr. Speaker, I present a conference report and ask that it be printed under the rule.

The SPEAKER. The gentleman from Minnesota presents a conference report to be printed under the rule.

LEAVE TO EXTEND REMARKS.

Mr. JAMES. Mr. Speaker, I ask leave to extend my remarks on the bill passed yesterday and other legislation.

The SPEAKER. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD as indicated. Is there objection?

There was no objection.

Mr. QUIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by placing therein an address delivered by my colleague from Louisiana [Mr. ASWELL] before the State convention of the American Legion at Baton Rouge, La., August 17, 1922.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to extend his remarks as indicated. Is there objection?

There was no objection.

Mr. QUIN. Mr. Speaker, under the leave granted I print the following:

LEGION THRILLED BY BRILLIANT ASWELL ADDRESS—CONGRESSMAN FROM NATCHITOCHES DELIVERS INSPIRED TALK TO SOLDIERS—AIM IN PEACE DIFFICULT AS WAR TASK—LOUISIANA PROUD OF RECORD HER TROOPS MADE IN THE CONFLICT.

The Legionnaires were thrilled Thursday afternoon by J. B. ASWELL, Congressman from the eighth district, who delivered an eloquent address before them at their meeting in Garig hall.

Mr. ASWELL, recognized as one of the most eloquent speakers of the Nation, was never more earnest, or more lofty in the sentiments than in his address Thursday afternoon at the State convention of the American Legion men for Louisiana, who gave the Congressman from Natchitoches rapt attention.

Mr. ASWELL spoke as follows:

"State Commander Ewing, Legionnaires, Ladies, and Gentlemen: The concentrated essence of the meaning of your mission is expressed by your preamble:

"For God and country; to uphold and defend the Constitution; to maintain law and order; to foster and perpetuate a 100 per cent Americanism; to preserve the memories and incidents of our association in the Great War; to inculcate a sense of individual obligation to the community, State, and Nation; to combat the autocracy of both the classes and the masses; to make right the master of might; to promote peace and good will on earth; to safeguard and transmit to posterity the principles of justice, freedom, and democracy; to consecrate and sanctify our comradeship by our devotion to mutual helpfulness.

"To accomplish large purposes, whether for good or evil, men have organized. In all ages men have confessed their helplessness when isolated and have been forced to form habits, alliances, unions, or leagues. From the wild emotions aroused by the conflict of battle men always readily come together for a single purpose. Through all the history of nations—ancient and modern—until recent times, the usual purpose of the organizations of war veterans was military or selfish. It was for defense or conquest only and meant more bloodshed. In the earlier wars of the world these alliances were made by victorious monarchs and rulers, while the soldiers who bore the burdens of battle and suffered the horrors of war had no rights in making agreements or alliances. They merely obeyed their masters. The war veteran was the chattel of the conquering ruler. He was often used to base and ignoble ends.

"How different the spirit and purpose of this hour. Every veteran a free man. The inspiring sentiment of your preamble moves the human heart. It calls to larger freedom, a freedom that means not merely to get and to gain, to do what we like, but a freedom that liberates the spirit from selfish impulses and ennobles mankind.

"Your concentration of every spiritual and material energy upon the single purpose of war is now changed to the immense complexity and the many purposes of peace. The submergence of the individual in the struggle of the race has ended. The character, the courage, the initiative, the divine touch in the human soul of the individual are now our chief concern and represent the highest purposes of our existence. We recognize in a new way that progress lies with the individual inspired to service. As a result of the war we have a new faith in the sovereign worth of individuality and we glorify equality of opportunity and mobility in action for all. We abhor autocracy, do not argue with it, but fight it wherever found. You men of the Legion are to see to it that this standard shall not be lowered.

"Your preamble recognizes no section, race, or creed, but it stands rightly for principles and policies which are not partisan, political, sectarian, or selfish. From the day the Government called her sons to the colors to this hour there has not been a note of selfishness in this great struggle. This attitude is the secret of American world supremacy to-day. What the seers of past ages have dreamed and planned and longed for has come to you—the opportunity to bring peace, stability, and brotherhood among men.

"The Good Book says, 'Then shall two be in the field; the one shall be taken and the other left.' Of the 24,000,000 registered for service in the war, 4,000,000 were taken and 20,000,000 were left. You are 4,000,000 men, the selected blood of the race, organized now with the same spirit and purpose, the same devotion and sacrifice, that enabled you to win fame and honor in camp and on the battle field. No one doubts that, with heads erect and eyes uplifted, you are fulfilling your high mission now as you did then. 'For God and country.' To work for the one is to serve the other. 'To maintain law and order'; to drive anarchy and Bolshevism from our country; to lead the way in obedience to law, in loyalty to country, and in serving our fellow man.

"The question of what percentage of foreigners should be admitted annually and naturalized is answered by your demand for a 100 per cent Americanism, which means that 100 per cent of the foreigners in the country must be assimilated properly, made to forget the hyphen, and not only swear but live allegiance to our institutions and to the flag of our country, or else be deported. In this grave question the American Legion is exerting a mighty power for good upon the Nation and upon the world. Men of the Legion, avail yourselves fully of your opportunity in this matter and make clearer still the meaning of your mission.

"Every war tends to demoralize society. It corrupts morals and creates disastrous extremes of wealth and poverty. Extreme poverty and quick-won, unlawful wealth both lower the moral tone of society, resulting in moral decay and political disease. The World War was no exception. You are to lead in the readjustment. Your goal should be not only 100 per cent Americanism but 100 per cent legionnaires, because this is the most potentially mighty organization the world has ever produced and is national in every sense of the word. It is imperative that the South be fully represented and do its full part in shaping policies and working out the destiny of the Legion. The world remembers that it was the South whose soldiership and valor wrested Yorktown from the British, whose Patrick Henry kindled the fires of the Revolution, whose Jefferson wrote the Declaration of Independence, whose Washington commanded the Continental Army, whose Madison framed the Constitution, whose Marshall interpreted the organic law, whose Davis was defeated and persecuted but never conquered, and whose Lee lives forever unsurpassed and unexcelled as the military genius of all time. The South lives up to her glorious history and traditions to-day by producing the man who had the courage to sacrifice himself for a cause and whose magna charta offers peace and individual liberty to the oppressed of all the world—Woodrow Wilson. It is peculiarly thrilling to recall that our own Edward White rose to the first jurist of the land, while John A. Lejeune, son of Louisiana and a distinguished graduate of the State university, made his name immortal as the heroic leader of the marine "devil dogs" as they stopped the enemy in his tracks and hurled him back across the Marne.

"With such an illustrious heritage as this, why should not the service men of Louisiana find courage to gain leadership in the work of the American Legion? The best thing that comes out of war is comradeship. The warm-hearted Louisianian and southerner is best fitted for leadership in the Legion because he leads all the rest in loving his fellow man.

"Four hundred and thirty years ago the British Parliament enacted the first legislation for the relief of disabled soldiers. The principle of caring for the disabled has survived through every war since that time. The finest expression of this principle is embodied in legislation affecting our disabled of the World War.

"I make no excuse or defense for the small calibered, Sawyerlike, incompetent, and negligent temporarily in the executive departments. They should be kicked out, responsibility centralized in the Veterans' Bureau, and high-powered efficiency demanded and secured. There are those in Congress and in the Legion who, seeking sensational notoriety, assault the Veterans' Bureau, but your purpose and mine is to get results for our boys. It has been my experience in handling hundreds of cases that the bureau is most sympathetic and eager to aid every disabled soldier and his dependents. There have been mistakes, of course, in administering the law. At first the problem was overwhelming in its magnitude, but there is no place or excuse for the obstructionist now. There has been at times irritating delay in securing compensation, but I have found much of it due to the fact that the claimant failed to present conclusive evidence connecting his disability with the service. The procedure was new to the claimant. It should be remembered that there are now pending in the bureau at Washington more than a million claims and in the branch office in New Orleans 94,000 claims. I have found the chiefs at Washington and Col. Dallas B. Smith and his associates in New Orleans most intelligent, capable, and self-sacrificing officers, who seek in every possible way to help the disabled. The duty of the Legion is to suggest definite and exact remedial legislation and to cooperate actively with the Veterans' Bureau in helping separate the worthy claims from the unworthy, to see to it that the worthy claimant receives full justice at the hands of the Government, and to see to it also that the unscrupulous and unworthy shall not ride in to compensation on the wave of sympathy for the really disabled. This is a serious question, both for the disabled soldier and the taxpayer, and the finest service the Legion can render is to help the Government learn who are the needy and the worthy and who are the imposters and the unworthy. The taxpayers want the disabled tenderly cared for, the Legion is eager to help, and the Congress readily responds.

"I was at a baseball game. The moment was exciting and the crowd was standing. A group of hardy fellows pushed through the crowd carrying a crippled boy to the front so he could see, shouting as they did it, 'Give the crippled kid a chance.' This is the attitude of the American people, the American Legion, and the American Congress. Whatever else happens, we are determined that the crippled soldier boy shall have a chance for his life and return to happiness. And let me say emphatically that in caring for the sick and the disabled soldier the Government is not dispensing charity but recognizing its most sacred debt.

"It is imperative that every service man in Louisiana take active part in the consideration of Legion questions, because, while the individual agitator and propagandist in the Legion is not seriously recognized at Washington, the record shows that the composite judgment of this great organization is sought and heeded by the Congress.

"You richly deserve such recognition. I saw your fine spirit in the training camps in this country, and I saw you in France. I followed you in person through Chateau-Thierry and Belleau Woods; I saw you drive the enemy back and back, out of Fismes and Reims, and over the Chemin des Dames hills; I saw you annihilate the enemy in the St. Mihiel salient and watched you begin the mighty drive through the Argonne. My convictions as to your achievements are based upon personal information.

"Let us not forget, too, that the patriotic people of this country—every man and every woman—were with you heart and soul, with you with their prayers, their energies, their money, their all. You were their right arm that reached across the seas and snatched autocracy from the throne.

"The courage of the American people in boldly defying the murderous German mines and submarines to send troops in overwhelming numbers and supplies in abundance to France in defense of our country and the liberty of man amazed the world and staggered the enemy. The rapidity and magnitude of the construction of American docks, railroads, supply stations, means of equipment, lines of communication and transportation in France was a subject of admiration and wonder among the Allies and discouragement to the enemy. The record was never equaled and can never be surpassed.

"To face shot and shell in bloody conflict beyond the seas was heartrending and appalling to those left at home, but when one stands as I stood in the arena of that death grapple, and witnessed the scenes of mutilated or murdered women and children, devastated lands, destroyed homes, villages, towns, and cities—one veritable hellish vortex of ruin and despair—he is thankful that America went to the front in time to hold the battle lines 3,000 miles away from our own shores.

"There are many scenes that record supreme moments of courage, but let me point to one. When the history is correctly written, it will be recorded that in July, 1918, with intrepid daring unsurpassed by the troops of Wellington or Napoleon, the heroic dash of American troops through the Chateau-Thierry region saved Paris, stopped the advancing enemy, fired anew the depressed spirits of the soldiers of France, drove the enemy back across the Marne, turned the tide of battle against the Germans, who were despoiling the homes and devastating the fair land of France, and marked the beginning of the end of German domination in Europe and its growing menace to the democratic civilizations of the world. The military authorities of England, France, Belgium, and Italy, in the moment of gratitude and victory, repeatedly declared in my presence that the American soldiers had saved Paris and won the war.

"How fine it is to be an American, to be living now, and to be young enough to be a member of this organization! I am proud to be the friend of the American Legion and wish I were eligible to membership. I am proud, too, to work and live in a country capable of producing men trained to go but one way, who never retreated a single step—men who startled the world by driving the autocrat from the land and the assassin and despot from the sea—men who, in France and on the sea, lived as gentlemen, fought as heroes, and died like gods! Because of your record, I am prouder than ever that I am a Louisianian and an American. God bless you, every one!"

Mr. SUMNERS of Texas. Mr. Speaker, I ask unanimous consent to proceed, out of order, for three minutes.

The SPEAKER. The gentleman from Texas asks unanimous consent to proceed, out of order, for three minutes. Is there objection?

There was no objection.

Mr. MONDELL. Will the gentleman yield to me to submit a request for unanimous consent?

Mr. SUMNERS of Texas. I yield to the gentleman from Wyoming.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Monday next.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that when the House adjourns to-day it adjourn to meet on Monday next? Is there objection?

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object, I will ask the gentleman from Wyoming if it

is in contemplation that there shall be a vote at any early date upon the disposition of the Muscle Shoals property?

Mr. MONDELL. Well, so far as I am acquainted with the views of the Members on this side—and I am guided wholly in my attitude by the views of the majority of the majority—I do not believe that it is desired that there should be an early consideration of the Muscle Shoals matter. I think the majority on this side believe that for the time being the Muscle Shoals situation is taken care of by the provision made for the continuation of the work on the Wilson Dam.

Mr. GARRETT of Tennessee. Oh, well, that does not put the plant in operation, and I see no reason why we should not be in session to-morrow and the next day to consider that matter.

Mr. MONDELL. Of course the gentleman from Tennessee knows very well that we would not consider that matter if we were in session to-morrow.

Mr. GARRETT of Tennessee. We can at least make an honest effort.

Mr. STAFFORD. It would be a feeble effort.

Mr. MONDELL. The gentleman from Tennessee while earnest and anxious to have the matter disposed of, is a man who ordinarily accepts a condition when it is clearly outlined and defined and understood, and the gentleman I think would serve no useful purpose toward having the Muscle Shoals matter considered by insisting on having the Members here to-morrow to answer to a roll call.

Mr. GARRETT of Tennessee. Mr. Speaker, still reserving the right to object, that is a matter of very great importance not only to a section of the country but to the whole country. There ought to be a determination of what the Government will do with the property which it has there.

Mr. MONDELL. That is true, but there is no situation demanding an immediate settlement of that question. There is nothing to be gained by an immediate settlement of it in view of the fact that we have already provided for the continuation of the one essential work at Muscle Shoals. We would be at work there now except for the fact that the gentleman and those who followed him on his side insisted on delay in beginning the work on the Wilson Dam. We are not responsible for that.

Mr. GARRETT of Tennessee. The gentlemen from Wyoming treats the matter facetiously.

Mr. MONDELL. Not at all, but seriously.

Mr. GARRETT of Tennessee. The operation of that great plant is a matter that ought to be determined as to how it is to be operated. The amendment to which the gentleman refers to the appropriation was only for the completion of the dam. Of course the dam would have been completed by now had it not been for the action of gentlemen on the other side of the House two years ago in defeating an appropriation for the continuation of the work.

Mr. MONDELL. Not necessarily, there might have been some work done on it at a very high cost without knowledge or information, but it could not have been completed as the gentleman knows.

Mr. GARRETT of Tennessee. The action of the responsible Republican majority at that time cost the Government about $4,000,000.

Mr. MONDELL. I do not know how the gentleman figures that out. I know of no loss. If we were chargeable with any neglect of duty at that time, the gentleman has acquiesced in and approved of it by extending the period of delay. [Laughter]

Mr. GARRETT of Tennessee. The gentleman well understands why the limitation was placed on the appropriation.

Mr. MONDELL. No; I never did understand, except that it seemed to be politics of not a very high order, from anybody's standpoint.

Mr. GARRETT of Tennessee. The limitation was placed on the use of the appropriation in order that the Congress might have an opportunity to pass on the final disposition of the matter. Now, there is no reason why it should not be considered at once. The Committee on Military Affairs has reported, and there are three reports. I am not now advocating any particular report. What I am asking is that the House shall now have an opportunity to pass upon that matter.

Mr. MONDELL. The House will pass on that matter in due time, as soon as it is necessary to do so. In the meantime we have provided for the continuation and development at Muscle Shoals. That is all that could be done if we were to act upon the reports.

The SPEAKER. Is there objection?

Mr. GARRETT of Tennessee. I object.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed without amendment bills of the following titles:

H. R. 11396. An act to regulate foreign commerce in the importation into the United States of the adult honeybee; and

H. R. 11699. An act relating to the appointment of the Chief of Staff of the Army.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3938. An act granting the consent of Congress to the county courts of Lafayette and Ray Counties in the State of Missouri to construct a bridge across the Missouri River;

S. 3618. An act to amend section 135 of the Judicial Code; and

S. 3878. An act to repeal an act entiled "An act to authorize the construction of a bridge across the St. Marys River at or near Wilds Landing Ferry between Camden County, Ga., and Nassau County, Fla.," approved October 13, 1921.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3878. An act to repeal an act entitled "An act to authorize the construction of a bridge across the Saint Marys River at or near Wilds Landing Ferry, between Camden County, Ga., and Nassau County, Fla.," approved October 13, 1921; to the Committee on Interstate and Foreign Commerce.

S. 3938. An act granting the consent of Congress to the county courts of Lafayette and Ray Counties in the State of Missouri to construct a bridge across the Missouri River; to the Committee on Interstate and Foreign Commerce.

S. 3618. An act to amend section 135 of the Judicial Code; to the Committee on the Judiciary.

ANTI-SALOON LEAGUE.

Mr. TINKHAM. Mr. Speaker, I offer the following resolution which I send to the desk, which I claim is a privileged resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read the resolution.

Mr. MANN. Mr. Speaker, I move to lay the resolution on the table.

The motion was agreed to.

Mr. DYER. Mr. Speaker, I move to expunge the resolution from the RECORD.

Mr. MANN. Mr. Speaker, I raise the point of order on that. I do not believe the House can expunge from the RECORD a proceeding it has taken in the House, nor do I see any object in expunging it.

Mr. TOWNER. Mr. Speaker, the question as to whether or not it can be expunged from the RECORD is a question for the House alone to determine, and I see no reason why the point of order could be raised against it because of the fact that the matter has already been laid on the table. It is scandalous; it is against the rules of the House. There was no possible justification under the rules of the House for the offering of the resolution. It seems to me it would be entirely proper to consider the question of whether or not it should be expunged from the RECORD.

Mr. DYER. Mr. Speaker, a parliamentary inquiry. Can anything be put into the RECORD of that nature, or of like nature, and then there be no authority under the rules of the House to expunge it from the RECORD?

The SPEAKER. If anything is contrary to the rules of the House, of course the point of order can be made against it. No point was made in this instance.

Mr. DYER. The point of order would not have prevented it from being read, because it was offered as a privileged matter.

The SPEAKER. Certainly.

Mr. DYER. The point of order was made that it was not privileged, and in the meantime it had been read into the RECORD.

The SPEAKER. The Chair does not see how the reading could have been prevented. When Members claim that a proposition is privileged, it has a right, the Chair thinks, to be read.

Mr. TOWNER. That is very true. There was no possible way in which it could be prevented; but the motion could be made to strike it from the RECORD. However, it is within the province of the Speaker to recognize the condition that it was subject to objection, and the motion made to expunge it from the RECORD based upon that fact is certainly within the rules and practices of the House.

Mr. WINGO. Mr. Speaker, I submit to the Chair that it is perfectly in order to move to expunge the resolutions or remarks of the gentleman from Massachusetts from the RECORD on the ground that they reflect upon the official conduct and integrity of a Member of the House. That is one of the grounds of objection to remarks made on the floor. To say because a Member of the House under the guise of presenting a privileged resolution can say things in that resolution that if he attempted to say in debate he would be called to order for, would be permitting a man to do indirectly that which the rules of the House forbid him doing directly. If it reflects upon the integrity of the gentleman from Minnesota [Mr. VOLSTEAD], the House has a right to strike it from the RECORD. Certainly, on its face it did raise that question.

The object of the gentleman who introduced it was to attack the integrity of the gentleman from Minnesota and to declare him unfit for membership in the House. Now, if this House believes it is true, it should have permitted its consideration, but it has evidenced its judgment by only two men voting against tabling the resolution. I submit that the motion of the gentleman from Missouri [Mr. DYER], which is to expunge it from the RECORD, is not only in order, but that the integrity of this House demands that we expunge that resolution from the RECORD and do it at once. [Applause.]

Let me make one further statement, if the House will permit. I say that we ought to do that. I do not object to any man on either the wet or dry side of partisan debate being bitter or critical, but when a man takes advantage of the rules and under his responsibility starts a formal proceeding and endeavors to insert such matters as indicated into the RECORD he ought to confine himself to the limits that are clearly recognized and observed in formal proceedings that become part of a permanent record. [Applause.]

Mr. MANN. Mr. Speaker, the motion made by the gentleman from Missouri [Mr. DYER] was that the resolution be expunged from the RECORD. I do not know just what would be accomplished if that motion were agreed to. Of course, the House undoubtedly has the right to prevent the printing in the CONGRESSIONAL RECORD, by order of the House, anything it desires, and it can provide that this shall not be printed in the CONGRESSIONAL RECORD. Whether the motion of the gentleman from Missouri, if agreed to, would strike it out of the Journal I do not know, but I would like to inquire whether the effect of that would be to do so.

Mr. WINGO. Will the gentleman yield for a question?

Mr. MANN. Yes.

Mr. WINGO. Does not the gentleman understand that a motion to strike from the RECORD means from the record of the House and not necessarily the RECORD carrying the debate? It means from the record of the House proceedings, including the Journal. Does not the gentleman think that that is a fair interpretation?

Mr. MANN. I think that might be the interpretation. I made the inquiry as to what might be the effect.

The SPEAKER. The Chair is informed by the Journal clerk that when the House has ordered anything to be expunged from the RECORD it is not carried in the Journal.

Mr. MANN. Mr. Speaker, I withdraw the point of order.

The SPEAKER. The question is on the motion of the gentleman from Missouri [Mr. DYER].

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. DYER. Mr. Speaker, I ask for a division.

The House divided, and there were—ayes 141, noes 3.

So the motion was agreed to.

Mr. ROBSION. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The Chair thinks it is too late. The Chair had announced the result.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I renew my request that when the House adjourns to-day it adjourn to meet on Monday.

Mr. GARRETT of Tennessee. I object.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

Mr. GARRETT of Tennessee. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 154, nays 68, answered "present" 2, not voting 203, as follows:

YEAS—154.

So the motion was agreed to.

The Clerk announced the following pairs:
Until further notice:
Mr. Ackerman with Mr. Larsen of Georgia.
Mr. Cramton with Mr. Carter.
Mr. Burton with Mr. Oldfield.
Mr. Appleby with Mr. Mead.
Mr. Henry with Mr. Raker.
Mr. Larson of Minnesota with Mr. Buchanan.
Mr. Codd with Mr. Martin.
Mr. Johnson of South Dakota with Mr. Brand.
Mr. Husted with Mr. Oliver.
Mr. Kelley of Michigan with Mr. Overstreet.
Mr. Kahn with Mr. Kitchin.
Mr. Bacharach with Mr. Crisp.
Mr. Crowther with Mr. Fulmer.
Mr. Jones of Pennsylvania with Mr. Mansfield.
Mr. Burroughs with Mr. Logan.
Mr. Radcliffe with Mr. Dominick.
Mr. Summers of Washington with Mr. Rainey of Alabama.
Mr. Stevenson with Mr. Rainey of Illinois.
Mr. White with Mr. Connally of Texas.
Mr. Thompson with Mr. Tague.
Mr. Stiness with Mr. Taylor of Arkansas.
Mr. Wood of Indiana with Mr. Harrison.
Mr. Yates with Mr. Bell.
Mr. Mudd with Mr. Lyon.
Mr. Temple with Mr. Dupré.
Mr. Huckriede with Mr. Thomas.
Mr. Kleczka with Mr. Collins.
Mr. Gahn with Mr. O'Brien.
Mr. Fess with Mr. Sabath.
Mr. Beedy with Mr. Fields.
Mr. Burtness with Mr. McSwain.
Mr. Strong of Pennsylvania with Mr. Gallivan.
Mr. Kiess with Mr. Cockran.
Mr. J. M. Nelson with Mr. Johnson of Kentucky.
Mr. Siegel with Mr. Jacoway.
Miss Robertson with Mr. Woods of Virginia.
Mr. Rose with Mr. Goldsborough.
Mr. Miller with Mr. Riordan.
Mr. Dunn with Mr. Ten Eyck.
Mr. Page with Mr. Deal.
Mr. Luce with Mr. Rucker.
Mr. Shelton with Mr. Hawes.
Mr. Mott with Mr. Sullivan.
Mr. Perkins with Mr. Wise.
Mr. Treadway with Mr. Clark of Florida.
Mr. Rhodes with Mr. Lazaro.
Mr. Reber with Mr. Blanton.
Mr. Nolan with Mr. Byrns of Tennessee.
Mr. Porter with Mr. Taylor of Colorado.
Mr. Newton of Missouri with Mr. Montague.
Mr. Riddick with Mr. Stedman.
Mr. A. P. Nelson with Mr. Stevenson.
Mr. Sinclair with Mr. Kindred.
Mr. Tillman with Mr. Sears.
Mr. Parker of New Jersey with Mr. Kunz.
Mr. Perlman with Mr. Sisson.
Mr. Morin with Mr. Stoll.
Mr. Ramseyer with Mr. Cantrill.
Mr. Cooper of Ohio with Mr. Johnson of Mississippi.

Mr. YOUNG. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman in the Hall, listening, when his name was called?

Mr. YOUNG. I was standing in the doorway.

The SPEAKER. The Speaker is not expected to take the responsibility of determining a question of that kind.

Mr. YOUNG. I could not say I was in the Hall.

Mr. ANTHONY. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present in the Hall and listening when his name was called?

Mr. ANTHONY. I will say to the Speaker that I entered that door when the Clerk called the name of Mr. WURZBACH, and when I entered this door here he called the name of Mr. ZIHLMAN.

The SPEAKER. The Chair is not required to determine whether a Member was present or not.

Mr. ANTHONY. I was listening at both ends of the Hall. Under the circumstances, Mr. Speaker, I would say that I was present. I desire to vote "aye."

The result of the vote was announced as above recorded.

The SPEAKER. The House stands adjourned until 12 o'clock noon to-morrow.

Thereupon (at 1 o'clock and 15 minutes p. m.) the House adjourned until to-morrow, Friday, August 25, 1922, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. EDMONDS: Committee on Claims. H. R. 10727. A bill to provide for the carrying out of the award of the War Labor Board of July 31, 1918, in favor of certain employees of the Bethlehem Steel Co., at Bethlehem, Pa.; without amendment (Rept. No. 1183). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII the Committee on Pensions was discharged from the consideration of the bill (H. R. 12402) for the relief of Frank Ayers, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BULWINKLE: A bill (H. R. 12445) to authorize the purchase of a site for a post-office building in the city of Lincolnton, Lincoln County, N. C.; to the Committee on Public Buildings and Grounds.

By Mr. APPLEBY: A bill (H. R. 12446) to amend section 13 of the river and harbor act of March 3, 1899; to the Committee on Rivers and Harbors.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANSORGE: A bill (H. R. 12447) granting a pension to Eliza H. Lockwood; to the Committee on Invalid Pensions.

By Mr. BURDICK: A bill (H. R. 12448) for the relief of Werner E. Follin; to the Committee on Naval Affairs.

By Mr. COLE of Ohio: A bill (H. R. 12449) granting a pension to Floy Johnson; to the Committee on Invalid Pensions.

By Mr. FAUST: A bill (H. R. 12450) granting a pension to Emma Wilson; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: A bill (H. R. 12451) granting an increase of pension to Robert M. Maginniss; to the Committee on Pensions.

By Mr. MAPES: A bill (H. R. 12452) granting a pension to Herman R. Woltman; to the Committee on Pensions.

Also, a bill (H. R. 12453) granting a pension to Louis U. Hilton; to the Committee on Pensions.

Also, a bill (H. R. 12454) granting an increase of pension to Albert T. White; to the Committee on Pensions.

Also, a bill (H. R. 12455) granting an increase of pension to Walter S. Swanger; to the Committee on Pensions.

By Mr. PATTERSON of Missouri: A bill (H. R. 12456) granting a pension to Sarah M. Jones; to the Committee on Invalid Pensions.

By Mr. TAYLOR of Tennessee: A bill (H. R. 12457) granting a pension to Nancy D. Kitts; to the Committee on Pensions.

Also, a bill (H. R. 12458) granting an increase of pension to John M. Allen; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 12459) granting an increase of pension to Edward F. Reed; to the Committee on Pensions.

By Mr. YOUNG: A bill (H. R. 12460) for the relief of Clement A. Lounsberry; to the Committee on Military Affairs.

By Mr. IRELAND: A resolution (H. Res. 413) providing for compensation for the female attendants in the ladies' retiring rooms of the House; to the Committee on Accounts.

Also, a resolution (H. Res. 414) for the relief of Elizabeth Sabine; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6218. By Mr. ANSORGE: Petition of Leroy T. Harkness, for the New York State Coal Commission, urging the carrying out of the President's recommendations for a governmental agency to control the distribution and price of coal; to the Committee on Interstate and Foreign Commerce.

6219. By Mr. APPLEBY: Petition of W. P. Bowman, of Trenton, N. J., relative to an adequate protective tariff; to the Committee on Ways and Means.

6220. By Mr. KISSEL: Petition of Seeman Bros. (Inc.), New York City, N. Y., relative to the reduction in the mailing rates on advertising papers; to the Committee on the Post Office and Post Roads.

6221. Also, petition of Greater New York Conference of Seventh-day Adventists, New York City, N. Y., protesting against the enactment into law Senate bill 1948 and House bills 9753 and 4388; to the Committee on the District of Columbia.

6222. Also, petition of Puritan Soap Co., Rochester, N. Y., relative to the 50 per cent zone advances in mail rates; to the Committee on the Post Office and Post Roads.

6223. By Mr. MALONEY: Petition of the New England conference board of the United Textile Workers, at Lowell, urging an investigation of the textile industry; to the Committee on Labor.

6224. By Mr. SPEAKS: Papers to accompany House bill 12393, granting a pension to Leona Stealey; to the Committee on Invalid Pensions.

SENATE.

FRIDAY, *August 25, 1922.*

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Almighty God, though Thou canst not be contained in the heaven of heavens, we bless Thee that the humble and contrite heart can always be Thy dwelling place. We therefore invoke that spirit which shall assure us of Thy constant presence and in-dwelling, so that all of our duties may be sanctified by Thy guidance, that Thy wisdom may be imparted, and that along all the way of life we may fulfill Thy good pleasure. We ask through Jesus Christ our Lord. Amen.

THE JOURNAL.

The reading clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

USE OF WASTE FUEL PRODUCTS.

Mr. PITTMAN. Mr. President, I have an official statement from the Bureau of Mines touching the use of certain waste fuel products. I think the statement will be of interest at this particular time, and I ask to have it printed in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The statement is as follows:

WASHINGTON, D. C.

As an emergency fuel, a mixture of fuel oil with fine coal in as large proportions as the coal will absorb and hold is suggested by the United States Bureau of Mines to steam coal users and gas manufacturers to augment their fuel supply during the present shortage.

Slack coal that has a high percentage through an 8-mesh screen, or which may be crushed to sizes of one-eighth inch or less, will take up in oil from 30 to 40 per cent of its own weight and make a fuel high in calorific value. Coarse slack coal, however, as judged by a representative sample from the Pittsburgh market, will absorb oil to only 3 to 10 per cent of its own weight, which would give a fuel having only about 4 to 15 per cent increased heating value. The finer the size of the coal, therefore, the larger is the amount of oil which will be held. Tests made by the Bureau of Mines at its Pittsburgh experiment station indicate that the mixture can be made with either bituminous slack or anthracite culm.

This method bears a relationship to the Trent process of purifying coal by fine grinding and amalgamation with oil, now in operation at a plant at Alexandria, Va., which has demonstrated the success of a combination of oil and coal for steam making, gas manufacturing, and other fuel purposes. The present emergency proposal does not contemplate the cleaning process, but involves merely the simple mixing by shovel or concrete mixer. The Trent Corporation has volunteered to assist the Government in advising in the use or application of oil-coal mixtures, and to waive, during this emergency, any claim of infringement of its process which may or may not be involved by the simple mixing of fuel oil and coal without reference to cleaning.

An oil refinery at Baltimore, it is reported, mixed by shovel a ton of heavy Mexican fuel oil with two or three tons of western Maryland slack coal, and used it successfully in a switch engine. At the experiment station of the Bureau of Mines at Pittsburgh it was found that mixtures containing 1 ton of Mexican fuel oil and 4 to 5 tons of Pittsburgh slack coal could be used in a hand-fired furnace.

In using oil-coal mixtures, the fire will smoke badly after firing, or while breaking up the coke bed from time to time. From such limited amount of testing as has been done by the Bureau of Mines, it was shown that careful firing is required to prevent continuous smoking. Experimenting must be done in each case to determine the best method of firing.

Chain grates and certain other automatic stokers are probably well adapted to handle the oil-fuel mixtures if the bin and feeding devices are suitable. Oil-fuel mixtures will not fire spontaneously, but undoutedbly care should be exercised to ventilate bins where external heat may tend to drive off the lighter gases, although the fuel oil which is on the market has had the lighter oils distilled from it.

Anthracite culm or dust which would sift through ordinary grate bars can be used successfully when mixed with the oil, as the oil causes it to adhere, and the oil residue cokes as soon as heated. Oil and anthracite mixtures are not smokeless with hand firing the Bureau of Mines tests indicate.

This simple mixture of fuel oil and coal is proposed by the Bureau of Mines merely as a temporary measure. While under conditions of normal fuel supply such a mixture probably would not prove satisfactory unless it involved the cleaning feature embraced in the Trent process, in places where fuel oil is available it can be used to piece out a poor coal supply without the changes in equipment necessary to convert boilers to oil burning.

THE RAILROAD STRIKE.

Mr. UNDERWOOD. Mr. President, I have a number of telegrams from leading farm organizations in Alabama in regard to the pending railroad strike and their position with reference to the matter. I ask that the telegrams may be printed in the RECORD and referred to the Committee on Interstate Commerce.

There being no objection, the telegrams were referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

HARTSELLE, ALA., *August 24, 1922.*

Hon. OSCAR W. UNDERWOOD,
Senate, Washington, D. C.:

The United States Labor Board was organized for the purpose of arbitrating and preventing just such a tie-up in transportation as we now have throughout the country. We are not in sympathy with the Government taking over the railroads. If this strike continues it will bring on our people unwarranted suffering during the coming winter and heavy financial loss to all kinds of farming interests. It appears to us that the Railway Labor Board should have full authority to bring about a settlement of the railroad strike. If they have not this power Congress should immediately enact such legislation as is necessary to enforce their findings. The Morgan County division of the Alabama farm bureau stands squarely behind you in demanding that the rulings of the United States Railway Labor Board be recognized and rigidly enforced, and that all laws for the protection of life and property be upheld at any cost. To this end we pledge you our hearty support and cooperation.

JAS. F. CAIN,
President Morgan County Farm Bureau.

SELMA, ALA., *August 25, 1922.*

OSCAR W. UNDERWOOD,
United States Senate, Washington, D. C.:

A resolution: We, the members of the Dallas County Farm Bureau, join other like organizations of Alabama and the United States in a hearty indorsement of the telegram sent the President of the United States on August 14 by Mr. J. R. Howard, president of the American Farm Bureau Federation. We take this means of soliciting your best efforts in having Congress recognize the jurisdiction of the Railway Labor Board. We beg of you to use every honorable means against Government control or ownership of the railroads of the United States.

Respectfully,

DALLAS COUNTY FARM BUREAU,
J. L. EDWARDS, *President.*

ROANOKE, ALA., *August 24, 1922.*

OSCAR W. UNDERWOOD,
U. S. Senate, Washington, D. C.:

The railroad strike has assumed proportions which are already bringing acute distress to many farmers. It is particularly serious in the fruit and vegetable district of the far West where because of the seasonable character and high perishability of the product, storage is impossible. Many thousand farmers seem destined to lose their whole year's labor unless settlements are speedily made. The grain and live-stock men are already beginning to feel the effects of the strike through lack of transportation equipment to properly clear their feed lots and elevator facilities. In the long run the economic brunt of the whole situation will fall upon the basic producer as has been true in every previous similar controversy.

Press reports indicate that Congress will be asked to take over the roads and operate them as governmental agencies pending settlement of the questions involved. The American farmer is not nor never will be a strong proponent of governmental ownership. He prizes too highly personal initiative and property rights. He remembers transportation conditions during the brief trial of governmental operation during the war and just as shipping conditions are showing some signs of improvement does not relish the return of governmental operation.

The American Farm Bureau Federation, by regularly adopted resolution, has always been opposed to Government ownership of public utilities. We believe that at this time the taking over of the roads and mines by the Government would not be justifiable. It would establish a precedent which would compel the Government to similar action whenever future controversies might arise, and indeed might invite the bringing on of other controversies to compel Government interference. The taking over of the roads and mines, furthermore, would not facilitate the settlement of the issues involved which we believe to be fundamental in this crisis.

So far as railroad controversy is concerned, the Railway Labor Board was instituted for this very purpose. The board has held extended hearings upon the issues in controversy and is in a position to know the merits of both sides of the dispute better than any other agency or person. The findings of the board should be accepted by the railroad owners and employees as well as by the general public. If the board has not authority to enforce its findings the law should be amended providing the same. When any party, in any controversy, refuses fair arbitration it indicates a selfish and unfair disposition.

Unless the coal miners and operators can quickly agree, there should by law be constituted an agency similar to the Railway Labor Board for the settling of controversial labor issues, which board should be given full authority to enforce its mandates.

The American Farm Bureau Federation will stand squarely behind you in vigorous demand for the recognition of the jurisdiction of the Railway Labor Board and for a strict enforcement of every law for protection of lives and property and maintenance of order at any expense.

T. G. FINCHER,
President Randolph County Farm Bureau.

RENT OF POST-OFFICE BUILDINGS.

Mr. McKELLAR. Mr. President, I have a letter from the Postmaster General with reference to the rentals paid by the Government for post-office buildings throughout the country.

The annual rental bill, it is shown, amounts to the enormous sum of $11,660,056. The Postmaster General discussed the matter in a most intelligent way. I think he is exactly right in saying that our post-office buildings ought to be built by the Government. I think probably if his plan was carried out it would save the Government not less than $5,000,000 a year, which is a matter that ought to be saved. I ask unanimous consent that the letter may be published in the RECORD and referred to the Committee on Post Offices and Post Roads.

There being no objection, the letter was referred to the Committee on Post Offices and Post Roads and ordered to be printed in the RECORD, as follows:

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., August 21, 1922.

Hon. KENNETH MCKELLAR,
United States Senate.

MY DEAR SENATOR MCKELLAR: Herein I send to you a copy of a communication this day transmitted by me to the Joint Commission on Postal Service in which I advocate the Government ownership of buildings for postal use as against the present practice of leasing those buildings, and I hope that the Congress will enact the necessary legislation to bring about this Government ownership.

Sincerely yours,

HUBERT WORK.

—

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., August 21, 1922.

JOINT COMMISSION ON POSTAL SERVICE,
Washington, D. C.

MY DEAR SIRS: There are at present 5,836 post offices in leased quarters and 1,119 post offices in buildings owned by the Government. The aggregate annual rental paid for the occupancy of these 5,846 leased quarters is $9,262,515.47, but this aggregate does not include the amount paid for quarters not under lease, which when added to $9,262,515.47 makes a present total annual rental bill of $11,660,056, not including garages, to be paid by the Government from appropriation made to the Post Office Department. There are at present 5 Government-owned buildings actually under construction and 11 under contract for construction in which post offices will find quarters.

The earnings of the Post Office Department have doubled in the last 10 years. This ever increasing postal business demands, and must have, space in which it may be efficiently and economically carried on. During the last holiday season several cities handled heavy parcel-post business on the sidewalks under protection of guards but without protection against the weather. This increased volume of postal business has forced the use of basements and subbasements and has brought about a congestion in workrooms in some of our larger cities. This condition caused by inadequate and unsuited quarters is detrimental to the comfort and physical well-being of many postal workers, is subversive to efficiency of service, and from any viewpoint is wholly undesirable. Renewal leases entered into from March 4, 1921, to August 5, 1922, show an increase in space of 71 per cent over the space in the expired leases, but in this calculation the space of additional post offices established at various places since the expiration of the aforesaid leases because of the necessities of the service is not included. If this new and additional space be included then there is an increase of 153 per cent over the expired leases. The per cent of increase in the rental of these renewed leases over the expired leases is 147, but this does not include the rental for the new and additional post offices which when added make an increase of 342 per cent over the rental of these expired leases.

In addition to the amount of $11,660,056 annually paid for the rental of post-office quarters, there are 76 garages throughout the country under lease, for which the amount of $588,921 is annually paid for rental. This sum of $588,921 when added to $11,660,056 brings the total amount of rental paid by the Government for buildings leased for postal uses up to $12,248,977. Confronted with this annual expenditure of $12,248,977 for rental of real estate for postal uses, which will annually steadily increase, two questions at once arise for answer with reference to first-class post offices, the larger second-class post offices, and the larger classified stations and their branches. First, viewed solely from the financial side, is the present plan of leasing in keeping with the best business methods and practices? Second, aside from the financial point of view, is the present plan giving the best postal-service results?

My answer to the first question is in the negative. I am decidedly of the opinion, and I believe that your business experience and observation will support my view, that annually a great saving in money will result if a policy of Government ownership were adopted. I do not advocate Government ownership of all offices, stations, and garages, for manifestly at times and on occasions it is better business to lease than own. But I do advocate and urge Government ownership in those cases where an economy would be realized and where good business judgment demands ownership rather than tenancy. Of course, at times efficiency of service will suggest leasing rather than ownership even when a considerable money saving could be effected by ownership, but these cases are exceptional and good judgment can always be depended upon to leave such cases to the leasing plan.

Many reasons can be given in support of the Government ownership plan, among which are the following:

1. The Government can borrow money on practically a 4 per cent basis to build post offices, whereas when it leases it pays a rental sufficient to permit the lessor to borrow money at 7 per cent, and in some cases as much as 10 per cent. In other words, by this lease policy the Government is indirectly paying 7 per cent and 10 per cent interest on money when it is able to borrow at 4 per cent.

2. When the Government owns a post office building it is free from taxation, whereas when it leases an office it is indirectly paying taxes at the rate of about 2 per cent on the investment and many times at a very much higher rate. When a building required for postal uses represents an investment of a large amount of money it is readily seen that the taxes alone which the Government must pay to the lessor in the form of rent is a very considerable sum.

3. Another way of stating in a combined form the two preceding propositions is that the ordinary lessor usually obtains about 10 per cent gross on his investment, whereas if the Government owned the property, building it with 4 per cent money, it would be costing the Government about one-half as much as it is obliged to pay in the form of a lease for the use of a building.

4. If the Government adopted the policy of owning its post-office buildings, it would be in a position to take property by right of eminent domain, whereas it can not take a leasehold interest by such right.

5. In our negotiations for leases with prospective lessors we are confronted with the fact that we can not build, and therefore we must pay what they ask. If we could say to bidders, "Unless you bring your rental down to a certain reasonable figure the Government will put up a building of its own," we would then have a powerful weapon of negotiation where we now have none. But that is only possible when the Government has adopted a policy of ownership and provided funds to carry out such a policy.

6. Leased buildings are constantly being outgrown, confronting the department with the necessity of either adding additional space or seeking an entirely new location. With a lease policy and without the right of condemnation the additional adjacent space is often held at unconscionable figures, and we are often compelled to pay far more than we know to be reasonable on account of the situation.

7. When a Government post office or postal building is erected by a lessor, in a very large percentage of cases it enhances the value of all property in the vicinity, so that it becomes necessary to renew such lease at much higher figures, whereas if the Government owned the building it would receive the benefit of the enhancement of values which it has created.

8. The lessor who builds a post office or postal station for the Government on a contract for lease for 10 or 20 years is obliged to figure on absorbing either the whole or a large percentage of the original cost of the building, and this he does. He is obliged to do this because he knows he may be compelled at the end of the lease to reconvert it into other uses. The result of such a lease policy is that the Government not only pays about 10 per cent on the original investment but it pays in addition thereto a certain per cent of all the original investment distributed over a term of years, so that at the end of the lease the Government has nothing, but is obliged to start over again, still at the mercy of lessors, with no efficient weapon to compel fair prices.

My answer to the second of the above questions is also in the negative. It frequently is impossible to lease buildings having satisfactory working conditions, such as natural light and ventilation. In erecting Government-owned buildings ideal working conditions would be provided, thereby insuring the health and comfort of employees, which should always be given first consideration. Then, too, such buildings would be erected in accordance with plans and specifications either made or approved by the Post Office Department based upon its experience with a view to efficiency of service, as well as to cost of service.

The Joint Commission on Postal Service expressed the opinion in its report to the Senate and House of Representatives that the site immediately west of the present general post-office building at New York City, commonly called the Pennsylvania Railroad site, was a desirable site for a building to relieve the present congested condition of the general post office at New York City. The department began negotiations to lease for a period of 20 years a building to be erected on this site, but no agreement has been made. Of the offers submitted to the department the aggregate rental for 20 years ranged from $19,245,695 to $24,900,000. If the Government would purchase this site and erect the building and become the owner instead of lessee, at the end of 20 years the aggregate expenditure would be considerably less than the lowest offer and in addition the Government would own the property. What is said of the advantage of ownership as against tenancy of this New York City site can with equal force be said of other sites. Where the business and circumstances justify Government ownership, it seems unbusinesslike for the Government to deny to itself and forego all the advantages, financial and otherwise, of ownership and become lessee with a money loss and with all the other many attendant disadvantages of tenancy.

It is not my present purpose to suggest or advocate any particular way for the execution of this general plan of Government ownership of buildings for postal use. My present purpose is to call attention to the necessity for the adoption of this general plan of Government ownership of buildings within the limitation of good business judgment, as hereinabove pointed out, as against the leasing system. I regard the present plan of leasing as unbusinesslike, and in view of this present practice I hope the Congress may enact the necessary legislation to effect the change herein suggested and advocated.

I earnestly solicit your support and cooperation.

Sincerely yours, HUBERT WORK, *Postmaster General.*

REPORTS OF COMMITTEES.

Mr. MCNARY. From the Committee on Manufactures I desire to make a partial report (No. 877), pursuant to Senate Resolution 295, agreed to June 5, 1922, relative to the price of crude oil and gasoline. I ask that it may be printed and lie on the table.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Without objection, it is so ordered.

Mr. CAPPER, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 2763) for the relief of Sanford Kirkpatrick (Rept. No. 878);

A bill (H. R. 6926) for the relief of Abraham Leibovitz (Rept. No. 879);

A bill (H. R. 8553) for the relief of D. V. Bussie (Rept. No. 880);

A bill (H. R. 10234) for the relief of Edward A. Purdy (Rept. No. 881); and

A bill (H. R. 11078) for the relief of the Mary Ann Shipping Co. (Rept. No. 882).

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (H. R. 6929) for the relief of Horace E. Walker, reported it with an amendment and submitted a report (No. 883) thereon.

Mr. BORAH. From the Committee on Education and Labor I report back with amendments the bill (H. R. 12377) to establish a commission to be known as the United States Coal Commission, for the purppose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes. I will ask that the bill may lie on the table. I am going to call it up in a few minutes, when we shall have closed the routine morning business.

The PRESIDING OFFICER. The report will lie on the table.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MOSES:

A bill (S. 3952) granting a pension to Edith B. Towner (with accompanying papers); to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3953) granting a pension to Anna M. All; to the Committee on Pensions.

By Mr. HEFLIN:

A bill (S. 3955) to compensate Lieut. L. D. Webb, United States Navy, for damages to household effects while being transported by Government conveyance; to the Committee on Naval Affairs.

By Mr. CALDER:

A joint resolution (S. J. Res. 237) to appoint a commission for the exchange of sites for lighthouse station at Tompkinsville, Staten Island, N. Y., between the Federal Government and the officials of the city of New York; to the Committee on Public Buildings and Grounds.

EXTERMINATION OF INSECTS.

Mr. CALDER submitted the following resolution (S. Res. 342), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Architect of the Capitol be, and he is hereby, authorized and directed to make a contract for the extermination and banishment of insects from the Senate wing of the Capitol and the Senate Office Building at an expenditure not to exceed $1,700, payment to be made monthly from the contingent fund of the Senate on vouchers countersigned by the Architect of the Capitol and approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

REGULATION OF ELECTION EXPENDITURES.

Mr. DILLINGHAM. From the Committee on Privileges and Elections I report back favorably, with amendments, the bill (S. 3603) to regulate expenditures in connection with the nomination and election of Senators and Members of the House of Representatives, and for other purposes. I ask unanimous consent for its present consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Vermont for the immediate consideration of the bill?

Mr. CURTIS. Mr. President, would the Senator mind making a short statement instead of having the bill read?

Mr. DILLINGHAM. I shall be glad to do so. I do not think it will take any length of time.

It will be remembered that the present law upon the statute books relating to corrupt practices in connection with elections covered both the primary elections and the regular elections. The Supreme Court in the Newberry case held that portion of the law relating to primary elections to be unconstitutional. Later on, in a letter published by the Attorney General addressed to Hon. ROBERT LUCE, a Member of the House of Representatives, he gave it as his opinion that—

> As United States Senators are not now elected by legislatures of the States, as contemplated in the act, it is my opinion that this fact, in connection with the holding in the Newberry election case, makes it unnecessary for a candidate for United States Senator to file any statement whatever in connection with his nomination or election.

It makes it, therefore, doubtful to say the least whether we have any law now upon the statute books which is enforceable. Under the circumstances the Senator from Ohio [Mr. POMERENE] introduced a bill which covered both primary and general elections. When the committee came to consider the question it was found that so far as the general elections law was concerned there was a wide diversity of view. Hardly any member of the committee was fully satisfied with the existing law, but the differences of opinion were so great as to what changes should be made that the committee were of the opinion that it would be impossible at this late day in the session to agree upon a bill of a new character which could be reported out from the committee. Under those circumstances the Senator from Ohio very graciously consented to lay aside, for the present, at least, any legislation relating to primary elections.

It was then agreed by the committee that they would report to the Senate a bill reenacting the existing law relating to general elections with only such changes as would fit it to the new conditions under the constitutional amendment. That is to say, the law now applies to the election of Senators by the legislatures of the States. Changes have been made which simply fit it to the present system of elections by the people. The committee reported that bill in the nature of a substitute for the bill introduced by the Senator from Ohio.

It seemed to the committee necessary to adopt this course because it would be deplorable to go into the general elections, which are to come this fall, without any law upon the statute books governing the subject. The committee thought it better to have the existing law put upon a valid basis so that we would not be subjected to the criticism of allowing the election to come with no law relating to the election of Senators. For this reason the committee have reported in favor of the substitute for the bill introduced by the Senator from Ohio, which provides for the reenactment of the present law relating to the election of Senators, with the changes which I have suggested.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Vermont yield to the Senator from Arkansas?

Mr. DILLINGHAM. Certainly.

Mr. ROBINSON. Did the Committee on Privileges and Elections concur in the conclusion expressed by the Attorney General that the existing law can not be applied to elections by popular vote, it having been enacted prior to the change in the Constitution?

Mr. DILLINGHAM. The committee did not consider that question from a legal standpoint. They simply took the position that it raised a doubt about the question. Even if the Attorney General is wrong, as very likely he is upon that subject—although I do not express myself upon it—even if he is entirely wrong in the opinion he expressed in the letter which I have quoted, it leaves us in the position that the Department of Justice might hesitate to initiate proceedings against any person who violated the law as it now stands upon the statute books.

Mr. ROBINSON. Entertaining the view the Attorney General has expressed, the Department of Justice would not institute proceedings against persons who were candidates for United States Senator who failed to comply with what has heretofore been regarded as the statute applicable to the subject. I appreciate fully the viewpoint which the Senate committee took concerning the subject. If I understand the Senator correctly, there is no Federal law applicable to expenditures in primary elections and the bill which the Senator reports from the Committee on Privileges and Elections does not attempt to deal with that subject.

Mr. DILLINGHAM. It does not. But, may I add——

Mr. ROBINSON. It treats the situation as being somewhat of an emergency character and deals solely with expenditures in the general elections.

Mr. DILLINGHAM. The Senator is entirely right; but I want to say in this connection, in justice to the committee, that when they decided to pursue this course they adopted a motion authorizing the chairman of the committee to appoint a subcommittee of five to take into consideration the whole question of legislation applying to primary and general elections, to draft a bill, and to report to the full committee not later than the 1st day of January next, so that the whole matter may be taken up in the new session of Congress after mature thought has been given to it by members of the committee.

Mr. ROBINSON. I presume the committee found they did not have the time to agree upon the terms of a bill which might be made applicable to primary elections.

Mr. DILLINGHAM. That is precisely the fact.

Mr. ROBINSON. Of course, any attempt on the part of the Federal Government to regulate expenditures in the election of Senators and Representatives which does not contemplate the regulation of expenditures in primary elections would prove in many States totally ineffective to prevent the expenditure of large sums of money. In many of the States the primary elections practically determine who shall represent the State in this body and who shall represent the various districts in that State in the body at the other end of the Capitol. There are some States in the North where a Republican nomination is equivalent to an election, and there are many States in the South where a Democratic nomination is equivalent to an election. So that if the primary elections be eliminated from Federal regulation, the regulation at best would be only piecemeal. I appreciate, however, the difficulties under which the committee at this late day have acted.

The Attorney General expressed his opinion on the subject some two or three months ago, I believe? The opinion of the Attorney General is not recent?

Mr. DILLINGHAM. No.

Mr. ROBINSON. It was expressed shortly after the decision in what we know as the Newberry case?

Mr. DILLINGHAM. I think the date of it was November 15.

Mr. ROBINSON. May I ask the Senator—for information and in no controversial spirit—why the committee did not promptly, upon the expression of that opinion by the Attorney General, take up the subject matter and attempt to work out a bill dealing with the whole subject so as to enable the Congress to dispose of it at once?

Mr. DILLINGHAM. I do not remember the date of the bill introduced by the Senator from Ohio.

Mr. POMERENE. Mr. President, if the Senator will permit me, I can give the date. If I may go back, I presented a Senate resolution in the form of a rule of the Senate in January. After some consideration that was referred back, with the consent of the Senate, to the Committee on Privileges and Elections. Within a very short time after the Attorney General gave out the opinion to which the Senator from Arkansas refers, I learned about it and sent for a copy of it; and on April 20 I introduced a bill in the Senate covering both primary and general elections. That bill was referred to the Committee on Privileges and Elections on that day. I think that was the day when the Committee on Rules was discharged from the further consideration of the resolution which I had previously introduced.

There was delay in getting a meeting of the committee; and still later a subcommittee was appointed, and there were some delays in getting that committee together; but I think within the last 10 days both the subcommittee and the general committee have been acting with every diligence.

Mr. ROBINSON. Very well. The statement of the Senator from Ohio now discloses that the bill which formed the basis of the committee's report, which has been made to-day, was introduced by himself a little longer than four months ago—on the 20th of April. What I am interested to know is why the committee did not directly take up the matter and report a bill dealing with the whole subject; why it is that we are confronted at the end of the session with a proposition which merely relates to general elections, and which therefore will not prevent the expenditure of unlimited sums in the primary elections, although a good many of the primaries have already been held.

Mr. POMERENE. I do not think that any member of the Committee on Privileges and Elections will accuse me of lack of diligence.

Mr. ROBINSON. Certainly not. My question was addressed to the chairman of the committee, and I should like for the chairman of the committee to have the opportunity to answer it. I was not addressing my inquiry to the Senator from Ohio. What I am interested to know is why the committee waited four months to take any action. I can readily realize that it might have taken two weeks or a month or even two months to thresh out a bill dealing with the whole subject, but why the committee waited for four months to take any action whatever and then bring in a bill which deals only with one phase of the subject I am unable to understand.

Mr. DILLINGHAM. Mr. President, I can only speak for myself. I may have been lacking in enterprise in not calling a meeting of the committee earlier than I did; but I submitted the bill of the Senator from Ohio to a subcommittee, of which he was a member, which had it under consideration for some time before reporting to the full committee. Then we had difficulty in securing a quorum of the committee even to consider the subject after the subcommittee were ready to report.

The PRESIDING OFFICER. Is there objection to the request for the present consideration of the bill reported by the Senator from Vermont?

Mr. UNDERWOOD. Mr. President, I should like to have the bill read before the request is granted.

Mr. CUMMINS. A parliamentary inquiry. Is this a request for unanimous consent immediately to consider the bill?

The PRESIDING OFFICER. The request is for unanimous consent for the immediate consideration of the bill.

Mr. CUMMINS. I should like to ask one of those Senators who are interested in the bill—and we are all interested in it—or who assisted in preparing it, whether it is likely to lead to any debate?

Mr. POMERENE. While there were many differences of opinion as to what the ultimate legislation should be, I think that there is only one objection which will be pressed by any member of the committee, and that is the suggestion which will be made by the Senator from New Jersey [Mr. EDGE]. I do not think it will take very long to dispose of the measure.

Mr. CUMMINS. The situation is this: It has been agreed—it was agreed on yesterday, I think—that the coal bill, which was reported by the Senator from Idaho [Mr. BORAH], should be taken up to-day. It must be taken up during the morning hour, if it is taken up at all. For three days there has been pending before the Senate, at one time or another, a conference report upon what is known as "the judges' bill," and the consideration of the report involves a point of order which, if sustained—and I can hardly think it will be—will necessitate the rereference of the bill to the conference committee. I therefore do not want to give way to a bill which will involve any considerable discussion.

Mr. EDGE. Mr. President, inasmuch as I have been referred to as proposing to offer an amendment, I will say, for the benefit of the Senator from Iowa, that if unanimous consent is granted for the consideration of the bill reported by the Senator from Vermont [Mr. DILLINGHAM], I propose to offer an amendment to the bill and briefly to discuss it. Whether it will lead to further debate, of course, I am unable to say. However, I am not prepared—and I so expressed myself at the committee meeting on yesterday—to have the bill go through without at least the Senate giving consideration to the amendment which I propose to offer.

Mr. CUMMINS. It seems to me that these matters ought to be disposed of in the order in which they come before the Senate.

Mr. POMERENE. Mr. President, I think I have the floor?

The PRESIDING OFFICER. It is hard to say who has the floor, but the Chair thinks that the Senator from Iowa [Mr. CUMMINS] has the floor.

Mr. CUMMINS. I rose simply to ask a question and to express my views in regard to what ought to be done.

Mr. POMERENE. There can be no difference of opinion as to——

Mr. SHIELDS. Mr. President, may I interrupt the Senator?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Tennessee?

Mr. POMERENE. Will the Senator permit me to complete the sentence, and then I will yield?

Mr. SHIELDS. I thought I could save time by the suggestion which I desire to make.

Mr. POMERENE. Very well.

Mr. SHIELDS. Mr. President, if I understand the parliamentary situation, the Senator from Vermont [Mr. DILLINGHAM] has reported a bill this morning on the subject of elections, and he has asked for its immediate consideration.

The PRESIDING OFFICER. That is true.

Mr. SHIELDS. That bill has never been printed and it is not upon the desks of Senators. It is a very important measure involving the people's elections, and it should be, as should all bills and especially election bills, carefully and deliberately considered. I object to its immediate consideration.

The PRESIDING OFFICER. Objection is made to the consideration of the bill. It will be printed and go to the calendar. Are there further reports of committees?

Mr. EDGE. I offer an amendment which I intend to propose later to the bill reported by the Senator from Vermont.

The PRESIDING OFFICER. The Senator from New Jersey offers an amendment, which will be printed and lie on the table.

Mr. POMERENE. I understand, then, that the bill which has been reported by the Senator from Vermont [Mr. DILLINGHAM] will go to the calendar?

The PRESIDING OFFICER. Yes; it will take the regular course.

Mr. POMERENE. I hope that the chairman of the Committee on Privileges and Elections to-morrow will ask to have this measure taken up, in order that it may be disposed of at an early day. I think that, after a very brief discussion, Senators will be ready to vote upon it. I am quite sure that most of them will not be satisfied, in that the bill does not go so far as it should go, but there are conflicting views bearing upon the subject. I am satisfied, however, that, all things considered, the bill in its present form is the best that can be obtained in the way of legislation at this late day in the session.

WRITS OF SUBPŒNA IN UNITED STATES COURTS.

Mr. NELSON. I ask unanimous consent for the immediate consideration of the bill (S. 3917) to amend section 876 of the Revised Statutes. It is a very short bill, and I am quite sure will not provoke any discussion. The bill has been reported unanimously from the Committee on the Judiciary, and relates to the subpœnaing of witnesses in civil cases.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Minnesota for the immediate consideration of the bill named by him?

Mr. UNDERWOOD. Let the bill be reported.

Mr. SHIELDS. I ask that the bill may be read.

The PRESIDING OFFICER. The bill will be read.

The bill was read, and there being no objection the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on the Judiciary with an amendment on page 1, line 11, before the word "court," to strike out "trial," so as to make the bill read:

Be it enacted, etc., That section 876 of the Revised Statutes of the United States be, and is hereby, amended so as to read as follows:

"SEC. 876. Subpœnas for witnesses who are required to attend a court of the United States, in any district, may run into any other district: *Provided*, That in civil cases no writ of subpœna shall issue for witnesses living out of the district in which the court is held at a greater distance than 100 miles from the place of holding the same without the permission of the court being first had upon proper application and cause shown."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ADDITIONAL DISTRICT JUDGES—CONFERENCE REPORT.

Mr. CUMMINS. Mr. President, morning business having closed, as I understand, I ask unanimous consent that the Senate may proceed to the consideration of the conference report upon the judges' bill, so called, being House bill 9103. I desire to add that I have conferred with the Senator from Idaho, who is in charge of the coal bill, and this is satisfactory to him upon condition, and to that condition I agree, that after the point of order or points of order which have been made shall have been ruled upon, then, if there is to be any discussion upon the judges' bill, I will ask that it be displaced by the coal bill.

The PRESIDING OFFICER. The Senator from Iowa asks unanimous consent for the present consideration of the conference report on the judiciary bill. Is there objection?

There being no objection, the Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9103) for the appointment of additional district judges for certain courts of the United States, to provide for annual conferences of certain judges of United States courts, to authorize the designation, assignment, and appointment of judges outside their districts, and for other purposes.

The PRESIDING OFFICER. The Chair would like to hear from the Senator from Iowa on the point of order made by the Senator from Tennessee.

Mr. CUMMINS. Mr. President——

Mr. SHIELDS. Mr. President, will the Senator allow me a moment?

Mr. CUMMINS. I yield to the Senator.

Mr. SHIELDS. I presume the Chair has read all the points of order which were submitted in the statement presented by me, including the one relating to the judge from the middle district of Tennessee.

The PRESIDING OFFICER. Yes; the Chair has read the statement.

Mr. SHIELDS. I think my statement is very full, and the Chair, I think, will apprehend it. I do not care to elaborate it.

Mr. CUMMINS. Mr. President, while I recognize that although a point of order is not debatable, the Senator from Tennessee discussed the matter for something like an hour the other day without any objection on my part. I may add, I will be able to say all that I desire to say upon the points of order, I think, within the space of five minutes.

The first objection made to the bill as reported by the conference committee is that the conference committee agreed to eliminate matter which was agreed to in both the House and the Senate. We are all familiar with the rule, and the conference committee tried very hard to observe the rule, and I think has observed it with absolute fidelity.

Upon the first point the House provision is as follows:

The Attorney General shall, upon request of the Chief Justice, report to said conference on matters relating to the business of the several courts of the United States, with particular reference to causes or proceedings to which the United States may be a party, together with such recommendations or requests as may be deemed proper. The Attorney General shall not be a member of said conference.

Mr. President, the Attorney General is required by law to make a report concerning the business pending in the various courts of the United States every year, and he makes that report as of January 30 each year. The question in controversy, Mr. President, was whether the Attorney General should be required or called upon to make recommendations to the judicial conference. The Senate and the Senate conferees would not agree to the provision which required or authorized the Attorney General to make recommendations to the judicial conference for which the bill provides.

The Senate provision was:

The Attorney General shall, upon request of the Chief Justice, report to said conference on matters relating to the business of the several courts of the United States, with particular reference to causes or proceedings in which the United States may be a party.

It is true that that language is found in the House bill; but the real provision made in the House was that the Attorney General should make recommendations to the conference. To that the Senate would not agree, and therefore the entire provision was stricken out. While it may not be material, I suggest that the Senator from Tennessee was as much opposed to this provision with regard to the participation of the Attorney General in the conference as to any other part of the bill.

Mr. SHIELDS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Tennessee?

Mr. CUMMINS. I do.

Mr. SHIELDS. I hope the Senator will refresh his recollection. The bill as proposed, and to which I objected, provided that the Attorney General should be a member of this conference, and that is what I denounced; not that he should not report.

Mr. CUMMINS. No; the Senator from Tennessee objected with equal emphasis to that part which authorized the Attorney General to make recommendations to the conference. The House text and the Senate text are not the same. The material, the essential part of the clause which I have read from the House bill, relates to recommendations made by the Attorney General to the conference, and in my judgment the conference report does not eliminate any material matter agreed to by both the House and the Senate.

Mr. WATSON of Indiana. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Indiana?

Mr. CUMMINS. I yield.

Mr. WATSON of Indiana. I have been out of the city for a couple of days, and I am not familiar with the point of order. Would the Senator mind stating very briefly what the point of order is?

Mr. CUMMINS. The point of order made by the Senator from Tennessee is that under what is known as the Curtis amendment to the rules the conferees have exceeded their jurisdiction; that they have eliminated matter agreed to in both the House and the Senate, and that they have incorporated matter that was not the subject of discussion or within the scope of the bill in either the House or the Senate.

The next point made by the Senator from Tennessee is that we have eliminated that provision which is found in both bills, not in the same form but in substance, that the judge appointed must be a resident of the district for which he is appointed.

I shall not take the time to refer to the vast difference between the provision of the House and the provision of the Senate in that regard. The Chair may remember, and certainly Senators will remember, that to that provision in the Senate bill the Senator from South Carolina [Mr. DIAL] offered an amendment, which was adopted and which enacted practically what has been so long known as the rebuke to Judge Landis for accepting a position and compensation outside his judicial work. The House would not agree, and I am very glad it would not agree, to the amendment in the form in which the Senator from South Carolina had added that subject to the Senate bill; and therefore the entire provision of the Senate bill as well as the entire provision of the House bill were eliminated, and they were eliminated because with the amendment which had been adopted as offered by the Senator from South Carolina there remained nothing but the requirement that the judge appointed should be a resident of the district for which he was appointed.

The present law provides—I am reading it now—

Every district judge shall reside in the district or one of the districts for which he is appointed, and for offending against this provision shall be deemed guilty of a high misdemeanor.

Whatever may be the fact with regard to the authority of the President to appoint successors to the judges authorized in this bill, they are district judges; they hold office during life or during good behavior, which is in most cases the equivalent of during life.

Mr. BORAH. Practically.

Mr. CUMMINS. Practically speaking. There can be no doubt whatever that the paragraph that I have just read from existing law applies to the district judges appointed under this law. They are district judges, and I am amazed that the Senator from Tennessee should attempt to introduce any doubt whatever upon that subject.

I pass now to his third objection.

The House provided that there should be an additional judge appointed for the middle district of Tennessee. I will read the provision in order that it may be clear in the mind of the Presiding Officer. After the first paragraph, authorizing the appointment of district judges for the United States district courts in the districts specified, "the said appointments to be in addition to those now authorized by law," the bill proceeded:

For the district of Massachusetts, two; for the eastern district of New York, one; for the southern district of New York, two.

I need not read them any further until we reach the controverted district—

For the middle district of Tennessee, one.

That is the provision in the House bill. The Senate refused to authorize the appointment of a district judge for the middle district of Tennessee, and that subject went to conference. After a great deal of discussion, almost months of debate upon the matter in the conference room, the Senate conferees agreed to the language of the House bill with a modification, as they had a right to do; and the modification—if it be a modification, although I think the legal effect is the same—was as follows:

That from and after the appointment of a district judge for the middle district of Tennessee the present district judge for the eastern and middle districts of said State shall cease to be a district judge for the middle district of Tennessee.

If the conferees could not accept the House proposition with an amendment or modification of that character, then the jurisdiction of conferees is very narrow indeed. A committee of conference could never agree to a proposition made in either House with a modification. Moreover, while the Chair may not desire to pass upon that, as a matter of law the appointment of a judge for the middle district of Tennessee, in my opinion, determined and suspended the power of the district judge who had theretofore been appointed for the western and middle districts of Tennessee.

Just one more word with regard to the way in which this has all arisen. All these points are absolutely technical. There is no substance in any of them. There is no attempt to do anything that was not fairly in dispute and as a settlement of that dispute between the two Houses. The House passed the bill. It came to the Senate. The Senate struck out all but the enacting clause and substituted a new bill. It then went to conference and the conference committee agreed to the amendment of the Senate with an amendment, which amendment was the elimination of all after the enacting clause and the insertion of the new matter which is found in the conference report—new matter only in the sense that it is of different phraseology. There is no new matter in the bill.

I submit that the point of order is not well taken; and while I have no doubt that the Senator from Tennessee believes that it is well taken, to me it appears to be without any merit whatever.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). The rule that is invoked reads as follows:

Conferees shall not insert in their report matter not committed to them by either House, nor shall they strike from the bill matter agreed to by both Houses. If new matter is inserted in the report, or if matter which was agreed to by both Houses is stricken from the bill, a point of order may be made against the report, and if the point of order is sustained the report shall be recommitted to the committee of conference.

This rule was adopted to meet a practice of the Senate that had become an abuse and to which objection had often been made. It is clear and definite in the limits which it imposed upon the action of the conferees. It has not been often invoked since its adoption, but when invoked it is controlling upon the Senate. Whether the objection made is technical or substantial, if it comes within the terms of the rule, no discretion is left in the Presiding Officer.

The first objection to this conference report is based upon the provision in the House bill that reads:

The Attorney General shall, upon request of the Chief Justice, report to said conference on matters relating to the business of the several courts of the United States, with particular reference to causes or proceedings to which the United States may be a party, together with such recommendations or requests as may be deemed proper. The Attorney General shall not be a member of said conference.

That is the provision placed in the bill by the House. As the bill passed the Senate it contained this provision:

The Attorney General shall, upon request of the Chief Justice, report to said conference on matters relating to the business of the several courts of the United States, with particular reference to causes or proceedings in which the United States may be a party,

That language is identical with the language of the House, as far as it goes, and the Chair thinks that it states a distinct matter, or proposition, and that the further provisions in the House bill—"together with such recommendations or requests as may be deemed proper" and "the Attorney General shall not be a member of said conference"—are in substance and statement two additional matters, and it seems to the Chair that the first matter stated in the House provision was adopted in the bill as it passed the Senate and comes clearly within the prohibition of the rule against omitting matter adopted by both Houses.

The next objection is based upon this language. The House bill provided:

Said judges shall be residents of the districts for which appointed, and shall receive the same salary and allowances and shall possess, exercise, and perform the same jurisdiction, powers, and duties as is now provided by law.

The Senate provision is:

Every judge shall reside in the district or circuit or one of the districts or circuits for which he is appointed, and shall devote his time to the duties of his office, and shall not engage in any other employment for which he receives compensation, and for offending against the provisions of this section shall be deemed guilty of a high misdemeanor.

The Chair thinks there are several independent matters contained in each one of these provisions. There is the provision, "Said judges shall be residents of the districts for which appointed." That is a distinct matter. The Senate bill provided:

Every judge shall reside in the district or circuit or one of the districts or circuits for which he is appointed.

These two propositions are identical in substance and almost in language. They have nothing to do with the qualifications of the judge or with the salary which he shall receive. In other words, both Houses provided that each judge should reside in his district or circuit.

The point is made that this is covered by existing law. That may be true, and yet the Senate and the House both seemed to think that a provision of this sort was necessary, and inserted it. The rule says that a matter passed upon by both Houses shall not be eliminated. No discretion is left to the conferees as to whether it is covered by existing law or not.

It seems to the Chair that the point of order on that matter must be sustained.

The next proposition is with reference to the provision relating to the middle district of Tennessee. The House made provision for an additional judge for this district. It is conceded that under existing law the present judge is the judge for the eastern and the middle districts of Tennessee. The Senate made no provision for an additional judge for the middle district. The provision as finally agreed to and submitted by the conferees takes away the jurisdiction given to the present judge by existing law in the middle district and limits his jurisdiction to the eastern district.

The question of limiting the jurisdiction of the existing judge was not submitted to either House; neither House gave it any consideration whatever, and the Chair believes it to be new matter in the conference report and prohibited by the rule.

The Chair sustains the point of order on all three grounds.

Mr. CUMMINS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. CUMMINS. Are there conferees to whom the bill could be rereferred?

The PRESIDING OFFICER. The rule says that when a point of order is sustained the report shall be recommitted to the conference.

Mr. CUMMINS. I am asking whether there is any committee of conference.

The PRESIDING OFFICER. The Chair is informed that the House has not yet acted upon the conference report. If that is the case, the Chair assumes that there is still a conference committee.

Mr. SHIELDS. I suppose there is a conference committee until their report is received and adopted and they are discharged; and they have not been discharged.

The PRESIDING OFFICER. The Chair was under the impression that the report had been adopted by the House, and if that were the case the House conferees would have been discharged; but the clerk at the desk informs the Chair that the House has not yet acted on the report.

Mr. CUMMINS. That is true. I simply wanted the ruling of the Chair upon that point.

The PRESIDING OFFICER. The Chair is of the opinion that the conference committee is still in existence and that this report will go back to the conference committee.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by Mr. Overhue, its enrolling clerk, announced that the House had agreed to the report of the committee of conference on the disagree-

ing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4) granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors, and to certain Army nurses.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H. R. 5775) for the relief of Liberty loan subscribers of the North Penn Bank, of Philadelphia, Pa.; Santa Rosa National Bank, Santa Rosa, Calif.; Mineral City Bank, Mineral City, Ohio; Robbinsdale State Bank, Robbinsdale, Minn.; and Farmers & Merchants State Bank, Kenmare, N. Dak.

The message further announced that the House had agreed to the amendments of the Senate to the bill (H. R. 858) for the relief of Alfred P. Reck.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 28) providing for the printing of 1,000 copies of part 2 of House Report No. 300, Sixty-third Congress, second session, entitled "Floods and levees of the Mississippi River."

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were subsequently signed by the President pro tempore:

A bill (H. R. 858) for the relief of Alfred P. Reck;

A bill (H. R. 5775) for the relief of the Liberty loan subscribers of the North Penn Bank, of Philadelphia, Pa.; Santa Rosa National Bank, Santa Rosa, Calif.; Mineral City Bank, Mineral City, Ohio; Robbinsdale State Bank, Robbinsdale, Minn.; and Farmers & Merchants State Bank, Kenmare, N. Dak.;

A bill (H. R. 11396) to regulate foreign commerce in the importation into the United States of the adult honeybee (Apis mellifica); and

A bill (H. R. 11699) relating to the appointment of the Chief of Staff of the Army.

UNITED STATES COAL COMMISSION.

Mr. BORAH. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House bill 12377, to establish a commission to be known as the United States Coal Commission.

The PRESIDING OFFICER. The Senator from Idaho asks unanimous consent for the present consideration of the bill which the Secretary will report.

Mr. UNDERWOOD. Let me ask a question. I understood yesterday that this bill was referred back to the committee. The committee reports it back?

Mr. BORAH. I am asking for the consideration of the committee report.

Mr. UNDERWOOD. The Senator is reporting it?

Mr. BORAH. I made the report some time ago, and it is now on the table.

The PRESIDING OFFICER. The report was submitted in the regular order.

Mr. BORAH. The committee reported an amendment, to strike out all after the enacting clause and substitute the bill as reported by the Senate committee.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Education and Labor with an amendment to strike out all after the enacting clause and to insert:

That there is hereby created and established a commission to be known and designated as the United States coal commission, to be composed of five members appointed by the President of the United States by and with the advice and consent of the Senate, Members of the House of Representatives and United States Senate to be ineligible to serve on said commission.

Any vacancy on the commission shall be filled in the same manner as the original appointment. The members of said commission shall receive a salary of $7,500 a year. Said commission shall cease to exist one year after the passage of this act unless otherwise provided by Congress.

The term "member" or "person" as used in this act means individual, partnership, corporation, or association; the term "coal" means anthracite, bituminous, and other coal, lignite, coke, and culm, whether in place, extracted, or banked.

It shall be the duty of said commission to investigate and ascertain fully the facts and conditions and study the problems and questions relative to the coal industry with a view to and for the purpose of aiding, assisting, and advising Congress in matters of legislation which will insure a supply of this commodity to the industries and the people generally throughout the country and maintain the uninterrupted flow of commerce among the States, or any legislation which Congress may, after said investigation, deem wise and which, under the Constitution, it has the power to enact.

To this end said commission shall ascertain and report to the President and Congress: As to the ownership and titles of the mines; cost of production; profits realized by the operators or owners of said mines during the last 10 years; labor costs; wages paid; irregular production and suggestions as to the remedy for the same; the conditions generally under which coal is produced; the causes which from time to time induce strikes, thereby depriving interstate carriers of their fuel supply and otherwise interrupting the flow of interstate commerce; and all facts, circumstances, or conditions which would be deemed helpful in determining and establishing a wise and efficient policy by the Government relative to said industry.

Said commission shall also submit recommendations relative to:

(a) Standardizing the mines upon the basis of their economic productive capacity and having in view the closing down of mines which, by reason of their natural limitations, fall below the standard.

(b) Standardizing the cost of living for mine workers and the living conditions which must be supplied or afforded in order to surround the workmen with reasonable comforts, and standardizing also as far as practicable the amount of work a man shall perform for a reasonable wage, recognizing the value and effect of such surroundings in respect to their efficiency.

(c) Standardizing a basis of arriving at the overhead cost of producing and distributing the coal, including delivery at the door of the consumer, recognizing in this compilation that the standardized cost of living to the miners should be the first and irreducible item of expense.

(d) The advisability or wisdom of nationalizing the coal industry.

(e) The feasibility or necessity of governmental regulation and control of the coal industry.

Said commission shall render its first report and recommendations as soon as practicable and not later than five months from the passage of this act to the Congress and to the President. That the data or information obtained by the said commission shall not be made public, except as the same is made public by reports to the Congress or to the President, or in compliance either with the request of the Congress or of the President.

That said commission may require by subpœna issued and signed by the chairman the attendance of any person and the production of any book, paper, document, or other evidence from any place in the United States at any designated place of hearing; or it may take the deposition of any person before any person having power to administer oaths. In the case of a deposition, the testimony should be reduced to writing by the person taking the deposition or under his direction and should then be subscribed to by the deponent. Any member of the commission may administer oaths and examine witnesses. Any witness summoned or deposition taken under this act shall be paid the same fees and mileage as are paid to witnesses in the courts of the United States.

No person shall be excused from so attending and testifying and deposing, or from so producing any book, paper, document, or other evidence on the ground that the testimony or evidence, documentary or otherwise, may tend to incriminate him or subject him to a penalty or forfeiture; but no natural person shall be prosecuted or subjected to any penalty or forfeiture for or an account of any transaction, matter, or thing as to which, in obedience to a subpœna and under oath, he may so testify or produce in evidence; except that no person shall be exempt from prosecution and punishment for perjury committed in so testifying.

That for the efficient administration of the functions vested in this commission by this act, any member, officer, or employee thereof, duly authorized in writing by the commission, shall, at all reasonable times for the purpose of examination, have access to and the right to copy any book, account, record, paper, or correspondence relating to any matter which the commission is authorized by this act to investigate.

That every officer or employee of the United States whenever requested by the commission shall supply it with any data or information pertaining to any investigation by the commission which may be contained in the records of the office of such officer or employee.

That no person shall willfully (1) fail or refuse to make any report required by the commission, or (2) make in any such report any statement which is false in any material particular. Any person who violates this subdivision shall, upon conviction thereof, be fined not more than $5,000, or imprisoned for not more than one year, or both.

That the commission may appoint, remove, and fix the compensation of such employees, and make such expenditures, including salaries, traveling expenses, per diem rates of allowance in lieu of subsistence, as are necessary for the efficient administration of the functions vested in the commission by this act, and as may be provided for by the Congress from time to time. All the expenses of the commission shall be allowed and paid upon the presentation of itemized vouchers therefor, approved by the chairman of the commission. No salary or compensation of employee shall exceed $5,000 per year.

There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $100,000, or so much thereof as may be necessary, to be available until one year after the passage of this act. Such sum shall be expended by the commission, in the District of Columbia or elsewhere, for defraying the expenses of the maintenance and establishment of the commission, including the payment of salaries.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER (Mr. McNARY in the chair). Does the Senator from Idaho yield to the Senator from Ohio?

Mr. BORAH. Certainly.

Mr. POMERENE. If I may have the attention of the Senator from Idaho, on page 7, line 3, it is provided that the United States coal commission shall be "composed of five members," and the word "member" appears in several places in the bill. In lines 13 and 14, page 7, it is provided that—

The term "member" or "person" as used in this act means individual, partnership, corporation, or association.

Of course, the Senator did not intend that any member of the commission should be included in "partnership, corporation, or association."

Mr. BORAH. No. Of course, when I wrote the clause appearing in lines 13, 14, and 15 I did not have in mind the members of the commission.

Mr. POMERENE. I was certain of that, and I thought the Senator would see the incongruity.

Mr. BORAH. It might be well, therefore, to strike out the word "member" and simply say "the term 'person' as used in this act," and so forth.

Mr. POMERENE. I move on page 7, in line 13, that the words "member or" be stricken from the bill.

Mr. BORAH. I have no objection.

Mr. STERLING. In that same connection I would suggest that the word "any" ought to precede the word "individual," in line 14, so it would read:

The term "person" as used in this act means any individual person, corporation, or association.

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from Ohio to the amendment of the committee.

The READING CLERK. On page 7, line 13, strike out "members or," so as to read:

The term "person" as used in this act means individual, partnership, corporation, or association.

The amendment to the amendment was agreed to.

Mr. BORAH. Now let the word "any" be inserted after the word "means," in line 14, page 7.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The READING CLERK. On page 7, line 14, after the word "means," insert the word "any," so as to read:

The term "person" as used in this act means any individual, partnership, corporation, or association.

The amendment to the amendment was agreed to.

Mr. STERLING. On page 10, lines 3 and 5, occurs the word "should." For example, beginning in line 3, it reads:

In the case of a deposition, the testimony should be reduced to writing by the person taking the deposition, or under his direction, and should then be subscribed to by the deponent.

It seems to me that is rather unusual language in a provision of this kind. It might be thought it was simply discretionary as to whether the testimony shall be reduced to writing or not. Instead of the word "should" we should have the word "shall."

Mr. BORAH. Very well.

Mr. STERLING. It would then read, "the testimony shall be reduced to writing," and so forth.

The PRESIDENT pro tempore. The Secretary will report the amendment proposed by the Senator from South Dakota to the amendment of the committee.

The READING CLERK. On page 10, line 3, after the word "testimony," strike out "should" and insert "shall," and in line 5, after the word "and," strike out "should" and insert "shall," so as to read:

In the case of a deposition, the testimony shall be reduced to writing by the person taking the deposition, or under his direction, and shall then be subscribed to by the deponent.

The amendment to the amendment was agreed to.

Mr. BORAH. Upon yesterday the Senator from Arkansas [Mr. ROBINSON] called attention to the words "having in view" on page 8, line 19, and made a suggestion which I think ought to have consideration. I had intended, but it slipped my mind, to bring in the substitute with an amendment there. The original bill had in it at that point the word "regarding" instead of "having in view," and I rather think that is a preferable term. I move to strike out the words "having in view" and insert the word "regarding."

The PRESIDENT pro tempore. The Secretary will report the amendment proposed by the Senator from Idaho to the amendment.

The READING CLERK. On page 8, line 19, strike out the words "having in view" and insert the word "regarding," so as to read:

Standardizing the mines upon the basis of their economic productive capacity and regarding the closing down of mines which, by reason of their natural limitations, fall below the standard.

The amendment to the amendment was agreed to.

Mr. BORAH. On page 10, in line 3, the word "oath" should be in the plural. I move to strike out the word "oath" and insert the word "oaths."

The amendment to the amendment was agreed to.

Mr. WALSH of Montana. Mr. President, if the Senator from Idaho will recur to subdivision (a), page 8, lines 18 to 21, to which reference was just made, I would like to make a suggestion. The Senator is aware that frequently the mines may be really not available for production economically by reason of their geographical location with reference to transportation facilities as well as their natural limitations. I think that ought to be taken into consideration as well.

Mr. BORAH. How would the Senator remedy that?

Mr. WALSH of Montana. I would add, after the word "limitations," the words "or other conditions."

Mr. BORAH. I think that is desirable. If the Senator will offer the amendment, I shall make no objection to it, so far as I am concerned.

Mr. WALSH of Montana. I move to insert, after the word "limitations," in line 20, page 8, the words "or other conditions."

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The READING CLERK. On page 8, line 20, after the word "limitations" and the comma, insert "or other conditions," so as to read:

Standardizing the mines upon the basis of their economic productive capacity and regarding the closing down of mines which, by reason of their natural limitations, or other conditions, fall below the standard.

The amendment to the amendment was agreed to.

Mr. REED of Missouri. Mr. President, has the Senator from Idaho any other amendment to offer?

Mr. BORAH. I have not.

Mr. REED of Missouri. I desire to inquire why the Senator excludes from membership in the commission Members of the Senate and House of Representatives?

Mr. BORAH. Very frankly, it is because I am utterly opposed to Members of Congress sitting upon such commissions.

Mr. REED of Missouri. Does the Senator desire to create a board which shall be independent of the Government and shall act without any influence or coercion from the governmental agencies? Is that his reason for excluding Members of Congress?

Mr. BORAH. What I desire is to have a report from a commission wholly aside from the Congress. It comes to the Congress and Congress reviews it, not as a report which came from a part of its membership but wholly from an independent body.

Mr. REED of Missouri. Then should it not also be independent of the Executive by parity of reasoning?

Mr. BORAH. Does the Senator mean that no executive official should sit as a member of the commission?

Mr. REED of Missouri. Yes.

Mr. BORAH. I would not have any objection at all to that being inserted, although it had not occurred to me.

Mr. REED of Missouri. Then I move after the word "Senate," in line 6, on page 7, to insert the words "and any person holding an office under the United States."

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from Missouri to the amendment.

The READING CLERK. After the word "Senate," in line 6, page 7, insert "and any person holding an office under the United States," so as to read:

That there is hereby created and established a commission to be known and designated as the United States Coal Commission, to be composed of five members appointed by the President of the United States, by and with the advice and consent of the Senate, Members of the House of Representatives and United States Senate, and any person holding an office under the United States to be ineligible to serve on said commission.

The amendment to the amendment was agreed to.

Mr. EDGE. Mr. President, may I ask if that completes the amendments to be offered by the chairman of the committee?

Mr. BORAH. I have no further amendment to offer. The last amendment was offered by the Senator from Missouri. I do not know whether the Senator from Missouri is through or not.

Mr. EDGE. I desire to offer an amendment.

Mr. REED of Missouri. I had not intended to yield the floor, but I give way for the amendment which the Senator from New Jersey desires to offer.

The PRESIDENT pro tempore. The Secretary will state the amendment offered by the Senator from New Jersey to the amendment.

The READING CLERK. On page 12, at the end of the amendment, after line 10, insert the following new paragraph:

That Congress hereby declares the existence of an emergency resulting from the economic and industrial conditions in the production and distribution of coal, and in order to provide coal for (1) the Army, Navy, and militia of the United States, (2) the Government of the United States, (3) carrying the mails and maintaining the Postal Service and the post offices, (4) the maintenance of commerce with foreign nations and among the several States and with the Indian tribes, (5) the territories and possessions of the United States, (6) the execution of the laws of the United States, and (7) the welfare and safety of the people of the United States, the President of the United States, if he deems it necessary and for such periods of time as he deems necessary, is hereby authorized to acquire, by condemnation or otherwise, any or all of the coal mines within the United States, and to operate such mines and to distribute the coal therefrom, and to employ or create such agencies as he deems necessary. There is hereby appropriated the moneys necessary to make just compensation for private property taken and to carry out the provisions of this section.

Mr. EDGE. Mr. President——

The PRESIDENT pro tempore. The Senator from New Jersey.

Mr. SHIELDS. Mr. President, I should like to inquire whether the Senator from New Jersey, who offered the amendment which has just been read, proposes to discuss it now?

Mr. EDGE. I am going to speak very briefly on the amendment.

Mr. SHIELDS. I ask that question for this reason: I suppose the amendment will provoke a very extended discussion, and I have an amendment which I desire to propose to the section which has just been amended, which I should like to offer in order to complete that paragraph. I think the amendment which I propose may be disposed of in a moment.

Mr. EDGE. I have no objection to yielding to the Senator from Tennessee in order to propose the amendment if it will not interfere with the consideration of the amendment upon which I desire briefly to address the Senate.

Mr. SHIELDS. Very well. With the permission of the Senator from New Jersey, I will merely offer my amendment at this time and not ask to have it now disposed of or to interfere with the discussion of his amendment. I move to insert immediately after the amendment which has just been adopted on the motion of the Senator from Missouri [Mr. REED], on page 7, after the word "commission," in line 7, the words "or any person interested directly or indirectly in the ownership, mining, or distribution of coal."

The PRESIDENT pro tempore. The Secretary will state the amendment proposed by the Senator from Tennessee.

Mr. BORAH. Is the amendment which has just been proposed by the Senator from Tennessee the matter now pending before the Senate?

Mr. EDGE. Mr. President, I do not wish to be involved in any parliamentary tangle. I have offered an amendment which is now pending.

The PRESIDENT pro tempore. The Senator from New Jersey has the floor.

Mr. EDGE. If my temporarily yielding to the Senator from Tennessee for the consideration of his amendment will displace my amendment, I, of course, shall have to object to the consideration of his amendment.

Mr. SHIELDS. I did not ask for the immediate consideration of my amendment. I understood that the Senator from New Jersey only allowed me to submit the amendment.

Mr. EDGE. As I understand, the Senator from Tennessee merely wishes to present the amendment, and I have yielded to him for that purpose.

Mr. SHIELDS. That is correct.

Mr. EDGE. Mr. President, I am going to speak very briefly on my amendment. I am in hearty accord with the substitute bill reported by the Senator from Idaho [Mr. BORAH] and believe that its passage will serve a very useful purpose.

Mr. ROBINSON. Mr. President, will the Senator from New Jersey yield to me?

The PRESIDENT pro tempore. The Chair desires to say that it is the amendment which has been proposed by the Senator from Tennessee [Mr. SHIELDS] which is now the pending question.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. The Chair understood the Senator from New Jersey for the moment to withdraw his amendment.

Mr. EDGE. Mr. President, I have not yielded the floor. I do not know that it makes a particle of difference whether I speak on the amendment which has been proposed by the Senator from Tennessee or the amendment which has been proposed by myself.

Mr. SHIELDS. As I understand the parliamentary situation, the Senator from New Jersey [Mr. EDGE] merely yielded the floor to me in order that I might offer my amendment, but not to have my amendment considered at this time.

Mr. EDGE. Absolutely.

Mr. ROBINSON. Mr. President, if the Senator from New Jersey will be good enough to yield to me for a statement, I desire to say that the clerks at the Secretary's desk did not get the amendment of the Senator from Tennessee, which was submitted orally, and I suggest that the Senator from Tennessee be authorized to restate the amendment, in order that the clerks may get it.

Mr. EDGE. Mr. President, inasmuch as there seems to be some question involved as to whether my amendment would be in order if the amendment offered by the Senator from Tennessee shall be received, I must of necessity withdraw my willingness to yield for the present. I shall only occupy the floor for a very few moments. Then the Senator from Tennessee may again offer his amendment.

Mr. SHIELDS. In order that my agreement with the Senator from New Jersey may be carried out, I temporarily withdraw my proposed amendment.

Mr. EDGE. I thank the Senator from Tennessee for his courtesy.

As I have already stated, I am heartily in favor of the substitute bill which has been reported by the Senator from Idaho [Mr. BORAH], and I believe that such an investigation as is proposed under that measure will finally result in some permanent relief in the coal situation; but we are faced to-day with a condition which, in my judgment, while we are legislating on the subject, demands authority from Congress to the Executive which will enable him to act, if he deems it necessary to act, beyond and above the proposed power of pending legislation.

The situation to-day, as I think we all agree—perhaps, we disagree as to the remedy—has been entirely transferred from a question of disagreement between the operator and miner. Whether the controversial points still at issue are large or small, they seem to the other 109,000,000 people of the country, the public, not to be of sufficient force and magnitude to prevent at least a temporary understanding and a resumption of the mining of coal. Apparently, from the reports we have received through the newspapers, the anthracite conference has been dissolved and there seems to be no encouragement for the future.

We in the eastern part of the country, particularly in the New England States and in the eastern Atlantic States, depend from a domestic standpoint absolutely upon the use of anthracite. The furnaces and heaters and ranges and stoves in our section are not prepared for the use of bituminous coal. It is absolutely essential, if there is sufficient power or force, that the President be given that power in order that the inherent responsibility of Government for the protection of the lives and property of the public may be invoked.

I am not a lawyer; I do not know whether or not the amendment which I have offered is constitutional. That is a matter upon which I suppose the lawyer Members of this body will disagree. The Supreme Court of the United States must finally settle all such controversial questions. I have never seen a question of law presented in the Senate when there was not immediate disagreement between learned members of the bar; and, so far as that is concerned, I have given the matter little, if any, thought.

My amendment provides that if in the discretion of the President it becomes necessary, in order to produce coal, to take over the mines or any portion of the mines power shall be conferred upon him by Congress to do so; and should the amendment be adopted he certainly will have that power until some court decides otherwise. Under present conditions, it seems to me, Congress would be absolutely derelict in its performance of duty if it did not give the President some positive power of this kind and character.

The only other bill pending with which I am familiar is that offered by the Senator from Iowa [Mr. CUMMINS], providing a curb upon profiteering. I think that likewise a very essential and necessary bill, but the passage of the bill providing for a thorough investigation and the passage of the bill designed to curb profiteering will merely leave the situation just as it is to-day so far as the actual mining and immediate production and distribution of coal are concerned.

The entire question now seems to be referred to the Congress. The President, as was well said yesterday, patient, forbearing, considerate, conciliatory, has done his very best, the best that any human being could do, to try to bring his good offices to bear upon the warring elements in the coal industry. The result we all know. Certainly, because disagreement continues, he can not be criticized fairly or justifiably. In view of the circumstances, then, it is up to Congress to attempt to provide a further remedy.

In the debate yesterday some Senators contended the President had the power already; others that he did not; the same question of controversy and difference of opinion arises. So, why not delegate to him by statute—which is, of course, all we can do—this power; we must trust him to use it with discretion and in a careful manner, so that if the worst comes to the worst—and it certainly looks, with only a few weeks before autumn weather, that the worst will come to pass—and sufficient anthracite can not be distributed among the homes of the country, the President will at least be in a position to legally use his good offices to try to alleviate the situation.

Again, I think it may have a further effect; I hope so at any rate. The differences between the miner and the operator in the anthracite field seem to be summed up mainly in two points, as I recall the press reports—one, that the miners wish the present wage scale to extend over a few additional months, and the other the question of arbitration, which is opposed by the miners. The public has ceased to have patience with such quibbling, even though these points may be deemed of extreme importance by those interested. The time has arrived when the force and power of the Government, if it has force and power, should be exercised in the direction of alleviating this situation. Certainly the adoption of an amendment of the character proposed by me to the pending measure will at least indicate that Congress is doing all that Congress can do to try to delegate the power necessary to the one man who can administer it—the President of the United States.

Mr. BORAH. Mr. President, I sincerely hope that the Senate will not attach the amendment offered by the Senator from New Jersey to the pending bill. I say that without passing judgment upon the merits or demerits of the amendment, but it is wholly aside from the purposes and objects of the measure now under consideration. It ought to be brought here as a separate and independent proposition, and when it is brought here in that form it will merit and undoubtedly receive the serious consideration of the Senate before it passes; but it is entirely aside from the proposition which is sought to be covered by the pending measure.

The amendment which has been offered by the Senator from New Jersey would involve about as serious a question as could be presented to the Senate. The amendment has never been referred to any committee; it has never received any consideration at the hands of any committee; and manifestly the Senate is not prepared to pass upon so serious a question in the shape of an amendment. I have not been able even yet to get a copy of the amendment.

I wish the Senator from New Jersey would withhold his amendment and put it in the form of a separate bill, so that the matter may be presented in such a way that when it is finally passed there will be scarcely any doubt about our authority to pass it. My candid opinion is that, whatever we may be able to do, the amendment as drawn would not stand the test. I am perfectly willing to exhaust all the power that Congress has to deal with this question; I will support any bill within our power and which seems efficient which the Senator may introduce looking to that end; but I think the Senator must realize that we can not adopt his suggestion as an amendment to this bill.

Mr. EDGE. Mr. President, the necessity for haste, which is quite obvious, has impelled me to present the amendment as a rider, as it might be termed, or as an additional section to the pending measure. The necessity for haste, I think, is quite apparent to everyone. If the amendment could be adopted as a separate bill, of course it could be adopted as an amendment to the pending bill, for the same arguments would prevail.

As to its being couched in precisely the proper language, I, of course, am unable to say. It was prepared, however, by the bill-drafting service of Congress, and I know was drawn with great care. If there should be some question as to its phraseology, the pending bill of necessity must go to conference, it must be returned to the House, as it has been entirely redrafted, and my proposed amendment can then be given very careful consideration.

I do not wish to do anything to prevent the passage of the bill of the Senator from Idaho. That bill, however, looks forward to a result which would probably be gained months hence, while the country seeks and demands results at once.

Mr. BORAH. Mr. President, I perfectly agree with the Senator that there should be a measure offered—and there has been one introduced which has already gone to a committee—providing the means, in so far as can be done, for meeting the present emergency. When, however, the pending bill was introduced we had no purpose of dealing with the present emergency. The bill was introduced at a time when it was hoped the Executive would find a solution of the present situation, and the bill was not designed to cover that. I agree with the Senator that he should move as rapidly as he may, and I will move with him as rapidly as I can. If such a measure as he has proposed shall go to my committee, it will have immediate consideration; but that kind of a measure would not go to the committee of which I have the honor to be chairman; it would go to either the Interstate Commerce Committee or the Judiciary Committee.

Mr. SUTHERLAND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from West Virginia?

Mr. EDGE. I yield.

Mr. SUTHERLAND. I should like to ask the Senator whether the entire scope of his amendment is not covered by paragraph (d) on page 9, line 9, of the pending bill, where the commission about to be created is directed to make recommendations relative to the "advisability or wisdom of nationalizing the coal industry," which is practically what the amendment of the Senator from New Jersey would accomplish?

Mr. EDGE. No, Mr. President; not at all. I am very glad the Senator from West Virginia has brought up that point, because I do not want to be misunderstood. I do not think there is a Senator in this body who, as a matter of fundamental principle, is more opposed to the general policy of nationalization or of Government ownership than the Senator from New Jersey; and so far as the report anticipated in section (d) is concerned, as to the advisability or wisdom of nationalizing the coal industry, it would undoubtedly be very interesting to have that report. My amendment strikes at an emergency just the same as an emergency of war—not to take over and nationalize permanently the coal industry, but an emergency to get coal to keep people warm and alive. It has nothing whatever to do with permanent governmental control.

Mr. STERLING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from South Dakota?

Mr. EDGE. I yield.

Mr. STERLING. The Senator's amendment, it seems to me, contemplates a good deal more than the Government taking temporary possession of the coal mines. It contemplates condemnation proceedings, by which the Government shall acquire right and title to them.

Mr. EDGE. That is left entirely to the judgment of the Chief Executive, who would administer the power given him under the amendment as he found it necessary while an emergency existed.

Mr. LENROOT. Mr. President, will the Senator yield?

Mr. EDGE. I yield to the Senator.

Mr. LENROOT. According to the reading of the amendment, the President could not operate a coal mine unless he had first acquired title to that coal mine.

Mr. STERLING. I am not sure as to whether he would have to acquire actual legal title.

Mr. LENROOT. I say, under the Senator's amendment. I am not speaking of the power; I am speaking of the amendment.

Mr. STERLING. Exactly.

Mr. SUTHERLAND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from West Virginia?

Mr. EDGE. I do.

Mr. SUTHERLAND. I should like to ask the Senator whether he has made any calculation or had any calculation made as to the amount of money, the millions or billions of dollars, which would be required to carry out the full scope of his amendment; and are we to be asked at this time, in a few moments, to vote upon an amendment requiring the expenditure of some billions of dollars, and actually appropriating the money for that purpose, as the amendment sets forth, without any idea at all as to what the cost of the proposal is to be?

Mr. EDGE. When the life of the public is in imminent danger I do not believe the Senator from New Jersey is particularly concerned about the amount, especially when it is entirely in the hands of the Chief Executive of the Nation to administer the authority as he sees proper. Of course, I might, in passing, refer to the billions of dollars now being considered as a bonus; that huge expenditure does not seem to alarm some Senators very much. However, I was going to answer the Senator from Idaho in his request that this amendment be considered as a separate measure. The Senator from Idaho is very courteous. He is very anxious that his bill shall be put into operation, and so am I. I wanted to get before the Senate, so far as I could, the necessity for further action. I have introduced an amendment that, I believe, should have immediate consideration, but recognizing the controversy that would necessarily ensue if I pressed it as an amendment, I am entirely satisfied to have it considered as a separate bill. As I understand, the joint resolution introduced yesterday by the Senator from Massachusetts [Mr. WALSH], dealing with the subject, was referred to the Committee on Interstate Commerce. Is not that correct?

Mr. WALSH of Massachusetts. That is a fact. It was referred to the Committee on Interstate Commerce.

Mr. EDGE. Then, if I may, with the assurance which I know will be forthcoming that in view of the importance of this measure it will receive quick consideration, I will withdraw the amendment and introduce it as a separate bill, with the request that it be referred to the Committee on Interstate Commerce.

The PRESIDENT pro tempore. Without objection, it is so ordered. The amendment will be received as an independent bill and referred to the Committee on Interstate Commerce.

The bill (S. 3954) to provide for the operation and control of coal mines during the present emergency was read twice by its title and referred to the Committee on Interstate Commerce.

Mr. FLETCHER. Mr. President, I am in favor of this bill, the purpose and object of it. At the same time I recognize that there will be delay, that there will not be accomplished by it any immediate remedy of very shocking conditions. We have had numerous investigations of the coal industry heretofore. We have had numbers of committees investigate and report. The former Senator from Iowa, Mr. Kenyon, made a report on that situation, in fact, last April, and submitted a bill which was referred to the committee, and, so far as I know, never has been considered; at least no report has been made on it.

Mr. WALSH of Massachusetts. Mr. President, will the Senator permit an interruption?

Mr. FLETCHER. Yes.

Mr. WALSH of Massachusetts. I will state to the Senator that there are at least 10 resolutions or bills dealing with the coal industry that have been pending for two years that have not been acted upon.

Mr. FLETCHER. Precisely; and aside from these efforts to get action, definite and effective in character, which have come to naught, we have had reports that have told us of the conditions which are recited now by the President, after a very commendable effort and a very high purpose on his part to adjust these differences between conflicting interests, in order that the country might not suffer.

I express here now my high commendation of the President for the real energy he displayed in the effort to adjust these questions; and the President reports to us what Congress has heretofore known, what has been in the minds and in the knowledge of all of us for some time past: There are vastly more mines than are really needed to supply the country with coal, and there are some two or three hundred thousand more miners than are required to operate these mines; and he reports further conclusions which are admissions, it seems to me, humiliating to the country and startling to the world.

For instance, the President states in his message to Congress delivered on the 18th instant:

> The simple but significant truth was revealed that, except for such coal as comes from the districts worked by nonorganized miners, the country is at the mercy of the United Mine Workers.

Think of that! Not certain localities, not certain communities, not certain isolated enterprises are at the mercy of the United Mine Workers but the whole country, 110,000,000 people; not simply adversely affected by an aggregation or a group but at the mercy of that group!

Have we departed absolutely from the fundamental principles of this Government? Have we come to the point where we have abandoned the straight road of liberty and freedom, the foundations upon which this Government is based, and taken the fork which leads absolutely to the control of a certain group or aggregation of people, four or five hundred thousand of them, controlling and directing the whole country with respect to this necessary of life? Have we departed from the principles of democracy, from a society where there is equal opportunity and at least a share in control, to an autocracy where opportunity is not equalized and where control is vested entirely in the hands of a certain group or aggregation?

That is a real and vital distinction of principle. Either we are a democracy, either we live under a government where every man is set free to be his best and to do his best, or we are at last planted upon the principles of autocracy, where a certain group controls and where opportunity is not equalized.

There is a distinct difference here in principle; and, according to the President's announcement—and I have no disposition to question it at all, because he has made a thorough study of the whole situation—he reaches the conclusion, which he tells to the whole world, that the country is at the mercy of the United Mine Workers.

How long are we going to permit that to continue? As a free American citizen I do not like to be dependent upon any man or any set of men. As a citizen of this Republic I resent any such condition, and my mind rebels against it as intolerable. I do not think that situation ought to last 24 hours, much less until Congress meets again in December. The chairman of the Interstate Commerce Committee said yesterday on the floor: "We propose to deal with this question when Congress meets in December." In other words, the House is on fire, and we will call out the fire department next December! In other words, here is a group of people at the throats of this Government and this whole country, and we will argue the question with them next December, if we live!

Was ever such a situation reached before as that now put before the country in this solemn statement, impressively made, which goes throughout the world, that this country is at the mercy of the United Mine Workers?

I am in thorough sympathy with the views of the Senators, expressed on yesterday, and with what was said this morning by the Senator from New Jersey, that something ought to be done *now*—not next December; not after this commission reports; not after further finding of facts—something ought to be done now to relieve this situation, and to protect the rights and interests and the health and the lives of the people of this country.

The President has recommended this bill in substance. I am in favor of that. He has recommended another bill, referred to in his message, for a temporary national coal agency. That bill has been introduced and referred to a committee. I am in favor of that. I am in favor of taking every step that the President has recommended here in order not merely that we may have eventually and in the future some settlement of this question upon some sound and proper basis but I hope it will enable him at once to see to it that we are no longer at the mercy of any group or aggregation of groups in a particular industry.

As to the United Mine Workers' organization, I never had any contact with them and do not know very much about them. Their power must be an extraordinary one, a power that, so far as I know, never had such control before in the history of this country, and a power which has a control now, I submit, which ought not to be endured for one hour, according to the President's statement.

It is stated in an article in the Manufacturers' Record that—

> During the steel strike in Pennsylvania a few years ago an Army officer stationed in the strike region, in reply to a question by a Congressman, said that he had not been able to find an American citizen among the strikers, and some of the Congressmen who investigated the situation, when they returned to Washington, told their associates that they had not been able to find among the strikers anybody who could understand the English language, and the strikers spoke no language which they could understand.

In a recent communication from Mr. Charles E. Hellier, of New York, he said:

> I recently visited the Connellsville mine district and found that most of the miners making the trouble there are foreigners and aliens, not American citizens, and they neither read nor speak the English language.

Those, I take it, are members of the United Mine Workers' organization, aliens. A great majority of that organization appear to be people who do not speak the English language. Whether they control it or not, I do not know. If they do, what do they care about what they may inflict upon the American people? What do they care about the principles of this Government? What do they care about the distress or suffering of the public? Why should that organization hold the whole country at their mercy, as reported by the President? Surely there must be some way for relieving that condition now, without waiting until next November or next December, or some time in the future.

The only criticism I can have of this measure is that it is along the lines of others which have been introduced in the past and never acted upon. This will be acted upon, I take it, and this commission will eventually be appointed, maybe in 30 days, maybe in 60 days, maybe in 90 days, and then the commission will eventually make a report. In the meantime winter will be here and there will be no coal to furnish heat for the comfort and very existence of the people.

I make no criticism of labor unions. I think the workers have a perfect right to organize into unions. I believe, in many instances, they have accomplished much good for their members and for society. I believe a man has a perfect right to quit his work. The question of violating his contract is between him and the man with whom he makes the contract. He can not be prosecuted for it. I believe a man has a right to work where he can find work, and make proper engagements to that end. The unions themselves say they are not responsible for violence; that they discourage violence. They say that sort of thing is participated in by sympathizers and irresponsible, reckless, disturbers of the peace, violators of the law. Very well. If there is any legislation needed to reach those people who indulge in

violence such as was committed in Illinois, and pursue a course which interferes by force, by murder, and what not, with the orderly conduct of this business, to the end that the people may be served properly and legally, if there is any legislation needed to put those people in jail, that is the kind of legislation which ought to be enacted, not merely to fine them, but to put them in jail. They are disowned by the unions; they are certainly disturbers of public peace and order. They are lawbreakers, and why should they not be put in jail? In my opinion, that would reach a great deal of this trouble.

I doubt if legislation is needed for that purpose. The President seems to say that he has law enough to protect this country, and all he has suggested has been these two bills. "The country is at the mercy of the United Mine Workers," and we pass a bill to appoint a commission to find out what the facts are.

There is no question about that one fact. The President announced it, and I accept his conclusion as decisive upon that point. That is enough for the present. That is the situation, and in my judgment there ought to be sufficient statesmanship, patriotism, and regard for the public welfare and conception of fiduciary responsibility to find a remedy for it, and that remedy ought to be immediate.

Mr. SHIELDS. Mr. President, on account of the parliamentary situation I withdrew an amendment I offered to be inserted on page 7, line 6, of the bill, coming immediately after an amendment just adopted, offered by the Senator from Missouri [Mr. REED]. I now reoffer the amendment in these words:

or any person in any wise interested as mine owner, operator, or miner, in the coal industry.

The PRESIDING OFFICER (Mr. LENROOT in the chair). The Senator from Tennessee offers an amendment to the amendment, which the Secretary will report.

The READING CLERK. Following the amendment offered by the Senator from Missouri [Mr. REED] and agreed to, in line 6, page 7, the Senator from Tennessee proposes to insert:

or any person in any wise interested as mine owner, operator, or miner, in the coal industry.

Mr. ROBINSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. ROBINSON. What disposition was made of the amendment of the Senator from New Jersey to the amendment?

The PRESIDING OFFICER. It was withdrawn by the mover.

Mr. ROBINSON. So the amendment proposed by the Senator from Tennessee is the pending amendment?

The PRESIDING OFFICER. The amendment just reported is the pending amendment. The question is now upon the amendment offered by the Senator from Tennessee to the amendment of the committee.

Mr. SHIELDS. This amendment relates to the eligibility of the commissioners proposed to be appointed under the bill. The limitation upon eligibility, as appears in the bill as reported, is in these words:

Members of the House of Representatives and the United States Senate to be ineligible to serve on said commission.

The amendment offered by the Senator from Missouri [Mr. REED] and adopted, I understand, included executive officers. This amendment is to include [illegible] the exception of ineligibility all parties interested in the coal industry as owners, operators, or miners.

Very large powers are granted these commissioners for investigation and determination, so broad that they have a very large discretion in matters, almost approaching that of decision, if they do not do so in some respects. No one will question the importance of the powers vested in them.

The mere fact that the bill is presented by the able Senator from Idaho, I believe unanimously reported by the committee over which he has the honor to preside, and is here seriously considered, is ample proof of the importance of the powers to be vested in these commissioners.

It is fundamental that no man should be a judge to pass upon the law or the facts in any manner or to any extent, conclusively or with limitations, in a matter in which he is directly or indirectly interested. I think one of the great troubles now with the Railroad Labor Board is that it is composed of representatives of the railroads and representatives of their employees. There are conflicting interests in that quasi court, and that will always give trouble. As a matter of course, everyone in the United States is interested in the coal industry. You can not exclude everyone indirectly interested, but you can exclude everyone financially interested, and that is what this amendment does.

In view of the important and drastic powers proposed to be vested in these commissioners, I believe that as far as possible they should be free from any financial interest, and that we may get recommendations and may have a report in the interest of the 110,000,000 people in the United States in no way affected by the interests of less than a half million who are directly financially interested in the coal industry.

I think this amendment is in accord with the general and fundamental principles in regard to excluding parties interested who come to decide on the rights of individuals. This to me is so apparent that I do not care to elaborate my position.

Mr. ROBINSON. Mr. President, the House incorporated in its bill a provision identical, or substantially so, with that now offered by the Senator from Tennessee. The Senate has already adopted an amendment proposed by the Senator from Missouri [Mr. REED], excluding all persons from membership on this commission who hold any office under the Government of the United States, and the original amendment proposed by the Senator from Idaho excludes Senators and Members of the House of Representatives.

The President in appointing this commission ought to be permitted to appoint somebody who knows something about the subject matter of the investigation. The amendments already agreed to narrow his power of appointment very greatly. No Senator, no Representative, no person holding an office under the Government of the United States, can serve on the commission. The Senator from Tennessee now proposes also to exclude mine owners, mine operators, and miners.

The theory upon which the Government has heretofore proceeded in legislation analogous to this is that the parties directly and financially interested may have representation; that persons who have definite knowledge of the details of the business to be investigated may be permitted to contribute their knowledge and experience to the investigating body. If the amendment of the Senator from Tennessee is agreed to, the President will be compelled to appoint a purely academic commission.

The PRESIDING OFFICER. The Senator from Arkansas will suspend for a moment. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The READING CLERK. A bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. BORAH. Mr. President——

Mr. ROBINSON. I yield to the Senator from Idaho.

Mr. BORAH. I request of the Senator from North Dakota [Mr. MCCUMBER] that the unfinished business be temporarily laid aside. If we do not conclude the pending matter within 15 minutes, I shall not ask for any further time.

Mr. MCCUMBER. That is satisfactory to me.

The PRESIDING OFFICER. The Senator from North Dakota asks unanimous consent that the unfinished business be temporarily laid aside. There being no objection, it is so ordered. The question is on the amendment proposed by the Senator from Tennessee [Mr. SHIELDS] to the amendment of the committee. The Senator from Arkansas will proceed.

Mr. ROBINSON. Mr. President, the coal situation and the condition of the coal industry in the United States present problems that can not be determined successfully without the utmost caution and without full consideration. I have no hesitancy in saying that the proposal originally submitted by the President of the United States for the settlement of the coal strike should have been accepted by the parties to the controversy and that every coal mine in the United States in condition to operate should now be producing fuel for the people of the United States and for the maintenance of their industries. Undoubtedly the stubbornness of both the mine owners and operators and of the miners is contributing to a growing sentiment among the people of the United States which will result, if existing conditions continue, in whatever action the Government has the power to take to protect the people of the Nation from the foolish obstinacy of the men who are directly concerned in the industry, both the operators and the miners.

I have no patience with any man who enjoys the protection of our flag who is willing for any consideration involved in the coal strike to menace the citizenship of the Nation with the perils that come from an indefinite continuation of the prevailing disgusting and unnecessary condition in the coal industry. I am ready now to support any well-considered proposal that will serve notice on the mine owners and the miners that if they do not compound their differences the people who are to suffer by reason of their obstinacy will take any course

and every course open to protect themselves against the calamity of a coal famine during the approaching winter season.

I am not moved to oppose the amendment offered by the Senator from Tennessee through any feeling of consideration for those who have needlessly brought upon my country a condition of peril and who, in spite of that growing peril and danger, appear indifferent to all save their own selfish and avaricious interests.

Mr. WALSH of Massachusetts. Mr. President, may I interrupt the Senator to state that the coal famine is not coming, but it is here?

Mr. ROBINSON. Yes; it is already here. If the strike were settled now and every mine operator and every mine worker went to work with the utmost diligence and worked full time and worked efficiently, there will be thousands of homes in the United States where helpless women and children will suffer and where some will die from cold; thousands of smokestacks from which no sign of industry will ascend, millions of wheels which can not be set to turning quickly. Already havoc and ruin have become inevitable.

It is regrettable that the only action proposed by those charged with the responsibility for finding a remedy for the situation is an investigation. The investigation is necessary. It is more than justified. It may result in disclosing a substantial and permanent remedy. That is the hope of those who propose the bill. But it is pitiful that while mine owners and operators quarrel and fight with mine workers, commerce must be paralyzed, industry must be destroyed, comfort and happiness disregarded.

My reason for suggesting that the President be given the power to appoint on the commission a representative of the operators, if he chooses to do so, and a representative of the miners if he appoints a representative of the operators, is that I believe if representation is expressly denied by the legislation the investigation would be discredited in the beginning in the judgment of large elements of our population.

Another reason is that there ought to be on the commission some one who knows the mining business, some one who understands its history, its details, its difficulties, and its prospects. If we eliminate every Member of Congress, every officer of the Government, every mine owner and operator, and every mine worker, we relegate the President to a comparatively limited class of our citizens who may be deemed to possess the qualifications requisite for the labor.

The investigation is intended to result in recommendations. If we exclude by law those who are interested in the investigation, there is little likelihood that the report of the commission will find approval among those who are expressly and directly interested. The Senator from Idaho has worked patiently, diligently, and persistently upon the subject. His first thought was that the President should be required to name on the commission representatives of the mine operators and of the mine workers. The conclusion seemed to be that the President should be given a free hand, barring the limitations already imposed denying him the power to appoint Members of Congress or officers of the United States.

I hope, and I believe I reflect the views and sentiment of the country in general familiar with the situation, that the Senator from Idaho, chairman of the committee, will continue his labors. Some definite and effective measure, if possible, should be presented. The difficulties are admitted. The problems are great. No one may be justly censured because there has not been a solution of those difficult problems. But this much is certain: The bill now pending does not solve the problem. It contributes very little to a solution of the problem and the emergency now before the country. It may be that under the limitations of the Federal Constitution the people of the country are powerless. It may be that those who framed the Constitution did not foresee and did not anticipate the possibility of a time arriving when large elements of our population would become so selfish, so indifferent to the general public good, that they would threaten to destroy the very lives of the people in order to maintain their contentions.

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER (Mr. WADSWORTH in the chair). Does the Senator from Arkansas yield to the Senator from Missouri?

Mr. ROBINSON. I yield.

Mr. REED of Missouri. The Senator spoke of the Government being powerless.

Mr. BORAH. Mr. President, will the Senator from Missouri permit me to interrupt a moment? Under my understanding with the Senator from North Dakota I suppose I ought to ask that the bill go over.

Mr. ROBINSON. I am going to conclude immediately. First may I ask what the Senator from Missouri wished to say?

Mr. REED of Missouri. The Senator from Arkansas speaks of the Government "being powerless"——

Mr. ROBINSON. "May be powerless," I said.

Mr. REED of Missouri. "May be powerless"; but, just to get the Senator's thought, I desire to say that, of course, the Senator knows that the Government is not powerless to prevent and punish every conspiracy in restraint of trade and commerce. Is not that the point to which we are being rapidly driven?

Mr. ROBINSON. Mr. President, as to what constitutes a conspiracy in restraint of trade and commerce, there may exist differences of opinion, but I am willing now to use every power under laws that have been enacted, and to enact every law under the Constitution that may be legally passed, to coerce the mine owners, the mine operators, and the mine workers to recognize the paramount right of the public to have commerce continued, and to settle their disputes. I will join the Senator from Idaho [Mr. BORAH], the Senator from Missouri [Mr. REED] and the Senator from Massachusetts [Mr. WALSH] and other Senators now or to-morrow to provide by solemn legislative act that anyone conspiring to hinder, prevent, or restrain interstate commerce in the transportation of coal shall incur a severe penalty; and I will make that law applicable to mine owners, to mine operators, and to mine workers, and I will vote to provide that there shall be no favoritism and no discrimination, for coal is vital to the safety, the welfare, the comfort, and the happiness of the people of this Nation.

The President may not have power under the Constitution of the United States to take over the mines; and if he has the power and exercises it, he may find the same difficulty in operating the mines after taking them over that the mine owners now encounter, unless he accedes to the demands of the workers; but the Congress under its power to regulate commerce, I believe, according to the precedents, could impose conditions of law which would tend to induce both the operators and the miners to compose their differences.

All that, however, would not relieve the one great difficulty; it would not mine coal; and I feel that the only remedy for this situation is a settlement between the mine owners and the mine operators and the mine workers; and, like every other settlement, there must be compromise; there must be mutual concession. The proposed investigation is not expected to produce immediate results. Therefore, before the report of the proposed commission shall have been filed, if the present strike continues, indescribable misery, unspeakable suffering, will have come to those who are innocent of wrong in thought or purpose.

COMPENSATION OF WORLD WAR VETERANS.

Mr. McCUMBER. Mr. President, I ask that the soldiers' compensation bill may be laid before the Senate and proceeded with.

The PRESIDING OFFICER (Mr. WADSWORTH in the chair). The consideration of the regular order will be resumed.

The Senate, as in the Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. McCUMBER. Mr. President, I was engaged with a committee of conference all day yesterday, and therefore I could not be in the Chamber while the pending bill was then being discussed. From the CONGRESSIONAL RECORD of this morning, however, I find that the senior Senator from New York [Mr. WADSWORTH], after quoting some of my statements of the day before yesterday, and especially those in connection with the paragraph relating to the organization of the American Legion, quoted a portion of my speech, as follows:

> The Senator from North Dakota then continued:
>
> "Let me tell you, Mr. President, that we will need these boys with their loyalty to country and Constitution and the sacred rights declared by the Constitution; we will need them more—a thousand times more—than we will need the few dollars we would save by denying this little element of justice."

Then the Senator from New York proceeded to say:

> Mr. President, what is the inference to be drawn from that portion of the address of the Senator from North Dakota? What is the only inference that may be drawn from the inclusion of a declaration or suggestion of that kind in an address upon this bill, soon to be voted upon in this body? The only inference that I can read into it is that if the bonus bill is not passed, in time of crisis, grave, widespread public disorder, should their country call upon them these men will not, or there is danger that they will not, respond.

Mr. President, I know the Senator from New York inadvertently stopped his quotation from my remarks at a most

convenient point if he wished to draw such an inference, which I never dreamed could be drawn from the statement which I made. I shall quote in a moment a portion of the paragraph which follows the quotation read by the Senator from New York.

Mr. President, in my address I was discussing the attitude of those who had piled up their millions during the World War, during which time there had been piled up a bonded indebtedness equal to the millions which they pocketed and which these home-coming soldiers must pay. I was pleading with them to do justice to the soldiers and endeavoring to show by their attitude that while with miserly hands they were gripping the property, the dollars, which they had amassed during the war, they were condemning any attempt to draw a few pennies from their hoarded wealth to do justice to the American soldier.

I presented to them in my feeble way the wrong that they were doing against those soldiers. I thought it proper to call their attention particularly to the fact that the property which they were hugging so closely to their bosoms, their lives, which they seemed to love less than they loved their dollars, and their liberties in these times were dependent upon the principle which these same soldiers had upheld, not yesterday, but three years ago, when they started their organization, and declared:

> For God and country we associate ourselves together for the following purposes: To uphold and defend the Constitution of the United States of America; to maintain law and order; * * * to inculcate a sense of individual obligation to the community, State, and Nation to combat the autocracy of both the classes and the masses; to safeguard and transmit to posterity the principles of justice, freedom, and democracy.

I deemed it quite appropriate to call attention to the fact that the citizenship of the United States which stood most firmly for law and order and the sacred rights of property was composed of these same soldier boys. It has always been the case; it was true of the Grand Army of the Republic; it was equally true of the Confederate veterans; it was likewise true of the veterans of the Spanish-American War. They make our most sturdy manhood in the country. There is nothing anarchistic in any of them.

So I was appealing to those who are condemning these soldiers for graft, who are condemning those who are standing by what they consider to be the solders' rights, and I was reminding them that they must look to these very men to defend their interests, not with arms, for I do not think we shall ever have trouble in this country for many a long year when our Regular Army can not take care of the situation, but they must look to them to sustain the Constitution of the United States as it was written by our forefathers. That, I reiterated, was worth more to them than the few paltry dollars of which they would have to let go in order to do justice to these soldiers. Bearing out that thought and that idea, this was the closing sentence of that paragraph:

> Let those boys who thus swear to defend their country and their Constitution and who stand for right and justice feel that their country has not, to save a few paltry dollars, failed to extend to them the same right and justice for which they so loyally pledge themselves.

There is nothing in that sentence, Mr. President, that would indicate that I considered it necessary to pass this compensation bill in order to maintain the loyalty of the American soldier. The Senator from New York knows just as well as I do that we can depend upon that loyalty, and even though the same soldiers should be called back into arms to defend the property rights of those who made their millions, they would respond to a man to defend the Constitution and everything that is guaranteed by the Constitution. That being so, I took the position, and I will be pardoned if I take it to-day, that these people who have amassed such mighty fortunes can and should extend what? Justice, and justice only, to the soldier.

I am not asking that any Senator agree with me that we are owing them this sum. I say that we are. We can honestly divide upon whether we are owing it to them or whether we are not; but, taking the position I do that there is a just and moral obligation on the part of this country to make partially, at least, the compensation of the soldier more nearly equal to the compensation received by his stay-at-home brother, I say that that is a moral obligation that ought to be met. But I earnestly repudiate the inference which the Senator from New York seemed to attempt to draw from my statement of a couple of days ago.

Mr. NEW. Mr. President, what I shall have to say with reference to this bill, the adjusted compensation bill, can be and will be very briefly said.

My vote will be cast with the minority against this bill. I find myself unable to support it, at least in its present form. Frankly, I seriously doubt if it could be so amended as to command my support. Time was when I felt that if there were coupled with it a satisfactory plan for raising the money necessary to meet its obligations, and to be devoted to that specific purpose, I might vote for it. Indeed, I said as much. The plan that suggested itself to my mind as best suited to this purpose was through the imposition of a sales tax, but the more I have thought of the subject the less I feel able to waive what strikes me as insurmountable objections to the project itself.

I note a disposition on the part of most of the advocates of the measure to refer to it as an "adjusted compensation bill," but, Mr. President, I can not regard it as anything of the kind. In justification of its passage we are reminded that in the early days of the war, and particularly in the building of the cantonments, artisans were paid extravagantly; that carpenters got ten and twelve dollars a day, and in many instances more, for the most ordinary kind of work, requiring no particular skill, work that an ordinary hammer-and-saw man could easily perform; that common labor was paid correspondingly; in short, that artisans, mechanics, laborers, and all hands engaged in Government work gouged the Government without conscience, and that the Government itself did little to resist it. All true, lamentably so. But suppose it is? The soldier got about a dollar a day in pay. If we are to admit that his maintenance cost the Government two dollars a day more and that his clothing and medical attendance accounted for another dollar, he received on all accounts about four dollars a day. This proposition calls for a dollar a day to the man whose service was on this side of the Atlantic, a dollar and a quarter to the man who went overseas, which at most brings the compensation of the soldier to five dollars a day, in contrast to the ten and fifteen dollars that was paid to the mechanic against whom our complaint is lodged, and with whose receipts and conduct that of the soldier is compared.

To my mind it is absurd. It is no compensation at all. You can not compensate the soldier with money, and if it is the idea to do that by this bill, in my humble opinion it is a complete and utter failure. It does not begin to meet the country's obligation. If it is not to be considered as doing that, it is really nothing more than a tip. Our obligation is of a higher order and one that can not be met by the bestowal of a dole, which in its final analysis is all this is to the recipient.

Mr. President, as I look back upon the days of April and May, 1917, I feel that a great mistake was made by the Government when the conscription bill was under consideration in not making it provide for the conscription of the service of every male citizen of military age. I am taxing no one for that mistake more than I tax myself. I was a Member of this body at that time—a member of the Committee on Military Affairs—and I know full well that the propriety of doing this was suggested and considered. But, sir, I know, too, that the question of propriety yielded to one of fear of consequences. The threats that were made by the recognized leaders of organized labor caused the administration and the Congress to doubt the wisdom of undertaking what was obviously the proper thing. Time was the great essential, and our allies, with their backs to the wall, could not have successfully resisted had the coming of American troops been unduly delayed.

In other words, the war could not have been held up while this Nation fought out a labor strike and the delays in preparation that this would have occasioned. I believe that in time of war it is the duty of every man to render to his government the service to which he is best suited, and that every man between the ages of 18 and 64 should have been subject to assignment by the draft board. I believe that upon the declaration of war the universal conscription act should automatically go into effect, and I would be glad in time of peace to vote for such an amendment to the national defense act or some other proper statute as would provide for just that very thing. Had this been done on the 18th of May, 1917, in the conscription bill that became law with that date, there would have been less sentiment for this bill.

But we did not pass such a law; and, as I say, I do not mean to even imply criticism of anyone for it. The plain truth is that in the face of war and the great national peril we were afraid to take chances on the labor tie-up that we were told that general conscription would make certain.

But, Mr. President, neither this, nor in my judgment anything else, justifies the passage of this bill. No one knows how much it is to call for. It is guesswork, and my guess is that it will call for the expenditure of from four to five billions of dollars. I think it perfectly safe to say that it will cost over four billions. There are approximately 20,000,000 families in the United States, and the passage of this bill means that the share in the

payment of this which is imposed upon each of these families is $200; or, at the usual estimate of five to the family, approximately $40 for every man, woman, and child in the United States, from tottering age to the babe in arms.

And, Mr. President, I might think that even this was worth while and justifiable if I felt that what the veterans are to receive would do them any real good. It is my deliberate conviction that it would not. If we are to consider that the sum they are to receive is in fact compensation, it is an insult. If it is not compensation, it is a gratuity, and no man ever accepts a gratuity without being the worse off for having accepted it. It is my honest belief that so far as the cash feature of this bill is concerned, and considering the time and manner of payment provided, it would be money thrown away. It is insufficient in amount to accomplish any beneficent result that would be enduring, and at the end of a period of indulgence that would be brief at best, the only thing that would be left would be the debt that its granting had fastened upon the Treasury.

Mr. President, there is another thought that is in my mind with reference to the future of these boys. Sir, I remember the closing days of the great Civil War. I saw the soldiers of the North returning to their homes to resume the employments of peace with the close of that great struggle. They made upon my youthful mind an impression that has endured through the years. I see them as they really were—the boys of that day, comparable in all respects to those who followed the Stars and Stripes to France in the last great conflict. I have gone through life with those men just ahead, always in sight. I have felt a veneration for them that has been with me always. I have seen them as they have grown in age and the weight of years has bent their backs and bowed their heads, and I can not help contrasting the feeble few who are still here with the boys that I saw in '65.

And as they have grown in years I have felt, and the Nation has felt, that a just Government should do what it could to relieve them of the weight of burdens that grew heavier as life's journey lengthened. I have favored, and the country has favored, the granting of pensions to those whose failing strength made them less capable of caring for themselves. Before I came to this body I felt that the pension system was just. As a Senator I have voted for most—I think all—of the pension bills which have been before the Congress. Whether favored by all or not, the fact remains that our Government is committed to the policy of pensioning its veterans, and the day will come when pensions for the veterans of the World War will not only be in order but the sentiment for them will be irresistible. I am aware that it has been often said that the bills previously passed providing for vocational education, for compensation to families, and the kindred measures were passed in order that there might be no ground on which pensions should be asked; but as these men grow older, as they follow in the wake of the soldiers of the Civil War, the propriety of pensioning them and the sentiment for it will compel it as inevitably as it compelled it in the cases of the soldiers of preceding wars.

The Senator from Idaho [Mr. BORAH] called attention to this in an admirable address delivered in this Chamber several months ago. The same idea occurred to my mind more than a year ago, and I sought by instituting comparisons and making estimates to find just where this would lead us. I knew that in the 56 years that had at that time elapsed since the close of the Civil War the Government had paid to its soldiers and their dependents $5,700,000,000. Realizing the superior numbers of men engaged in the World War as compared to those entitled to pensions as survivors of the Civil War, I went to Colonel Forbes, of the Veterans' Bureau, and told him what I had in mind. I also addressed a formal letter to him, in which I asked that for my official information he would have the actuaries in his department make an estimate of the cost to the Government for an equal length of time—56 years—of a pension system based upon the rates that had been paid from time to time to Civil War veterans and following the same legislative procedure. I submit herewith copies of tables prepared for me in compliance with this request, and I ask that they be printed as a part of my remarks at the conclusion of what I have to say.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. NEW. Mr. President, the greatest amount paid by the Government in any one year on account of Civil War pensioners was a little over $222,000,000. If the same degree of legislative liberality that was manifested toward them and a proportionate rate of progressive increase is continued in the case of the veterans of the World War, it will be seen that we would reach a total of $1,322,000,000 for the year 1973, or an amount equal to the cost of the ordinary current expenses of the Government to-day, including the Civil War and Spanish War pension lists.

Mr. President, the cost of the so-called "bonus" which is provided by this bill will exceed the cost to the Federal Government of the whole Civil War. In 1866 the total national debt was considerably less than $3,000,000,000. We had not wiped out that debt in the 52 years that had elapsed between the surrender at Appomattox and the passage of the resolution of April 6, 1917, recognizing a state of war with Germany. At that time there still remained a debt of a trifle less than $1,000,000,000, the major part of which was chargeable to the Civil War. The passage of this bill means the addition of four or five billion dollars to a public debt that already approximates $23,000,000,000. It is impossible to create a public debt that leaves the shoulders of any man free from the burden it imposes. Its effects will be felt by those who are to be the immediate beneficiaries of this plan for a generation beyond the day when they have lost all recollection of ever having had the pittance that the bill proposes to give them.

I said that a public debt can not be created that does not place a burden upon every citizen, and I believe that to be true. It matters not that it is attempted to assess it in the form of excess-profits taxes or by any other fatuous expedient. In the end the money has to come from the people—from the farms, the shops, from the producers—and no other theory will bear analysis.

Mr. President, we are approaching the day when the Treasury Department must refund about six and one-half billion dollars' worth of Government securities, and in the face of that we are asked to add four or five billion dollars to a debt already passing $23,000,000,000. With all the sentiment I entertain for the soldiers—with all I might be willing to do to bring them even temporary gratification—I can not see my way clear to adopting a policy which my sober judgment convinces me is wrong from every possible standpoint, and from none more than that of the soldier himself. It may or may not be worthy of note that every Member of this body who has been in the military or naval service of his Government at any period of his life, and who is here to vote at all, is arrayed in opposition to the bill.

APPENDIX.

[Treasury Department, Bureau of War Risk Insurance.]

Table giving estimate of what a system of pensions for the World War veterans and their dependents would cost under same legislative procedure as was used by the Pension Bureau.[1]

ON THE ASSUMPTION THAT THE AMOUNT PAID BY THE BUREAU OF WAR RISK INSURANCE IN 1920 WAS THE SAME AS THAT PAID BY THE PENSION BUREAU IN 1866, PER PENSIONER.

Civil War.				World War.			
Fiscal year.	Number of pensioners.	Annual pension per pensioner.	Total amount.	Fiscal year.	Number of pensioners.	Annual pension per pensioner.	Total amount.
1866	126,722	$121.92	$15,450,549.88	1920	252,889	$121.92	$30,832,226.88
1867	155,474	133.69	20,784,789.69	1921	310,267	133.69	41,479,595.23
1868	169,643	136.18	23,101,509.36	1922	338,744	136.18	46,130,157.92
1869	187,963	151.70	28,513,247.27	1923	422,474	151.70	64,089,305.80
1870	198,688	147.73	29,351,488.78	1924	396,547	147.73	58,581,888.31
1871	207,495	137.44	28,518,792.62	1925	414,398	137.44	56,954,861.12
1872	232,229	128.12	29,752,746.81	1926	463,701	128.12	59,409,372.12
1873	238,411	113.17	26,982,063.89	1927	476,927	113.17	53,871,975.59
1874	236,241	127.86	30,206,778.99	1928	471,776	127.86	60,321,279.36

[1] These figures are only approximate.

Table giving estimate of what a system of pensions for the World War veterans and their dependents would cost under same legislative procedure as was used by the Pension Bureau—Continued.

ON THE ASSUMPTION THAT THE AMOUNT PAID BY THE BUREAU OF WAR RISK INSURANCE IN 1920 WAS THE SAME AS THAT PAID BY THE PENSION BUREAU IN 1866, PER PENSIONER—continued.

Mr. REED of Pennsylvania. Mr. President, I am not unmindful of the wise custom of the Senate which dictates silence to a new Member, but because of the fact that I served throughout the war, with troops, I feel that it is my duty to state my reasons for the attitude I shall take upon the pending bill.

The passage of the bill I believe is favored by a majority of the ex-service men of the country. They served their country well, and at very meager pay, while the railroad men, the munition workers, and the shipyard workers of the country, who should have been drafted instead of being wheedled, were getting a pay increase almost every time they asked it. Almost every day was Christmas in the shipyards but not in the Army. The contrast was shocking, and I believe that it is because of that contrast that the service men of the country are so easily induced to favor this measure.

Nevertheless, Mr. President, I am going to vote against this bill. The plain fact is that the country can not afford to grant this request. Our people are staggering under a burden of taxation that has never been paralleled, and I believe it is our duty to refrain from adding one ounce to that burden of taxation on any excuse whatever.

It is idle, I think, for Senators to say that the ex-service men should be paid for the danger they have undergone. The amount the bill would give them would not commence to pay for that. You can not ascertain the value of what those men underwent. You can not appraise in dollars and cents what it is worth to stand and hear the screech of an incoming German shell. You can not appraise those things, and the bill does not undertake to.

I think, too, it is idle to argue that those men should get a bonus in order to insure their loyalty, because, if I know them—and I think I do—their loyalty is absolutely assured to the end.

Mr. President, the men who served in the Army and Navy during the last war are not a separate group. They are not isolated from the rest of the community, but they are part of it. This is our country as much as it is your country, and it is our future that is mortgaged by this vast issue of bonds, which the country has to pay. The service men who have given long thought to the matter of the pending bill are anxious to see that mortgage on our future relieved. They are anxious to see the debt paid and taxes reduced, and most of them are more anxious to see that debt paid and that burden of taxation reduced than they are to see this bonus granted.

I am not willing, in army slang, to "pass the buck" to the President. Therefore I shall vote against the pending bill.

Mr. BURSUM. Mr. President, the way to discharge a debt is by production. If it were possible to place in the Treasury of this country the losses which have been sustained during the past few months on account of industrial controversy, it would provide the money which will be made necessary by the passage of this bonus bill several times over. I do not feel that the indebtedness of the country would be a serious proposition if the people would get to work and commence to produce. As long as the country is idle its ability to pay, of course, is greatly curtailed.

The pending bill has been referred to as an adjusted compensation bill and is sometimes called a bonus bill. I make no point concerning the title. The name is not necessarily a vital factor. In my judgment, the chief object of this bill is to refund to the service men that which Congress wrongfully withheld from them, to provide for a just restitution of that which honestly and equitably is due them under all rules of justice, fair play, and a square deal. I can not agree with the interpretation of the opponents of this legislation that the proposed settlement or payments should be considered in the nature of a gift or that it is an attempt to cheapen patriotism, to substitute patriotism of the soul for that of the dollar, or to commercialize the loyalty of Americanism. These premises are false, faulty, and entirely untenable in the face of recorded facts.

Mr. President, during the dark hours of 1917, after nearly the whole of Europe, with the exception of a very few neutral countries, had been engaged in the bloodiest war in history; when great Russia had collapsed and the powerful British and the brave French people were fighting for their very existence, and the heroic Belgians, reduced in numbers, led by the democratic patriot, King Albert, were in a death struggle to recover possession of their lands and homes which had been ruthlessly taken possession of and overrun by the hordes of Prussian soldiers under command of the German Kaiser, William II; when Italy, under the gallant leadership of General Diaz, was engaged in a terrific struggle to hold in check the superior force of the Austrian army from crossing the Alps and forcing the surrender of the Italian Empire; when Serbia had been obliterated from the map of Europe; when all of the allied forces had been greatly reduced in number and in morale; when it seemed that further resistance to the Kaiser's offensive was useless; when the allied forces were tired, discouraged, and despondent, yet clinging tenaciously to their post of duty, hoping against hope that the Great Providence might intervene to turn the tide of fate which to all human conception seemed inevitably destined to overwhelm, crush, capture, and humiliate the last vestige of authority, to obliterate from the map of the world the allied governments, annihilate democracy, destroy and nullify the progress made in behalf of democracy, liberty, and civilization during the past two centuries—at the crucial moment this country intervened, the call to arms was sounded, our boys responded instantaneously to the number of four million or more, ready and willing to pay the supreme sacrifice in behalf of their country and of civilization. The heroism, the achievements which our soldiers displayed on yonder shore can never be adequately described. One outstanding feature that is universally recognized is this fact—that, except for American intervention, there can be no doubt but what the world would to-day be subject to an autocracy which would be almost universal.

Mr. President, the boys who responded to the call of their country represent the cream of the citizenship of this land. They are not objects of charity; they do not come to the Congress in the attitude of beggars seeking alms; they do not come to the Congress seeking a reward for the sacrifice made in behalf of their country; they do not come seeking a gift—they come, Mr. President, within their rights as citizens seeking a square deal, seeking the righting of a wrong, seeking the enactment of legislation based upon the principles of equity, seeking the reimbursement to cover moneys which were deducted from their pay checks to which this Government was not rightfully, morally, or equitably entitled.

Mr. President, during the war the Congress enacted what is known as the bonus law, which gave $20 per month to every civil employee of the Government in addition to the statutory salary. I submit, Mr. President, that if it were fair and right and necessary to provide this bonus for the civil employee it is right, fair, and just to accord the same treatment and pursue the same policy with reference to the military. Why should we give $20 a month to the employee who handled the pen and

deny it to the man who shouldered a gun? It has been said in defense of this policy that the high cost of living was responsible; that the soldier was maintained, clothed, and provisioned at the cost of the Federal Government. That statement, so far as it goes, is true, but it does not go far enough. The dependents of the soldier who served were also subject to the increased cost of living—his child, his children, his wife, dependent sister or brother, or widowed mother or aged father. They, too, I submit, were subject to the burdens of the high cost of living.

Mr. President, the Government deducted from the soldier's pay $7.50 a month on account of insurance. I submit that while the war was in progress this deduction was wholly unjustified; it represented a policy in direct conflict with the policy of insurance to cover hazardous occupations. In nearly every State of the Union it is almost the universal practice, recognized as a sound policy in line with which legislation has been adopted in nearly all of the States, requiring the employer to provide an insurance fund in case of accident, injury, or death. What can be more hazardous than war? Why should the Government be an exception to this recognized universal rule? I submit that the veteran has a rightful, equitable claim to a refund of this $7.50 a month during the period of his service.

Think of it, Mr. President, that the Government should say to its defender who is fighting in the trenches, "We not only expect you to fight our battles but we expect you to insure us, the Government, from all harm on account of damage. In case you get killed your family would have a claim, and we expect the veteran to pay for that insurance"—a most unjust proposition, which has not been invoked and is not being invoked in any other branch of industry in the country where hazardous employment is engaged in.

Mr. SHEPPARD. Mr. President, will the Senator tell us how many men have kept up their insurance since the war closed?

Mr. BURSUM. I do not know how many men have kept up their insurance. What I contend is that the insurance in force during the time while they were in the service ought to have been paid for by the Government.

Mr. SHEPPARD. I understand that only a small number of men have continued to make the premium payments. Consequently, those who discontinued have sustained a pecuniary loss because of the imposition of the charge for insurance.

Mr. BURSUM. That is very true. At any rate the imposition of the burden upon the soldier to pay his own risk was outrageous, yet the Government deducted the $7.50 from the wage of the soldier, from his little $30 a month.

Mr. SHEPPARD. I want to point out further the fact that when insurance is taken in an old-line company the general rule is that upon withdrawal the insured is entitled to a certain proportion of what had been paid in.

Mr. BURSUM. That is true.

Mr. SHEPPARD. In this case there was no equity whatsoever of that kind.

Mr. BURSUM. The equity is repaid in part after two years by the old-line insurance companies.

Mr. President, there was another policy practiced during the war. The soldiers were urged to subscribe to Liberty bonds; they did subscribe in large numbers; the payments of these bonds were deducted from their monthly wage. They bought bonds at par; most of them were obliged to sell them around 80 cents, therefore, a loss of $20 for every $100 to every veteran who bought a bond. Can anyone believe in the justice of a policy which would impose upon our men in the trenches fighting our battles, fighting for our liberty, fighting for the integrity of our country, hazarding their lives and health, should also be burdened with the losses incident to the financing of the war in which their very life was engaged in conducting? I submit, Mr. President, that this feature also represents a rightful, moral, equitable claim on the country.

There were divisions where every soldier subscribed for bonds. It was accepted as a command just as much as any other military order which might be given. For any reasonable person to say that it is right and just that the boys who did the fighting in the trenches should suffer the loss incurred on account of financing the war, is unjust and outrageous.

Mr. President, the Government adopted a system of allotments to dependents on a 50-50 basis with the veteran. Allotments were made up to $30 a month, depending upon the number of dependents. Fifty per cent of this amount, or $15 a month, was deducted from the wage of the soldier; so that the soldier was not only required to hazard his life, his health, to give his service, but out of his meager $30 per month he was required to pay as much as $15 out of his wage to dependents and $7.50 a month for his insurance. Those two items alone aggregate $22.50 per month. I think the deduction was $5 a month for the Liberty bonds purchased. I am not certain as to the monthly payment—it may have been $10 a month—but anyway, say, $5 a month; $15 for dependents, $7.50 for insurance, $5 for Liberty bonds; also $1.17 per month deducted for laundry. There you have, all told, $28.67 per month—the munificent sum of $1.33 per month is left as a balance to the soldier.

Mr. WADSWORTH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from New York?

Mr. BURSUM. I yield.

Mr. WADSWORTH. I am not sure that I heard the Senator correctly. Did the Senator deduct from the pay of the soldier a charge for laundry?

Mr. BURSUM. Yes.

Mr. WADSWORTH. Is not the Senator aware that the soldiers' laundry was done by the Government during the war?

Mr. BURSUM. I do not think that is altogether true. I have talked with some of the service men, who advised me that they paid for their laundry.

Mr. WADSWORTH. I have been through the laundries in the big camps, some of them in France, and I recollect exceedingly well also that part of the estimates made by the Quartermaster General were for the operation of the laundries to do the laundry work of the men.

Mr. REED of Pennsylvania. That was not done in our division in Camp Meade before we went to France. We were charged for laundry at Camp Meade.

Mr. WADSWORTH. That may have been so in the beginning, but I recollect very well, and my purpose in interrupting at this point the statement of the Senator from New Mexico was to state that the Committee on Military Affairs, in writing the appropriation bill a year ago, eliminated the item for maintenance and operation of laundries which the Quartermaster General informed us had been operated free of charge to the soldiers, certainly during a major part of the war. The Senator is aware that prior to the war the soldiers of the Regular Army had to pay their own laundry charges and it was only during the last year that the laundry charges have again been imposed upon the soldiers of the Regular Army.

Mr. BURSUM. It is evident that there were charges made. What the Senator from New York states is no doubt true, but it is evident that there were exceptions and that at least a portion of the time the laundry fee was deducted. That was the case at Camp Meade.

Mr. SHEPPARD. At Camp Travis, in Texas, I will say to the Senator, a cooperative laundry was conducted by the men themselves at their own expense.

Mr. BURSUM. So that it is apparent that they did not derive that benefit altogether. Anyway, even conceding that they paid no laundry fee, then the soldier would have had a grand total of $2.49 at the end of the month.

On top of all this, and to add insult to injury, the civil patriot who runs no chances of injury and braves no dangers was given $20 bonus and denied to the man who went to war. How can anyone justify this sort of discrimination? How can anyone stand up and cry to the heavens that the principles of the bill are designed to cheapen patriotism, to reduce the patriotic spirit and the loyalty of these boys to a dollar basis?

Mr. President, several weeks ago the distinguished eloquent senior Senator from Idaho [Mr. BORAH] well stated that the acts of heroism and achievements obtained by our soldiers overseas during the World War could never be adequately expressed by human tongue. I submit, Mr. President, that I agree entirely with what the distinguished Senator said. I might, however, add that the heroism displayed by our soldier boys, the achievements attained in the World War have gone into history and will live with the ages. That record has been written in letters of American blood and can never be obliterated by human act, by congressional act. It can never be dimmed by any cry of dollar patriotism. I submit, Mr. President, that the graciousness with which our soldiers served, the loyalty which they displayed, the victories which they attained, the great sacrifice which they made, the saving of civilization and democracy which they brought about, can not and will not in the mind of any fair man bar them from rights to which they are justly entitled under all of the principles of justice, right, equity, and fair dealing.

I have offered an amendment which is in the nature of a substitute to the pending bill as reported by the committee. My reasons for offering this amendment is the fact that the settlement made with the veteran under the provisions of the proposal of the committee is an unbusinesslike settlement. If I

correctly understand the bill reported by the committee, it proposes the issuance of certificates which will cover the amount due the veteran upon the basis of $1 a day for service rendered in this country and $1.25 a day for service overseas, plus 25 per cent, plus 4½ per cent per annum, compounded annually, all of which will be payable in 20 years; also authorizing the veteran to borrow money at any bank to the extent of 50 per cent of the certificate of the face value and providing that the rate of interest to be charged by the banks shall not exceed by more than 2 per cent per annum the rate charged at the date of the loan for the discount of commercial paper under section 13 of the Federal reserve act by the Federal reserve bank for the Federal reserve district in which the bank is located. The committee bill further provides that the Secretary of the Treasury shall, not later than January 15, 1926, take up these loans. In effect, as I understand the proposition, it seems that outside of the small claims of veterans amounting to $50 or less, which will be paid in cash, that the balance, which will probably amount to a billion and a half dollars, approximately representing the face value at the time of issue, less the 25 per cent plus and the 4½ per cent compound annual interest plus, may be used by the veteran as collateral to borrow to the extent of 50 per cent, which, if utilized, would amount to approximately $750,000,000, which the veterans would be entitled to borrow from the banks of this country upon three years' time, the Treasury binding itself to redeem these loans within that period. It is safe to estimate that the interest on the money so borrowed will not be less than an average of approximately 7½ per cent, and it is doubtful if in actual practice even such terms can be secured. There is no way of preventing extortion in the matter of rates of interest. The chances are that if this system be adopted it will be a fertile field for the pawnbroker. Assuming, however, that the money can be borrowed, and assuming that 80 per cent of the holders of certificates will borrow money, that would mean an annual interest charge of $45,000,000, or $135,000,000 for the three years. In effect, therefore, the Treasury will have to pay within three years' time, or by 1926, to take up these loans, if the loans are to be taken advantage of—and it may be presumed, in my judgment, that they will be taken advantage of if the loans are available—$735,000,000. This does not, of course, include the $50 payments mentioned by the chairman of the committee as amounting to about $16,000,000, which would be paid promptly after the enactment of the bill. However, even after the Treasury shall have paid out $750,000,000 under the provisions of this bill, it will have liquidated less than 20 per cent of the final burden, the estimated cost being in the neighborhood of $4,000,000,000 upon the 20-year basis.

The additional cost is caused by the method of settlement. For instance, if a veteran has due him $500 on the basis of a dollar a day for 500 days' service, under the provisions of the committee bill he is given an additional allowance of 25 per cent, or $125, making a total of $625, plus 4½ per cent interest, compounded each year, providing he will wait 20 years for his money.

In this connection I might add that the system with reference to loans from the Treasury under the committee bill is a progressive one, authorization being given to increase loans every year until they reach, as I recall, as high as 85 per cent. Thus the expense to the Government is multiplied and the veteran has not been accorded a business settlement.

Furthermore, the proposition of using the credit of the veteran to borrow money at 7½ per cent per annum while the Government pays him 4½ per cent is not using the veteran fairly. It is very doubtful to my mind that the veteran will in actual practice secure his money from the banks of the country at 7½ per cent a year. He is more likely to pay 10 or 12 per cent, and while such rates are prohibited by law, yet we all understand how difficult it is to enforce the law in such matters. There is no provision covering that feature. This Government at the present moment can borrow money at 3½ per cent. It is the wealthiest Government in the world. The percentage of our indebtedness is not high, but is extremely low compared with the other nations. We have more than three hundred billions of resources, and our total debt, including the debt of the Allies to this country, is only about twenty-three billions. If we deduct the allied debt owing to this country, the total public debt will only be approximately $12,000,000,000. For the Congress to say that the veteran shall use his credit for a temporary loan upon an exorbitant rate of interest in order temporarily to relieve him and utilize an indebtedness which is owing to him by the United States Government is simply preposterous. Think of a great Government like ours, which has available a credit basis of 3½ per cent, and which rate will probably be reduced to 2½ or 3 per cent within the very near future, asking a man who fought for it in the trenches to borrow money from the banks, thereby creating enormous frozen credits and curtailing money which should be available for commercial development. It is an unheard-of proceeding. It is an unheard-of method. I say we either owe these boys or we do not owe them. If we owe them, we ought to pay them. We ought to pay one hundred cents on the dollar. A debt of a Government like our Government is a sacred obligation. It should be met manfully, fairly, and should be paid in cash, without any quibbling. If we owe these boys money, we should pay them money. We do not owe them insurance; we do not owe them a future nest egg in life. If these boys were capable of shouldering arms and fighting for us in the trenches, they are capable of receiving and utilizing and disbursing whatever may be due them in such manner and in such form, at such time and at such place, as their pleasure may determine.

What would be said if a debtor who owed an obligation and who happened to be a wealthy man, possessed of unusual credit, should say to the creditor, "I won't pay you the cash I owe you, but I will give you a 20-year insurance policy. It will be better for you; you will save it, and you won't be able to spend it." Yet that is the very proposition that is now being submitted to the soldier who served his country in time of need when the matter of paying him his just and equitable dues is brought up for settlement. Senators are aware that we have a thrifty lot of people in this country; we have some thrifty organizations who were engaged all during the war in "thriftifying" the soldiers, and they "thriftified" the soldier until he had the munificent sum of about $1.50 left out of his pay check every month.

I say that we owe these boys this money; they are entitled to it. I hold that it is an obligation; it is a debt; it is a refunding of money which the Government has withheld from the wages which were due to these boys during their service, and there ought not to be any quibbling about the settlement. It should be paid a hundred cents on the dollar.

If my amendment shall be adopted, it will pay to each one of those who were in the service at home a dollar a day in cash by the 1st day of October, 1923, and $1.25 per day for overseas duty. It will pay the balance of the money due them within five years, together with 3½ per cent interest. They will immediately upon settlement receive a certificate for the 50 per cent due which is not paid at the first settlement. Of course, those whose claims do not exceed $50 will be paid immediately.

I say, if the Government has not the money on hand when the time for payment arrives, let the Government use its own credit which is the best credit in the world. Let it secure the money to pay upon the most favorable basis obtainable, just as the Government finances every other obligation; just as has been the practice always. Financing has become necessary. Whenever an obligation becomes due, how does the Treasury meet it? If there are no funds available, under the general law the Secretary of the Treasury issues certificates and borrows the money; he gets it in the market upon the best terms which are obtainable. Why should there be any exception in the case of this indebtedness? If the Government does not care to borrow the money, it can have an option under the substitute of utilizing such portion as may be necessary of the foreign securities which may be disposed of, and in that way eliminate any necessity of borrowing any money or levying any tax. Undoubtedly the British debt will be refunded before a year goes by; if it is not, it ought to be. British bonds are now selling in the American market on a basis of about 5¼ per cent. It would be no sacrifice to this Government if it lost 1 per cent of the interest paid by Great Britain on the basis of 5¼ per cent credit in the market at this time. That credit will probably be improved before the settlement is made. The credit of Great Britain is the second best credit in the world. She is not bankrupt and there is no likelihood of her becoming bankrupt. The $300,000,000 interest from Great Britain, which will be due by a year from now, would of itself pay 40 per cent of the first payment due under the provisions of my substitute.

This Government will not be bound as to the method of payment, but it would be bound under the provisions of the substitute to procure the funds which, of course, would be limited to two plans. One, to borrow the money on the best basis obtainable; the other, to utilize a portion of the foreign securities, which would mean disposal of a portion of the British refunding bonds for the reason that they are more liquid than any of the other securities which we may hope to obtain within the very near future. While these new refunding bonds have not been issued, authority has been granted by

Congress to make such arrangements through the foreign debt commission, and there is little doubt that a refunding of the debt will be brought about before a year goes by.

To sum up the net effect of the method of financing which the committee bill proposes, when reduced to concentrated facts, it simply means this: The Government owes $100. In order to obtain the money, it issues a certificate which is the equivalent to a limited conditional bond in the sum of $125, payable in 20 years, plus 4½ per cent annual interest, compounded annually, and agrees to loan back upon this identical security within three years 50 per cent of the face value out of the Treasury. Think of it! A great Government like the United States, in order to finance itself to pay $100, issues a bond for $125 and pays 4½ per cent compound interest for 20 years in order to liquidate that $100 debt, and at the same time we have a credit in the market on the basis of 3½ per cent!

The difference between success and failure in the industrial world is the ability to carry indebtedness at a low rate of interest. This principle applies to the Government just as much as it applies to private concerns in commercial life or to a farmer or a miner. We ought not to make the settlement upon the basis of chips and whetstones. It is too closely related to the pawnbroker's method. It reminds me of Aunt Maria's boy, who was about to be married and was short of cash. He applied to Aunt Maria to let him have $1,000 to defray the expense of the wedding ceremony and the honeymoon trip and to give him a start in life. Aunt Maria said she did not have the thousand dollars, but she would let him have some valuable diamonds which he could hock at the pawnbroker's and borrow half of the amount he required—$500. The boy took the diamonds to the pawnbroker and secured the $500.

Later on, when Aunt Maria went to take up the diamonds from the pawnbroker, she found that the charges against her were three times the amount that the boy had gotten. She remonstrated. The pawnbroker said the multiplication table was working, interest was running night and day, and he had held the diamonds a long time. Aunt Maria said, "I wish I had given the boy a thousand dollars in cash to start with; it would have saved me money; my boy would have had the thousand dollars in place of $500 and I would have saved $500."

That is just the way this pawnbroking arrangement will work out. If we will pay these boys the money which is due them, they will be ahead and the Government will profit by it.

Mr. President, it is not in keeping with the dignity, the integrity, or the reputation of this great Government of ours to attempt to settle an obligation except on the basis of a 100-cent dollar. It is not economy. It is not a faithful compliance with the solemn obligations of a great nation.

If we owe this money—and I contend that we do owe it; I have cited the reasons why we owe it—we should pay it with a 100-cent dollar, and we should do it without delay. We should not attempt to use the credit of the veteran—the credit of the creditor—to pay with, when our credit is the best credit that there is on the face of God's footstool.

If my proposed amendment is adopted, it will save the people of this country a sum in excess of a billion dollars, as compared with the committee proposal. It will pay the veteran a dollar a day for service in this country and $1.25 per day for overseas service. It will pay on the basis of a 100-cent dollar.

Mr. MYERS obtained the floor.

Mr. BORAH. Mr. President, will the Senator permit me to call for a quorum?

The PRESIDENT pro tempore. Does the Senator from Montana yield for that purpose?

Mr. MYERS. I do not think it is necessary at all. If the Senator wants to do so I will yield.

Mr. BORAH. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Gerry	Moses	Sheppard
Borah	Hale	Myers	Shields
Brandegee	Heflin	Nelson	Shortridge
Bursum	Hitchcock	New	Smoot
Cameron	Jones, N. Mex.	Nicholson	Stanfield
Capper	Jones, Wash.	Norbeck	Sutherland
Colt	Kellogg	Oddie	Trammell
Cummins	Kendrick	Pittman	Underwood
Curtis	Keyes	Pomerene	Wadsworth
Dillingham	Lenroot	Ransdell	Walsh, Mass.
Edge	McCumber	Rawson	Walsh, Mont.
Ernst	McKellar	Reed, Mo.	Watson, Ga.
Fletcher	McLean	Reed, Pa.	Watson, Ind.
France	McNary	Robinson	

The PRESIDING OFFICER. (Mr. CAMERON in the chair). Fifty-five Senators have answered to their names. A quorum is present.

Mr. MYERS. Mr. President, I desire to address to the Senate a few remarks upon the pending bill.

I have several times addressed the Senate in opposition to this piece of proposed legislation, and on at least one occasion I did so extendedly. I shall not speak extendedly to-day; but since I last addressed the Senate on the subject a few thoughts have occurred to me that I have not heretofore expressed. I shall endeavor to give utterance to them to-day, and in doing so I shall try to avoid repeating any of the arguments I have heretofore made on the subject and shall endeavor to avoid traversing any of the same ground.

During the debates of the last few days on this subject, to which I had the privilege of listening to the extent of my time, a good deal has been said about propaganda against this proposed legislation. A good deal of stress has been put upon what has been called the propaganda in opposition to it. I do not believe there has been nearly so much propaganda in opposition to this proposed legislation as there has been in favor of it. Certainly the propaganda in opposition to it has not continued so long as the propaganda in favor of it.

Propaganda in favor of some such legislation as this was begun more than two years ago, when the first bill for a cash bonus originated in the House of Representatives. I believe it originated there with some Members of the House who thought, I believe, they saw in it a vote-getting scheme. I believe it had its conception mainly in the House of Representatives with some Members who were looking after their own welfare. It was then taken up by the former service men of the country generally, and particularly by the American Legion, and a very active propaganda in behalf of it has been conducted by the American Legion and other former service men, which, of course, is the right and privilege of those engaged in it.

It is equally the right of those who are opposed to the proposed legislation to call attention to reasons why it is not just and why it should not be enacted. If it is the privilege of people seeking legislation at the hands of Congress to initiate and conduct propaganda in its favor and not the privilege of those who are opposed to it and who think it unwholesome to oppose it and advance reasons why it should not be enacted, then we have come to a bad state of affairs in this country, a very unfair condition.

In my opinion nearly all legislation enacted by Congress is brought about by propaganda. We formerly thought that Congress sat here and deliberated and enacted legislation which in its judgment was for the best interests of the country, but I believe that idea has been largely superseded by the idea that if you want to get anything out of Congress you must institute propaganda and carry it on very extensively and very actively. There has been more propaganda carried on in favor of this proposed legislation than in behalf of any other legislation of which I have known for a good while.

I am finding no particular fault with that. I believe Congress should listen to and consider reasons advanced both for and against proposed legislation and then use its best, unbiased judgment. Congress should consider argument, but should not be swayed by propaganda or vote-getting considerations. So far as propaganda against this proposed legislation is concerned, it has never had a particle of weight with me, has none now, and never shall have any. I made up my mind that the proposed legislation was unwise, unjust, and improper long before any propaganda was inaugurated either for or against it, and I still hold the same opinion.

I announced more than two years ago last spring that I would oppose the legislation, and my attitude has not deviated or altered a particle. The more I think about it the more I become convinced that such legislation is wrong in principle, unsound in theory, and contrary to the common welfare, and that it can not be justified.

There has been a good deal said in the debate on this bill about unemployment of former service men. I do not believe there is now much unempoyment in this country. What unemployment there was a year or so ago, I think, has largely disappeared and whatever unemployment may be left I think is rapidly disappearing. With the demand for labor in this country, with the large steel industries of the country just announcing a 20 per cent increase in the wages of their employees, and with the general demand for labor all over the land, I can not believe that there is much unemployment among able-bodied former service men who want to work. In fact, I do not believe there is much unemployment any more anywhere. I think it has largely disappeared.

If there is any former service man who is suffering physical disability and who is unable to do a man's full day's work at manual labor, or at any other kind of labor for which he is fitted, I think he ought to be assisted to the full extent of the ability of the Government to assist him. Everything should be done for those unable to work. Wherever a former service man is unable to work, he should be promptly and adequately cared for. I believe that is the policy of the Government and I believe the Government will continue that policy. But if a former service man is not physically incapacitated, I can not see, in surveying the industrial conditions of the country, any reason for his being unemployed at some gainful occupation. There may be isolated instances, but I do not believe they are general. The cash bonus for all former service men is entirely another thing, however. I contend that this country is not in such a condition now that the taxpayers of the country should be saddled with an additional burden, variously estimated at from four to seven billion dollars. I do not believe the business of the country, which is just emerging from a long and distressing depression and from a condition of stagnation, is in any shape to stand any such added burden at this time. I do not believe that the taxpayers of the country, who are already staggering under enormous burdens of taxation, are in any condition to take on any such additional burden. I do not believe that the reviving business of the country is in any condition to carry it. The people are in no condition for it; business is in no condition to stand it.

In considering the proposed legislation the first question that confronts us is, From where is the money to come? Where are we going to get the money to pay the enormous sum which it is proposed to appropriate by this legislation? It must come from somewhere. We can not get it without taking it from the pockets of the taxpayers, without extracting it from the business and the production of the country. It must be produced in order to be appropriated and paid. Congress can not appropriate money without deriving it from some source, without taking it from somebody. That would be a wizardlike performance that is impossible of imagination. You can not extract it from the clouds. So from whence is the money to come? From four to seven billions of dollars of indebtedness to be piled on the backs of taxpayers and toilers already staggering like drunken men, staggering to the point of dizziness, under unprecedented burdens of debt and taxation! Who will pay it? How will it be paid?

It has been frequently suggested that the debts owing to us by foreign nations be utilized for the payment of this money; that the interest of those debts be utilized for making annual payments; and it has been suggested by some that the principal of some of those debts be utilized for paying some of this proposed expense. In the first place, I do not believe there is any assurance that any of the principal of those foreign debts will be paid to this country within the lifetime of a generation. It may be none of the principal will be paid within several generations. There is no certainty and but little prospect of any of the principal being paid within the lifetime of the youngest infant now living. I think it doubtful if any interest on those foreign debts will be paid for a good many years. We have no assurance that any interest will be paid for many years.

The entire situation in regard to those foreign debts is chaotic. We only know that we furnished the money and that the money is owing to us; that is all we know. We do not know whether our debtors are going to pay us, or are arranging to pay us, or are intending to pay us, or have any facility for paying us. Not one of them has made any move as yet in that direction. We have heard that many of the people of the debtor nations want to get out of paying the debts if they can, and that there is a very lively feeling throughout the debtor nations in favor of getting away from the payment of both principal and interest, if any possible way of getting away therefrom can be devised.

I do not think we should allow our foreign debtors to escape without payment of both principal and interest. I think we should require payment within a reasonable time and upon reasonable terms of both principal and interest, and I think it will be exacted in due time of our debtors; but when and how and how fast and upon what terms is something nobody in this country can say, nor can anybody shed a particle of light upon it to-day. We have yet to see the first ray of light upon that subject. So I think that is a very poor dependence for meeting obligations on account of a soldier bonus, if we enact it, for many years to come.

In the next place, if we should pay it out of the money owing to us by our foreign debtors, whose money would we be taking? To whom does that money belong? That money belongs to the taxpayers of the United States. It is their money. It was taken from them, and when it shall be returned by the debtors it will be due to our people; and we have no more right to appropriate that money for any particular purpose and expend it when we get it than we have to appropriate any money out of the United States Treasury.

It all belongs to the taxpayers of the United States. It does not really make any difference to them whether we pay a cash bonus out of money collected from foreign debts due us or whether we raise it by some new expedient of taxation or whether we pay it out of the general funds in the Treasury as they come in. It is all the people's money. The people produced it, the people earned it, the people paid it; it is theirs. Some Members of Congress seem to think appropriating money to be paid out of foreign debts, when they may be paid, is like finding it, like extracting it from the clouds. The idea is fallacious. It would be taking the money from the people none the less than appropriating money out of the Treasury and paying it out of funds now available.

Of course, Congress has a legal right and a moral right, if it may feel justified in doing so, to appropriate any money for any constitutional purpose, no matter whether it may come out of the Treasury, whether it be money already paid in, whether it is money coming in from new forms of taxation, or whether it be money derived from the payment of foreign debts. It is all under the power of Congress, within its constitutional limitations. But I say it makes not a particle of difference to the taxpayers of this country, if we are going to give a cash bonus, whether we raise the money by new forms of taxation or whether we take it out of money derived from the payment of foreign debts due us. It is taking it away from the people just the same.

Our national debt is now in the neighborhood of $23,000,000,000. There is owing to us from foreign governments about $10,000,000,000, and when that money is paid the reasonable and proper and logical use to make of it would be to apply it upon the enormous national debt under which we are struggling. If paid now and so applied, it would reduce the national debt to about $13,000,000,000. It is immaterial to the people of the country who have to pay the taxes whether we apply that sum, when we may get it, to the national debt and reduce it by $10,000,000,000 and make them raise from four to seven billion dollars more by additional taxation with which to pay a cash bonus, or whether we take the cash bonus out of the money that is to be paid by foreign debtors. The burden on our people would be just the same either way. It is just as long as it is broad, and it amounts to the same thing in the end. It is appropriating the people's money for a certain specified purpose, but before we can count on appropriating any money derived from foreign debts to pay a cash bonus we must first get the money, and that is not yet in sight. I say that when the time may come when our foreign debts shall be collected and the money due us shall be received the people of our country will be entitled to have it go on the national debt, and to that extent reduce the debt and the enormous burden under which they are struggling.

This country is in a serious financial condition. I do not mean that it is in a fatal financial condition. I do not mean that this country is in any danger of becoming bankrupt, but the people are confronted by serious problems arising from taxation and are struggling under staggering burdens of taxation, and I think before we consider enacting this proposed legislation, at a cost of from four to seven billion dollars of added taxation, we should first look around, cast about, and take account of what our resources are and what is our financial condition.

I believe thoroughly and always have believed that it is the bounden duty of this Government to take care, to the fullest extent needed, of all of our disabled former service men. That is our first and most sacred duty. It is paramount to all else. They have the first claim upon us. I believe the Government is doing it measurably well. If it is not doing it to the fullest extent to which it should be done, then it should increase its efforts and do it to the fullest extent possible.

The United States Veterans' Bureau recently reported that there was expended for the care of disabled former service men for the fiscal year ended June 30, 1922, the sum of $481,000,000. That is the amount which was expended for disabled former service men for the fiscal year recently ended. That is more than one and a quarter million dollars per day paid out for the benefit of our former service men during the fiscal year ended June 30, 1922—more than one and a quarter million dollars per day! It was justly paid and I do not know of any loyal American citizen who begrudges one penny of it. It was paid in a glorious cause and under a bounden duty of the most solemn

nature, and which has the sanction, I believe, of every good American citizen.

But that is not going to be the limit of expenditure in that direction. I say confidently that the amount expended for the care of our disabled former service men will increase for many years to come. The annual expenditure will climb and mount with amazing rapidity year by year for many years to come. It is natural and inevitable that it should be so. The disabilities are increasing. Some who are now only partially disabled will in the course of time become totally disabled. When they become totally disabled they should have increased appropriations for their benefit. They should have increased care as their disabilites increase.

It is inevitable that there are thousands and hundreds of thousands of disabled former service men whose condition will grow worse, will increase at a progressive rate from year to year, from now on, so long as they may live; and as fast as it increases it is our solemn duty to keep pace with it and to appropriate all the money necessary. It is inevitable that there are some former service men who are not now suffering any physical disability but who, as time goes on and the seeds of disease which were sown in their bodies during the exposures of the war may grow and increase, will fall under the bane of disability. It is inevitable that some who are not now suffering any apparent disability and who are able to do a full day's work will in time fall under the pall of disability from the frightful exposure which they endured during the World War and the hardships which they endured during that fearful struggle.

That was so as a result of the Civil War. Many a man who is now pensioned as a Civil War veteran was not put upon the pension roll for years and years after the end of that conflict, because the seeds of disease which were sown in his body by his exposure during the conflict did not bear fruit until he attained middle age or old age. Many a man who served in that war attained old age before he reached the condition where he was entitled to a disability pension. So it will be with the survivors of the World War. It is already proving to be so.

Disbursements for the present fiscal year for the care of our disabled former service men it is calculated will be $513,000,000. That is payment of nearly $1,500,000 per day that confronts us during the present fiscal year. I predict that in less than five years we will be paying out for the care of our disabled former service men $2,000,000 a day. It is not unreasonable to expect. It may come much sooner than five years. It may reach that figure in two or three years. It is bound to be reached in a few years, and it is bound to be met. When the time comes we must meet it, we must pay it. It is the greatest obligation under which we can rest, and it must be discharged. We are getting close to that point. We are confronted with the early prospect of having to pay out $2,000,000 a day for our disabled former service men. It will not be long until we reach that point, and it will not end there. The expense will continue to grow year by year. Two million dollars a day will not be the limit, and that expense will continue for at least 70 years yet.

Now, we must take that into account. We must calculate upon that liability in considering legislation which requires the appropriation of billions of dollars. It is claimed by those who have given attention to the subject that in the near future, when the expense of supporting the disabled veterans of the war shall be much greater than it is now, Congress will be compelled to appropriate $1,000,000,000 a year for the purpose of taking care of disabled former service men. That day can not be far distant, and we must take account of it. We should take account of it in considering any legislation proposed for increasing our appropriations.

Let us consider the case of the Civil War veterans. What has been the history of Civil War pension legislation? When the first pension law was enacted, in 1866, I believe, within a year after the close of the Civil War, a very modest sum was sufficient to meet the demands for pensions for Civil War veterans. It appeared to be trifling. It appeared to be insignificant. I believe the first annual pension bill appropriated about $15,000,000, and it was then thought that the annual pension bill would never greatly exceed that sum.

On the contrary, as time passed and the Civil War veterans passed to the great beyond the amount annually appropriated for pensions for veterans of the Civil War steadily mounted and climbed year by year. As the number of veterans became smaller, as their ranks were decimated by death, the amount required annually for appropriation for pensions increased year by year until now the enormous sum of about $215,000,000 is required for our annual pension bill for Civil War veterans. It has grown from $15,000,000 to about $215,000,000 and we are now more than 50 years beyond the close of that war.

It is inevitable that the amount required for the care of our disabled former service men of the great World War must grow and increase and mount year by year in the same way. It is in the nature of things. There can be no escape from it. It is the way of nature. While we are paying more than one and a quarter million dollars per day now, it will not be long until that sum will appear insignificant. We must meet the increase, no matter how much. There is no way to avoid it. All pension appropriations grow. In my opinion the expense of taking care of our disabled former service men of the World War will grow at a more amazing rate even than did the annual pension bills for the survivors of the Civil War. In the Civil War there were enlisted in behalf of the Union cause, I believe, all told about 2,000,000 men. In the great World War we had enlisted 4,000,000 men, double the number. The men who served their country so nobly and valiantly during the World War were nearly all young men, very young men. Those who survived have a long time yet to live in the natural course of events. Mark my word, there will be hundreds of thousands of them who are now showing no disability from that service who, in the years to come, will show very great disability. Many of them who are now able to do a day's work will, years from now, be suffering total disability and will have to be cared for as totally disabled veterans.

That is the condition that faces us. In view of those facts and our bounden obligation of the most solemn nature to take care of our disabled former service men of the World War to the last living day of the last one of them and to the last penny of the resources of this Government, I think we should be careful before we proceed to vote an obligation that will saddle upon the people of the country an additional expenditure of from $4,000,000,000 to $7,000,000,000. In fact, I do not think we should do it. I do not think the proposition is sound; I do not think it is right, reasonable, or just.

This demand for a cash bonus undoubtedly is the result of the activities of an organized minority; that factor in our Government which gives us more concern than anything else. It is the organized minority that makes raids upon the Federal Treasury; that insistently demands legislation of one kind or another; that demands legislation for this class and legislation for that class, and is always demanding something that the great majority of the unorganized populace does not want and of which it does not approve. The organized minority is never idle; it never rests; it works all the time; and in one form or another it is constantly knocking at the doors of Congress. Right now it is knocking at the doors of Congress for a cash bonus for former service men.

I realize that this is a serious question; I realize fully as well as anybody else, I think, the great, unbounded, and undying obligation that we owe to our former service men, who went to the front and saved this country and saved the civilization of the world; I realize the sacrifices they made; I realize what they suffered; I realize what they did for this country, for the cause of righteousness, and for the world; and it is a serious question that confronts us as to what we should do for them, what answer we should give to their demands for this proposed legislation.

It is true that not nearly all of the former service men ask or wish for a cash bonus; a very substantial minority, I am satisfied, is opposed to it. I know many who are opposed to it, and some of them are poor men, working for their daily bread; but I believe the majority of them demand it. Under the circumstances, however, which I have detailed, and under other circumstances which exist, many details of which I have not recited and to which I shall not take the time to refer, I do not believe it is right or just that they should press this burden upon the taxpayers of the country. Even if they do demand it, and believe it is due, which I have no doubt the majority of them demanding it believe, I do not think Congress should yield. Congress has a duty to perform. I believe that for the present, at any rate, Congress should courageously refuse the demand. I do not believe the conditions of the country are such that Congress can do its duty and do otherwise than refuse it.

If we grant the demand in this instance we shall soon pass on to some other demand of some other organized minority. There is no end to organized minorities in this day of organization. As fast as one is satisfied another is organized; another one shows up with some other demand. There is absolutely no limit to organized minorities in this country. As soon as one organized minority gets what it wants and dissolves, another one forms and is knocking at the doors of Congress. Nearly every raid on the Federal Treasury is conducted by an organized minority.

I have been literally astounded to read in the newspapers within recent weeks that the helpless victims of the Knicker-

bocker Theater disaster in Washington are organizing to come to Congress and demand that Congress appropriate money out of the Federal Treasury to compensate them for the sufferings and damage which they sustained in person in that frightful catastrophe or incurred from the death of relatives. It was an awful catastrophe; there is no doubt about that; it was one of those things which shock humanity; it caused the blood to run cold with its horrible features; but why on earth Congress should be asked to appropriate money to compensate the sufferers from that catastrophe is more than I can understand. I can not see why Congress should be called upon to compensate them any more than it should be called upon to compensate the living victims or surviving relatives of dead victims of a railroad disaster or of an explosion in a factory or any other calamity which might occur in any private enterprise. The Knickerbocker Theater was a private enterprise which was conducted by private capital, by private individuals, for private gain; and I can not see, to save my life, how on earth the Government can be held, legally or morally, responsible for any damage that ensued from that disaster. The owners of the building, the contractors who erected it, the architect who planned and supervised its erection, are the parties to whom victims who are living and relatives of dead victims should look for reparation. Let them do as do the victims of railroad and steamboat disasters; as do the victims of street railway collisions; as do the victims of explosions and other industrial disasters. Whoever heard of any of them looking to the Federal Government for reparation. They sue the responsible parties. The Knickerbocker victims, however, plan an organized raid on the Federal Treasury. The Federal Government is considered easy.

The Federal Government is not responsible for any faults or negligence of the contractors who constructed the Knickerbocker Theater building; it is not responsible for any shortcomings or carelessness, criminal or otherwise, of the architect who prepared the plans and supervised the building of the structure; and I can see not one iota of ground why any hapless victim of that disaster should expect the people of the United States—the people of Maine, Montana, and other States—to go down into the Federal Treasury and dig up the money with which to compensate him for his personal injury, damage, and suffering. However, Congress is going to be asked to do it. The victims of that theater disaster are organizing; the newspapers have told us so; they are openly organizing; and so we shall have another organized minority knocking at the doors of Congress for a raid on the Federal Treasury. If the victims of that disaster are compensated by Congress, I shall be ready to throw up my hands and say there is no protection for the taxpayers of this country; that the Federal Treasury is simply open to anybody who chooses to organize and raid it.

Mr. ASHURST. Mr. President, will the Senator yield at that point?

Mr. MYERS. I yield with pleasure to the Senator from Arizona.

Mr. ASHURST. The able Senator has stated that Congress is not to blame for the collapse of the Knickerbocker Theater. I wish the Senator would allow me to interrupt him long enough to say that immediately after the theater collapsed, and as soon as daylight came, I went to that theater and ascertained that it was built in a most shabby, unsafe, and insecure manner; that the iron beams were put into the hollow concrete tile in such a manner that the astonishing thing is that the theater stood as long as it did. I think Congress is to blame when it keeps on its pay roll in this District building inspectors who would approve such a flimsy and dangerous structure.

Moreover, they are now about to rebuild the Knickerbocker Theater on the same site, where the vibration of the cars at the corners of the intersecting streets is almost sufficient to throw down the best-constructed buildings, much less a flimsily constructed building such as the Knickerbocker Theater was.

It seems to me that if Congress and the committees of Congress sit idly by and permit such poorly constructed buildings to be approved, we can not escape some responsibility in the matter. I should like to have the Senator's opinion as to that.

Mr. MYERS. What has Congress to do with the construction of a private structure in this city?

Mr. ASHURST. Congress has absolute and exclusive jurisdiction over the District of Columbia.

Mr. MYERS. To make laws for the people.

Mr. ASHURST. And, in the last analysis, it has control over the building inspectors; it pays the building inspectors now $1,500 or $1,700 a year, and manifestly efficient men can not be procured for such a sum. I insist that we have a responsibility which we can not shift by saying that we do not know anything about it.

Mr. MYERS. Neither Congress nor the Federal Government is or should be held responsible for the neglect of contractors, builders, or architects of privately constructed buildings in the District of Columbia. In the case of a Government building, erected and owned by the Government, it would be different; then there would be a liability.

Mr. ROBINSON. Mr. President, will the Senator from Montana yield?

Mr. MYERS. I yield with pleasure to the Senator from Arkansas.

Mr. ROBINSON. In the District of Columbia Congress exercises all the police powers which the States exercise within their respective jurisdictions. It prescribes the conditions under which buildings may be erected, the manner of construction, and so forth, and requires inspection of the buildings. The laws already in existence contemplate that buildings shall be safely constructed and with due regard to the lives of those who may enter them.

Mr. MYERS. Certainly, that is true; but suppose that I, as a matter of private investment, undertake to erect an office building in this city, employ an architect to draw plans for it and to supervise the erection of the structure and let the contract to the contractors and builders to erect it; if they do not do their duty properly, is the Government in any wise responsible or to blame?

Mr. ROBINSON. If the Government authorities fail to make the inspection and enforce the laws which Congress has passed for the preservation of the safety of the people, there is, at least, some moral obligation upon the government of the District to take some action concerning it to safeguard against danger. I, myself, do not think there is any legal liability.

Mr. MYERS. I am not speaking of legal liability but of moral liability.

Mr. ROBINSON. Certainly, there is no legal liability; but Congress legislates for the District; Congress is the town council for the District; Congress performs the functions which a city council ordinarily performs in the various towns of the United States; and if the Government fails to do its duty and see that buildings are constructed with regard for the safety of those who may enter them, I can not see that there is anything immoral or unjust in Congress giving consideration to some proposal for relief in such cases as the Knickerbocker Theater disaster.

Mr. MYERS. If I undertake to erect an office building in this city, and employ an architect to draw the plans and supervise the structure and a contractor to erect it, and they do not do their duty in a scientific and proper way, and the building falls down——

Mr. ROBINSON. It is the duty of the agencies of the Government, the inspectors of the Government, and other authorities to see that the laws which Congress has passed are carried out. If it be conceded that merely because an individual who may be constructing a building in the District fails to perform his duty there is no obligation upon the officers created by Congress to see that the laws which are passed for the safety of the people are enforced, it is going to a very dangerous extent, I think.

Mr. MYERS. If I undertake to erect a building here in the city and employ an architect to supervise it, does the Government put a Government official on that job to see that my architect complies with safe rules of building? Does the Government undertake to see and should it be held to see that every timber, every joist, every beam, every iron that goes into the building is of the right kind and according to specifications?

Mr. ROBINSON. Yes; although not quite as the Senator states it; but the Government has inspectors whose duty it is to see that the laws of Congress prescribing conditions for the safety of the public shall be complied with, certainly. The Senator is right to the extent that the principles of law are to the effect that a government is not liable for the negligence of its officers.

Mr. MYERS. Congress, I know, makes laws requiring certain things in regard to buildings; that they shall be constructed in some parts of the city of certain material and only of a certain height, and providing safeguards, but——

Mr. ROBINSON. My understanding is that there are inspectors, who are Government officers in the District of Columbia, whose duty it is to see that the building regulations imposed by Congress are carried out.

I do not say that because an inspector fails to do his duty or any other officer fails to do his duty there is any kind of liability on the Government to pay damages to some one who may be injured by reason of the faulty construction of the building; but I do emphasize the fact that where Congress is exercising police powers, where Congress is performing all the functions

which the State authorities usually perform within their respective jurisdictions, we can not with indifference wash our hands of such accidents as the Knickerbocker disaster.

Mr. MYERS. It is my understanding that if a man desires to erect a building in this city he must submit his plans and specifications to the District authorities, and they must conform to the requirements. If they do apparently conform to the requirements, they are approved; but I do not know of any rule or practice or law which causes the Government to keep an inspector constantly on the building to see that the requirements are lived up to, and I do not believe it is done. I have never heard of it. The owners must do that. The Federal Government would have to have a thousand inspectors to do it.

Mr. WADSWORTH. Mr. President, does the Senator recollect any instance where a city or a State has ever appropriated money in such a way as that which is now suggested here in the District in connection with the Knickerbocker disaster?

Mr. MYERS. None whatever. I never heard of such a case before nor of such a demand being made. It would be absurd.

Mr. WADSWORTH. All cities have building codes, of course.

Mr. MYERS. And if such an obligation, moral or otherwise, does not apply to New York City or Chicago or the State of Massachusetts or the State of Ohio, I do not see how the principle could apply to the District of Columbia, for which Congress legislates.

Mr. WADSWORTH. Does the Senator believe that the Federal Government should be held responsible for railroad accidents on trains moving in interstate commerce whose equipment has been inspected by agents of the Interstate Commerce Commission?

Mr. MYERS. No; not at all; and I never have heard of such a suggestion being made. It would be unprecedented.

Mr. WADSWORTH. Does the Senator believe that an accident on a steamboat which is subject to the Steamboat Inspection Service of the Federal Government should ultimately be charged with all its costs to the Federal Government?

Mr. MYERS. I never heard of anybody advocating it. It would be monstrous.

Mr. WADSWORTH. That is where the suggestion leads.

Mr. MYERS. It seems to me the cases cited by the Senator from New York are absolutely analogous. If the Federal Government should compensate victims of the Knickerbocker disaster, it should do so in all the cases mentioned.

Mr. HEFLIN. At the same time, Mr. President, if the Senator will permit me, if the Government inspection service permitted a ship that was not seaworthy to be pressed into service and it caused the loss of a lot of lives, does not the Senator think the Government would be morally responsible in some way for that?

Mr. MYERS. If the Government knowingly permitted to be pressed into service or caused to be pressed into service a vessel that was absolutely unseaworthy, there might be some moral obligation there; but I do not think that illustration is analogous at all. I think the cases mentioned by the Senator from New York [Mr. WADSWORTH] are analogous, and I never heard of such a demand being made on a State or a municipality.

It is something absolutely new to me. The Federal Government, though, is considered easy and there is no accounting for what organized minorities in this country will think of or undertake. They spring many propositions never heard of before. They are constantly doing it, and they are not at the end of their rope yet by any means. In my opinion, in years to come we will hear many reasons given for claims upon the Federal Treasury that we have never heard of before. New methods of raiding the Federal Treasury will yet be devised—new, novel, startling.

I do not, however, put the proposed cash bonus legislation in the same category or class at all with the Knickerbocker disaster. I mentioned the latter only to show to what extent organized minorities will go. The demand for a cash bonus is based upon entirely different grounds. It is based on grounds more appealing and those which come close to the heart of every true American. It arises from the services of men who fought and offered their lives for the preservation of this Government and the civilization of the world. At the same time, however, I do not believe it is right or just to press the demand for a cash bonus and I do not believe Congress would be justified in granting it, because I believe the demand for a cash bonus is based upon a false conception, a false theory.

I do not believe that a man who defends his home against burglars or who helps to put out the fire when his house is afire, or even a resident who responds to a call to put out a village fire, should demand or expect money compensation for it. He did a duty and should not expect money compensation for it. So with a soldier who fights for his country. He is performing a patriotic duty. He should not expect compensation in money for it. It is contrary to all of the principles of a republican form of government and of Anglo-Saxon civilization. It is not in accord with the traditions of our country. It never has been done in this country. We have always dealt justly, liberally, and generously, and rightly so, with the surviving veterans of all the wars in which this country has ever engaged—the Revolutionary War, the War of 1812, the Mexican War, the Civil War, the Spanish-American War—but it remains a fact that there never has been made by this country for the benefit of the survivors of any of those wars a general and universal cash bonus appropriation. It never has been done. I do not believe Congress has ever before been appealed to for anything of the kind, and I do not believe there is any reason why the precedent should now be set.

If we give a cash bonus to our noble boys who responded to the call of their country, and saved their country and saved the world from destruction, we really are not giving them anything. We are taking something away from them. That is what we would be doing if we should enact the proposed pending legislation. We would be taking away from them a crown of glory which they have won and which they are entitled to have undiminished and untarnished and which they are entitled to hand down in its unsullied purity to their descendants for generations to come as a heritage more honorable, more noble, more glorious, and more precious to them than any amount of cash that we could vote to them out of the United States Treasury. I believe we would be actually taking something away from them. We would be dimming and besmirching the glory of their record, which now stands untarnished and unsurpassed by the record of any men who ever responded with the offer of their lives for a noble and a righteous cause. They have earned a crown of glory. They should wear it as the proudest achievement of their lives. They should keep it untarnished, unsullied, undimmed, unbesmirched by moneyed contamination. When they shall die they should pass it on to their descendants as an emblem that time can not dim or tarnish—a free-will heritage. They should so keep it as always to be able to say, "We offered our lives, freely and without cost, to free the world of military brutality—a free-will offering." For these reasons I oppose the pending bill.

Mr. KENDRICK addressed the Senate. After having spoken for some time,

Mr. McCUMBER. Mr. President, will the Senator yield to me to ask unanimous consent that when the Senate closes its session on this calendar day it recess until to-morrow at 11 o'clock?

Mr. KENDRICK. I yield for that purpose.

Mr. WADSWORTH. May I ask the Senator from North Dakota what the program for to-morrow will be in that event?

Mr. McCUMBER. I thought if we should meet at 11 o'clock we could go on with the coal bill for a couple of hours or so and see if we could not get through with it.

Mr. WADSWORTH. Would it not be good policy, if it is necessary to pass the coal bill, to devote the entire day to it to-morrow and get it surely passed?

Mr. McCUMBER. I would not like to agree to that at this time because we may get through soon enough to take half a day on the pending bill, and I do not like to have the Senate without some work on hand.

Mr. WADSWORTH. There is plenty of work on hand.

Mr. UNDERWOOD. What is the Senator's proposal?

Mr. McCUMBER. My request was that the Senate, when it closes its session to-day, shall recess until to-morrow at 11 o'clock, the purpose being to allow an opportunity to get through with the coal bill by 2 o'clock if possible.

Mr. UNDERWOOD. The Senator proposes to lay aside the unfinished business for that purpose?

Mr. McCUMBER. I was willing to do that if we could recess until to-morrow at 11 o'clock. I would not do it unless Senators were willing to agree to that arrangement.

Mr. JONES of New Mexico. Mr. President, I should like to ask the Senator from North Dakota if he would not be willing to have a night session to-night so as to go ahead with the bonus bill and, if possible, get through with it this week?

Mr. McCUMBER. I will say frankly that I would be willing to do so, but I have consulted with quite a number of Senators, especially those who desire to make speeches on the opposite side of the question from where I stand, and they have all assured me that it would be impossible to get a vote upon it to-morrow. So there would be nothing gained by having a night session. It seems to me it would be almost impossible to keep a quorum here to-night anyway. I would like to do it, I will say to the Senator, if I could. That course would be perfectly agreeable to me.

Mr. JONES of New Mexico. I am of course very much interested in the measure, but other arrangements make it necessary for me to leave the city to-morrow.

Mr. McCUMBER. I appreciate the position of the Senator.

Mr. JONES of New Mexico. I regret very much that we shall not be able to reach a final vote upon the measure before I have to go away. I have been very much interested in the passage of the bill and I shall regret very much if I am not permitted to be personally present and cast my vote for it.

Mr. McCUMBER. I was induced to attempt to get an agreement to sit to-night and vote on the bill to-morrow because of the necessity of the Senator to be absent. I did the best I could to see if I could make such an arrangement.

Mr. JONES of New Mexico. I thank the Senator for the effort he made. I know he did make an effort in that respect. If we can not reach a final vote on the measure to-morrow, of course there is no necessity for a session to-night.

Mr. McCUMBER. Mr. President, has my unanimous-consent request been granted?

Mr. MOSES. What is the unanimous-consent request?

Mr. McCUMBER. That when the Senate recess to-day it shall be until 11 o'clock to-morrow morning.

Mr. MOSES. Will the Senator couple with that the stipulation that to-morrow shall be devoted to the coal bill exclusively?

Mr. McCUMBER. I stated that it was the purpose that we should take from two to three hours at least on the coal bill, and if it bids fair to be finished within a very short time thereafter, I shall certainly not call up the unfinished business in place of it, but try to get the coal bill through, if possible. That will give three hours before 2 o'clock, and that is the reason why I asked for a recess, and also that we recess until 11 o'clock.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Dakota?

Mr. MOSES. I would prefer to have a more binding stipulation on the part of the Senator from North Dakota with regard to the proceeding in the Chamber to-morrow, but what he says about it seems to cover the point I had in mind. The chances are that the session to-morrow will be devoted exclusively to the coal bill. Therefore, I shall make no objection to the request.

Mr. McCUMBER. I do not want to say that if we get through with the coal bill in a couple of hours we can not do anything else. I do not want to agree that we shall have nothing else to do but to consider the coal bill to-morrow.

Mr. MOSES. The chances are that when the coal bill is disposed of, if any Senator wants to know whether a quorum is present or whether anything further can be done, it will be found that nothing can be done.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from North Dakota? The Chair hears none, and it is so ordered.

Mr. SMOOT. I offer an amendment to the pending so-called bonus bill, the purpose of which is to provide by a sales tax the money with which to pay the amount required by the bonus.

I also offer another amendment in the nature of a substitute for the bill. Briefly, I will say that it is a straight 20-year insurance plan. Coupled with it is a sales tax imposing a tax of one-quarter of 1 per cent upon manufactures along the same line that I had in mind when I offered the manufacturers' sales tax amendment to the revenue bill.

I ask that both amendments be printed and lie on the table.

The PRESIDING OFFICER. The amendments will be printed and lie on the table.

Mr. KENDRICK resumed and concluded his speech, which appears entire below.

NAVAL OIL RESERVES.

Mr. KENDRICK. Mr. President, within the last two or three weeks a detachment of United States marines marched into the Teapot oil field in central Wyoming and unceremoniously ejected a drilling crew engaged in drilling an oil well upon a tract of land claimed under the mining law. This action, taken at the direction of the President, over the vigorous protest of the governor of the State that the Federal and State courts were functioning as usual, and that it was inexcusable to substitute armed force for the orderly process of the injunctive writ, has again directed attention to the disposition of naval reserve No. 3, known as the Teapot Dome, under a lease secretly executed by the Secretary of the Interior and the Secretary of the Navy on April 7, 1922.

Prior to this date telegrams from people in my State had directed my attention to the rumors that such a lease was being negotiated. By coincidence, the very day the lease was signed a message was received from one of my constituents interested in the oil business requesting me to ascertain whether or not the Secretary would consider proposals for leases in the Teapot Dome field. I had inquiry made at the office of the Secretary, but, instead of receiving direct information, was furnished a copy of a press statement issued the preceding day. In this press statement it was said that a policy was being rapidly developed, but that—

> As yet no definite contracts have been made along these or any other lines * * * affecting the Teapot Dome.

This press statement was furnished me as representing the status of the matter on that day, and assurance was given that if any Wyoming oil operators desired to make a proposal the Secretary would be glad to entertain it.

All this occurred on April 7, and on that very day the Secretary executed a lease, not for the protection of the reserve but for the rapid exploitation and exhaustion of the entire field, and donated this lease to the Mammoth Oil Co., organized for that purpose by Harry F. Sinclair. Of course, I have no direct information as to whether the lease had already been signed when I made my inquiry or whether it was signed immediately after my inquiry disclosed the fact that Wyoming oil operators were not only interested but were anxious to submit bids for a lease on the structure.

Despite my request that I be kept informed of developments, I heard nothing further from the Secretary's office until April 13, when I received a copy of another press statement, issued, as it said:

> In response to constant requests for information concerning rumors or statements as to the disposition of Navy reserve oil lands.

In this statement the regular bureaus and officers of the Interior Department disclaimed any knowledge of the matter which, it was said, was being handled personally by the two Secretaries. The two Secretaries did not see fit to let the public into the secret and made no answer to the growing tide of demands for information, which, of course, was given added strength by the very peculiar statement issued by the department. This was the statement authorized by those who knew that the lease had been consumated a week earlier.

INTRODUCTION OF BILL FOR PAYMENT OF ROYALTY TO STATE.

It was so apparent, however, that some deal was on that I felt impelled, as a representative of the people of Wyoming, to take such protective steps in their interests as the situation warranted. Legislation heretofore enacted dealing with this naval reserve made no provision whereby the State would profit by the exploitation of this oil field, a natural resource worth millions of dollars. Aware of this situation, but without any information as to the Secretary's intention to guide me, I introduced on April 13 a bill providing for the payment to the State of a royalty of 5 per cent of all gas and oil recovered under any form of development contract which might be made.

OFFERED RESOLUTION CALLING UPON SECRETARY FOR INFORMATION CONCERNING LEASE.

Two days passed without an authorized statement concerning the transaction being given out by the Secretary. In the meantime the stream of telegrams from Wyoming oil operators and associations asking for information concerning the matter continued to pour into my office, which led me to offer on April 15 a resolution calling upon the Secretary of the Interior and the Secretary of the Navy for definite information as to whether or not negotiations were pending. This resolution was unanimously adopted. However, the Secretary failed to respond directly to the Senate's request for information, but on April 18 gave to the press a statement announcing that the lease had been made. Three days later the Assistant Secretary replied to the Senate resolution by transmitting, in substance, the same information contained in the press statement.

RESOLUTION ADOPTED DIRECTING SENATE INVESTIGATION.

The incomplete and unsatisfactory way in which the Senate resolution was answered suggested both a disregard for the unanimous request of this body and also an unwillingness on the part of the Secretary to acquaint the country with the facts concerning this contract and the negotiations leading up to it. Accordingly the Senator from Wisconsin [Mr. LA FOLLETTE] offered another resolution directing a Senate investigation of the leasing of the naval reserves, which was likewise unanimously adopted. In response to this resolution the Secretary adopted different tactics than those theretofore employed. In this instance the committee was deluged with a truck load of documents, which, it is fair to assume, will never be examined. At the same time he made a lengthy report to the President, which was sent to the Senate with a letter of transmittal approving the transaction. This report is contained in Senate Document No. 210.

I have studied the Secretary's report long and carefully. The secrecy surrounding the lease, the refusal of an opportunity to the oil world to make proposals, all these mistakes in the matter of handling the lease were past and gone. Therefore the subject of real concern to me was whether the disposition of this great oil field had been prudently handled. I sought the answer to this question in that report. I also appealed to geologists and to others experienced in the oil business for information, because that is a business in which I have never had the slightest experience, as I have never had any kind of interest in an oil property.

LEASE NOT JUSTIFIED BY PUBLIC NECESSITY.

As a result of that study I now say that the lease of the Teapot field was a shameful and unnecessary destruction of the final reserve of the Navy; that the terms were not only improvident but were viciously and criminally wasteful; that it does not, as it is claimed, promote any real competition, but on the contrary strengthens and makes more enduring the monopolistic control of the oil industry. The lease can not be justified on the theory advanced as to drainage from the operation of wells located outside the boundaries of the structure. It can not be justified at a time when there is a vast overproduction of oil, because it was set aside for use at a time when the availability of an adequate quantity of oil might be vital to the life of the Navy and the welfare of the Nation. The provisions of the lease forever prevented the State of Wyoming from realizing the great benefit from the refining within its borders of this great natural resource of the State.

GEOLOGICAL CONDITIONS EXPLAINED.

Mr. President, I want to say a word about geological conditions in the Salt Creek and Teapot fields. Oil fields in Wyoming are found in what are called domes, which are geological formations somewhat similar in shape to an inverted saucer. The Salt Creek field and Teapot field are generally conceded to be entirely separate domes, with a low point between them which is called a saddle. These fields are not unlike the shape of two eggs joined together at the smaller ends, the Teapot joining Salt Creek on the south. Both fields were originally included in one petroleum reserve, and later the Teapot field was designated as a naval reserve, and the line between the two reserves was placed at the point where they were believed to be separated by natural conditions.

Recent developments in Salt Creek have convinced geologists, including those who made the original survey, that this dividing line is about a mile south of the location originally marked by them, and accordingly it is now believed by Government authorities that the naval reserve is larger than the actual oil structure which it was proposed it should include; therefore it overlaps and covers a part of the oil-bearing land at the extreme south end of the Salt Creek field. This is an important fact, because it involves the question of drainage, to which I shall refer later on.

SALT CREEK FIELD GREATEST HIGH-GRADE FIELD OF SIZE ON FACE OF EARTH.

Salt Creek has now been fully proved by the drilling of several hundred wells, and has a production of oil which will reach 180,000 barrels per day by the first day of September. Thus it is now definitely recognized as the greatest high-grade oil field of its size on the face of the earth. It includes within its borders, as a conservative estimate, from eighteen to twenty thousand acres, which land is underlaid by at least three and possibly four highly productive oil sands of great thickness.

ESTIMATE OF POTENTIAL PRODUCTION OF SALT CREEK AND TEAPOT FIELDS.

Here, Mr. President, I want to quote some figures which will show what this controversy is all about. Conservative estimates made some time ago by Government experts show the total production of recoverable oil from Salt Creek would likely reach a half a billion barrels, but as development of this structure proceeds the estimate of recoverable oil has been from time to time increased until now it is confidently believed it will equal if it does not exceed a billion barrels.

As stated before, naval reserve No. 3, known as Teapot Dome, lies just to the south of Salt Creek, and includes 9,000 acres, and while it has not yet been developed it is known to include not only the sands found in Salt Creek but at least one additional sand higher up, which as a result of erosion is not found in the Salt Creek structure. Aside from the additional sand, known as the Shannon sand, virtually the same geological conditions exist in Teapot Dome as exist in the proved field of Salt Creek, and on this basis it is possible to arrive at an estimate which will give some idea of the enormous treasure involved in this lease. A. W. Ambrose, Chief of the Petroleum Division of the Bureau of Mines, without regard to the Shannon sand or the Lakota sand, estimates the possible potential production of the structure at 135,000,000 barrels, but this estimate may be regarded as highly conservative. Oil men of my State who have made a careful study of the available data on the Teapot structure estimate the possible production of this naval reserve at 420,000,000. While, of course, it must be understood that in the absence of actual production on an extensive scale, any estimate is largely conjecture, nevertheless the figures I have given to the Senate indicate that we are dealing with a natural resource of almost incalculable value. In any event, the oil world believes it to be a great reservoir of oil and the Secretary has dealt with it on that assumption. Mr. Sinclair took his lease in that belief. That he has not lost faith, even to a slight extent, since the lease was executed may be assumed from the following newspaper clipping, entitled:

HUGE OIL FIRM FORMED.

CHEYENNE, WYO., August 19.—Incorporation papers were filed with the Secretary of State here to-day by the Mammoth Oil Co. of Delaware, capitalized at $200,500,000 and organized by the Sinclair oil interests to develop the Teapot Dome naval reserve, under the contract secured from the Federal Government.

This is the capitalization of the Mammoth Oil Co. in Wyoming, which company a few months ago incorporated under the laws of Delaware with a capital stock of 1,000,000 shares without nominal or par value.

TEAPOT OIL RESERVE NOT IN DANGER OF DRAINAGE.

Mr. President, I now want to present to the Senate, briefly but with sufficient detail to make entirely clear, this question of drainage. The reason assigned for this, as it appears to me, untimely development of naval reserve No. 3 is the danger of its being drained of its oil by operations in adjoining fields. If such danger actually exists at the present, or may exist in the near future, adequate steps to prevent it should be taken and could be taken without unusual expense or difficulty. But of all the myths and fables constructed by the Secretary in defense of this transaction, none has less real substance than this nightmare of drainage.

Teapot Dome is one of the three petroleum withdrawals set apart for the benefit of the Navy as a dependable source of supply when domestic oil production has declined. The other two naval reserves are in California, and final disposition of those have also been made, as disclosed in the Secretary's report. Unfortunately, a number of tracts within each of the California reserves are owned by private operators who have diligently developed them and are rapidly exhausting the oil, and there is no reason to doubt the statement of the Secretary of the Interior that it was impossible to protect the drainage of the naval lands in these reserves and that it was essential to arrange for the development of them in order to protect the interests of the Government. But no such condition prevails in connection with naval reserve No. 3. Every foot of land along the northern boundary of the reserve which offers opportunity for drainage, if, in fact, any exists, belongs to the United States Government, except 360 acres on the extreme edge of the structure, which belongs to the school children of the State of Wyoming. The Government has had no difficulty whatever in preventing any drilling on this reserve during the past six years, just as it would have had no difficulty in preventing drilling of wells for the next 60 years to come. Here was a great oil field controlled by the Government, no private interests within its borders and none operating on privately owned lands adjacent to it, despite the impression to the contrary conveyed by the press dispatches, which carried the first authorized statement of the Secretary concerning the details of this lease. It was the only oil structure in the country which could have been preserved intact for an indefinite length of time.

I have stated before that the naval reserve joins at the northern end with the Salt Creek field. The boundary of the two structures is in contact not to exceed a mile and a half if a straight line were followed, and a somewhat greater distance if followed by the zigzag course of the legal subdivisions of the land which the exact line takes. It is along this line where the two fields meet, that the possibility of drainage exists, if, in fact, any does exist. When it is considered that the naval reserve is 6 miles long and has a circumference of probably 15 or 16 miles, it will be appreciated what an infinitesimal part of the entire area could be drained from wells drilled along this short line of contact.

NO PRIVATE LANDS NEAR NAVAL RESERVE.

A stranger, reading the report of the Secretary, would undoubtedly get the impression that the drainage of Teapot, to the extent such drainage may occur, will be due to the operation of independent producers upon privately owned lands and that the loss of Teapot oil will, therefore, be a net loss to the Government. As a matter of fact, there is not a single tract of privately owned land within several miles of the Teapot

field: and with a single unimportant exception, every foot of land in the Salt Creek field, which lies within 2½ miles of the Teapot reserve, is owned by the Federal Government itself. The single exception is part of a school section to which I have referred, owned by the school children of the State of Wyoming, which contains 200 acres of land in the extreme south end of the Salt Creek reserve and 160 acres in the extreme north end of the Teapot reserve; a total of 360 acres within the reserve of which but a small part has been proved productive, for although operations have been carried forward diligently by the lessee of this land for four years only four small wells have been drilled, with a combined production in June, 1922, of 182 barrels per day; and this is the total drainage, present or prospective, of the Teapot field, from wells upon land not owned by the Government. All the remainder of the oil-producing territory which lies within several miles of the Teapot reserve is Government land.

I have pointed out before that the boundary line of the naval reserve and Salt Creek was until recently assumed to likewise mark a natural dividing line between the two structures. Assuming, however, that the more detailed information of recent months has correctly placed this dividing line approximately a mile south of where it was originally thought to be, then that part of the reserve that lies north of this dividing line is not a part of the Teapot structure but a part of the Salt Creek structure, and might be subject to some drainage. However, it would be to a negligible extent.

It is generally agreed that a well will not draw oil from a greater area than 10 acres, so that if a line of wells were drilled along the entire distance between the naval reserve and Salt Creek it could not possibly draw oil from more than two or three hundred acres out of a total of 9,000 acres.

FEW OFFSET WELLS WOULD HAVE AFFORDED COMPLETE PROTECTION.

The protective method required by the leasing act, and the general practice in all oil fields, is the drilling of offset wells when it is considered necessary to prevent the depletion of oil from property as a result of drilling on adjoining land. A line of offset wells along the northern end of the Teapot reserve would have afforded adequate protection against any possible loss of oil.

Mr. President, I again remind the Senators that the wells that it is now claimed threaten the Teapot reserve with drainage are located on Government land that was leased in June, 1921, not by a former Secretary, but by the present Secretary, so that if there is actually any danger of drainage, he himself is responsible for creating it.

GOVERNMENT GETS HIGHER ROYALTIES ON BORDER WELLS THAN UNDER TEAPOT LEASE.

Finally, let it be granted that the theory of drainage is correct, still the terms of this contract would not be justified, because the Government is getting a higher royalty on these border wells in Salt Creek than it will ever get under the most favorable conditions under the Teapot lease. The Secretary expresses alarm about the danger from drainage from the Fensland well on section 20, about half a mile from the naval reserve. Let us use this well as an illustration. The Senators will be interested in knowing that the Government gets 33⅓ per cent on all the oil produced from this well and also received a bonus of $51,000 for the 160 acres on which it is located. I shall show conclusively that under this contract it is inconceivable that the royalty will ever reach the rates paid to the Government by the owners of these border wells. There are no wells being operated along the border that pay less than 25 per cent royalty on all the oil produced.

Surely this fact that the Government would receive a larger return from the Teapot oil if the threatened drainage actually does occur than it will get from the same oil if it is produced under this improvident lease which the Secretary says he was forced to make in order to prevent drainage, completes the proof of the utter folly of this entire transaction.

But let me leave this discussion of drainage with the final observation that the departmental excuse that Teapot was in danger of drainage has been met with such a howl of derision from the oil operators of Wyoming that the soft pedal has been placed on that argument out there, and show how improvident are the terms of this remarkable transaction.

ANALYSIS OF ROYALTIES PROVIDED BY CONTRACT.

Mr. President, a great deal of emphasis has been placed upon high royalties that this contract provides, but, as I stated a moment ago, the royalty derived from the wells which the Secretary has been so fearful were draining oil from the Teapot field is higher than the royalties in the Sinclair contract will ever average, and I shall now show that they are not high enough to justify this lease and will not average as high as any of the leases in the Salt Creek field made under the terms of the leasing act.

I want to say at this point to those Senators who do me the honor to listen that this involves something of figures and of course it is something of a prosy statement, but it is impossible to make it any more brief and still make it clear or so that it is understandable. Therefore I have attempted to show it in such detail as was necessary to give a clear idea of the situation.

There are two fundamentals in connection with this Sinclair lease that I want the Senate to keep clearly in mind in following the analysis of these rates which I shall now present.

First, that the rates are not based on the individual production of the wells, but on the average of all the wells in the entire field, which is found by dividing the total monthly production by the number of wells in the field. Secondly, a higher rate of royalty prevails on oil testing 34° Baumé than below that figure. Under the provisions of the contract both of these factors are capable of manipulation to the advantage of the lessee, as I shall show in the most conclusive manner.

ROYALTIES ON GRADUATED SCALE.

Royalties are on a graduated scale so that under no circumstances would the average royalty ever reach 50 per cent, which is the highest rates fixed in the contract. It is pertinent to an understanding of the royalty question to examine the schedule of rate, and I am asking, therefore, to have them printed in tabular form without reading them.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

Schedule of graduated royalty.

ROYALTIES BASED ON AVERAGE MONTHLY PRODUCTION PER WELL ABOVE 34° BAUMÉ.[1]

Portion between barrels—	Equals (barrels).	Rate (per cent).	Royalty (barrels).
0 and 50	50	12½	6.25
50 and 100	50	16⅔	8.33
100 and 200	100	20	20
200 and 300	100	25	25
300 and 400	100	30	30
400 and 500	100	35	35
500 and 600	100	40	40
600 and 800	200	42½	85
800 and 1,000	200	45	90
1,000 and up		50	

ROYALTIES BASED ON AVERAGE MONTHLY PRODUCTION PER WELL BELOW 34° BAUMÉ.[1]

0 and 20	20	12½	2.50
20 and 50	30	14⅓	4.28
50 and 100	50	16⅔	8.33
100 and 200	100	20	20
200 and 300	100	25	25
300 and 400	100	25	25
400 and 500	100	25	25
500 and 600	100	25	25
600 and 800	200	25	50
800 and 1,000	200	25	50

[1] The total number of royalty barrels on a thousand-barrel average well basis would be 339 barrels on oil testing 34° Baumé or over. On a thousand-barrel average well testing below 34° Baumé the total would be 235 barrels. The number of barrels of royalty oil testing below 34° Baumé would be further reduced by the clause of the contract which provides for an exchange basis of 63 barrels of fuel oil for 100 barrels of Teapot oil, whereas the exchange basis is 100 barrels of fuel oil for 100 barrels of Teapot oil when it tests above 34° Baumé. Instead of receiving 235 barrels of royalty oil, the Government on this exchange basis would receive only 63/100 of 235 barrels, or 148 barrels on a thousand-barrel average

AVERAGE ROYALTY ON BASIS OF 1,000-BARREL WELL ONLY 33.9 PER CENT.

Mr. KENDRICK. An examination of this table will show that under this graduated system of royalties the average royalty on a thousand-barrel well of oil, 34° B. or over, would be 33.9 per cent, or 339 barrels; on a 500-barrel well the average would be 24.8 per cent, or 124 barrels; on a 200-barrel well, the average would be 17.29 per cent, or 35.5 barrels; on a 100-barrel well, 14.5 per cent, or 14.5 barrels; and on a 50-barrel well will be 12½ per cent, or 6.25 barrels.

Let us now consider the royalty on oil testing below 34° B. On the graduated scale the average royalty on a 200-barrel well average for the field would be 17.5 per cent, or 35 barrels; and on a 100-barrel average 15 per cent, or 15 barrels. But the contract provides that the lessee may exchange fuel oil on a basis of barrel for barrel of Teapot oil testing above 34° B., while the exchange basis on oil testing below 34° is 63 barrels of fuel oil for 100 barrels of Teapot oil, which means that the royalty on an average production of 100 barrels per well instead of being 15 per cent would be only sixty-three one-hundredths of 15 per cent, or 9.45 per cent.

AVERAGE SALT CREEK ROYALTIES 20 PER CENT HIGHER THAN TEAPOT CONTRACT.

A comparison of the royalty schedule donated to Mr. Sinclair with that prescribed for the bulk of Salt Creek operators shows that the latter are getting much the worst of it, because their royalties are materially higher at the small production figures. When the average production is as high as 200 barrels per day, which is exceptionally high for any field, the Salt Creek producer pays the Government a royalty which is more than 20 per cent in excess of the royalty Mr. Sinclair would pay; and the Sinclair royalty schedule would not overtake the Salt Creek royalty schedule until the average production rate exceeded 400 barrels per day, which is more than twice the average production of the wells in the entire Salt Creek field at this time when it is still in the flush stage.

PRODUCTION SUBJECT TO MANIPULATION TO HOLD DOWN ROYALTIES.

Mr. President, I shall point out now just how the lessee can manipulate the average production in the Teapot field in order to keep the royalty always at a low average. There are two ways at least under this contract by which the average production of the wells can be held down, thus enabling the lessee to get the rates in the low brackets of the royalty schedule. Overproduction can be developed which will furnish an excuse for "shutting in" the wells, thus reducing the natural flow. If the lease had provided that in case of overproduction that certain wells should be shut down absolutely, thus saving the gas pressure and not affecting the normal rate per well production, the Government would have been protected against this opportunity for arbitrary rate manipulation.

Mr. STERLING. Mr. President, just what is meant by "overproduction" in the sense in which the Senator used the term?

Mr. KENDRICK. In this neighboring field there is now, as I shall show later, a production that will reach 180,000 barrels by the 1st of the next month, it is estimated. It is now perhaps 150,000 to 160,000 barrels.

Mr. JONES of New Mexico. Per day?

Mr. KENDRICK. Per day. Of that amount there is an outlet for only 30 per cent of the oil provided by the local refineries or markets.

Mr. STERLING. Then it is governed by the capacity of the refinery.

Mr. KENDRICK. Not necessarily that. Other refineries could be built or the present ones could be extended. It is governed by the manufacturing processes and the market facilities, the opportunity to sell. They can at this time only dispose of, and will only buy from the independent operators, from 30 to 40 per cent of the present production.

Mr. STERLING. Is that described in the lease so that those various elements which would go to constitute overproduction appear in the contract itself?

Mr. KENDRICK. There is nothing that I recall in the lease that would prevent the manipulation as pointed out here.

The second and more radical way in which the royalties may be held down is by manipulating the average of the wells. The Shannon sand will produce about 10 barrels per day per well, and in the Salt Creek field the First Wall Creek sand produces about 175 barrels, and the Second Wall Creek sand 253 barrels. Assuming that the same condition prevails in the Teapot structure, it will be seen that all the lessee will have to do to bring the average production down to a low figure will be to drill several of these wells in the Shannon sand for each one drilled into the other sands.

These shallow wells would be highly profitable also. Oil was discovered in the Shannon sand on the crest of the Teapot Dome at only 335 feet, and can be reached on any part of the structure from 600 to 900 feet. Therefore, wells drilled into this sand will cost between $2,500 and $5,000, and will pay for themselves at least twice a year for many years to come.

BAUMÉ SPLITTING POINT HIGHER IN SINCLAIR CONTRACT THAN UNDER LEASING ACT.

As I have pointed out, there is a different schedule of rates on oil testing 34° Baumé and over than is in effect on oil testing below that degree. In the leases under the preferential clause of the leasing act the splitting point for the different schedule royalties is 30° Baumé. Mr. President, I do not have any information concerning the reason why this splitting point was raised in the contract given to Mr. Sinclair, but it suggests still another way in which royalties can be manipulated to the lessee's advantage. Oil from the Shannon sand has a Baumé gravity of 24°; First and Second Wall Creek sands, 35° to 36°; and Lakota sand, 31°. Raising the Baumé splitting point enables the lessee to get a rate on the Lakota sand that will never go above 25 per cent, and an exchange basis of 63 barrels of fuel oil for 100 barrels of the high-grade oils from the Teapot structure.

The effect of raising the Baumé splitting point is best shown by a brief table which I ask to have inserted in the RECORD at this point.

The PRESIDING OFFICER. Without objection, the table will be printed in the RECORD.

The table referred to is as follows:

Comparison of two 500-barrel wells, one in Wall Creek sand, the other in Lakota sand.[1]

	Average production.	Degrees Baumé.	Average royalty.	Royalty.	Exchange rate of 63 fuel to 100 Teapot oil.
	Barrels.		*Per cent.*	*Barrels.*	*Barrels.*
First Wall Creek sand	500	36	24.9	124	
Lakota sand	500	31	22	+110	69

[1] By mixing two oils the Baumé average would be reduced to 33.5 per cent, thus reducing royalty on both wells to 22 per cent, cutting down Government royalty 14 barrels and making effective exchange basis of 63 barrels fuel oil for 100 barrels Teapot oil, so that actually the Government would receive only 138 barrels instead of 248 barrels if 30° Baumé, which is the splitting point provided in leases under the leasing act, had been retained in the Sinclair contract.

GOVERNMENT LOST MILLIONS IN BONUSES BY AWARDING LEASE ON NONCOMPETITIVE BASIS.

Mr. KENDRICK. Mr. President, I have discussed only the question of royalties. I have mentioned the subject of bonuses only incidentally. I now want to call the attention of the Senate to the millions of dollars which the Government threw away by the noncompetitive, secret way in which this lease was awarded. Ever since I can remember it has been contrary to public policy, if not to law, to sell even a condemned mule on one of our western military reserves without public notice and by competitive bidding; but in this case, with no emergency existing, and contrary to the long-established policy of the Government, we find the Secretary of the Interior, with the Secretary of the Navy concurring, and with the approval of the President, entering into a lease in secret, which if placed on the market at public auction would have brought millions of dollars beyond a question of doubt.

I base this conclusion on the history of such sales. I have already referred to the 160-acre tract upon which the Fensland well is located, which sold in June, 1921, for a bonus of $51,000 and a royalty of 33⅓ per cent, not on a graduated basis but a straight royalty of that amount for every barrel of oil produced. At this same sale 4,155 acres lying within the 2,600-foot contour line, and therefore assumed to be productive in the Second Wall Creek sand only, sold for a bonus of $1,686,100, or an average of $405.80 per acre, and straight royalties of 25 per cent for tracts regarded as least desirable, and 33⅓ per cent for the better tracts.

The bonus paid for one of these tracts was $1,412.50 per acre.

EIGHT THOUSAND ACRES BRING MORE THAN TEN MILLIONS IN BONUSES.

Now, let us consider the character of the land which brought this bonus and royalty. This land all lies on the outer edge of the structure in the Salt Creek field. The Shannon sand found in the Teapot structure, because of the higher elevation in the Salt Creek field, has eroded away. The First Wall Creek sand had been drilled and found to contain water. Therefore the bidders at this sale were virtually bidding on land containing only one oil sand; that is, on the possibilities of oil in the Second Wall Creek sand, and this at a time when oil was selling at 50 cents per barrel. What would they have paid for the Teapot Dome with its three, possibly four, oil-producing sands at a time when oil was selling at $1.40 a barrel? The answer is suggested by the fact that on June 28, 1922, 8,335 acres belonging to the Osage Indians sold at public auction at Pawhuska, Okla., for $10,430,000 bonus. There is every reason to believe the Government threw away from $15,000,000 to $20,000,000 in leasing the Wyoming naval reserve in the manner it did. Five per cent of this amount in a royalty to the State, as provided by my bill, would have amounted to at least several hundred thousand dollars if not a million dollars to the school children of Wyoming.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield to me for a moment?

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Massachusetts?

Mr. KENDRICK. I yield.

Mr. WALSH of Massachusetts. The Senator is making a very serious accusation against some public officials and he seems to be possessed of the facts to confirm his criticism. I should like to ask him if he can indicate the purpose and mo-

tives of the Secretary of the Interior and the Secretary of the Navy in entering into this secret lease?

Mr. KENDRICK. Mr. President, for an answer to the question he has just asked me I shall have to refer the Senator from Massachusetts to the report made by the Secretary of the Interior to the Senate in response to the resolution offered by the Senator from Wisconsin [Mr. LA FOLLETTE].

Mr. WALSH of Massachusetts. In other words the Senator thinks the information is there available for one to draw his own deductions?

Mr. KENDRICK. Exactly.

CONTRACT LET IN FACE OF GREAT OVERPRODUCTION.

Mr. President, it is my purpose here to refer to the absence of any necessity of development, but on the contrary there exists a condition of overproduction that made it unwise from an economic standpoint to proceed with the exploitation of this field at the present time. Against the day of greatest need the Navy Department, through all of the administrations from 1909 down to this time, has resolutely preserved the Teapot field. That final reserve, which for security and certainty never has and never will be duplicated, has now been subjected to a development contract, not designed to protect the field from drainage but to force its early and rapid drilling and exhaustion; and this at a time when America is producing oil at the highest rate in history, when overproduction has forced field prices for oil to a point so low that the producers are crying in despair, and when fuel oil on each coast is plentiful at prices far below those of recent years.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from South Dakota?

Mr. KENDRICK. I yield, although I should prefer to go on and conclude my remarks.

Mr. STERLING. I merely desire to ask the Senator one question. The Senator refers to the Navy Department. I wish to ask if it has not been stated that the Navy Department and the Interior Department agreed together upon the leasing of the Teapot Dome field?

Mr. KENDRICK. Mr. President, I will say that, as I understand, the report made to the Senate indicated that they were equally responsible for the lease.

Mr. STERLING. I was led to ask the question by the statement of the Senator that down to the present day the Navy Department had insisted on conserving this field.

Mr. KENDRICK. Yes; down to the time this lease was made.

Mr. POMERENE. Mr. President, may I ask just one question?

Mr. KENDRICK. I yield.

Mr. POMERENE. For how long a period had negotiations been pending for this lease?

Mr. KENDRICK. I have no information on that point except what is found in the report to which I have referred. That is the only authorized information we have. The Secretary tells us there how the question was first brought to his attention, and that is all the information obtainable, as far as I know.

Mr. WALSH of Massachusetts. Was this lease negotiated and concluded in secret and kept a secret until the resolution the Senator offered was replied to by the Secretary of the Interior?

Mr. KENDRICK. If the Senator had heard my opening remarks——

Mr. WALSH of Massachusetts. I regret that I was not here to hear them.

Mr. KENDRICK. He would have heard the story of the proceedings. There were rumors—the air, I might say, was full of rumors about the lease—and telegrams came from my State asking for information; but the information obtainable did not seem to give us any real facts, and so my first resolution was directed to ascertain whether the lease had been made.

Mr. WALSH of Massachusetts. How long had it been made prior to the resolution of the Senator from Wyoming?

Mr. KENDRICK. As I recall, the lease was made the day that I first made inquiry, and a press report went out that day to the effect that no lease had been made.

Mr. WALSH of Massachusetts. And neither the junior Senator from Wyoming nor his colleague knew anything about the negotiations or the making of the lease until after it was consummated?

Mr. KENDRICK. I can only speak for myself, and I did not have any information.

Now, if Senators will allow me to proceed—for it is a tedious story in any event, because of its details—I will be just as brief as I can. I hope that Senators will give me their attention, because, after all, it is a matter of real importance.

Year by year the production of crude oil in this country has increased. In 1911 it amounted to 220,000,000 barrels and in 1921 it had increased to 469,000,000 barrels, while for the past few months it has averaged 1,500,000 barrels per day, or at the rate of 540,000,000 barrels per year. There has never been as much overground oil storage in the hands of producers as at present, and the quantity of fuel oil in the hands of American refiners on February 1 this year has been exceeded only once since the Bureau of Mines began publishing refinery statistics in 1917. On January 31, 1921, domestic stocks, including oil in the pipe lines, totaled 130,321,000 barrels; on January 31, 1922, 196,228,000 barrels; on June 30, 1922, the reserve stock had mounted to 254,901,000 barrels. Daily production mounted from 1,224,484 barrels for the month of January, 1921, to 1,391,645 barrels daily for January, 1922, and 1,508,233 barrels daily for the month of June.

OVERPRODUCTION IN SALT CREEK FIELD ACUTE.

Overproduction in the Salt Creek field is particularly acute. The present demonstrated available production by "natural well tests" show that Salt Creek can give up 120,000 barrels of crude oil daily from existing wells.

I want to say here to Senators that this oil flows over the top of the ground year after year. It is not necessary to pump it. The gas pressure takes it out over the top of the ground; and some of the wells in that structure have been flowing from 1,000 to 2,000 barrels a day for the last six or seven or eight years. The wells are "shut in" so as to run 30 per cent of what they produce if allowed to run naturally. Notwithstanding this fact, it is reported at the present time that there are more than 100 wells in the process of drilling in the main Salt Creek field. Oil men estimate that at the present rate of development at least 200,000 barrels daily will be available by the end of 1922. This is the situation in the face of overproduction in this field so great that the market will only take from 30 to 40 per cent of the present production.

RESERVES REMAINING IN GROUND RAPIDLY BEING DEPLETED.

Unfortunately, the tremendous production of oil does not indicate an unending supply. On the contrary, it means that the supply of crude oil established in this country by nature is being exhausted with ruthless rapidity. Joseph E. Pogue, a leading authority in the petroleum industry, in his book, The Economics of Petroleum, after presenting estimates which indicate that the original supply of crude petroleum was between 10 and 11.3 billion barrels, says:

> Up to January 1, 1921, the United States has produced 5.4 billion barrels of petroleum. Subtracting this quantity from the original supply of 11.3 billions, we have left as a working reserve 5.9 billion barrels, with an annual consumption requirement running well above the half-billion mark.

DEPLETION OF DOMESTIC RESERVE WILL MAKE NAVY DEPENDENT ON FOREIGN SUPPLY.

Thoughtful men of the industry have repeatedly sounded warnings of the near approach of the day when new fields will no longer be found, and the rapid decline in the production of oil from the old fields will bring the country face to face with a permanent and increasing shortage of that fuel upon which such a large part of our national life is now based. When that day comes American industry must depend largely upon the importation of oil from other nations which have been less careless with this limited gift of nature, and American industry must, of course, pay the tax which the importation of that foreign oil levies upon it. But the Navy itself, increasingly dependent upon fuel oil as more oil burners are constructed for the fleet, will find its greatest pinch not in paying a high price for fuel but in an inability to get fuel when war closes the ocean routes.

Mr. FLETCHER. Mr. President, I should like to suggest to the Senator also that merchant ships are operated largely with oil fuel in these days.

Mr. KENDRICK. Yes; and I assume, without knowing much about it, that they would be almost as necessary an arm of the Government in time of war as the fighting ships.

Mr. FLETCHER. Precisely.

LEASE STRENGTHENS MONOPOLISTIC CONTROL OF OIL INDUSTRY.

Mr. KENDRICK. Mr. President, I invite the Senate's attention to the third paragraph of this contract, which recites one of the chief advantages which the Government is presumed to derive from this lease. It reads as follows:

> Whereas the Government is desirous of creating a competitive market and securing the best prices obtainable for royalty oil received and to be received by the Government of the United States from the public domain in the Salt Creek field of Wyoming.

Just how this competitive market is to be created by the granting of this lease is hard to understand, in view of the close connection between the Sinclair Co. and the Standard of Indiana, which admittedly controls 90 per cent of the stock

of the Midwest Refining Co., which in turn controls the situation in the Salt Creek field.

In the report of the Secretary of the Interior, made to the President in answer to the resolution offered by the Senator from Wisconsin [Mr. LA FOLLETTE] on April 29, we find this statement:

It may be frankly stated that the entire matter was conducted by the Secretary of the Interior, as indicated, through conference in his office in Washington with representatives of at least three of the great oil companies of the United States outside of what is known as the Standard Oil group.

It may be as frankly stated that no prejudice against any of the Standard Oil companies caused the Secretary of the Interior to refrain from calling those companies in, but he did not so call them simply because of the fact that the Midwest Corporation in Wyoming is generally understood to be a Standard Oil subsidiary, and then had, and now has, a monopoly of the oil production of the entire State of Wyoming.

STANDARD OIL OWNS HALF INTEREST IN SINCLAIR PIPE LINE AND SINCLAIR CRUDE OIL PRODUCING CO.

In the light of all the facts, which are known to all men, one can not avoid the belief that the Secretary made this statement in a spirit of humor. If he did not mean it in a sense of humor, it was clearly intended to convey the impression that the Midwest, owned and controlled by the Standard, and the Sinclair were entirely independent and nonrelated companies. As showing the exact situation in reference to the relationship between these two companies, I submit for the RECORD an extract from the report of the Federal Trade Commission, made July 13, 1922, page 2, paragraph 5:

* * * In 1921 the Standard Oil Co. (Indiana) purchased one-half interest in the Sinclair Pipe Line Co., and in conjunction with Sinclair interests organized the Sinclair Crude Oil Producing Co., in which the Standard Oil Co. (Indiana) holds one-half interest. * * * According to current reports, this latter company (Sinclair Crude) is now planning to purchase and store Wyoming crude, which it is planned will be shipped through the proposed new pipe lines of the Sinclair Pipe Line Co., which, when built, are to connect with its own lines, and with those of the Prairie Pipe Line Co., (another Standard concern), in the vicinity of Kansas City, Mo. Prior to the acquisition of the Midwest Refining Co. by the Standard Oil Co. (Indiana), the Ohio Oil Co. (Standard) was the largest producer in that section. The Illinois Pipe Line Co. owned the greatest pipe line mileage, the Midwest Refining Co. was the most important refiner, and the Continental Oil Co. was the chief marketer. These companies are now all members of the Standard group.

STANDARD TO AID SINCLAIR IN FINANCING PIPE LINE.

I quote also from the Wall Street Journal of June 13, 1922, as follows:

Sinclair Consolidated Oil is in a stronger position from the viewpoint of cash than at any time in its history. It is to receive close to $16,000,000 cash from the Standard Oil Co. of Indiana in payment for one-half interest in its pipe lines. * * * The Teapot Dome pipe line, which will be 800 miles long, will cost approximately $15,000,000 and will be financed jointly by the Sinclair and Standard Oil Co. of Indiana, so that Sinclair will have to draw upon its treasury for only $7,500,000. Building of tankage to supply the Navy with fuel oil and refined products will be easily financed. Development of the Teapot Dome will cost the Sinclair nothing, as the expense will be met by the Mammoth Oil Co.

This all shows the complete community of interest between the Midwest Refining Co., which now monopolizes and dominates the oil industry of Wyoming, and the Sinclair Co., well known by the public to be one of the Standard group, and indicates the perfectly vicious form of competition that is to characterize the activities of these two companies in Wyoming.

PRIVATE CLAIMS ON TEAPOT DOME.

On page 23 of the Secretary's report we find this further statement:

Another matter which was fully explained to the different oil men and others with whom discussion was had was that there were certain outstanding private claims of record against portions of the area of the Teapot Dome, and that, in the matter of the consideration of propositions submitted or to be submitted by any companies or individuals in the carrying out of the prime purpose as just set forth, equitable consideration would be given to that proposition accompanied by quitclaim deeds to the United States Government covering all of such private claims.

A closer examination of this surrender of old titles gives another interesting picture of the brotherly relationship existing between the Sinclair and the Midwest Cos. in this transaction. The Secretary says much about the claims on Teapot which had to be gotten out of the way; he forgets to inform the country that these claims were owned by the Standard Oil Cos. and that deeds for them were so easily available to Mr. Sinclair that in his very first proposition to the Secretary he was able to guarantee that these claims would be surrendered. From all this it is easy to see how vigorous and how beneficial to the independent oil producers and to the public will be the coming competition between Mr. Sinclair and his enemies, the Standard Oil Co., the one owning all of the Teapot and the other dominating the Salt Creek field.

PIPE LINE WILL NOT BENEFIT INDEPENDENT PRODUCER.

This fable of benefiting the Wyoming producer by operations under this contract has another defect. The particular manner in which the Wyoming producer is to be benefited is through the construction of a pipe line by Sinclair to the Missouri River, thereby broadening the market for Wyoming crude. The Mid-Continent field is producing 400,000 barrels of crude per day, which is 100,000 barrels more daily than a year ago, and the operators in that territory are already confident that the recent price cuts have been largely due to the prospective dumping of a lot of Wyoming oil in that district, and that the actual construction of a line from Wyoming would lead to even more trouble for them. But no matter how grievously the construction of the Wyoming pipe line may affect Mid-Continent crude prices, it is entirely clear that it will not help the Wyoming producer.

This pipe line is to be built only when Sinclair has developed a production of 20,000 barrels per day in Teapot. Until that time his Teapot will be thrown on top of the existing Wyoming production, which is already three times the amount which can be marketed. When the pipe line is built it is to have a capacity of 25,000 barrels per day, a margin of 5,000 barrels above the minimum Teapot production, and this extra capacity the Government patriotically preempts for its Salt Creek royalty oil. Little chance, indeed, will there be to move through this line any of the Salt Creek production, now shut in on account of lack of market, amounting already to 100,000 barrels per day.

GOVERNMENT COULD HAVE BUILT PIPE LINE WITH BONUSES.

Mr. President, right here I want to direct the attention of the Senate to a plan whereby the Government could have built this pipe line without costing the people a cent. In discussing the question of royalties and bonuses I made reference to the fact that if the contract had been granted on a basis of competitive bidding the Government could have obtained at least as favorable royalties as it did, and in addition there is every reason to believe the bonuses would have ranged from $15,000,000 to $20,000,000.

In other words, the Secretary has bestowed upon Mr. Sinclair a concession of an amount that would easily have built the pipe line from Salt Creek to Woodriver, Kans. The ownership of the pipe line by the Government would have contributed more toward setting up a competitive condition in the Salt Creek field than any other single factor. As the Senator from Oklahoma [Mr. HARRELD] so well said in his speech the other day:

If you give me the pipe lines of this country I can control the price of crude and the price of its products, whether I own a single acre or barrel of production, and that is exactly what the monopolists of this country are doing.

GOVERNMENT MADE PRESENT WORTH MILLIONS TO FAVORED INDIVIDUAL.

Thus far I have discussed this contract from the national standpoint. From that point of view it is wholly indefensible. Ostensibly to prevent a drainage of a field which will never happen to any serious degree, and if it does happen will be the result of operations yielding to the Government a larger return than would direct development of Teapot, the Secretary has ruined the last and only perfect oil reservoir of the Nation.

Mr. WALSH of Massachusetts. Under what authority did the Secretary act?

Mr. KENDRICK. The authority was granted by Congress, I think, in about 1921.

Mr. WALSH of Massachusetts. In the so-called leasing bill?

Mr. KENDRICK. No; I think it was under an amendment on an appropriation bill, which granted the Secretary of the Navy the right to administer these reserves. An Executive order issued early in the present administration placed the control jointly under the Secretary of the Interior and the Secretary of the Navy.

Mr. WALSH of Massachusetts. Without any approval on the part of Congress?

Mr. KENDRICK. I believe so; yes. In so doing he has made a present to a favored individual of national property worth hundreds of millions of dollars and has exacted of that individual royalty terms which mean that the Government will receive not to exceed 15 barrels to 25 barrels of oil out of every 100 barrels contained in the field; or, in other words, in order to save 15 or 25 barrels of oil from mythical drainage the Secretary is giving away from 75 to 85 barrels of oil which can never be replaced. In all earnestness I say that this contract is so disastrous to the national interest and so outrageous in its terms that it never could have been negotiated and executed in the open, and that it was possible only because in the transaction the Secretary deliberately violated the rule of disposition of public property at public auction, which has controlled Congress and the Government in every other department of business.

CONTRACT BLOW TO REFINING INDUSTRY IN WYOMING.

But there is another aspect of this matter which is of particular interest to the State of Wyoming. In spite of our great natural advantages of location and our unlimited possibilities of cheap fuel and hydraulic power we have not profited by even

a reasonable number of manufactories. In fact, one of the greatest handicaps in the development of the State up to this time has been the transportation across its border of its inexhaustible supply of raw material, including coal, iron, and almost every other mineral product. In recent years some of the great oil refineries of the world have been constructed in Wyoming, dependent upon the supply of crude oil from the limited number of Wyoming fields, and cities have been built around these refineries which find their business foundation in the pay rolls of those plants.

The drilling of wells makes boom towns, but the operation of oil fields, after the wells have been drilled, requires but few men, and the people of Wyoming have so thoroughly learned how completely the greater public benefit depends upon the refining of the oil within the State that public officials, newspapers, and the public, irrespective of politics, have united in a demand that the crude oil of the State shall be refined in Wyoming. This great desire, which certainly must find a sympathetic response in this body, is now disappointed. The prospective fields of the State have been most thoroughly exploited and it is thought that the extent of future production is fairly well determined. This structure alone has remained as the source of supply for our one great manufacturing industry when existing fields have been depleted. Wyoming protested when it first learned that disposition of the field might have been made; it protests now with double vigor when it learns from the enforced statements of the Interior Department that the field has been donated to an individual under a contract which not only permits but requires him to strip the oil from that field at once, throw it upon an overloaded market at bankrupt prices, and in so doing destroy the one safe reserve of the national Navy and the one prospective source of raw material for the refining industry of the State.

GREAT PART OF ROYALTIES TO BE EMPLOYED IN BUILDING ARTIFICIAL STORAGE.

Mr. President, as stated at the biginning, this great reserve was, in the wisdom of the President and of Congress, set aside and dedicated to the use of our Navy in a time of emergency, and not to be exploited in a time of vast overproduction. It must have included a plan under which by Federal development this great basin of crude oil should have been given to such service instead of a petty royalty of 15 or 25 barrels out of every hundred. It is equally true that the course of wisdom in handling this resource would have retained the oil in its natural storehouse, where it has lain for millions of years, instead of employing a great part of the limited royalties received building artificial storehouses.

CONTRACT IRREPARABLE LOSS TO WYOMING.

I have attempted to show and believe I have shown conclusively that the excuse as to the necessity of developing this structure because of the drainage is the flimsiest pretext and can not be justified by existing information derived from either official or unofficial source; that the terms of the contract are improvident to the last degree; that it does not in any way lessen the grip of monopoly upon Wyoming oil fields but it does serve to render more enduring, and even perpetuates that monopoly; and that it imposes irreparable loss in transporting across the borders of my State its raw materials, thus denying the State its opportunity to receive even this form of compensation from its supply of natural resources.

CONTRACT WILL DAMN ADMINISTRATION.

In conclusion, this contract can not be justified in the minds of the people. It can be justified only by the insatiable greed of monopoly and I venture this prediction, if every other objection to this contract were removed, the secret method of its consummation is enough to condemn it in the mind of every citizen, and it will forever discredit the administration of this great department; and, if it be defended by the national administration, it will eventually plague and even damn that administration.

THE HISTORY OF DEFLATION.

Mr. JONES of New Mexico. Mr. President, I ask unanimous consent to have printed in the RECORD, in eight-point type, an editorial from the Omaha Evening World-Herald on the subject of "The history of deflation."

There being no objections, the matter referred to was ordered to be printed in the RECORD, in eight-point type, as follows:

[From the Omaha (Nebr.) Evening World-Herald of Monday, August 21, 1922.]

THE HISTORY OF DEFLATION.

The State platform of the Democratic Party of Nebraska contains this plank:

"We denounce the unnecessarily drastic deflation of currency and credits at the expense of agriculture, labor, and legitimate business as a perversion and misuse of the powers of the Federal reserve system, which was designed to protect the people against the wrongs of either undue inflation or sudden and harmful deflation, and pledge ourselves to the cause of making this great system serve faithfully the purpose for which it was designed."

Senator HITCHCOCK, in his speech to the convention, said that one cause of agricultural distress is "the drastic deflation of credits which forced down prices of agricultural products, rapidly and unreasonably." He charged that for this evil the Republican leaders are responsible, supporting his charge in these words:

"Republican responsibility for drastic deflation began with the Republican platform adopted in June, 1920. That platform denounced the 'gross expansion of our currency and credit' under the Democratic administration and pledged the Republican Party to 'a courageous and intelligent deflation of overexpanded credit and currency.'

"That was plain talk and a direct notice to the Federal Reserve Board of what the Republican managers demanded. The Republican Senate only three weeks earlier had, by resolution, called upon the board to report what it proposed to do to reduce 'currency and credit inflation.' Undoubtedly, therefore, the policy of the board was influenced then and afterwards by the demands of Republican leaders for deflation.

"The result was a drastic and damaging curtailment of credit, a reduction of currency, and a fall in prices, especially among the farming classes West and South."

The Republican platform plank, to which Senator HITCHCOCK referred, adopted at the Chicago convention in June, 1920, reads in part as follows:

"The prime cause of the high cost of living has been first and foremost a 50 per cent depreciation in the purchasing power of the dollar, due to a gross expansion of our currency and credit. We condemn the unsound fiscal policies of the Democratic administration. As the political party that throughout its history has stood for honest money and sound finance we pledge ourselves to earnest and consistent attack upon the high cost of living by rigorous avoidance of further inflation in our Government borrowing (and) by courageous and intelligent deflation of our overexpanded credit and currency."

The Senate resolution to which Senator HITCHCOCK referred, proposed by Senator MCCORMICK (Republican), of Illinois, and adopted May 17, 1920, follows:

"*Resolved*, That the Federal Reserve Board be directed to advise the Senate what steps it purposes to take or to recommend to the member banks of the Federal reserve system to meet the existing inflation of currency and credits, and the consequent high prices, and what further steps it purposes to take or recommend to mobilize credits in order to move the 1920 crops."

Senator HITCHCOCK might have carried the record a step or two farther, both forward and backward.

Mr. Harding, the Republican nominee for President, in his speech of acceptance July 22, 1920, said:

"Gross expansion of currency and credit have depreciated the dollar. * * * Deflation on the one hand and restoration of the 100-cent dollar on the other ought to have begun on the day after the armistice. * * * We pledge that earnest and consistent attack which the party platform covenants. We will attempt intelligent and courageous deflation and strike at Government borrowing, which enlarges the evil."

* * * * * * *

Going further back, these steps in sequence are interesting:

The Republican Party gained control of both House and Senate in the fall elections of 1918.

In 1919 a trust company tied up the Federal farm loan banks in the Supreme Court so they could no longer function.

In the spring of 1920 Congress passed an amendment to the Federal reserve banking law empowering the Federal Reserve Board to increase the rediscount rate.

Then followed, in turn, the McCormick resolution, the Republican National Convention, and Harding's speech of acceptance, after which the policy of deflation was begun.

The Democratic Party, in its platform of 1920, warned the country of what all the signs indicated, saying:

"One vital danger against which the American people should keep constantly on guard is the commitment of this (Federal reserve) system to partisan enemies who struggled against its adoption and vainly attempted to retain in the hands of speculative bankers a monopoly of the currency credits of the Nation. Already there are signs of an assault upon the vital principles of the system in the event of Republican success in the elections in November."

The rest is history. The overwhelming Republican victory which the members of the Federal Reserve Board saw coming, and which Governor Harding, of the board, helped to bring about, made Republican policy the policy of the board.

Between May 28, 1920, and January 25, 1922, there was a contraction of credits by the 12 Federal reserve banks amounting to $2,005,149,000, and a contraction of Federal reserve notes in circulation amounting to $923,020,000—a grand total of nearly three billions of dollars, or $30 per capita for the entire population of the country.

The result is that wages were brought down and are still being brought down.

The prices of farm products and of land were brought down and are still being brought down.

But the prices of the things the farmer and wage earner have to buy, being controlled by trusts and monopolies, still remain far above the pre-war level. And for fear foreign competition may bring about their "deflation" a Republican Congress is now engaged in enacting the highest tariff protection bill in the history of the country.

This record constitutes a large and important part of the "achievements" of the administration that the Nebraska Republican platform, with the assent of Mr. Howell, Mr. Randall, and the other candidates, so heartily indorses.

REPUBLICAN STATE CONVENTION IN OHIO.

Mr. FLETCHER. Mr. President, I ask to have printed in the RECORD in 8-point type an editorial from the New York World of this date, entitled "Safety first in Ohio."

There being no objection, the editorial was ordered to be printed in the RECORD in 8-point type, as follows:

SAFETY FIRST IN OHIO.

Mr. Harding must have been more bewildered than usual when he read the platform adopted by the Republican State convention in Ohio. After informing him that Ohio still had confidence in the "great and illustrious President in the White House," the State convention promptly adjourned to the cyclone cellar.

The platform says nothing about the ship subsidy, although the President had made a special request for an indorsement on that issue.

It says nothing about the bonus.

It says nothing specific about the Fordney-McCumber tariff and omits all reference even to the title of that remarkable measure.

It says nothing about the railroad strike or the coal strike.

It says nothing about the President's recent message to Congress and the measures recommended to insure fuel and transportation.

On the ship subsidy issue the President's defeat was overwhelming. The plank was brought from Washington by Representative FESS, who is the Republican candidate for Senator in Ohio. It was urged by Carmi Thompson, the President's personal friend, who is the Republican candidate for governor. Senator WILLIS was there to favor it and so was Walter Brown, who is chairman of Mr. Harding's committee to reorganize the Government bureaus. In spite of all the influence that the administration could swing, the ship subsidy plank was voted down and the convention ignored the issue.

The real Republican platform adopted at Columbus can be compressed into two words—"safety first." The convention avoided everything that could be avoided, not because it was in any sense hostile to the President but because it recognized the danger of trying to make a campaign on the specific issues that the administration represents.

In Ohio the delegates to a Republican State convention are for the most part county politicians who either hold office or expect to hold office. They are sheriffs and county clerks and prosecuting attorneys and treasurers and the like, with a very liberal sprinkling of city officials and politicians who know the economic meaning of defeat at the polls. They love their President, but they have practical views about their own political welfare. They are willing to say all the kind things that can be said about the President personally, but they have no disposition to tie themselves up to any issue on which they might be beaten at the polls. They are seldom the stuff out of which martyrs can be made.

Mr. Harding may be disappointed by the Ohio platform, but he may be sure that the delegates to the State convention went as far as they thought it was safe to go, and even gave him the benefit of any doubt. The President may not know what is going on in the mind of the average voter; Senators and Representatives may not know; but Mr. Harding may be sure his home State delegates knew and governed themselves accordingly.

UNITED STATES COAL COMMISSION.

Mr. CURTIS. I ask unanimous consent that the following order be adopted.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The Secretary will read the proposed order.

The principal legislative clerk read as follows:

Ordered, That in printing the reported amendments of House bill 12377 the amendments agreed to be printed in small capitals.

Mr. WALSH of Massachusetts. What is the bill?

Mr. CURTIS. The so-called coal bill (House bill 12377), to establish a commission to be known as the United States Coal Commission for the purpose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes. The Senator having charge of the bill failed to ask that the amendments be printed in small capitals. We want the amendments so printed in order that those who read the bill in the morning may know what are amendments agreed to and what is the original text.

The PRESIDING OFFICER. Without objection, the order will be made as requested.

RECESS.

Mr. CURTIS. In accordance with the unanimous-consent order heretofore made, I move that the Senate take a recess, the recess being until 11 o'clock to-morrow.

The motion was agreed to; and the Senate (at 5 o'clock and 55 minutes p. m.), pursuant to the order previously made, took a recess until to-morrow, Saturday, August 26, 1922, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

FRIDAY, *August 25, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Lord God of our fathers, we are grateful that we can come to Thee at all times to plead Thy mercy and receive Thy blessings. Thou wilt guide us in all the uncertain ways we are called to go. With all earnestness and loyalty may we commit ourselves to Thee. By a large and a broad manhood may we live lives full of industry, full of integrity, and full of Christian charity. Rebuke our impatience and forgive our sins. May all our obligations be administered in the fear of God, in the love of country and of our fellowmen. In Thy name. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

By unanimous consent leave of absence was granted to Mr. APPLEBY for one week, on account of business.

MESSAGE FROM THE SENATE.

A message from the Senate by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to conference report on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4) granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign, to widows, former widows, and dependent parents of such soldiers and sailors, and to certain Army nurses.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 2597. An act to amend an act entitled "An act to provide, in the interest of public health, comfort, morals, and safety, for the discontinuance of the use as dwellings of buildings situated in the alleys of the District of Columbia," approved September 25, 1914.

The message also announced that the Senate had passed the following resolution in which the concurrence of the House of Representatives was requested:

Senate Concurrent Resolution 28.

Resolved by the Senate (the House of Representatives concurring), That there be printed 1,000 copies of part 2 of House Report No. 300, Sixty-third Congress, second session, entitled "Floods and levees of the Mississippi River," for the use of the Senate document room.

ENROLLED BILLS SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 11699. An act relating to the appointing of the Chief of Staff of the Army;

H. R. 5775. An act for the relief of the Liberty loan subscribers of the North Penn Bank, of Philadelphia, Pa.; Santa Rosa National Bank, Santa Rosa, Calif.; Mineral City Bank, Mineral City, Ohio; Robbinsdale State Bank, Robbinsdale, Minn.; and Farmers' & Merchants' State Bank, Kenmare, N. Dak.

H. R. 858. An act for the relief of Alfred P. Reck; and

H. R. 11396. An act to regulate foreign commerce in the importation into the United States of the adult honeybee (Apis mellifica).

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee as indicated below:

S. 2597. An act to amend an act entitled "An act to provide, in the interest of public health, comfort, morals, and safety, for the discontinuance of the use as dwellings of buildings situated in the alleys of the District of Columbia," approved September 25, 1914; to the Committee on the District of Columbia.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that August 24 they had presented to the President of the United States, for his approval, the following bill:

H. R. 2694. An act for the relief of Seth J. Harris, Jimmie Lou Martin, Mary Holloman, and William Henry Coleman.

FEDERAL RESERVE BANK, ATLANTA, GA.

Mr. LANGLEY. Mr. Speaker, I desire to present a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LANGLEY. I have here a copy of Senate Joint Resolution 234, which recently passed the Senate, authorizing the Federal reserve bank at Atlanta, Ga., to enter into contracts for the construction of a branch bank in Jacksonville, Fla. I notice that this resolution was referred to the Committee on Banking and Currency, and I am advised that two or three other similar measures have been referred to the same committee. Some members of the Committee on Public Buildings and Grounds, of which I have the honor to be the chairman, have raised the question as to whether that was a proper reference and whether it does not properly belong to our committee. I desire to inquire of the Chair whether or not the question of jurisdiction between the two committees was fully considered in making these references, and if, in the opinion of the Chair, this is the proper committee to consider such bills? I have no personal feeling in the matter whatever. Our committee has finished its work for the time being for our sick and disabled soldiers and we are getting ready to report an omnibus public buildings bill in the near future [applause], and we have plenty to do. I simply want to know what the jurisdiction of our committee in these bank-building matters is, and I want the House to know that we do not propose to have this committee, the Appropriations Committee, or any other committee taking jurisdiction of the things in which the rules of the House require our committee to take the initiative. There are colossal post-office buildings being contracted for now, the congressional authority for which I question, and I propose to raise that question at the proper time.

Mr. CLARK of Florida. Mr. Speaker, will the gentleman from Kentucky yield to me for a moment?

Mr. LANGLEY. Yes.

Mr. CLARK of Florida. I desire to call the attention of the Speaker to this proposition: When the Committee on Public Buildings and Grounds was first created, it was given jurisdiction only of the public buildings in the District of Columbia; but later, in the second session of the Forty-sixth Congress, on motion of Mr. Dawes of Massachusetts, this jurisdiction was extended to include all the public buildings constructed by the United States. This Committee on Public Buildings and Grounds of course has no power of appropriation, but since that time it has always had jurisdiction to authorize public buildings in which the Government had any interest. I understand that in this particular case the point is raised that it is not really a Government building; that it is to be constructed, not by the money of the Government but by the money of the stockholders of the Federal reserve bank. If that be true, Mr. Speaker, then there is no necessity for any act of Congress to authorize its construction. If it is a private building and belongs to private people, and the Government has no interest in it, then there is absolutely no necessity for a bill to pass Congress to authorize its construction. If it is necessary for Congress to authorize the construction of this building, then the jurisdiction is clearly in the Committee on Public Buildings and Grounds.

The SPEAKER. The Chair understands that this is simply a parliamentary inquiry and that no immediate action is contemplated. Therefore the Chair will simply state why he referred this joint resolution to the Committee on Banking and Currency.

Mr. LANGLEY. Mr. Speaker, will the Chair permit an interruption there?

The SPEAKER. Yes.

Mr. LANGLEY. I have raised the question because I have been asked to call a meeting of the Committee on Public Buildings and Grounds for the purpose of authorizing a motion to transfer the bill. I understand, of course, that while the Speaker theoretically refers these bills it really and of necessity must be done by the parliamentary clerk, whose high efficiency we all implicitly trust. I naturally did not wish to take any action without knowing the views of the Speaker on the subject, and I hesitated to raise an unnecessary question by asking our committee to authorize me to do an unnecessary thing and take up the time of the House.

The SPEAKER. The Chair prefers now to state the ground on which he acted. The Chair assumed that unless there had been some Federal statute any Federal reserve bank would have the right, without any action of the Committee on Public Buildings and Grounds or of Congress, to construct a building; but there was an act passed by Congress, reported, the Chair believes, from the Committee on Banking and Currency, which forbade Federal reserve banks to build any buildings except under certain conditions. Therefore, simply because of that statute which was reported by the Committee on Banking and Currency, it is necessary to come to Congress, when a Federal reserve bank wishes to erect a building, and ask that that previous statute be waived. In this case that was all that was asked, and the previous statute having been reported from the Committee on Banking and Currency, the Chair naturally referred the exception to that statute to the same committee. The Chair has stated the ground on which he acted and he hardly thinks it is worth while for the House to take its time on the matter until the question comes before the House for its action.

Mr. LANGLEY. If the Chair will permit me, I do not desire to take up the time of the House now and do not intend to make any motion at this time. Moreover, I would not assume that responsibility without previous authorization of our committee, as the Chair very well knows. I simply wanted to be sure that I was right before asking our committee to take action.

The SPEAKER. The Chair has stated the ground on which he acted.

Mr. WINGO. If the Chair will permit me, the proposition is not to waive the statute. For the purposes of the RECORD I will state that the Federal reserve banks get their charters from the Government, and for that reason the Government can put restrictions on the handling of their funds, which are trust funds largely. We passed the statute which the Speaker refers to, which provides that whenever any Federal reserve bank desires to erect a building to cost more than a quarter of a million dollars, it must get the consent of Congress. Now, if we wanted to do so, we would have the power to say that no national bank should erect a building without getting the consent of Congress. Certainly a bill to provide that would not go to the Committee on Public Buildings and Grounds. That committee would have no jurisdiction of the matter.

The SPEAKER. The Chair may have inadvertently used the wrong word when he spoke of waiving the statute. What the Chair meant was that the bill provided for an exemption from the statute.

Mr. VAILE. A similar bill passed by the Senate had already been referred to the Committee on Banking and Currency. That bill related to a Federal reserve bank building at Denver, Colo. So a precedent already established in that case was followed in this case.

Mr. LANGLEY. It is not so much a question of precedence as it is a question of the construction of the rules of the House governing the jurisdiction of the committees.

If an error was committed in the other case, this is the time, it seems to me, to correct it. I do not care which way it is decided. I merely wanted it correctly decided, and that is why I have raised this question.

The committee of which I am chairman is not seeking to transgress upon the jurisdiction of any other committee. As its chairman, I merely wish the House to know that we are ready to perform all the duties which the rules of the House put upon us. That is all, Mr. Speaker. The question of whether the matter is to be further pursued depends entirely upon the wishes of our committee.

FLOODS AND LEVEES OF THE MISSISSIPPI RIVER.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate Concurrent Resolution 28, relating to certain printing, and to pass the same.

The SPEAKER. The gentleman from Washington asks unanimous consent to take from the Speaker's table a concurrent resolution, which the Clerk will report.

The Clerk read as follows:

Senate Concurrent Resolution 28.

Resolved by the Senate (the House of Representatives concurring), That there be printed 1,000 copies of part 2 of House Report No. 300, Sixty-third Congress, second session, entitled "Floods and Levees of the Mississippi River," for the use of the Senate document room.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

RELIEF TO SOLDIERS AND SAILORS OF THE WAR WITH SPAIN, PHILIPPINE INSURRECTION, ETC.—CONFERENCE REPORT.

Mr. KNUTSON. Mr. Speaker, I call up the conference report on the bill (H. R. 4) granting relief to soldiers and sailors of the War with Spain, the Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses.

The conference report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4) granting relief to soldiers and sailors of the War with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, and 6, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "or died in service due to disability or disease incurred in the service"; and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: Strike out all of the matter inserted by said amendment after the word "archives," in line 16, down to and including the word "widows" in line 22, and insert in lieu thereof the following: "fourth. Where there is no muster roll or pay roll on file in the several State or Territorial archives showing service of the beneficiary or same has been destroyed by fire or otherwise lost, and no record of service has been made in the War Department or Treasury Department, the applicant may make proof of service by furnishing evidence satisfactory to the Commissioner of Pensions"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment to the title of the bill, and agree to the same.

HAROLD KNUTSON,
J. M. ROBSION,
WILLIAM D. UPSHAW,
Managers on the part of the House.

H. O. BURSUM,
REED SMOOT,
T. J. WALSH,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4) entitled "An act granting relief to soldiers and sailors of the War with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses," submit the following written statement explaining the effect of the action agreed on by the conference committee, and submitted in the accompanying conference report:

On No. 1, includes those who died of disability incurred in the service. The House recedes.

On No. 2, includes those who died of disability incurred in the service. The House recedes and concurs with an amendment as follows: "or died in service due to disability or disease incurred in the service."

On No. 3, places contract nurses who served during the Spanish-American War, Philippine insurrection, and Chinese Boxer rebellion on the same footing as members of the Nurse Corps who served after February 2, 1901. The House recedes.

On No. 4, insert a comma after "absence." The House recedes.

On No. 5, the House recedes and concurs with an amendment as follows:

In lieu of the matter proposed by said amendment insert the following:

SEC. 6. That the second section of the act entitled "An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes," approved March 4, 1917, be so amended as to read as follows:

"SEC. 2. That the period of service performed by beneficiaries under this act shall be determined: First, by reports from the records of the War Department, where there are such records; second, by reports from the records of the Treasury Department showing payment by the United States, where there is no record of regular enlistment or muster into the United States military service; and third, when there is no record of service or payment for same in the War Department or the Treasury Department, by satisfactory evidence from muster rolls on file in the several State or Territorial archives; fourth, where there is no muster roll or pay roll on file in the several State or Territorial archives showing service of the beneficiary or same has been destroyed by fire or otherwise lost, and no record of service has been made in the War Department or Treasury Department, the applicant may make proof of service by furnishing evidence satisfactory to the Commissioner of Pensions: *Provided*, That the want of a certificate of discharge shall not deprive any applicant of the benefits of this act."

The House agrees to the amendment of the title.

HAROLD KNUTSON,
JOHN M. ROBSION,
WM. D. UPSHAW,
Managers on the part of the House.

Mr. KNUTSON. Mr. Speaker, this is a bill to take care of the widows and dependents of the Spanish war veterans and those who died as a result of service in the Spanish war, Philippine insurrection, and the Chinese Boxer rebellion. It passed the House June 21, 1921, and has been in the Senate since that time. The Senate made several minor changes, which we accepted, except Senate amendment No. 5 was considered too drastic by the House conferees, as it would enable the Indian war veterans to have proven their service by congressional documents embodying memorials from States or Territories to Congress, or furnished by States or Territories by certain departments of the Government at the request of Congress, or by records compiled under State authority, duly accepted by such States as a basis for appropriation or reimbursement to Indian war survivors and their widows.

The House conferees insisted on that section being stricken out, and we inserted in lieu thereof a provision that where there is no muster roll on file in the several State or Territorial archives showing the service of the applicants, same having been destroyed by fire or otherwise lost, and no record of service has been made in the War Department or Treasury Department, the applicant may make proof of service by furnishing evidence satisfactory to the Commissioner of Pensions.

Mr. LANHAM. Will the gentleman yield?

Mr. KNUTSON. Yes.

Mr. LANHAM. Is it in contemplation of the committee that evidence satisfactory to the Commissioner of Pensions would be evidence of a convincing character supplied through affidavits by comrades in the service?

Mr. KNUTSON. That is our intent, and I will say that the House conferees insisted on this amendment, which is substantially the same as introduced by the late Member from Texas, Mr. Parrish. The capitol of that State was destroyed by fire years ago, and all records of those who served in the Indian campaign of the Southwest in that State were destroyed.

Mr. LANHAM. And they have no other means of proving their service except by comrades who served with them.

Mr. KNUTSON. We have been in conference with the Commissioner of Pensions and we understand the bureau will accept such evidence.

Mr. RANKIN. Will the gentleman yield?

Mr. KNUTSON. Yes.

Mr. RANKIN. I notice that the conference report which has been read says that the House recedes from its disagreement to 1, 3, 4, and 6, and agrees to the same, and that includes an amendment with reference to women who served in the Nurse Corps.

Mr KNUTSON. The House conferees receded from the disagreement of the House to the amendment pertaining to Spanish-war nurses.

Mr. RANKIN. The conference report also states with reference to amendment 5 that they strike out all the matter inserted by said amendment after the word "archives" in line 16 down to and including the word "widows" in line 22, but it does not state what page it is on.

Mr. KNUTSON. That is on page 8.

Mr. MANN. It would be in the line of the amendment, or should be.

Mr. KNUTSON. The gentleman has the original bill passed by the Senate.

Mr. MANN. The original bill passed by the Senate would not show it. It should be in the line of the amendment and that is the only way the enrolling clerk could tell.

Mr. RANKIN. While I am on the committee I was not one of the conferees. I received a report just now, and I am trying to find out just what the amendment does.

Mr. KNUTSON. I will call the gentleman's attention to page 8, line 1, after the word "archives"; it strikes out all of the matter after the word "archives" in line 16 down to and including the word "widows" in line 22, and inserts in lieu of the portion stricken out the language that I have just read.

Mr. MANN. Will the gentleman yield?

Mr. KNUTSON. Yes.

Mr. MANN. I notice in the amendment that is in dispute there is a proviso that the want of a certificate as described shall not deprive any applicant of the benefits of this act. The statement says that that is included in the amendment as agreed to. But the statement is incorrect. I just wanted to know whether it was intended to have that go in the law because that is a part of the conference report in fact.

Mr. KNUTSON. Yes; that goes into the law.

Mr. MANN. How will it get into the law?

Mr. RANKIN. It only strikes out down to the colon and strikes out nothing after the colon.

Mr. DYER. Will the gentleman yield?

Mr. KNUTSON. Yes.

Mr. DYER. Will the gentleman state, if he has no objection, just what this bill does for the widows?

Mr. KNUTSON. It gives them $20 a month and $4 for each dependent child or idiotic child.

Mr. DYER. And there are no conditions to that?

Mr. KNUTSON. No; therefore no property qualifications.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. KNUTSON. Yes.

Mr. SMITH of Michigan. In order to be eligible for this pension is it necessary that the widow shall prove that the husband died from service causes?

Mr. KNUTSON. They will have to prove the death.

Mr. SMITH of Michigan. But the cause of the death—will the widow have to prove that it was from service causes?

Mr. KNUTSON. I call the gentleman's attention to page 2, line 10, which says:

Who was honorably discharged or died in service through the disability incurred in the service.

Mr. DYER. And the husband must have had a service of 90 days or more?

Mr. KNUTSON. Yes. Mr. Speaker, I move the adoption of the report.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

EXTENSION OF REMARKS.

Mr. JAMES. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of Muscle Shoals.

The SPEAKER. Is there objection?

There was no objection.

MUSCLE SHOALS.

Mr. ALMON. Mr. Speaker, I ask unanimous consent to proceed for 10 minutes out of order.

The SPEAKER. The gentleman from Alabama asks unanimous consent to proceed for 10 minutes out of order. Is there objection?

Mr. DYER. Mr. Speaker, reserving the right to object, is it on the subject of Muscle Shoals?

Mr. ALMON. It is for the discussion of a great national question, which is in no way political.

The SPEAKER. The Chair hears no objection.

Mr. ALMON. Mr. Speaker and gentlemen of the House, just before the House recessed it was insisted that the legislation reported by the Military Affairs Committee of the House providing for the acceptance of the offer of Henry Ford for the Muscle Shoals property should be considered and voted on.

The majority leader at that time stated that further time was desired for a study of the Ford offer. On yesterday when he was asked as to when we might expect the Muscle Shoals legislation to be taken up and considered by the House he replied that it was not considered necessary to take such action at this time for the reason that provision had already been made by this Congress for resumption of construction work on the Wilson Dam at Muscle Shoals. The fact that provision had been made for the continuation of the work on one of the water-power dams at Muscle Shoals is no reason why the Ford offer should not be accepted, for the reason that the action of Congress in providing for the continuation of the work on this one dam makes no provision for the operation of the nitrate plant at Muscle Shoals for the manufacture of fertilizer. The Ford offer, upon which the Military Committee of the House held hearings for five months and upon which this committee reported a bill, provides for the construction of both of the water-power dams at Muscle Shoals and the operation of the nitrate plant for the manufacture of fertilizer by the Ford Co. After the report was made by the Military Committee its acting chairman [Mr. MCKENZIE] introduced a resolution requesting the Rules Committee to report a rule making this legislation in order, but as yet no rule has been reported. Why should a committee of this House spend five months of its time in considering legislation referred to it by the House and making its report and then not allow it to be considered and voted upon?

The legislation is not sectional nor political. It is a great national economic question in which all of the people are vitally interested. There are 6,500,000 farmers in all parts of the country petitioning and urging Congress to accept the Ford offer. They are intelligent and have studied the question and believe that its acceptance will result in enabling them to secure a better grade of fertilizer at one-half the present price. They represent an investment of $8,000,000,000, by far greater than that of any other interest. Do not let any Member of the House deceive himself by thinking that the interest in the Ford bill is confined to the farmers in any section or limited part of the country. They are all interested. Neither should you deceive yourself by thinking the interest in this measure is confined to the farmers. Are we to understand that the majority proposes to ignore the wishes of the farmers in regard to this legislation by not allowing the Ford bill to be considered and voted on in the House? What explanation could be given for such action? The country will not be satisfied unless their Representatives are given an opportunity to vote upon this important question without further delay. If the Ford offer is accepted by Congress the Ford Co. would proceed to spend many millions of its own money in equipping the nitrate plant for the manufacture of fertilizer and expedite the water-power development.

Mr. OLIVER. Mr. Speaker, will the gentleman yield?

Mr. ALMON. Yes.

Mr. OLIVER. In that connection, is the gentleman aware of the interview given out by Senator CAPPER, of Kansas, pointing out the great benefits of this offer to the farmers of the country and urging its acceptance?

Mr. ALMON. Yes; I read the interview of Senator CAPPER, referred to by my colleague from Alabama, and I presume that the other Members of the House did the same. However, I do not care at this time to enter into a discussion of the merits of the Ford offer. I have discussed that on previous occasions. The purpose of these remarks is, if I can, to persuade the leaders of the majority, who have it in their power, to arrange for the consideration and vote on the Ford offer.

The House can not justify itself in its failure to consider this legislation by saying it would probably not be considered by the Senate in the event it was passed by the House. We have a responsibility in the matter which we should discharge without reference to what may be done by the Senate. Mr. Ford made his offer in good faith in answer to an invitation from this administration. The Military Committee, to which it was referred, acted in good faith in conducting its hearings and in making its report. In all fairness to Mr. Ford, the Military Committee, and all who are interested in this subject, the bill reported by the committee should be considered and voted on without further delay. So, in conclusion, I again appeal to the majority and especially the leaders, who have it in their power to determine whether this legislation shall be considered, to arrange for it to be taken up and considered and voted on at a very early date. [Applause.]

Mr. MANN. Mr. Speaker, I ask unanimous consent to proceed for five minutes on the same subject. [Applause.]

The SPEAKER. The gentleman from Illinois asks unanimous consent to proceed for five minutes on the same subject. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Speaker, I have been a friend of the Muscle Shoals proposition, and still am. [Applause.] But what is the parliamentary situation? The Committee on Military Affairs, after consideration, as the gentleman says, for five months, reported a bill to the House which stands as the report of the committee. The committee consists of 21 members. Nineteen members of the committee have signed minority reports, and the committee report provided for a variation in the Ford offer, and Mr. Ford had not agreed to the variation. It would be idle to pass the bill as reported unless we know whether Mr. Ford will accept it. But it would be worse than idle for the House to proceed to the consideration of a bill from a committee of 21, only 2 of whom stand for the reported bill, and neither one of them want it to pass without amendment. [Applause.] What do you propose to do? What would my friends from Alabama and Tennessee do? Have the House vote without knowledge upon the bill, without an opportunity to fairly consider it before it comes up for a vote? When a committee reports a bill in order to get it on the calendar because it has promised to make a report to the House, and 19 members of the committee file views against the reported bill, it ought to be notice to the House and the House Members to give it careful consideration before it is taken up for amendment in the House.

Mr. McKENZIE. Will my colleague yield?

Mr. MANN. I yield.

Mr. McKENZIE. Of course, my colleague understands that before the report was made by the Committee on Military Affairs, a majority of the committee had directed the chairman to make that report?

Mr. MANN. I understand. They directed the bill to be reported, with their fingers crossed, most of them. Having directed the bill to be reported, then they signed views against the bill. Now, I am not discussing the propriety of that——

Mr. McKENZIE. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. McKENZIE. It being true that 19 members, as he says, differ from the report filed by the acting chairman of the committee, my colleague will at least admit that it is a matter of great importance to the country; that it is one of the big questions before the American people, and that, regardless of the difference of opinion of the members of the Committee on Military Affairs, does not he believe that the Congress of the United States ought to take the subject up and discard the Henry Ford offer or give him a contract or, at least, do something? [Applause.]

Mr. MANN. I said 19 members. I think, excluding the chairman [Mr. KAHN] it would be only 18 members.

I have taken the subject up, as far as I am concerned, and am studying it as well as I can, and I am not prepared to say whether I would vote for the bill or in favor of one of the views of the minority. I think, friend as I am and as I have been of the Muscle Shoals proposition and, in the main, of the Ford proposition, that if I were compelled to vote on it to-day I would vote against it. Is that what you people want, to force it to a vote before the country has had a chance to consider it? Do you want to kill the proposition? Or do you want that the country and the Members of the House should have an opportunity to consider all of these questions and then vote with knowledge and intelligence, and, as I hope, in favor of some proposition to operate the plant?

Mr. BANKHEAD. Will the gentleman yield for a brief question?

Mr. MANN. If I have the time.

Mr. BANKHEAD. Will the gentleman indicate what would be a reasonable time to delay further consideration of this matter? I ask this question in good faith, in view of the gentleman's expressions.

Mr. MANN. I think the matter ought to be brought up in the House before Congress adjourns for the full term. I do not believe it is desirable to try to force consideration of it in the House at this speedy and doubtful time, in the dog days of the summer.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent to address the House for three minutes on this subject.

The SPEAKER. The gentleman from Wyoming asks unanimous consent to address the House for three minutes on this subject. Is there objection? [After a pause.] The Chair hears none.

Mr. MONDELL. Mr. Speaker, the gentleman from Alabama [Mr. ALMON] who just spoke said that he desired to address the House on a nonpolitical subject. Well, it ought to be a nonpolitical subject, and yet I am forced to the opinion that some of the gentlemen on the other side are most interested in what they conceive to be the politics of the proposition. They are much more interested in that, I fear, than they are in the proper settlement of the question. I notice that no one on the other side answered the question of the gentleman from Illinois [Mr. MANN] as to whether or no they desired this side to reject the Henry Ford offer. I feel compelled to say that there are, in my opinion, quite a number of gentlemen on the other side who would like to see the Henry Ford offer rejected by votes on this side because of the hoped-for political effect of such action. From their standpoint this is a political question.

Mr. Speaker, this Muscle Shoals proposition is for the time being in as satisfactory a situation from the standpoint of the friends of the development as it has been possible to place it, in view of the attitude of the minority in insisting that the work on Dam No. 2 shall be delayed until the 1st of October. Had it not been for their attitude we would now be actively at work toward the completion of that great dam. There is nothing in the Henry Ford offer proposing or suggesting the manufacture of fertilizer with the steam plant, and therefore, if the Ford offer were adopted, there would be no fertilizer manufactured until the dam is completed and the water power is available.

Mr. Speaker, in addition to all of these considerations this House has passed more than 100 public bills—something like 130, as I recall—that the Senate has not had time to consider. If we were to take this measure up and pass on it one way or another at this time, that action would not in any wise advance the settlement of the question beyond what it will be advanced if we take the matter up later. I agree with the gentleman from Illinois that this matter ought to be considered and settled by this Congress, and as soon as it can properly be done. [Applause.]

The SPEAKER. The time of the gentleman from Wyoming has expired.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent to proceed for five minutes.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. GARRETT of Tennessee. Mr. Speaker, this matter, of course, has a history which is very well known, and to no one is it known better than to the gentleman from Wyoming [Mr. MONDELL].

For three years now this property has been unused. The gentleman from Wyoming speaks of delay by the minority by reason of a limitation placed upon a Senate amendment. The majority in 1921 deliberately cut out the appropriation for the continuation of the work upon the dam, in order, they said, that there might be a determination of the final disposition of the property.

Since that time bids have been asked for and have been offered; reports have been made from the Committee on Military Affairs. The gentleman from Illinois [Mr. MANN] says three. That is quite true. But when will we get a committee that will report anything other than a division? Does the gentleman from Illinois [Mr. MANN] desire us to wait until we can get a committee that will be unanimous in its report before we pass upon this matter?

Mr. MANN. Is that a question?

Mr. GARRETT of Tennessee. Yes; that is a question.

Mr. MANN. I do not [laughter], although I am sorry they did not make a unanimous report.

Mr. GARRETT of Tennessee. Then why not pass upon it now? Does the gentleman hope that we will ever have a committee that will report unanimously?

Mr. MANN. No; but I think the Members of the House will know more about it than they do now.

Mr. GARRETT of Tennessee. How?

Mr. MANN. I am very sure the majority of the Members of the House to-day do not know enough about the subject to enable them to vote.

Mr. GARRETT of Tennessee. Is it possible that the gentleman expects that even a committee of the House will know more about this matter?

Mr. MANN. I think this House will know more about it when they have a chance to read the reports. I doubt even if the gentleman from Tennessee has read all the reports on the subject in both Houses.

Mr. GARRETT of Tennessee. I have indeed.

Mr. MANN. I am glad. I have, but I doubt if anybody else has.

Mr. GARRETT of Tennessee. The gentleman knows about it, then. The gentleman is not pleading ignorance on his own behalf, then.

Mr. MANN. I have read the reports, and I still want information. [Laughter.]

Mr. GARRETT of Tennessee. What further report does the gentleman hope for that will give him information?

Mr. MANN. I am trying to get some further information, and I think I will succeed.

Mr. BARKLEY. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Certainly.

Mr. BARKLEY. Has the gentleman any hope that between now and November the vast majority of the Members of this House are going to spend their time in investigating this thing?

Mr. GARRETT of Tennessee. Is the gentleman addressing that question to me?

Mr. BARKLEY. I am addressing it to the gentleman from Illinois [Mr. MANN] over your head.

Mr. GARRETT of Tennessee. Oh, Mr. Speaker, there is no use to trifle about this matter. There is no use to try to be disingenuous about it. The House knows or has the opportunity of knowing now just as much as it ever will know upon this proposition, and there is no reason on earth why we should not have this matter up and consider it to-day in a legislative way rather than in an academic, talking way.

Mr. MOORE of Virginia. Mr. Speaker, may I ask the gentleman a question?

Mr. GARRETT of Tennessee. Yes.

Mr. MOORE of Virginia. Going back a minute, the gentleman said the House in 1921 declined to make an appropriation for the prosecution of the work on Dam No. 2. Is it not a fact that the House in this Congress also declined to make an appropriation, and that the appropriation of $7,500,000 was initiated in the Senate? In other words, did not the party in control of the House let the bill go to the Senate without any appropriaion, or at least foregoing to make any appropriation?

Mr. GARRETT of Tennessee. Yes. The gentleman from Wyoming said that upon the insistence of the minority that appropriation was not made available until the 1st of October.

The SPEAKER. The time of the gentleman from Tennessee has expired.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent to proceed for three minutes more.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to proceed for three minutes more. Is there objection?

There was no objection.

Mr. GARRETT of Tennessee. Of course the gentleman from Wyoming was wrong about that. Only a majority of the House could have deferred making it available in that time.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. I yield.

Mr. STAFFORD. I think it is hardly fair to cast any imputation upon the majority Members of the House for failing to make any appropriation for the Muscle Shoals proposition, for the reason that no estimate was presented by the War Department for the continuation of that work. Inquiry regarding it was made by the subcommittee on the War Department appropriation bill as to the need of it, but the War Department, through its Secretary of War and through its budget officer, made no recommendation. When the subject was called to the attention of the House conferees, attention was given to it, and action was taken on the assumption that it was not going to be antagonized, but not until the conferees had agreed, and we came over and informed the leading proponent of this project, the gentleman from Alabama, did he give notice that he was going to tack on to it some ulterior proposition of the Henry Ford proposal.

Mr. GARRETT of Tennessee. Everybody knew the significance and intent of that vote. The Senator who offered that amendment and put it on the bill in the Senate is in favor of Government ownership and operation of that plant, so far as he favors anything. Every man who voted for it in the House and who voted for that limitation understood that he was postponing that appropriation simply long enough to give this House opportunity for trying to determine the final disposition of that plant.

Mr. HARDY of Texas. Mr. Speaker, will the gentleman yield for a question there?

Mr. GARRETT of Tennessee. Yes.

Mr. HARDY of Texas. Is it not a fact that if this House were to wait until the majority of its Members understood any important measure before debate began on it we never would pass any legislation at all? Take the tariff. How many of us understand all the issues of the tariff?

Mr. GARRETT of Tennessee. Well, I think the majority of the House understand the proposition. I do not agree with the gentleman from Illinois in the statement that a majority of the Members of this House do not understand what is involved in this Muscle Shoals proposition. I think they do. I think they are as well prepared now to pass upon it after reasonable debate as they ever will be.

Mr. WINGO. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. WINGO. Assuming that the gentleman is correct and that the majority is not informed, in view of the hopeless confusion in the committee and the reports to which he has referred, will not the House be better informed more quickly by taking it up and considering it in the House than it otherwise would be? Is not that the best way to have them informed—to take it up and have it considered in the House?

Mr. GARRETT of Tennessee. I think that would be the best way.

Mr. TOWNER. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Yes.

Mr. TOWNER. I think, if the gentleman will pardon me, a great many Members of the House, perhaps a majority of the House, are almost as anxious as the gentleman for action on the Muscle Shoals proposition.

However, it is not the mere question of passing the bill, is it? It is a question of making an arrangement to pass it as approved and agreed to by third parties. The propositions so far before Congress are so involved and wrapped up in that situation that no one can tell exactly what the conditions are. At least, many of us are unable to. If we did understand it, as it is contemplated or proposed, in all likelihood we could not approve the proposition. Therefore, is it not desirable that there should be some kind of a settlement with Mr. Ford, who I hope may secure this franchise from the Government? Is it not best that these negotiations continue until there can be an agreement between the administration and Mr. Ford?

Mr. GARRETT of Tennessee. I do not understand that there are any negotiations now in progress between Mr. Ford and the administration.

The SPEAKER. The time of the gentleman has expired.

Mr. BRENNAN. Mr. Speaker, I ask unanimous consent to proceed for three minutes on this subject.

Mr. MONDELL. Mr. Speaker, I think the minority have had quite time enough to apologize for this opposition to the beginning of work at Muscle Shoals, and therefore I shall have to object. I move that the House do now adjourn.

Mr. JEFFERS of Alabama. Will the gentleman withhold that for one moment to allow me to ask him a question?

The SPEAKER. The motion to adjourn is not debatable.

Mr. JEFFERS of Alabama. If the gentleman from Wyoming will withhold his motion for one minute, I would like to ask him one question on this subject.

Mr. MONDELL. I do not withhold my motion.

ADJOURNMENT.

The SPEAKER. The gentleman from Wyoming moves that the House do now adjourn.

The question was taken; and on a division (demanded by Mr. GARRETT of Tennessee) there were—ayes 97, noes 53.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 135, nays 62, answered "present" 2, not voting 228, as follows:

YEAS—135.

So the motion was agreed to.

Mr. DAVIS of Tennessee. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. DAVIS of Tennessee. No, Mr. Speaker; I came in since. I desire to be recorded "present."

The Clerk announced the following pairs:

On this vote:

Mr. Ramseyer (for) with Mr. Cantrill (against).

Mr. Maloney (for) with Mr. Gallivan (against).

Mr. Burton (for) with Mr. Oldfield (against).

Mr. Thompson (for) with Mr. Tague (against).

Mr. Cramton (for) with Mr. Carter (against).

Mr. Porter (for) with Mr. Kitchin (against).

Mr. Taylor of New Jersey (for) with Mr. Wise (against).

Mr. Reed of New York (for) with Mr. Connally of Texas (against).

Mr. Burke (for) with Mr. London (against).

Mr. Elliott (for) with Mr. Stoll (against).

Mr. Jones of Pennsylvania (for) with Mr. Martin (against).

Mr. Montoya (for) with Mr. Dupré (against).

Mr. Fess (for) with Mr. Upshaw (against).

Mr. Kiess (for) with Mr. Lyon (against).

Mr. Michaelson (for) with Mr. Bell (against).

Mr. Krieder (for) with Mr. Johnson of Kentucky (against).

Mr. Kahn (for) with Mr. McDuffie (against).

Mr. Nolan (for) with Mr. Kindred (against).

Mr. Tincher (for) with Mr. Hawes (against).

Mr. Lineberger (for) with Mr. Collins (against).

Mr. A. P. Nelson (for) with Mr. Harrison (against).

Mr. Edmonds (for) with Mr. O'Brien (against).

Mr. Davis of Minnesota (for) with Mr. Woods of Virginia (against).

Mr. Dunn (for) with Mr. Rucker (against).

Mr. Sinclair (for) with Mr. Tucker (against).

Mr. Shreeve (for) with Mr. McSwain (against).

Mr. Radcliffe (for) with Mr. Huddleston (against).

Mr. Codd (for) with Mr. Griffin (against).

Mr. Connolly of Pennsylvania (for) with Mr. Fields (against).

Mr. Johnson of South Dakota (for) with Mr. Byrns of Tennessee (against).

Mr. Larsen of Minnesota (for) with Mr. Buchanan (against).

Accordingly (at 1 o'clock and 15 minutes p. m.) the House adjourned until Saturday, August 26, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

672. Communication from the President of the United States, transmitting a supplemental estimate of appropriation for the Department of State for the fiscal year ending June 30, 1923, for Mixed Claims Commission, United States and Germany, $200,000 (H. Doc. 376); to the Committee on Appropriations and ordered to be printed.

673. Communication from the President of the United States, transmitting a supplemental estimate of appropriations for the Department of State for the fiscal year ending June 30, 1923, for salaries of ambassadors and ministers, $16,666.68, and for salaries of secretaries in the Diplomatic Service, $8,125.68; in all, $24,791.68 (H. Doc. 377); to the Committee on Appropriations and ordered to be printed.

674. Letter from the Secretary of War, transmitting a draft of a bill for the relief of Col. Robert S. Smith; to the Committee on Claims.

675. Letter from the Assistant Secretary of Labor, transmitting a statement of the travel performed during the fiscal year ended June 30, 1922, by officers and employees of the Department of Labor (other than those who in the discharge of their regular duties are required to constantly travel) on official business from Washington, D. C., to points outside of the District of Columbia; to the Committee on Expenditures in the Department of Labor.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. McFADDEN: Committee on Banking and Currency. S. J. Res. 208. A joint resolution authorizing the Federal Reserve Banks of St. Louis and Salt Lake City to enter into contracts for the erection of buildings for its head office and branches; with amendments (Rept. No. 1184). Referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BRENNAN: A bill (H. R. 12461) to permit the immigration into the United States of veterans who served in the military or naval forces of the United States during the World War and of certain of their relatives; to the Committee on Immigration and Naturalization.

By Mr. IRELAND: A resolution (H. Con. Res. 66) authorizing the Architect of the Capitol to contract for the extermination of insects in the House Office Building, the Capitol, and the Senate Office Building; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BENHAM: A bill (H. R. 12462) granting an increase of pension to Josinah Brinson; to the Committee on Invalid Pensions.

By Mr. LAWRENCE: A bill (H. R. 12463) granting a pension to Asa R. Daniel; to the Committee on Invalid Pensions.

By Mr. ROGERS: A bill (H. R. 12464) granting a pension to Clara H. F. Royal Stevens; to the Committee on Invalid Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 12465) granting an increase of pension to Emily J. Sherman; to the Committee on Invalid Pensions.

By Mr. SPROUL: A bill (H. R. 12466) for the relief of Nellie Hickey; to the Committee on Claims.

By Mr. UPSHAW: A bill (H. R. 12467) for the relief of the Masons' Annuity; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6225. By the SPEAKER (by request): Petition of the City Firefighters' Union, No. 136, of Dayton, Ohio, favoring the passage of Senate Joint Resolution 200 and House Joint Resolution 327; to the Committee on the Judiciary.

6226. Also (by request), petition of the City Firefighters' Union, No. 136, of Dayton, Ohio, favoring the passage of the Fitzgerald bill; to the Committee on the District of Columbia.

6227. By Mr. ANSORGE: Petition of Mr. Julius Hyman, New York City, advocating the placing of replicas of the Liberty Bell throughout the country with a tablet containing, among other things, the sentence from Leviticus on the border of the bell; to the Committee on the Library.

6228. Also, petition of National Enameling & Stamping Co., New York City, opposing decrease of tariff on enameled ware from 5 cents specific and 50 per cent ad valorem to 5 cents specific and 30 per cent ad valorem; to the Committee on Ways and Means.

6229. Also, petition of Carson Pirie Scott & Co., New York City, opposing American-valuation plan and proposed tariff bill; to the Committee on Ways and Means.

6230. By Mr. BLAND of Virginia: Petition of citizens of Lancaster County, Va., opposing passage of House bill 9753, or any other Sunday bill, such, for example, as House bill 4388 or Senate bill 1948; to the Committee on the District of Columbia.

6231. By Mr. FULLER: Petition of the Illinois Agricultural Association, favoring the operation of the Muscle Shoals project as contemplated in the Henry Ford proposal; to the Committee on Military Affairs.

6232. By Mr. GREENE of Massachusetts: Petition of Whittenton Manufacturing Co., of Boston, Mass., relating to duties on dyes; to the Committee on Ways and Means.

6233. By Mr. KISSEL: Petition of Town and Country, New York City, N. Y., relating to second-class postage; to the Committee on the Post Office and Post Roads.

6234. Also, petition of Bronx Council, No. 105, Junior Order United American Mechanics, New York City, N. Y., favoring the passage of the Towner-Sterling bill; to the Committee on Education.

6235. Also, petition of the Nast Publications, New York City, N. Y., relative to second-class postage; to the Committee on the Post Office and Post Roads.

6236. By Mr. O'CONNOR: Petition of the commission council of the city of New Orleans, urging Congress to establish a life-saving station on Lake Pontchartrain; to the Committee on Interstate and Foreign Commerce.

6237. By Mr. ROGERS: Petition of the Lithuanians of Lowell, by Joseph G. Varoski, chairman of the committee, relating to the Republic of Lithuania; to the Committee on Foreign Affairs.

6238. Also, papers to accompany House bill 12464, granting a pension to Clara, H. F., and Royal Stevens; to the Committee on Invalid Pensions.

SENATE.

SATURDAY, *August 26, 1922.*

(Legislative day of Friday, August 25, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. CAMERON in the chair). The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	Nelson	Shortridge
Borah	Ernst	Nicholson	Smoot
Broussard	Hale	Ransdell	Stanfield
Bursum	Heflin	Rawson	Sutherland
Cameron	Jones, Wash.	Reed, Mo.	Trammell
Capper	Keyes	Reed, Pa.	Walsh, Mont.
Curtis	La Follette	Robinson	Warren
Dial	McCumber	Sheppard	Watson, Ga.
Dillingham	McNary	Shields	

The PRESIDING OFFICER. Thirty-five Senators having answered to their names, there is not a quorum present. The Secretary will call the roll of absentees.

The reading clerk called the names of the absent Senators, and the following Senators answered to their names when called:

Gooding	Myers	Stanley	Townsend
McKellar	Pomerene	Sterling	Underwood
McLean			

The following Senators entered the Chamber and answered to their names:

Colt	Cummins	Kellogg	New
Culberson	Hitchcock	Lenroot	Oddie

The PRESIDING OFFICER. Fifty-two Senators having answered to their names, there is a quorum present.

MEMORIAL.

Mr. ROBINSON presented a telegram in the nature of a memorial from the Southern Pine Association, John H. Kirby, president, of New Orleans, La., remonstrating against the passage of the so-called soldiers' adjusted compensation bill, which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. BROUSSARD, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 646) for the relief of Emma LaMee (Rept. No. 884); and

A bill (H. R. 1941) to provide for the refund of entrance and clearance fees erroneously collected by the customs authorities from the Peninsular & Occidental Steamship Co. (Rept. No. 885).

Mr. BROUSSARD, from the Committee on Claims, to which were referred the following bills, reported them severally with an amendment and submitted reports thereon:

A bill (S. 911) for the relief of Fred V. Plomteaux (Rept. No. 886);

A bill (S. 3171) for the relief of the trustee of the estate of Hillsboro Dredging Co., a corporation, bankrupt (Rept. No. 887); and

A bill (S. 3257) for the relief of H. B. Stout (Rept. No. 888).

Mr. BROUSSARD, from the Committee on Claims, to which was referred the bill (S. 3256) for the relief of A. L. Gramling, reported it with amendments and submitted a report (No. 889) thereon.

Mr. BURSUM, from the Committee on Pensions, to which was referred the bill (H. R. 211) to extend the provisions of the pension act of May 11, 1912, and May 1, 1920, to the officers and enlisted men of all State militia and other State organizations that rendered service to the Union cause during the Civil War for a period of 90 days or more, and providing pensions for their widows, minor children, and dependent parents, and for other purposes, reported it without amendment and submitted a report (No. 890) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HALE:

A bill (S. 3956) for the relief of J. W. Cook (with accompanying papers); to the Committee on Claims.

By Mr. FLETCHER:

A bill (S. 3957) for the relief of Archibald L. Macnair (with an accompanying paper); to the Committee on Claims.

By Mr. OWEN:

A bill (S. 3958) to prevent the use of the mails and of the telegraph and telephone in furtherance of fraudulent and harmful transactions on stock exchanges; to the Committtee on Banking and Currency.

AMENDMENT OF BANKRUPTCY ACT.

Mr. WALSH of Montana submitted an amendment intended to be proposed by him to the bill (S. 2921) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto, which was ordered to lie on the table and to be printed.

COMPENSATION OF WORLD WAR VETERANS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. CURTIS. Mr. President, I understand that the Senator from Idaho [Mr. BORAH] desires to have the coal commission bill taken up, and I, therefore, ask unanimous consent that the unfinished business may be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNITED STATES COAL COMMISSION.

Mr. BORAH. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House bill 12377, the coal commission bill.

The PRESIDENT pro tempore. The Senator from Idaho asks unanimous consent that the Senate proceed to the consideration of House bill 12377, being the coal commission bill. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12377) to establish a commission to be known as the United States coal commission for the purpose of securing information in connection with questions relative to interstate commerce in coal, and for other purposes.

Mr. BORAH. Mr. President, I understand the Senator from West Virginia [Mr. SUTHERLAND] desires to discuss this measure. I will inquire of the Senator if he desires to discuss the particular amendment which is now pending, being the amendment of the Senator from Tennessee [Mr. SHIELDS]?

Mr. SUTHERLAND. No; I do not.

Mr. BORAH. Mr. President, the Senator from Tennessee has offered an amendment prohibiting the appointment upon the proposed commission of representatives of either the mine operators or the mine workers. The bill which is now before the Senate, as reported from the Senate committee, leaves the matter of the appointment entirely to the President. The bill as it came from the other House contained the same provision which the Senator from Tennessee now offers by the way of an amendment, but the committee of the Senate reported the bill leaving the matter to the President. I feel that there is where it ought to remain.

I am not willing, Mr. President, to prohibit the selection of a representative of the operators or the mine workers if the President so desires; in fact, the bill as I originally drew it provided that both of those interests should be represented; but it was the view of the committee that the matter ought to be left open in order that the President might, in his discretion, select members from the operators and the mine workers.

I feel, at any rate, Mr. President, that the amendment of the Senator from Tennessee should not be adopted by the Senate, but that the matter should go to conference. I therefore hope that the amendment will not be adopted.

Mr. SHIELDS. Mr. President, I shall delay the Senate but a moment in regard to this matter. When the bill was last before the Senate I stated the reasons why I thought the amendment ought to be adopted. The Senator from Arkansas [Mr. ROBINSON] followed me hardly in opposition, but in a very interesting, able, and forceful speech upon the general subject of the coal strike, in which, in his able and eloquent manner, he showed the iniquity of both the coal operators and the coal miners in holding up the country and committing a very grievous wrong upon the people by their selfish greed and personal and financial interest.

This bill, Mr. President, is for the purpose of devising means to curb the rapacity of the mine owners and the mine workers, to keep them in the future from imposing upon the public the grievous wrongs which, as suggested by the Senator from Massachusetts [Mr. WALSH], are not only impending but actually now exist. The object is to correct a wrong being perpetrated by the mine owners and the mine workers. In view of the fact that we are about to pass this bill in order, at a very great expense, to regulate and punish those men, to prevent them again from committing such a wrong, I think it is eminently proper that they be not made the judges of the provisions of the law proposed to be made to restrain and control them.

Especially is that my view when it is considered that the provisions of the bill make ineligible for service on the proposed commission Members of Congress, nearly 600 men, who are presumed to be informed of the conditions of the country, who are capable of considering such questions, whose duty it is as the representatives of the people to advise the means of affording remedies, without abdicating their functions and delegating them to a commission, as is too often done by the Congress. They have been made ineligible, although they are presumed to have no financial interest and are acting under oath; yet it is proposed to leave the way open for the appointment as members of the commission and to advise the means of punishment of the very men whom it is proposed to punish. It seems to me that such a proposal is an absurdity; and I do not care to argue a proposition of that kind further.

Mr. BORAH. Mr. President, the Senator proceeds upon the theory that this bill will necessarily result in representatives of the mine operators or mine workers being appointed to the commission, whereas, as a matter of fact, it is simply left open to the appointing power.

Mr. SHIELDS. Mr. President, the Senator misinterprets my words.

Mr. BORAH. No; I do not misinterpret what the Senator has said.

Mr. SHIELDS. I do not mean any such thing. I have no want of confidence in the President.

Mr. BORAH. Then let us leave it to him.

Mr. SHIELDS. I have the very same confidence in the President that the Senator from Idaho has. The Senator from Idaho thought no Member of Congress should be appointed on the commission. I think it more proper that Members of Congress should be appointed than that coal miners and coal operators should be appointed, but the principle of putting men interested on such commissions and boards is what I am advocating more particularly. I do not believe the President would appoint representatives of the operators or miners, but if we make Members of Congress ineligible, and by an amendment to the House bill strike out the provision making the representatives of the miners and operators ineligible, we impliedly say they are eligible and that they should be appointed while a Member of Congress can not be trusted.

Mr. BORAH. Mr. President, the Senator is not ordinarily so illogical. The Congress must pass upon this matter finally; every Member of Congress will then be called upon to do his duty, and no Member of Congress will be excluded from the final judgment which he must give to the legislation which it is presumed will grow out of this measure. So Members of Congress are not excluded in the sense in which the Senator suggests at all. They are here to legislate and when the time comes to legislate they will legislate. So far, however, as the investigation is concerned it was thought wise to have an entirely separate advising and inquiring institution.

Mr. President, whether or not this bill shall ever amount to anything at all will depend entirely upon the personnel of the

commission. If the commission shall be constituted, as commissions ordinarily are, of political accidents and those who have nothing else to do, it will amount to nothing, and if such a thing as that should happen I should be very glad to introduce a measure here to repeal the entire law. The entire responsibility in making a success of this measure after it shall leave the hands of Congress will depend upon the President of the United States and upon the selections which he shall make for the commission. Therefore I desire, Mr. President, to leave the matter entirely to him and to place the complete responsibility upon him, and that is, as I understand, as he desires it to be.

Mr. REED of Missouri. Mr. President, I have been trying to give this bill such attention as has been possible with the legislative hopper full to overflowing. I have the highest respect for any opinion expressed by the Senator from Idaho. When he enunciates a proposition I find myself inclining to go that way because of the regard I have for his judgment, his patriotism, and his devotion to his work in the Senate. I am not prepared to say at this moment that I may not finally induce myself to vote for this measure, but I think we ought to discuss it very frankly here and see whether after all there is anything to be accomplished by this bill.

To begin with, we have to-day an immediate pressing emergency, and that is the thing we ought to deal with. The pending bill does not undertake to deal with that emergency; it will not produce a single ton of coal at the mines or at the furnaces. It relates wholly to the future. It contemplates an investigation which, under the terms of the bill, may not be concluded for five months. The pressing forward of the bill at this time, therefore, does not meet the present difficulty; and it might just as well be laid aside until next November as any other bill I know of.

What we ought to be doing to-day, what the administration ought to be doing to-day, is to take the necessary steps to open these mines to-morrow, and not to investigate a question and report a year or five months—the term named in the bill—from this day.

So far as investigation is concerned, it must relate to future action which lies considerably in the distance. It may be of benefit then, when five or six months from now we come to consider the recommendations of a commission; but it does not, I repeat, solve the difficulties of the hour. So let us not, as we approach the consideration of this bill, deceive ourselves for a moment with the thought that it is going to do any good at the present time. Indeed, I fear it may do harm, because it will lead the public to believe something is being done when nothing is being done, and because it will be in effect a statement to the mine owners and the mine workers that Congress proposes to dillydally with this matter, and let five or six months pass while it is investigating. This may be regarded by both sides as in effect a continuance of the case, whereas the possibility of an immediate judgment might be much more effective.

In fact, there are many indications that the acuteness of the situation may be greatly ameliorated, if, indeed, not brought to an end before the end of the five-month period and the report of the commission.

Indeed, I am informed that the strike of bituminous miners has been settled and that the mines will resume operation and be in full blast within two or three days. This is a testimonial to the good sense, judgment, and patriotism of both the miners and the operators. I trust and believe this spirit soon will spread to the anthracite field. In that case much of the criticism now being indulged in will be gladly withdrawn. No one more than myself will rejoice in such an exhibition of good judgment on the part of those directly concerned. It will hearten all friends of organized labor and will restore confidence in the ability of labor and capital to adjust their disputes without governmental coercion.

Now, Mr. President, coming to the terms of the bill itself, I desire to call attention to a few propositions.

It is proposed to investigate the ownership and title of the mines.

Mr. President, that question has been investigated time and again. The record is complete as to the ownership of the great anthracite mines. That record has been written in a half dozen investigations, and, while I am not sure, I think it has been investigated, among other bodies, by the Federal Trade Commission. I am quite sure that during the war, at the time the mines were taken over, the Government gathered this data.

As to the ownership of the bituminous coal mines, we know all that is necessary to-day. To begin with, the supply of bituminous coal is so great and its deposits are so diversified that the ascertainment of the actual or particular ownership of each tract is utterly immaterial. It is estimated that more than half of the coal of the world belongs to the United States and that these deposits of bituminous coal aggregate between three and four trillion tons. The figures I am giving are taken from the testimony given by the experts of the Geological Survey in 1921, and the particular persons testifying were Dr. George Otis Smith, the director, and F. G. Tryon. Coal is so widely scattered that the center of deposits is, I think, in Indiana.

Coal exists under millions of acres of land readily accessible to railway and water transportation. It is frequently located on hillsides, from which it outcrops, and can be readily worked by individual miners, and even by farmers who own the land or who may rent the land. Vast deposits are owned by the Federal Government, and other large deposits are owned by small landowners. Right there, when we speak of acquiring coal, let me call attention to the fact that the Federal Government now owns vast deposits of coal upon the public lands.

The evidence taken—and I am referring to evidence that was taken before the Committee on Manufactures a few months ago, the Senator from Wisconsin [Mr. LA FOLLETTE] presiding—failed to disclose any attempt to control or monopolize the production of bituminous coal. The further fact was shown that additional new mines can be readily opened by individual owners of coal lands, and that these mines are frequently opened in great numbers. The number of mines has increased from 7,776 in the year 1913 to over 11,000 in the year 1920. These 11,000 mines are worked by over 7,000 operators. Most of them, of course, are small. The readiness with which new mines can be opened is shown by the fact that during the coal panic of 1920 more than 1,000 new mines were opened along the line of the Pennsylvania Railroad alone because of the high prices which enabled the farmers themselves to get out coal from these small mines. The principal mines have the best equipment in the world. The productive capacity of the mines is now, and for years has been, in excess of the demand. The largest production of coal ever attained was in 1918, when it reached a total of 580,000,000 tons. This created a storage of 60,000,000 tons, which, even under intense war activities, piled up and reached the amount I have stated. By actual performance for a given period, the mines, without reaching their capacity, have produced at the rate of 700,000,000 a year. Reliable authorities estimate the capacity of the mines now opened, running at full time, in excess of 800,000,000 tons per year. The labor supply is not only sufficient but probably excessive. There are from 150,000 to 200,000 more men in the industry than the industry would need if it were stabilized, as Mr. Smith said; and he was a stabilization advocate, although how he was going to stabilize it he did not tell anybody.

Mr. BORAH. Mr. President, what is the date of those figures?

Mr. REED of Missouri. These figures were given at the hearing before the Committee on Manufactures. I will ask the Senator from Wisconsin when that committee convened. It was about six months ago, was it not?

Mr. LA FOLLETTE. The bill was introduced on the 12th of January, shortly before the close of the last Congress, and the report was made to the Senate as a result of that investigation in February, about 10 days before the final adjournment.

Mr. REED of Missouri. I have here the hearings, and from those I get the accurate date. The hearings began on January 15, 1921, so that the figures are recent. There has been no material change in these figures since, except that we have had this great coal strike.

Mr. President, there are the figures already given, and given from governmental sources, and we need no commission to find them out. There are two men, the two men who testified before the committee, who are the experts of the Government in the Geological Survey, who can verify these figures in two hours' time, so that we do not need to consume any length of time to ascertain what the coal production is, the number of mines, or the number of owners. All that material which is called for in the clause to which I have spoken is here at hand, and careful examination brought it out.

Mr. BORAH. Mr. President, I understand that, and I apprehend that this commission will not go over that ground again.

Mr. REED of Missouri. If the commission are not to go over the ground, then we already have the facts, and yet the resolution says that they shall examine into them. I agree with what the Senator means; they will not take much time at it; they will get it directly; yet if we already have facts, then we will gain nothing by submitting the matter to a commission except delay, and Congress will evade its responsibility, or may evade its responsibility during that period of delay, saying: "We are waiting for an investigation." It being conceded that we have the facts so readily accessible that any Senator can

get them, that they are already in these records, it would not seem that we need take any time to investigate those facts.

I come now to the other provisions of the bill. They are as follows:

The proposed commission is directed to investigate—

The causes which from time to time induce strikes.

Mr. President, is there anybody who is in any doubt about the causes that produce strikes? If there is any doubt, all you have to do is to go back and read the reports of about a half dozen investigating committees. Congress exhaustively investigated the coal strike in Colorado, where there was a great deal of hardship and some deaths. We have had two or three investigations into the West Virginia field. We know what the trouble is down there. We know what the trouble is in the present strike. It is a question of wages and contracts.

If there is any doubt remaining as to the causes for this strike, a committee of this body in four or five days' time can call in the producers of coal and the miners of coal and find out what the cause of the dispute is. The President is presumptively in possession of the facts, for he has already delivered a message to Congress. But if we do not know, I repeat that in four or five days' time any committee of this body can get at the reasons for this strike, and they will be found to be largely questions over wages and over the duration of the contract that is to be signed.

Mr. President, what is the use of appointing a commission to investigate a thing which can be found out in five days, and get facts which are already before this body? I unhesitatingly say, and I say it with all due respect, that no commission appointed will do this work of investigating better than any committee of the Senate, if we need any further investigation.

This strike could be settled to-morrow morning in about 15 minutes' time if the owners of the mines would agree to sign up the contracts. It could be settled in the same length of time if the mine workers would agree to the terms of the mine owners. Two sets of gentlemen sit there and disagree about matters which, compared with the general interest of the American Republic, are inconsequential. All that any stubborn man on either side wants is to know that we are going to investigate for five months, and give him, upon the one hand, five months to try and starve the miners out, and, upon the other hand, to give the miners five months to freeze the American people, so that an intolerable condition will be presented, and the public will demand that one or the other shall yield; and each hopes the public will decide in his favor. That is all there is to this question, absolutely all.

Now we are coming to a matter which might properly go before a commission and might require time, and that is this provision:

Said commission shall also submit recommendations relative to—
(a) Standardizing the mines upon the basis of their economic productive capacity, and regarding the closing down of mines which, by reason of their natural limitations, fall below the standard.

I say that would be a matter proper to be taken up by a commission, provided we concede that the principle is one with which Congress has any right to deal.

Let us see. Suppose we take the view entertained by some—the extremest view I have heard presented—that the Congress of the United States has the authority to declare that mines are charged with a public use, and that being charged with a public use they become subject to governmental regulation.

I do not believe that Congress possesses any such power. If it possesses any such power, we must look for that power to the commerce clause of the Constitution, and if the mere right to regulate commerce between the States and foreign parts carries with it the right to go into the several States and to seize and take over the control of private property held by citizens of those States, then the power under the commerce clause can be so stretched that Congress can take possession of every dollar of property in the United States of America, thereby State socialism would then appear in its most aggravated form, and all that Congress would have to do to wipe out private property would be to pass a resolution.

Is it the conception of Members of this body that the commerce clause can be stretched to that extent? If it can, then in truth the right of every State can be expunged, and the right of every citizen who owns private property can be abrogated, and, under the powers granted to Congress to control commerce between the States and with foreign parts, we may, by a simple resolution of Congress, set up an oligarchy which will control all private property within the country, and establish upon the ruins of this Republic the greatest State socialism ever dreamed of in the brain of a doctrinaire. I take it that doctrine will hardly be accepted as sound.

What power to do we have then? Does the power to control commerce go to the extent of the Government producing the thing that is to go into commerce? If so, I repeat, every farm in the United States could be seized, and every factory as well.

Neither can you base this power on the ground that the thing dealt with is a great necessity, for that leads you again into a wilderness of difficulty. Is coal a necessity? All will admit it. Is it necessary to transportation? All will admit it. But so likewise is steel equally necessary to transportation, for every engine and every car is dependent upon the production of steel and could not exist except the steel had been produced.

Carrying such logic a little further, and discussing the argument of necessity, the ties which go into the roadbed and support the rails are equally a necessity, for you can not run an engine without tracks, and you can not lay tracks without ties. Thus, if we are to enter upon this field upon the ground that coal is a necessity, there is no end to the difficulty.

As coal is a necessity to keep the body warm, so are wheat and corn and meats necessities to keep the body alive, and if Congress, under the commerce clause, has the power to seize the coal mines, it has equally the power to seize the farms of this country, and to declare them charged with a public use, and to argue that the great law of necessity compels their inclusion.

We can carry this a step further, and say that labor is a necessity; that the world could not live without labor for even a few days of time, and that labor being a necessity and being an instrumentality of commerce, therefore Congress has the power to take labor into its keeping and under its domination and control, and compel labor to work whether it desires to or not.

The trouble with both of these propositions is that, equally in principle, although not in degree, they violate the fundamentals of our governmental structure, for the right to the protection of private property against the Government, as well as against the individual, has always been, save as to the narrow limitations which have been heretofore fixed in the common law, regarded as inviolable. In like manner the right of the citizen to work or not to work has been regarded as inviolable.

If you strike down that clause with reference to property and say that property can be taken over, held, and controlled by the Government and its private attributes annihilated, you can do the same thing with reference to human beings, for each is governed by the same principle, although, of course, one would readily concede that the enormity of taking charge of the individual and compelling him to work is much greater than that of the taking of property, however bad that may be.

So when we talk about standardizing the mines of the country, what do we mean by the term? Are we to write something on a piece of paper and say that mines Nos. 1 to 100 are hereby standardized as mines of class A, and mines from 100 to 1,000 are hereby declared to be mines of the class B type, and simply standardize them upon paper, which, of course, the Government could do, and stop at that point? That, Mr. President, would be as idle a thing as the Government could indulge in.

Standardization means nothing unless it is proposed to take some step beyond the mere classification of the mines. Now, what is the step that is contemplated? I do not know, but I think I find it in the assertion of a theory which the Chief of the Geological Survey, Mr. Smith, made in his testimony. He declared there were too many mines and a lot of them ought to be closed up, that there were too many miners and a lot of them ought to be sent into other industries, and that he was in favor of regulating the production of coal in the country. If a thing of that kind is proposed, I insist that it can not be done under the Constitution of the United States, and that it ought not to be done even if the Constitution permitted it.

What right has the Federal Government to say to me, if I own 160 acres of land under which coal lies, that I can not take my pick and shovel and dig that coal from the ground and burn it in my stove in my kitchen? I have that right. By what authority will the United States say that I can not take my hired man on the farm and have him help me dig the coal and sell part of my coal to my neighbor? And, if I can proceed that far in trade, who is to deny me the right to dig coal from the ground and have 100 or 1,000 men to help, and to sell this product of nature which I have brought from the bosom of the earth to other free citizens who have the right to buy it, thank God, still the right to buy it despite any governmental interference?

What, then, are we to do by the proposed standardization? Go through the business of having some agents go out at great expense, measure up the mines, and say "This mine we hereby classify as class A, B, C, or D" and do nothing more. Are we to proceed to the practical and unconstitutional step of trying to close that mine and deny its production access to the market? When that is attempted, sir, there will be created in the

end a coal monopoly. There will be denied to the people of the United States the highest competitive market in the world, for the evidence which we took demonstrated that outside of certain artificial interferences which can be handled by law, when there were no strikes and no lockouts, there were 11,000 mines in the country producing coal, and a superabundance of labor. If there is, I say, any combination between the producers of the coal to control the market, that combination should be reached at the point of the crime and not by going back and destroying the source of supply.

Create a commission, create a board, create a governmental tribunal to limit in time the production of coal, and just as certainly as water runs down hill, just as certainly as night follows the disappearance of the sun behind the western horizon, just as certainly as the eternal ceaseless vigilance of a vested interest will gain its end while the people sleep, just so certainly will that commission or board ultimately come under the control of those who are producing the coal in the country. The great competitive field will have been destroyed, and a few gentlemen will sit here in Washington, appointed by a President or somebody else, and in the end the attorneys and counselors and representatives of the great invested capital that is vitally concerned will have their way.

Now, if we are going to make this Government a general socialism, let us do it in the open. Let us say it is going to be a socialism and that everybody has to work so many hours. Let us start right there. Then we will not have any more strikes. Let us say that everybody has to work, and if he has to work there will not be any use in having any property, and consequently we can wipe out capital. When we say that, let us say we have written the epitaph of Anglo-Saxon greatness and we have set up a tombstone over the grave of the greatest Republic ever framed by men under the providence of God.

Standardize mines? We had some standardization of mines by governmental interference during the war. I had occasion to investigate the attempt of one man to control the law of supply and demand and distribution. I saw that one man and his board send millions of tons more of coal to the Northwest than the Northwest could consume and leave the ships without bunker coal to move from American ports. I saw that same organization which was undertaking to run the coal business, having taken it out of the hands of those who had grown up in it and knew everything about it, close down every factory and stop every wheel south of the Ohio River and east of the Mississippi for 14 days in order that they might relieve the embargo or the congestion of the railroads, stopping the mills when we were engaged in that great war. Instead of allowing them to turn out their materials they stopped all the busy hands, closed the churches on Sunday and opened the moving pictures. I say they interfered with the distribution of coal throughout the country.

Wisely they said, "We must get all the coal to the Northwest," and then wisely they proceeded to shove coal in there so fast that they had such a congestion of cars in some of the great trunk lines through which they had to pass that it took weeks to bring about relief. Wisely they said there was no sense of sending coal on long hauls from Illinois up to Minnesota, and they stopped that. Then they discovered they were hauling trains of loaded cars coming from the North and hauling trains of empties back to the North. Wisely they classified the mines and they put the same price for coal at first at all the mines, I believe; at least if that is not literally true, it is almost substantially true. So that the mine which had an 11-foot vein and could get its coal out for almost nothing was permitted to charge the same price as the mine having an 18-inch vein, with the result that the mine with the 18-inch vein could not run at all; and yet those two mines had competed in the world before without any governmental regulation. How had they competed?

The mine with the 18-inch vein of coal had sold that coal for from 50 to 150 per cent higher than the other coal, and why? Because it was fitted for special uses.

Governmental interference? Governmental classification? Let me tell you, sir, the kind of classification that works a good result and the only kind. It is when the manager of a great factory, consuming enormous quantities of coal, has figured on the coal supply of the country and has found the place where he can get the kind of coal he needs at the lowest price. That is the kind of selection, that is the kind of classification that the man makes who knows his business and who every day has to study his business and who, if he makes a mistake, loses money in his enterprise.

Mr. SUTHERLAND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from West Virginia?

Mr. REED of Missouri. I yield.

Mr. SUTHERLAND. I call the Senator's attention to the fact that the standardization with reference to the working men goes further than the standardization of the hours of work. As stated in paragraph (b), lines 17 and 18, it suggests the standardization also as far as practicable of the amount of work a man shall perform for a reasonable wage.

Mr. REED of Missouri. I am coming to that in a moment, but I want to deal with the other question first. I have taken time here when I had no idea of talking about the bill. I have had something to do with looking into the coal business.

When in those days they stopped the mills they stopped even mills operated by water power. The man and his board said it was not fair for one to run a waterwheel when another could not burn coal. They stopped the factory that had coal as well as the factory that did not have coal, which latter, of course, would be obliged to stop itself.

Now, suppose, left as it is, what is the situation? Gradually the coal business has grown up just as the country has grown. Just as a baby has a small heart, small arteries, small veins, and tiny capillaries, just as that circulatory system extends and grows naturally as the body grows, so has the coal business as well as most other enterprises of our country gradually expanded. Men mined the coal, and then there came into existence naturally, as a result of economic conditions, a gentleman who bought the coal at wholesale because he could distribute it better to the retailer than the retailer could direct from the mine. So that grew up as a natural thing. Then there would be a community which would need one man with a coal wagon and he would figure around as to the best place to buy his coal, whether of wholesaler A or wholesaler B, or perhaps from the mines themselves.

After a while the community would grow and there would come to be two coal distributers. So, without multiplying the illustration the business gradually expanded until to-day, taking the city of Washington as an example, there are a given number of wholesale dealers. If there were one too many some one of them would have to go out of business. The wholesale trade fits the retail trade and the retail trade fits the demand of the people. If there were many more than were needed some would have to go out of business. So this system of the production and distribution of coal is now conducted not by one board sitting in Washington using its limited intelligence and experience, but it is being conducted by hundreds and thousands of men who are scattered over the United States, each of them compelled to study and to know, at the peril of bankruptcy, the exact demands of his community and to respond to those demands.

Mr. SUTHERLAND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from West Virginia?

Mr. REED of Missouri. I yield.

Mr. SUTHERLAND. If I may interrupt the Senator for just a moment at that point I desire to call his attention to the fact that here in Washington there are a dozen different kinds of bituminous coal which are constantly sold in order to suit the varying demands of consumption. In New England there are more than 20 different kinds and sizes of coal which are sold, and on the Chicago market there are between 50 and 60 different kinds and sizes of bituminous coal which are constantly sold in order to suit the different demands of consumption in that city, each representing a shade of difference in character and quality, and also a shade of difference in price.

Mr. BORAH. On all of which the price has raised about four times in the last six months.

Mr. REED of Missouri. Very well. Now I am coming to the question raised by the Senator in a moment. I do not intend to avoid it. The right thing to do if a man has a disease is not to chop his head off. If he has a corn the wise procedure is to locate the corn. If he has been eating too much food and has indigestion, the physician does not merely get a broadax and begin to carve him up on a block, but he locates the trouble, and when the trouble is located it is treated. The commonest mistake we make here—and we have made it many times in our legislation—is to find that something is wrong and then, instead of putting our finger upon the evil, we proceed to destroy a system. The evil may be simply due to the incompetence or rascality or selfishness of one man or one group of men, but, because of that, we proceed to strike at the system instead of removing the individual.

I will not bother with many illustrations, for the case in hand is a good enough illustration. But I will cite one. Sometimes we find a man who, if the plumbing in his house gets out of order, thinks he has got to burn the house down and build

a new one, but a wise man under such circumstances will send for a plumber and hire a lawyer to watch the plumber. [Laughter.]

Now, here is the situation: There is an unlimited supply of coal, an abundant supply of labor, a perfect system of distribution, so far as its mechanics are concerned; and yet the people are without coal, or they soon will be. Now, let us deal with that question alone, and deal with the question of prices a little later.

What is the reason we have not any coal? The men are not digging it. What has that got to do with standardization? It has got just about as much to do with it as the question regarding the canals on the planet Mars. The thing to-day is to start those men to work by some means. That, of course, involves the inquiry, What is the cause of their having stopped work? That is a question, I repeat, the answer to which, if it is not known now, can be ascertained in five days' time by the calendar. Let that fact be fixed, and then let us see whether or not there is a combination to restrain trade. There the Government can act; there the Government has power; there it can proceed. If there is a combination amongst the owners of the mines to restrain trade, no matter whether they are working it out through a wage decrease or through a wage restriction, or otherwise, they are amenable to the law, and the Department of Justice can very speedily convince them that they stand within the shadow of the penitentiary if they are engaged in such a combination.

If there is a combination among the mine workers to restrain trade and to freeze the people of the United States so that they will demand the opening of these mines on any terms whatsoever; if labor has so far forgotten itself as to be willing to bring ruin upon the country in the hope of reaping immense profits in the future, then let us know that fact. I repeat, it may be ascertained in four or five days. Then the necessary laws can be passed, and passed quickly, to deal with that situation.

Mr. President, I have stood by union labor in all of my public and my private life. I believe that union labor has done for the world immense good. It has raised the standard of living not only for union labor but for nonunion labor. And I have endeavored to second its efforts; but I say to union labor, and I say it out of a kindly sentiment, that if it pursues its present course to the point where factories are closed for want of coal, it will turn out of employment millions of men and women who themselves belong to organized labor; it will discover that the children and the wives of organized labor go cold and hungry just as the other members of the community go cold or hungry; it will discover, if this great wrong is done, that it will create a sentiment in this country which will destroy the effectiveness of organized labor, for to pursue a policy of keeping these mines closed much longer means privation and death to many of our people. In an economic structure which has now become so closely knit together as to be interdependent, in an economic structure where we have learned to depend upon certain productive forces for certain necessities, every man engaged in such a vocation or business owes some duty to the public. If a misguided policy is to be pursued stubbornly by the mine owners or by the mine laborers, they, of course, will force a condition where the people of the country, in self-defense, will take whatsoever action is necessary, even to the change of their Constitution and the character of their Government. I do not believe that we have reached that day yet; and against it as an evil day I am protesting and demanding that Congress shall act now within the limits of its power to act. That action means a change in our antitrust laws.

Mr. President, I have gotten away from the bill in a sense, although I have been discussing fundamentals which the provisions of this bill must affect.

The bill provides that the commission shall submit recommendations relative to—

(b) Standardizing the cost of living for mine workers and the living conditions which must be supplied or afforded in order to surround the workmen with reasonable comforts, and standardizing also, as far as practicable, the amount of work a man shall perform for a reasonable wage, recognizing the value and effect of such surroundings in respect to their efficiency.

Mr. President, what does that language mean? Again I inquire, does it mean anything at all or does it mean everything? If it means that this commission shall lay down a rule and express an opinion to the effect that a miner ought to have so much beef a day, and a miner ought to have so much bread and potatoes a day, and a miner ought to have a house with so many rooms to live in, and so forth, then it means nothing. It means no more than if the same distinguished commission were to standardize the kind of living a Senator should have, and say that we all ought to have a palace on "The Avenue of the Presidents," or that we ought to be content with a log cabin over in Maryland. We would all go and get the kind of houses our wives told us we had to have, and we would snap our fingers in the faces of any commission. We would have to. The women would make us. These men who work in the mines have just the same rights and just the same degree of intelligence. They have a right to take their wives and their children into the kind of houses they feel they can hire or buy or build, and it is nobody's business, it is no commission's business. If you had a commission with 50 men on it, there would not be one of them who could pick out a house in the whole world that would suit anybody but himself.

Standardization! What are you going to do with your standardization? Are you going to enforce it upon these people? Now you come to something practical. Unless you force it upon them, they will all do exactly as they please, and they ought to do as they please. It is nobody's business. If one of them sees fit to build a shack on a hillside and to live there and to save his money, as our ancestors saved theirs when they lived in log cabins, that is his business. If he sees fit to take every dollar he makes and build a fine house and put in a fine piano and live up his money, and, as Bob Ingersoll said, spend it as though the money grew on trees and he owned the forests of the world, that is his business. If we were in Russia we might standardize these people. We might say: "Move into that particular house, and live there"; but this is not Russia, and we are not going to tell them the houses they shall live in.

More than that, whenever it comes about in this country that the Government can tell me that I must live in a particular house and eat a particular kind of food, the only difference between me and an African slave is a matter of color.

Here is a mine in Pennsylvania, another in West Virginia, another in Missouri. The standards of living of the miners in these three States differ radically. There are as many different general standards, speaking in a general way, as there are places; and there are as many individual standards as there are individual men with brains to think and with hearts to act and to live up to the principles that God planted in every free man's breast to do as he pleases as long as he does not create a public nuisance or impinge upon the private rights of his fellow citizens.

Standardization! God grant there never will be a standardization of human brains. God grant there never will be a standardization of human ambition. God grant there never shall be a standardization of human genius. Better a million failures, better a million wrecks, if occasionally some genius shall take wings and blaze his way to the sun. Better a million failures than the dead calm of a Dead Sea, where all the waves lie still and there is no life within the waters.

What I want is everything else but standardization—individuality; the right of every man with the chisel of his own industry to carve in the marble of fate his own destiny; the right of every man to dream his dream, and to paint on the landscape of his brain the pictures which he admires and which he loves; to fight the good fight, taking the chances of defeat, gathering to himself the guerdon of victory; to stand on the bit of soil that he owns or rents and say: "I am a freeman. No government can lay its hand on me so long as I observe the laws of the land. No man can push me from this foot of soil, whether he be President or constable. Beneath this roof I am still a king, the master of my fate, the monarch of myself." Standardization!

Then, we are going to standardize a day's labor; that is, we are to make a recommendation about it. Of course, it is not obligatory; but why inquire how much strychnine it takes to kill a man, and appoint a commission on the subject, unless you have a man to whom to administer it? Why have a long and expensive investigation to discover to what virtuous use you can put a rattlesnake unless you intend to put the rattlesnake to doing business of some kind? If you know in advance that he is a snake with crooked fangs filled with deadly poison, you do not need to spend any time investigating him. The thing to do is to kill him with the first club that comes to hand.

Now let us look at the next proposition—standardizing the cost of living of mine workers. Let us give a little attention to that.

Standardizing the cost of living! I see here my friend from Arkansas [Mr. ROBINSON]. He lives in a great agricultural State. There are not many large cities there, but what there are are mighty fine. A man could go down into one of the small towns of Arkansas and rent a better house for $10 a month than he could rent in New York City for $150 a month, I apprehend.

His wife can buy more vegetables from a neighboring farmer for 25 cents than you can get down here in the city market for $4.50. I need not pursue that illustration. The cost of living

in communities in our own State differs, and it differs in various parts of the country, as much as 500 to 600 per cent. There are places in this country where a man can actually live and live fairly well on the car fares that he has to pay in the city of New York in going to and from his work. So that you propose to standardize that which can not be standardized. What relation does the life of a plainsman out in western Texas—the great State my friend here comes from—bear to life in one of the cubby-holes on the top of one of those roosts they have down in New York City, and that they rent to you by the square inch? What relation does the work of a man in a mine in Texas bear to the work of a man in a mine, perhaps, in Pennsylvania? You might as well talk about standardizing the brains of men. Some of them carry within the temples of their brains empires, and some of them do not carry anything at all except an instinct which leads them to the table three times a day.

You might as well talk about standardizing lawyers, and the kind of houses lawyers should live in. Why not? Yet, I would give more for the opinion of my friend from Idaho [Mr. BORAH] on any question of law or fact, delivered out of hand, without a moment's consideration, than I would for the opinions of hundreds of lawyers I know after they had read all the authorities and examined all the books, and were unable to understand anything they had read.

They standardized things in one country in this world once, in Egypt. I understand they had some laws over there under which if any artist, drawing the figure of a man, departed from the standardized rules which ancestors had laid down, they took the aspiring artist out and cut his head off, or otherwise disposed of him. The result was that Egypt progressed to the point of angular lines drawn on a flat surface, and there art in Egypt died. They standardized dancing; they standardized everything the people did, until finally they standardized the brick over there, and the Israelites moved out. What you want is variation, not standardization.

Now, we are going to standardize the living conditions. What about the old doctrine of castle? Quoting the phrase used so many times in debate, the words of a great English statesman, the right of castle is for the poor as well as the great. The cotter can stand in the door of his habitation. The wind may enter the thatched roof, and the rain may enter, but the King of England may not enter.

Are they to tell these workingmen how much bacon they can have for breakfast? They have a right to have a rasher or a side of bacon, just as their appetite demands and as their pocketbook will afford. Imagine a commission in Washington sitting down with a pencil and figuring out how many beans a man ought to be allowed to have who has a family of five, taking into account the appetites of some of his children. What a difficulty is presented. One man has a family of five hale, hearty children, with appetites like Gargantua at birth, and another chap has some anemic and dyspeptic offspring. The standard will be fixed. One crowd will go hungry and the other will be overfed.

In the name of God, have we come to this, that we think a human being has not sense enough to feed his own family, but has to have some wise men in Washington, some politicians out of a job, to tell this American citizen what he can eat and how he ought to feed his offspring? The more I read this bill the more I think I am against it.

We are to standardize the cost of living, so as to surround the workman with reasonable comforts. How would it be if we let this man make a bargain for himself for a decent day's wage, and then let him go out and rent a house to suit himself and see what comforts he could afford? That will not do. Congress is going to tell him what he ought to have.

What do we know about it? Some of us had to earn our livings when we were young; some of us did not. Some of us were born to wealth; some of use were born to poverty. Every blessed one of us who was born to poverty has been trying ever since to get out of that class as fast as he could, and all the way along we have had the sweet and blessed privilege of taking the money we earned and spending it as we thought best, and not proceeding under the direction of some superior creatures who get elected to Congress.

But if we are going to standardize the miner, why should we not standardize the farmer? What is the sense of leaving the farmer out? He is quite as important as the miner. Why should we not pass a law to standardize everybody? There are some people I would like to have the privilege of standardizing. I have a few political enemies I would like to standardize about day after to-morrow. It would save me a lot of trouble. I would standardize them in such shape that they would not disturb me for some time to come.

The trouble with this bill is that the whole conception of it is wrong. I know it will pass. If you put Congress up against any serious or stern duty, and give it the option of performing that duty or giving the American people a bottle of soothing sirup to allay their temporary discontent, about 90 per cent of the Congressmen will be found with a bottle of the sirup in their pockets, and a spoon ready to dose it out to their constituents. In five months' time, in some way or other, this thing will have been solved, and we will either all be frozen to death, and hence not here to complain, or everybody will have gotten some fuel in some way, and we will have survived, and a little bit later the summer's sun will be coming down, the snows and frosts of winter will be disappearing, the flowers will be blooming once more upon the earth, the blue grass will be peeping out from beneath the snow drifts, the birds will be singing, the campaign will be over, and there will be nothing to solve. We will go right on in some way. Let us be men and face this issue.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. REED of Pennsylvania in the chair). Does the Senator from Missouri yield to the Senator from Idaho?

Mr. REED of Missouri. I yield.

Mr. BORAH. If the Senator or anyone else in the Chamber has any bill or measure by which to face this issue, the Senator from Idaho will lay aside the pending bill for its consideration.

Mr. REED of Missouri. I am leading up to that, approaching by my own "standardized" way. I appreciate the Senator's position. I want nothing I have said to be taken as an unkind criticism of him or of this effort to work something out of a very difficult problem. Let me pursue the bill a minute, and then I shall very frankly say what I think ought to be done.

They are to standardize the cost of living in order to surround the workman with reasonable comforts. What are reasonable comforts? One man thinks one thing is reasonable; another thinks it is quite unreasonable. I have in mind one gentleman who would not have thought he had reasonable comforts at all if he did not have at least five or six changes of neckties for every day, and if he had been on this board, or should be put on this board to-day, I have no doubt that the largest item in the standardized living of these miners would be a choice variegated assortment of clothing, like Joseph's coat of many, many colors. There is nothing to be gotten by that sort of legislation.

There is something, but only in the roughest way, I think, in standardizing the basis of arriving at the overhead cost, because the rule in regard to one mine is not the rule in regard to another. These mines are not like blocks of marble in the same quarry which you can shape by substantially the same rules and measures. Mines differ more than agriculture differs.

Now we come to the question of the advisability of nationalizing the coal industry. Of course, it will not be argued in this Chamber that we can nationalize the coal industry unless we change the Constitution of the United States. If we change the Constitution of the United States to take over the coal industry, why not change it so as to control the production of steel, equally a great necessity; or copper, almost equally a great necessity; or lead and zinc? Finally, why not change it so as to enable us to control the railroads, the telegraph, the telephones, and, at last, the farms? Why not plunge at once into the ocean of socialism?

If we are to front the question of the advisability of taking over the mines, let us be men and front it ourselves. What commission do we need? Are there not as good brains in this body as we will get on a commission the members of which are to serve for $7,500 a year? If there is superior talent, technical talent, which we need to advise us, we have the right to call it all before us and to obtain the opinions of those wise and experienced men. We need no commission for that.

I want to speak of this matter with all the kindness in the world for the President. I know the President has had a very difficult task before him. It is one which concerns a vast multitude of men, and their rights must be regarded and considered. It involves, on the other hand, large aggregations of capital and many small aggregations of capital. But it seems to me the President of the United States could have called these people before him, ascertained the points of their difference, if indeed it is the business of a President to do it at all. He took that course, and hence I indicate that course. Then, if he found that the mine owners were the wrongdoers, he should have said to them, "I demand that you change that rule," and I think they would have changed it. If he found it was merely an arbitrary and unwarranted action on the part of the men,

he should have said to them, "I will open these mines. If it takes every soldier of the United States Army to do it, I will open them," and if his decision was a just decision I believe it would have been obeyed.

Now, my friend who introduced the bill asked me what the remedy was. If it is proposed to free the people of the United States to-day from a nation-wide combination, then we have to amend the antitrust act. They are forcing us to do it. I voted for the amendment which exempted union labor from the provisions of the Sherman Act, and I hope the day will never come when they compel the lawmaking bodies of the country to include labor combinations as conspiracies within the meaning of that act. I say to them as their friend that if they pursue this to the point where they close the mills in the country and where children go supperless to bed, they will compel the kind of action of which I have spoken. I trust it will never come, but it will come as surely as there is a God in heaven if the people are put to this extremity. If, on the other hand, their case is a just one, the President ought to say to the mine owners to yield and give them what they ask.

There is a stubborn persistence on either side, but when it is fraught with the frightful consequences that confront us now it is something the American people will not tolerate, and the better elements of union labor will not tolerate it. For, I say to those who pay me the compliment of their attention, if the coal supply is kept back for a few weeks more, all the great factories of the United States will be closed; and when they close the union labor employed in them will go supperless to bed with the rest of the people, will go shivering to their couches with the rest of the people, and when that condition comes the organization will have destroyed itself. Yet these organizations, notwithstanding the mistakes they have made, have been of great benefit to humanity, and I do not want to see them destroyed. So far as I am concerned, if the strike is not settled by the President or by those involved, I am ready to vote for a law that will open the mines—and I say that as a friend of union labor, as good a friend as it ever had on this floor. I am sounding the warning, and doing it full and fair. I am but one man here, but I know there are others here who feel as I do and who are prepared to act if the question is not adjusted.

Mr. President, the pending bill is a bottle of soothing sirup that is not to take effect until five months from now, and therefore I see no virtue in it.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Tennessee [Mr. SHIELDS] to the amendment of the committee.

Mr. MCNARY. Mr. President, I suggest the absence of a quorum.

Mr. HEFLIN. I rose to make the same suggestion.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	New	Smoot
Borah	Jones, N. Mex.	Nicholson	Stanfield
Brandegee	Jones, Wash.	Norbeck	Stanley
Broussard	Kellogg	Oddie	Sterling
Capper	Kendrick	Pittman	Sutherland
Curtis	Keyes	Ransdell	Townsend
Dial	La Follette	Rawson	Trammell
Dillingham	Lenroot	Reed, Mo.	Underwood
Ernst	McCumber	Reed, Pa.	Walsh, Mass.
Fletcher	McKellar	Robinson	Walsh, Mont.
Gooding	McNary	Sheppard	Warren
Hale	Myers	Shields	Watson, Ga.
Heflin	Nelson	Shortridge	Watson, Ind.

The PRESIDING OFFICER. Fifty-two Senators have answered to their names. There is a quorum present.

Mr. TOWNSEND. Mr. President, I desire to be heard very briefly upon the bill before the Senate. I think everybody must realize that we are now in a most serious situation all over the country. It is not a question of what we would like to do, but what we can do and what we ought to do in an emergency. The bill offered by the committee, now before the Senate, is not a bill proposing legislation, and does not assume to settle the questions which are before us, but is simply an authorization for a commission, supposedly of high-grade gentlemen, in whom the whole country would have confidence, for any other commission would be an idle thing; its efficiency is dependent almost entirely upon its personnel.

Since I have been a Member of Congress I have introduced several bills having in view a similar object to that of the measure now pending.

Three times in the House of Representatives I introduced such a measure. One of those bills received long consideration by that body, but failed of a final vote because of the serious opposition to it of both capital and labor. The bills introduced by me were not confined simply to the subject of coal, however, but they applied to all disturbances or threatened disturbances affecting interstate commerce.

Action similar to that now proposed was employed by President Roosevelt at the time of the Homestead strike. Senators will remember that there was then grave difficulty, although its effect upon the country was not comparable to the possible effect of the condition which now exists; yet the President at that time, without authority of law, appointed a commission to investigate the strike. The membership of that commission was of so high a character that its findings commanded the respect of both capital and labor. It attempted merely to disclose the facts incident to the controversy in order that public sentiment might be properly informed as to the conditions which then existed. That is the object which is proposed to be accomplished by the pending measure.

It is true, as the Senator from Missouri [Mr. REED] has stated, that the bill now under consideration does not offer a direct and immediate solution of the present strike situation, although the character of the commission proposed to be created will possibly have some effect in that direction. However, I think that all anyone now hopes for is merely a solution which will be temporary in its nature and which will tend to relieve the public from the horrible and imminent danger of suffering from lack of food and fuel.

What Congress ought to do is to enact some legislation which would afford a reasonable method for the prevention of the strikes which periodically occur. The information which is ordered to be obtained by this bill will be helpful in the preparation and passage of legislation designed to meet conditions which may arise in the future. In others words, to prevent strikes.

Mr. President, I do not believe the Senators who have not recently traveled through the country understand just exactly what the frame of mind of the public is at the present time. There is a feeling that possibly there is a combination between the owners of the coal mines and their operatives or employees and also between the railroads and some of the men connected with them to encourage the existing disturbed conditions. I can not myself see how such a suggestion can apply with any great force to the railroad situation, but if the coal operators and operatives are interested in any way in refusing to consent to conditions that would make for a settlement, I can understand how they might possibly be able, by securing a greater price for coal after the markets are again opened and transportation is unimpeded, to recoup the losses which they have sustained and something besides. I understand, of course, the statements that are made relative to the attitude of the miners themselves; but the fact is, I am not informed as to the truth of such statements; I am not in a position where I can place the blame on either one of the parties to the dispute.

I do know, however, Mr. President, that the people are suffering; that the people are menaced with a condition which, to use the term of the Senator from Missouri, may mean revolution in this country, for with more coal deposits, as is admitted, than can be used in 5,000 years in this country, with a demand for coal existing everywhere as a result of what seems to be returning prosperity, with millions of men in the country ready to work, yet we seem to be paralyzed by two classes of men, limited in number, but in control of a great necessity of life.

Mr. President, as I have stated, I have no permanent solution for strikes to propose. I know they are wasteful; I know that economically they are bad; but I know of no sure remedy for them now. I desire to secure all the facts which may be obtained, in order that I may know how to provide the remedy. So, while we are trying to settle the strike situation, we ought to do everything we can to attain that object. We certainly can insist that men who want to work shall be permitted to do so. We can go that far; I have no doubt about that at all. However, while we are solving this temporary menacing situation we ought to be obtaining all the information possible that will help us to avoid such conditions in the future.

I realize that the pending bill is designed merely for the purpose of obtaining information by what I hope will be a commission that will command the respect of all the people in the country. It does not impose upon Congress the obligation of passing any particular kind of bill in the future. The proposed commission may recommend what it finds, but it will have to have its recommendations backed by the facts, and Congress must finally act, and it will act in the light of the facts. So, it seems to me, that the very least we can do at this time is to pass this bill and create the commission, hoping that it will be constituted of men of such high character that they will be uninfluenced by anything selfish and will command the respect of the whole country. When such a commission shall make its

report we will be better able to determine what remedy to provide against the recurrence of such a condition as now confronts us. So I am glad to be back here in time to be able to vote for the pending bill. I shall be glad to support any other measure which seems to me to be reasonable and just and which may look to the best possible settlement of existing conditions.

Mr. STANLEY. Mr. President, it is with profound regret that I fail to secure my own consent to support the bill introduced by the great Senator from Idaho [Mr. BORAH]. The bill is unlike its great author; it is distinctly, as I see it, a departure from the illustrious path in which he has trod. I know the disinterestedness of his motives; I appreciate his sincere desire to relieve a distressing situaton, acute enough to appall the most courageous statesman. I am, nevertheless, Mr. President, firmly convinced that wherein this bill is not necessary, wherein it involves a useless expenditure of money, it will inevitably delay, if it will not prevent, the end designed.

There can be but one hope in the heart of every rational patriot at this time touching the coal situation, and that is that the owners of the coal—the operators—and the miners will adjust their differences without delay and resume the production of what Lloyd-George has sagely called "life," for coal is the life of industry and it is essential to the physical existence of millions of men. I can not believe, Mr. President, and I do not believe that the inauguration of this inquiry will hasten the adjustment of these differences.

This bill provides, among other things, that the commission proposed to be created, and to be known as the United States coal commission, shall ascertain and report to the President and Congress—

* * * the ownership and titles of the mines, cost of production, profits realized by the operators or owners of said mines during the last 10 years, labor costs, wages paid, irregular production and suggestions as to the remedy for the same.

Why, Mr. President, there are probably more people now engaged in determining these matters than in digging coal. Every one of these questions has been the subject of repeated and exhaustive investigation.

I hold here in my hand a report from the Geological Survey. One report here gives the itemized production by States of every ton of coal produced in the United States from 1807 until 1918, inclusive, with totals. The Department of the Interior, the Geological Survey, the Census Bureau, have compiled volumes touching the ownership of these coal mines, the titles under which the mines are held, the acreage or the area of coal yet undeveloped but ascertained, the amount of coal produced per man, the cost per ton of producing it, the number of days lost by strikes or otherwise, and every other material detail of the business.

For instance, there is issued now a weekly statement of the estimated monthly production of coal by States, and estimates of the production of bituminous coal in 1919 and 1920 by States, with comparative figures for 1917 and 1918. The Department of the Interior issues statements giving the world's production of coal by countries, the amount that is coked, the amount used in beehive ovens and by-product ovens, the product of coke ovens, the product of by-product coke ovens, the maximum capacity of by-product ovens, the fuel required in industrial enterprises and for domestic purposes, the production of anthracite and bituminous coal. There are other elaborate statistics now prepared by the department and by experts, giving the amount of bituminous coal in transit, covering the whole question of car shortage and coal production. There are other elaborate statistics now prepared by the Government showing the weekly production of bituminous coal, anthracite, and beehive coke compiled by the Geological Survey. The department has prepared, and distributes to Members of Congress and others, the most elaborate figures showing the number of plants in operation—and the number of days run by each, the amount of coal on hand at various times, and every other conceivable detail of this vast and intricate business.

The Senator from Missouri [Mr. REED] has so elaborately covered the question of the propriety of standardizing coal mines that I feel that it is not necessary to discuss it at any greater length. The standardization of the production of coal, even if it were not a dangerous experiment, is as utterly impossible as to standardize the production of corn, and more so. I know of no one product in the United States that is produced under such varied conditions as bituminous coal. To say what mines shall be operated or to ascertain the exact amount at which coal can be profitably produced is a practical impossibility. We know the cost at which coal is produced in mines favorably situated, and we know the cost at which coal is produced in mines unfavorably situated. This country abounds in mines adjacent to railroads, to trunk lines, in which from 4 to 10 feet of coal outcrops, where the roof is composed of a solid stratum of limestone or sandstone, almost as enduring as the roof over our heads, in which there is no gas, in which the coal vein is a clear and solid mass and can be dug by almost any man who can handle a shovel and a pick, or, where it is undercut, who can throw it into a car. It requires no special skill. It involves no great expense. Adjacent to that mine you may have a 3-foot vein, with a stratum of slate or flint that must be taken out of that coal, with a roof that is perfectly treacherous, that will shelve and fall, and every step you go into that mine you must have props and supports, and the cost of production in one of those mines will be 300 per cent greater than in the other.

As these mines are operated in normal times, that matter is controlled automatically. If coal is bringing a low price, mines which can not be operated under depressed conditions are not operated. When the price of coal goes up and the demand increases, they resume operations. That must be the case for all time to come, for the simple reason that not all of the coal that is in sight or available can be consumed in a year. We consume approximately all the corn and wheat or wool we produce within 12 months of the time of its production; but there is enough coal in the United States now—three trillions of tons—to last the world for 5,000 years.

Mr. President, a thorough and exhaustive investigation of the cost of producing coal and delivering it to the consumer and making the compilation contemplated in this bill would take many months. The cost varies in the same locality, the cost varies in different fields, and the cost varies in the same mine operated at different times. You can open a slope mine to-day and take out your coal within a few hundred feet of the railroad line. Within two years from that time you may be back in that mine for a couple of miles, and the cost of bringing coal to the car is greater than the cost of mining it. If you should ascertain the cost of production in all the coal mines in the United States to-day, your statistics would be comparatively worthless if those mines were operated actively for 12 months.

Mr. President, I am deeply impressed with the peril of an investigation touching the advisability of an immediate nationalization of the coal industry; and I am sure that the learned and accomplished Senator from Idaho [Mr. BORAH] has followed the result of a like investigation in Great Britain. The most conservative committee that could be found by the House of Commons was selected. The most distinguished and experienced statesmen in Great Britain, the most eminent economists, were selected to serve on that commission. They spent many months in an effort to ascertain the cost of production and the propriety of nationalizing the coal industry. Conditions in Great Britain are very different from those in the United States as far as the coal industry is concerned, just as they are different in Germany. In the United States the title to the coal almost invariably goes with the land. If you buy a hundred acres of land, you buy to the center of the earth. That is not true of titles to mineral properties in Europe, and I am under the impression that it does not prevail in Great Britain.

Coal in this country can be mined in a great many places with very little capital and is as simple an operation as running an ordinary mill or a farm. Any man with an outcropping of coal can secure a few miners and with some dynamite and powder and a few machines he can go in there and undercut it and shoot it down, employing only one or two expert men, and the rest simply load the coal. The Senator or I could do it, or anybody else that knows how to throw a lump of coal into a little car. That is the bulk of the mining operation in a great many mines. In Great Britain the coal is on an average of 2,500 feet under the earth. It is mined by the long-wall process, in which they must build a covered passageway to every foot of the coal and the problem of supporting the strata that falls behind the coal—for there they take it all out while here we leave a portion of the coal as pillars—the conditions are entirely different. The matter of investment is entirely different. What was the result of the discussion of the nationalization of the coal industry in Great Britain? It stopped work. The Senator from Idaho must remember that perhaps 60 per cent of the miners who are engaged in working in these coal mines are advocates of the nationalization of the coal industry.

Mr. BORAH. Mr. President, the Senator is in error about that. I do not think at the present time 20 per cent of them are advocates of nationalization. Years ago the United Mine Workers declared in favor of nationalization, but Mr. Lewis stated here before the committee only a short time ago that they were opposed to it and that their members had almost entirely changed their position upon the subject.

Mr. STANLEY. Mr. President, I do not say it to the discredit of the miners. They never had a better friend. I represented the United Mine Workers for years as their attorney before I came to Congress. I have been their friend and champion in Congress and in the courts, but there is no question in my mind about the fact—and I do not say it to their discredit—that the sentiment in favor of nationalization of public utilities and of great industries like the coal industry is stronger among the miners as a class than among any other class of labor in the United States with whom I am acquainted, and they have as much right to their opinion as I have to mine.

You could not start anything which would more delay an adjustment between the men who own the mines and the men who work the mines than an investigation of the propriety of the nationalization of coal mines, if you should think for a hundred years. Nothing tended so much to blow the top off the mines in Great Britain, nothing tended so much to aggravate the differences between the mine owner and the miner, as the question of the nationalization of coal mines. The only question between the mine owner and the miner now is the question of the recognition of the union or of the sum to be paid for producing a ton of coal. If you raise the question of nationalization, and allow the unions to take the position that they are for the federalization of coal mines, and the owners take the position that they are against the federalization of coal mines, you will never settle this question until the Government takes one side or the other.

Mr. BORAH. Mr. President, the error in that argument lies in the fact that the mine operators and the miners are now agreed against nationalization.

Mr. STANLEY. Then why investigate it?

Mr. BORAH. There are some other people in this country besides those two classes.

Mr. STANLEY. Does the Senator from Idaho believe that the people of this country generally are in favor of the nationalization of the coal mines?

Mr. BORAH. I do not know whether they are or not; but if it inheres in an industry, if it is a question which relates to it and we are going to undertake to deal with that proposition, I am not afraid to investigate any feature of it. When it is investigated, I may be just as much opposed to nationalization as the Senator from Kentucky is, but it is one of the questions which inheres in the problem; it is a part of it. It is one of the things which the people are discussing, and you can not kill a thought by refusing to entertain it in the way of an investigation.

Mr. STANLEY. Mr. President, a majority of the coal operators are against nationalization and a majority of the coal miners are against nationalization, and there are some people in this country who have an academic interest in it; then, for the benefit of the curiosity of those people, to find out a little more about it, it is proposed to have witnesses brought here to discuss the pros and cons of it. While you are enlightening their thirst for knowledge in an academic discussion of the propriety of the nationalization of coal mines, if such a thing were necessary, the people who are most interested in it will not regard it as an academic question. There will be encamped around about this city an army of coal diggers and mine owners, each the propagandist of his favorite theory. With them it is a question of life unto life and of death unto death. You will put in the background the simple questions of an adequate wage and of working conditions, and you will raise a question which touches the very foundation of this Government, and you may settle it, not by a gentle commission filing a report but possibly by the more terrible weapons of revolution.

To start such an investigation at this time is like pouring oil, not water, upon the flames. It is to aggravate the danger. It is to postpone the solution. It is to give these people a new bone of contention. It may be, and probably is, true that there are thousands of men and women in this country who know nothing about the propriety or economy of the nationalization of this great industry, but surely so learned and profound and accurate a student as the Senator from Idaho does not need a kindergarten in the shape of a commission to tell him about the nationalization of the coal industry.

Mr. BORAH. Mr. President, if the Senator from Idaho is at all entitled to the encomium which the Senator from Kentucky passes upon him, which no false modesty compels him to disclaim, it is by reason of the fact that he has never refused to investigate any question, whether he likes it or not. I want to know every side and every phase of this great industry, upon which the life of the Nation so largely depends. Let us not be afraid to study it in all its aspects.

Mr. STANLEY. Then I assume he has investigated this long ago?

Mr. BORAH. No; I have not; not as fully as I would like to.

Mr. STANLEY. It is not a new question; it is not an experiment. Germany owns her coal mines. England is on the verge, by a system of ironclad control of their operation, of the nationalization of her coal mines. There is only one place in the world where men mine coal exactly as they plow corn, where a man runs a coal mine exactly as he runs a flour mill, or a shoe factory, or any other industrial enterprise; where labor and capital are absolutely free. There is no license system. There is nothing except general supervision over the sanitation and the ventilation of the mines.

The question of the hours of labor is left in great measure to the States and the parties concerned. The question of working conditions; the question of the ventilation of the mines; the question as to whether there shall be union or nonunion labor; the question as to whether they shall have checkweighmen or not; the question as to whether they shall have "buddies" or assistants or not, are not for us to settle. It is only in Pennsylvania, in the anthracite fields, where they have this license system, which seems to have obstructed a settlement.

One miner in West Virginia produces more coal in eight hours than three miners in Wales. The unit of production is 300 per cent greater in the United States than it is in Wales, and it is greater in the Cardiff mines than in any other mines in the world, outside of the United States.

Mr. BORAH. But if the miner in West Virginia had to work under the same conditions as the miner in Wales, the miner in Wales would produce a greater amount of coal.

Mr. STANLEY. I think not.

Mr. BORAH. I must disagree with the able Senator.

Mr. STANLEY. I thought I had the report of the English Royal Commission, the last report made, a report submitted within the last few months, but I find I have not it here. I will take pleasure in submitting it to the Senator from Idaho. I quoted from memory. It is true that the great depth of the English coal vein and the difficulty in bringing the coal for miles through the subterranean channels through which it must go, and then up a lift of 2,000 feet, inordinately increases the cost of production. But, beyond that, the unit of production of the American miner at the face of the mine is greater than that of any other miner in the world.

This trouble is temporary. These miners and operators have adjusted their differences before and will, in my opinion, adjust them again. But governmental control, governmental interference, eternal investigation, the extension of Federal authority over the initiative of the employer and employee, if indulged in, if it ends in adopting the system of Federal supervision and control that you find in Germany, in the Saar Valley, in Great Britain, will end in destroying the only advantage we have. To-day we can put a ton of coal from our seaboard into any South American or Mediterranean port at $1.50 a ton less than they can export it from Cardiff or any other mine in the world.

Mr. BORAH. Mr. President, there is part of that last statement to which I readily agree; but the Senator knows that we have a coal crisis about every year. The mine operators and the miners disagree about once a year and we have a crisis.

Mr. STANLEY. I want to correct the Senator right there. I may be wrong, but I am pretty sure I am right in saying that as a rule these contracts run for a minimum of two years.

Mr. BORAH. Yes; they run for a minimum of two years, and they generally have about three disagreements while the contract is in existence. The contract which is in existence now, or up to October 1, has been disregarded three different times during its existence, they claim. We have the coal situation brought before us just about once a year, on an average, certainly at least once in two years, when the entire country confronts the question of whether it is going to freeze to death. They finally get together, and when they get together, they unload all their loss and all the injury upon the public, and the public pays for it in the increased price of coal.

The Senator has just referred to the fact that we can produce coal and sell it in foreign ports at a cheaper rate than it can be produced abroad. Yes, we can; but, as a matter of fact, England is now selling coal in the port of New York cheaper than we can sell it there.

Mr. ROBINSON. And she has been doing that for two months.

Mr. STANLEY. That is due, of course, to the present conditions. They used to say that we could not send coal to Newcastle, but we did send coal there when they had a strike. That has nothing to do with the basic cost of production.

Mr. BORAH. It is due to the fact that this crisis is upon us. Let me say to the Senator from Kentucky and to the able Senator from Missouri, that I venture to say that when the question of legislation comes here for consideration there will be many questions upon which we will not disagree. But we are confronted with a crisis. It has been recurring from year to year. There is a consensus of opinion throughout the country that every effort ought to be made to get to the bottom of the difficulty if possible, to study every conceivable phase of this difficulty, to arrive at an intelligent program or policy from a national standpoint, if it is possible to do so, to prevent these recurrences, detrimental to the operators and detrimental to the mine workers, and more so to the public.

The only purpose of this bill, as it clearly discloses, is to establish a commission which will study this question from every conceivable angle. After it has studied it and investigated it, crystallized its views and put them in the form of a report, it will come to Congress, and nothing will be effective until the Congress of the United States acts upon it. At that time it may be that the Senator from Kentucky and I will be found shoulder to shoulder upon many of these questions; I do not know. But I do feel that there ought to be a real, earnest desire to get a comprehensive survey and view of this entire question if it can possibly be done.

If this commission should be such a commission as we have often had, I would vote for a bill to repeal the thing at once. The whole question turns upon whether the President will be able to select a body of men who will study this question from the standpoint of the interest of the public and from the standpoint of the welfare of the public and see if they can throw some light upon these difficulties.

When I go to the mine operator he says to me, "Here is this difficulty and here is that one. We can not produce coal under such conditions unless some solution is found for this difficulty."

I talk to the leaders of the workmen, and they say, "This irregular employment, this irregular production, holding several hundred thousand men in employment through the year, and giving them only 260 days or 190 days a year, are things which we have to work out in some way."

We do not know what the solution is, and we want to know if it is possible to determine it. This has no other object or purpose in view than to give an opportunity to help solve these questions if it is possible to do so. That is all there is to it.

Mr. STANLEY. Mr. President, I am quite sure, as I said in the beginning, of the disinterestedness of the motives of the Senator from Idaho and of his sincere desire to adjust at the earliest possible moment a condition which threatens the happiness of the community and the lives of millions of men and women. But I am as firmly convinced, I have not the shadow of a doubt, that the means provided will necessarily delay the end desired.

Let us see what would happen. Call your commission together, I say to the Senator from Idaho. The abler the commission in some ways the worst off we are. Get the greatest engineers, the greatest political economists, the wisest publicists, the leaders among the coal operators, the leaders among the miners. Get your august court assembled. You lay out this ambitious program, and what is the result? To-morrow I want to open my mine—I am a mine operator. To-morrow I want to go to work—I am a miner. What happens?

The operators say, "We can not afford now to surrender these propositions when we have a court of great capacity that will render a decision that necessarily must be favorable to us. We have endured these wrongs at the hands of organized labor. We have had these inordinate demands made upon us. We have seen these people exempted from the Sherman Antitrust Act. We have seen them break their contracts. We may just as well fight this thing out now, when we have a great court to decide it, as at any other time. We will wait. We will enter into no new contracts with you until we have these matters finally determined."

The coal miners, on the other hand, will say, "There is no use of our talking to the mine operators. They have broken their contracts with us. They have employed scab labor and done everything they could to break down the union. They have run company stores and charged us two prices and paid us in scrip. We have had to work in badly ventilated mines. We have been killed and mashed and crushed by poor props and defective roofs, and all that sort of thing. We are going to have more healthy conditions now to work under, have better wages, and we are going to find out exactly what these rascals have made during the war and how much they have profiteered. A few people may get cold, but we may just as well ascertain the truth."

So everybody will wait to see what the great court is going to do, and no one will dig coal.

Mr. BORAH. A few days ago, when the mine owners and mine workmen met in Cleveland and adjusted their questions, they provided for a commission to do this very thing from their standpoint. They themselves are seeking in every conceivable way to get some adjustment of the matters which come up yearly and annoy them. What would the Senator suggest? Would he suggest that we do nothing at all about the matter?

Mr. STANLEY. Mr. President, I have not thought of a bill providing a specific remedy. I am firmly convinced, as I said the other day to a representative of the press, that every man and all men have a natural and unalienable right to determine the compensation they will accept for their labor, to determine the working conditions that are tolerable, and to make that determination individually or collectively. On the other hand, no man and no set of men have any right, natural, legal, or otherwise, to interfere, by physical violence or intimidation of any kind, with other men equally free and blessed with the same unalienable right to accept wages and working conditions which others have refused to accept. To-day any physical interference with the movement of the instrumentalities of interstate commerce is against the Federal law. Any interference with the individual who seeks work is against the common law, a breach of the peace. What we need more than tomes of statutes is an Executive with a vestige of backbone who will enforce the laws that are now on the statute books. Give me a President and 48 governors like either Grover Cleveland or Theodore Roosevelt, and I would do more in 48 hours toward settling the differences which imperil the peace of the community than a learned and academic commission would do in 4,000 years.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER (Mr. TOWNSEND in the chair). Does the Senator from Kentucky yield to the Senator from Massachusetts?

Mr. STANLEY. I yield.

Mr. WALSH of Massachusetts. If I may interrupt the Senator a moment, I would call his attention to a situation in the coal industry which I think he does not realize. I think we all believe in the enforcement of existing laws and in executives with backbone enough to enforce them. But here is an industry where the Government has absolutely no authority to get facts. All attempts to get facts have been met with injunctions which have been sustained in the courts.

Mr. STANLEY. To what facts did the attempt relate?

Mr. WALSH of Massachusetts. Facts in regard to the cost of production. When the Bland coal regulation bill was reported to the House on May 6 the committee of the House of Representatives reporting the bill made this remarkable statement in regard to the coal industry:

> It is a startling statement, but nevertheless true, that to-day there is no agency of the Federal Government which has ascertained or can ascertain the correct production cost of a ton of coal in a well-operated, efficient mine. Not only have existing agencies failed to obtain information from an unbiased source, but they have been denied the legal right to obtain such information.

The Senator will pardon me for the interruption, but I think the Senator should realize the hopeless situation of the Government. This industry is of such a public character and necessity that it must be unalterably conducted with the motive of service as well as the motive of profit making, and when there is a conflict such as there is now over profits—and this strike is over profits, for the element of service has been abandoned—then the Government must be in possession of all the facts to take such steps as may be necessary to compel a great industry of this kind to conduct itself with the end in view of serving the public first and making profits for miners and operators secondary. This industry can not abandon its public character, can not refuse to give good service to the public, and claim the protection and private character of those industries that have no obligation of service to the public.

The pending bill may have its defects. It may not go as far as some would like. It may appear to others to be going too far. But it is an attempt, it is a beginning, it is an effort to say to the operators and to the miners of the country, "This business has a public interest. This business must be conducted with the motive to serve the public, and therefore the Government is going to supply itself with all the facts available for future intelligent action to restrict conducting this industry contrary to the public interest."

I hope the Senator will pardon me for the interruption, but I doubt if it is realized that attempts to get helpful facts and information have been met with injunctions in the courts. The Federal Trade Commission have been made powerless to get

the information that they believed necessary. The Federal Trade Commission was not looking to destroy the coal operators or the coal miners, yet they have been prevented from getting facts which they honestly believed the public ought to possess. The pending bill, it seems to me, is helpful in leading to obtain all necessary facts, which is the minimum step to take now.

Mr. STANLEY. In that event, Mr. President, it would be easy enough to amend existing law in such way as to give the Federal Trade Commission the right to investigate costs of producing coal going into interstate commerce, in the event we had the constitutional right to do it.

Now, what good purpose would it serve in settling this strike? It is said we have a coal monopoly in the United States. The anthracite fields are said to be controlled by a single distinguished gentleman, but, as the Senator well knows, I assume, like every other monopoly of the kind of a heavy commodity, it is a transportation monopoly. Take control of the industrial carrier and you can control the anthracite situation.

Ten years ago I was told that there existed in this country a coal trust, that the producers of bituminous coal were in combination, and that this was especially true of the vast holdings of Mr. Frick in the Connellsville coal region. That, as the Senator knows, is the greatest coking coal in the world. It occupies a very limited area. It is high in calories, low in ash, enough volatile matter to make the coke porous, and strong enough to hold the enormous load of a blast furnace, a peculiar quality that you must have in coke before you can operate a blast furnace. I found, after weeks of investigation, that there were more coal fields for sale in the Connellsville region than Frick and the steel corporation owned.

Why, Mr. President, there are three trillion tons of coal in sight now, enough to supply the world for 5,000 years. There is enough coal outcropping in the hills of Kentucky undeveloped and owned by thousands of people to supply the world for centuries. Those coal fields are owned by thousands and thousands of people. The competition under normal conditions is acute. It is exactly, as I said to the Senator from Idaho, like the operation of a railroad. There is no way on earth to determine absolutely just what a railroad shall receive in the way of an adequate compensation for this reason. Here are two lines starting in Washington and running to New York or to New Orleans. One can operate at 30 per cent less than the other. Having common termini, they are bound to have a common charge for the haul. What would break one road would enrich the other.

Here are two mines side by side, one having a little "porting" in an intractable substance. It will cost one-third more to get rid of that substance and bring out the clean coal than it costs to produce a ton of coal from the other mine. The presence of gas in the mine increases the cost. A bad roof will require an increased expense in the increased use of props. They will have to saw thousands and thousands of feet of timber and bring it in and put it under this falling roof. The other mine will have a roof like a dome of steel. These things can not be adjusted. Trade conditions adjust them. The law of supply and demand adjusts them. When coal drops to the point that it barely pays the well-situated mine to operate, the mines which operate at the greater cost must stop. We have coal that for these reasons may not be available for a thousand years. and whether the coal is available or accessible, whether it is merchantable or not, depends entirely upon location and upon the physical conditions which surround its production.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Idaho?

Mr. STANLEY. I yield.

Mr. BORAH. I know, not so well as the Senator from Kentucky, but I know something of those difficulties, because I have been giving some attention to them; but suppose, Mr. President, the proposed commission should be appointed and should submit a report containing nothing except a recommendation for a practical system for national storing; that, in itself, would, in a large measure, settle one of the most difficult problems with reference to the coal industry, namely, irregular employment and seasons of scant production as well as seasons of no production. Suppose it submitted no other recommendation than that, it would be worth a million dollars over the money it would cost in the next 20 years.

Mr. STANLEY. Mr. President, I am sure that the Senator from Idaho will, upon mature consideration, agree with me that a commission constituted of men who are not experienced in the mining and distribution of coal will never solve so technical a question as that, if the most astute intellects of the country, who, with their fathers and their fathers' fathers, have been in the coal business for centuries, have not solved it.

Mr. BORAH. But they have not tried to solve it. There has not been any concentration of purpose to that end. We shall have to call into the controversy, in my opinion, the thought and activities of some body of disinterested men, actuated entirely by a desire to relieve the public and aided by the information and the knowledge which they have a right to gain from the men who are practically producing coal, both the owners and the miners.

Mr. STANLEY. Mr. President, I hold no brief for the coal operators; I am vitally interested in the great industry which, as I said before, Lloyd-George justly called "life." In our coal industry, in our capacity to produce the unrivaled coals we possess at a lower cost than our competitors lies the secret of our future industrial domination of the world. England between 1848 and 1878 became the industrial master of the world, but she never assumed that mastery, she never obtained it until she learned how to make iron out of coke instead of out of charcoal. It was the coals of Cardiff, above everything else, that made England the mistress of the sea and the most puissant financial and industrial power of the world. To-day that mastery is ours. England can never undo the pernicious work which she has done in to a degree nationalizing her coal industry; she can never bring her miners back to the independence that the American miners possess. She can never bring about competitive conditions in any of her mines. That, in addition to the difficulty of producing her coal, gives us the opportunity to produce coal for the world.

Now I wish to say to the Senator from Idaho that I am surprised at his statement in reference to the seasonal production of coal. A coal operator will get just as much for his coal as he can. Many coal operators have been guilty of the most shameless profiteering; there is no doubt about that; but it is human nature to sell for just as much as one can get. That is the reason we have the Sherman antitrust law on the statute books.

Mr. President, nobody desires the regular production of coal more than does the owner of the coal mine. There is no business on earth that is more costly on account of the seasonal production. Say the coal vein is 500 or 2,000 feet below the surface; the minute the pumps stop that mine is flooded and that is the end of the mine. There are hundreds of mines in this country and in Europe which have been rendered absolutely worthless by this flooding. The flow of water into a mine can not be prevented without the aid of pumps, and nothing disintegrates so rapidly as coal. Leave a mine for a few hours and it fills with poison gas and water.

A coal mine disintegrates faster than does anything else. A mine must be kept ventilated; it must be kept filled with pure air; the pumps must go and the fans must go during all the long months while the strike lasts, or during the time when there is no demand for the coal. So, also, nothing would please the miner more than regular employment.

Mr. President, it is common error, one that I shared until a very few months ago, that the seasonal production is due to the fact that coal is burned to a greater extent in winter than in summer. The use of fuel coal has but little to do with the seasonal production of coal. That is entirely a negligible factor. The world produced in 1921 about 1,300,000,000 tons of coal, and of that quantity we produced over 500,000,000 tons. Out of a total production in some years of 1,600,000,000 tons of coal we have produced over 700,000,000 tons, and out of a 500,000,000-ton production of coal not 50,000,000 tons are used for fuel purposes. The thing that makes coal seasonal is the activity of the farmer. With the movement of the farmers' crops the factories increase in energy and activity, and with that increase in energy and activity and in output, and with double shifts being put to work, there is an increased demand for coal.

Through the medium of a fact-finding commission you can not solve this question, I will say to the Senator from Idaho. I know of few who will come as near solving it as he will. I have had some experience with men who were patient of labor, but I have known few men in all my life who were so amply fitted to solve this question as is the Senator from Idaho, possessing the rare qualities of patience of labor, keenness of insight, and faultless courage, with a disinterested devotion to the public good. This question, I will say to the Senator from Idaho, can be solved better through the Interstate Commerce Commission.

One difficulty is that the railroads have never yet provided an adequate supply of coal cars. The movement of coal is seasonal, and just as soon as the demand for the coal grows

sufficiently acute they have not cars enough to deliver it, and they prefer to let the mines wait for their cars and force them to distribute their orders and take cars when they can get them.

A great part of the coal produced in this country, of course, can not be stored, as the Senator well understands. Coal from the Illinois fields, from the western Kentucky fields, and from Indiana fields can not be stored for six months. It can not be loaded on a barge and transported to New Orleans, for there would be a fire before it got there. The presence of sulphur and other minerals causes it to slack in the rain and the sun and superinduces spontaneous combustion. All over my country there may be seen slack piles of coal which have been burning for years. The coals of the Klondike region, as we call it, the coals of eastern Kentucky and West Virginia, will last like marble and can be stored. Given sufficient transportation facilities, the individual can easily enough store that coal for fuel purposes.

Now, I will say to the Senator from Idaho that we can never store coal for all industrial purposes. It must be remembered that coal is carried by gravity. From the time the coal leaves the mine and is shipped to any great concern it is never touched by a human hand. The coal is put in a gong which dumps from the bottom. That coal gong goes to the great factory or mill; it dumps into a great receiver which automatically feeds it into the furnace of the mill or factory.

The storage of coal has been tried a thousand times; it has been tried as a precaution against strikes and similar contingencies. The manufacturer wants his coal, but the cost of moving the coal from one place to another is so much greater than the cost of moving it by the improved facilities from the mine to the mill that it has been demonstrated as absolutely impossible for major operations in the use of coal.

Now, Mr. President, I will say to the Senator from Idaho, with the facts confronting us, that our coals outcrop; that they are higher in carbon and lower in ash and sulphur; that they are the most perfectly adapted, outside of the coals of Cardiff, both for coking and for steam purposes. We are playing with fire; we are touching the very keystone of the industrial arch. Upon the success, upon the life, upon the prosperity of this industry hangs our national puissance, our financial future, our growth and prosperity in power and in happiness. I tremble before the audacity of the Senator from Idaho, who is opening unconsciously a Pandora's box and who is aggravating the evil which he so disinterestedly and earnestly desires to cure.

Mr. President, I ask to insert in the RECORD certain tables.

The PRESIDING OFFICER. Without objection, it is so ordered.

The tables referred to are as follows:

[Department of the Interior, United States Geological Survey.]

WORLD PRODUCTION OF COAL IN 1921.

The world's production of coal in 1921 dropped back to the level of 1909. From reports so far received, the United States Geological Survey estimates the total output at approximately 1,100,000,000 metric tons. This figure is subject to material revision as more complete returns are available.

In comparison with the feverish year 1920, the year just closed shows a decrease of more than 200,000,000 tons. The chief factors in the decrease were the British miners' strike, which lasted from April to June, and—more important—a world-wide industrial depression. Prices collapsed early in the year, and the sea-borne coal trade of the world fell off sharply. The consequent reduction in the volume of busines offered to the shipping of the world has been an important element in the decline in ocean freight rates, so keenly felt by the American merchant marine.

Of the major coal-producing nations, France and Germany were the only ones to show an increase. Progress in restoring the ruined mines of France is indicated by the steady increase in output of the past three years. In 1919, 22,000,000 tons were produced; in 1920, 25,000,000; in 1921, approximately 29,000,000. A further increase of 12,000,000 tons, however, would be necessary to bring French production up to the level of 1913. German production of bituminous coal is also still far below the pre-war level, although an increase was effected in 1921 as against 1920. German production of lignite in 1921 reached the highest point ever attained. The estimated output of 120,000,000 tons is an increase of 35,000,000 tons over the last year before the war.

The proportion contributed by the United States was 40.9 per cent, a larger share than in the years before the European war, but the smallest in any year since 1916.

The following table, prepared by W. I. Whiteside of the Section of Foreign Mineral Reserves, presents the information received by the Geological Survey up to February 15, 1922. The tonnage of the countries not yet heard from ordinarily amounts to 12 or 15 per cent of the total. Receipt of data for these missing countries, estimates for which are included in the total, may raise or lower the final figure by some millions of tons. The unit used is the metric ton of 2,205 pounds, the approximate equivalent of the long or gross ton. It is not, however, exactly the same, and the translation from net or gross tons to metric tons gives many of the figures an unfamiliar look. A more complete report on world production in 1921 will be issued by the Geological Survey about April 1.

Preliminary estimate of the world's coal production in the calendar years 1919, 1920, and 1921.

(In metric tons of 2,204.622 pounds.)

Country.	1919	1920	1921
Australia	10,736,321	13,176,426	(2)
Belgium	18,342,950	22,388,770	21,807,160
British India	22,991,217	17,356,889	(2)
Canada	12,411,328	15,088,175	13,300,000
China	23,000,000	19,500,000	(2)
Czechoslovakia	26,946,813	31,086,479	(2)
France	22,341,000	25,300,000	29,000,000
Germany:			
Coal	[1] 116,500,000	[1] 140,757,433	[1] 145,400,000
Lignite	93,800,000	111,634,000	120,000,000
Japan	31,461,386	29,245,384	(2)
Union of South Africa	9,313,232	11,181,846	[3] 9,400,000
United Kingdom	233,467,478	233,216,071	166,992,000
United States	502,534,410	586,000,000	448,600,000
Other countries	46,553,865	49,068,527	(2)
Total	1,170,400,000	1,305,000,000	1,100,000,000

[1] Includes Saar and Upper Silesia. [2] Estimate included in total.
[3] Estimated from 11 months' production.

[Department of the Interior, United States Geological Survey.]

The following table, prepared by W. I. Whiteside, summarizes all information received by the Geological Survey up to February 1, 1922, regarding the world's production of coal during the years 1919 and 1920. A preliminary table was published April 9, 1921. The table below includes the production of lignite and brown coal, which is given separately from that of other coal so far as possible:

Coal produced in the principal countries of the world in the calendar years 1919 and 1920.

(In metric tons of 2,204.622 pounds.)

Country.	1919	1920
NORTH AMERICA.		
Canada:		
Coal	9,756,019	11,812,871
Lignite	2,655,309	3,275,304
Greenland	2,160	2,308
Mexico	693,865	(1)
United States, anthracite and bituminous (including lignite)	502,534,410	586,000,000
SOUTH AMERICA.

[1] No data.
[2] No change.

Mr. McCUMBER. Mr. President, we took a recess yesterday until 11 o'clock this morning, thus foreclosing morning business, with the hope and expectation that by 2 o'clock to-day we could dispose of the coal commission bill. I am willing that the regular order shall be laid aside if it is certain that we may conclude to-day the consideration of the measure now pending, but if it is reasonably certain that a vote may not be had to-day upon the coal bill I want to resume the consideration of the unfinished business. I will ask the Senator in charge of the measure now before the Senate whether there is a fair probability or whether he can give me any assurance that if we lay aside the soldiers' compensation bill for the remainder of the day the coal commission bill can be disposed of this afternoon.

Mr. BORAH. Mr. President, I know the Senator from West Virginia [Mr. SUTHERLAND] desires to speak upon the coal commission bill. He has told me, however, that he expected to speak briefly. I do not know whether or not there is any other Senator who wishes to speak upon it; I have not been informed that any other Senator desires to speak, and, if that is the case, of course we can no doubt finish the bill within the next hour.

Mr. UNDERWOOD. Mr. President, I do not intend to resist the passage of this bill for an investigation. It has in it some things of which I do not approve; but it is merely to investigate those things, and not to make them the law. It may produce a helpful result. I hope it will. In the end, the only harm that can be done is the cost of the commission, because it has no power to do anything. I am inclined to think that there probably will be some further debate on the bill, but I am perfectly willing to go ahead with it this afternoon and finish it. I do think, however, that we should have one measure or the other before the Senate for final conclusion.

As the Senator from North Dakota knows, I am opposed to the so-called bonus bill. I intend to vote against it, but I have no desire in the world to delay action. The Senate is entitled to act, and I think if we are going to consider it we ought to go on with its consideration to its final conclusion and dispose of it.

I think we all recognize the fact that a large majority of the Senate to-day is in favor of the bonus bill; that if it does not become a law it will be because the President of the United States will veto it; and the real issue on the bonus bill will come when the veto message reaches this body, if it ever comes here. So that I see nothing to be accomplished by delay of a few days. I think, however, in the interest of good legislation and an understanding of what we are doing, that we ought to have one bill or the other before the Senate for final conclusion.

If the Senator from North Dakota is willing to lay the bonus bill temporarily aside, and say to the Senator from Idaho: "You can go on and finish your bill," I think that will be entirely satisfactory. If, however, he is not going to do that, and if he is not going to let the bill be fought out to a conclusion and finished, then I think he owes it to the Senate to take up his bill and keep the nose of the legislative boat to the bank until we land the legislation or end it, one or the other.

Mr. McCUMBER. I agree with the Senator; but this bill having been under consideration for most of yesterday and to-day, and Senators having talked on it even though we had the other bill before us, I thought we would gain time if we could get rid of it in the morning hour, before 2 o'clock; and that was why I consented to a recess until 11 o'clock this morning, with the hope that in three hours we could dispose of it.

So far as I am concerned, if the Senator can give me any assurance that we will get through with this bill to-day, I am perfectly willing to give the entire day to its consideration; but I should want in connection with that some assurance, if it is possible to get it, that we might have a vote upon the compensation bill, say, by Tuesday noon without further discussion. In that event I would be content to meet at any time in the morning, so as to dispose of it; and I say this because there are so many Senators who want to get away, some on Monday, some on Tuesday; others will be coming back, of course; but I should like to accomodate those who are very anxious to go away, some of them on Tuesday, and who want to vote on this measure before they leave.

Mr. UNDERWOOD. I will say to the Senator about the other bill, the bonus bill, or the soldiers' compensation bill, as he calls it, and as it is entitled in the RECORD—the public calls it the bonus bill——

Mr. McCUMBER. Let us call it by its right name, the compensation bill.

Mr. UNDERWOOD. I am willing to accommodate the Senator; but I wish to say this: Although I am very much opposed to the bill, I have no desire to delay its passage; and so far as I am concerned individually, I am willing to enter into an agreement to limit debate on amendments or on the bill, but I am not willing to enter into an agreement that we shall vote at a particular time, because then we may be in the same condition in which we found ourselves in connection with the tariff bill a short time ago.

Important amendments may come before the Senate that we will have to consider and vote on without opening our mouths; so the Senator can take that as final on the question of unanimous consent for a vote on the bill. If the Senator desires to make a proposition that from now on the debate on all amendments shall be limited to a certain length of time, I am prepared to agree; but I am not willing to agree to fix a time for a final vote.

Mr. McCUMBER. Suppose there are some Senators who have amendments here that they have prepared to consider, I know, longer than the general time that we would want to give upon amendments, and if they do not get at it to-day they would not want to be limited on Monday?

Mr. UNDERWOOD. I have no objection to that; but if the Senator wants to say that after a certain hour or a certain day—so far as I am concerned, he can start that certain hour or certain day now—if he wants to say that after Monday or after Tuesday debate shall be limited to one speech on every amendment, and that that speech shall not be longer than 20 minutes——

Mr. McCUMBER. Say, 15 minutes; that is our usual number of minutes.

Mr. UNDERWOOD. I think 20 minutes is a more reasonable time, but I am not going to fall out with the Senator about a little thing, although I think it would be more reasonable to say 20 minutes.

Mr. HEFLIN. Mr. President——

Mr. UNDERWOOD. I should have no objection to that, speaking for myself; but I am not going to agree to any unanimous-consent request that fixes an hour to vote, with a lot of pending amendments or amendments that may be offered, with my mouth automatically closed by my own agreement, so that I can not say anything about them, but must vote on them blindly.

Mr. McCUMBER. Is the Senator willing to enter into a unanimous-consent agreement that after the calendar day of Monday no Senator shall speak longer than 15 minutes upon any amendment?

Mr. WATSON of Georgia. Mr. President, I will say to the Senator from North Dakota that I shall object to such an agreement.

Mr. McCUMBER. Will the Senator from Georgia tell me what kind of unanimous consent as to time would be convenient and acceptable to him?

Mr. WATSON of Georgia. I believe it will be quite early enough to decide that on Monday. Let us get through with the bill of the Senator from Idaho.

Mr. ROBINSON. Mr. President——

Mr. McCUMBER. I yield to the Senator from Arkansas.

Mr. ROBINSON. I have just been advised by some Senators who are in the Chamber that it will be impossible to conclude the consideration of the bill presented by the Senator from Idaho this afternoon. So far as I am concerned, I am ready to vote on it now and on any amendment that has heretofore been presented.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Overhue, its enrolling clerk, announced that the House disagreed to the amendments of the Senate to the bill (H. R. 10248) authorizing the sale of surplus power developed under the Salt River reclamation project, Arizona, requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. SINNOTT, Mr. SMITH of Idaho, and Mr. HAYDEN were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 66) providing for the extermination of insects from the Capitol and the Senate and House Office Buildings, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED.

The message further announced that the Speaker of the House had signed the enrolled bill (H. R. 4) granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses; and to amend section 2 of an act entitled "An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes," approved March 4, 1917, and it was subsequently signed by the President pro tempore.

COMPENSATION OF WORLD WAR VETERANS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. ROBINSON. Mr. President, I do feel that some arrangement ought to be made for a vote on the adjusted compensation bill. The measure has been before the Senate at different times, and has been discussed at great length by some Senators, and all Senators have had an opportunity of discussing it. A number of Senators are away who expect to return for the vote. It would suit their convenience very much if some arrangement could be entered into this afternoon. I have not heretofore been insistent upon a speedy determination of the bill, but it was expected by nearly all Senators that the adjusted compensation bill would be disposed of during the present week. If the Senator from Georgia, and other Senators who are especially interested in the subject, could find it consistent to enter into an agreement imposing a limitation upon debate and enter into the agreement now to take effect after the hour of 3 o'clock Monday, I think it would result in a vote on the bill some time before 4 o'clock Tuesday, and that would be satisfactory to all Senators I have had the opportunity of consulting.

Mr. WATSON of Georgia. Mr. President, in response to the suggestion of my friend the Senator from Arkansas, I would remind him that the present bill pending before the Senate is vitally different from the one first introduced by the Senator from North Dakota, and has amendments which are virtually substitutes for his bill. There are two others. I doubt whether every Senator has had the opportunity, in the midst of his other work, even so much as to study those substitutes; but as an accommodation all around, to my friend from Arkansas and others, I am perfectly willing to agree to his suggestion about Monday.

Mr. ROBINSON. I thank the Senator. That is very kind of him.

Mr. UNDERWOOD. Now, if the Senator will make the provision with regard to the debate on amendments after the hour named by the Senator from Arkansas 20 minutes, so far as I am concerned, I will agree with him.

Mr. McCUMBER. I will consent to that, and I shall be glad to have the Senator state the agreement as he proposes it.

Mr. ROBINSON. I ask unanimous consent that when the Senate recesses to-day it recess until 11 o'clock on Monday, and that upon convening on Monday it proceed at once to the consideration of the adjusted compensation bill, and that after the hour of 3 o'clock no Senator shall speak more than once or longer than 20 minutes upon the bill or any amendment that may be pending or that may be offered.

Mr. BORAH. There is no use in going ahead with that. Of course that is a perfectly impossible proposition—20 minutes upon the bill and upon any amendment! Here are amendments which may change the entire bill and present it in an entirely different light from that in which it appears at the present time. I am perfectly willing to limit debate on the amendments, but I am not willing at this time to limit debate on the bill until after the bill is made up by its proponents. The bill is still being made up by those who are advocating it, and I want an opportunity to see the bill after they have put their final touch upon it.

Mr. ROBINSON. Very well, Mr. President. I will modify the suggestion and, with the consent of the Senator from North Dakota and other Senators, suggest that after the hour of 2 o'clock Monday no Senator shall speak more than once or longer than 20 minutes upon any amendment that may be pending or that may be offered.

Mr. STERLING. Mr. President, will not the Senator from Arkansas make that 4 o'clock instead of 2 o'clock? The original proposition made by the Senator was 3 o'clock on Monday.

Mr. ROBINSON. I will state to the Senator frankly that I am anxious to get a vote on the bill before 4 o'clock Tuesday, and if the vote is not taken prior to that time the

agreement would not meet the desires of a number of Senators. Of course, if the Senator insists, I shall be compelled to modify my request to suit his suggestion, because it is within the power of any Senator to object.

Mr. STERLING. If the Senator will go back to his original request, I will agree to that as a compromise.

Mr. ROBINSON. Very well. I then ask unanimous consent that when the Senate recesses to-day it recess until 11 o'clock on Monday, and that on convening Monday the Senate proceed immediately to the consideration of the adjusted compensation bill, and that after the hour of 3 o'clock no Senator shall speak more than once or longer than 20 minutes upon any amendment that may be pending or that may be offered.

Mr. JONES of Washington. Mr. President, the Senator from Oregon [Mr. MCNARY] is not here. I know that he has a very important amendment that he expects to present. I know that he expects to discuss that amendment. I think he has an address of at least an hour. He is not here, and I do not want this agreement made in his absence.

Mr. ROBINSON. May I suggest that the Senator from Oregon would have an opportunity, if he does not choose to proceed this afternoon, to speak between 11 o'clock and 3 o'clock on Monday?

Mr. JONES of Washington. No; he would have an opportunity if somebody else does not take the time. I am not willing to make that agreement in his absence.

Mr. McCUMBER. After that, he has an hour.

Mr. ROBINSON. Yes.

Mr. HEFLIN. Mr. President, if I understand the agreement suggested, the Senator from Oregon could speak probably an hour on the bill even after other Senators have discussed amendments.

Mr. JONES of Washington. The Senator from Oregon has an amendment he desires to offer, and he desires to discuss it. It is a very important amendment. He is not ready to take it up to-day, but I know he will be ready to take it up on Monday.

Mr. McCUMBER. Allow me to suggest, if it would be agreeable to Senators, to take our recess to-day until 10 o'clock on Monday.

Mr. ROBINSON. That will be entirely satisfactory to me.

Mr. McCUMBER. That will give one hour more, and I am certain that the Senator from Oregon would have sufficient time.

Mr. JONES of Washington. Until the Senator from Oregon comes, I shall object.

Mr. ROBINSON. I ask, then, that the proposition be modified as suggested by the Senator from North Dakota, that the Senate recess to-day until 10 o'clock Monday morning, and so forth. I ask that the request be considered as pending, so that it may be taken up and acted upon a little later, when the Senator from Washington has had an opportunity of advising himself as to the wishes of the Senator from Oregon.

Mr. JONES of Washington. I have sent for the Senator from Oregon, and he will be here in a little while.

Mr. HEFLIN. I suggest to the Senator from Washington that he will have no trouble about getting an hour of that time set aside for the Senator from Oregon to discuss his amendment.

Mr. JONES of Washington. Senators need not take the time of the Senate in trying to come to an agreement now. I will not consent to an agreement until the Senator from Oregon is present.

Mr. ROBINSON. Very well. I ask that the proposition be considered as pending.

Mr. McCUMBER. In the meantime I think it is agreeable to the Senator in charge of the coal bill that that bill be laid aside and that we take up the compensation bill.

The PRESIDING OFFICER. Without objection, that order is made.

Mr. BORAH. Of course, for obvious reasons, Mr. President, the program is under the control of the Senator from North Dakota, and I have no right to object. Even if I should object, it would be unavailing, and I recognize his right to go ahead with his bill.

Let me say with reference to the bonus bill and all other bills which are pending, and the desire of Senators to get away, that there has been considerable suggestion about the Senate going to adjourn in a few days. It seems to me we might as well disabuse our minds of that proposition. Congress could not adjourn—it would not dare to adjourn—in the presence of this industrial situation, without passing important legislation concerning it. We have been entertaining the hope for weeks that this strike situation would end, and I see that that hope is still expressed in some quarters; but it has been delayed so long that there seems now to be very little upon which to base that hope. It has been said here that the measure which I have in charge does not deal with the present situation; nevertheless I have been anxious to get it through. But I am not going to push this measure to the exclusion of other measures which will deal with the present emergency.

I know that there are other measures coming forward to deal with that emergency, and I know that Congress will not adjourn, or ought not to adjourn, until they are disposed of; and they can not be disposed of overnight. They involve questions of such serious moment and of such profound concern to the people of the country that we could not possibly leave here without disposing of them, and we can not dispose of them in a few days. So there is no occasion for limiting debate upon these propositions upon the theory that we can get away from here. I presume if we should go away without dealing with the strike, unless it should be settled, the President would call us back. If he did not, he ought to.

Mr. ROBINSON. Mr. President, the Senator from Oregon has come into the Chamber during the remarks of the Senator from Idaho. I wish to say to my friend the Senator from Idaho that my desire to leave the city is to meet engagements which will keep me absent for only a few days, and I had no thought of discussing the permanent adjournment of the Congress.

Mr. BORAH. I was not addressing my remarks to the Senator from Arkansas. I understand a personal matter calls him away, and I will do anything I can to convenience him. But so far as the Congress as a Congress is concerned, we have work to do here, unless the strike situation is solved, which of course we can not leave.

Mr. ROBINSON. I think that is true, and I think that the bill of the Senator from Idaho will be disposed of in due course. As he knows, I am supporting his bill. I observe that the Senator from Oregon is now present.

The Senator from Washington had the request for unanimous consent touching the adjusted compensation bill submitted by myself postponed until the Senator from Oregon [Mr. MCNARY], who was temporarily absent from the Chamber, could arrive. The request has been submitted substantially as follows, that when the Senate recess to-day it be until 10 o'clock Monday, and that upon convening on Monday the Senate proceed immediately to the consideration of the adjusted compensation bill; that after the hour of 3 o'clock on Monday no Senator shall speak more than once nor longer than 20 minutes upon any amendment that may be pending, or any amendment that may be offered. Ample opportunity will be afforded the Senator from Oregon and others who desire to discuss amendments to do so prior to the time the limitation of debate takes effect.

Mr. REED of Missouri. Would not the Senator be willing to modify it so as to make the limitation begin on Tuesday, instead of on Monday?

Mr. ROBINSON. I stated while the Senator from Missouri was out that if the limitation is to effect the purpose which I have in mind, it shoulld go into effect not later than 3 o'clock on Monday. I want to get a vote on the bill Tuesday.

Mr. MCNARY. Mr. President, I assume that to be a tender of a unanimous-consent agreement by the Senator from Arkansas. I could not consent to a unanimous-consent agreement in that form at this time. There are a number of Senators who I know want to discuss various phases of the bill for perhaps an hour or more. Three or four speeches are to be delivered on Monday which appertain to the principles involved in the bonus bill. I want to speak on a very important amendment, one which means much to the soldiers of the country who desire farms and to the development of the South and West. I do not know whether I shall speak one hour or two. I do not occupy much of the time of the Senate, and when I have a very important measure to present I am not going to be limited to a speech of one hour or two hours.

Mr. ROBINSON. Mr. President, the Senate has become accustomed to somewhat lengthy sessions, and even to night sessions. I suggest to the Senator from Oregon that if desirable the Senate might hold a session Monday night. This bill has been before the Senate for a long time; the importance of the amendment to be submitted by the Senator from Oregon is recognized by all of us; but under the method by which we are proceeding, it is indicated that without some limitation on the debate no conclusion respecting the bill will be reached at an early date; and I do feel that the Senator from Oregon ought to consent to this arrangement. I hope he will do so.

Mr. MCNARY. Mr. President, I would go a long way to accommodate the Senator from Arkansas, who is always accommodating. I know he appreciates the very great value of the amendment which I intend to advocate to the bonus bill. I would rather have the time for a final vote set at a later hour

than 4 o'clock on Tuesday, and particularly do I object at this time to a limitation of debate to 20 minutes after 3 o'clock on Monday. The Senator from Idaho is going to make a speech, the Senator from New York is to make a speech, and there are quite a number of western and southern Senators who want to discuss the reclamation amendment, and the hour of 3 o'clock might arrive before it had been intelligently presented by those who are in favor of the proposed legislation. For that reason I could not consent to a limitation of debate after 3 o'clock on Monday.

Mr. ROBINSON. Very well; I will modify the request, then, so that the limitation of debate may go into effect at 6 o'clock, which will give eight hours, under the arrangement, for general debate, prior to any limitation taking effect.

Mr. McNARY. That is, by meeting at 10 o'clock in the morning?

Mr. ROBINSON. At 10 o'clock.

Mr. McNARY. Ten o'clock is pretty early. I will object to that on general principles.

Mr. ROBINSON. Will not the Senator speak louder? We can not hear him over here.

Mr. McNARY. Ten o'clock is too early to meet, for various reasons obvious to anyone. I would agree to 11 o'clock in the morning and 6 in the evening.

Mr. ROBINSON. Very well, I will modify the request again to meet that suggestion. My original suggestion was that we meet at 11 o'clock. I do not know just what the obvious reasons against meeting at 10 in the mind of the Senator from Oregon is, but since he says that it is obvious I take it that everybody else must see it but me.

The PRESIDING OFFICER. The Senator from Arkansas proffers a request for unanimous consent, which the Secretary will state.

The reading clerk read as follows:

It is agreed by unanimous consent that when the Senate concludes its business to-day the Senate recess until 11 o'clock a. m., Monday, August 28, 1922, and proceed at once to the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes, and that after the hour of 6 o'clock p. m. on said calendar day no Senator shall speak more than once or longer than 20 minutes upon any amendment that may be pending or any amendment that may be offered thereto.

Mr. DIAL. Mr. President, I always love to be agreeable, and I will not object if there are not going to be any night sessions. I draw the line at night sessions.

I did intend to say something about the coal bill to-day, but I am not going on with that now. I am sorry that I have to differ with my friends around me here and also with my good friend from Idaho on the other side about Congress continuing in session. Our being here has gotten this coal matter into a great muddle. It has cost the people of my section hundreds and thousands of dollars, and I am unable to get any information from Mr. Hoover or from the Interstate Commerce Commission or from anybody as to their authority for meddling into the private affairs of the people.

My constituents have contracts for coal at a fixed price for 12 months and yet they can not get it unless they go to some one of these Government officials, who are acting without any legal authority, to get a priority order, and they can not get that order unless they agree to pay about twice the amount for coal they have contracted for.

We live under a constitutional form of government. I protest against Government officials transgressing their authority. The rights and duties of the people, including Cabinet officers, are laid down by statutes. We have come to the point where the public officials are violating the law, and they are creating great suspicion in the minds of the consumers of coal as to why this is done. I do not want to cast any reflection or suspicion upon anybody, but these officials failed to reply to a polite letter which I wrote them and I desire to get the information by Monday morning. I know of my own knowledge, because I am the president of a company which uses coal, that the operators are willing to deliver coal at the agreed price, but the Government agencies interfere and do not let them do it.

I think about the best motion that could be made would be that Congress adjourn sine die. Then the people at home would go to work and they would quit looking and sending to Washington. It is a sad day for the industries of this country when the people have to come here and let some official dole out the coal to them, to turn the wheels of the enterprises of the country.

Mr. REED of Missouri. Mr. President——

Mr. McCUMBER. I wish we could settle the question of the unanimous-consent request, at least, as I have to get back to the conference committee soon.

Mr. REED of Missouri. I just want to ask the Senator one question.

Mr. DIAL. I yield for that purpose.

Mr. REED of Missouri. The Senator has complained of interference with his coal deliveries by a Cabinet officer and suggests as a remedy that Congress adjourn. Would it not be more in keeping if the Congress stayed in session and enacted a law to send to the penitentiary any officer of the Government who proceeded to usurp any authority that he does not possess.

Mr. DIAL. In reply to that, I am contemplating presenting an amendment to the bill offered by the Senator from Idaho to require the United States Government to pay whatever damage has been inflicted upon the people by reason of having their coal deliveries interfered with.

Mr. BORAH. The Senate would have to stay here a good while in session, I am afraid, if we got that kind of controversy in here. The trouble of which the Senator speaks is not with the Congress but it is with those who are acting without authority.

Mr. DIAL. I am complaining about officials acting without authority. I think we pass too many laws.

Mr. BORAH. The complaint has been on the Senator's side of the Chamber for the last two or three days that we have not passed any laws at all.

Mr. DIAL. No; I think we have too many laws in this country. If we would enforce the laws we already have, we would be much better off. Let the people carry on their enterprises without pernicious interference of the Government.

The PRESIDING OFFICER. The question is upon the unanimous-consent request submitted by the Senator from Arkansas, and which has been read. Without objection, it is agreed to.

Mr. McCUMBER. Now, let the pending amendment be stated.

The PRESIDING OFFICER. The pending question is the amendment offered by the Senator from New Mexico [Mr. BURSUM] in the nature of a substitute.

Mr. UNDERWOOD. I rise, Mr. President, merely to explain my position in reference to the pending amendment. As everybody knows, I am opposed to any form of service pension. Call it a bonus bill, call it an adjusted compensation bill, call it what you please, if it is a pension or gift merely for service and nothing else, I shall not vote for it. But I do have some choice and selection among the amendments which are now before us, although I will say candidly that, regardless of which amendment is adopted, I shall vote against the bill finally.

I favor the proposal of the Senator from New Mexico, the pending amendment, over the bill originally reported by the Senator from Idaho, and I do so for the reason I shall state. There is but little difference between the bill and the amendment in the general features. However, the amendment proposes to pay the bonus of $1 a day to the men who served in this country and $1.25 a day to those who served abroad as a cash bonus; that is, to pay the first half next year as soon as the rolls can be made up and the other half within two years at 3½ per cent interest on the deferred payment. I believe that would be more satisfactory to the recipients of the gift in the first place, and in the next place it would save the Government in the end from $1,000,000,000 to $1,500,000,000, because the interest rates in the pending bill run very high and largely increase the amount in the end which we would have to pay.

So, as I see it, I believe that the proposed amendment in the form of a substitute would probably be more satisfactory to the recipients of the bonus and at the same time we would save the Government of the United States far in excess of a billion dollars. That is the reason why I shall support the pending amendment.

The PRESIDING OFFICER (Mr. REED of Pennsylvania in the chair). The question is on the amendment offered by the Senator from New Mexico [Mr. BURSUM] to the amendment of the committee.

Mr. JONES of Washington. Mr. President, I want to make a parliamentary inquiry at this point. I understand the amendment of the Senator from New Mexico is in the nature of a substitute for the pending bill.

The PRESIDING OFFICER. It is.

Mr. JONES of Washington. I inquire whether amendments to the text of the bill should not be offered before that substitute is voted upon and, if they are not offered, then if the substitute should be adopted, would any amendments be in order to the text of the bill?

The PRESIDING OFFICER. The Chair understands that amendments to the amendment of the committee would not be in order after the adoption of the substitute.

Mr. JONES of Washington. That is what I understood. So if any amendments are to be made to the amendment of the

committee they should be offered before the substitute is voted upon.

The PRESIDING OFFICER. The Chair so understands.

Mr. McNARY. Mr. President, with that ruling in mind and in order to preserve the rights which I want to present with reference to House bill 10874 I offer the amendments which I send to the desk to the amendment of the committee.

The PRESIDING OFFICER. The Senator from Oregon offers the following amendments, which the Secretary will report.

The READING CLERK. On page 1, line 7, after the word "veteran," insert a comma and "except in Title VIII."

On page 6, line 19, after the semicolon, insert "or."

On page 6, line 21, after the semicolon, strike out down to and including line 23.

On page 8, line 7, strike out "or land settlement aid."

Strike out Title VIII and insert in lieu thereof the following:

TITLE VIII.—LAND RECLAMATION.

SEC. 801. That when used in this title—

(a) The term "Secretary" means the Secretary of the Interior.

(b) The term "board" means the Federal Farm Loan Board.

(c) The term "district" means any district organized under the law of any State to provide for the agricultural reclamation of lands by irrigation, drainage, or dikage, with authority to issue bonds which shall be a general charge against all lands within the district, and to contract with the United States under this title as provided herein.

(d) The term "farm" means an area of land within a reclamation project sufficient in size, in the opinion of the Secretary, to support a family, but not exceeding 160 acres of reclaimed land.

(e) The term "excess lands" means all lands in a single holding in excess of one established farm.

(f) The term "veteran" means any individual, a member of the military or naval forces of the United States in the war with Germany, the war with Spain, or in the suppression of the insurrection in the Philippines, and honorably discharged therefrom or placed in the Regular Army or Naval Reserves.

SEC. 802. That the Secretary is authorized to investigate the feasibility of reclaiming the lands within any district in any State under contract with the district. One-half the cost of investigation shall be advanced by the district and one-half by the United States. Upon determining that reclamation is feasible, the Secretary is authorized, under contract with the district, to construct the necessary works for the reclamation of the lands involved and to operate and maintain the project so long as such operation and maintenance are necessary, in the opinion of the Secretary, to safeguard the interests of the Government. The total cost of construction and of operation and maintenance, which shall include a just portion of overhead expenses, shall be paid by the district to the United States.

SEC. 803. That before construction of a project is commenced the sizes of farms therein shall be established and agreements shall be made effectively, subjecting not less than 80 per cent of the excess lands within the project to disposal by authority of the Secretary to settlers at prices and terms fixed in advance in such agreements. Such prices and terms shall be determined with the view of placing a bona fide and competent settler upon each farm of the project with the least possible delay.

SEC. 804. That when, in the opinion of the Secretary, a project has been fully completed and successfully operated for one season the Secretary shall fix the construction cost thereof, which shall include the total cost of investigation, the expense of selling district bonds under section 805, interest at not exceeding 5 per cent per annum upon all sums advanced by the United States in the construction thereof, and the cost of operating and maintaining the project to the date of fixing such cost. This total cost the district shall agree to pay to the United States within a period not exceeding 40 years, with interest thereon at not exceeding 5 per cent per annum: *Provided*, That upon receipt by the United States from the proceeds of district bonds, as provided in section 805, of such total cost with interest, the obligation of the district to the United States for construction shall be satisfied: *Provided further*, That upon the receipt of such total cost the moneys advanced by the district for investigation of the project shall be returned to the district. So long as the Government operates and maintains a project the district shall also pay to the United States annually, upon terms to be fixed by the Secretary, the total cost of operation and maintenance.

SEC. 805. That preceding any expenditure by the United States on account of construction of a project bonds of the district equal in face value to the amount of the proposed expenditure shall be duly issued and delivered to the United States. If at any time it should appear to the Secretary that the original bond issue is insufficient to cover the cost of the proposed work, he may either curtail the work or require the district to issue additional bonds, and when the total cost of the completed project has been determined under section 804, all bonds issued in excess of such cost shall be canceled. The bonds shall be in form approved by the Secretary and shall run for a period not exceeding 40 years, bear interest at a rate to be fixed by the Secretary, not exceeding 5 per cent, payable annually, and be issued in denominations of $25, $50, $100, $500, and $1,000. These bonds shall be deposited with the board, and when the project cost is known and the value of all of the property of the district subject to assessment for the payment of the bonds shall reach twice the par value of the bonds as found by the said board, the board shall offer the bonds at public or private sale at not less than par under terms and conditions to be provided by rules and regulations to be made by said board. The moneys received from the sale of the bonds shall be credited upon the district contract. Prior to sale of the bonds the board shall collect all moneys due thereon, and the same shall likewise be credited upon the district contract.

SEC. 806. That unentered and unpatented arid and semiarid lands of the United States susceptible of reclamation may be included in a district and may be subjected to the provisions of the act of August 11, 1916 (39 Stat. 506), in accordance with the terms of said act: *Provided*, That the final proviso of section 1 of the act shall not apply: *Provided further*, That while the unentered public lands within a district constitute more than 50 per cent in area of the lands therein the Secretary shall have the right to appoint upon the district board such number of persons to represent the interests of the United States as shall constitute a majority of the board. Unentered public land withdrawn under the provisions of the act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof or supplementary thereto, may, in the discretion of the Secretary, be included in a district. All unentered public land so included in a district shall be opened under the provisions of the homestead law and also, so far as applicable, of said act of June 17, 1902, as amended and supplemented.

SEC. 807. That the United States may acquire lands hereunder for construction, but not for agricultural purposes: *Provided*, That the Secretary is authorized to accept, by gift, deed in trust, or otherwise, land within any district and dispose of the same upon terms and conditions to be agreed upon with the grantor or later fixed by the Secretary.

SEC. 808. That in the construction of every project under this act the Secretary shall, so far as practicable, utilize the services of veterans. In every opening or sale of land by authority of the Secretary under this title veterans shall have the exclusive right, for a period of 60 days, to make entry or otherwise acquire the land: *Provided*, That in the event such an entry shall be relinquished at any time prior to actual residence upon the land by the entryman for not less than one year, lands so relinquished shall not be subject to entry for a period of 60 days after the filing and notation of the relinquishment in the local land office, and shall, after the expiration of such 60-day period, be subject to entry by the first qualified applicant.

SEC. 809. That the act of June 17, 1902 (32 Stat., p. 388), and all amendatory or supplementary acts shall hereafter be known as the national irrigation law, and the fund provided for by said law shall hereafter be known as the national irrigation fund. This title and all acts amendatory or supplementary to such title shall be known as the national reclamation law, and for the purpose of carrying out its provisions there is hereby established in the Treasury a fund to be known as the national reclamation fund. There is hereby authorized to be appropriated from any moneys in the Treasury not otherwise appropriated the sum of $350,000,000, to be transferred from time to time to the national reclamation fund and appropriated upon estimates made by the Secretary for carrying out the provisions of this title. All moneys received by the United States under this title shall be paid into the national reclamation fund, and all moneys at any time in said fund shall be available for appropriation for the purposes of this title.

SEC. 810. That the Secretary is hereby authorized to perform any and all acts and to make such rules and regulations as may be necessary for carrying out the provisions of this title.

On page 42, line 9, after "VI," insert "or."

On page 42, line 9, strike out "or VIII."

Mr. McNARY. Mr. President, in view of the ruling of the Chair, I have proposed this amendment, which I did not intend to offer until Monday morning next. I am not prepared to go forward this afternoon in the discussion of the amendment. I understand that it is the desire of the Senator from Idaho [Mr. BORAH] to complete the consideration of the coal commission bill. Therefore, I hope that my expressed desire that this amendment may go over until Monday may be granted by the chairman of the committee, and that the Senate may proceed with the consideration of the coal bill. There may be Senators who are interested in this measure who desire to discuss it, but for my part I do not care to have a vote on it or to present my argument until Monday.

Mr. UNDERWOOD. Mr. President, I do not desire to interfere with the wishes of the Senator from Oregon; in fact, if I understand the situation correctly, I expect to vote with him on his amendment; but, I think, now that we have agreed as to the pending bill that the general debate shall close on Monday, the bill certainly should not be laid aside in order to take up some other measure.

Mr. McCUMBER. The agreement does not extend that far. The unanimous-consent agreement provides only for a limitation of debate to 20 minutes on amendments after 6 o'clock on Monday. Under the unanimous-consent agreement a Senator may speak on the bill just as long as he wishes. I was sorry that we did not go further than that, but I thought we had made some headway in getting that far along.

Mr. UNDERWOOD. Then, I did not understand the situation. I thought the general debate was limited on Monday after 6 o'clock.

Mr. McCUMBER. No.

Mr. ROBINSON. No. The Senator from Idaho [Mr. BORAH] stated that until the amendments were practically disposed of he could not tell what form the bill would take, and that he would reserve the right to debate the bill at length.

Mr. UNDERWOOD. Then there is practically no limitation of debate on the pending bonus bill?

Mr. McCUMBER. There is a limitation of debate only as to amendments.

Mr. ROBINSON. There is a limitation of debate on all amendments, but that does not go into effect until 6 o'clock on Monday. There is now no limitation on debate.

Mr. UNDERWOOD. Then I understand that after 6 o'clock on Monday a Senator may speak on the bill as long as he wishes to?

Mr. McCUMBER. Yes.

Mr. ROBINSON. That is true.

Mr. UNDERWOOD. I do not see that there is much of a limitation of debate in that agreement.

Mr. McCUMBER. We did not gain very much, but I thought we had better get what we could.

Mr. ROBINSON. It was thought that agreement would lead, perhaps, to a further limitation, but it certainly is a material limitation that after 6 o'clock on Monday on any amendment which may be before the Senate debate shall be limited to 20 minutes until the amendments shall have been disposed of.

Mr. BORAH. I have not any doubt if we dispose of the amendments on Monday that we shall vote on the bill on Tuesday, and I have not any desire whatever to prolong the discussion. I simply wish to discuss it to a limited extent after the bill shall have been finally made up.

Mr. ASHURST. Mr. President——

The PRESIDING OFFICER. The Senator from Arizona.

Mr. ASHURST. If some other Senator wishes to be recognized in order to address the Senate on the pending amendment, I will yield.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oregon [Mr. McNARY].

Mr. ASHURST. On that I wish to be heard.

Mr. BURSUM. Mr. President——

Mr. ASHURST. I yield to the Senator from New Mexico.

Mr. BURSUM. I simply desire to make a request. There are a number of Senators who are absent who left the city with the impression and understanding that there would be no vote on the amendment which I offered until Monday next. Some of those Senators desire further to discuss the question. In view of that fact, I ask the chairman of the committee to permit the amendment to go over until Monday next.

Mr. McCUMBER. I do not feel that I would be doing absolute justice by consenting further to continue the matter of voting upon the amendments, but I certainly do not wish to take advantage of Senators who have even erroneously obtained the idea that there would be no vote upon the amendments to-day. In view of the fact that we have entered into a unanimous-consent agreement under which the time will very soon come in which discussion upon any particular amendment will be limited to 20 minutes, leaving an unlimited time to debate the bill itself, I am not disposed to press a vote upon the amendments. I should be glad, however, if Senators who wish to discuss them would discuss them this afternoon if they can do so. With that understanding I shall make no objection to the amendments going over until Monday.

Mr. LENROOT. Will the Senator yield to me?

Mr. ASHURST. I yield to the Senator.

Mr. LENROOT. In view of the request of the Senator from New Mexico, I desire to offer an amendment which may become the pending question and the Senate may vote upon it or not, as it sees fit.

Mr. JONES of Washington. There is an amendment now pending.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oregon [Mr. McNARY] which takes precedence over the amendment which has been offered by the Senator from New Mexico.

Mr. WALSH of Massachusetts. Mr. President, will the Senator from Arizona yield to me to present two amendments?

Mr. ASHURST. I yield at this time for that purpose.

Mr. WALSH of Massachusetts. I thank the Senator. I ask unanimous consent out of order to submit two amendments which I intend to offer at a later time to the so-called soldiers' compensation bill. I ask that they may be printed and lie on the table.

The PRESIDING OFFICER. The Senator from Massachusetts asks unanimous consent to present two amendments to the adjusted compensation bill. Without objection, the amendments will be received, printed, and lie on the table.

Mr. WALSH of Massachusetts. I appreciate the courtesy of the Senator from Arizona.

Mr. POMERENE. Mr. President, the Senator from Massachusetts has just offered sundry amendments which will not be available for Senators to read unless they appear in the CONGRESSIONAL RECORD. I wish to ask that they may be printed in to-day's proceedings, so that we may read them in the RECORD.

Mr. WALSH of Massachusetts. Mr. President, I appreciate the Senator's suggestion. I think, at least, one of the amendments should be printed in the RECORD. The other is in the nature of a substitute for the committee bill. I will state very briefly what these are, if the Senator from Arizona will again permit me.

Mr. ASHURST. I yield.

Mr. WALSH of Massachusetts. The first amendment proposes to pay the ex-service men at once and in full the amount of adjusted compensation due them. It provides for cash payment and abolishes the 20-year-certificate plan. My amendment will pay one and a half billion dollars immediately instead of $7,000,000,000 in 20 years. There are several Senators who have raised the objection to the pending bill—and I am going to support the pending bill, if I can not get something better—that it is uneconomical from the standpoint of the Government, in that by postponing the payment of this compensation we will ultimately pay from $5,000,000,000 to $7,000,000,000 instead of paying $1,500,000,000 immediately. If there is a moral obligation to pay our ex-service men additional compensation, why should it not de done at once and without any strings?

The other amendment, which I will be glad to have printed in the RECORD, provides another option to the pending bill, an option that will be taken advantage of by those soldiers who are now carrying insurance. There are nearly 500,000 soldiers carrying Government insurance, and the option proposed by the amendment will permit them to have their adjusted compensation applied to the payment of premiums on their insurance policies. I have ascertained that many of these young men find it very hard to pay $10, $15, or $20 a month on their insurance and at the same time go to school and pay to obtain their education. Several of the young men who are clerks in the Senate Office Building called my attention to that fact, one of whom, the secretary to one of our Senators, has to pay out $240 a year in insurance premiums. He would be entitled under this bill to $625, with interest, in the form of an adjusted service certificate, but not available for 20 years; but if that money could be applied to the payment of his premiums on his Government insurance, it would relieve him for the next few years and enable him to devote his earnings to the acquirement of an education. So I think there is considerable merit and there will be more or less interest and support of the amendment which gives an option to soldiers to have the money which they will get under this bill applied to the payment of their insurance premiums. Why do these men need another small insurance policy or certificate, such as is provided for in Title V? Why not let the money found to be due them be applied on the premiums to become due on their present Government insurance?

The PRESIDING OFFICER. Without objection, the amendments intended to be proposed by the Senator from Massachusetts will be printed in the RECORD.

The amendments intended to be proposed by Mr. WALSH of Massachusetts are as follows:

To be inserted on page 13, line 4, following the period after the word "veteran."

SEC. 501. (a) The Secretary of the Treasury, upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, is hereby directed to issue without cost to the veteran designated therein an adjusted service insurance certificate, of a face value equal to the sum of the adjusted service credit of the veteran, increased by 50 per cent. The adjusted service insurance certificate shall be dated, and all rights conferred under the provisions of this subsection shall take effect as of the 1st day of the second month, next succeeding the date of filing the application, but in no case before January 1, 1923. The Director of the Veterans' Bureau shall apply this adjusted service insurance certificate to the payment of premiums on the policy of insurance which the veteran holds with the Veterans' Bureau at the time the application is made, the conditions then existing in regard to the policy being thereby unchanged by adjusted service insurance payment of premiums and such payment of premiums shall be regarded as payment with money. From the commencement of the application of the adjusted service insurance certificate to the payment of premiums the payment of further premiums by the veteran holding the policy shall not be required until the adjusted service insurance certificate shall be exhausted by such application, the premiums to be computed annually, then semiannually, then quarterly, then monthly, and if then a balance remains from the adjusted service insurance certificate it shall be allowed on the first payment of premiums made thereafter by the veteran. The Director of the Veterans' Bureau shall give notice to the veteran the time such adjusted service insurance certificate will be exhausted, both at the time the application of the adjusted service insurance certificate to the payment of premiums commences, and also not more than four months and not less than 60 days before such time of exhaustion of the adjusted service insurance certificate. These notices must be written and sent to the last-known address of the veteran. If the veteran proves that he did not receive the last notice, irrespective of whether he received the first notice, the veteran shall be given one year from the date of the exhaustion of the adjusted service insurance certificate to reinstate his insurance. Such proof required shall be reasonable and the veteran shall be given the benefit of the doubt. In the event that the last notice was not sent by the Veterans' Bureau to the last-known address of the veteran, the policy will continue effective for six months, subject to being reinstated, under the provisions of this subsection, within a year, the above six months being included. In the event such notice was sent to the last-known address of the veteran and he did not receive it the policy becomes ineffective from the time of the exhaustion of the adjusted service insurance certificate, subject to becoming effective again upon the payment of premiums by the veteran within the year named. Premiums due from the time the adjusted service certificate is exhausted to the time payment of premiums is resumed by the veteran shall not be demanded, but if the veteran holds a time policy such time as premiums were not paid shall be added to the time premiums should be paid under the original contract of insurance.

Also, on page 6, line 16, after the comma following the word "certificate," insert "or adjusted service insurance certificate."

Also, on page 8, line 5, after the comma following the word "aid," insert "or adjusted service insurance certificate."

STATEMENT IN EXPLANATION OF PROPOSED AMENDMENT.

The purpose of this amendment, known as section 501 (a), is not to change or in any way alter the terms of the present bill, but merely to add another provision, which the veteran carrying Government insurance can exercise his option in taking. It does not prevent him selecting any of the other features if he so desires.

Under the bill as it has been reported, in Title V, the veteran, by refraining from taking other features of the bill, may, after 20 years, have paid-up insurance in the approximate amount of three times the amount his service entitles him to. This insurance, however, would be in addition to any insurance he might be carrying now with the Veterans' Bureau. It does not relieve him of paying the premiums which he now has to pay on the last-mentioned insurance.

This amendment, so far as the amount will go, authorizes the Director of the Veterans' Bureau to apply the adjusted service insurance certificate to the payment of premiums. It does not relieve permanently the payment of premiums by the veteran, but does relieve the payment of premiums for the time the amount of this certificate lasts. Neither does it change in any way the terms of the policy which the veteran now holds.

It will not cost the Government as much as the adjusted service certificate, as payment of insurance is delayed until the death of the veteran, and the insurance under the adjusted service certificate will approximate more in proportion. It does, however, without additional cost to the Government, mean a cash saving to the veteran at this time in his life when cash means the most to him. Although it is to be hoped the veteran will not drop his insurance, if, however, he ever did so in the future, it would not cost the Government anything except the insurance risk while the policy was in force.

Amendment (in the nature of a substitute) intended to be proposed by Mr. WALSH of Massachusetts to the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes, viz, strike out all after the enacting clause and insert the following:

TITLE I.—DEFINITIONS.

SECTION 1. This act may be cited as the "World War adjusted compensation act."

SEC. 2. As used in this act—

(a) The term "veteran" includes any individual, a member of the military or naval forces of the United States at any time after April 5, 1917, and before November 12, 1918, but does not include (1) any individual at any time during such period or thereafter separated from such forces under other than honorable conditions, (2) any conscientious objector who performed no military duty whatever or refused to wear the uniform, or (3) any alien at any time during such period or thereafter discharged from the military or naval forces on account of his alienage;

(b) The term "oversea service" means service on shore in Europe or Asia, exclusive of China, Japan, and the Philippine Islands; and service afloat, not on receiving ships, including in either case the period from the date of embarkation for such service to the date of disembarkation on return from such service, both dates inclusive;

(c) The term "home service" means all service not oversea service;

(d) The term "adjusted service credit" means the amount of the credit computed under the provisions of Title II; and

(e) The term "person" includes a partnership, corporation, or association, as well as an individual.

TITLE II.—ADJUSTED SERVICE CREDIT.

SEC. 201. The amount of adjusted service credit shall be computed by allowing the following sums for each day of active service, in excess of 60 days, in the military or naval forces of the United States after April 5, 1917, and before July 1, 1919, as shown by the service or other record of the veteran: $1.25 for each day of oversea service, and $1 for each day of home service; but the amount of the credit of a veteran who performed no oversea service shall not exceed $500, and the amount of the credit of a veteran who performed any oversea service shall not exceed $625.

SEC. 202. In computing the adjusted service credit no allowance shall be made to—

(a) Any commissioned officer above the grade of captain in the Army or Marine Corps, lieutenant in the Navy, first lieutenant or first lieutenant of engineers in the Coast Guard, or passed assistant surgeon in the Public Health Service, or having the pay and allowances, if not the rank, of any officer superior in rank to any of such grades—in each case for the period of service as such;

(b) Any individual holding a permanent or provisional commission or permanent or acting warrant in any branch of the military or naval forces, or (while holding such commission or warrant) serving under a temporary commission in a higher grade—in each case for the period of service under such commission or warrant or in such higher grade after the accrual of the right to pay thereunder. This subdivision shall not apply to any noncommissioned officer;

(c) Any civilian officer or employee of any branch of the military or naval forces, contract surgeon, cadet of the United States Military Academy, midshipman, cadet of the Coast Guard, member of the Reserve Officers' Training Corps, member of the Students' Army Training Corps (except an enlisted man detailed thereto), Philippine Scout, member of the Philippine Guard, member of the Philippine Constabulary, member of the Porto Rico Regiment of Infantry, member of the National Guard of Hawaii, member of the insular force of the Navy, member of the Samoan native guard and band of the Navy, or Indian Scout—in each case for the period of service as such;

(d) Any individual entering the military or naval forces after November 11, 1918—for any period after such entrance;

(e) Any commissioned or warrant officer performing home service not with troops and receiving commutation of quarters or of subsistence—for the period of such service;

(f) Any member of the Public Health Service—for any period during which he was not detailed for duty with the Army or the Navy;

(g) Any individual granted a farm or industrial furlough—for the period of such furlough; or

(h) Any individual detailed for work on roads or other highway construction or repair work—for the period during which his pay was equalized to conform to the compensation paid to civilian employees in the same or like employment, pursuant to the provisions of section 9 of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1920, and for other purposes," approved February 28, 1919.

SEC. 203. (a) The periods referred to in subdivision (e) of section 202 may be included in the case of any individual if and to the extent that the Secretary of War and the Secretary of the Navy jointly find that such service subjected such individual to exceptional hazard. A full statement of all action under this subdivision shall be included in the reports of the Secretary of War and the Secretary of the Navy required by section 307.

(b) In computing the credit to any veteran under this title effect shall be given to all subdivisions of section 202 which are applicable.

(c) If part of the service is oversea service and part is home service, the home service shall first be used in computing the 60 days' period referred to in section 201.

(d) For the purpose of computing the 60 days' period referred to in section 201, any period of service after April 5, 1917, and before July 1, 1919, in the military or naval forces in any capacity may be included, notwithstanding allowance of credit for such period, or a part thereof, is prohibited under the provisions of section 202, except that the periods referred to in subdivisions (b), (c), and (d), of that section shall not be included.

(e) For the purposes of section 201, in the case of members of the National Guard or of the National Guard Reserve called into service by the proclamation of the President dated July 3, 1917, the time of service between the date of call into the service as specified in such proclamation and August 5, 1917, both dates inclusive, shall be deemed to be active service in the military or naval forces of the United States.

TITLE III.—GENERAL PROVISIONS.

OPTIONAL PLANS.

SEC. 301. Each veteran shall have the right to avail himself of any one, but only one, of the following plans:

(1) To receive "adjusted service pay," as provided in Title IV;
(2) To receive "vocational training aid," as provided in Title V;
(3) To receive "farm or home aid," as provided in Title VI; or
(4) To receive "land settlement aid," as provided in Title VII.

APPLICATION BY VETERAN.

SEC. 302. (a) The veteran's choice among the plans enumerated in section 301 shall be made by application filed with the Secretary of War, if he is serving in, or his last service was with, the military forces; or with the Secretary of the Navy, if he is serving in, or his last service was with, the naval forces.

(b) Such application may be made at any time after the passage of this Act.

(c) An application shall be made (1) personally by the veteran, or (2) in case physical or mental incapacity prevents the making of a personal application, then by such representative of the veteran and in such manner as the Secretary of War and the Secretary of the Navy shall jointly by regulation prescribe. An application made by a representative other than one authorized by any such regulation shall be held void.

(d) The Secretary of War and the Secretary of the Navy shall jointly make any regulations necessary to the efficient administration of the provisions of this section.

PROOF OF VETERAN'S CHOICE OF PLAN.

SEC. 303. (a) As soon as practicable after the receipt of a valid application the Secretary of War or the Secretary of the Navy, as the case may be, shall transmit to the Director of the United States Veterans' Bureau if the veteran has chosen vocational training aid, or to the Secretary of the Interior if the veteran has chosen farm or home aid or land settlement aid, a certificate setting forth—

(1) That the applicant is a veteran;
(2) His name and address;
(3) The plan chosen; and
(4) The amount of his adjusted service credit.

(b) Upon receipt of such certificate the officer to which it is transmitted shall proceed to extend to the veteran the benefits conferred by the plan chosen, as provided for in this act.

PUBLICITY.

SEC. 304. (a) The Secretary of War and the Secretary of the Navy shall, as soon as practicable after the passage of this act, jointly prepare and publish a pamphlet or pamphlets containing a digest and explanation of the provisions of this act, accompanied by such statements as to the comparative advantages of each of the plans enumerated in section 301 as may be of assistance to veterans in making their choice among such plans; and shall from time to time thereafter jointly prepare and publish such additional or supplementary information as may be found necessary.

(b) The officer having charge of the administration of any plan or part thereof enumerated in section 301 shall transmit to the Secretary of War and the Secretary of the Navy as soon as practicable after the passage of this act full information and explanations as to the matters of which such officer has charge, which shall be considered by the Secretary of War and the Secretary of the Navy in preparing the publications referred to in subdivision (a).

(c) The publications provided for in subdivision (a) shall be distributed in such manner as the Secretary of War and the Secretary of the Navy may determine to be most effective to inform veterans of their rights under this act.

STATISTICS.

SEC. 305. Immediately upon the passage of this act the Secretary of War and the Secretary of the Navy shall ascertain the individuals who are veterans as defined in section 2 and, as to each veteran, the number of days of overseas service and of home service, as defined in section 2, for which he is entitled to receive adjusted service credit, and their decisions shall not be subject to review by the General Accounting Office.

ADMINISTRATIVE REGULATIONS.

SEC. 306. Any officer charged with any function under this act shall make such regulations, not inconsistent with this act, as may be necessary to the efficient administration of such function.

REPORTS.

SEC. 307. Any officer charged with the administration of any plan under this act, or of any part thereof, shall make a full report to Congress on the first Monday of December of each year.

EXEMPTION FROM ATTACHMENT AND TAXATION.

SEC. 308. No sum payable under this act to a veteran, or to his estate, shall be subject to attachment, levy, or seizure under any legal or equitable process, or to National or State taxation.

UNLAWFUL FEES.

SEC. 309. Any person who charges or collects, or attempts to charge or collect, either directly or indirectly, any fee or other compensation for assisting in any manner a veteran in obtaining any of the benefits

or privileges to which he is entitled under the provisions of this act shall, upon conviction thereof, be subject to a fine of not more than $500, or imprisonment for not more than one year, or both.

TITLE IV.—ADJUSTED SERVICE PAY.

SEC. 401. There shall be paid to any veteran, as soon as practicable after receipt of an application in accordance with the provisions of section 302, and in addition to any other amounts due him in pursuance of law, the amount of his adjusted service credit.

SEC. 402. Payment shall be made by the Secretary of War if the veteran is serving in, or his last service was with, the military forces; and by the Secretary of the Navy if he is serving in, or his last service was with, the naval forces.

SEC. 403. If the veteran dies after making application in accordance with the provisions of section 302 for adjusted service pay and before receiving payment, payment shall be made to his estate.

SEC. 404. No right to adjusted service pay under the provisions of this title shall be assignable or serve as security for any loan. Any assignment or loan made in violation of the provisions of this section shall be held void. The Secretary of War and the Secretary of the Navy shall not pay the amount of adjusted service pay to any person other than the veteran or his estate or such representative of the veteran as the Secretary of War and the Secretary of the Navy shall jointly by regulation prescribe.

TITLE V.—VOCATIONAL TRAINING AID.

SEC. 501. The Director of the United States Veterans' Bureau (hereafter in this title referred to as the "director") upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, is hereby directed to pay to the veteran designated therein (if he is not receiving the benefits of the vocational rehabilitation act, as amended) the sum of $1.75 for each day of his attendance (on or after January 1, 1923) on a course of vocational training previously approved by the director as suitable for such veteran. Such payments shall be made without deduction for Sundays, holidays, or vacations not exceeding two weeks in duration, or for absence for other cause which the director deems justifiable; but the total payment shall not exceed 140 per cent of the amount of the adjusted service credit of the veteran.

Payments under this section shall be made monthly, or at more frequent intervals, as the director may determine generally or in special cases.

SEC. 502. The director shall establish such regulations as will insure the regular attendance of the veteran on his course of training, and no sum or sums shall be payable under this title unless the director has been furnished proof of such regular attendance. For each day of unjustifiable absence the veteran shall forfeit the sum payable for that day, and shall receive no reimbursement for it in any other form.

SEC. 503. If the payment under section 501 plus the amounts forfeited under section 502 is less than 140 per cent of the adjusted service credit, either by reason of the duration of the course approved, or by reason of the veteran's discontinuing, with the approval of the director, his attendance on his course of training, he shall be entitled to receive an amount equal to the difference between (1) his adjusted service credit and (2) that proportion thereof which the payments made or accrued under section 501 plus the amounts forfeited under section 502 bear to 140 per cent of his adjusted service credit: *Provided*, That from the amount thus computed there shall be deducted an amount equal to the sums forfeited under section 502.

SEC. 504. If before the completion of the payments under this title the veteran is separated from the military or naval forces under other than honorable conditions, or is discharged therefrom on account of his alienage, no further payments shall be made under this title.

SEC. 505. (a) If the veteran dies after making application in accordance with the provisions of section 302 and before any payments have been made or have accrued under this title, the amount of the adjusted service credit of the veteran shall be paid by the director to his estate.

(b) If the veteran dies after the course of training has begun, his estate shall be paid by the director the same amount as would have been paid to the veteran under section 503, treating for such purposes the date of his death as the date of discontinuance of attendance on his course of training.

SEC. 506. (a) The director is hereby authorized to cooperate with State boards for vocational education in such manner as will secure their assistance in the approval of courses of training for veterans, and other assistance in carrying out the provisions of this title.

(b) Whenever any State provides funds for assistance to veterans in attendance upon approved courses or provides for free tuition in approved educational institutions, the director is authorized and directed to cooperate with the State board for vocational education of such State in securing the maximum educational opportunities to veterans entitled to the benefits of this title.

TITLE VI.—FARM OR HOME AID.

SEC. 601. (a) The Secretary of the Interior upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, is hereby directed, on or after July 1, 1923, to pay to the veteran designated therein, in one payment or in installments, an amount equal to the following percentage of his adjusted service credit:

100 per cent, if the payment or the first installment thereof is made during the calendar year 1923;

105 per cent, if the payment or the first installment thereof is made during the calendar year 1924;

110 per cent, if the payment or the first installment thereof is made during the calendar year 1925;

120 per cent, if the payment or the first installment thereof is made during the calendar year 1926;

130 per cent, if the payment or the first installment thereof is made during the calendar year 1927; and

140 per cent, if the payment is made during the calendar year 1928 or thereafter.

(b) Such payment shall be made for the purpose, and only for the purpose, of enabling the veteran to make improvements on a city or suburban home, or to purchase or make payments on such a home or farm, or to pay off indebtedness existing on such a home or farm prior to the date of the application by the veteran under section 302.

SEC. 602. No such payment shall be made unless and until the Secretary of the Interior has approved the purpose for which it is desired by the veteran, and has suitable assurance that the money will be expended for such purpose. The Secretary of the Interior may, on his own motion, or at the option of the veteran, make the payment directly to the vendor or other person to whom such payment is due from the veteran.

SEC. 603. For the purpose of enabling him to pass upon the desirability of the investment, the Secretary of the Interior may make use of the services of land bank appraisers of the Federal Farm Loan Board, to be designated by the board.

SEC. 604. (a) If the veteran dies, after making application in accordance with the provisions of section 302 for farm or home aid and before a contract has been entered into with the approval of the Secretary of the Interior, the amount of his adjusted service credit shall be paid by the Secretary of the Interior to his estate; but no such payment shall be made if the veteran has been separated from the military or naval forces under other than honorable conditions or discharged therefrom on account of his alienage.

(b) If before the veteran's death a contract has been entered into with the approval of the Secretary of the Interior and payments under this title on such contract are still due, such payments shall be made by the Secretary of the Interior to the vendor or other person to whom such payments are due from the veteran.

TITLE VII.—LAND SETTLEMENT.

SEC. 701. On the opening of public or Indian lands to entry, or the restoration to entry of public lands theretofore withdrawn from entry, such opening or restoration shall, in the order therefor, provide for a period of not less than 60 days before the general opening of such lands to disposal, in which period veterans who have chosen the benefits of this title shall have a preferred right of entry under the homestead or desert land laws, if qualified thereunder, except as against prior existing valid settlement rights and as against preference rights conferred by existing laws or equitable claims subject to allowance and confirmation.

Such preference right to a veteran for such period shall also be accorded to him on all reclamation projects in existence at the time of the passage of this act, or hereafter established, whether such reclamation is made by irrigation, drainage, or other method.

Upon certification from the Secretary of War or the Secretary of the Navy, as provided in section 303, approved by the Secretary of the Interior, there shall be paid by the Secretary of the Treasury, on or after July 1, 1923, to the veteran designated therein, in one payment or in installments, an amount equal to his adjusted service credit increased by 25 per cent. Such payment shall be made for the purpose, and only for the purpose, of enabling the veteran to make payments in connection with the lands as to which preference has been given under this section, or for the improvement of any such land, and shall be made only if the Secretary of the Interior has suitable assurance that the money will be expended for such purpose.

TITLE VIII.—MISCELLANEOUS PROVISIONS.

SEC. 801. The officers having charge of the administration of any of the provisions of this act are authorized to appoint such officers, employees, and agents in the District of Columbia and elsewhere, and to make such expenditures for rent, furniture, office equipment, printing, binding, telegrams, telephone, law books, books of reference, stationery, motor-propelled vehicles or trucks used for official purposes, traveling expenses and per diem in lieu of subsistence at not exceeding $4 for officers, agents, and other employees, for the purchase of reports and materials for publications, and for other contingent and miscellaneous expenses as may be necessary efficiently to execute the purposes of this act and as may be provided for by the Congress from time to time. With the exception of such special experts as may be found necessary for the conduct of the work, all such appointments shall be made subject to the civil service laws; but for the purposes of carrying out the provisions of section 305 such appointments may be made without regard to such laws until the services of persons duly qualified under such laws are available. In all appointments under this section preference shall, so far as practicable, be given to veterans.

SEC. 802. If any provision of this act or the application thereof to any person or circumstances is held invalid, the validity of the remainder of the act and of the application of such provision to other persons and circumstances shall not be affected thereby.

SEC. 803. Whoever knowingly makes any false or fraudulent statement of a material fact in any application, certificate, or document made under the provisions of Title III, IV, V, VI, or VII, or of any regulation made under any such title, shall, upon conviction thereof, be fined not more than $1,000 or imprisoned not more than five years, or both.

SEC. 804. The Secretary of the Treasury, the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, and the Director of the United States Veterans' Bureau shall severally submit to Congress in the manner provided by law estimates of the amounts necessary to be expended in carrying out such provisions of this act as each is charged with administering, and there is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, amounts sufficient to defray such expenditures.

Mr. ASHURST. Mr. President, the amendment proposed by the Senator from Oregon [Mr. MCNARY] is the McNary-Smith reclamation bill. Some months ago the Senator from Oregon [Mr. MCNARY], chairman of the Committee on Irrigation and Reclamation, favorably reported that bill to the Senate. The main features of that bill, and therefore the main features of the proposed amendment, may be summarized as follows:

It contemplates a system of Federal reclamation, with the cooperation of State agencies, of swamp, overflowed, and arid lands.

It is proposed that as a construction fund there shall be established in the Treasury a national reclamation fund of $350,000,000; the amount to be transferred to this fund in any one year to be determined by Congress. (The amounts during the first years of the act should be relatively small; the whole sum should be contributed in a period of 10 or 12 years).

The present reclamation law remains untouched.

A reclamation project can only be initiated by a reclamation district, organized under the law of a State to provide for the agricultural reclamation of land by irrigation, drainage, or dikage, with authority to issue bonds to be a general charge

against all lands within the district, and to contract with the United States.

The Secretary of the Interior may investigate the feasibility of reclaiming land within any district, and may contract to build the reclamation works, the district issuing and placing with the Federal Farm Loan Board its 5 per cent interest-bearing bonds in ample amount to cover the estimated cost of the project.

When a project is completed and in successful operation it is turned over to the district; and when the property within the district answerable for the payment of the bonds has twice the value of the outstanding bonds, as that fact may be determined by the Federal Farm Loan Board, the board sells the bonds of the district and the proceeds are to be covered into the national reclamation fund, to be used in the construction of other projects. From this source the major portion of the moneys for Federal reclamation purposes will be derived.

It contemplates that the Government shall not reclaim for any one person more than a farm unit, or an area of land within a reclamation project sufficient in size, in the opinion of the Secretary, to support a family, but not exceeding 160 acres.

Lands within a project in excess of the farm unit are excess lands; and as to these lands, at prices and terms agreed upon between the owners thereof and the Secretary, and as to all public lands within a project, veterans shall have the preference right of purchase and entry, and the services of veterans as far as possible are to be used in construction of projects.

Mr. President, the Senators from Florida may congratulate themselves on this amendment. I believe they ought to, and I believe they will, support it. For years they have been pointing out, in private conversation and public speech, the necessity and the advisability of amending our national reclamation laws so that lands may be reclaimed by drainage as well as by irrigation.

We are not left to a mere conjecture as to reclamation. Consider the Salt River or Roosevelt project in Arizona. The Salt River project, according to the figures furnished me up to June 30, 1921, has cost $14,738,628, of which $4,800,000—round numbers—have been repaid to the Government. Last year there were shipped from other States of the Union—not merely into Arizona but into the region or valley of the Salt River project—7,935 loaded freight cars of goods, wares, and merchandise. I am not speaking of carloads of goods which went to other portions of the State, nor am I speaking of less-than-carload lots; but I repeat, that during the year 1920 there were shipped into the Salt River project in Arizona 7,935 carloads, and from the State of Wisconsin alone, so well represented in this Chamber by her two eminent Senators, there were shipped into the Salt River project 213 carloads of goods, wares, and merchandise, to be used and paid for by the people residing in the Salt River Valley.

I do not have at hand the figures showing the number of carloads of goods, wares, and merchandise which came from Wisconsin to the other project in Arizona and to other points in Arizona. But let it be remembered that in 1920 the State of Wisconsin furnished to the Salt River project alone 213 carloads of trade.

There are 30 irrigation projects in the United States at this time. The projects are the Salt River, Yuma, Orland, Grand Valley, Uncompahgre, Boise, King Hill, Minidoka, Garden City, Huntley, Milk River, St. Mary's storage, Sun River, Lower Yellowstone, North Platte, Newlands, Carlsbad, Hondo, Rio Grande, North Dakota pumping, Lawton, Umatilla, Deschutes, Klamath, Belle Fourche, Strawberry Valley, Okanogan, Yakima, Shoshone, Riverton, and various secondary projects. I leave it to the fertile faculties of Senators to estimate the number of carloads of merchandise of various kinds that the State of Wisconsin undoubtedly furnished in 1920 to each of these projects.

The State of Minnesota, so well represented here, furnished in 1920 to the Salt River project 40 carloads of goods, and I am speaking only of carload lots. I do not speak of shipments of less-than-carload lots, nor do I speak of shipments even of carload lots to other points than to the Salt River project.

When I refer to the Salt River project, I mean, for the purposes of this address, the Salt River Valley, in which the city of Phoenix is situated, and about 250,000 acres are irrigated in that valley.

The State of Ohio in 1920 furnished 225 carloads of merchandise of various kinds to be used by the people who reside in the Salt River Valley. I repeat, for the third time, I am not speaking of less-than-carload lots and that I am not in this address referring to merchandise in carload lots or otherwise shipped to other points in the State. I am speaking simply, solely, and only of carload lots going into the Salt River Valley, where the Salt River project is located.

The State of North Dakota, not a manufacturing State, purely an agricultural State, so well represented here, furnished one carload of products from within her borders to the people of the Salt River Valley. The State of Illinois in 1920 furnished 457 carload lots of merchandise to be used and paid for by the people residing within the Salt River project. Maine, where the sunlight first salutes the American flag upon the American coast, furnished 3 carload lots of merchandise in 1920 shipped into the Salt River project. California, out by the gates of sunset, furnished in 1920 to the citizens of the Salt River Valley 2,897 carloads of goods, wares, and merchandise, and no doubt some of these shipments came from the Atlantic coast into California via the Panama Canal, and were thence transshipped into the Salt River project.

Missouri during the same year furnished the Salt River project with 218 carloads of merchandise; Oregon, 502 carloads in 1920; and Texas sent to the Salt River project 981 carloads; whilst the saddlebags of the Arkansas Traveler brought to the Salt River project in the same year 26 carloads of fine wares and merchandise; West Virginia furnished 18 carloads; Massachusetts, 12; and New York, 67 carloads.

It would require a bold flight of the imagination to stand here and estimate the number of carloads of merchandise that were shipped into each and every one of the irrigation projects, 30 in number. They would reach scores of thousands. So I repeat that the senior Senator from Oregon [Mr. McNARY] wrote well when he wrote the penultimate paragraph of his great report on the McNary-Smith bill, wherein he said:

> The North and East should welcome the opportunity to assist in the upbuilding of the West and South, especially when they would add to their own prosperity thereby—

He must have had in mind in writing his report that the various States of the Union would—if Federal reclamation were further expanded—soon be shipping enormously increased numbers of carloads of steel, iron, rubber, cotton goods, woolen goods, leather goods, furniture, carpets, stoves, automobiles, tractors, sewer pipe, wagons, and so forth, into the West.

To gratify curiosity and to ascertain what were some of the products shipped into the Salt River project in 1920, I will select the State of Wisconsin, because I happen to have that data at hand. As I said before, the State of Wisconsin shipped 213 carloads to the Salt River project in 1920. Agricultural implements, 4 carload lots; auto parts, 41; auto bodies, 2; trailers, 1; butter, 1; canned goods, 7; cheese, 8; chairs, 3; furniture, 18; hardware and stoves, 1; household goods, 1; lumber, 1; machinery, 12; paper bags, 2; paper, 7; powder, 1; refrigerators, 2; rubber hose, 1; tractors, 27; and the other articles, making in all 213 carloads.

There is generally in view the West only when we speak of reclamation, but this policy has been enlarged; it is no longer the irrigation and reclamation of arid lands. Federal agencies of reclamation will no longer be employed only in reclaiming arid lands, but they will also be employed in reclaiming any and all lands. If in the South lands are overflowed with water, the arm of the Government will be eligible under the McNary-Smith bill to remove the water and reclaim the land. If it be the stump lands of the North or the Northwest, this reclamation law will afford the eligible means to reclaim those lands. It may no longer be called a western policy. It is national in its scope.

The record of achievement of the United States Reclamation Service enriches the annals of the American people. Irrigation projects charm us with their wizardry the while they pour the life-giving waters out upon the thirsty soils and transform deserts into orchards and green fields. When you think of the Federal reclamation policy, the lamp of Aladdin and the purse of Fortunatus become prosaic and commonplace in comparison, and the wildest hyperbole would not be adequate to describe the wealth, the advancement, the prosperity, and public order that would come not only to the West and to the South but to the East and the North as well if the McNary-Smith reclamation bill were enacted into law.

During the past 19 years, or since Federal irrigation began, 3,000,000 acres of theretofore practically worthless desert land have been made productive by Government irrigation. The value of the crops produced thereon now amounts to $90,000,000 annually. The increase in value of the irrigated acreage amounts to $600,000,000, and since the Government began the delivery of irrigation water the crops produced on the reclaimed lands to-day aggregate $400,000,000 in value. Nor does this sum of $400,000,000 include the value or expansion of production of live stock or stock products; in other words, the figures ($400,000,000) as to the aggregate crop value are limited to

vegetable, fruit, and grain values at the farm, for which Government reclamation furnishes the sole supply of water. All the moneys disbursed by the Government to the various irrigation projects will ultimately be repaid.

At the outset let it be remembered that the full importance of national irrigation can not be measured in dollars, for it has an intangible value not to be estimated in tonnage tables nor transportation rates. In building new commonwealths in the arid lands of the West the Government is utilizing undeveloped resources and creating opportunities for its citizens. One of the primary purposes of the reclamation law was to create homes, and this purpose has been richly fulfilled. Viewed from this standpoint alone, national reclamation has amply justified all for which its advocates hoped.

Since 1902 the Reclamation Service has constructed the irrigation systems to supply abundant water to 2,000,000 acres of land, and the capacious storage reservoirs of the Government are furnishing a supplemental supply of stored water to a million additional acres in other projects, or a grand total of 3,000,000 acres. On these irrigated lands are now profitably employed and satisfactorily housed approximately 500,000 persons.

On the Government-project lands are 50,000 families in independent homes. The population in cities, towns, and villages in these Government projects has been increased by an equal number of families. The arguments for increasing and making permanent the Nation's virility, prosperity, and growth by creating more homes of this kind were never more forcible and unanswerable than at this juncture.

The American people can not claim to have measured up fully to their opportunity and responsibility until the deserts of the West and the unused agricultural lands of the Nation have been replaced by prosperous farmsteads.

When measured by the yardstick of the financier—the dollar—the results of the Reclamation Service activities are enormously great.

As a creator of wealth, its service to the Nation and the State has been as great as in its principal task of home making. Out of the uninhabited and almost worthless desert, reclamation has carved an empire of nearly 3,000,000 acres, intensively cultivated and producing crops whose annual average gross returns per acre about double those per acre for the balance of the country.

At this juncture, I ask unanimous consent to have the Secretary read the following telegram from the Governor of Arizona.

The PRESIDING OFFICER. The Senator from Arizona asks unanimous consent that the Secretary read the telegram which he submits. Without objection, the Secretary will read.

The reading clerk read as follows:

PHOENIX, ARIZ., *August 24, 1922.*

Senator HENRY F. ASHURST,
Washington, D. C.:

In urgently requesting your vigorous support of soldiers' bonus bill now before Senate, feel confident I am expressing majority opinion people of Arizona as well as my own hope that this just obligation of the Nation be discharged. Arizona is particularly anxious that the intelligent and practical plan of the Smith-McNary bill for providing service men with potential farm homes under assured reclamation projects be given full force and effect at this time. I would therefore bespeak your energetic efforts looking toward definite recognition by Congress, in connection with its consideration of bonus measure, of feasibility Smith-McNary features which are of vital importance to Arizona.

THOMAS E. CAMPBELL,
Governor of Arizona.

Mr. ASHURST. What in return do these irrigation projects furnish? For the goods, wares, and merchandise which we purchase from the East we give in return our oranges, our grapefruit, and our apples, our lemons, limes, and our prunes, our grapes, melons, and other foods that subsist mankind.

Mr. JONES of Washington. Mr. President, the Senator in his last statement has practically covered what I wanted to bring out. I had heard it urged by some as an objection to the Government reclaiming arid lands of the West further that it is through Government aid developing agricultural lands which will be in competition with the agricultural lands of Illinois, Indiana, Wisconsin, Michigan, Iowa, and so on. The Senator has been pointing out the number of carloads of produce and manufactured articles which have been going from those central States to the Salt River Valley, and I just thought it would be interesting, in connection with that, for him to state what products of the Salt River project enter into competition with the products of those States.

Mr. ASHURST. Mr. President, at this juncture I ask unanimous consent to include in the RECORD as a part of my remarks a map of the United States showing the number of carload lots each State furnished to the Salt River irrigation project in 1920.

The PRESIDING OFFICER. The Senator from Arizona asks unanimous consent that a map described by him be printed in the RECORD. Is there objection?

Mr. JONES of Washington. Has not that already appeared in the RECORD?

Mr. ASHURST. Yes; it has.

Mr. JONES of Washington. If it does already appear in the RECORD, why does the Senator desire it published again?

Mr. ASHURST. The demand for copies is large and I am unable to supply the same.

Mr. JONES of Washington. But if it is already in the RECORD——

Mr. ASHURST. That supply is exhausted. It is difficult to get a copy now.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arizona? The Chair hears none, and it is so ordered.

(See pp. 11822 and 11823 for map referred to.)

Mr. ASHURST. May I also now secure permission to insert in the RECORD, as Appendix A to my remarks, a tabulated statement showing the character of goods, wares, and merchandise furnished from one State alone?

The PRESIDING OFFICER. The Senator from Arizona asks unanimous consent to include as an appendix to his speech a tabulation which he has described. Is there objection? The Chair hears none, and it is so ordered.

(See Appendix A.)

Mr. ASHURST. I also ask permission to insert another appendix, in the form of a short letter from the Reclamation Service [see Appendix B]; and also a tabulated statement showing the cost of each irrigation project and the amount reimbursed to the Goverment.

The PRESIDING OFFICER. Senators have heard the request of the Senator from Arizona. If there is no objection, it is so ordered.

(See Appendix C.)

Mr. FLETCHER. Mr. President, may I inquire whether that information has been brought down to date?

Mr. ASHURST. No; it is only to the 1st of July, 1921.

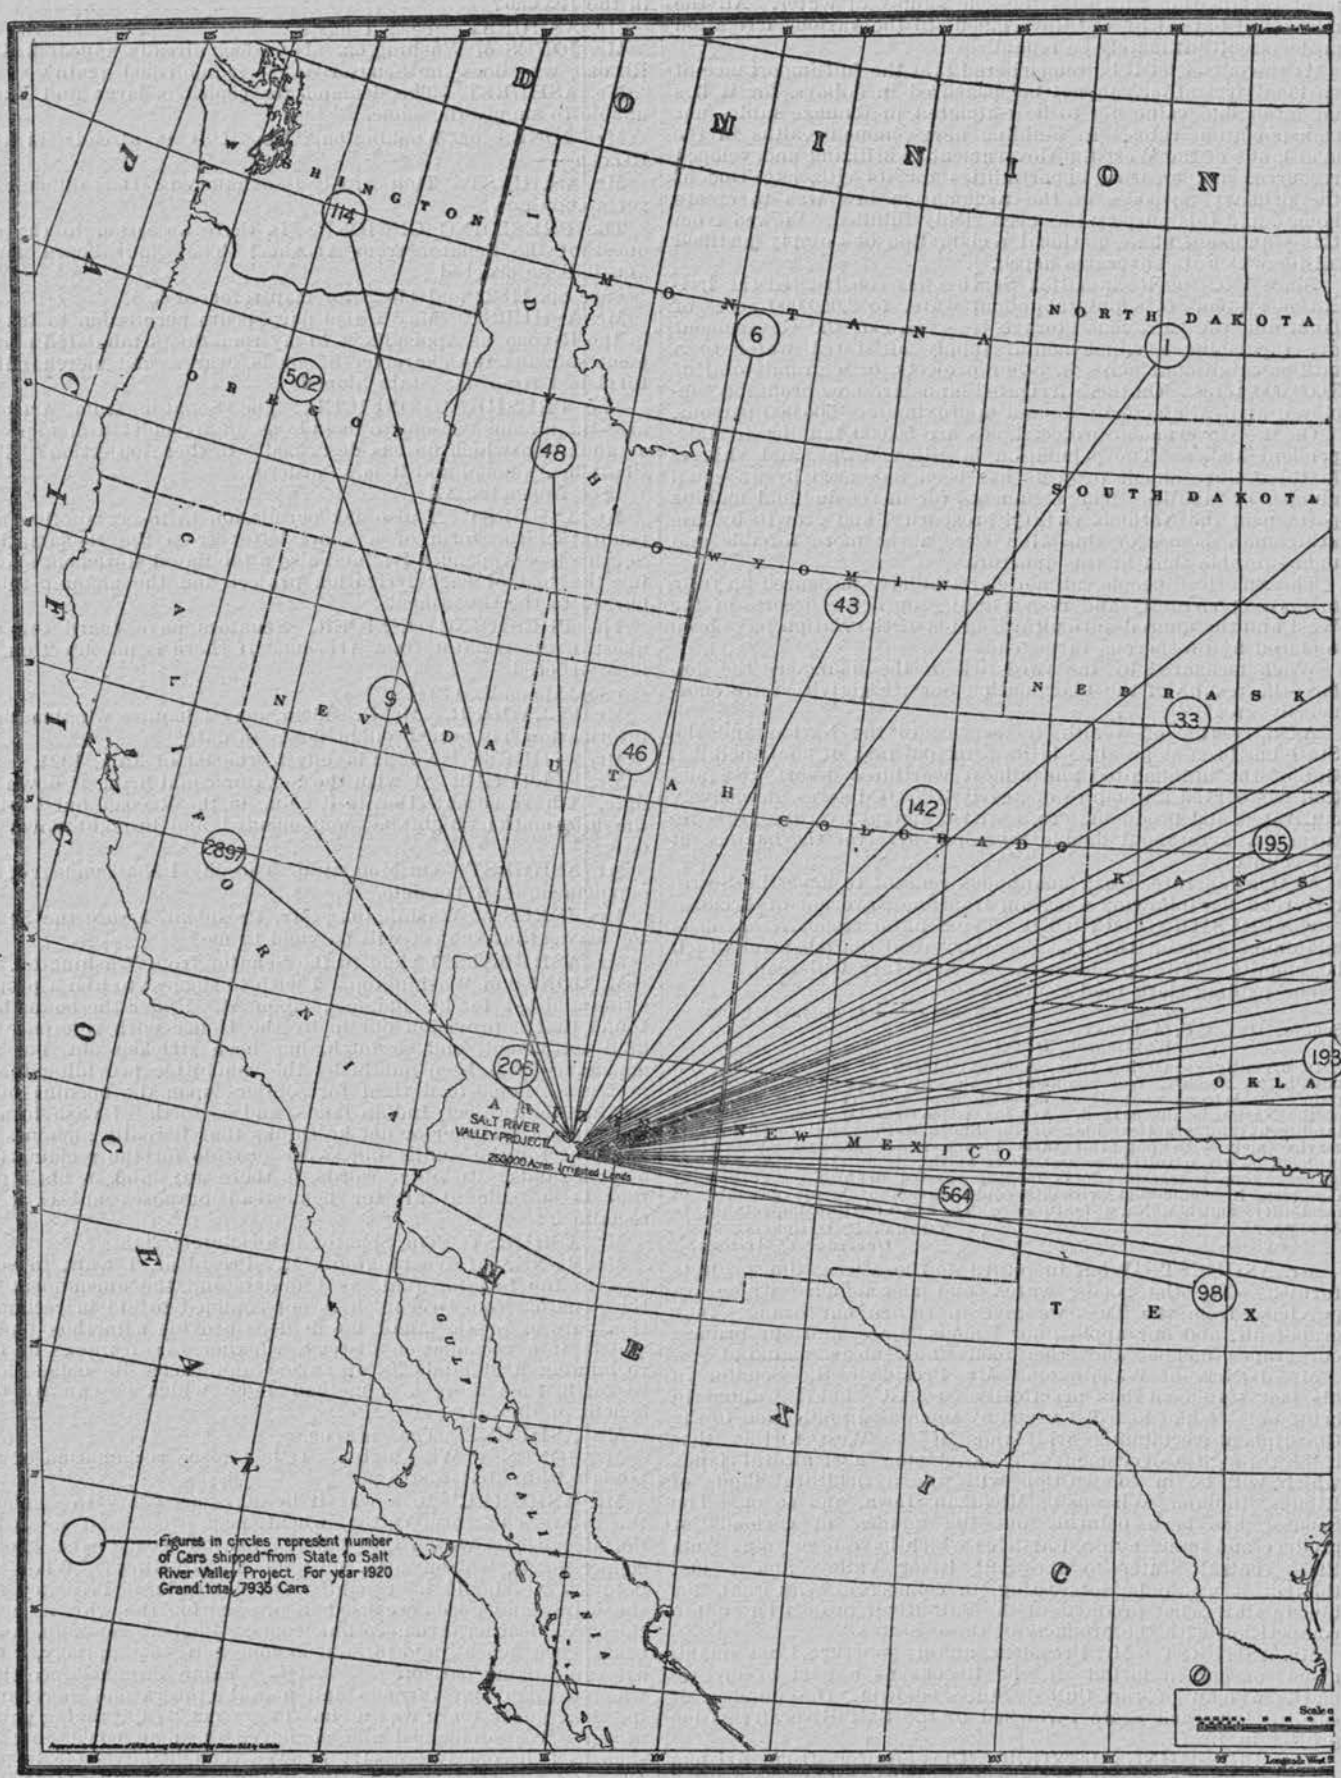
Mr. FLETCHER. I wish the Senator could bring it down to date. I have no objection to it going in the RECORD, but I wish the information might be supplemented and brought down to date.

Mr. ASHURST. On Monday or Tuesday I shall endeavor to supplement it, if possible.

Mr. JONES of Washington. Mr. President, before the Senator leaves that subject will he yield to me?

Mr. ASHURST. I yield to the Senator from Washington.

Mr. JONES of Washington. I wish to suggest to him a proposition and ask for his judgment about it. Under the bonus bill I find that a provision put in by the House with reference to land settlement, and so forth, has been stricken out, but an amendment has been put in by the committee providing for a preference homestead right for soldiers upon the opening of a reclamation project, Indian lands, and so forth. I wish to ask the Senator whether or not he thinks that it really amounts to anything for the soldier unless we provide for the reclamation of arid lands? In other words, is there any land in his State that is suitable at all for homestead purposes unless it is reclaimed?



Mr. ASHURST. The Senator is absolutely right.

Mr. JONES of Washington. Mr. President, I want to suggest to the Senator that, as I understand the amendment of the Senator from Oregon, it is not confined to aid in reclamation only of public lands, but it does provide a method under which, if a reclamation district, whether for drainage or for reclaiming arid lands, is organized and issues its bonds, and so forth, then there is a method under which he can get the benefit of the act.

Mr. ASHURST. That is true.

Mr. JONES of Washington. It is for the reclamation of all lands within that district.

Mr. ASHURST. In a war it becomes necessary to summon the growers of corn, cotton, wheat, beef, wool, and so forth. Cotton must be woven into fabric. Leather goods, steel goods, copper goods, woolen goods must be manufactured. When we paid, as we should have paid, from the Federal Treasury for the wares and goods we used in prosecuting the war, namely, the steel, leather, iron, cotton, copper, lumber, concrete, lead, brass, corn, wheat, and oil, did anyone here rise and say, "We are capitalizing patriotism"? It is a happy circumstance that when we paid our farmers and manufacturers and merchants for their goods there was no one to cry out "capitalizing patriotism." We summoned and employed the man power, but as soon as it becomes necessary or even thought advisable to pay adequate adjusted compensation to those who composed or furnished that man power it is thrust into our faces that we are

"capitalizing patriotism." When did such a brutal, stupid rule obtain control that makes it "capitalizing patriotism" to pay for the man power we employed in winning a great enterprise like the World War, but not capitalizing patriotism to pay for the beef and the mutton, the iron and the steel, the powder, the concrete, the copper, and the leather we used in winning the war?

If we pay for inanimate objects—arms, ammunition, leather, lead, corn, and wheat—used by man power in a war, why is it improper to pay the man power? If all else were furnished gratis man power might be furnished gratis.

Is not such a rule or policy a discrimination, and an unjust discrimintaion, against the man power? The man power at least ought to be treated as well if not better or different than are the other potentialities that helped to win the war. I would like to have some Senator answer that proposition. If it be capitalizing patriotism to pay the man power, why is it not also capitalizing patriotism to pay for the woolen goods, for the guns, the powder, the ships, and for all of the other inanimate things that must be employed in winning a war? The barehanded soldier, no matter what his valor, could not win a war unless he had the instruments, weapons, medicines, clothing, food, and equipment, and the inanimate, inert food, clothing, guns, powder, and instruments could not win a war unless wielded by man power.

What is this adjusted compensation bill? What does it propose to do? What is this enormous raid we are accused of attempting to make upon the Federal Treasury? One of the evil trains and results of war is that it brings upstart millionaires. This World War created 23,000 millionaires in the United States. It would be unjust to say that the man who honestly made a million dollars out of his country during war was wrong. But he should not have done it; it was not a handsome thing to do. He should not have taken advantage of his country's necessities. When our young men were in the trenches, in the air, and on the sea, all at home should have used scrupulous care not to coin opportunity into money. We have, of course, some who hover in their vaults and in whose ears the clink of gold has drowned out the voice of patriotism, now crying—I do not mean Senators—against the ex-soldiers' compensation bill.

What is the compensation bill? The soldier was called to the country's defense. His pay was $1 a day. He received his clothing, his food, his medicines, and his training; and those might reasonably be counted as another dollar per day. Hence, it is now proposed to pay him an additional dollar per day if he served here and an additional $1.25 per day if he served overseas, and it is proposed to do this in order that there may be an equalization or an adjustment between him and the man or boy who remained at home and whose wages were raised and whose station was improved.

Mr. Xenophon was called to the colors. He left a position in a machine shop which was paying him $5 a day. As soon as he was enrolled the national or subject of some other country stepped into Mr. Xenophon's job and received $6 a day or $8 a day, while that soldier, the American boy, Mr. Xenophon, was absent in the Army or Navy. And yet, because we urge the passage of a bill to equalize the compensation or pay of Mr. Xenophon, insinuations about attempting to capitalize patriotism are statements which we must meet.

Mr. President, we are more or less inclined to forget the days of far 1917. Let us consider the situation from which these young men were taken. I will read a poem drawn from Kipling through the circumstance that when the young English seamen were to be brought home from sea after the war ended it was proposed that they should be sent to college or the polytechnic institutes to resume their interrupted work that they might, notwithstanding their long service in the army or the navy, learn a trade or adopt a profession wherewith to subsist themselves in the future. In England there were profiteers, just as there were here. These profiteers urged that it would be too expensive to put these young men back in the colleges and schools, and one paragraphist said it was absurd to think of sending these young men back to Dartmouth or to Cambridge; that they were no longer buds; that the bud may be opened prematurely, but that we can not close the rose up and make a bud after it has once bloomed. That cynical remark drew from Kipling this poem, which I shall now read to the Senate. It is as follows:

"Oh, show me how a rose can shut and be a bud again!"
Nay, watch my Lords of the Admiralty, for they have the work in train.
They have taken the men that were careless lads at Dartmouth in fourteen
And entered them in the landward schools as though no war had been.
They have piped the children off all the seas from the Falklands to the Bight
And quartered them on the colleges to learn to read and write.

Their books were rain and sleet and fog—the dry gale and the snow.
Their teachers were the horned mines and the humpbacked death below.
Their schools were walled by the walking mists and roofed by the watching skies,
When they conned their task in a new-sown field with the moonlight sacrifice.
They were not rated too young to teach, nor reckoned unfit to guide
When they formed their class on Helle's beach at the bows of the River Clyde.
Their eyes are sunk by the endless watch, their faces roughed by the spray,
Their feet are drawn by the wet sea boots they changed not night or day
When they guarded the 6-knot convoy's flank on the road to Narroway.
Their ears are stuffed with the week-long roar of the west Atlantic gale
When the sloops were watching the Irish shore from Galway to Kinsale.
Their hands are scarred where the life lines cut or the dripping funnel stays
When they followed their leader at 30 knots between the Skaw and the Naze.
Their mouths are filled with the magic words they learned at the collier's hatch
When they coaled in the foul December dawns and sailed in the forenoon watch,
Or measured the weight of a Pentland tide and the winds off Ronaldshay,
Till the target mastered the breathless tug and the hawser carried away.
They knew the price to be paid for a fault, for a gauge clock wrongly read,
Or a picket boat to the gangway brought bows on and full ahead,
Or the drowsy second's lack of thought that cost a dozen dead.
They have touched a knowledge outreaching speech, as when the cutters were sent
To harvest the dreadful mile of beach after the *vanguard* went.
They have learned great faith and little fear and a high heart in distress,
And how to suffer each sodden year of heaped-up weariness.
They have borne the bridle upon their lips and the yoke upon their neck
Since they went down to the sea in ships to save a world from wreck,
Since the chests were slung down the college stair at Dartmouth in fourteen,
And now they are quit of the sea affair as though no war has been.
Far have they gone and much have they known and most would they fain forget,
But now they have come to their joyous own with all the world in their debt.

* * * * * * *

Hallowed river, thrice reverend trees, chapel beyond compare,
Here by gentlemen tired of the seas—take them into your care.
Far have they come and much have they braved. Give them their hour of play,
While the hidden things their hands have saved work for them day by day,
Till the grateful past their youth redeemed return them their youth once more,
And the Soul of the Child at last lets fall the unjust burden it bore.

Let the United States never forget the service our American young men rendered to liberty's cause in the World War.

Let us not forget the environment, the circumstances from which these young men were drawn from civil life. The course of the river of life for many of them has been changed, diverted, interrupted. Some were just about to open from a bud into a rose. They were drawn and placed into their country's honorable service. The manufacturer was paid and should have been paid. The merchant was paid, as was right. The woolen men were paid and should have been paid. The copper men, the iron men, the cotton men, legal men, the steel men, the cattle men, the leather men, the manufacturers of munitions were paid and should have been paid. Shall it happen that in an opulent, a proud, and puissant Republic we pay for steel, for iron, for concrete, for coal, for copper, for oil and leather, for wheat and oats, but that the moment we attempt to pay the man power, which must be subsisted—the moment we attempt to pay the soldier, the animated, living, breathing human who wins the battles, we are to be stigmatized as trying to capitalize patriotism?

Mr. SHEPPARD. Mr. President——

Mr. ASHURST. I yield to my able friend from Texas.

Mr. SHEPPARD. Carrying out the same idea, nobody says anything about the "commercialization of patriotism" when Senators and Representatives in Congress draw their salaries each month.

Mr. ASHURST. Precisely; the Senator is right.

Mr. WALSH of Massachusetts. Mr. President, one ought to be willing to die for his country, without accepting money for the service; but if one holds public office he ought to expect to be paid for his service.

Mr. ASHURST. Let us do justice to all; we have paid and are paying the contractors who furnished supplies, transportation, and subsistence; we should not longer neglect to adjust the compensation of the soldiers.

APPENDIX A.

APPENDIX B.

DEPARTMENT OF THE INTERIOR,
UNITED STATES RECLAMATION SERVICE,
Washington, D. C., August 6, 1921.

Hon. HENRY F. ASHURST,
United States Senate.

MY DEAR SENATOR: In the absence of Director Davis we duly received your letter of July 20, 1921, to him, requesting a revision of figures sent to you in 1919, showing the net investments in several Government reclamation projects.

When your letter arrived we were, for other purposes, compiling such data to the end of the last fiscal year, and as that is a convenient period to use, it seemed best to withhold reply until these figures were available.

I am now sending them herewith in a tabulation similar to the one returned with your letter.

You may recall that these figures were made up in this way originally by specific request from your office by telephone. They are not in the form that we would select for ordinary purposes of publication because there is danger that they will mislead.

In other words, the inclosed figures are bookkeeping data and involve considerable duplication that swell the totals and make these misleading unless there is given and read with them considerable explanation. For example, we are constantly transferring from one project to another machinery, equipment, and materials in order to work the greatest economy and efficiency in utilizing these.

To keep the books showing the investments in any particular project, it is necessary to include an agreed value for such things transferred from and to the project. Thus, the total investment for each project includes "transfers received" of such things, and the column "Reimbursements and credits" includes "transfers issued." On any particular project these two entries necessarily differ, and hence must be included to bring out the net investment for that project, whereas for all projects these items merely balance one another and swell the totals, aggregating upward of $8,600,000.

The figures given for total investments include cash disbursements from the reclamation fund, appropriations for "increase of compensation," and other special appropriations, such as that of a million dollars toward the cost of Elephant Butte Dam under the act of March 4, 1907; others for judgments of the Court of Claims, the funds for the Yuma auxiliary project, etc.

At the bottom of the table you will notice a number of other items added to bring the figures into agreement with our book totals. The "secondary projects" include a great number of possibilities that have been surveyed or examined from time to time in addition to the projects actually undertaken. For example, in Arizona this includes the San Carlos, San Pedro, Sentinel, and other propositions that will occur to you.

The item of "general expense" includes headquarters offices at Washington and Denver for administration, engineering design, and other purposes, legal services, and many other items that can not readily be allocated to particular projects except in bulk from time to time on the basis of expenditures or similar criteria. This item of general expense is the largest one included under the head of transfers already mentioned.

The item entitled "Indian projects" represents expenditures from the reclamation fund reimbursed by the Indian Bureau.

If you intend to publish these figures and want to avoid the possibility of misleading suggested above, you may want to use merely the figures of "net investment." In most cases we find that figures of cost rather than investment answer the questions in the minds of inquirers, and if you wish figures on a cost basis, or if we can otherwise be of further service in this connection, we shall be glad to do so.

Very truly yours,

MORRIS BIEN, *Acting Director.*

APPENDIX C.

Reclamation projects investment to June 30, 1921.

State.	Project.	Total investment of United States.	Reimbursements and credits.	Net investment of United States.

[2] The reimbursements exceed the investment.

Mr. RANSDELL. Mr. President, I am strongly in favor of the pending bill and earnestly hope its passage will not be long delayed. It is nearly four years since the war closed on November 11, 1918, and further procrastination on this measure of meager justice is wholly unwarranted.

The war came very close to me. Unfortunately, I had no children to enlist in any branch of service, but quite a number of my relatives and friends participated in the great struggle.

My wife's nephew, Thomas J. Powell, jr., of Lake Providence, La., left a young wife and three small children to join the colors. He led his troops as first lieutenant in the Battle of St. Mihiel, where our forces covered themselves with so much glory, and was killed in action on the 12th of September, 1918. Tom was a handsome, attractive young fellow, much beloved by all who knew him, especially by his aunt, Mrs. Ransdell, and myself. He felt it his duty to go, although not subject to service under the law, and willingly paid the supreme sacrifice on the altar of his country.

As soon as war was declared my assistant secretary, Jody M. Davidson, who had occupied the most intimate relations with me for two years, enlisted in the Army. Jody was one of the finest young men I have ever known, sensible, good-looking, and of very engaging personality. He soon rose to the rank of first lieutenant, bore a heroic part in the strife, and was killed while successfully attacking a machine-gun nest in the Argonne five days before the armistice. Jody was the only son of my good friend W. M. Davidson, of St. Joseph, La., and his loss was hard to bear.

These two cases and several others cause me to feel more than ordinary interest in everything that relates to the awful war, especially in the young men who survived its horrors and who are to receive the meager, long-delayed compensation for their service provided in the pending bill.

I realize that the less talk there is on this subject the sooner a vote will be obtained and the earlier the soldiers will begin receiving the adjusted compensation, in my estimation. It is my purpose to submit to the Senate the reasons which, to my mind, overshadow all others and make it imperative that we pass this measure at the earliest possible moment. The great impelling force which prompts us to carry this measure through is that of a sacred, moral obligation. Numerous reasons have been assigned in support of the bill and countless arguments against it. Friends of the measure are not advocating a bonus to the soldiers as a reward for valor displayed or in gratitude for victory won. They recognize that the Nation owes these ex-service men, in all fairness and honesty, the adjusted compensation provided in the pending bill, and they are determined it shall be paid without further delay. Time for action has come.

It is nothing new, Mr. President, to hear the word "obligation" spoken on this floor in this connection, but it carries with it the same solemn meaning that it did when first uttered, and with each succeeding day of postponement has acquired greater and mightier import until at last it has borne down on those who have tried to escape with such force that they can no longer resist. In my opinion the United States has taken reasonable care of every other duty and obligation thrust upon it as a result of the World War save this one. When our national honor was threatened and the public safety endangered did we not then do the only thing which an upright, civilized nation under the circumstances could do, and that was to

wage war on our assailant? That was the first great duty which the Government owed to its people. When the die was cast, did we not immediately proceed to raise, arm, and equip one of the strongest armies that ever championed the cause of right, and with all the fervor of our hearts and strength of our bodies arrange in rapid succession the many details which go to make up an efficient military organization? Would it not have been a shameful neglect of duty had we done less? We raised an army of 4,500,000 men, equipped them, trained them, and transported half of them to Europe without the loss of a single life from a German submarine. They bravely faced our enemy, fought our battles, drenched the sacred fields of France with as good blood as has ever been spilled to vindicate the principles of liberty and justice, and when victory was won they returned home, leaving heavy toll of heroes who had died to save the world. There was nothing too good for our soldiers then, and nothing seemed left undone to mar the thoroughness and faithfulness with which every obligation and duty was performed. However, in the rush to end the conflict and in the midst of the wave of patriotism which swept the country, we neglected and failed to provide anything like a fair compensation for the services performed by our soldiers. Among all the obligations which we assumed because of the war this stands out as the one not properly met by Congress.

We can no longer afford to delay in making at least a partial settlement of the heavy obligations we are under to the men who fought and bled for us on the battle fields of Europe and those who were ready to cross the sea whenever called. I say partial, because any amount we give them will be parsimonious when we consider what they are justly entitled to, not for their willingness to serve, even unto death, not for the losses they were subjected to upon their return here, but in the way of a small compensation for service performed and for the time these men lost from the ordinary pursuits of life. All agree that we are under heavy obligations to our ex-soldiers. It is true that these obligations can not be discharged by the payment of any sum of money. It is true that the spirit which leads a man to lay down his life in defense of his country can not be bought and paid for in dollars and cents. But this is not what is sought after in paying the soldiers this adjusted compensation. The very title of the bill signifies its purpose. It recognizes that the wage which we agreed to pay our soldiers during the World War was wholly inadequate, unjust, and unfair. At that time many billions had to be loaned to our allies, many billions had to be spent for supplies, munitions, and transportation. We could not afford larger salaries to our boys then, but the amount we paid them, which was fixed by law and not by mutual consent as in case of employer and employee, could certainly not have been intended as full and sufficient compensation. To say that it was so intended would be to admit that America, the richest nation on earth, would pay to its soldiers who risked their lives for their country the most niggardly compensation ever paid by any nation in proportion to its ability to pay.

When the war came upon us 24,000,000 of our men were within the draft age, from 21 to 45. Three millions were drafted into service under the selective service law because of their good physical qualifications. To those three million we paid a wage of $1 per day, with board and lodging. The board and lodging, or subsistence as it is called in the Army, amounted to about $2 per day, so that in all we paid these men about $3 per day. Twenty-one million of the same class of military age were permitted to remain behind and enjoy all the comforts of home, the society of friends and loved ones, and to receive for services higher compensation than has ever been known in the history of our country. By what theory of justice can we say to these 3,000,000 men, "Because of your soundness of body, your youth, health, and strength you must go to far-off Europe, expose yourself to the mud, wind, rain, and cold, endure the most strenuous hardships, risk your lives on the battle fields, where death stalks with swift and relentless tread, and receive as your compensation $3 per day—not as much as is paid the ordinary day laborer"; while to 21,000,000 others we say, "Because of your weak eyes, bad teeth, flat feet, or the essential employments in which you are engaged, or because of persons being dependent upon you, you shall remain at home amidst all who are near and dear to you, enjoy all the luxuries of life, work in a factory or shipyard or farm, and receive from $6 to $12 per day (an average of $9), or work in some office and receive $5 or more per day"? By what rule of fairness can we thus put a premium on physical defectiveness, employment, and dependency, and penalize youth, good health, and strength? True, the youth of every nation must fight its battles; but can any nation find justification in being more generous to the young man who stays at home and lives in luxury than to the one who suffers great hardships and offers his life in order that his country might be saved?

When called upon to go these men could not delay or quibble and say, "Mañana," or "We can not go to-day because it would jeopardize our future and subject us to irretrievable losses." No; they went promptly and willingly. Most of them had been earning in their individual capacities three or four times the compensation paid by the Government. They knew that all who stayed at home would reap immense profits from the war. Almost every man engaged in business during that great struggle enjoyed greater returns than ever before and paid higher compensation to his employees than ever before. The men who went and risked life and limb, however, had to accept a mere pittance for their compensation. They did not complain. They gladly faced death to save their homes and civilization from the bloody hand of Prussianism. They fought and were victorious. Through their dauntless courage and indomitable spirit the war was brought to a termination several years before we dared hope that it would be. This speedy end saved the Nation many more billions than the adjusted compensation would cost us; in fact, it is said that such a quick consummation saved us at least $15,000,000,000 to $20,000,000,000. In my judgment, the saving was much larger.

The Senator from North Dakota [Mr. McCUMBER], chairman of the Finance Committee, one of the fairest and ablest Members of this body, said in his speech here on the 23d instant that "a fair and conservative estimate would place the final cost [of the adjusted compensation] at $3,500,000,000, scattered along the pathway of 40 years." He also said that if the compensation were "settled entirely in cash it would not cost in excess of $1,561,000,000." So we see that the prompt, effective action of our soldiers in bringing the war to a speedy close saved the Nation many times the amount we propose to spend on them under the terms of this bill.

Mr. President, we all know the inevitable conditions that follow war, for they have followed every war. Industrial depression, strained money conditions, unemployment, and famine are its natural results, until the world regains its equilibrium. When the war was over the same story was repeated here and abroad. Factories and mills turned off hundreds of thousands of their employees; every business and industry in the country did likewise, until the ranks of the unemployed numbered well up into the millions. Then, Mr. President, what did the United States do with its soldiers who had been receiving $1 per day in money for their incomparable work and sacrifice? It is here that the shameful story must be told of how the richest and most powerful Nation on the globe brought its penniless soldiers home, gave them $60 bonus and dumped them down into a land of unemployment to seek jobs where there were none. Perhaps there are some who will say, "Oh, well; that is the way with war." If they can find consolation in that, they are welcome to it.

The conduct of this Government toward its soldiers since the end of the war stands out in bold contrast when compared with the treatment of other soldiers at the hands of their countries.

Other smaller nations with much less wealth have long since adjusted the compensation of their ex-service men. Canada, with a national wealth estimated at $11,119,953,000 and an indebtedness of 20 per cent thereof, has paid adjusted compensation to her soldiers since the war averaging $540 each. France, with a wealth of $58,398,000,000 and an indebtedness of more than 94 per cent thereof, has paid an average of $95.25 each. Great Britain, with a national wealth of $70,564,250,000 and an indebtedness of more than 52 per cent of her wealth, has paid an adjusted compensation which averaged $101.50 each. Belgium, with a wealth of $14,307,510,000 and an indebtedness of 26 per cent of her wealth, has paid an average of $287 each; and Australia, with a wealth of $7,445,745,000 and an indebtedness of 25 per cent thereof, has paid an average of $409.50 as adjusted compensation to its ex-service men. Yet this great Nation, with an estimated wealth of $204,393,000,000 and an indebtedness of only 11.7 per cent, has thus far paid a bonus of only $60 each.

Under the terms of the pending bill the compensation to a soldier could not exceed $625 in the case of overseas service, and $500 in the case of home service. I am unable to ascertain what the average compensation would be, but a fair assumption is that it would be not to exceed $400 each, or less than the amount paid either by Australia or Canada. In other words, our mighty Republic, with a national wealth nearly twenty times as great as Canada, and a debt of only 11.7 per cent as compared with Canada's debt of 20 per cent, would, in the event this bill is passed, pay to the men who saved not

only the Republic, but the world from destruction a sum smaller by at least $140 per capita than Canada paid to its soldiers in the way of adjusted compensation. Is not that a humiliating position for the United States to occupy?

Our first obligation at the close of the war, after the dead had been buried and their dependents cared for, was to the men who were wounded and diseased as a result of their service. We have spent hundreds of millions of dollars in an attempt to care for the dependents of the dead, bind the wounds of the maimed and injured, and soothe and comfort the pains and anguish of the bed-ridden. Extreme liberality toward these most worthy ends must be exercised, and the work must go on until completed. We have by no means fully discharged that obligation as yet, but a good start has been made. The time has come when we must turn to those obligations not so pressing, but just as binding, and endeavor to adjust the compensation of our soldiers in order that it may be at least comparable to that paid the lowest priced laborers in the United States during the war.

In doing this we would not be setting a precedent. Our Government has always recognized generously the service of our soldiers. Even during the Civil War, when the wealth of the Nation was but a small fraction of what it is to-day, this principle was applied in a system of bounties paid for voluntary service.

I will not discuss how the money is to be raised to meet the requirements of this bill. To my mind, the obligation is so strong and pressing that we can not afford to dicker about whether the money to meet it is to come from this source or that. Let us pass this bill, acknowledge our indebtedness in simple language, as any honest man admits a debt which he justly owes, and provide for its payment from time to time, as is done in the case of other legitimate expenses of Government. Is it possible that we have money for every conceivable purpose, good or bad, and yet when it comes to adjusting the compensation of the saviors of our country that the doors of the Treasury must close? If they had not fought and kept back the Prussian hordes we might now be facing the conditions which threaten the complete destruction of Germany. Does anyone think that the cost of the proposed adjusted compensation will amount to anything like the reparations which would have been demanded of us by Germany had we gone down to defeat?

Mr. President, so long as war was on and our boys in Europe were bleeding and dying for our safety and comfort there was no end to the amount of money the United States could raise to foot its bills; we floated with ease five Liberty loans, aggregating $17,000,000,000, and if a sixth, seventh, or eighth Liberty loan had been necessary to carry on the war we all know it would have been floated and the money, even had it amounted to an additional $17,000,000,000, would have been forthcoming; but now, when victory is won and the national security assured, is it not strange that we suddenly become too poor to adjust the soldiers' salaries on an equitable basis? In the meantime, however, our Government has seen fit to repeal the excess-profits tax, which yielded about $615,000,000 per year. I wonder if Germany would have taken off that tax if our boys had not defeated her and she had been victorious? A tariff law has been enacted which will probably produce a handsome revenue for the Treasury. The proponents of the disarmament program were not slow in telling us of the vast saving it would accomplish for the Nation. In addition to these, we were informed by the chairman of the Finance Committee, in his address here on the 23d instant, that—

> Great Britain is preparing to meet the interest due this fall (on the debt she owes the United States), and if she does so we shall have in advance a sum from that source alone more than sufficient to meet the first two years' obligations under this measure.

He continues:

> The British Government has included in its budget of expenses for the ensuing year an item to cover the interest due the United States. That sum is just as much assured as though the actual bonds had been issued.

Does this look as though we will have to issue any bonds or levy additional taxes on the people in order to finance this bill? Then, Mr. President, in the face of these facts I ask in all fairness, How can we turn to the soldiers and say, "We can do nothing for you"?

The soldiers have no mortgage or privilege recognized by law with which to confront us, but theirs is a moral obligation which we are in honor bound to meet, an obligation higher and holier than one resulting from any statutory provision or ordinary contract. If we wish to settle it, we can find means to do so; and if not, there are a thousand excuses to hide behind.

In the name of justice and a square deal, let us adjust this honest debt without further delay.

EXTERMINATION OF INSECTS.

The PRESIDING OFFICER (Mr. REED of Pennsylvania in the chair) laid before the Senate the following concurrent resolution of the House of Representatives, which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

House Concurrent Resolution 66.

Resolved by the House of Representatives (the Senate concurring), That the Architect of the Capitol be, and he is hereby, authorized and directed to make a contract for the extermination and banishment of insects from the House Office Building, the Capitol, and the Senate Office Building at an expenditure not to exceed $2,500. That the expenditures in carrying out the contract be paid from the contingent funds of the House and Senate in equal proportions, and upon vouchers authorized by the respective committees having control of the contingent funds of the Senate and House of Representatives and approved by the chairmen thereof.

SALT RIVER RECLAMATION PROJECT.

The PRESIDING OFFICER laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 10248) authorizing the sale of surplus power developed under the Salt River reclamation project, Arizona, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. MCNARY. I move that the Senate insist on its amendments, agree to the conference asked by the House, and that the Chair appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer appointed Mr. MCNARY, Mr. JONES of Washington, and Mr. SHEPPARD conferees on the part of the Senate.

FEDERAL RESERVE BRANCH BANK AT LITTLE ROCK, ARK.

Mr. ROBINSON. Mr. President, I introduce the joint resolution which I send to the desk and I ask for its present consideration.

The joint resolution (S. J. Res. 238) authorizing the Federal Reserve Bank of St. Louis to enter into contracts for the erection of a building for its branch office in Little Rock, Ark., was read the first time by its title and the second time at length, as follows:

Resolved, etc., That the Federal Reserve Bank of St. Louis be, and it is hereby, authorized to enter into contracts for the erection of a building for its branch bank at Little Rock, Ark., on a lot previously acquired: *Provided*, That the total investment in such building shall not exceed $400,000.

Mr. ROBINSON. I ask unanimous consent for the present consideration of the joint resolution, and in connection with it I desire to make a very brief statement.

On the 12th of June the Senator from Missouri [Mr. SPENCER] introduced a resolution, which was referred to the Committee on Banking and Currency and unanimously reported by that committee, authorizing the Federal Reserve Bank of St. Louis to construct a building at its headquarters and also a building in the city of Little Rock. When the resolution was in the Senate for consideration it was amended to include the Federal reserve bank at Salt Lake City, that bank being authorized by an amendment adopted in the Senate to construct a building in the city of San Francisco. The resolution passed the Senate and went to the body at the other end of the Capitol, and was referred to the Committee on Banking and Currency of that body.

On a recent date the bank authorities who, as I understand, had prompted the Senator from Missouri to introduce the original resolution, providing for the construction of buildings in St. Louis and Little Rock, acquiesced in an amendment by the committee in the House of Representatives striking from the resolution the provision for buildings, except for the reserve bank headquarters in the city of St. Louis, leaving provision in the resolution for that city alone.

The only reason assigned in the report on the resolution made by the House committee is to the effect that it was thought that the buildings at other places could wait and that the building at St. Louis ought to be proceeded with immediately. My information, obtained through the office of the Senator from Missouri [Mr. SPENCER], is to the effect that the head of the bank at St. Louis came to the conclusion that the resolution could be more speedily passed if the other provisions were eliminated, leaving St. Louis alone provided for.

I have a statement of the business done by the Little Rock branch bank, which shows that it exceeds the business done by other branch banks, including those at Portland, Oreg.; Nashville and Memphis, Tenn.; New Orleans, La.; Jacksonville, Fla.; El Paso, Tex.; and Helena, Mont.

Mr. JONES of Washington. As I understand, the Senator is just introducing the joint resolution?

Mr. ROBINSON. I am asking for its present consideration, it having in substance been reported as a part of the Spencer

resolution from the Committee on Banking and Currency unanimously.

Mr. JONES of Washington. This joint resolution?

Mr. ROBINSON. Not this identical measure, but authority to construct a building at Little Rock was embraced in another which was passed by the Senate.

Mr. JONES of Washington. That is what I wanted to ascertain. As I understand it, the Senator is introducing the joint resolution and asking for its immediate consideration, but in substance it has heretofore passed the Senate——

Mr. ROBINSON. Yes. There is a difference in the limitation of cost imposed, however.

Mr. JONES of Washington. I shall not object to it, although the general rule of the Senate is, of course, that joint resolutions should go to a committee.

Mr. ROBINSON. If the substance of the joint resolution had not already been considered by a Senate committee and had not already been passed by the Senate, I should take the course of referring it to a committee.

Mr. JONES of Washington. By reason of that fact I shall not object.

Mr. ROBINSON. I thank the Senator from Washington.

The PRESIDING OFFICER. The Senator from Arkansas asks unanimous consent for the present consideration of the joint resolution. Is there objection?

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBINSON. I ask unanimous consent to have printed in the RECORD, in 8-point type, the statement to which I previously referred.

There being no objection, the statement was ordered to be printed in the RECORD, in 8-point type, as follows:

LITTLE ROCK (ARK.) BRANCH FEDERAL RESERVE BANK.

The Little Rock branch of the Federal Reserve Bank of St. Louis was established on January 6, 1919. The branch at that time had 2 officers and 15 employees; now have 3 officers and 62 employees; total of 65 on the pay roll at this time.

The branch Federal reserve bank at Little Rock occupies quarters on the second floor of the Southern Trust Building, which have long since proven inadequate to properly take care of the bank's business. The vault facilities are poor on account of smallness of the vault. This branch bank at Little Rock has justified its establishment, as the following figures show for themselves:

Net profits:	
1919	$104,000
1920	407,000
1921	500,000
Total	1,011,000
Loans:	
1919	96,000,000
1920	152,000,000
1921	140,000,000
Total	388,000,000

Transit items.	Number.	Amount.
1919	1,660,000	$386,000,000
1920	4,030,000	695,000,000
1921	4,250,000	525,000,000
Total	9,940,000	1,606,000,000

Collections, 1921, 11,136	$10,764,000
Liberty bond coupons, 1921, 193,171	717,400
Wire transfers of funds, 1921:	
Number incoming, 3,643	94,000,000
Number outgoing, 2,151	41,000,000
Currency and coin, 1921:	
Receipts	29,497,300
Disbursements	25,015,800

The Little Rock branch is handling more items than the branch Federal reserve banks located at Memphis, New Orleans, Portland, Nashville, Spokane, Helena, Jacksonville, and El Paso. Items are collected on 300 banks in Arkansas.

A lot at the corner of Third and Louisiana Streets, Little Rock, was purchased in January, 1921, at a cost of $85,000, for the purpose of erecting a building for the Little Rock branch, Federal Reserve Bank of St. Louis. Plans have been drawn for the building which have been approved by the Federal Reserve Bank of St. Louis, and it is our understanding that the consulting architect of the Federal Reserve Board has approved these plans. We are advised by the officers and directors of the Little Rock branch that they are very anxious to begin their building, and they say they are advised by the chairman of the board of the Federal Reserve Bank of St. Louis that the directors of the Federal Reserve Bank of St. Louis are very anxious to see this building for the Little Rock branch begun, but that the chairman of the board of the St. Louis bank has been notified by the governor of the Federal Reserve Board that in view of legislation pending no buildings can be begun.

The Federal Reserve Bank of St. Louis say that if the governor of the Federal Reserve Board will advise them that it is satisfactory to go ahead with the building of the Little Rock branch, they will be more than pleased to instruct the officers of the Little Rock branch to go ahead with the building as outlined in the plans that have been approved.

The following list covers State bank members of the Federal reserve system in Federal reserve district No. 8; and upon examination of this list you will see that there are more State bank members of the Federal reserve system in Arkansas than any other State in the eighth Federal reserve district; Arkansas having one-third of the State bank members in the district:

State bank members of the Federal reserve system in Federal reserve district No. 8.

Arkansas	36
Missouri (add about five members since this was made up to Missouri)	34
Illinois	17
Tennessee	11
Kentucky	5
Mississippi	3
Indiana	2
Total	108

The Little Rock branch handled 1,400,000 items more than the Memphis branch during the year 1921 and 1,200,000 items more than the New Orleans branch during the year 1921. The following list covers items handled during the year 1921 by branch Federal reserve banks:

Little Rock, Ark	4,238,626
Portland, Oreg	3,796,612
Nashville, Tenn	3,463,043
New Orleans, La	3,012,888
Spokane, Wash	2,937,509
Memphis, Tenn	2,802,536
Jacksonville, Fla	2,753,276
El Paso, Tex	2,374,898
Helena, Mont	2,365,000

There are 69 member banks attached to the Little Rock branch, and at this date no member bank attached to this branch bank in Little Rock has failed or closed its doors; and with the volume of loans amounting to $388,000,000 during the three years this branch at Little Rock has been established, no loss has occurred on a loan.

The cost of the proposed building for the Little Rock branch of the Federal Reserve Bank of St. Louis will be arranged as follows:

Building structure		$150,000
Plumbing and drains	$11,000	
Heating	16,000	
Refrigeration, ice water	3,000	
Generating plant	3,750	
Ash hoist	750	
Portable cleaners	850	
Elevators and inclosures	17,250	
Mail chutes	1,000	
Lamson tubes	1,800	
Electric wiring	9,500	
Lighting fixtures	6,500	
Screens	1,500	
		72,400
Total		222,400
Vaults, doors, time locks, protection, and grille		70,000
Permanent fixtures		50,000
Grand total		342,400

ZAH BARMON.

Mr. CAPPER. From the Committee on Claims, I report back favorably, with an amendment, the bill (H. R. 7425) for the relief of Zah Barmon, and I submit a report (No. 891) thereon.

Mr. JONES of Washington. I ask for the present consideration of the bill. It is to repay money that was deposited on a bid and which went into the Treasury. It was afterwards found that it should be refunded; but it could not be refunded, because it had passed into the Treasury. The bill has passed the House.

There being no objection, the bill was considered in Committee of the Whole.

The amendment was, in line 4, after the word "pay," to insert "out of any money in the Treasury not otherwise appropriated," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay out of any money in the Treasury not otherwise appropriated to Zah Barmon, of Spokane, Wash., doing business under the trade name of "Mikes' Trading Store," the sum of $3,625, to reimburse her for said amount of money deposited by her in connection with a bid submitted for certain surplus property advertised for sale by the surplus property division of the War Department and erroneously covered into the Treasury of the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

THE PITTMAN SILVER ACT.

Mr. HEFLIN. Mr. President, I ask unanimous consent to have printed in the RECORD, in 8-point type, a splendid article prepared by the Senator from Nevada [Mr. PITTMAN]. It explains the Pittman Act and gives a brief history of silver legislation by Congress.

There being no objection, the matter referred to was ordered to be printed in the RECORD, in 8-point type, as follows:

STATEMENT BY SENATOR PITTMAN.

The Pittman Act is responsible, if responsibility must be placed, for the Government at this time paying $1 an ounce for American silver while silver produced everywhere else in the world is now selling in all countries, including our own, around 70 cents an ounce.

The life of the act is now, and for some time has been, threatened by violent efforts to have the purchasing clause repealed. It is largely through misunderstanding of the act and ignorance of its history that propagandists who are inspired by selfish motives have been able to create a widespread sentiment against the act.

These propagandists attempt to create the impression that the United States Government is paying the silver producer a bonus in a sum equal to the difference between the world market price and the sum of $1 an ounce paid by the Government to the producer of American silver. The Government does not pay any bonus whatever to the producer of American silver. The Government simply pays to the producer of American silver the dollar an ounce that it received from the sale, under the Pittman Act, of silver dollars in the Treasury of the United States. The Government loses nothing by the transaction. It is simply transferring British dollars to the producer of American silver, maintaining the production of the silver industry in the United States, and obtaining preference for American silver mines over the mines of every other country.

Now, let us refer to the history of the act. In the winter of 1917 and 1918 the price of silver was below 80 cents an ounce, and at the same time the cost of silver mining was over 60 per cent above normal by reason of war conditions. Silver mines were threatened with a close-down by reason of this low price and the extreme high cost of production. The governors of western States, representatives of civic bodies, committees of mine operators, and financial experts met in Washington with the Senators and Congressmen of the silver-producing States and conferred with the Treasury Department, the Director of the Mint, and other administration officers and governmental experts, with regard to the Government anticipating its needs for subsidiary coinage and purchasing silver in advance of requirements for the purpose of sustaining the silver industry. These conferences continued for several weeks. The great question at issue was the price that the Government should pay for the silver. It was finally agreed between the representatives of the United States Government and these various other representatives in conference that $1 an ounce was a reasonable price to be paid for silver, and that such price would no more than keep the mines in operation.

Then there suddenly developed a grave war condition that urged the Government to immediate action. I was sitting in my office one day in the early part of 1918 when I received a telephone message from Mr. Raymond T. Baker, the Director of the Mint. He urged me to come down to the Treasury Department immediately to confer with regard to some very important matters relating to the production and price of silver. I had already made preparations to depart from Washington on official business within 20 minutes after I received the telephone message. I stated this fact to Mr. Baker and told him that I would return in two days' time and would then take the matter up with him. He then called Mr. Leffingwell, the Assistant Secretary of the Treasury, to the phone, and Mr. Leffingwell told me that it was not only a matter that affected the welfare of the silver industry but that it was much more serious; that immediate action was necessary to prevent disastrous consequences to our success in the war. I, of course, went immediately to the Treasury Department. There I found Mr. Leffingwell, Mr. Straus, Mr. Baker, and other representatives of the Government, the British ambassador and other representatives of foreign countries, giving instant evidence by their demeanor of the grave crisis that occupied their thoughts.

The British ambassador at once frankly stated the case. He informed us that the Indian Government, under British supervision, had spent years and years teaching the Indians to accept paper certificates in lieu of silver rupees, which certificates were payable in silver on demand; that to facilitate this development the Indian Government had established many agencies of redemption throughout India.

The Indians had finally become confident of the power and willingness of the Indian Government to redeem these certificates and a large surplus of silver for redemption purposes was not required. Therefore this surplus had been allowed to decrease, and there was not near enough silver in India to redeem the certificates if presented. The Germans, so he told us, had started a propaganda in India to the effect that the British Government could not redeem its silver certificates, and this had started a run on the Indian redemption agencies. He frankly confessed to us that in a very few days the Indian Government would be compelled to admit that it could not redeem these certificates unless a supply of silver could be obtained, with the result that there would be great disturbances in India.

We all knew what a revolution in India at that time would mean. We knew that the great German drive against the west front was about to start. We realized that many of the depleted allied forces would have to be withdrawn to meet the effects of an Indian revolution. We did not deceive ourselves. We knew it might change the whole course of the war.

Astounding as is the fact, it was discovered that there was no surplus supply of silver in the world except the four hundred and odd millions of silver dollars lying in the Treasury of the United States to secure the redemption of the silver certificates issued against them. These silver dollars were placed there by our miners, and they were their security for their silver certificates. Our patriotism demanded that we find the means of utilizing this silver.

It may occur to the reader that it is strange that the Indian rupee certificates were not redeemed in gold, and yet it may seem stranger still to know that there are people in India, and the very same people who were supplying us with the jute bagging that was so necessary in the war, who will accept nothing but silver.

Congress, and Congress alone, had authority to authorize the melting up of these silver dollars and the supplying of the bullion derived therefrom to the Indian Government. Congress could be counted upon for favorable action, of course. Western Senators and Congressmen were confronted with a dual duty, and while it was their duty to help prevent revolution in India it was their duty at the same time to see that their own industries and their own people did not bear too heavily this burden.

We only required that the silver dollars be sold at a fair price and that such dollars be recoined and replaced from American silver purchased at the same price.

Representatives of the Government desired to fix the selling and purchase price at the then market price, approximately 80 cents an ounce. There were representatives of the silver-producing States who insisted that the selling and purchase price should be $1.29 an ounce. A compromise was finally reached on $1 an ounce, the price that had theretofore been agreed upon at the conferences to which I have referred.

I introduced the bill in the United States Senate. It was referred to the Committee on Banking and Currency. There were Senators and Congressmen who feared it was another free and unlimited silver coinage wedge. There were ardent free and unlimited silver coinage advocates who wanted to substitute a 16 to 1 bill. We knew if the debate were started no

bill could be passed. The Senators and others representing the silver States, together with the representatives of the Government, appeared before the committee and explained the situation. The committee unanimously approved the bill and reported it to the Senate. There were few speeches made on the subject in the Senate, and those speeches carefully guarded the prime purposes of the bill, as publicity would have but increased the danger. Each Senator, however, was personally informed with regard to all the facts. Every now and then some Senator would enter the Chamber who by some chance had not received information with regard to the bill. He would rise to his feet for the purpose of asking questions, but his coat tail would be tugged by some other Senator and he would silently and in amazement collapse in his seat.

The bill passed the Senate with only two dissenting votes. It went to the House of Representatives. It was referred to the Committee on Banking and Currency of that body. All of us again appeared before that committee and fully explained the facts and the necessity of the case. That committee unanimously approved the bill and favorably reported it to the House, and its passage through that body followed the same course that it did in the Senate. No bill of such far-reaching importance was ever so peculiarly passed or so rapidly acted upon.

The bill became a law under a fair compromise and by virtue of the solemn agreement between the Government, represented by its executives, and the Congress of the United States. That bill never could have become law over the objections of the Senators and Congressmen from the silver-producing States. It was within the power of such Senators to have filibustered against the bill indefinitely and thus to have prevented its passage. It is unthinkable that the Senate and the House of Representatives, under these sacred considerations, could for one moment, after being informed of all the facts, consider the repeal of this act, the repudiation of their contract, and the dishonoring of Congress and our Government.

And yet Congress is a changing body and composed of many men from many different kinds of localities, and there anything is possible. It is for this reason that the deception that is being spread broadcast throughout the country should be exposed and the facts given to the public.

But we of the silver-producing States have an additional interest in the preservation of this act. Our mines could not operate with silver at less than a dollar an ounce. Our mines would all be closed down if we could only receive the present world market price of silver. The killing of this great industry would mean poverty and distress in hundreds of localities throughout the West and the great diminution of the commercial power of the whole country. I am confirmed in this statement by numerous reports from silver-mine operators throughout the country.

The next question of vital importance to those interested in the production of silver is the length of time that this act will be operative, or, in other words, how long will the Government continue to pay a dollar an ounce for American-produced silver?

The act provides that the Government shall purchase upon presentation every ounce of American-produced silver and pay therefor $1 until the silver dollars that were melted up and sold to India have been replaced in the Treasury from the purchase of American silver.

The Government, under the act, melted up and sold 272,000,000 of silver dollars. This is equivalent to about 209,000,000 ounces. The Government has purchased under the act for recoinage and replacement of silver dollars 124,000,000 ounces. Therefore, there is remaining 85,000,000 ounces that must be purchased from American silver at $1 an ounce when presented to the Government. The act authorizes the sale of 350,000,000 of dollars. There are still 80,000,000 of dollars the Government may sell. If it should sell these 80,000,000, then there would be a total of approximately 145,000,000 ounces to replace.

How long will this take? The answer depends upon the amount of silver produced annually in the United States, and whether it is sold to the Government or elsewhere. In 1920 the total production of American silver was 55,000,000 ounces. In 1921 it was 53,000,000 ounces. In 1922 it will be approximately 53,000,000 ounces. I am, of course, using round numbers. So, if the Government continues to purchase American silver under the act, it will probably require about 20 months to replace the silver dollars already sold and a year longer if the additional $80,000,000 are sold or disposed of.

But, there are conditions that may continue this act in effect indefinitely; that is, the Government may never purchase a sufficient amount of silver to replace these dollars, in which case there would always be a fund for the purchase of American silver if the market price dropped below $1 an ounce. What are these conditions? When silver goes above a dollar an ounce the silver producer does not present his silver to the United States Government but sells it to outside purchasers in the open market. For instance, the Pittman Act became a law on the 23d day of April, 1918, and yet the Government purchased no silver under the act until June, 1920. Why? Because silver during that period of time was selling in the open market of the world at above a dollar an ounce, and therefore the American silver producers did not present their silver to the Government for purchase under the act.

This leads us to the natural inquiry as to the probability of silver going above a dollar an ounce before the Government has purchased sufficient silver under the Pittman Act.

This problem is governed by the supply and demand for silver throughout the world, and the ability of those desiring silver to find the means with which to purchase it. There is now, and always has been, a general impression that there is an unlimited quantity of silver in the world ready for mining. The fact is just the contrary. Engineers, geologists, and prospectors, backed by unlimited capital, for a great many years have been scraping the face of the earth in search of paying silver mines.

And yet notwithstanding this great effort there has been very little increase in the production of silver during the last 20 years. For instance, the world's production in 1900 was 173,000,000 ounces, while in 1918, being the latest authentic reports, the production was only 197,000,000 ounces. The United States is the greatest silver-producing country in the world, Mexico second, and Canada third. These three countries produce nearly all the silver of the world.

Let us see what has been the production of silver in the United States since 1906. In 1906 the production was 56,000,000 ounces. It steadily increased until 1916, when it reached 74,000,000 ounces. Since that time it has decreased to 53,000,000 ounces in 1921.

So the average annual production of silver throughout the world may be placed at 197,000,000 ounces and the average annual production in the United States at approximately 65,000,000 ounces.

These figures clearly disclose the scarcity of silver throughout the world. They demonstrate beyond argument the impossibility of greatly increasing the production.

Now, let us consider what is the demand for silver. We have already considered the demand for silver in India, which came to a crisis during the war.

Economists all know that China measures all values by silver in the form of bullion. Commerce can not be transacted in China except through the medium of silver. The demand for silver in China has always been enormous. This demand is now depressed because of the failure of crops in China and the deplorable economic and political conditions existing there. And yet, it is evident that China is going to develop rapidly in the next few years, and with this development will come a greatly increased demand for silver.

Silver is the money of general circulation in all of the South American Republics. As the commercial development of those countries increases the demand for silver there must naturally increase.

It is admitted that in India and China are the largest markets for silver. And yet in our own country during 1920 the Director of the Mint purchased 26,000,000 ounces of silver for subsidiary coinage, nearly half of the total production of silver in the United States.

All of Europe uses silver for subsidiary coinage. During the war there became such a tremendous demand in Europe for silver coins with which to pay certain of their soldiers that continental European countries were compelled to melt up silver plate to replenish these coins, and when the armistice was signed these countries were denuded of silver.

Did they want the silver? Did they need the silver? Witness what happened immediately after the signing of the armistice. These countries went into the open market of the world to compete in the purchase of silver with China and India. This natural demand and purchase carried the price of silver above a dollar an ounce, it reaching its maximum price of $1.38¼ an ounce on November 25, 1919.

Then the price commenced to recede until the month of May, 1920, when the world's market price of silver went below $1 an ounce.

What was the cause of this sudden drop in the price of silver throughout the world? China was racked with famine and torn to pieces with political disturbances. Germany, being without gold or credit, was compelled to remelt the silver coins that she had laid in immediately after the armistice and dump

such silver bullion on the market at any price she could obtain, because it was the only thing that had a value with which she might purchase in foreign countries. Other European countries did the same thing. Even India, for the first time in many years, melted up its silver and threw it on the markets of the world for the same reasons.

The depression, therefore, of silver was natural. And yet all of these countries must again supply themselves with silver for subsidiary coin so soon as they have credit or products with which to buy silver. Not only that, but as the countries of Europe become prosperous they will desire and undoubtedly will replace their silver plate that they melted up during the war and during the last several months.

In the United States alone during the past year there was over 25,000,000 ounces of silver used in the arts. Is it not natural that when European countries become prosperous they will use their proportion of silver in the arts? The high price of our silver, like the high price for many of our other products, must wait upon the prosperity of the rest of the world. They will buy our products when they can sell theirs.

The moving-picture industry is to-day one of the largest users of silver, and this silver when once used is destroyed and goes out of existence. This industry is increasing throughout the world and will continue to be a source of increasing demand for silver.

These facts prove beyond doubt that in the near future there will be great competition in the purchase of silver. In the future the ruinous competition of the sale of silver will be avoided. Such competition is bound to carry the price of silver above a dollar an ounce. It may be within one year, it may require two years, but in any event it is almost certain that the price of silver will go above a dollar an ounce before the fund for the purchase of American-produced silver under the Pittman Act is exhausted.

If this takes place, then the Government will cease to buy silver when it goes above a dollar an ounce, and the fund will remain on hand as a constant assurance and guaranty to meet any emergency at any time to protect American-produced silver at $1 an ounce.

These conjectures are all based upon existing laws and conditions. But there is additional legislation that I am now formulating and which will, in my opinion, add greatly to the value of silver and the stabilization of the market throughout the world.

The outlook for the silver mining industry in the United States is brighter than anywhere in the world, and no industry is so certain and stable.

EXECUTIVE SESSION.

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 5 o'clock and 40 minutes p. m.) the Senate, under the order previously entered, took a recess until Monday, August 28, 1922, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate August 26 (legislative day of August 25), 1922.

PUBLIC HEALTH SERVICE.

The following-named passed assistant surgeons to be surgeons in the United States Public Health Service, to rank as such from the dates set opposite their names:

Clarence H. Waring, from August 21, 1922.

George A. Wheeler, from August 22, 1922.

These officers have served the required time in their present grade and have passed the necessary examination for promotion.

The following-named doctors to be assistant surgeons in the Public Health Service, to rank as such from date of oath:

Guy H. Faget.

William Y. Hollingsworth.

These doctors have passed the examination prescribed by law and the regulations of the service.

PROMOTION IN THE REGULAR ARMY.

DENTAL CORPS.

First Lieut. Albert Fields to be captain in Dental Corps, from August 23, 1922.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 26 (legislative day of August 25), 1922.

POSTMASTERS.

CALIFORNIA.

Frederic W. Stahler, Yorba Linda.

COLORADO.

Talitha B. Utterback, Mesa.

ILLINOIS.

John R. Scoggin, Gardner.
Albert Weiland, Peru.

KENTUCKY.

Gideon D. Ison, Blackey.
Hiram H. Braden, Blue Diamond.
Della McKinney, Fleming.

NORTH CAROLINA.

William B. Duncan, Raleigh.

OHIO.

Charles E. McClelland, Attica.

OREGON.

Ora Mahoney, Oakland.
Charles S. Heinline, Roseburg.

TEXAS.

Edwin C. Hill, El Campo.
Will K. Davis, Gonzales.
James W. McBee, Lavernia.
Joe R. Taylor, Rhome.

WASHINGTON.

Grover C. Schoonover, Odessa.

WITHDRAWAL.

Executive nomination withdrawn from the Senate August 26 (legislative day of August 25), 1922.

APPOINTMENT, BY TRANSFER, IN THE ARMY.

INFANTRY.

Second Lieut. Kenneth Francis Pughe, Air Service, with rank from June 13, 1922.

HOUSE OF REPRESENTATIVES.

SATURDAY, *August 26, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

The Lord be merciful and gracious unto us. By Thy Spirit lead and direct us in all our ways. May each succeeding day find us obedient to Thy call, to do Thy will and to follow Thy commands. Teach us not to hesitate to accept Thy rod and staff and grant that they may support and comfort us. O bless all instrumentalities by which light and knowledge are diffused throughout our country. We ask Thee, our heavenly Father, to extend all efforts for righteous peace, and may the love of Christ, the love of our fellows, and the welfare of all constrain them. O ever give us that bread that cometh down from above which feeds our souls and strengthens them in all noble impulses and aspirations. In Thy name. Amen.

The Journal of the proceedings of yesterday was read and approved.

SALT RIVER RECLAMATION PROJECT.

Mr. HAYDEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill H. R. 10248, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from Arizona asks unanimous consent to take from the Speaker's desk a bill of which the Clerk will report the title, disagree to the Senate amendments, and ask for a conference.

The Clerk read as follows:

H. R. 10248, an act authorizing the sale of surplus power developed under the Salt River reclamation project, Arizona.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER appointed as conferees on the part of the House Mr. SINNOTT, Mr. SMITH of Idaho, and Mr. HAYDEN.

EXTENSION OF REMARKS.

Mr. O'CONNOR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by incorporating therein a resolution adopted by the commission council of the city of New Orleans urging the improvement of the Ohio River.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

THE ROMANCE OF THE MISSISSIPPI AND ITS TRIBUTARIES.

Mr. O'CONNOR. Mr. Speaker, the days of romance are not over. They will not be over or come to an end for many, many centuries to come. I hope that romance, like hope, will spring eternal within the human breast. In all probability that wonderful feeling which has inspired generation after generation through centuries and centuries of time began, as the author of "Evolution" would say, "a million years ago," and it may be that a million years from to-day, if some planet or comet does not jostle this old earth out of its orbit, the thirst for adventure, glory, and romance will be with those far-away children of the world who have to come out and play their part and then depart to join the innumerable throng that have come and gone since the dawn of creation. And apparently it is not only man and his mate who enjoy the thrill of adventure. Inanimate things have their days of romance, their thrill of glory, their history. Homer gives vitality, virility, courage, and warlike and militant life to a river, and makes it play an heroic part in the great encounter between his mortal and immortal—terrestrial and celestial—heroes. But long before the days of Homer, in the very morning of the race, great rivers were worshipped and venerated by millions, who prayed alternately to be freed from their terrors or sought religious consolation in their waters.

Many a river lives embalmed in history and in historic verse. The Euphrates, the Nile, the Jordan, the Tiber, the Rhine, the Thames, the Seine typify the course of empires and dynasties. Countries are described and remembered best from committing to memory the names of the great rivers that flow through them, and most of the military chapters of the Old World history relate to battles fought on the banks of some great stream that heeded not the strife but calmly continued its march to the sea.

But the great river of the West, the mighty father of waters, from its length, its lordly tributaries, the immensity of the valley that it drains, the gorgeousness of its scenery, the fertility of its soil, the splendor of its cities, the wealth of its people, possesses a history of its own. In length it is exceeded only by the Nile—in volume by the Amazon. Geographically, it divides almost equally the broad territory of the United States in its sweep from ocean to ocean. It is the "trough" of the tremendous valley that lies between the rolling, undulating Alleghenies and the majestic Rockies. It is the proudest—the most valued natural possession of the American people. It is revered next to American liberty. Its banks from end to end are the scenes of romance, story, and song. Its history has been a dreamland for poets. Its commerce has builded a score of populous cities, hundreds of towns and villages, and has suggested a vast railway system that for years has taken the burden of traffic from its bosom. But the development of the country has exceeded the capacity of man to build railways and to equip them. The present industrial and transportation problem has demonstrated the necessity to the point of conviction of a return to the days when steamboats gave clouds of smoke by day and pillars of fire to the skies during the night on the big river and its great affluents. We must go back to the *R. E. Lee* and *Natchez* and *J. M. White* atmosphere, and under the thrill and inspiration of those days of glory on the river begin a renaissance, a revival, with modern up-to-date steamboats that will even be an improvement upon those celebrated floating palaces of the early seventies. For the renaissance, the revival is indeed at hand. Thoughout the valley freight congestion exists. Deep waterways must be established and landings and docks provided for the ever-increasing commerce that means so much to our people. The majesty of the Mississippi is reasserting itself. The father of waters returns to its own.

But in order to get the greatest possible results its powers must not be dissipated, bringing ruin and death to the thousands who dwell along its banks. It must be disciplined. It must be harnessed and kept within great banks; but in addition to that a "spillway" must be provided, or the people who live to the number of 400,000 in the magnificent city on its banks not far from the Gulf of Mexico will speak in unmistakable terms to the engineers who may or may not lay the flattering unction to their souls that they and they alone must speak oracularly on the subject of a safe river. The river must be harnessed—kept within bounds, disciplined and its tremendous power not only conserved but utilized. One thing is certain and that is that the people who were born and reared along the banks and levees of the lower Mississippi and its tributaries demand from the United States Government protection against overflow and breaks in the levees on the ground that it is an undeniable and undebatable obligation resting on the National Government to preserve the general welfare and prevent the annual floods that have become a visitation by reason of the unscientific development of great farming sections contiguous to the rivers that flow into the Mississippi and the rapidity of the drainage from both the country and the cities. In other words, the development of the lands and the growth of the cities to the north of us has brought a great danger to the lower country, as a result of the speed of the flow of the rainfall throughout the upper valley, into tributaries that act as immense drains for town, city, hamlet, village, and country. The Government, not as a matter of generosity, but as an act of common justice, is obligated to prevent or remedy such a situation. And the Government I am sure will not attempt to escape that obligation. It is just, and I have an abiding faith in the sense of fairness of the American people and their desire to do the proper thing under all circumstances.

On the walls of the rotunda, under the dome of this magnificent Capitol, are eight great pictures. One of them is by William H. Powell, entitled "The Discovery of the Mississippi." Hundreds of thousands of men and women have stopped to gaze on its unforgetable colors.

The time is 1541, the scene is the bank of the Father of Waters. There is De Soto, and beside him are his companions in adventure and in the thirst for glory. There are a few Indians—guides and an Indian girl or two. In the distance are seen dancing canoes, magical islands, and purple shores. The Big River is as much of an enchantment to us who have lived our lives along its banks as it was to the conquistadores who were the first white men to see it, almost 400 years ago. We who know it and love it feel for it that interest so beautifully expressed in the immortal lines of Keats "on first looking into Chapman's Homer":

> Then felt I like some watcher of the skies
> When a new planet swims into his ken;
> Or like Stout Cortez when with eagle eyes
> He stared at the Pacific and all his men
> Looked at each other with a wild surmise
> Silent upon a peak in Darien.

Balboa, or "Stout Cortez," viewed from Balboa Hill, now in the Canal Zone, the stiller sea on September 25, 1513, some 28 years before the other great spirit and discoverer of that period, De Soto, looked upon the waters of the Great River, in which he was buried. "Days of old; days that are no more," do not apply to the Mississippi. The renaissance, I repeat, is in the beginning. The days of old are coming back with a spirit that will make for a river traffic which in turn will build up river cities that will possess "the glory that was of Greece, the grandeur that was of Rome."

Listen to this great author. Four hundred thousand people of the city of New Orleans, speaking through their commission council about the river and its traffic and the far-away "Mighty Ohio." When great cities begin to trumpet their hopes and their faith in the return of the days of river splendor one must believe that the revival is at hand and that newer and finer *Lees* and *Whites* and *Natchezes* will soon be carrying passengers and freight from St. Louis, Cincinnati, Pittsburgh, and other rich and opulent cities and towns along the rivers to great, dreamy, but alert, old New Orleans, and from the "Old City" will go back rich loads of commerce and great lists of passengers to enjoy the glories of a river ride to the big cities above.

Look and listen to this expression from the mayor and commission councilmen of New Orleans:

Resolution by Mr. Maloney.

Whereas the United States Government, through the War Department, is now operating, successfully and on schedule time, with great resulting benefit to commerce and navigation, a barge line upon the Mississippi River, between the ports of New Orleans and St. Louis; and

Whereas important private corporations in the Pittsburgh-Wheeling district upon the Ohio and Monongahela Rivers, having immense tonnages to move at economies in transportation, have also demonstrated at their own expense, and to the advantage of consumers in the South, Southwest, and West, the saving in time and money consequent upon the intelligent and systematic use of the waterways of the Mississippi Valley; and

Whereas the rapid growth in population and industry in the valley, the increase in production and the necessity of providing additional facilities for transportation, in view of railroad congestion, render imperative the improvement of the Mississippi and its tributaries, which

afford natural highways of vital importance, and which may be rendered serviceable at all seasons, at relatively small expenditure by the Government; and

Whereas the Ohio River, between Evansville and Cairo, if canalized, with a system of locks and dams similar to that now being constructed by the United States Government between Pittsburgh and Evansville, would furnish a waterway of priceless value to the country at large, and more especially to the industrial zone centered in the Pittsburgh-Wheeling district, whose steel companies and other producers and manufacturers are willing and anxious to use the Ohio River to reach the Mississippi as a highway for the transportation of their commodities when the same shall have been made ready, but the use of which highway now depends upon the variable and uncertain stage of water found in the lower end of the Ohio River during the summer months; now, therefore, be it

Resolved by the Commission Council of the City of New Orleans, That the Congress of the United States be and is hereby respectfully and earnestly urged and requested, at the earliest possible moment, to provide as a national necessity for the improvement of the Mississippi and its tributaries, so that they may afford dependable avenues for transportation and commerce during the entire year, and that the Ohio River in particular be so improved that the consumer of the South, Southwest, and West may have the benefit of the resulting economies; be it further

Resolved, That copies of this resolution be forwarded to our Representatives in Congress, to the end that they may actively support and bring about the passage of congressional legislation in accordance with the principles of this resolution.

Adopted.

I hope the Committee on Rivers and Harbors will act favorably upon this resolution and thereby continue to do the noble things for which it is legislatively and historically noted.

COAL SITUATION.

Mr. BRENNAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD regarding the coal situation and to insert a telegram from the Michigan fuel administrator.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. BRENNAN. Mr. Speaker, I have introduced today and intend to call up for consideration at an early date the following House resolution, which suggests the issuance of regulations to prevent or to restrict, during the present coal crisis, the use of coal for nonessential purposes:

Whereas it is apparent that, because of the greatly reduced production of coal during the past few months, there is grave danger of a fuel shortage during the coming winter, even though the coal and rail strikes are settled immediately; and

Whereas such a threatened fuel deficiency may imperil the lives and health of the people of the country and interfere seriously with the continued operation of essential utilities, industries, and activities; and

Whereas no steps have as yet been taken officially to restrict the use of coal to essential purposes or to conserve available supplies: Therefore be it

Resolved, That the House of Representatives respectfully requests the Interstate Commerce Commission, the Federal Fuel Distributer, and other Federal departments and establishments having jurisdiction in the premises, to consider the advisability of issuing orders and regulations, to become immediately effective, looking to the conservation of available coal stocks, prohibiting or limiting the unnecessary use of electric signs and display lighting, and forbidding or restricting the conduct of activities, nonessential in their character, which involve the consumption of fuel which now or hereafter may be required for essential purposes.

It is a strange anomaly that, while for some weeks great inconvenience and financial loss, if not actual hardship, has been experienced throughout the country because of the fuel shortage, no attempt, official or otherwise, has been made to restrict the use of the small stocks of fuel now on hand. The streets of any of our cities may be seen any night brilliantly illuminated by electric signs and display advertisements which are hourly burning up coal which may be sorely needed next winter to prevent people from freezing. Are we to wait until calamity is actually upon us before adopting means to avert it? No one, of course, wants to interfere with legitimate business activity, but ordinary prudence suggests that we restrict the conduct of certain nonessential activities now rather than face the almost inevitable prospect of complete shutdowns, accompanied probably by human distress and hardship this winter.

For weeks the press of the country has been calling attention to the serious coal deficiency which exists and which is bound to continue despite the heroic but belated efforts now being made to catch up with the demand. Only yesterday I received a telegram from Michigan's fuel administrator containing the following dismal announcement:

Canneries close; fruit rotting; cold weather imminent; schools and colleges without fuel; not an ounce of coal yet received for household use.

This message is but indicative of conditions throughout the country.

The utmost energy and effort on the part of operators, miners, and fuel officials during the next few months can not result in the delivery of coal which should have been mined this summer, but was not. Nor will it be physically possible for the railroads to handle in three months the coal shipments which normally are spread over eight months. There is one sensible and obvious way by which we can assist now in preventing a shortage later, namely, by curtailing the use of coal to the more necessary purposes until the crisis is actually passed.

It is unfortunate that we should find it necessary to resort to conservation methods and devices similar to those employed during the war. But the people faced the inevitable then with good grace and patriotic self-sacrifice. They will, I am sure, respond cheerfully again if the Government calls upon them. If some action is not taken at once to restrict and to conserve in advance of calamity, it seems certain that we will be called upon to face privations and hardships greater even than those experienced in the winter of 1917.

There has just been handed to me the following telegram from the Michigan State fuel administrator, which speaks for itself and seems to establish conclusively the necessity for immediately imposing restrictions upon the use of coal for nonessential purposes:

Coal situation in Michigan is desperate. Canners without coal, fruit is rotting, factories are closing for want of fuel. Thousands of men have been laid off. Some gas companies are running but two hours a day. The State has $500,000 cash guaranty filed with Federal Fuel Administration. Have another million-dollar guaranty executed and in my hands. Schools open in 10 days and are without fuel. Colleges and hospitals clamoring for coal. No stocks on hand for private consumption. Cold weather is imminent. Situation growing desperate. Some State mines in operation. Others can not begin until September 1 or 15. Production at most only 10 per cent of requirements. Not one ounce has been received for general distribution. Applications for priorities, accompanied by bank guaranties, have been turned down and applicants referred to stock of State fuel administration, which has no coal and has been furnished none. Coal moving in interstate commerce offered at from six to ten dollars a ton at the mines. * * *.

W. W. POTTER,
Michigan State Fuel Administrator.

EXTERMINATION OF INSECTS.

Mr. IRELAND. Mr. Speaker, by direction of the Committee on Accounts, I call up privileged report on House Concurrent Resolution 66.

The Clerk read as follows:

House Concurrent Resolution 66 (Rept. No. 1185).

Resolved by the House of Representatives (the Senate concurring), That the Architect of the Capitol be, and he is hereby, authorized and directed to make a contract for the extermination and banishment of insects from the House Office Building, the Capitol, and the Senate Office Building at an expenditure not to exceed $2,500. That the expenditures in carrying out the contract be paid from the contingent funds of the House and Senate in equal proportions, and upon vouchers authorized by the respective committees having control of the contingent funds of the Senate and House of Representatives and approved by the chairmen thereof.

Mr. IRELAND. Mr. Speaker, I think there will be no objection to the resolution and I move its adoption.

Mr. CLARKE of New York. I would like to ask the gentleman a question. Does it include mice?

Mr. IRELAND. No; it is not contemplated within this resolution to include the effort at extermination of our pet rodents; those are cared for in another way.

Mr. GARNER. Will the gentleman yield?

Mr. IRELAND. Yes.

Mr. GARNER. Why is the resolution so framed?

Mr. IRELAND. It is framed to include the House Office Building, the Capitol, and the Senate Office Building.

Mr. GARNER. I understood from the reading that it only applied to the Senate. [Laughter.]

Mr. IRELAND. No; there are a few bugs in the House. [Laughter.]

The resolution was agreed to.

JOHN M'MAHON.

Mr. IRELAND. Mr. Speaker, by direction of the Committee on Accounts I call up House Resolution 379.

The Clerk read as follows:

House Resolution 379 (Rept. No. 1186).

Resolved, That there shall be paid, out of the contingent fund of the House, to Thomas J. Lindsay, administrator of John McMahon, late an employee of the House of Representatives, a sum equal to six months of his compensation as said employee, and an additional amount, not exceeding $250, to defray the expenses of the funeral of said John McMahon.

The resolution was agreed to.

ELIZABETH SABINE.

Mr. IRELAND. Mr. Speaker, by direction of the Committee on Accounts I call up a privileged report on House Resolution 414.

The Clerk read as follows:

House Resolution 414 (Rept. No. 1187).

Resolved, That the Clerk of the House of Representatives be directed to pay, out of the contingent fund of the House, to Elizabeth Sabine, widow of George W. Sabine, late assistant librarian of the House, a sum equal to six months' salary as assistant librarian, and that the Clerk be further directed to pay out of the contingent fund the expenses of the funeral of said George W. Sabine, such expenses not to exceed $250.

The resolution was agreed to.

MINNIE TORBERT BLUMENBERG.

Mr. IRELAND. Mr. Speaker, by direction of the Committee on Accounts I call up the following privileged resolution.

The Clerk read as follows:

House Resolution 395 (Rept. No. 1188).

Resolved, That there shall be paid out of the contingent fund of the House to Minnie Torbert Blumenberg, widow of M. R. Blumenberg, late an employee of the House of Representatives, a sum equal to six months of his compensation as such employee and an additional amount, not exceeding $250, to defray the expenses of the funeral of said M. R. Blumenberg.

The resolution was agreed to.

HARRIET DUNBAR COUDEN.

Mr. IRELAND. Mr. Speaker, by direction of the Committee on Accounts I call up the following privileged resolution.

The Clerk read as follows:

House Resolution 412 (Rept. No. 1189).

Resolved, That the Clerk of the House of Representatives be directed to pay, out of the contingent fund of the House, to Harriet Dunbar Couden, widow of Dr. Henry N. Couden, late chaplain emeritus of the House, a sum equal to one year's salary as chaplain emeritus, and that the Clerk be further directed to pay out of the contingent fund the expenses of the last illness and funeral of said Dr. Henry N. Couden, such expenses not to exceed $250.

The resolution was agreed to.

FRANCES C. PADGETT AND IDA L. PADGETT.

Mr. IRELAND. Mr. Speaker, by direction of the Committee on Accounts I call up the following privileged resolution.

The Clerk read as follows:

House Resolution 406 (Rept. No. 1190).

Resolved, That the Clerk of the House of Representatives be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Frances C. Padgett the sum of $186.66 and to Ida L. Padgett the sum of $120, being the amount received by them per month as clerks to the late Hon. Lemuel P. Padgett at the time of his death, August 2, 1922.

The resolution was agreed to.

ENROLLED BILL SIGNED.

Mr. RICKETTS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 4. An act granting relief to soldiers and sailors of the war with Spain, Philippine insurrection, and Chinese Boxer rebellion campaign; to widows, former widows, and dependent parents of such soldiers and sailors; and to certain Army nurses; and to amend section 2 of an act entitled "An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes," approved March 4, 1917.

LAURENCE H. MALONE AND FLORENCE M. MALONE.

Mr. IRELAND. Mr. Speaker, I present the following resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 403 (Rept. No. 1191).

Resolved, That there shall be paid out of the contingent fund of the House of Representatives to Laurence H. Malone the sum of $200, and Florence M. Malone the sum of $106.66, being the amounts received by them per month as clerks to the late Moses P. Kinkaid, a Representative in Congress.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

DECORATION IN HOUSE WING OF CAPITOL.

Mr. IRELAND. Mr. Speaker, I present the following resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 381 (Rept. No. 1192).

Resolved, That the authority for payment out of the contingent fund of the House, pursuant to House Resolution No. 693, adopted March 3, 1921, for the decorations in the House wing of the Capitol Building is hereby continued from and after June 16, 1922, under the limitation therein provided.

Mr. IRELAND. Mr. Speaker, this resolution is the result of an oversight on the part of some one to have a former similar resolution continued. The work has not been finished, and at the request of several Members and the Architect of the Capitol this resolution is introduced. The resolution which this continues in effect was introduced by the gentleman from Maryland [Mr. ZIHLMAN] on February 21, 1921, and provided that there shall be paid out of the contingent fund of the House, until otherwise provided by law, the sum of $5,000 for the restoration of decorations in the House wing of the Capitol, and the employment of personal services and purchase of material, to be under the direction of the Architect of the Capitol, with the approval of the Committee on Accounts. The work necessitates the employment of a high-class artist. Most all of it is canvas work. It has not been completed. This resolution makes it possible to continue the work. The men employed have been at their work since June 30, but without compensation.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. IRELAND. Certainly.

Mr. STAFFORD. Will the gentleman inform the House what is included in this redecorating for which it is desired to have the authorization continued?

Mr. IRELAND. To cite one instance, there is the repainting of the coats of arms of some of the States.

Mr. STAFFORD. Does this propose to redecorate the House Chamber? I notice that there is on the wall a different color panel in substitution for the gold. It is a grayish, silvery tint, and some months ago I noticed on canvas a different color, also. Is it proposed to redecorate the House Chamber?

Mr. IRELAND. On that I am not positively informed, although that is a part of work that would come under this resolution.

Mr. WINGO. The gentleman does not charge that was done deliberately?

Mr. STAFFORD. Yes; with premeditation; and I believe some experimentation is now going on. I wish to know what is the scope of the proposed change in the interior decoration of the Chamber, because I think the gold effect is much superior to the substituted grayish tint.

Mr. IRELAND. I pretend to no artistic temperament which would permit me to advise the Achitect of the Capitol.

Mr. STAFFORD. What is the need of substituting any other color, when the gold decorations are in good condition?

Mr. IRELAND. The Chamber of the House is only one small item.

Mr. STAFFORD. Then, when there is no necessity for it, why go to the expense of substituting some other color?

Mr. IRELAND. I should think the Architect of the Capitol would be better able to judge of that than any Member of the House.

Mr. STAFFORD. The Members of the House themselves by their own inspection can see there is no pressing need for any change in interior decoration here.

Mr. IRELAND. About that I am not informed.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

ADJOURNMENT.

Mr. MONDELL. Mr. Speaker, I move that the House do now adjourn.

Mr. GARRETT of Tennessee. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 124, nays 60, answered "present" 1, not voting 242, as follows:

YEAS—124.

Mr. Paige (for) with Mr. Cullen (against).

Mr. Scott of Michigan (for) with Mr. Griffin (against).

Mr. Rose (for) with Mr. Dupré (against).

Mr. Moores of Indiana (for) with Mr. Linthicum (against).

Mr. A. P. Nelson (for) with Mr. Hawes (against).

Mr. White of Maine (for) with Mr. Fields (against).

Mr. Siegel (for) with Mr. Harrison (against).

Mr. Olpp (for) with Mr. McDuffie (against).

Mr. Perkins (for) with Mr. Thomas (against).

Mr. Sinclair (for) with Mr. Rainey of Illinois (against).

Mr. Mudd (for) with Mr. Rainey of Alabama (against).

Mr. Snell (for) with Mr. Park of Georgia (against).

Mr. Temple (for) with Mr. O'Brien (against).

Mr. Watson (for) with Mr. Stedman (against).

Mr. Nolan (for) with Mr. Wright (against).

Mr. Patterson of New Jersey (for) with Mr. Taylor of Arkansas (against).

Mr. Treadway (for) with Mr. Huddleston (against).

Mr. Newton of Missouri (for) with Mr. Goldsborough (against).

Mr. MOORES of Indiana. Mr. Speaker, I desire to vote yea.

The SPEAKER. Was the gentleman present, listening, when his name was called.

Mr. MOORES of Indiana. I was not.

The SPEAKER. The gentleman does not bring himself within the rule.

Mr. COOPER of Wisconsin. Mr. Speaker, I desire to vote yea.

The SPEAKER. Was the gentleman present, listening, when his name was called.

Mr. COOPER of Wisconsin. I was not. I was about two minutes late.

The SPEAKER. The gentleman does not bring himself within the rule.

Mr. KRAUS. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present, listening, when his name was called?

Mr. KRAUS. I was not.

The SPEAKER. The gentleman does not bring himself within the rule.

The result of the vote was announced as above recorded.

Accordingly (at 12 o'clock and 39 minutes p. m.) the House adjourned until Monday, August 28, 1922, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

676. Under clause 2 of Rule XXIV, a communication from the President of the United States transmitting a supplemental estimate of appropriation for the Department of Labor for the fiscal year ending June 30, 1923, for salaries, office of the Secretary, Department of Labor, $7,100; for salary for the Second Assistant Secretary of Labor and for private secretary to the said Second Assistant Secretary (H. Doc. No. 378) was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. FOSTER: Committee on Judiciary. H. R. 12355. A bill to amend section 876 of the Revised Statutes; without amendment (Rept. No. 1193). Referred to the House Calendar.

Mr. FOCHT: Committee on the District of Columbia. S. 2597. An act to amend an act entitled "An act to provide, in the interest of public health, comfort, morals, and safety, for the discontinuance of the use as dwellings of bulidings situated in the alleys of the District of Columbia," approved September 25, 1914; without amendment (Rept. No. 1194). Referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. HIMES: A bill (H. R. 12468) to provide a commission to secure plans and designs for a monument or memorial to the memory of William McKinley, late President of the United States; to the Committee on the Library.

By Mr. DICKINSON: A bill (H. R. 12469) to declare a national coal emergency, to create a coal commission, and to prescribe their duties in the supervision of the production and distribution of coal; to the Committee on Interstate and Foreign Commerce.

By Mr. McPHERSON: A bill (H. R. 12470) authorizing the Secretary of Labor to permanently admit in his discretion and under suitable regulations and upon such requirements as he may prescribe certain aliens who have been temporarily admitted to the United States during and since the year 1914, and who were minors at the date of such temporary admission; to the Committee on Immigration and Naturalization.

By Mr. ZIHLMAN: A bill (H. R. 12471) to provide for the establishment in the State of Maryland of a fisheries station, to be under the direction of the Bureau of Fisheries of the Department of Commerce; to the Committee on the Merchant Marine and Fisheries.

By Mr. WINSLOW: A bill (H. R. 12472) to declare a national emergency to exist in the production, transportation, and distribution of coal and other fuel, granting additional powers to the Interstate Commerce Commission, providing for the appointment of a Federal fuel distributer, providing for the declaration of car-service priorities in interstate commerce during the present and any succeeding emergency, and to prevent extortion in the sale of fuel; to the Committee on Interstate and Foreign Commerce.

By Mr. GOODYKOONTZ: A bill (H. R. 12473) granting the consent of Congress to the Wynco Block Coal Co., a corporation, to construct a bridge across the Tug Fork of Big Sandy River in Mingo County, W. Va.; to the Committee on Interstate and Foreign Commerce.

By Mr. CLOUSE: A bill (H. R. 12474) to authorize the appropriation of $20,000,000 for Federal aid in the construction of post roads and highways in the several counties composing the fourth congressional district of Tennessee, and for other purposes; to the Committee on Roads.

By Mr. BRENNAN: A resolution (H. Res. 415) restricting the use of coal in the United States, and for other purposes; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CRAMTON: A bill (H. R. 12475) granting a pension to Frank Carney; to the Committee on Pensions.

By Mr. KELLEY of Michigan: A bill (H. R. 12476) granting a pension to Martha L. Harris; to the Committee on Invalid Pensions.

By Mr. LAYTON: A bill (H. R. 12477) granting an increase of pension to Willie Lillian Steventon; to the Committee on Invalid Pensions.

By Mr. McSWAIN: A bill (H. R. 12478) granting an increase of pension to Francis Marion Cooper; to the Committee on Pensions.

By Mr. ROACH: A bill (H. R. 12479) authorizing the Secretary of Labor to permanently admit, under suitable regulations and requirements to be prescribed by him, Jacob Kalaf, son of N. J. Kalaf, a citizen of the United States; to the Committee on Immigration and Naturalization.

By Mr. ROBSION: A bill (H. R. 12480) granting a pension to Sarah E. Childers; to the Committee on Invalid Pensions.

By Mr. SCOTT of Tennessee: A bill (H. R. 12481) granting a pension to George Peyton Chambers; to the Committee on Pensions.

Also, a bill (H. R. 12482) granting a pension to Susie Thrasher; to the Committee on Pensions.

By Mr. STRONG of Kansas: A bill (H. R. 12483) granting an increase of pension to Rachel E. Kerby; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6239. By Mr. COLE of Iowa: Petition of the League of Iowa Municipalities, relating to the necessity of legislation for the mining and distribution of coal; to the Committee on Interstate and Foreign Commerce.

6240. By Mr. KISSEL: Petition of New York Board of Trade and Transportation, New York City, N. Y., regarding The Hague rules, 1921; to the Committee on Foreign Affairs.

6241. Petition of William B. Kluber, Esq., Brooklyn, N. Y., urging the 40 per cent tariff on wire cloth; to the Committee on Ways and Means.

SENATE.

MONDAY, *August 28, 1922.*

(Legislative day of Friday, August 25, 1922.)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

COMPENSATION OF WORLD WAR VETERANS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. UNDERWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The reading clerk called the roll, and the following Senators answered to their names:

Ashurst	Hale	Nelson	Smoot
Ball	Heflin	New	Stanfield
Borah	Hitchcock	Nicholson	Sterling
Broussard	Jones, Wash.	Oddie	Sutherland
Bursum	Kellogg	Overman	Townsend
Cameron	Kendrick	Pepper	Trammell
Capper	Keyes	Pittman	Underwood
Culberson	La Follette	Pomerene	Wadsworth
Cummins	Lenroot	Ransdell	Walsh, Mass.
Curtis	McCormick	Rawson	Walsh, Mont.
Dial	McCumber	Reed, Pa.	Warren
Dillingham	McKellar	Robinson	Watson, Ga.
Gerry	McLean	Sheppard	Watson, Ind.
Glass	McNary	Shields	Williams
Gooding	Myers	Simmons	Willis

Mr. DIAL. I desire to announce that my colleague [Mr. SMITH] is detained on official business. I ask that this announcement may continue through the day.

The PRESIDENT pro tempore. Sixty Senators having answered to their names, there is a quorum present.

Mr. McNARY. Mr. President, I desire to preserve the continuity of my remarks, and therefore I must refrain from yielding to any Member of the Senate for a question until I shall have concluded.

On June 8, 1922, I proposed an amendment to an act to provide adjusted compensation for veterans of the World War. Originally the amendment took the form of a bill, having been reported favorably to the Congress by appropriate committees. The legislation proposed by the amendment has the sanction of the Western Reclamation Association, which has representatives in 13 arid and semiarid States, the indorsement of numerous civic and commercial associations throughout the country, and officials high in public life.

Mr. President, I have offered the amendment in question for the reason I believe no legislation fashioned to benefit the former service men is complete or accomplishes that which Congress desires to effect unless it contains a provision covering some practical plan of land settlement.

In every war in which this country has been involved the Government has provided as aid land for the veterans, and in my judgment no good reason exists for the abandonment of this national policy at this time.

Federal statistics show that 75,000,000 acres of the public domain was allotted in the form of bounties to soldiers and sailors of our wars preceding the World War. If the veterans of the Great War are to receive land it must first be reclaimed, as the ready-to-plow lands of the Prairie States have wholly been absorbed by private ownerships. Indisputable proof exists that there is a sincere desire for farm homes among thousands of the ex-service men.

Mr. President, a few months ago the able Secretary of the Interior, Mr. Fall, said, in substance, after completing a careful survey among the ex-service men, that there is abundant evidence of a sincere desire for farm homes on the part of the defenders of our country in the late war. The records of the

General Land Office and the Reclamation Service show that hundreds of thousands of inquiries have been received from former service men concerning the possibilities of land settlement and employment in the construction of reclamation projects, the inquiries coming largely from farm-trained men who were not appealing for a gratuity but were seeking an opportunity to acquire homes on the land. Mr. President, I desire to quote a paragraph from the statement of the Secretary of the Interior:

> The arid and semiarid States show up with a total of 61,340 ex-service men interested in home making on the land. The southern States are represented by 27,780, and the eastern States, including Pennsylvania, by 26,900. In the northern States of Michigan, Wisconsin, Minnesota, and the Dakotas there are 14,000 veterans who have indicated a desire to obtain a farm home.

This amendment is not novel in any of its provisions. Its purpose and scope is to encourage the development of the agricultural resources of the United States through Federal and State cooperation, giving preference in the matter of employment and the establishment of rural homes to those who have served in the military and naval forces of the United States.

The legislation involves three existing agencies, the Secretary of the Interior; a district in the nature of a municipal corporation, organized under the law of any State to provide for the agricultural reclamation of land; and the Federal Farm Loan Board. There are in most of the States drainage district laws, and in the arid and semiarid States of the West there are irrigation district laws. The irrigation district laws of the West are largely an adaptation of the drainage laws of some of the Middle Western States to the arid-land reclamation projects of the far West. In the amendment under consideration the Secretary of the Interior is authorized to investigate the feasibility of reclaiming lands within a district in any State. The Secretary can not enter into a contract unless the district, under the law of the State in which the district is located, authorizes the reclamation of lands by irrigation, drainage, or dikage, with authority to issue bonds, which shall be a general charge against all the lands within the district, and to contract with the United States under this act. The cost of investigation is to be borne equally by the district and by the United States, the total cost, however, to be included in the cost of the project, should it be undertaken by the Federal Government. The Secretary, upon determining that a project presented to him by a reclamation district is feasible, is authorized under contract with the district to construct the necessary works for the reclamation of the lands involved therein, and to operate and maintain such works as long as such operation and maintenance, in the opinion of the Secretary, is necessary to safeguard the interests of the Government. The total cost of construction and of operation and maintenance is to be paid by the district to the United States.

It is not the purpose of the amendment that the Government shall reclaim for an individual a large acreage for speculative purposes. Before the Secretary can undertake the construction of a project the sizes of the farms therein shall be established, and an agreement shall be made effectively subjecting not less than 80 per cent of the excess lands to disposal to settlers at prices and on terms fixed in advance, the prices and terms to be determined with the view of placing a bona fide settler upon each farm with the least possible delay. The term "farm" means an area of land within a reclamation project sufficient in size to support a family, but not exceeding 160 acres of reclaimed land. As the arid and semiarid lands of the West and swamp areas of the different States of the Union are held in comparatively large holdings, there will be under all reclamation projects a large amount of land which can not be retained by its owners and under this amendment are called "excess lands." When a project is a going concern, having been completed and successfully operated for one season, the total construction cost thereof shall be determined by the Secretary and repaid to the Government within a period not exceeding 40 years, with interest thereon not exceeding 5 per cent per annum.

Mr. POMERENE. Mr. President——

Mr. McNARY. I desire to be courteous to the Senator, but I announced in advance that in order to preserve the continuity of my statement I did not wish to yield.

Mr. POMERENE. I was not aware of that fact. I beg the Senator's pardon.

Mr. McNARY. Mr. President, preceding any expenditure by the United States on account of construction of a project, bonds of the district equal in face value to the amount of the proposed expenditure must be duly issued and delivered to the United States. During the progress of the work, should it appear to the Secretary that the amount of the bonds put up is insufficient, he may either curtail the work or require the district to issue additional bonds. In case too many bonds have been issued, the excess bonds, on completion of the project, are to be canceled. The bonds shall be in form approved by the Secretary, to run for a period not exceeding 40 years and bear annual interest at a rate to be fixed by the Secretary, not exceeding 5 per cent per annum. The bonds are to be deposited with the Federal Farm Loan Board, and when the project cost is known and the value of all the property within the district subject to assessment for the payment of the bonds shall reach twice the par value of the bonds as found by the board, the board shall offer the bonds at public or private sale at not less than par. The money received from the sale of the bonds is to be credited upon the district contract and covered into the reclamation fund, where it will constitute a revolving fund, to remain such at the will of the Congress.

The unentered and unpatented arid and semiarid lands of the United States susceptible of reclamation may be included in a district and may be subjected, like all other lands within a district, to all lawful district charges and burdens. Where the unentered public lands within a district constitute more than 50 per cent in area of the lands therein, the Secretary shall have the right to appoint upon the district board such number of persons to represent the interests of the United States as shall constitute a majority of the board. All public lands within a district are to be opened under the provisions of the homestead law. The Secretary is authorized to accept, by gift, deed of trust, or otherwise land within a district and dispose of it on terms and conditions to be agreed upon by the grantor or later fixed by the Secretary.

In the construction of every project the Secretary shall, as far as practicable, utilize the services of veterans. In every opening or sale of land by authority of the Secretary under this amendment veterans shall have the exclusive right, for a period of 60 days, to make entry or otherwise acquire land. A "veteran," by the terms of the amendment, means any individual a member of the military or naval forces of the United States in the war with Germany, the war with Spain, or in the insurrection in the Philippines, and honorably discharged therefrom, or placed in the Regular Army or Naval Reserve.

The amendment under consideration and all amendatory or supplementary acts shall be known as the national reclamation law, and for the purpose of carrying out its provisions there is established in the Treasury a fund to be known as the national reclamation fund.

The amendment, if adopted, contemplates an ultimate expenditure for reclamation of arid, semiarid, swamp, and overflowed lands in the United States of the sum of $350,000,000. The amendment designates no definite amount which shall be appropriated in any one year. All appropriations must originate under the Budget system and receive the approval of Congress. All moneys received by the United States under this amendment shall be paid into the national reclamation fund, and all moneys at any time in said fund shall be available for appropriation for the purposes of the act.

The amendment under consideration does not supersede or displace the present reclamation law. That law will continue to operate exclusively in its present field. The fund therein can be used for many years to come to complete projects already undertaken and to build further reclamation works.

Mr. President, when the Secretary of the Interior, in order to carry out the provisions of the present reclamation law, brought into being the present Reclamation Service, the plan adopted was to sell water rights to individuals and to look to them to make, from year to year, partial payments until their obligations were discharged. This plan resulted in much detail and unnecessary expense and was, and still is, the source of much complaint and misunderstanding. Of late the Reclamation Service has sought to deal only with an irrigation district; that is, to sell a water right to a district and the district to divide the water among its members. Dealing with a unit in this fashion throws the burden of collecting all charges upon the district, and all obligations with the district are discharged by a tax levy which is made and collected through the taxing agency of the State, thereby entailing a minimum of expense.

The issuance of district bonds and placing them with the Federal Farm Loan Board to be disposed of to the general public when a project is a going concern and the security ample is a new thought in legislation. This plan, however, sets up no new agency, but makes use of an existing one—the Federal Farm Loan Board. This board is already successfully engaged in the sale of securities, and the securities to be disposed of

by it under the provisions of this amendment ought to be as safe on a 2 to 1 basis as are the farm mortgages upon a like basis now being handled by the board.

The legislation suggested by the amendment is not paternalistic, nor does it invade the sovereignty of any State. Only upon the invitation of the State will the Secretary of the Interior even investigate a reclamation project, and lands must be grouped and thrown into a district before even such investigation can be made. Owners of land in severalty will not, except by reason of an overwhelming necessity, group their holdings and charge the mass with an obligation, which might, through want of skill of a project engineer, cause the loss of the "last faithful acre" under the general taxing power of a reclamation district. The amendment only contemplates the Government assisting and doing that which the individual or group of individuals can not do for themselves. Experience has taught that it is practically impossible to borrow money for investment where a security is to be created for its repayment. As a rule, where money has been so borrowed, too often, conditions have been imposed resulting in disaster to both lender and borrower.

Mr. President, 20 years ago Congress passed the basic reclamation act, under whose benign influence there have been added to the cultivated area of our country 1,187,000 acres of land under district Federal reclamation projects, and water has been supplied by the Government to 916,000 acres within irrigation enterprises. These lands before reclamation were largely barren, desert waste and unproductive. During 1919, on the 1,187,000 acres within the Federal projects crops were grown of a gross value of $89,000,000; and on the land in private irrigation projects receiving water from Federal project there were grown crops of a gross value of $64,000,000, or a total of $153,000,000, compared with a governmental expenditure of approximately $130,000,000. As a result of this expenditure there are fixed properties of a total value of upward of $550,000,000. Great reservoirs of local, State, and national taxation have been created. Agricultural production has been greatly increased without injury to any section of the country; prosperous homes have been built, towns and cities have grown up, and a great market for all kinds of manufactured products has been created, aside from the great addition to the supply of food products.

That the manufacturers of the East and of the Middle West have a splendid field in the irrigated districts of the far West for the sale and disposition of their wares is demonstrated by the vast quantities of manufactured goods and products that annually are transported to and sold in the western section of the country, where irrigation is the source of production. Permit me, Mr. President, to instance one typical district. The shipments into Yakima, Wash., for 1918, 1919, and 1920, which in value are as follows:

Value of manufactured products shipped into the Yakima (Wash.) irrigation district.

Products.	1918	1919	1920
Automobiles, tires, and accessories	$2,195,000	$3,225,000	$2,600,000
Hardware and building supplies	900,000	1,200,000	1,100,000
Mixed groceries	1,750,000	2,000,000	2,150,000
Farm machinery	600,000	750,000	500,000
Ready-to-wear clothing	1,600,000	2,000,000	1,500,000
Shoes	700,000	1,000,000	1,000,000
Furniture and household supplies	1,000,000	1,500,000	1,200,000
Cotton and woolen goods	800,000	1,200,000	1,000,000
Drugs	700,000	1,100,000	1,250,000
Millinery, notions, crockery, and electrical apparatus	800,000	1,000,000	950,000
Insurance premiums	2,500,000	3,000,000	3,200,000
Total	13,545,000	17,975,000	16,450,000

The foregoing illustration clearly leads to the conclusion that in the far West there is one of the best markets which the eastern manufacturers enjoy. It is a home market and an ever-constant one. If the Government, under the proposed law, will put up an underlying capital for the further reclamation of the western arid lands and the water-logged lands in various States, the markets for eastern products can be readily more than quadrupled.

The property held in reserve by the Federal Government in the Western States and Alaska is of fabulous value, the figure placed by Secretary Fall in his annual report being $150,000,000,000. In several of the Western States the value of the land held in reserve exceeds the value of the property subject to taxation. The reserve land bears no expense for the maintenance of State and local government. Under such circumstances few will assert that the money arising from the disposition of public resources should not be used in the far West under the present reclamation law. The reserve of such vast wealth in the far West surely justifies the people of that section in asking the Federal Government to be generous and just in the matter of reclamation legislation.

Mr. President, the practice of irrigation is of great antiquity. The earliest civilized communities, of whom we have any knowledge, lived in the practically rainless deltas of the Nile and Euphrates. The success of their agricultural undertakings depended on efficient irrigation and the control of the rivers. Much of the history of Chaldea is centered about the great irrigation accomplishments. From an inscription of one of the kings of that country, whose epoch is fairly well determined, we know that some of the great canals were in existence 2,000 years before Christ. As irrigation was the cause of that nation's prosperity, so was the destruction of this means of production the chief cause of its decline. From the reading of hieroglyphics of the Pharaohs we are informed that irrigation was practiced in Egypt at least 2,500 years before the birth of our Savior, and well may we take an example in the New World—for instance, in Colorado, Arizona, and New Mexico—where the remains of reclamation works indicate the practice of irrigation before the time of authentic history. In these and other intermountain States miles of prehistoric irrigation canals have been found. Abyssinia, China, and India were all practicing irrigation when the writing of history began. It was not until a fifth of a century ago that the need of national legislation upon this great subject became apparent throughout the country. Then a great statesman, possessing a big heart and penetrating vision, President Theodore Roosevelt, with the aid of a few strong advocates, fixed the minds of the Members of Congress upon the possibilities of national wealth resting in the bosom of the great western section of the country.

Mr. President, I do not lend myself to pessimism, but I do deprecate the ever-increasing volume of the flow of the human family to the congested cities. If by any feeble effort I can contribute to the subsidence of that stream, I shall feel my work in the Senate has not been without its reward. In my opinion, the country is city crazy, for more than half our population are now city dwellers. This should not be so. We can not all live in the cities and towns of our wonderful country. The published report of the Director of the Census Bureau contains this statement:

> The increase since 1910 in the population as a whole was 14.9 per cent, but during the decade there has been an increase in that portion of the population living in urban territory of 12,192,826, or 28.6 per cent, and in that portion living in rural territory of 1,518,016, or only 3.1 per cent; and if the comparison is extended to cover the two classes of rural territory it appears that that portion living in incorporated places of less than 2,500 inhabitants shows an increase of 1,745,571, or 21.5 per cent, whereas that portion living in purely country districts shows an actual decrease of 227,355, or six-tenths of 1 per cent.

The causes of the cityward movement are many and varied and operate unhappily throughout the world. No nation is free from its baneful influences. No country has given the world a remedy. However, I have faith that our country shall yet propose a remedy whereby those of its citizens hungry for land may find a home in the countryside.

The amendment to the pending bill is built upon the proposition that the Government by extending aid in cooperation with the States can assure a sufficient and prosperous population in the rural sections of the country. To accomplish this great desideratum the policy of the Government must be to lend its every effort toward encouraging the opening of new farm areas. For 50 years past our farm areas were increased at the annual rate of about 700,000 acres.

Secretary of Agriculture Wallace has lately said that to keep abreast with the demand for food, if the population of our country continues to increase, we will need an additional plow acreage of 8,000,000 acres a year.

Many remedies to defeat excessive urbanization have been suggested by economists and students of sociology, but one helpful remedy lies in governmental aid in reclamation, by which lands are made available for agricultural use upon a long-term plan of payment of the construction charges. Large areas of swamp lands, subject to drainage and suitable to come within the provisions of the amendment, are located in practically every State in the Union, the total extent being in excess of 96,000,000 acres. Under like conditions are over 20,000,000 acres of land thirsty for water in the intermountain States and in the arid portions of the Pacific Coast States.

At this juncture, Mr. President, I desire to insert in the RECORD the table which I send to the desk.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The table is as follows:

Number of acres of arid and wet lands subject to reclamation.

State.	Arid land.	Wet land.	Total.
	Acres.	*Acres.*	*Acres.*
Alabama		1,485,000	1,485,000
Arizona	1,000,000		1,000,000
Arkansas		5,830,000	5,830,000
California	3,000,000	3,500,000	6,500,000
Colorado	2,900,000	100,000	3,000,000
Connecticut		59,000	59,000
Delaware		127,000	127,000
Florida		19,000,000	19,800,000
Georgia		2,700,000	2,700,000
Idaho	3,000,000	50,000	3,050,000
Illinois		762,000	762,000
Indiana		660,000	660,000
Iowa		410,000	410,000
Kansas		302,000	302,000
Kentucky		445,000	445,000
Louisiana		10,200,000	10,200,000
Maine		187,000	187,000
Maryland		200,000	200,000
Massachusetts		60,000	60,000
Michigan		5,434,000	5,434,000
Minnesota		6,828,000	6,828,000
Mississippi		5,750,000	5,750,000
Missouri		2,000,000	2,000,000
Montana	2,000,000		2,000,000
Nebraska	400,000		400,000
Nevada	400,000		400,000
New Hampshire		19,000	19,000
New Jersey		377,000	377,000
New Mexico	812,000		812,000
New York		700,000	700,000
North Carolina		2,750,000	2,750,000
North Dakota		880,000	880,000
Ohio		200,000	200,000
Oklahoma		275,000	275,000
Oregon	1,500,000	2,500,000	4,000,000
Pennsylvania			
Rhode Island			
South Carolina		3,125,000	3,125,000
South Dakota		4,200,000	4,200,000
Tennessee		1,000,000	1,000,000
Texas	1,000,000	8,000,000	9,000,000
Utah	1,000,000		1,000,000
Virginia		800,000	800,000
Vermont		50,000	50,000
Washington	3,000,000	500,000	3,500,000
West Virginia		25,000	25,000
Wisconsin		3,800,000	3,800,000
Wyoming	2,446,000		2,446,000
Total	22,458,000	96,090,000	118,548,000

Mr. McNARY. No student of modern-day industrial and economic questions suggests that the unsuccessful citizen in the overcrowded cities be induced to migrate to the country and engage his activities in rural undertakings. On the contrary, thoughtful observers desire to keep upon the farms the boys and girls who have a background of farming and who are conversant with farm life, its manifold problems, and the application of scientific methods gained through personal experience and information obtained at the agricultural colleges in the different States, working in cooperation with the Federal Government agencies. This idea does not exclude thousands of our citizens who are ready, able, and willing to leave the crowded municipalities and go upon the various reclaimed projects, there to build prosperous and happy communities upon lands theretofore uninhabitable.

Mr. President, the legislation carried in the amendment does not place a heavy burden upon the Treasury, because it specifically designates that the Congress shall decide from time to time and from year to year the amount of money that shall go forth to be employed in the construction of feasible projects, but careful investigation must be made of the feasibility of the projects in all applying districts that desire to come within the benefit of the law. Engineering problems must be solved, and the Congress must give its approval of every project recommended by the Reclamation Service and authorize the expenditure of every dollar that goes into its construction. The money advanced is in the nature of a loan, returnable to the Treasury at the will of the Congress, except as to the contractual terms of the repayment of construction costs.

Mr. President, some sincere students of rural economics have asserted frequently that the opening of additional farm acreage in large areas, as is contemplated by this amendment, would result in the lowering of land values throughout the States. This argument can not be true. For more than a century land values in the United States have continued to rise. I offer as proof of my statement the Federal census from 1800 to 1920, showing the steady ascendancy of land values per acre:

1800	$11.14
1860	16.35
1870	18.26
1880	19.02
1890	$21.31
1900	19.82
1910	39.60
1920	70.96

Nor am I convinced that the products to be grown on new farm acreage contemplated by this amendment will come into general competition with the products produced on the present agricultural areas. More particular reference is now made to that section of the country to be irrigated. It is probable that two-thirds of the irrigated land in the far West is devoted to the growing of alfalfa.

There is no place in the world where this plant grows more luxuriantly than in the irrigated districts of the far West, where the soil is deep and light, the weather warm, and where moisture can be supplied as needed.

The distribution of the reclaimed areas of the West is such that there is scarcely a sheep or cattle range which is not supplemented by an irrigated area near by. This has resulted in preserving flocks and herds from starvation during the periods of snow in the mountainous regions.

The live stock from the foothills and elevated benches of the Rocky and Cascade Mountains has furnished a cheap supply of beef and mutton to the Middle West and Eastern States. While this has been going on the farmers of the Mississippi Valley, in the main, have been growing their own cattle and finishing them with corn for the markets at home and abroad.

There can be little question that should the 20,000,000 acres of arid land in the far West yet susceptible of reclamation be placed under ditch, a large proportion of this land would be devoted to the growing of alfalfa, which would be used to feed the stock of those sections for a longer period in the winter, resulting in the live stock not losing its flesh through underfeeding upon the ranges. The farmers in the Middle West, to a great extent, receive the cattle from the West and finish and fatten them upon the corn produced upon the prairies, to the mutual benefit of all concerned, so that the growing of stock in the West has enlarged the market for the corn of the Middle West. Annually great quantities of corn move into the great western country from the Central States for milling and feeding purposes. As the West adds to its flocks through the extension of its irrigable areas, so will the Middle States expand under the impetus of an increasing demand for its corn.

Again, may we look upon this country and observe other suitable crops not generally produced throughout the United States. Sugar beets are grown to perfection in the warm, mellow soils rich in volcanic ash. Beets find no competition with any other crop produced in this country, except the sugar cane produced in the Southern States and beets produced upon the moist lands of Michigan and Wisconsin. The average production of sugar beets to the acre may be placed conservatively at 9 tons. A ton of beets will render at least 230 pounds of sugar; consequently we may place the sugar-producing strength of an acre of irrigated land at 1 ton.

The Department of Commerce statistics for 1921 estimate the consumption of sugar at approximately 100 pounds per capita. This would require the employment of 5,000,000 acres of soil in the production of sugar beets if our country desires to produce all it consumes of this great essential food product. We produce about one-fourth of the sugar we annually consume; therefore we could well put to use over 3,500,000 acres of our own land to the production of sugar.

Examples similar to the foregoing could be given in great detail, showing indisputably that there can be no economic conflict between the eastern, western, central, and southern sections of our country in the production of foodstuffs. Indeed no substantial competition between the farmers of the New England and Atlantic States and those of the far West and South does or can exist. The products produced on farms in New York, Pennsylvania, Ohio, and almost every State of the East, are greater to-day in value than they were when these States had the largest acreage under plow. The increasing population of the cities has changed the farmer from a wheat producer to a milk, butter, egg, and vegetable producer, not to his injury but to his benefit. Instead of the Middle West or the eastern sections of the country being injured by the further development of the far West and South a substantial benefit will inure from the reclamation of lands.

Mr. President, the national Republican and the national Democratic platforms of the last presidential campaign have planks warmly indorsing reclamation, and frequently in the campaign of 1920 this action was stoutly commended. On August 31, 1920, Mr. Harding, in part, said:

> We must make our mountain West a country of homes for people who need homes. It has everything that they will need. It can provide them with food, with the materials for industry, with lumber from its forests, with metals and minerals from its mines, with power

from its streams, and water for irrigation of its land. And the work must be done that it will inure most to the advantage of society and the development of the independent, self-sustaining family unit in our citizenship. There must be proper cooperation and direction in this development, but there must be all care to prevent monopolization of resources and opportunities.

And, in conclusion, Mr. Harding said:

It is fit to recall the splendid vision Theodore Roosevelt had of the vast possibilities of the West. In a chapter of his autobiography devoted to "Natural resources of the Nation," he said: "The first work I took up when I became President was the work of reclamation." It was his judgment "that reclamation, conservation, and proper utilization were all involved in one great plan for the development of our western country." In the same work President Roosevelt declares: "It is better for the Government to help a poor man to make a living for his family than to help a rich man to make more profit for his company."

Commenting upon this declaration, Mr. Harding said, in his speech heretofore adverted to:

The principle is particularly sound to-day. We have need to make these areas the seat of millions of new American families, just as we broke up our prairies and distributed them among strong, enterprising, vigorous men, who developed them into the great States of the Mississippi Valley.

Mr. President, a splendid opportunity is here given to the Congress to do a grand thing in empire building. Lands that now pant for water can be made fertile, and lands that now are burdened with water can be made free and productive. The ex-service men who desire to cast their destiny in the open country can find rural fields for the employment of their energies. The social and economic evils that attend the crowding of cities can be partially averted, and a happy and healthful balance between rural and urban life can be maintained.

Authentic history records abundant instances of nations falling to decay on account of their neglect to provide methods for farm betterment and rural enlargement. This country must observe the admonition of history and keep a watchful and sympathetic vigilance over that acknowledged basic industry. If our country shall permit farm impairment, or fail to encourage its development and expansion, all other human industrial institutions will fall as a house built of sand.

Mr. President, in concluding I wish to express the faith that I believe the Members of this body will give the amendment to the pending bill thoughtful consideration, and the majority will praise its virtues by their votes.

Mr. OVERMAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from North Carolina?

Mr. McNARY. I yield.

Mr. OVERMAN. In North Carolina we have many acres of swamp land which if drained would be the richest land in the world, in my opinion. Those lands when drained would be worth from $100 to $500 an acre, but most of them are owned by individuals, in large tracts. If a man owns a thousand acres of such land, and it is drained, what plan is to be provided by which the 160 acres can be acquired and given to the soldier who wishes to get that land and locate on it?

Mr. McNARY. Perhaps the Senator was not present at the time I was attempting to analyze the various provisions of the amendment under consideration. The first thing we must keep in mind is a corporation known as the drainage district. Most States have laws for the formation of such corporations, and when such a corporation is formed it must make application to the Secretary of the Interior to determine its feasibility for drainage. After a careful survey is made by the Secretary of the Interior, and he deems the project to be a feasible one, one which will inure profitably to those participating therein, then the irrigation district places its bonds with the Federal Farm Loan Board, at which time the Secretary of the Interior receives from the Treasury, provided Congress is willing to advance the money to secure it, money sufficient to carry on the formation of the project and complete it. After it is completed, and the bonds have been placed with the Federal Farm Loan Board as security to the Government, the soldier then is given a right of preference of settlement upon all public lands—of which there are none in the South, and in all excess acreage over and above the farm unit established by the Secretary of the Interior, which can not be over 160 acres and may be very much less.

Mr. OVERMAN. How is the soldier to get it? How are you going to take the land away from the owner, land which has increased in value to $500 an acre? How are you going to get it? Are you going to confiscate it?

Mr. McNARY. Perhaps I have not made myself clear; I did not touch upon that particular phase of the question. The Secretary of the Interior can not go into a project unless those holding the acreage in excess of the farm unit established by him agree to sell to the applicants for land at a price agreeable to the Secretary of the Interior.

Mr. OVERMAN. What about the price? If the land is drained, it is worth $500; now it is worth $10.

Mr. McNARY. The price is based upon the cost of the drainage. When the district is organized, it comes to the Secretary of the Interior and tells him it is willing to put up their bonds, and ask him to make a survey. He says, "All right; I will do it, provided you men who hold areas in excess of the farm unit will sell at a price which I think the land is worth to-day." That is a matter of detail between the Secretary of the Interior and the owners.

Mr. OVERMAN. Then it is to be sold to the ex-soldiers at $160 an acre?

Mr. McNARY. At a price which the Secretary of the Interior fixes with the men having excess acreage, plus the cost of construction; that is, the digging of the canals and ditches.

Mr. JONES of Washington. Mr. President, I will read one paragraph from the Senator's amendment, which I think will answer exactly the question of the Senator from North Carolina. The paragraph reads:

SEC. 803. That before construction of a project is commenced the sizes of farms therein shall be established and agreements shall be made effectively, subjecting not less than 80 per cent of the excess lands within the project to disposal by authority of the Secretary to settlers at prices and terms fixed in advance in such agreements. Such prices and terms shall be determined with the view of placing a bona fide and competent settler upon each farm of the project with the least possible delay.

Mr. KELLOGG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from Minnesota?

Mr. McNARY. I yield.

Mr. KELLOGG. I think I understand how the irrigation district is to be handled and the bonds issued, but under what provision of the amendment is the soldier to get the benefit, or does subdivision 7 of the original bill cover it?

Mr. McNARY. Mr. President, the amendment plainly provides three preferences for the soldier: First, in the way of employment and wages received in the construction of the great dams in the West and the construction of the diversion canals. In all other work connected with the construction of projects, whether they be irrigation or drainage, the soldier is given the preference right of employment, and if the project is to cost several million dollars, and there are many soldiers applying for employment, they get all the money in the way of wages.

Secondly, they have a preference right to settle all public and unentered land upon the public domain. In all excess areas above the farm unit in irrigated and drained land they have for 60 days a preference right. Those are the practical benefits which the soldier will receive under this amendment. I might say to the Senator that it has had the indorsement of the veterans of the World War, many posts of the American Legion, and the Kansas City convention of the American Legion.

Mr. KELLOGG. But those lands are not used as a gift to take the place of the other provisions of the bill?

Mr. McNARY. Oh, no; the soldier is only given a preference right, and he must pay the same as anyone; must pay back his bonds and pay the Government the money that has been advanced in the construction of these various projects.

Mr. POMERENE. Mr. President, I would like to ask the question which I intended to ask earlier in the day, which perhaps the Senator has answered, because I was called out.

Mr. McNARY. I will be very happy to answer, if I can.

Mr. POMERENE. What I want to know is how much of the arid land and how much of the swamp land in the country will it be practicable to improve along the line the Senator has indicated? Let me say, in advance, that I am in entire sympathy with any proposition which will develop those lands so that they may be used in the furtherance of the agricultural interests of the country, because that means the interest of the whole country. But, of course, there are certain of those lands which, because of lack of water or because of topography, can not be improved. We loosely speak of the vast amount of arid lands and the vast amount of swamp lands, when all of us know that there is much of the arid land particularly which it is wholly impracticable to improve. What is the amount which would be available for this work?

Mr. McNARY. I am very happy to say, in reply to the Senator from Ohio, that the figures I gave are of the feasible acreage. I gave an estimate made by the Reclamation Service as 20,000,000 acres in the West. There are many, many hundreds of millions of acres of arid land. The 20,000,000 are acres which have been reported as feasible for reclamation after careful and conservative survey by the Secretary of the Interior.

I gave the area of swamp land susceptible of drainage as 96,000,000 acres of the many hundreds of millions of acres of

swamp land, figures supplied me by the Reclamation Service. None of the figures I have given are mere guesses or assumptions, without having a basis in fact.

Mr. POMERENE. So that, all told, 116,000,000 acres are available?

Mr. McNARY. That is correct.

Mr. GOODING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from Idaho?

Mr. McNARY. I yield.

Mr. GOODING. As I understand it, the amount of land in the West which can be reclaimed is measured by the available water supply, and that is estimated at anywhere from 20,000,000 to 22,000,000 acres. That is the total amount of land possible of development in the West. It is all limited, of course, by the water supply. That is information I received from the Interior Department.

Mr. TOWSEND. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from Michigan?

Mr. McNARY. I yield.

Mr. TOWNSEND. I have not been able to hear all that the Senator has said, and I am curious to know whether the amendment he proposes takes the place of any provision of the adjusted compensation bill, or whether it is in the form of an option, to be employed instead of some other provision. In other words, I want to know what the relation of this amendment is to the adjusted compensation bill.

Mr. McNARY. It is not an option in any sense. As a matter of history, it might be well for me to repeat that the House adjusted compensation bill contained a land-settlement provision, which the Senate Committee on Finance struck out. I think that was an extremely impractical provision, and would not have afforded the soldier the benefit which it was hoped it might do. Consequently, I offered this amendment, which was originally a bill, in the place of the House amendment, so that the Senate might have something upon which to work if it desired to give the soldier an opportunity to go upon the land.

It is not an option. The soldier can not take this in place of taking cash, or insurance, or vocational education, or whatever the bill may offer, but if he gets his money under some plan we may adopt, and wants to take that money and become a first-class citizen, and go upon a farm, we are giving him an opportunity to settle down and help build up the country, to make a better citizen of himself, through the preference rights which I mentioned to the Senator from Minnesota. It is not an option. He does not have to take this unless he wants to. There are many actual settlers hungry for land, but, as I say, from statistics supplied, there are several hundred thousand soldiers who desire an opportunity to go upon farms, and this simply furnishes them the opportunity.

Mr. STERLING. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from South Dakota?

Mr. McNARY. I yield.

Mr. STERLING. As I understand the Senator from Oregon, this valuable preference right, the 60-day preference right, is in addition to the soldier's right to a bonus under the bill?

Mr. McNARY. It is.

Mr. STERLING. And all the privileges and options under the bill?

Mr. McNARY. That is correct.

Mr. STERLING. Any one of which he may exercise. This amendment contemplates legislation on the part of various States, does it not?

Mr. McNARY. It does not contemplate additional legislation, but it suggests that before a State or district can take advantage of this splendid opportunity for governmental aid it must organize irrigation districts either under their constitution or under State statute, so to that extent it does require cooperation by the States.

Mr. STERLING. In his investigation of the subject, has the Senator found any State which could accept the provisions of this law without actual legislation?

Mr. McNARY. I do not know of any State in the West, outside of perhaps one State, which can not come within the provisions of this amendment.

Mr. STERLING. Without additional legislation?

Mr. McNARY. Without any legislation. Of the 17 semi-arid and arid States, I think 15 or 16 have laws which provide for the incorporation of irrigation districts, making them quasi corporations, able to issue bonds and levy assessments for the payment of the construction charges.

Mr. STERLING. Are there not many States which do not provide either for irrigation districts or for drainage districts?

Mr. McNARY. I do not think so. Drainage has been practiced in a small way in every State in the Union since the settlement of the earliest pioneers, and, at any rate, if a State is not able to accept it at this time, it would only take a year or two to get its laws fashioned to go forward.

Mr. STERLING. I am not hostile to the Senator's proposition; it appeals to me strongly.

Mr. McNARY. I appreciate that.

Mr. STERLING. But it occurs to me that irrigation and drainage have been carried on in different States under conditions so different from the conditions contemplated by this amendment that it will involve legislation on the part of nearly every State in order that it may conform to the requirements of the amendment.

Just one more question, I want to ask the Senator, to clear the matter up. In subdivision (e) on page 2, we find this:

> The term "excess lands" means all lands in a single holding in excess of one established farm.

That was a little confusing to me at first, but I think I understand it now. By the "single holding" referred to in that subdivision the Senator refers to the holding of a private individual before the land is taken for this purpose?

Mr. McNARY. That is correct.

Mr. DIAL. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oregon yield to the Senator from South Carolina?

Mr. McNARY. As far as I am concerned, I have yielded the floor.

Mr. DIAL. Mr. President, I would like to ask the Senator from Oregon what would be the objection to including all kinds of lands? Why is it limited to arid lands or to swamp lands?

It occurs to me that many soldiers would not care to go to either one of those places, as there are hundreds of thousands and millions of acres of splendid land suitable for cultivation in sparsely settled communities which could be acquired for a very small sum. When we go to help the soldier get a suitable home I see no objection why an amendment should not be had to allow any community to form a district similar to the irrigation district or the drainage district and not necessarily have the soldier to leave his local neighborhood or leave his community where he has lived all his life, when perhaps he would not like to go elsewhere, when in his own neighborhood the lands might be better suitable for raising the products of the soil and would be more profitable perhaps than could be raised on the new lands considered in the amendment.

I have an amendment—I do not know whether it will cover the situation or not—by which I am proposing to include other kinds of land. I know in my State we have something like 9,000,000 acres of cut-over timberland, a great deal of it very fertile, and all it needs is occupation and cultivation. I would like very much to have an amendment along that line, and then I think I could support the Senator's amendment, even though I could not support the bill as a whole.

I call the Senator's attention, if he will allow me, to page 2, line 5, of his amendment as printed, and suggest, after the word "dikeage," to insert the words "or otherwise," and then, on page 6, line 14, after the word "construction," to strike the words "but not" and insert the word "and." According to my interpretation, it would be applicable then to the acquirement of any kind of land where they want to form a district of that sort and give the soldiers the preference. I think it would add greatly to the amendment and would certainly be much more beneficial to the soldiers, because we all know that irrigation is very expensive and drainage is often very expensive, too. I would like to ask the Senator if he has any objection to an amendment to cover that type of land?

Mr. McNARY. The thought of the Senator is not a new one. It is an interesting one. I should be very glad to express to the Senator my convictions along that line. As I said, the Senator's thought is not a new proposition.

Mr. DIAL. No; I know that.

Mr. McNARY. It has been given consideration by a great many practical men who have done much to create the amendment which I have offered. It was thought wise to limit the form of reclamation to the two which have been tried and tested, namely, by drainage and by irrigation. We have not, to my knowledge, in this country any organized districts for the reclamation of cut-over lands. I think I am conversant with the State laws regarding the subject. In my opinion, we have no laws permitting the organization of districts to reclaim cut-over lands. It has all been done through drainage and by the application of water. We have found those to be two practical

methods of reclaiming lands. There are plenty of such lands to absorb all the money that has been appropriated for projects of this sort, and very much more.

Many who have given the subject more careful consideration than I have believe that the reclamation of cut-over lands is not as practicable as the reclamation of irrigated lands and swamp lands, for this reason: The arid land is strong and contains abundant plant food. It is a volcanic ash formation. It can be farmed successfully in an intensified way in small units. The land is perfectly worthless until the water is put upon it. When the water is brought to the land, then very promptly the average land becomes of immense value. Consequently, it is thought that the land would appreciate so quickly and so rapidly in its value that the bonds would be salable, because the bond is not salable until the land in the district is twice the value of the outstanding indebtedness. The same thing I say of the arid lands is true of the swamp lands. Consequently, the cost of reclaiming cut-over lands is so great as compared with the resulting value that it is thought those bonds would become frozen, would not be liquid, and therefore would prevent the use of the revolving feature of the bill. The revolving feature of the bill is the very heart of the proposed legislation. Senators, of course, understand what the revolving feature provides. The fund would turn over, in the estimation of those who have given it thought, about three times in 18 years, thereby increasing the sum vastly in excess of the authorization contained in the amendment. To have logged-over lands with bonds that will not move, or bonds that are inert and will not turn, it is thought would tie up the appropriation and defeat the best feature of the bill, namely, the revolving-fund feature.

That is the answer I make to the Senator. Personally I have no preference. In my State there are immense quantities of cut-over land, more than of the arid lands, but from a general standpoint I do not know whether it is practicable. I expect, of course, if the Secretary of the Interior after careful investigation deemed the project was not feasible and that Congress also so believed—for it must come here finally for adjudication—then the project would not go forward. Personally I have not enough objection stoutly to oppose it.

Mr. SIMMONS. Mr. President, I would like to ask the Senator from Oregon a question.

Mr. McNARY. I yield to the Senator from North Carolina.

Mr. SIMMONS. Unfortunately I was not in the Senate during the last week and have just arrived this morning and did not hear the Senator's speech this morning and have not read his amendment. The Senator is connecting the Government with this by way of giving preference to the soldier. What does that preference to the soldier amount to—that is to say, what advantage has he over any other purchaser under the project of the Senator? I have no doubt the Senator has been over it, but will he explain it to me?

Mr. McNARY. At the expense of being tiresome to Senators who have been present——

Mr. ROBINSON. Mr. President, will not both Senators speak louder? We are utterly unable to hear either one of them.

Mr. SIMMONS. The question I ask is what advantage there would be to the soldier under the preference given in the amendment of the Senator from Oregon over any other purchaser.

Mr. McNARY. A very fair question, and one which I have attempted to answer from an inquiry by the Senator from Minnesota, as well as in my principal speech. The soldier has the preference upon all unentered public lands. Of course, that would only apply to the western public-land States, which are 13 in number. He has a preference to all lands in excess of what is called the farm unit, being the size of the farm which the Secretary of the Interior believes a man must have in order to provide himself with a living. It can not be more than 160 acres and it may be very much less, depending upon the character of the soil, climatic conditions, and the products to be grown. He has the preference right to that extent. I perhaps should go further and give an illustration.

A project is incorporated under the laws of North Carolina. The Secretary of the Interior believes it to be feasible. The secretary of state of North Carolina has 500 acres which he wants to come within the district. The farm unit is established at 100 acres. Before the project can go forward, before the Secretary of the Interior will advance any money or commit the Government to any obligation, the able Senator from North Carolina must agree with the Secretary of the Interior to sell the excess acreage, which in this case would be 400 acres if he had 500 acres, at a price which the Secretary of the Interior thought it was worth, and when that is done that becomes excess acreage and upon that land the ex-service man has first right of entry.

Mr. SIMMONS. The Senator said at prices fixed by the Secretary of the Interior.

Mr. McNARY. Yes.

Mr. SIMMONS. Is that price to the soldier any different from the price to anyone else?

Mr. McNARY. Not at all. The ex-soldier pays the same price, but he has a preference right to go there and get that land. He must meet his obligation the same as any other settler. The other provision beneficial to the soldier is that he has the right to be selected above anyone else to do that work. He has the preference right of wage and right of employment.

Mr. SIMMONS. Undoubtedly that is a very considerable advantage.

Mr. McNARY. I think so.

Mr. SIMMONS. But with reference to the other and the only other advantage, the ex-soldier has the preference in the purchase of the land, but he has to pay the same price that any other individual has to pay.

Mr. McNARY. Oh, yes.

Mr. SIMMONS. That is the same preference that the soldier has now with reference to irrigated lands of the West owned by the Government.

Mr. McNARY. Yes. He has that right now.

Mr. SIMMONS. The Secretary of the Interior would fix the price of the land to all purchasers?

Mr. McNARY. That is true.

Mr. SIMMONS. And the soldier would have the first call, and that would be the only advantage he would get?

Mr. McNARY. That is all. It is not intended as mere charitable legislation, but a practical matter based upon the experience of the Reclamation Service in past years.

Mr. TRAMMELL. Mr. President, I desire to offer an amendment to the amendment. I send it to the desk.

The PRESIDENT pro tempore. The Secretary will report the proposed amendment to the amendment.

The ASSISTANT SECRETARY. On page 3 of the printed amendment, in line 13, before the words "per cent," strike out "80" and insert in lieu thereof "40," so that if amended it would read:

SEC. 803. That before construction of a project is commenced the sizes of farms therein shall be established and agreements shall be made effectively, subjecting not less than 40 per cent of the excess lands within the project to disposal by authority of the Secretary to settlers at prices and terms fixed in advance in such agreements.

Mr. TRAMMELL. Mr. President, I am heartily in favor of the enactment of some form of legislation which will encourage the reclamation of the arid lands of the West and the swamp and overflowed lands of the South, and since becoming a Member of the Senate I have advocated such policy, but I am doubtful as to the practicability of the measure in regard to meeting the great need for aid in bringing about the reclamation of the overflowed lands of the South. The Senator from Oregon is familiar with the western situation and has no doubt so formulated his amendment that he feels confident that the arid lands of the West will enjoy a full participation in the benefits afforded by the amendment. I have offered an amendment to his amendment in regard to the question of the percentage of land that must be subjected to sale under the Secretary of the Interior.

I am very doubtful, if we require that at least 80 per cent of all the lands within a drainage district be surrendered to the control and direction of the Secretary of the Interior as to prices, that there would be any great number of districts in the South that would avail themselves of a plan with the 80 per cent limitation. With a largely diversified ownership it would be quite difficult to get 80 per cent of all the landowners within a given territory—territory probably needing and demanding reclamation by drainage—to surrender over all of their property rights and the control of their lands to the Secretary of the Interior as the amendment proposes. In order to form a district at least 80 per cent of all the property has to be turned over to the Secretary of the Interior for him to carry on the drainage, centralizing in him all power of operation, centralizing in him all power of fixing prices or carrying on negotiations of sale.

Therefore I do not believe that in the South where, so far as I know—and certainly it is true within my State—the land is owned by a diversity of ownership, the provisions of the measure as worded will accomplish so much as would be true if the 80 per cent requirement was modified. Therefore I have offered the amendment to provide that it will only be necessary to subject 40 per cent of the lands within a project to disposal by authority of the Secretary of the Interior.

Mr. McNARY. Mr. President, let me ask the Senator this question: Is not the Senator from Florida interested in seeing the large farm tracts in the South broken up into practical units and given over to settlement to as many people as possible?

Mr. TRAMMELL. Certainly; Mr. President.

Mr. McNARY. If the Senator understands the provisions of my amendment, that is all it provides for.

Mr. TRAMMELL. I understand the Senator's amendment.

Mr. McNARY. I do not think the Senator does.

Mr. TRAMMELL. I understand the object and purpose of the amendment; but if the proposed legislation is made impracticable and no drainage districts shall be created under the provision of the proposed law, then we shall not have accomplished the settlement of the land, and we shall, by restrictions and qualifications, have withheld the benefits of the proposed act from that particular section of the country to which its terms are but poorly adapted.

Mr. McNARY. Let us see if the Senator understands the proposed legislation. Take 1,000 acres, most of it, we will say, owned by four men. The Senator from Florida desires the owners to come in and agree with the Secretary to sell 40 per cent of that acreage to actual settlers and soldiers. Would he want them to go ahead and complete the project for the benefit of these great landholders and landowners? All that my amendment does is to provide that 80 per cent of the privately owned land in large tracts must be subject to the law, providing for the size of the unit, and that it shall be sold to actual settlers and soldiers at a price to be determined by the Secretary of the Interior.

Mr. TRAMMELL. I think that in view of the phraseology of the amendment of the Senator from Oregon upon this particular point, instead of the amendment that I propose being in the interest of large landowners, the amendment of the Senator from Oregon as it is now worded would be in the interest of large landowners, because when the ownership is centralized in a few men they will arrive at an agreement; that they will surrender 80 per cent of all their property if the Secretary of the Interior fixes a price at which they are willing to sell the property; but that would not be so feasible where there is a diversity of ownership of lands for the drainage of which application is made. Therefore the peculiar wording of the bill is in the interest of large land ownership; and I think it is not so much in the interest of having the reclamation of land where there is a diversity of ownership.

So far as the question of benefit to the soldier is concerned, I do not think there is very much in the proposed amendment for the soldier. We might just as well, therefore, consider it put upon the basis of its merits as a reclamation proposition.

As a reclamation proposal, we might accomplish something through a measure of this character; but the soldier will only have the benefit of 60 days' preference in entering the land at the price fixed by the Secretary of the Interior; that is all we are doing for the soldier; as far as I am concerned I think we should do more for him. We have laws now that give the soldier the preference in regard to homesteads, preference in regard to civil-service positions, and preference in regard to employment in connection with road construction. So we shall be doing nothing very wonderful for the soldier by this amendment, no more than if we should carry on a reclamation project under a measure which was not tacked on to and made a part of the soldiers' compensation bill. I want the soldier to be given the preference as provided in this measure, but consider the amendment of the Senator from Oregon, not primarily for the benefit of the soldier but primarily a reclamation measure.

Mr. WALSH of Montana. Mr. President——

Mr. TRAMMELL. I yield to the Senator from Montana.

Mr. WALSH of Montana. I was endeavoring to follow the argument of the Senator from Florida in support of his amendment to reduce the percentage from 80 to 40, but I find I have not been able to understand the position he takes. If I understand this provision, it may be illustrated by this concrete example: Ten thousand acres which are owned by a large number of people are to be reclaimed by a project. We will say that 4,000 acres of the area are owned by 30 different people, each owning a little over 100 acres. Those 30 people are obliged to agree to sell everything they own over and above 100 acres at a price to be agreed upon by the Secretary of the Interior; and, of course, it will be agreed upon by them and the Secretary; but the other 6,000 acres are owned by three men, each owning 2,000 acres. Would the Senator from Florida like to have an irrigation district formed, 3 men owning 6,000 acres and 30 men owning just a little over 100 acres each, and those 30 men agreeing to give up their excess, but the 3 men holding out the 2,000 acres apiece?

Mr. TRAMMELL. Mr. President, I think that they should have a right to do that; that we should not take away from them their property right just merely because they happen not to constitute the larger number in that district.

Mr. WALSH of Montana. We do not take their right away from them.

Mr. TRAMMELL. Mr. President——

Mr. WALSH of Montana. One moment. That is where the Senator is in error. We do not take away rights from anybody. Before the district can be formed the owners of the land must agree to sell the excess above the unit at a price which is agreed upon—that is what this proposed legislation means—and agreements must be had from the owners of the 80 per cent of the land. That is because it is assumed that perhaps 20 per cent will be in the control of executors or of unknown owners, or something of that kind.

The point is not to permit the creation of a district, the benefit of which, and the benefits of the Treasury aid, will go to a few men owning large tracts of land. In the case that I have cited the three men will not agree to sell their excess at the price agreed upon by the Secretary of the Interior, but the other people, owning small tracts of land, are so desirous of having the work go on that they will agree to do so, and the man who owns 150 acres—100 acres, we will say, is the unit—will agree to sell his 50 acres at a price that is agreed upon, and another man owning 125 acres will surrender his 25 acres to be sold at a price to be agreed upon; but the three men, each owning 2,000 acres apiece, say "No, we will not agree to sell it." Still the district is organized and they get all the benefit out of it. Why should the Senator under those circumstances want to reduce it from 80 per cent to 40 per cent? The answer to those men each owning 2,000 acres will be, "Very well, you can not have any irrigation district."

Mr. TRAMMELL. Mr. President, I will reverse the case and make an application of it to illustrate my point. Say the three men, owning 2,000 acres each, making an aggregate of 6,000 acres, are willing to carry on a reclamation scheme for the purpose of promoting a land project, and are willing to surrender for sale at least 80 per cent of their lands; but, on the other hand, the 30 small owners, some of whom would like very much to enjoy the benefits of Government reclamation, and who have probably 300 acres of land each, say, "We should like to have this reclamation. The big landowners, it is true, owning 2,000 acres each, are willing to surrender 80 per cent of their lands to the Secretary of the Interior in connection with this project and for land sale, but we do not desire to dispose of our small acreage of land over and above the amount for a homestead or a settlement"; yet under the provisions of this bill they have to surrender their rights and allow the Secretary of the Interior to sell at least 80 per cent of their land before they can enjoy the benefits proposed by the measure. That is the reverse of the case under the illustration given by the Senator from Montana.

Mr. WALSH of Montana. Under those circumstances there would not be any irrigation district formed.

Mr. TRAMMELL. Certainly there would not be any district formed; that is just the point I am making.

Mr. WALSH of Montana. Why should the small owner, owning a small excess over the unit area, be entitled to hold any more than anyone else? He is not obliged to surrender anything; but 20 per cent of the community could still be obdurate and obstinate about the matter, and the irrigation district would go on anyway and they would get the benefit of it.

Mr. TRAMMELL. Mr. President, one out of the thirty small property owners mentioned by the Senator in his illustration could object and defeat the project. I dare say that under the provisions of a measure of this character the large property owners will be found much more ready to join in an effort to sell their property and to avail themselves of its provisions and to surrender 80 per cent or more of their lands to the Secretary of the Interior for his control in regard to improvement, price fixing, and so forth, than would the small owners.

In my State we have a great drainage project, I think the largest in the United States, involving 4,000,000 acres of land. The land embraced in that area belongs to thousands and thousands of owners, and so far as this measure is concerned they would in all probability have no advantage of its provisions. The 80 per cent requirement would make it probably impracticable, for 80 per cent of all the property of that district would hardly be surrendered to the Secretary of the Interior for the purpose of sale. But that is not all. The property placed in the hands of the Secretary of the Interior would furnish more swamp and overflowed reclaimed land than will be sold to only small settlers probably for a quarter of a century, if the owners

have to surrender 80 per cent of their entire holdings of land. I think the Secretary should have in his hand for sale every acre of land required for the small settler, but there is no reason why he should have millions of acres in excess of this demand.

What I had been hoping for was that we would work out a proposition under which the Government, without having to make disastrous restrictions, would furnish financial aid and assistance to reclamation projects in a reasonable way, to the extent of the area of land that would probably be needed for settlement at a reasonably early date; but not under restrictions that would preclude, in a very large measure, certain sections of the country from enjoying its benefits. I believe that the 80 per cent requirement would to quite an extent preclude such participation.

I have not offered an amendment as yet, but I propose to offer an amendment affecting projects that are already partially operated and being constructed. The pending proposal seems to contemplate entirely new projects, unless it reaches out to the already existing arid-land projects, and there are certain references in the amendment to other laws which probably bring existing arid-land projects within its provisions.

I offer the amendment and hope that it will be adopted. I am very apprehensive that if an amendment of this character is not adopted, except where there are large tracts of public domain still held by the Government, as in many of the arid-land States of the West, other States will not be benefited so much as I desire under the proposed measure.

The PRESIDENT pro tempore. The Secretary will state, so that the Senate may understand it, the proposed amendment of the Senator from Florida to the amendment.

The ASSISTANT SECRETARY. In the printed amendment of the Senator from Oregon [Mr. MCNARY], on page 3, line 13, the Senator from Florida proposes to strike out "80" and insert "40."

Mr. PITTMAN obtained the floor.

The PRESIDENT pro tempore. Will the Senator from Nevada allow the Chair to make an observation?

Mr. PITTMAN. Certainly.

The PRESIDENT pro tempore. The Chair is of the opinion that the amendment offered by the Senator from Oregon [Mr. MCNARY] is not now properly before the Senate and the record ought to be made clear before the debate proceeds further. The Chair is of opinion that the action of the Senate in agreeing to the substitute for title 8, reported by the committee, must be reconsidered before the amendment offered by the Senator from Oregon is in order.

Mr. MCNARY. Will the Senator from Nevada yield for the purpose of properly placing before the Senate the amendment in question?

Mr. PITTMAN. I yield for that purpose.

Mr. MCNARY. I move a reconsideration of the vote by which title 8 was stricken out.

The PRESIDENT pro tempore. The Senator from Oregon asks unanimous consent that the vote by which title 8 was stricken out and certain matter inserted in lieu thereof be reconsidered. Is there objection? The Chair hears none, and the vote is reconsidered.

Mr. MCNARY. I now offer my amendment to the bill.

The PRESIDENT pro tempore. The Chair is of opinion that the amendment is now in order.

Mr. FLETCHER. And the amendment of the Senator from Florida [Mr. TRAMMELL] to the amendment of the Senator from Oregon is in order?

The PRESIDENT pro tempore. The Senator from Florida now offers the amendment to the amendment proposed by the Senator from Oregon, which has already been stated, and which is the pending question. The Senator from Nevada will proceed.

Mr. PITTMAN. Mr. President, I gather from the argument of the Senator from Florida [Mr. TRAMMELL] that he understands the provision to mean that 80 per cent of the excess land of each owner of land is required to be subjected to disposal to settlers by the Secretary. That is not the fact. It simply requires 80 per cent of the excess land to be subjected to his disposal, whether that is furnished by one or by 100 owners. That is the distinction.

We will assume that one man in a proposed 10,000-acre district owns 9,000 acres. That one man, by turning over to the Government for the purpose of reclamation and disposal in farm units 8,000 acres, can form the district, while the owners of the other 1,000 acres, which we will say consist of five people having 200 acres each, do not have to give up any excess acreage at all.

In other words, the necessity for the provision is simply this: The Government is not going to furnish the money to develop an irrigation district or a drainage district unless it be for the benefit of a large number of settlers on at least 80 per cent of the land of the district. That is all that means. While there has been no experience in the drainage districts with regard to this provision, there has been experience with regard to a similar provision in the irrigation of arid lands in the West.

For instance, we will take a district in our State, where about half of the land is in private ownership and has been for a great many years owned in large tracts, two or three thousand acres to the person. These people have held that land for years for speculative purposes. It is not worth a cent unless you can put water on it. It is worth no more than the swamp lands of Florida if they can not be drained. The great trouble about the individual accomplishing the irrigation of these arid lands is the difficulty of bringing about an agreement between all of the landowners in the district and the Government, which owns the public lands in the district. Of course, the Senator from Florida will have no public lands in his drainage district. He will have State lands; but experience in the formation of similar districts for the purpose of taking care of the arid lands of the West, where part of the land is Government land and part of it is privately owned, has demonstrated that it is perfectly practicable to carry out such a provision as is found in this bill.

It took four or five years to accomplish it, it is true. I remember that in one district in our State, which is probably one of the richest farming districts in Nevada, all of the land up to a certain period of time had been privately irrigated. There were probably 30,000 acres of the richest land in the country under private irrigation, but the people who owned that 30,000 acres of privately irrigated land also owned about 20,000 acres of land that they did not have water to irrigate. They desired, however, to get the water to irrigate that 20,000 acres. To do that would require the building of a tremendous reservoir by somebody, either the individuals or the Government. The individuals could not bring it about, because it was difficult to get the proper contribution by hundreds of little landowners in that district. These little landowners did not have the money to join in this tremendous enterprise of building a large reservoir, and these wealthy men with large holdings did not want to put up all of the money, just as the Government under this provision does not want to put up money for the purpose of improving the land of one or two men who may own 60 per cent of the land to be benefited. The Government does not desire to lend money for the benefit of land owned by two or three people. The only argument at all in favor of the Government, as a government, taking part in these great reclamation schemes is, in the first place, that it can only be accomplished practically through the Government and, in the second place, that it is for the benefit of a great number of home seekers.

I think that when you place in this bill a requirement that the Government shall proceed to lend this money and construct these projects when 80 per cent of the lands are in farm units, you have gone far enough. The Government ought to know that at least 80 per cent of a district is going to be divided up, we will say, in 100-acre farms between a great number of people. It may be said that the Government may know that the other 20 per cent of that land is going to be equally benefited, and is owned by one individual. The Government does not want to do that; but it has been found, as the Senator from Montana has said, that possibly 20 per cent of that land is so owned that they can not get cooperation from it.

I am perfectly confident that if a provision were placed in this bill asking the Government to furnish money which might be enjoyed 60 per cent by one man and only 40 per cent by a number of men, the bill would be vetoed by the President. I can not see that it makes much difference in the practicability of forming a district whether you require 40 per cent or 80 per cent of the excess land over the farm unit to be distributed. It may require a few more days' time to bring them together. As a matter of fact, unless the services of the Government are required in a certain district, you never will have the district, anyway; and if the services of the Government are required for the success of the project, you will have no trouble in getting 80 per cent of the excess land disposed of. That has been the experience, as I tell you, with this same kind of provision in the development of projects in our arid-land section. These great holders of large quantities of land did not want to give it up, of course. They wanted the Government to put the water on the land, and make land that was worth $5 an acre worth $100 an acre, undoubtedly. The Government said, "No; if you are willing to sell this land at $5 an acre, its present value, the Government will take it over, and in turn we will sell it in 100-acre lots to home seekers, and we will put water

on it, and we will put water on the 100 acres that you keep for yourself." That was a fair, legitimate proposition, and any other kind of proposition would be unfair.

Mr. TRAMMELL. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Florida?

Mr. PITTMAN. I do.

Mr. TRAMMELL. Does this measure contain any provision requiring that this reclaimed land shall be sold only in small tracts to actual settlers?

Mr. PITTMAN. Yes.

Mr. TRAMMELL. There is nothing in the bill of that character.

Mr. PITTMAN. Oh, yes; there is.

Mr. TRAMMELL. The Senator is arguing from that viewpoint, but there is nothing in the bill which says that the Secretary of the Interior can not dispose of 1,000 or 5,000 or 10,000 acres to one land purchaser, if he sees fit.

Mr. PITTMAN. Oh, yes; I remind the Senator of the provisions of section 803:

That before construction of a project is commenced the sizes of farms therein shall be established and agreements shall be made effectively, subjecting not less than 80 per cent of the excess lands within the project to disposal by authority of the Secretary to settlers at prices and terms fixed in advance in such agreements. Such prices and terms shall be determined with the view of placing a bona fide and competent settler upon each farm of the project with the least possible delay.

Now turn to the definition in the first part of the bill, and see what "farm" means. This is subdivision (d), on page 2:

(d) The term "farm" means an area of land within a reclamation project sufficient in size, in the opinion of the Secretary, to support a family, but not exceeding 160 acres of reclaimed land.

Consequently, not over 160 acres could be sold to any one person; not over 160 acres could be homesteaded by any one person; and I may say that the experience in reclamation projects has demonstrated that in a great many cases the unit has been made only 80 acres. One hundred and sixty acres is the maximum.

Mr. TRAMMELL and Mr. BURSUM addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Nevada yield further; and if so, to whom?

Mr. PITTMAN. I yield first to the Senator from Florida. Then I will yield to the Senator from New Mexico.

Mr. TRAMMELL. The Senator speaks of homesteading. Does this bill contemplate that Government land that has been reclaimed can be homesteaded under the homestead law at the regular rate per acre?

Mr. PITTMAN. It does. This bill anticipates that the public lands that are taken in an irrigation district shall be subject to homesteading.

Mr. TRAMMELL. Without the accumulated expense of the reclamation being charged against the homesteader?

Mr. PITTMAN. The homesteader does not pay for the land. During a period of 40 years he pays to the district his proportionate part of the expense of constructing the project and of maintaining it. The district then, over a period, we will say, of 40 years, pays back to the United States Government its money for having established the project.

Mr. TRAMMELL. What if the homesteader does not homestead until 10 years after the completion of the project, and the bonded obligation has been running for a period of 10 years, and assessments have been made against that land for a period of 10 years? Does he still purchase the land at the regular homestead-entry price?

Mr. PITTMAN. That is to be arranged entirely by the Secretary of the Interior. That difficulty has arisen in the irrigation of arid lands. It has only arisen, however, through the mistake of the Government in taking in land that was not really arable; but in the case of the recent projects established by the Government, where the land is arable, experience has taught us that there is a scramble to enter this land, instead of having it lie open for 8 or 10 years after the project starts. It is a very inviting thing for the homeseeker, and he goes in there. While a condition might arise such as the Senator speaks of, in that case it is entirely within the power of the Secretary of the Interior to require that homesteader to assume the accumulated obligation as against that land in the district.

Now I will answer the question of the Senator from New Mexico.

Mr. BURSUM. What I intended to call to the attention of the Senator from Nevada and also the Senator from Florida was the fact that while a maximum of 160 acres is allowed to any project, yet experience has shown that the average would be nearer 40 to 80 acres. That is to say, in the intensive cultivation of a farm under irrigation it is impossible to take care of anything like the acreage that can be cared for in the case of land which is not cultivated by irrigation and where you do not get the large returns. Furthermore, any land under a project is automatically arranged so that it would be impossible to have any large areas of idle land on account of the annual capital water charge on that acreage. So under all the arrangements and regulations with reference to any project I know of that question would automatically settle itself and be reduced to the small ownerships.

Mr. PITTMAN. That completes that portion of the statement I was making with regard to the fact that in many cases there were only 80 acres. I have no doubt that the Senator from Florida feels that the requirement that at least 80 per cent of the land in excess of the farm units shall first be turned over for settlement of other people, upon paying, of course, the purchase price, will make it very difficult to organize one of these districts. It is true it would be easier to organize them if only 40 per cent was required. But coming down to the balance of the difficulties, while it is easier to form a district where only 40 per cent of the excess lands over the farm unit must be surrendered for sale, it is impracticable, because the Government will not put up the money where it benefits only a small number of persons. That is what we are up against.

This is not a new question as far as desert lands are concerned. It is a new question as far as drainage lands are concerned. It is perfectly natural that the Senator's mind should revolve around the same questions which have disturbed the minds of western Senators for several years.

As I said just now, here is a great farming valley, in which 30,000 acres are privately irrigated and privately owned, but there are 20,000 acres of privately owned land not in irrigation. There is no water to put on that extra 30,000 acres of land, which is owned by probably 10 people. The only way they can give any value to it is to put water on it, and the only way they can get water is to build an expensive Government reservoir. The few men who own these 20,000 irrigable acres of land, who have no water for it, do not want to put up all the money to build that reservoir, and at the same time have probably forty or fifty thousand acres of Government land benefited by it. In fact, they would have difficulty in selling their bonds to raise the money to put in that Government reservoir.

What is the result? They find that the only thing they can do is to go to the Government and say, "Will you cooperate with the State so that districts may be organized under the State law, embracing three kinds of land—land already irrigated and privately owned, land that is privately owned and not irrigated, and Government land?"

What has happened? Districts were incorporated. But the Government said, "Two or three of you fellows own 20,000 of the 40,000 additional acres which are to be put under cultivation by the building of this reservoir, and we are not going to advance the money where half of the benefit of this whole thing will go to two or three men. Your land is worth $5 an acre to-day without water on it. We will give you $5 an acre for it, all in excess of a farm unit. We will buy it from you, and then we will sell it to homesteaders in 80-acre tracts. Then we will put the water on it, because half of it will not be for the benefit of two or three people, but it will be for the benefit of a great many citizens of the United States." That is the great object of the Government in going into these projects.

We have been delayed four or five years by that fight. The Government has stood pat, and for four or five years these owners of half of that land have also stood pat. But they could not sell the bonds to develop their own projects, and finally they had to come to the Government. They had shed their selfishness, and they have said, "We would rather have a hundred acres each with water on it than to be paying taxes on 20,000 acres with no possibility of getting water on it." So they have turned it over to the Government for five or six or seven dollars an acre, whatever the price was, and the Government has turned it over to the homesteader at the same price, with the result that instead of having 30,000 acres under irrigation you have 70,000 acres under irrigation, and instead of having a population of probably 2,000 people on 30,000 acres of land, you have a population of 20,000 people on 70,000 acres. Instead of benefiting a few selfish individuals, you are benefiting the whole country by furnishing homes to a great many people and increasing the production of your country.

Senators say they do not see how this is going to benefit the soldier. The soldier is entitled to adjusted compensation, but that adjusted compensation will not compensate him, as all of us know. Nothing will ever compensate him for what he has done, although I know that his deeds have been forgotten by many of the people of the country. Hundreds of thousands of those boys who are not to-day confined in hospitals are limp-

ing around the country in broken health, feeling the effects of their terrible ordeal. We should take those boys and, if there is a power in this Government to do it, we should furnish them homes in the open air, we should put in their hands the opportunity to live healthfully and to prosper and to become a part of the great producing citizenry of this country which they probably saved in that desperate war.

Senators do not see how it is going to help the soldiers? Canada saw how it was going to help the soldiers. Canada, a country not nearly as rich as this country, loaned as high as $2,000 to a soldier, put him on a farm, and started him out with horses and teams and plows and seed. I wonder if the Canadian soldier could see how that could in any way help him?

What have we done for the soldier? We have praised him; we have told him we were going to take care of him; we have had declarations here in the form of messages and letters from men high in our Government, most solicitous in regard to the welfare of the soldier, most assuring with regard to taking care of him. Yet years have gone by, and we hear only the echoes of those assurances, and in our hearts we know that secretly and by stealth and by cunning the power of this administration is being massed for the purpose of forever defeating any compensation to these soldiers.

Then we say that they are not entitled to adjusted compensation; that they have not earned it; and one who does not dare say they have not earned it, because he was a soldier himself, one of the new Senators, says it will not compensate them. The salary that Senator receives probably does not compensate him for the work he does for his Government, and possibly his honorable position would be higher and more respected if he received nothing.

We did not consider that it was a crime or was insulting when we adjusted the compensation of Government employees during the war and have maintained that adjustment of compensation to the present time. But to-day by reason largely of the argument made by the United States Chamber of Commerce, a highly intelligent, cold-blooded, heartless organization, moved entirely by instincts of selfishness and greed, many legislators and business men of this country have almost come to the conclusion that the soldiers who suffered so much, who gave so much, whose lives were wrecked by the war, are to-day trying to rob this Government.

Mr. President, when I think of the $10,000,000,000 made in excess profits by the profiteers of this country; when I think of the $15,000,000,000 of profits in addition to the excess profits which were turned by corporations into capital stock for the purpose of avoiding paying of taxes, I am astounded at the greed, the heartlessness, and the lack of patriotism of the great financiers of this country.

You could pay this whole thing with a billion five hundred and some odd million dollars. Yet the excess profits earned during the war were over $10,000,000,000. A little over 10 per cent of the excess war profits of corporations alone would pay the whole thing. Yet it is a crime to ask for it! Six billion dollars of excess profits were made by individuals in this country during the war and out of the war, yet those individuals, including some of the highest officers of our Government, are so selfish and inhuman that they are unwilling to give up, we will say, 15 per cent of those enormous earnings to pay these soldiers.

Mr. President, Senators say they do not see how this land-settlement business will benefit the soldier. The soldiers saw it. They demanded it when this measure first came before the House over two years ago, and the House of Representatives, by an overwhelming vote, adopted title 6 of that bill, then known as the land-settlement bill. It came over to the Senate and the Finance Committee of the Senate struck it out.

When the adjusted compensation bill passed the House recently the land-settlement provision was again put in by the House because the soldiers wanted it and the House knew its great benefits. It came over to this body and again the Finance Committee struck it out. The bill comes into this body without that provision. As a matter of fact it is the most wholesome and beneficial provision of the entire bill. But that provision adopted by the House has been definitely and finally stricken out of the bill, and there is no chance to get it back into the bill. Therefore those of us who believe in the land settlement for soldiers are forced to come back to the amendment which has been presented by the Senator from Oregon.

It is a magnificent amendment. It is as good, probably, as the provision originally adopted by the House at the request of the soldiers. It accomplishes largely the same purpose. It looks largely to the same end.

I offered a land-settlement provision as an amendment at the time the bonus question was brought up by the Senator from North Carolina [Mr. SIMMONS]. It was brought up by the Senator from North Carolina as an amendment to the foreign war debt funding bill, and when he brought up the soldiers' adjusted compensation bill as an amendment I then offered as an amendment to his amendment the original land-settlement provision of the House bill, which the Senator from North Carolina accepted, but at that time both amendments went out on a point of order.

Mr. SIMMONS. Mr. President, I would be glad if the Senator would very briefly explain the language "in excess of the farm unit." I have not had an opportunity to study the amendment carefully.

Mr. PITTMAN. The Senator was not in the Chamber when I discussed it, but it is worth while, and I shall do it again.

The way the Government intends, through this provision, to develop irrigation and drainage projects is by doing it through cooperation with the States. Under the present irrigation law, as the Senator will remember, the Government took a lot of public lands, withdrew them, and put them into irrigation projects. That was all Government land, so the Government could do what it pleased with it. Then it divided it up into farm units, the size depending upon the richness of the soil and the natural value of the farm unit, the question being how much land would support a family comfortably. The farm units have been 40, 80, or 160 acres and no man may acquire more. The purchaser pays annually a certain proportion of the cost of putting the water on that land and maintaining it there. That is covered in payments extending over 40 years.

There was another character of land that the Government could not get at that way and that was where part of the land in the valley was in private ownership and already being irrigated by private water systems, part of the land was privately owned land in the district, but not under water, because they did not have the water for it, and the rest of it was Government land; three kinds of land. The Government did not feel like advancing money for the benefit of the few individual landowners, so it said, "Under the laws of the State organize a district and take in those three kinds of land. Then let those who own the nonirrigated land which is going to be benefited turn over to the Federal Government all in excess of what they own over the farm unit of 160 acres at a reasonable price." In other words, the Government bought from the owners the nonirrigated private land at its worth, all except 160 acres of it.

Mr. OVERMAN. But there is no such provision in the amendment.

Mr. PITTMAN. Oh, yes; there is. Then it made the man who entered the 160 acres pay the same price for it. What is accomplished is that instead of having two or three people owning the particular land to be benefited—because this land is all dry and there is no water on it—they make them sell it so that it becomes public land. When it is bought and becomes public land, then it is open to homesteading just as other Government public land. That is the provision.

But they have found in practical experience in the West that it is sometimes impossible to find all the owners of the land in excess of the unit. Some man, for instance, has 200 acres, 40 acres in excess. He has not been heard of in 10 years and can not be found. Consequently it has been provided in the amendment that the district may be organized when 80 per cent of the land to be benefited by the project is turned over to the Government, by sale or by other process. In other words, the Government will not start in to benefit the lands unless it has control of 80 per cent of it. That is the whole story. They do not confiscate anybody's land. They do not take it away from them. They buy it and if they can not buy it then there is no district. The law does not force them to sell. The Government does not proceed by condemnation methods. It merely says, "If you who own the excess lands think you can benefit by selling to the Government so we may subdivide it among homesteaders, all right, we will do business. If you do not want to do it, you do not have to do it." That is all there is to it. There is no forcing of the proposition. It is just opening a door through which the Government may assist in bringing into productivity the swamp lands and arid lands where private owners for years and years have found it impossible to do it.

Mr. FLETCHER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Florida?

Mr. PITTMAN. I yield.

Mr. FLETCHER. The language is not very clear. Am I to understand the Senator's conception of it to be that where land is already owned by an individual, we will say 1,000 acres in the proposed project, and he is willing to go into the scheme, that 80 per cent of the thousand acres, or 800 acres of his land,

may be subjected to disposal, as the language is, by authority of the Secretary to settlers at prices and terms fixed in the agreement? The question is, Does the man who now owns the 1,000 acres and wants to go into the project get any pay for the 800 acres that he turns over?

Mr. PITTMAN. Why certainly. That is exactly what he gets.

Mr. FLETCHER. But the price mentioned is to the settler:

Such prices and terms shall be determined with the view of placing a bone fide and competent settler upon each farm of the project with the least possible delay.

Now, I suppose there may be years elapse before any settlers go in there. This does not seem to provide, but in case a settler is found for a portion of the 800—say, eight settlers, each taking 100 acres—and the price is agreed on as to what they shall pay, does the original owner of the land get any part of that price?

Mr. PITTMAN. Undoubtedly.

There seems to be some uneasiness for fear there is no provision for the payment of the private owners of the land for the excess area turned over for settlement. I may say, in the first place, that if there were no provision in any bill whatever the private land could not be taken even by the Government except upon payment of just compensation for the land; but I am not going to that extent now. Listen to the reading of section 803:

That before construction of a project is commenced the sizes of farms therein shall be established and agreements shall be made effectively, subjecting not less than 80 per cent of the excess lands within the project to disposal by authority of the Secretary to settlers at prices and terms fixed in advance in such agreements.

That is, agreements with the owners of the excess lands.

Mr. SIMMONS. Now, that is one point I desire to have cleared up. My colleague [Mr. OVERMAN] made inquiry of the Senator from Oregon. I did not quite get his answer; but if my colleague understood it correctly—and he has explained his understanding to me—it would mean that the owner of the land would never get more than the value of the land in its natural condition. I do not understand what the Senator has just read as meaning that. I understand that as meaning—and I want to ask the Senator if I am correct about it—that the Secretary of the Interior and the drainage district would confer together with reference to the price to be fixed upon the land and that the price would take into consideration the value of the land in its natural condition and also the value of the land after it has been improved, and the price would be fixed upon the basis of those two factors.

Mr. PITTMAN. We have had practical experience. A provision similar to that contained in the paragraph has been put into force and effect time and again. The agreement is not made with the district. The agreement is made between the Federal Government and the individual, because the agreement must be made before they can organize the district.

Mr. OVERMAN. Mr. President, before the Senator goes further, as I understood the Senator from Oregon [Mr. MCNARY], in answer to my question, and the Senator from Washington [Mr. JONES], when the district is formed the person who owns the 1,000 acres of land goes in, and he agrees with the Secretary of the Interior that that land shall be sold at a certain price to settlers; not that the Government buys it at all, but he goes into the scheme, and the Secretary of the Interior fixes the price at which it is to be sold to the settlers, he retaining only 20 per cent.

Mr. PITTMAN. That is really the practical operation of it; but, as a matter of fact, the Government is behind the payment for the land. The entryman either does pay for it, or it goes back to the owner, of course.

Mr. JONES of Washington. Mr. President——

The PRESIDING OFFICER (Mr. TOWNSEND in the chair). Does the Senator from Nevada yield to the Senator from Washington?

Mr. PITTMAN. I yield.

Mr. JONES of Washington. As I understand the provision, it is that the owner of the excess land practically makes the Secretary of the Interior his agent to sell the property for an agreed price.

Mr. PITTMAN. Undoubtedly.

Mr. JONES of Washington. And all of that agreed price comes back to the owner of the land when it is finally sold.

Mr. PITTMAN. I have spoken of the Government purchasing, but, as a matter of fact, the Government collects the money from the entryman and turns it over to the other party.

Now, as to the effect of the operation.

Mr. SIMMONS. Mr. President, the point I have in mind is this: Is the price which is to be fixed by the landowner and the Secretary of the Interior the price of the land in its natural state or is it the price which the land is supposed to be worth when it has been improved by the expenditure of money necessary to drain it or to irrigate it?

Mr. PITTMAN. I will say that the Government in all of its negotiations has contended that the value of the land is its value without water on it; and that the value that is added to the land by placing water on it is paid by the entryman; that is what he pays for. The entryman not only pays the price of the land—that is, where it is excess land turned over—but in addition he pays his proportionate part of the value of the impounding works, the ditches and maintenance. He pays for the increased value of the land through the project and the district, and, therefore, as a matter of fact, the Government has always held that the land value must be fixed at its value before the water is put on it.

Mr. OVERMAN. Or, in the case of swamp land, before the water is taken off?

Mr. PITTMAN. Yes; before it is drained. That, of course, has been the subject of extended negotiations. All of the elements of value that have ever been raised have been considered in those negotiations; and sometimes two or three years have been required to settle them.

Mr. SIMMONS. The drainage district issues bonds, as I understand?

Mr. PITTMAN. Yes.

Mr. SIMMONS. And the Government buys those bonds?

Mr. PITTMAN. No; the Government takes them and holds them.

Mr. SIMMONS. Or sells them?

Mr. PITTMAN. Or sells them; but, of course, it does not attempt to sell them until there is a going project.

Mr. SIMMONS. Say a man has sold his land embraced in a drainage district at the price of the land with water on it; the drainage district is composed of a number of tracts that have been sold in the same way. The drainage district has issued bonds, and the interest has got to be paid on those bonds, I should like to know who pays that interest until the land is sold?

Mr. PITTMAN. The Government advances all the money until the project is a going concern, until it forms adequate security for the district bonds; and then the district, the bonds having been sold, reimburses the Government for the total amount which has been expended by the Government in taking over the entire project.

Mr. SIMMONS. Suppose this case: Swamp lands are developed; the owners have sold them to the district at their value before the water was taken off, and before any money was expended on them, and have received their money; but the drainage district has issued bonds, and the interest upon those bonds has got to be paid by somebody until the land embraced in the area is finally disposed of; where is the drainage district to get the money to pay that interest?

Mr. OVERMAN. At that point, I will ask if the owner has received his money at all? That is what I want to get at. He does not get any money; he agrees to go into the project, and then money is appropriated for the purpose of drainage, in my section of the country.

Mr. SIMMONS. That may be so.

Mr. OVERMAN. There is no money advanced to him for his land at all. Under the pending amendment he agrees with the Secretary of the Interior that he will go in, and 80 per cent of his land is taken and can be sold to Tom, Dick, or Harry for settlement at such price as may be fixed by the Secretary of the Interior. The owner gets his money when the land is sold.

Mr. SIMMONS. But the question I have in my mind is, who is going to pay the interest upon the bonded indebtedness while the lands are being sold?

Mr. PITTMAN. The interest on the indebtedness or the interest on the money advanced—and all the money advanced is furnished by the Government, of course; so it does not make any difference whether it is called interest on a bond or otherwise—all the accumulated cost of the project, whether it includes cost or overhead charges or what not, is paid for by the man who enters the land. He pays for it in annual installments; and part of those annual installments go to the former private owner, if the lands were private lands.

So far as the district bonds are concerned, the district bonds do not issue—and they do not commence to draw interest until they do issue—until a market has been made for them by the Government.

Mr. SIMMONS. When they do issue, how are they paid?

Mr. PITTMAN. When they are issued, from the time they issue, of course, they draw interest; but that money is again refunded by the entrymen; in other words, the sale of the bond pays the Government for what it is out, and the entry-

man, in 40-year annual installments, pays the district for what it is out. So when it comes to the question of charges and payments, all of them fall on the entryman in his proportionate part.

Mr. OVERMAN. Mr. President, will the Senator let me ask him a question right there?

Mr. PITTMAN. Certainly.

Mr. OVERMAN. It has been stated here that all this has to be done in cooperation with the States. Now, what will the State of North Carolina have to do?

Mr. PITTMAN. The State of North Carolina will have to pass an act, if it has not one already.

Mr. OVERMAN. I understand the State of North Carolina has a drainage act, but do we put up any money?

Mr. PITTMAN. The State of North Carolina will not have to put up any money; but the State of North Carolina will have to pass a law governing the districts, and providing under what conditions such a corporation may exist.

Mr. OVERMAN. In other words, the State will have to provide the machinery?

Mr. PITTMAN. Yes; but the State may impose such limitations as it desires.

Mr. SIMMONS. The Government furnishes all the money for the purpose of reclaiming the land?

Mr. PITTMAN. It has to do so at the start, because there is no credit back of any of the bonds until the projects are in operation.

Mr. SIMMONS. I agree with the Senator that as soon as the lands are sold and become the subject of private ownership, then, of course, the entryman will have to pay his part of the interest. But what I had in mind was who would pay the interest on the bonds after they are sold but before the land is sold?

Mr. PITTMAN. I may say, if the Senator please, that in all of these reclamation schemes the Government has never charged any interest for the advance of its money.

Mr. SIMMONS. Ought not such a provision to be in the bill?

Mr. FLETCHER. Mr. President, is it not the case that the interest on the bonds will be paid, as the Senator has stated, correctly, I think, in the first instance by the district? The district is an organization created by State law. The Senator from North Carolina wants to know how the district gets its money to pay the interest. In all of the laws creating drainage districts in the States the power is given to levy taxes on the lands by the owners of the lands for the purpose of drainage. The money so raised by taxation will go to the district, and the district will use it in paying interest on its bonds, I take it.

Mr. SIMMONS. That is right where my trouble begins. The lands are sold at a fixed price, and that price is the value of the land in its natural condition. Until the lands are sold the interest upon the bonds for the money to reclaim them must be paid by somebody, I assume. That interest can be paid only by levying taxes upon the lands. That tax when it is levied upon the lands comes out of the landowners, and it seems to me it ought to be added to the price of the land.

Mr. PITTMAN. Wait a moment——

Mr. RANSDELL. Mr. President, will the Senator from Nevada permit me a moment?

Mr. SIMMONS. So that the price ought to be not only the price of the land in its natural state but any tax that the owner of that land, as a member of the drainage district, has to pay up to the time the land is sold.

Mr. RANSDELL. Mr. President, if the Senator from Nevada will permit me, that is exactly what section 804 of the amendment provides. It is very plain and simple. Let me read it.

Mr. SIMMONS. I will be very glad to have the Senator read it.

Mr. RANSDELL. The provision I have in mind is as follows:

SEC. 804. That when, in the opinion of the Secretary, a project has been fully completed and successfully operated for one season the Secretary shall fix the construction cost thereof, which shall include the total cost of investigation, the expense of selling district bonds under section 805, interest at not exceeding 5 per cent per annum upon all sums advanced by the United States in the construction thereof—

That is the very point the Senator raises—

and the cost of operating and maintaining the project to the date of fixing such cost. This total cost the district shall agree to pay to the United States within a period not exceeding 40 years, with interest thereon at not exceeding 5 per cent per annum.

So, the total cost, I will say to the Senator, including the interest on the cost of the project, is added up, and that interest is calculated by the Government itself.

Mr. SIMMONS. So that if the individual landowner has been compelled to pay any tax in order to raise money, to pay the interest, he will get that sum back in addition to the price?

Mr. RANSDELL. Unquestionably, but he does not have to pay that interest, for the Government, under the plain terms of section 804, pays the charges, including interest on the cost.

Mr. SIMMONS. And the landowner does not pay it?

Mr. RANSDELL. The Government pays it, and adds that to the cost of the project. It costs so much to reclaim the land; that is one part of the cost; and the interest on the amount is another part of the cost.

Mr. SIMMONS. I thank the Senator. That clears up the point I had in mind.

Mr. RANSDELL. It is perfectly clear from section 804.

Mr. SIMMONS. It would have been clear if I had read the bill, but, as I have said, I returned to the city only a few hours ago, and have not had an opportunity to read the amendment.

I wish to say to the Senator from Nevada right now, in connection with this amendment and in connection with some observations he had made upon the benefits of the amendment to the soldier, that I agree entirely with him that this is a very valuable concession to the ex-service men. At first blush I was not of that impression; I thought it gave him nothing more than a preference as a purchaser; but it is very much more that that; it is a preference to purchase lands at what might be termed an abnormally low price, a price that has no profiteering in it. That is very valuable.

To illustrate the value of that, Mr. President, there have been many drainage projects that have been brought to consummation in the South, some in my State, in the last eight or ten years. When those projects were first completed, and the lands were ready for cultivation, a little extra labor probably being made necessary by the removal of the timber, the first price fixed upon those lands was a moderate price. Generally they were fertile lands. Money is not invested in the South, as elsewhere, in these large drainage propositions unless the lands are of superior character. Of course we have vast areas of inferior cleared lands that are open to sale. The first price fixed upon those lands has been a moderate price, a price that probably represented simply the original cost of the lands in their natural condition, plus the expense of improvement. If the result of their cultivation was very profitable, as in many instances it has been, the price of the reserved lands was advanced, and as more of it was brought under cultivation, and its profits were further demonstrated, the price advanced again, until the ultimate price of the reserved part of the lands was exceedingly high.

As I understand, under this bill the soldier will get this land at a price fixed upon it, and that price—measured, probably, by the original cost of the wild land, plus the cost of its development—will not be advanced.

Mr. PITTMAN. Mr. President, I do not know that it would be accurate to say that he would get it at the original cost price.

Mr. SIMMONS. I said plus the cost of its development and improvement.

Mr. PITTMAN. For instance, you might buy desert land through the State at $2.50 an acre. I do not think that in any of the cases I have in mind in our State the price of the land has been fixed at $2.50 an acre; say $5 an acre or $6 an acre.

Mr. SIMMONS. But it would be a moderate price?

Mr. PITTMAN. Yes; it would be a moderate price. It would not be based, of course, on the value of the land before the water had been put on it, or before the water had been drained off, as the case might be.

Mr. SIMMONS. As I understand this bill, the price of those lands as fixed originally by the Secretary of the Interior and the landowner will not be advanced at any time. All of those lands will have to be sold—that is a part of the contract—at that price, whether they are sold in a year or in 10 years, and the soldier has a preference over other purchasers.

Mr. PITTMAN. For 60 days after it is opened.

Mr. SIMMONS. Oh, only 60 days?

Mr. TRAMMELL. Mr. President, he only has 60 days after it is opened.

Mr. SIMMONS. So the Senator from Nevada advises me. I think that ought to be extended. It is too short.

Mr. PITTMAN. Mr. President, the Senator from Oregon [Mr. MCNARY], in his very able speech, called attention to the splendid help given to the movement for the irrigation of arid lands throughout the West by the late President Roosevelt. All western men know of and appreciate that strong and unselfish support. There is no doubt that his support of the

legislation for the reclamation of arid lands brought about the accomplishment of such legislation much more rapidly than would otherwise have been the case; and yet I do not want it forgotten that my former colleague from Nevada, the late Senator Francis G. Newlands, gave his whole official life to the enactment and development of the reclamation law.

When I first became acquainted with Senator Newlands, years ago—yes, I may say, before I met him; but when I knew of him—he was then fighting, and fighting practically alone, for the passage of the reclamation act which bears his name. Away back in 1892, 10 years before President Roosevelt lent his magnificent support to reclamation, Senator Newlands was at every session fighting for the passage of that bill in the House of Representatives. Session after session, Congress after Congress, Senator Newlands offered his bill as an amendment to the rivers and harbors bill, and to every other bill that could possibly carry it. He started out by getting 3 or 4 votes for his amendment. Then, after a year or two, he had 5 or 6 votes; and through this slow process his votes increased, and his patience and his good humor and his courtesy and gentlemanliness were never disturbed or lost. He annoyed leaders in Congress by his persistency, and yet when they look back on it they must realize that it was that persistency alone that accomplished the passage of that act at the time it was passed. I think that as time goes on, and the history of statesmen is calmly reviewed, Senator Newlands will have a high position among those men, and his vision will be commemorated in some proper way.

Mr. OVERMAN. Mr. President, will the Senator yield to me?

Mr. PITTMAN. I yield to the Senator from North Carolina.

Mr. OVERMAN. Did Senator Newlands get that measure passed as a rider to a bill or as a separate proposition?

Mr. RANSDELL. It finally passed as a separate proposition.

Mr. OVERMAN. That was my recollection, and that brings me to this question——

Mr. PITTMAN. In 1902 we passed the Newlands Act as a separate proposition.

Mr. OVERMAN. That is as I understand. Now, why is this attached as a rider to the soldiers' compensation bill? I am inclined to give my support to it, but I have doubts whether I ought to vote for it as an amendment to the adjusted compensation bill. Why should this be put on as a rider when it has so much merit, standing alone, as a separate proposition?

Mr. PITTMAN. It took Senator Newlands 10 years of work along the lines I have stated to get this legislation for the West. I am inclined to think that we will wait 10 years to get this additional legislation for the West and the South unless we take every opportunity to pass it when we may.

Mr. OVERMAN. I think the Senator can get it through as a separate proposition.

Mr. PITTMAN. I do not think we can.

Mr. FLETCHER. Mr. President, I quite agree with what the Senator from Nevada [Mr. PITTMAN] has just stated in connection with the work and accomplishments of his late colleague, Senator Newlands; the Newlands Act is an everlasting monument to his memory. It was because of the successful operation of that system, and the great amount of good that had been accomplished in the West through it, that I wanted to see it nationalized, made nation-wide in application, if possible. I think the system ought to be extended to the reclamation not only of arid and semiarid lands but of swamp lands and overflowed lands. I see no reason why reclamation should not include reclamation by drainage as well as reclamation by irrigation. Hence, some time ago, on April 28, 1921, I introduced a bill which was indorsed by and had the approval and favor of the commissioners of agriculture of the various States. They sat here in Washington, and devised the plan embodied in the measure which I then introduced.

It was more comprehensive than the pending amendment, I think, and I believe that it would have accomplished greater good, and would have been, perhaps, more practical in its operation. However, the committee never acted upon it; and while I do not see in this proposal the possibility of very much being accomplished in the way of reclamation of swamp and overflowed lands, if our friends in the West want it, and there is some chance of its giving opportunities to former service men to avail themselves of these fertile swamp lands and overflowed lands, as it is in a way an extension of the system so as to include, in the language of the bill, "reclamation of lands by irrigation, drainage, or dikage," I shall feel disposed to support it.

There are practical difficulties, as mentioned by my colleague [Mr. TRAMMELL], so far as Florida is concerned, that would be encountered in connection with section 803. I can not very well see how that section can be successfully applied in Florida. It may be that a plan could be worked out under it. It is very general in its terms, and it is possible that there might be some drainage districts where it could be operated satisfactorily; but in the great undertaking of the State—to wit, the drainage of the Everglades—I can not quite see how it would be practical to make application of this measure to the conditions there.

In the first place there are no Government lands in the swamp and overflowed area. There are some State lands. In the Everglades the State is interested in lands which have not yet been sold. There are 4,000,000 acres in that area, all of them having been for ages covered practically all the time by water, and those 4,000,000 acres are in what is called a drainage district. There are over 1,000,000 acres of that drainage district in one county, the County of Palm Beach. The owners of these lands are paying drainage district taxes. The State having already constructed a number of canals, and there being now canals and roads leading into the center of the Everglades from the coastal regions on both sides, I can not see just how the plan proposed in this amendment can be superimposed upon the plan adopted by the State and upon the system there in operation.

With reference to this provision requiring 80 per cent of the excess lands to be reserved to be handled by the Secretary of the Interior by agreement with the owners, another great difficulty would be encountered. Conditions there differ in all sorts of ways.

For instance, a sugar company will want as much as 100,000 acres of land. One concern already has more than 130,000 acres of land, 5,000 acres already planted in sugar cane, and when I was there about a year ago there were 29 tractors at work extending and enlarging their undertaking. They may have in a few years a good many thousand acres more added, and they will want all of that holding themselves. They will not want to give up 80 per cent of what they have under actual cultivation, or perhaps any per cent of their present holdings. In that instance that concern will want a large amount of land. But for a settler who wants to grow vegetables or fruit, 40 acres, and perhaps 20 acres, would be fully as much as he would care to handle or could handle.

In that region one man will have his hands full to cultivate 20 acres of land, and especially there, where they can produce four crops a year on the same land. That is done in various portions of the State. In the potato region around Hastings, in the celery region around Sandford, and in sections in Manatee County and in other counties they produce four crops a year, 1 acre yielding 700 crates of lettuce, for instance, worth $5 a crate at the point of delivery, $3,500 being produced on 1 acre of land through one crop. That is not an uncommon thing. It may be that these settlers would not want over 20 or 30 acres each ordinarily, if they are growing vegetables, fruits, and products of that kind.

On the other hand, if a man wanted to go into the cattle business, he would want as much as 1,000 acres. Forty acres would not suit him at all. As I have said, if he wanted to undertake to grow sugar cane and put up a sugar mill, he would probably want 100,000 acres. So it would be very difficult to determine in advance the size of the different farms which would be wanted in the area of a given project. The districts have already been divided up, and I doubt very much if you can make applicable to those conditions the provisions of this amendment.

In the Everglades, already in a drainage district, as I have said, property owners paying drainage taxes all the while, it seems to me it would be almost impossible to superimpose a system like this upon the existing system of drainage, although I am willing, if it can be done, to give the people there an opportunity to avail themselves of this plan. There are other conditions obtaining elsewhere in the State under which perhaps new districts could be organized and this system applied.

It is estimated that there are 11,653,000 acres of overflowed lands, principally in the South. It is estimated that there are some 25,000,000 acres of swamp lands; that is, lands which are too wet for cultivation. In other words, there are 36,000,000 acres of land in this country, lying mainly in the Southern States, which can be reclaimed, and which when reclaimed are most fertile and productive. It is said there are some 152,000,000 acres of what are known as cut-over lands which might be available for cultivation, but they are not contemplated in this bill. The bill would, however, afford the possibility of reclaiming some 36,000,000 acres of swamp and overflowed

lands, which would be highly productive and which would add greatly to the agricultural resources of the country. A settler could very easily support a family on a few acres of such land, and, transportation and markets being favorable, make handsome profits.

It may be argued, why go into this at all? We have plenty of lands which are already dry enough to be cultivated or wet enough to be cultivated, and there is no need to spend the money to put water on land or take water off land, because we have plenty of land which can be used for agricultural purposes without that expenditure.

In the first place, these lands, when reclaimed either by irrigation or by drainage, as proposed in this measure, are most productive lands and susceptible of easy cultivation. The lands we have in excess of the present cultivated areas are lands mostly worn out and exhausted. In various portions of the country the soil has been washed away, and we have neglected our lands. We have not followed the course of our European friends in the older countries, where lands in cultivation a thousand years are better now than they were originally. We have allowed our lands to be washed away and wasted away. In a great many instances all the nitrogen and practically all the fertility are gone, and instead of building up those lands where it is possible to build them up, we have these areas which we can reclaim upon terms which will be advantageous to the settlers and to the country as a whole.

Besides, it will be recalled that from 1850 to 1900 we opened up about 30,000,000 acres of land for agricultural purposes, about 85,000 farms, about 6,000,000 acres a year. From 1900 to 1910, however, the number of farms increased only about 10 per cent, and from 1910 to 1920 the increase in farms in this country was only about 1.4 per cent. The population has been moving largely from the country to the cities and towns, so that cities and towns have grown in population seven and a half times as fast as the rural regions. It is pretty easy to calculate that in 20 years from now we will have 85,000,000 people living in the cities and towns in this country, and about 55,000,000 engaged in agricultural pursuits. So that we are approaching the time when we will need these lands, even if we do not already need them, and if, by reclamation, we can make available more fertile lands, which, by intensive cultivation, will increase production at a minimum of outlay and expense and labor, we ought to do it.

I strongly favor facilitating and assisting by every means in our power ex-service men to join the production forces of the country. I would afford to them every possible opportunity to establish themselves permanently in country homes.

The farmers of the country are entitled to every consideration that the Congress can extend to them. Think of it. The farmers of the United States dug out of the soil last year $14,755,000,000. The value of the corn crop in the United States was greater in dollars than the combined earnings of all the railroads leading out of New York. The value of the cotton crop of the United States was enough to establish seven banks as large as the New York Federal Reserve, and buy 12 more national banks. The hens laid $50,000,000 worth of eggs last year. Take the $2,000,000,000 worth of corn produced in the United States, and nearly that much in dollars in wheat, and nearly that much in cotton, to say nothing of the vegetables and the meats which have been produced by the farmers, thus supplying the food of the Nation, and it can be readily seen where are to be found the real factors in our prosperity, the hope, and the sinews of industrial activity, and the source of the Nation's wealth. Not the financiers, not big business, but farmers have caused two tracks of rails to be laid where only one was laid before. These plain people, living out in the woods and in the fields, about whom we hear nothing and know little individually, are the people who keep the balance abroad in our favor, because they are the people who furnish $500,000,000 worth of products for export every year.

These facts should encourage our young men, brave, as they have shown themselves, strong and home loving, willing to work, ambitious to succeed, to devote their energies to this field of unlimited possibilities. These people, the hope of the country, in war, in peace, who toil in season and out of season, taking all the chances, fighting all the enemies of plant life, having to contend with the seasons, and work without regard to any limitation of hours or conditions, are the people who are entitled to every consideration this Government can extend to them.

While I do not see any great amount of good which can come to Florida or to the South, or to that region where the swamp and overflowed lands lie, from this measure; our friends in the West want it, and there are some possibilities in connection with it which make me believe that it would be of some advantage in reclaiming lands, both by irrigation and by drainage, and promoting settlement, and I am going to vote for the measure.

With regard to my colleague's amendment, I am not so sure but what section 803, if applied to reclamation by drainage, would help development in the Everglades, and whether you provide that 80 or 40 per cent of the excess lands shall be turned over and prices fixed by agreement with the Secretary of the Interior is not so very material. What I would prefer would be to add, after the word "subjecting," the words "except in the case of reclamation by drainage," so as to leave out of the requirement set out in section 803 lands reclaimed by drainage. I do not believe you can make applicable to conditions in those regions that principle set out in section 803, whether you make it 80 per cent or 40 per cent, and what I would like to see, if it could be agreed upon, would be an amendment excepting reclamation by drainage from the provisions of that section. We have the bonds of the district. We have the taxing power back of the bonds. Under the district organization of the different States we need not furnish the money until the values are there upon which to issue the bonds. The bonds are put up with the Government and I do not see but what the Government is protected. While that principle has been found desirable in the West where the reclamation is by irrigation and has worked satisfactorily there, I can see under conditions such as we have in Florida that the difficulties would be almost insuperable if we attempted to follow that plan at all. I would much rather, if the Senator would agree, except reclamation by drainage.

Mr. McNARY. Mr. President——

The PRESIDING OFFICER (Mr. RANSDELL in the chair). Does the Senator from Florida yield to the Senator from Oregon?

Mr. FLETCHER. I yield.

Mr. McNARY. May I inquire of the Senator from Florida the exact place in the proposed amendment where he would insert the language he has in mind?

Mr. FLETCHER. On page 3, in section 803, in line 12, after the word "subjected" insert the words "except in the case of reclamation by drainage." So that it would leave that provision applicable to all other reclamation except that by drainage, which would cover the reclamation with which we have to deal. If the Senator could see his way clear to accept that, I believe my colleague would be willing to have it instead of his amendment.

Mr. TRAMMELL. I offered my amendment, but I am agreeable to withdrawing it. I would be very glad if the author of the pending provision would accept the amendment.

Mr. McNARY. I would like to inquire of the senior Senator from Florida concerning the proposed change. There would be no limitation upon the size of the farm unit in the case of reclamation by drainage. A project might be started by three individuals, each owning a thousand acres, which would be only in the interest of the private individual. The purpose, as I said to the Senator's colleague, is to permit the Secretary of the Interior to fix a practicable-sized farm unit, one that would sustain a family, in order to bring about the larger settlement of a given area, bringing more settlers from among the soldiers and encouraging intensified production on the farm. That is the reason for the 80 per cent provision. I think it contains much of merit, but under the Senator's proposition there would be no limitation at all in the case of acreage. I would very much prefer the amendment offered by the Senator's colleague, where there is a limitation of 40 per cent, than one without any limitation at all.

Mr. FLETCHER. I think under my amendment the restriction would apply everywhere to reclamation by drainage except as to the reservation of 80 per cent of the land in excess of the farms, no one of which can exceed 160 acres. The other provisions with reference to the size of the farm, the price, etc., would not be eliminated at all. The exception would apply only to the 80 per cent of the excess lands. I had in mind particularly, as mentioned by my colleague, for instance, the whole of the Everglades, 4,000,000 acres, which are now in one district. I do not see how we could specify the size of the farms in that district: As I indicated awhile ago, the man who wants to grow vegetables would not want over 20 acres; the man who wants to grow fruit and vegetables would not want over 40 acres; the man who would grow sugar cane might want 100,000 acres. The man who would want to establish a cattle ranch would want 1,000 acres. I hardly see how we can fix upon the size of the farms within that whole area of millions of acres of land.

Mr. McNARY. I will say to the Senator from Florida that the definition of the farm unit is found on page 2, and the pur-

pose of the limitation of area is to determine in each instance the number of acres in the farm unit. If I make application with the idea in mind of raising celery, perhaps 5 acres would satisfy me, while my neighbor who would want to raise oranges would, of course, want more land. But there must be some limitation upon the acreage one can hold, otherwise the purpose of the bill is entirely destroyed. It is not the purpose to reclaim for a few large landholders. That is not the purpose of the bill. That must come in another bill.

Mr. FLETCHER. I understand that, but can the Senator give any reason, for instance, in this vast area if an enterprise is started to produce sugar and build a sugar mill, why they should be limited to 160 acres?

Mr. McNARY. Yes, it is very clear to me.

Mr. FLETCHER. They could not accomplish anything with that limitation. It would require a division of the lands in a drainage project into small holdings. To the extent that it would give a chance for small settlers and facilitate development by intensive operations with a few acres, it would be helpful. The question in my mind is, Why limit the system in that way? If we can accomplish the purpose the Senator has in view and at the same time cover larger operations, why not do it?

Mr. McNARY. The land in its present condition is absolutely worthless, as are thousands and millions of acres of idle lands in the West. If a man can dispose of his excess acreage and make profitable the residue, he is a very fortunate individual; he will have something upon which he can pay taxes and produce for the national wealth. If the Senator's people would rather have their land remain in its present condition, they have that privilege. If they want to come in and dispose of the acreage which they can not use at all, and make some of it profitable that they retain, and thus build up the community by selling the balance, then the bill comes within the scope of that desire.

Mr. NICHOLSON. Mr. President, I shall appreciate it if Senators will refrain from interrupting me while I am briefly discussing the pending bill.

Mr. President, the soldiers' adjusted compensation bill was indorsed in the Republican platform of Colorado in 1920 in the following statement:

> We favor the passage of the soldiers' adjusted compensation bill as already adopted by a Republican House of Representatives in the Sixty-sixth Congress, and now pending in the Senate, providing for liberal options for all ex-service men on a financial basis which can be borne by the general public and which will not be seriously reflected in increased taxation.

The provisions of the bill now under discussion, Mr. President, undoubtedly comply with the specifications as recited from the Republican platform in Colorado, in that the financial burdens can be borne by the general public without being seriously reflected in increased taxation.

The twenty-third general assembly of the Legislature of the State of Colorado, at a special session held as recently as April of this year adopted the following resolution:

Senate Joint Resolution 4.

Be it resolved by the Senate of the Twenty-third General Assembly of the State of Colorado (the House concurring), That we regret and deplore the delay in the United States Senate in passing the adjusted compensation bill for service men of the World War; and be it further

Resolved, That copies of this resolution be forwarded to the Senators from the State of Colorado and to the President of the United States.

When the call to arms came, Mr. President, we conscripted the young men of the Nation and called them from their various occupations. With the exception of the young men who were attending our colleges and universities, all of those conscripted were receiving compensation for their services far in excess of the $30 per month, the sum allowed them by the Government while in the service of the Army and Navy. But let us follow this $30 per month and determine how much of it was actually received by the soldier. There was deducted each month from this $30, $6.40 to pay for his war-risk insurance; there was deducted $15 to apply on the allotment for the care of his dependents; out of the balance of $8.60, 75 per cent of the soldiers were obliged to pay $5 per month for the Liberty bonds for which they had subscribed. So that, as a matter of fact, the average cash received by the soldier was slightly in excess of $3 per month. The service men who bought Liberty bonds at par, confronted by unemployment upon their return home, were compelled to sell them at a heavy loss. Those who had remained at home and rolled up enormous profits by increased dividends on their invested capital, bought these bonds at the low figure, thereby profiting largely at the expense of the service men.

Mr. President, I was surprised to hear the argument advanced on this floor a few days ago that this adjusted compensation should be regarded in the light of a gratuity or as a reward for patriotism. Why, may I ask, Mr. President, was the $30 per month granted to these men as payment for their services? Are these men now to understand that the $30 which was paid to them during the time they served in the Army or Navy is to be considered as a price put on their patriotism, or are they to believe that this was a just recognition by the Government that they were entitled to this compensation for their services? Will any fair-minded man say that if they were entitled to the $30 per month in the first place that they are not entitled to an adjustment of their compensation now? If the former was justified, it is a very difficult matter for me to understand why the latter is not.

Mr. President, in sharp contrast with the inequitable basis of compensation which the Government provided for the defenders of the Nation is the equitable provision which the Government made in conscripting railroad properties.

It was agreed that the railroads should receive an adjusted compensation which would equal the average yearly earnings for three years prior to their being taken over by the Government. Further protection was afforded the railroads by the Government in providing that the roads should be returned to their owners at the expiration of governmental operation in as good physical condition as when they were taken over. Thus the railroads were protected by the Government against loss, both financial and physical, during the period of war or so long as the Government desired to operate them.

No question, Mr. President, has been raised to the settlement of claims arising under the Esch-Cummins Act, by which the railroads were made these guaranties, and these claims in the aggregate amount to more than $1,100,000,000. This amount would very nearly pay in cash the adjusted compensation provided for in this bill.

Mr. President, no such guaranty of equitable compensation was made to those inducted into the military and naval service. Had these men likewise been guaranteed compensation at the average rate for the three years prior to the war, the amount now owed to them by the Government would be far in excess of the so-called adjusted compensation provided in the present bill.

During the war wages and pay of those not in the military or naval service were greatly increased from time to time, while the labor of the service men was compensated for at the arbitrary rate fixed in the selective draft law.

Mr. President, in a statement covering personal income tax returns, based upon the actual tax returns made by individuals, the Bureau of Internal Revenue reports the total net income for 1916 to be slightly in excess of $6,000,000,000, while in 1918 the amount was nearly sixteen billions, or an increase of over 150 per cent. The Bureau of Internal Revenue further reports that in 1916 there were 437,000 personal returns reporting net income, while in 1918 the number had grown to 4,425,000, or ten times as many. Both the growth in the net income reported as well as the large increase in the number of persons earning net incomes is substantial proof of the general increase in compensation which was paid during the war period of which the service men had no opportunity to take advantage.

Not only did civilian labor and service receive an adjusted compensation, Mr. President, but capital received exorbitant profits for its employment in activities chiefly growing out of war necessity. Great corporations, such as the United States Steel Corporation and the Standard Oil Co. and its subsidiaries, increased their earnings enormously during the war and were enabled to pay greatly increased dividends to their stockholders.

The United States Steel Corporation in 1917 and 1918 earned a sum, in excess of its normal dividend and interest requirements, large enough to pay the amount of adjusted compensation provided in this bill if it were now paid in cash. The common stock of this corporation admittedly at one time had no value. A statement appearing in Moody's Manual shows that during the war period the average dividend earned on the common stock amounted to 40 per cent. Notwithstanding, Mr. President, the profiteering which these earnings on the one-time worthless common stock would indicate, Judge Gary, the chairman of the board of directors of the United States Steel Corporation, vigorously protests against the granting to the ex-service men the adjusted compensation provided in this bill and which in nowise is to be compared with the extraordinary earnings made by his corporation at the expense of the Nation in her hour of greatest peril.

It should not be forgotten that the other steel companies profited to a similar degree.

Mr. WADSWORTH. Mr. President, would the Senator object to answering a question at that point?

The PRESIDING OFFICER (Mr. KENDRICK in the chair). Does the Senator from Colorado yield to the Senator from New York?

Mr. NICHOLSON. Mr. President, I wish to be courteous to the Senator, but I requested when I began my remarks not to be interrupted until I had finished the main portion of my address.

Mr. WADSWORTH. I recollect now the Senator's request and I beg his pardon.

Mr. NICHOLSON. Mr. President, the Standard Oil Co. and its subsidiaries also profited enormously during the war period through the unconscionable increase in prices charged not only the domestic consumer but the Government in satisfying its war requirements.

I do not deny, Mr. President, the right of capital to earn a fair return on its investment, but I protest when the heads of great industrial enterprises refuse to recognize the right of the service man to have an adjustment made in his compensation for services rendered during the time their enormous profits were being made. Their refusal to recognize the claims of the service man for an adjustment of his compensation seems to me to be especially unjust and the very height of selfishness when we remember, Mr. President, that the labor or service of the returned soldier was and is his only capital.

Mr. President, the Government's requirements for war material provided under the cost-plus plan of contract were partly responsible for the vast fortunes thus created and for the swollen dividends thus paid. Employers did not resist requests for increased compensation by the workmen for the reason that their profits under the cost-plus plan would be greater after the increases were granted.

The Government, in the case of its own civilian employees, Mr. President, recognized the justice of increased compensation when Congress voted an additional compensation of $240 per annum to Federal employees not receiving in excess of $2,500 per year. This equitable adjustment in compensation to Federal employees is properly in effect to-day. This additional compensation of $20 per month amounts to two-thirds of the total compensation paid the service men. Are we, Mr. President, to neglect this equitable adjustment in the compensation of the service men when we have and are now paying the adjusted compensation to the civilian employees of the Government?

Mr. President, when the armistice was signed on November 11, 1918, our boys were gradually mustered out of the service and returned to their homes. Where were the men who, when the boys were marching to the railroad stations to entrain for duty, lined the streets, waving flags and vowing that nothing was too good for crusaders in the cause of democracy?

Democracy and civilization are now saved, and with them the money bags of the profiteer, whether he was the unpatriotic profiteer who overcharged the Government for the goods he sold or the workman who drew without shame the wages he did not earn.

Mr. President, how pitiful, and yet how true it is, that a great many of our men who had fought and suffered and bled for us returned to find their occupations gone, the industrial enterprises requiring their services before their entrance into the war closed down, or, if still operating, the positions and places left by them when answering the call of the country filled by men many of whom were successful in having themselves exempted from military service.

Upon demobilization and returning home, the ex-service men found the cost of living at its highest peak, and they were confronted by unemployment. And, Mr. President, through the lack of governmental preparation to meet their needs, over 1,000,000 ex-service men at one time were unemployed, and this gave rise to the embarrassing spectacle of charitable agencies being called upon to tide the men over the crisis.

Mr. President, in striking contrast to the treatment meted out to our returned service men was the provision made by the British Government to take care of its returned soldiers immediately upon demobilization and during the period of unemployment.

All temporary officers received on demobilization a substantial additional compensation, which was intended to assist them in returning to civil occupation. The amount varied according to length of service and rank held. It was calculated at the rate of four months' pay for the first year of service and two months' pay for each subsequent year or part of a year.

The amount spent is estimated at about £30,000,000.

A special war compensation varying from five to thirty-nine pounds, according to rank and length of service during the war, was paid to some four and a half million men.

The amount spent is estimated at £82,000,000. Approximately 4,000,000 men were granted four weeks' furlough on full pay and allowances as from date of dispersal to enable them to seek employment.

The amount spent is estimated at about £40,000,000.

Plain clothes, or an allowance in lieu, were given to all men on demobilization.

The amount spent is estimated at about £10,000,000.

(a) During the demobilization period ex-soldiers were provided with an out-of-work donation policy, valid for a period of one year from the date of their demobilization, entitling them to out-of-work donation during unemployment for 26 weeks—subsequently extended to 39 weeks.

(b) Subsequent to July 31, 1920, soldiers on discharge are credited with 90 contributions, for which Army funds pay £7 per man, and this entitled them to 15 weeks' benefit during unemployment after discharge.

It will be noted that the various advantages mentioned cost Great Britain approximately $800,000,000 at the present rate of exchange.

I also wish to call attention, Mr. President, to the liberal treatment accorded by Canada to the men who were in her military service during the World War.

The actual cash compensation paid by Canada to her soldiers amounted to $170,000,000. The war-service period embraces, as in the case of the United Kingdom, 4 years 3 months and 7 days.

Mr. President, in 1917 the Canadian Government passed the soldier settlement act to assist returned soldiers in settling upon the land. The main provision of this act granted ex-soldiers 160 acres of land and a maximum loan of $2,500 to assist in equipping and operating his farm. There are under the provisions of that act and amendatory acts thereto provisions to loan settlers purchasing land through the Canadian settlement board—

1. Four thousand five hundred dollars for the purchase of land.

2. Up to an amount of $2,000 for the purchase of live stock and other equipment.

3. Up to an amount of $1,000 for the erection of buildings and other improvements.

Ex-service men already owning agricultural lands are entitled to a loan of $3,500 for the removal of encumbrances upon their farms. They are also allowed an additional loan of $3,000 for the purchase of live stock, implements, and improvements. The various classes of loans mentioned are received on amortization terms spread over a period of 8 to 25 years.

Over 66,000 men have applied for these farm advantages. More than 43,000 men have been qualified to receive them. The total loan to these 43,000 men is $83,884,210.61.

Mr. President, if Canada, a country with such limited financial resources as compared with those of the United States, and which has borne a heavier burden by reason of the war, can thus extend to her ex-service men such equitable compensation, it is hard to understand the theory upon which the members of the "anvil chorus," who profiteered to such an extent during the war, can urge that our Government should neglect the duty which it owes to the veterans of the World War.

Mr. President, while we have been neglecting the just obligation we owe to the returned soldier, the various nations to whom we have loaned over $10,000,000,000 deferred the payment of the interest on their loans. In the aggregate this interest amounts to over $1,500,000,000 and this money was available to them to take care of their demobilized soldiers. In addition to the deferred interest payments, our Government, after the armistice, loaned to foreign nations $1,500,000,000 of the money resulting from the sale of Victory bonds and which was a surplus in our Treasury. This amount would have enabled us then and there to discharge in cash our obligation of adjusted compensation to our returned ex-service men as provided by this bill. Thus, Mr. President, these countries who were borrowing from us were enabled to adjust the compensation of their ex-service men at the expense of the ex-service men of the United States.

The gross debt of the United States in August, 1919, exceeded $26,500,000,000. On July 31, 1922, it had been reduced to approximately $23,000,000,000, or an amount, in round numbers, of $3,600,000,000. How can the Secretary of the Treasury defend the position he is occupying in opposing the adjusted compensation bill on the ground of the financial stress of the Government when it has been able to retire over $3,600,000,000 of public debt? This must represent an increase in revenue over expenditures. The Government has retired this substantial amount of public debt while at the same time neglecting a just compensation settlement, long deferred, to those who entered the defense of the Nation in its most critical hour.

Mr. President, in the light of this fact regarding the debt liquidation of the Nation, objection to this adjusted compensation on any financial grounds must be regarded as an excuse rather than as a substantial reason.

During the last two fiscal years ending June 30, 1922, we received a net gain of nearly $1,000,000,000 of gold into the country by excess importation, which has practically all found its way into the banking reserves of the Nation. After satisfying all legal requirements, the surplus gold held by the Federal reserve system on August 16, 1922, amounted to $1,695,000,000. This amount of gold would serve as the basis for an extension of credit of approximately $47,000,000,000, and this amount of credit does not include an additional amount which could be expended on the basis of reserves held by banks outside of the Federal reserve system.

It has been estimated by the Senator from North Dakota [Mr. MCCUMBER] that the present cash requirements for the year 1923 to finance the adjusted compensation under the present bill will amount to no more than $78,000,000. It is not conceivable, Mr. President, that such an amount would in any way involve an inflation of credit or produce a strain on the financial resources of the Nation at the present time. The Treasury has little difficulty in raising many times this amount. In fact, the investing public, with its surplus funds, would absorb many times this amount, and would be glad to have the opportunity.

Mr. President, on August 8 the Treasury Department announced that $1,000,000,000 of Victory notes outstanding, which do not fall due until May, 1923, would be retired in December of this year. To accomplish this funding operation the Treasury Department has had no difficulty in disposing of Treasury notes, each offering being many times oversubscribed. This indicates the ease with which the Government can obtain money in sufficient amount to meet any obligations which arise under the adjusted compensation bill.

Mr. President, I am opposed to the cancellation of any part of the debt owed to us by foreign countries. The debt owed to the United States by foreign countries amounts in principal to more than $10,000,000,000. The amount of principal owed by the British Government alone is in excess of $4,000,000,000. It is anticipated that the British Government, under the refunding operations now contemplated, will ask that the more than $600,000,000 of interest in arrears to April 15 and May 15 be funded with the principal, but that it will pay the interest from those dates in October and November, an amount of approximately $100,000,000.

During the month of July the net importations of gold into the United States exceeded $42,000,000, of which $38,000,000 came directly from England. This shipment of gold from England is regarded as the initial step in arranging for the payment of interest this fall in an amount which alone would more than pay for the estimated cost for the year 1923 under the adjusted compensation bill. No impairment of debt principal is involved in this transaction, as the interest alone on this single payment on the British debt will more than carry the cost.

Mr. President, from these facts with reference to the present status of our financial condition and the prospective revenue to the Government it is very apparent that no additional provisions will have to be made to meet the cash obligations under this bill. No substantial increase in the tax burden will be necessary. This removes entirely one of the arguments which was formerly made and is now selfishly adhered to by the opponents of this bill who seek to protect their enormous war profits.

Will anyone say, Mr. President, that if we had been forced to sacrifice 1,000,000 American lives in the World War we would have withdrawn from the conflict? Will anyone say that if the war had lasted one, two, or three years more we would have failed to find the resources to prosecute the war to a successful conclusion? Yet there are those who say that we can not find the funds with which to pay this adjusted compensation to the defenders of the Nation.

It is estimated that during the time these men were training in the cantonments or fighting valiantly for us on the battle line the Nation's wealth increased by some $50,000,000,000. During this same time the Nation's debt had increased by some $25,000,000,000. On their discharge from military service these men who were denied any opportunity to participate in this increase in the country's wealth found themselves confronted by an inescapable burden of taxation arising from the increase in the public debt from $10 per capita to $228 in 1920. As a matter of equity, this adjusted compensation is made more necessary because of these facts.

Mr. President, the Congress compensated the railroad companies by guaranteeing pre-war earnings, and protected the properties from physical impairment to the extent of $1,100,000,000. Contractors who supplied ships and other war equipment were paid a 10 per cent profit, and the Government has settled and is settling contractors' claims for losses sustained in the amount of millions. The Congress enacted the war minerals relief bill, under which payment has been and is being made for losses sustained by those who produced war essential minerals. To its civilian employees the Government is paying an adjusted compensation of $240 per annum. The total of this additional compensation for the entire period during which it has been in effect amounts to $840 for each employee, which, if paid to the 4,000,000 ex-service men, would amount to $3,360,000,000, or more than double the amount of compensation provided for in the present bill if paid in cash.

Mr. President, when the selective service bill was before this body I was not a Member of it; but I can not understand why any Member of this body who voted for the selective service bill, and also voted to pay those engaged in every kind of war activity an increased compensation, and protected them from every kind of loss, can now oppose the granting of this adjusted compensation to our ex-service men. The Congress should not longer delay the discharge of this just obligation to the ex-service men, who we must admit were the key men in winning the war.

Mr. WALSH of Montana. Mr. President, when the armistice was signed, and the work of repatriation of our soldiers was in progress, the public mind, moved by a sense of gratitude for the splendid work they had accomplished, was directed quite generally into the devising of plans by which the gratitude of the Nation might be exhibited toward them. In that state of mind it was quite natural that some plan of land settlement should have become uppermost in the thought of those who were directing attention to it.

After the Civil War the veterans of both armies—both the Confederate and the Union armies—practically stampeded the vacant lands of the West, and were the chief factor in the settlement of the regions west of the Mississippi and Missouri Rivers. It was realized, however, that all of the available lands capable of tillage without reclamation had been appropriated, and accordingly it was recognized that some plan of reclamation should form a feature of the land-settlement project for the benefit of the soldiers.

It will be recalled that the then Secretary of the Interior, the late Franklin K. Lane, was foremost in calling public attention to the wisdom of this land-settlement plan for the returning soldiers. He devoted his abilities to arousing public sentiment in favor of a project of that character. He circularized the soldiers themselves and learned by direct communication with them of the great desire on the part of vast numbers of these soldiers to avail themselves of some wise land-settlement plan. He secured from the Congress of the United States an appropriation of $100,000 for the purpose of investigating the lands available for reclamation and for settlement; and in submitting a very elaborate report that he made concerning that subject he said to the Congress of the United States as follows:

> Herewith I transmit a report upon the development of the unused lands of the country, made under the authority of the last Congress.
>
> This report in much detail gives the possible projects which are available in the various States. The field has not been fully covered, because the appropriation made was not sufficient to go further. We have, however, gone far enough to demonstrate that in most of the States—North, South, and West—there are great bodies of unused lands which with drainage or clearing can be made available at a comparatively small cost for farms.
>
> This work has been carried on in the prospect that the Congress would see fit to give to our returned soldiers and sailors an opportunity to go upon these lands under proper guidance and convert them into home farms for themselves. There are one or more bills pending before Congress having this end in view. It is a work that must, in my opinion, be undertaken soon if we are to maintain our position as a self-supporting people. And surely no other group deserves this opportunity more than the soldiers in the late war. I would not urge this as an exclusive method of stimulating and recognizing the ambition of our soldiers, but I believe it to be one method that carries good and no harm to the country and to the men themselves.
>
> If the objection is raised that the Federal finances will not support the drain proposed, I beg to advise that I am authoritatively informed that there will be no difficulty in selling $500,000,000 in Government 3½ per cent nontaxable bonds, which would be sufficient to cover the expenditures contemplated under the Smoot-Mondell bill. This would be in the nature of a reimbursable fund, the whole being repaid over a long period by the farm owners.

Mr. President, from that time down to this the land-settlement feature has, I believe, been an essential part of practically every bill providing adjusted compensation for the soldiers of the late war.

I can not understand upon what theory the Finance Committee of the Senate should have deemed it wise to excise that feature entirely from the measure before us. We spent $100,000 in carrying on an investigation into the availability of lands for a land-settlement scheme, and then the project was summarily dismissed without any explanation whatever, so far as I

have been able to discover. To my mind it ought to be a redeeming feature of the measure, even to those who are most strenuously opposed to it in its general aspects.

It is suggested, however, as it seems to me rather without force, that this measure now offered as an amendment to the pending bill has no place upon it because it is not connected with the direct object of the bill. To my mind it is particularly appropriate here. The best thought that has been given to this subject has resulted in the measure which is now tendered as an amendment to the pending bill. It gives to the soldier a very decided and a very substantial advantage. With respect to all Government lands which may be included within a project he has the right over and above anybody else to enter those lands. With respect to all other lands within a project held in private ownership, over and above such an amount as shall be considered by the Secretary of the Interior as adequate to the support of a family, and not to exceed 160 acres, he has a preference right to purchase, at the price at which the lands are now worth, before they shall be reclaimed, adding thereto only the actual cost to the Government of the reclamation of the land. That this is a most substantial advantage will be recognized when we realize that upon every opening of Government lands in the West there is always a rush to secure the lands, and ordinarily it is necessary to resort to some lottery scheme or other plan of distributing the choices by chance.

Moreover, these reclamation projects, both by irrigation and by drainage, are very often carried on by private enterprise, with the expectation that when the lands are reclaimed they will be sold at a very substantial profit to those who undertake their reclamation, and they are ordinarily put upon the market at a very great advance upon the price. The soldier, thus given an opportunity to acquire these lands at their actual cost to the Government, is given, as it seems to me, a very decided advantage and benefit.

I feel some considerable regret that any opposition to this plan is voiced from this side of the Chamber, and particularly from the South, where I was of the opinion that the project of reclaiming the swamp lands would be regarded as an especially inviting and alluring one. I can very well understand the opposition that has been voiced to the provision of the bill to which the Senator from Florida desires to make an amendment. It is desired that the lands to be reclaimed might be disposed of in very large tracts, of possibly 500 or 1,000 or even 10,000 acres, for the culture of sugar cane, or as cattle ranches, or something of that kind. Of course, to those who look to the disposition of lands in that way no particular encouragement can be found in this bill. That idea is entirely inconsistent with the fundamental idea upon which this amendment is framed; that is, to have the Government aid in the reclamation of these waste lands, in order that they might be utilized and appropriated by actual settlers in small areas, and thus become homes for those who enjoy the benefit of the Government in this regard. That being the case, it would be entirely inconsistent with the fundamental idea of the bill to leave the area which could be appropriated by any one individual, or which could become the property of any one individual, unlimited in amount.

It was suggested in the course of the discussion that three individuals owning 5,000 acres of land each could constitute themselves into an irrigation district comprising 15,000 acres, and thus secure the aid of the Government as provided in this bill. But we could easily conceive that one man owning the entire 15,000 acres would constitute himself an irrigation district and secure the benefit of this act, and having improved the land sell the land out at such figure as was satisfactory to himself. But it is not contemplated that the Government of the United States should get in for the purpose of aiding in the exploitation of any such real estate scheme, and therefore it must be provided, if the fundamental idea is to be carried out, that those who own lands within a district in excess of the amount deemed sufficient for the support of a single family should agree to sell those lands at a price to be agreed upon beforehand between them, the Secretary of the Interior, and the actual settlers upon the lands.

That idea has been dominant in this plan of reclamation at all times, even from the time the reclamation act was passed, in 1902, down to this day. But strangely I observe that the Senator from Florida himself at one time embraced this idea, and incorporated it in a bill which he introduced for the consideration of the Senate.

I refer to the senior Senator from Florida [Mr. FLETCHER], who is not in the Chamber now, but I direct the attention of his colleague to section 11 of Senate bill 3942, introduced in the Sixty-sixth Congress by the senior Senator from Florida [Mr. FLETCHER]. This was a plan for National and State cooperation in the reclamation of waste lands, the general idea being quite in harmony with that of the amendment now before the Senate. Section 11 reads as follows:

SEC. 11. That owners of land as herein provided, situated in any district, who may desire to take advantage of the provisions of this act, shall enter into an agreement with the Secretary of the Interior to sell, within a period not to exceed 10 years from the completion of the works of such district or such portions of such works as provide for the reclamation of such lands, all areas of such land in excess of such maximum area as he may, in his discretion, establish for such district; such maximum area, however, not to exceed 160 acres when, in his opinion, such land is most suitable for agriculture, nor 640 acres when, in his opinion, such land is most suitable for animal husbandry; and such excess areas shall be sold in farms of such size as will, in the opinion of the Secretary of the Interior, support a family in comfort, at such prices and on such terms of payment as are provided in such agreement; and such terms of payment shall provide that no transfer, assignment, mortgage, or lease made during a period of five years from the date of sale shall be valid without the approval of the Secretary of the Interior, unless full payment of the purchase price of such land shall have been made. Such agreements shall be executed by the owners of not less than 90 per cent of the total area of all holdings within such district which exceed the limits so established by the Secretary of the Interior before such project shall be finally approved by him. Such agreements shall confer an irrevocable power of attorney upon the Secretary of the Interior to sell such land through such agency as he may designate, in pursuance of the terms thereof, whenever he may deem it for the best interests of the project to effect such sale, and to sell any of such land remaining unsold after the expiration of such 10 years at such price as it will bring at public auction.

I do not believe that anyone can controvert the wisdom of the policy expressed in the section of the amendment under consideration. Nor do I believe that the amendment ought to have the approval of the Senate unless the area which one man may hold within a project is limited as indicated therein. Indeed, I believe that if any amendment of that provision is to be made at all, the amendment ought to be made to make it conform to the views which were entertained by the Senator from Florida in 1920, by increasing the amount from 80 per cent to 90 per cent, rather than reducing it, as now suggested, to 40 per cent, or any amount less than 80 per cent.

I am happy to observe that thus far, at least, in the discussion of this matter, no word has been uttered against the wisdom of the policy of the reclamation of the arid lands of the West. That policy, I believe, has vindicated itself from every point of view, until even the prejudices which were once harbored with respect to it have all but disappeared. However, there appeared in one of the local papers about 10 days ago an article concerning the reclamation projects carried on by the Government, which is so unfair in its character and so misleading in its nature that I feel impelled to devote a little attention to it.

It was suggested in that connection—and the same idea has been advanced on the floor of the Senate from time to time—that the Government has already expended on these reclamation projects $132,000,000, and that during a period of 20 years but $13,000,000 of that has been returned to the Government. It is then added that it was contemplated in the beginning, at the time the act was passed in 1902, that the entire amount should be returned to the Government in 10 years, and that now 20 years have already passed since 1902, when the law was enacted, and that during that entire period of 20 years but $13,000,000, 10 per cent of the total amount expended, has been returned.

How unfair that is will appear at a glance to those who attend to the matter. The act was indeed passed in the year 1902, and it provided that the amount which could be expended by the Government for the construction of any reclamation project should be returned to the Government by the owner or settler upon the land in 10 equal annual installments.

But, Mr. President, it was necessary at the outset to organize the Reclamation Service. It was necessary to make a survey of the entire country with a view to ascertain what particular project was possible and what was not, and eventually to decide upon the project or projects which were to be undertaken. Of course that consumed some years before a decision was eventually made and work was begun upon any project at all. Now, Mr. President, it was never contemplated that the settler or the landowner should begin to pay for the construction before the construction was completed or before it was begun. It was contemplated that when he got the water he should then be able to raise crops, and out of the crops thus raised he should pay back to the Government in 10 annual payments the amount expended. So that the great works were undertaken.

In the next place the amount of money available for the prosecution of the projects was limited. There was no money available, except a loan of $20,000,000 made by the Government, except as money should come in from the sale of public lands,

all of those moneys going into the fund; and no more was available for the prosecution of the work than was thus coming into the fund from year to year.

Mr. JONES of Washington. Mr. President——

The PRESIDING OFFICER (Mr. KENDRICK in the chair). Does the Senator from Montana yield to the Senator from Washington?

Mr. WALSH of Montana. I yield.

Mr. JONES of Washington. Will the Senator permit me, before he gets too far away from his suggestion with reference to the fixing of the amount that should be paid, to add that the amount which the settler would have to pay could not be determined until the project was completed?

Mr. WALSH of Montana. It was my purpose, of course, to refer to that. I want to endeavor at the outset to impress Members of the Senate who follow me with the idea that this was in the nature of a stupendous undertaking. Nothing like it, nothing of any such magnitude, had ever been undertaken before in this country. Our engineers were unfamiliar with the conduct of these great enterprises. It should be borne in mind that even before the act was passed in 1902 most, if not all, of the opportunities to irrigate land by means of cheaply constructed works had already been embraced, and it was only by the construction of works covering great areas and involving huge engineering enterprises that it was possible to work at all. Some of the enterprises were among the great engineering feats of the world. They involved the building of unusually high dams, two of them the Arrowrock of Boise project, Idaho, and the Shoshone of the Shoshone project, Wyoming, are the highest in the world. In addition, the Elephant Butte Dam of the Rio Grande project, New Mexico; the Roosevelt Dam of the Salt River project, Arizona; the Pathfinder Dam of the North Platte project, Wyoming; Belle Fourche Dam of the Belle Fourche project, South Dakota; and the Lahontan Dam of Newlands project, Nevada, are among the largest structures of their kind. Besides this, the service has constructed Gunnison Tunnel, the longest tunnel in the world used for conveying irrigation water, being 60 miles long. In addition, the service has built in connection with its reclamation projects other notable tunnels both as to length and size. Among them may be named the Strawberry Tunnel in Utah, more than 3¾ miles in length, feeding the Strawberry Valley project, Utah; the Corbett Tunnel, of the Shoshone project in Wyoming, 3½ miles long; besides a number of others from three-quarters of a mile to nearly 1½ miles in length. For the conveyance of water to the land, about 500 miles of canals of unusual size, besides thousands of miles of canals forming part of the distribution system, have been built, the total length of canals constructed being 13,400 miles. For the carrying out of works of such magnitude many years of time must be allowed.

We were obliged to allow much time, and it was not until the year 1913 when any of these projects were completed. I shall refer to that directly.

Now, Mr. President, it was provided in the law that the cost of the construction of the projects should be apportioned to the lands which were capable of being irrigated by them, which were to pay proportionately for the construction. Manifestly it was impossible to determine how much should be paid by any particular tract of land until the entire cost of construction was ascertained. In other words, it was impossible to tell how much the annual installments should be until the project was actually completed. As I said, the projects were not completed until in comparatively recent years. The following table gives the dates:

Boise, Idaho	1917
Carlsbad, N. Mex	1919
Huntley, Mont	1918
Minidoka, Idaho (2 divisions)	1916
North Platte, Nebr. (1 division)	1915
Okanogan, Wash	1917
Salt River, Ariz	1917
Shoshone, Wyo. (1 division)	1918
Uncompahgre, Colo. (but by contract first payment becomes due Dec. 1, 1923)	1918
Yakima, Wash. (2 divisions)	1913–1917
Yuma, Ariz	1918

So that, as will be observed, it was impossible to determine how much should be paid, for instance, by the Yakima, Wash., division until 1913, and impossible to determine how much should be paid by each acre of land under the Boise, Idaho, project until 1917. Accordingly no payments became due on any of the projects until they were completed at the dates which I have indicated. Then it was determined and the payments then, and then only, were begun. So that instead of the amounts which have been returned having been returned during the past 20 years, the amounts as a matter of fact have been returned chiefly since 1915, no project antedating that except one division of the Yakima, Wash., project, which was completed in 1913.

Mr. UNDERWOOD. Mr. President, will the Senator allow me to ask him a question?

Mr. WALSH of Montana. Certainly.

Mr. UNDERWOOD. Was not the delay also caused to some extent by the enactments of Congress providing that in some particular cases payments were postponed?

Mr. WALSH of Montana. Those are very recent. That has only occurred in very recent years.

Mr. UNDERWOOD. That was caused by the action of Congress and not by the original plans.

Mr. WALSH of Montana. Yes; that was caused by the action of Congress, and that was, by reason of the depressed condition of agriculture generally throughout the country, only during the last two years. Now, Mr. President, let us see, when the payments became due, how well those from whom payments were due responded. I have here the last number of the Reclamation Record, for the month of July, 1922, containing a table showing the repayments made by the various projects arranged according to the percentage paid of construction charges due. I shall ask leave to print the table in the RECORD; but I invite attention to the fact, as disclosed thereby, that in the case of the Orland, Calif., project every dollar of it that is due has been paid. The payments are 100 per cent. In the Klamath, Oregon-California, project the payments are 99.2 per cent of the amount due. In the case of the Newlands project the payments are 95.6 per cent of everything that is due. In the case of the Umatilla, Oreg., project 95.6 per cent has been paid. In the case of the Yakima, Wash., project 94.5 per cent. In the case of the Huntley, Mont., project 93.8 per cent. Bear in mind that in view of the terrific losses to which the farmers all over the country have been subjected during the last few years. I forebear reading further from the table, but the facts as a whole will be found therefrom. I ask permission to include the table in the RECORD without reading.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Repayments arranged according to per cent paid of construction charges due.

Project.	Construction charges due.	Repayments.	Per cent paid.
1. Orland, California	$168,700	$168,700	100.0
2. Klamath, Oregon-California	479,600	475,900	99.2
3. Newlands, Nevada	506,400	484,400	95.6
4. Umatilla, Oregon	315,000	301,200	95.6
5. Yakima, Washington	2,902,400	2,743,400	94.5
6. Huntley, Montana	365,700	343,000	93.8
7. Yuma, Arizona-California	885,500	820,700	92.7
8. Okanogan, Washington	43,600	40,200	92.2
9. Minidoka, Idaho	2,570,500	2,352,900	91.5
10. Sun River, Montana	148,800	134,600	90.4
11. Carlsbad, New Mexico	364,400	319,200	87.6
12. Strawberry Valley, Utah	355,800	309,800	87.1
13. Shoshone, Wyoming	684,800	578,300	84.4
14. Boise, Idaho	1,307,500	1,099,400	84.1
15. North Platte, Nebraska-Wyoming	1,980,100	1,541,500	77.8
16. Belle Fourche, South Dakota	631,500	456,100	72.2
17. Salt River, Arizona	1,219,900	609,900	50.0
18. Lower Yellowstone, Montana-North Dakota	[1] 41,100	[1] 41,100	.....
19. Grand Valley, Colorado	0	0	0
20. Uncompahgre, Colorado	0	0	0
21. King Hill, Idaho	76,700	0	0
22. Milk River, Montana	0	0	0
23. Rio Grande, New Mexico-Texas	0	0	0
24. North Dakota pumping, North Dakota	0	0	0
Total	15,048,000	[2] 12,820,300	85.2

[1] Accrued and unpaid charges canceled under contracts with irrigation districts; payment on construction charges to begin again in March, 1924.
[2] Estimated at $13,000,000 on June 30, 1922.

Mr. WALSH of Montana. I might add that during the year 1916, on all the projects, the amount paid was 88.6 per cent of the amount which was then due. In 1917 the payments were 91.9 per cent; in 1918, 92.3 per cent; in 1919, 93.5 per cent; in 1920, 95.2 per cent; in 1921, 89.3 per cent; and in 1922, 85.9 per cent. I think the farmers upon the irrigation projects, considering the disaster which overcame agriculture of the country from one end to the other, have done so well as to be entitled to much commendation from the Congress of the United States for having met their payments to the extent of 85 per cent of the amount that was due. I dare say there is not a line of business which during the last two years can show payment so near the amount that they were entitled to expect.

Now, another thing in connection with this matter. It is pointed out in this connection that during the last 10 years crops have been raised under these various irrigation projects

to the amount of $426,000,000. That, it will be observed, is nearly three times the entire amount that has been expended by the Government in the development of the various projects. But that does not tell the whole story. It is shown most vividly by the diagram which is suspended from the wall of this Chamber. There are disclosed the great communities that have been built up, thriving cities that have been developed which consume enormous quantities of the products of the eastern and middle sections of the country, as well as of the South. So that the benefit of the development is not by any means confined to the localities in which the projects are found, but extend throughout the entire country.

But, Mr. President, it is said, notwithstanding the facts, that the payment has been the meager sum of $13,000,000. As pointed out, the payments are being made substantially as fast as they become due, as fast as they are required to be made under the laws of Congress. It is a matter of gratification that it is so and that the produce is so great. But quite inconsistently with this it is pointed out in the article to which reference has been made that it is insisted that the return from these projects is relatively inadequate. It is conceded that the average return per acre from the lands under the projects is of a value of something more than $42 per acre, while the average throughout the country at large is not to exceed $17 per acre. But it is said that as a matter of fact the average is raised by reason of the exceedingly high productiveness of the Okanogan and Yakima projects in the State of Washington, where fruit culture is carried on very profitably. That is undoubtedly true, as these two projects return products of the value of $116 per acre in the one case and something more than that in the other.

Mr. WATSON of Georgia. I did not catch the first figures the Senator gave as to the value of the products. Will he repeat those figures?

Mr. WALSH of Montana. The total for 10 years was $426,000,000. During the period that the $132,000,000 was expended by the Government, the projects returned products of the value of $426,000,000. But if the two Washington projects are excluded from the computation, the average yield per acre of the lands under these projects is something over $32, almost twice as much as the average yield for the country at large.

Mr. JONES of Washington. Mr. President——

Mr. WALSH of Montana. I yield to the Senator from Washington.

Mr. JONES of Washington. I would suggest that in the average of the country at large are included the fruit areas of other sections of the country.

Mr. WALSH of Montana. Undoubtedly. A very unfair comparison is made with the yield per acre in the State of Connecticut and, possibly, in the State of New Jersey; but it is realized, or it ought to be realized, on all lands that agriculture in those States consists very largely of truck farming, the yield of which ought to run to $300 or $400 per acre in order to be profitable at all, considering the high rental that is paid and the labor cost in the production of crops of that character.

The work, Mr. President, which is carried on by the Government in the construction of reclamation projects is one which does great honor to our country. It is a policy which I believe is thoroughly approved by the public sentiment of the entire country as expressed from time to time by our leading public men, including the successive Presidents of the United States. It would be unfortunate if, through any misleading statements with respect to it, any hesitation should be exhibited toward the continuance of this policy, and particularly, Mr. President, it seems to me it would be singularly unfortunate if we forgot this very appropriate time to give the approval of Congress to it in connection with the measure that is now before us. I believe that the gratitude of the people of the Nation could be exhibited to the deserving soldiers in no better way than to make provision for the reclamation of waste lands and giving them the first opportunity to acquire them as provided in the amendment tendered by the Senator from Oregon [Mr. McNARY].

Mr. RANSDELL obtained the floor.

Mr. CURTIS. Will the Senator yield while I submit a request for unanimous consent?

Mr. RANSDELL. I am glad to yield to the Senator for that purpose.

Mr. CURTIS. I ask unanimous consent that when the Senate concludes its business to-day it take a recess until 11 o'clock to-morrow morning.

Mr. WADSWORTH. Let me ask the Senator if it is contemplated to attempt to hold the Senate here this evening?

Mr. CURTIS. There is a desire to conclude as much of the debate as possible to-day, and it was hoped that Senators might remain here a little after 6 o'clock and dispose of as many amendments as possible.

Mr. WADSWORTH. I have no objection to taking a recess as suggested by the Senator from Kansas, but I had hoped that Senators in charge of the pending bill would not attempt to keep the Senate here beyond the hour of 6.30.

Mr. CURTIS. I shall later on have a consultation with the Senator from North Dakota [Mr. McCUMBER] who has charge of the pending bill.

The PRESIDING OFFICER. The Senator from Kansas asks unanimous consent that when the Senate concludes its session to-day it take a recess until 11 o'clock to-morrow. Is there objection? The Chair hears none, and it is so ordered.

Mr. TRAMMELL. Mr. President, will the Senator from Louisiana yield for a moment before he begins to address the Senate? I do not desire to interfere with his speech.

Mr. RANSDELL. I shall be glad to yield to the Senator from Florida.

Mr. TRAMMELL. I sent to the desk a little while ago a proposed amendment to the pending bill. I desire to withdraw that and I now send to the desk an amendment covering the same question, and ask that it be read prior to the remarks of the Senator from Louisiana.

The PRESIDING OFFICER. The Secretary will read as requested.

The ASSISTANT SECRETARY. On page 3 of the printed amendment of the Senator from Oregon [Mr. McNARY], in line 15, after the word "agreements," it is proposed to insert the following:

Provided, That in his discretion the Secretary may require not exceeding 50 per cent of the excess lands within the project to be subjected to disposal by authority of the Secretary to settlers.

Mr. RANSDELL. Mr. President and Senators, I have given careful consideration to the amendment offered by the Senator from Oregon [Mr. McNARY], and I wish to say that I favor it unqualifiedly. I believe it is a very wise measure which he suggests, and I sincerely hope that it will be accepted by the Senate and become a part of the adjusted compensation bill. I strongly favor this bill and believe it would be greatly strengthened if the amendment of the Senator from Oregon should be made a part of it.

The amendment proposed by the Senator from Oregon would assist in providing farms for the soldiers as contemplated by the adjusted compensation bill. Unfortunately, we have no public lands of which the soldiers could get possession if they desired to do so. The amendment of the Senator from Oregon would provide lands, and the most valuable lands in this country, for when the arid lands of the West are reclaimed by irrigation and the wet lands of various sections are reclaimed by drainage they will be just as productive as are any lands in the Union; and the soldiers ought to take possession of good lands only; they ought not to be placed on any but very fertile and productive lands.

Mr. President, I doubt if Senators, unless they have looked very carefully into this matter, especially the Senators from the South, are aware of the wonderful possibilities of this measure for the reclamation of vast areas in their own States. Permit me to call to their attention a few figures showing, by States, the areas of arid and wet lands in the Union susceptible of reclamation which have been prepared by the Reclamation Service. I shall summarize and not bore the Senate with many details. I find that, according to the Reclamation Service, the wet lands of the United States aggregate a little over 94,000,000 acres. Of that 94,000,000 acres, 56,825,000 are in the Southern States. In other words, sir, a little over three-fifths of all the wet land of the United States lies in the South.

Those lands are located about as follows: In Florida, 19,000,000 acres; in Georgia, 2,700,000 acres; in Arkansas, 3,500,000 acres; in Louisiana, 10,200,000 acres; in Mississippi, 5,750,000 acres; in North Carolina, 2,750,000 acres; in South Carolina, 3,125,000 acres; in Tennessee, 1,000,000 acres; in Texas, 8,000,000 acres; and in Virginia 800,000 acres, or a total, let me repeat, in the South of 56,825,000 acres. That is a very large area.

Mr. President, I have always been immensely proud of my own State; it is a vast area, but it contains only 30,000,000 acres, while the wet lands of the South alone are nearly double the total area of the entire State of Louisiana.

Mr. SIMMONS. Mr. President——

Mr. RANSDELL. I yield to the Senator from North Carolina.

Mr. SIMMONS. I simply wish to ask the Senator if the figures he has given embrace all of the wet and overflowed lands

of the South or only those portions of such lands in that region which are possible of development by drainage?

Mr. RANSDELL. These figures were prepared by the Reclamation Service, but I will say to the Senator from North Carolina that, as I understand them, they embrace those portions of the wet lands of the South which are susceptible of reclamation, just as the same table, I will say to the Senator, gives the arid lands as aggregating 24,450,000 acres. Of course, the Senator and all of us know that if the arid lands of the entire West were included they would amount to a great deal more than 24,450,000 acres; but, as I understand it, the Reclamation Service in giving these figures state that there are something over twenty-four and a half million acres in the West which are susceptible of reclamation by placing water upon them, and in stating 94,000,000 acres as being the area of the wet lands in the entire Union, they mean there are that many acres which are susceptible of reclamation by proper drainage. Does that answer the Senator's question?

Mr. SIMMONS. That answers the question which I asked the Senator from Louisiana.

Mr. RANSDELL. Mr. President, these figures show that the amendment of the Senator from Oregon contemplates something very large; it is colossal. The amendment provides for lending the credit of the Government to the extent of $350,000,000. Of course, sir, if we reclaim all of those lands out West, and in the North, and the East, and the South, $350,000,000 would not begin to suffice, but it will make a little start. I imagine it would cost ten times as much to reclaim all these arid and wet lands.

This money is to be returned to the Government; it is not to be wasted or thrown away; but is to be carefully invested under the direction and control of the Interior Department. It is to be expended during a series of years, and every dollar of it is to come back to the Government. The reclamation cost of reclaiming each acre is to be added to every project, and when the lands are sold the cost thereof, including interest up to the date of the sale, is to be added to their cost.

In my judgment, sir, it is a wonderfully good business proposition. It simply means that the Government is lending its credit for the purpose of developing the waste places of the Nation. Away out West there are many arid lands which are now utterly worthless; and so to a considerable extent in the northern portion of the Mississippi Valley, all along the Atlantic coast, on the lower Mississippi, and on the coast of Texas, where alone there are 8,000,000 acres of lands needing drainage; there are vast areas which are worse than valueless now, but when improved, sir, as those lands will one day be improved, they will be as fertile and productive as any section of our country.

This is a wise provision, sir. It is an extension, in my judgment, of the reclamation act of 1902. I heartily indorse everything which has been said by Senators here who have spoken about the beneficent features of that act. When it was before Congress 20 years ago I spoke in favor of it and did all I could to secure its passage. I think it has done a great deal of good; I think it is going to do a great deal more good; and I should like, Mr. President, to see the great benefits of the reclamation act as it has been applied to the West extended so as to become the reclamation act not of the West alone but of America, taking in the wet lands as well as the arid lands.

Mr. President, there is no difference in principle between placing water on lands in order to make them produce when they have not enough moisture, and taking the water off land when it has more moisture than will permit it to produce. The two are exactly parallel—putting the water on land and taking the water off.

I always sympathized with the people out West who have no water for their lands, for I live on the banks of the mighty Mississippi, and unfortunately I have many times seen too much water down in that section. I have seen that river when it was 40 miles wide, from the hills on the east side to the highlands on the west, before we had great levees to protect our country as we have now. "A fellow feeling makes us wondrous kind"; and I was anxious, sir, to have some of the water that flowed down there on my section held back in the west, if possible, and used to irrigate the lands out there that needed it. However, the Mississippi River flood problems have no connection with his reclamation amendment; its levees do not come in this bill in any way at all, and I have merely referred to them in passing; but I should like very much to have the general principles of the original reclamation act applied to Louisiana.

We have over 10,000,000 acres of this so-called wet land in Louisiana according to the Reclamation Service. The total area of the State is only 30,000,000 acres, and it is a wonderful State. I wish I had time to tell you about it; but if Louisiana could have, in addition to the 20,000,000 acres now improved, 10,000,000 acres of wet lands well drained and highly cultivated, more fertile than that which has been reclaimed, there is no telling how rich the State would become; and that would be true of many other States. The wealth of the Nation would be added to enormously. I can not conceive of an investment this Government could make that would be more profitable than to pass this bill and rapidly improve all of these arid and wet lands.

Mr. DIAL. Mr. President——

Mr. RANSDELL. I yield to the Senator from South Carolina.

Mr. DIAL. I should like to ask the Senator why it is necessary to couple up this project with a reclamation project? Why is it essential to say that the soldiers shall be placed on arid lands or on swamp lands? Could we not advantageously provide in this bill that a district could be formed wherever the owners of the land might desire?

We have in our country a large area of unoccupied land which is fertile, which does not need irrigation, because the Almighty sends us copious showers; and, as well, we have land that needs drainage. It is considered that where land needs drainage it is somewhat unhealthy; mosquitoes and tadpoles are in abundance, and the soldiers would be apt to be carried off some distance from home, from their family ties and connections; and I see no virtue in tying up this matter with a reclamation project. I do not see the necessity of it. It does not take that to make it legal or constitutional, so far as I can see; and while I am against the bill in the main, yet, if it is going to pass, I should be very glad for some land ownership to be connected with it, for some way to own a home to be connected with it. I am a great believer in trying to encourage our people to own homes.

In North Carolina and South Carolina and Georgia, particularly, I know that there is a large area of cut-over timber land that is accessible to railroads, perfectly healthful, and which, at a very small expenditure of money, could be put into cultivation and would bring forth abundant harvests. While I do not live in that part of the State myself—I live in the foothills of the mountains—I know land that a few years ago was selling for from $1 to $10 an acre, and with the expenditure of perhaps $5 to $10 an acre the stumps have been taken out, and it has been put into cultivation, and to-day that land is bringing anywhere from $100 to $500 an acre. I was very much interested last year, out in my section of the State, when a friend of mine told me that he went into his own cornfield that had been planted in velvet beans, and he got lost in his field and went out on the other side.

That particular land was sold within the last 20 years for $1 an acre, and in the last 10 years perhaps for $10 an acre. We have wonderful possibilities of growing fruit in that section. My friend here from North Carolina [Mr. SIMMONS] knows that down about Pinehurst and the Aberdeen section there is one of the great shipping sections of the United States, while only a few years ago there was very little demand for the land. So I do not see any reason for sending soldiers away off to some other State or to some other part of a State when they might want to form a district and acquire some land that is practically ready for cultivation and could soon be put into cultivation, and would yield a crop in another year. I should like to hear the Senator's objection to an amendment making this bill cover that kind of a proposition.

Mr. RANSDELL. Mr. President, I gave the Senator all the time he wanted to make his little speech and have enjoyed what he said.

Mr. DIAL. I thank the Senator.

Mr. RANSDELL. I do not think the Senator hit the gist of the subject, however. We all know that there is a vast area of cut-over land in the South. My own State has a great many of these cut-over lands, and is trying to lead the Nation in reforesting them. Almighty God intended trees to grow on those lands. The lands that the Senator is talking about, sir, were forest lands. They were covered with fine pine trees and timber is becoming very scarce in this country. Let me advise you, Senator, to plant trees on those lands. You can not do better. Those lands that you say sell for $1 an acre and grow fine velvet beans and peas, and other things, will grow trees. The Creator of the universe intended trees to grow there, and trees are needed by the Nation. Plant trees on those lands as we are doing in Louisiana. Go to Bogalusa, or to Urania, in my State, adopt the wise plan followed there by the wide-awake lumbermen and foresters of those localities, and plant trees on your land. Perhaps you can find some moderately good cut-over lands in the South that have not already been put in cultivation which, by the use of a sufficient amount of nitrate

of soda and other things, will do to put these soldier boys on; but I am not going to advocate putting ex-service men on cut-over lands in South Carolina or Louisiana or any of those places. I want the soldier boys put on the most fertile lands in America, and this bill proposes to reclaim such lands. Some of them are in South Carolina, let me say. There are 3,125,000 acres of these wet lands in that State.

Now, my dear Senator, these soldier boys will not have to go out West to find land to live on. They will not have to go down to Texas, nor even as far as Louisiana. We will reclaim some land in South Carolina for your boys if they love their own State better than any other, and I hope they do, for it is a wonderful State. We are going to reclaim lands in all of these States, and let the boys take them where they like them best.

You ask why we tie up these two reclamation projects. I thought I had said that I could see no distinction between placing water on arid land in order to make it fertile and taking it off wet land in order to make it produce crops. There is no difference in principle. It is the same theory of government. The only difference any man can offer is that out West, when we started the irrigation of arid lands, those lands belonged to the Nation, and the theory was that the Government was going to redeem its own property, was going to make a worthless asset available. That is what we did back in 1900 and 1901 and 1902 when we passed the original reclamation act. We thought we were going to reclaim our own lands; but we speedily found that those lands had been taken up so rapidly that we must add thereto, in a great many instances, private ownership along with Government ownership, so we worked the two together, and we worked it wisely, we worked it well, we worked it beneficially for the entire Nation. That having worked so well, as shown by the able Senator from Montana [Mr. WALSH], the Government is going to get every dollar of it back. There has been no donation to anyone.

Why not apply that same reclamation principle to the 3,000,000 acres of swamp lands in South Carolina, which you say are inhabited by mosquitoes, tadpoles, alligators, and things of that sort? I should like to get rid of the mosquitoes, tadpoles, and alligators in Louisiana. Perhaps you are willing for them to continue to infest South Carolina. I do not want them to stay any longer in Louisiana. I want to get rid of them, and am entirely willing to have the National Government come in and help me to get rid of them as a loan. We are loaning to people everywhere. We are giving the credit of our great Government not only to home folks but we recently loaned ten billions to our allies during the World War.

That is one of the glorious things a government does for its people. We have the great Federal farm loan act, which the Senator is proud of, and I have no doubt he gets his people to borrow freely from their Uncle Sam. Why not have the principles of that great act applied in an indirect way under this McNary amendment?

Mr. WALSH of Montana and Mr. DIAL addressed the Chair.

Mr. RANSDELL. I yield to the Senator from Montana first, and then I will yield to the Senator from South Carolina.

Mr. WALSH of Montana. Mr. President, the argument of the Senator from Louisiana has presented to me this thought: He has very properly stated that the original reclamation act was founded upon the principle that the Government was improving its own lands, and therefore the reclamation easily came within the powers of the General Government, and the reclamation of the lands within the projects held in private ownership was only a mere incident of the general project. It was argued at that time that the operation of the act ought to be extended to the swamp lands as well; but it was answered to that that the swamp lands were held in private ownership and the Government could not do anything toward the reclamation of those lands; and that argument may even to-day lie with some force against that provision of the McNary bill, considered as an independent measure. Now an opportunity is afforded to give to it a constitutional basis. We make it now a means of providing for our discharged soldiers, which easily falls within the war powers of the Government, and we utilize these lands for that purpose. In other words, now, in connection with this bill, you can have a perfectly safe constitutional basis for the reclamation of your swamp lands. Lose this opportunity, and you may find yourselves confronted with a very serious constitutional question.

Mr. RANSDELL. I thank the Senator for his contribution to the discussion. The Constitution never bothered me much in matters of that kind. I believe that if we can lend money to farmers, as we do, we can lend it to reclaim arid and wet lands. However, there is great force in the Senator's argument, and I thank him for it.

I now yield to the Senator from South Carolina.

Mr. DIAL. In answer to the Senator from Louisiana I wish to say that I merely wanted the soldier to have whatever kind of land he wanted—not only the swamp land, but the other kinds as well.

Mr. RANSDELL. I would not object to that if you wish to offer it as an amendment to this bill. I want all the good things attached to this bill that I can get. I want to help the soldier, and if the Senator thinks it will help him, we will put it on.

Mr. DIAL. I have an amendment of that sort.

Mr. RANSDELL. Mr. President, I simply wish to say in conclusion that I do not expect to see our Government improve all these lands in the next year or so. It is a tremendous thing. Ninety-four million acres of these swamp lands and 24,000,000 acres of arid lands is a vast area. We will not do it in the next 10 years, and I doubt if we are going to reclaim anything like one-half or even one-fourth of the area in any State in the next 10 years. I do not pretend to say, sir, that we will be able to do anything like what the senior Senator from Florida [Mr. FLETCHER] contemplates down his way in the next 10 years, but I will tell you what I do believe can be done in Louisiana. I believe, sir, we will get several sample projects, if I may call them so; we will get a project here, and another project there, and one somewhere else, probably 50,000 acres in this tract, 75,000 in that, and 150,000 somewhere else.

We will have these projects conducted under the very best auspices. The finest engineers in the world—because that is what our Government will send to us—with all the lore in the world in regard to reclamation by drainage, will come there, and they will carry those projects on to marked success. People who wish a thousand or a hundred thousand acres reclaimed can look at the projects which the Government has improved, can see how it is done, can derive the benefit of this wonderful example, the great success made in these reclamation projects under the auspices of the Government, and then, Senators, private capital will come in and reclaim wet lands in Florida, Louisiana, and other places in immense quantities.

I am firmly convinced that in my State a great many landholders of the wet lands would be delighted to put them in under the terms of this bill, would willingly agree in advance with the Secretary of the Interior on a fair price at which those lands should be sold and reclaimed in tracts of not to exceed 160 acres to an actual settler.

I am one of those who believe in peasant proprietors. I do not believe in large landholdings. No country was ever permanently wealthy unless the lands were divided up into small tracts, and I believe that we should encourage small holdings just as much as possible. This bill will encourage small holdings. That is one of the very best things it does. I shall certainly vote for it with very great pleasure.

LAWS AND RESOLUTIONS OF FIFTH PHILIPPINE LEGISLATURE.

The PRESIDING OFFICER (Mr. KENDRICK in the chair) laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Territories and Insular Possessions:

To the Congress of the United States:

As required by section 19 of the act of Congress approved August 29, 1916, entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands," I transmit herewith a set of the laws and resolutions passed by the Fifth Philippine Legislature during its second session, from October 16, 1920, to February 9, 1921, inclusive; its third session, from October 17, 1921, to February 9, 1922, inclusive; and its special session of 1922, from February 13, 1922, to February 18, 1922, inclusive.

These acts and resolutions have not previously been transmitted to Congress, and it is therefore recommended that they be printed as public documents, as heretofore.

WARREN G. HARDING.

THE WHITE HOUSE, *August 28, 1922.*

COMPENSATION OF WORLD WAR VETERANS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10874) to provide adjusted compensation for veterans of the World War, and for other purposes.

Mr. STERLING. Mr. President, just a word now to express my hearty approval of the pending amendment. In voting on the bill itself I shall probably be found in the minority, but if the bill passes I desire very much that it shall pass with this amendment included in it.

I think that former Secretary Lane had a great vision in his project for the reclamation not only of the arid lands of the

West but of the cut-over, burned-over, and swamp lands throughout the country generally. In the main I indorsed the bill which, in pursuance of his suggestions and recommendations, was reported to the Senate, as I now remember.

This reclamation scheme will, of course, be of great benefit to the West and the semiarid lands of the West. It will also be of equal benefit, I think, if not of greater benefit, to the people of the South in the reclamation of the swamp lands and the cut-over lands of the South. I think there are great possibilities for the whole country, for the Nation at large, in a measure of this kind. It will greatly add to the national wealth and, as has been suggested by some Senators, it will tend to keep the people of the country from rushing to the cities, and in that respect both country and city will be greatly benefited.

We have but the one irrigation project in South Dakota, known as the Belle Fourche project, not the largest by any means, nor among the largest, nor perhaps are the returns from it as great as the returns from other irrigation projects. But from land which we termed a few years ago semiarid land, fit only for the grazing of a limited amount of stock during a certain portion of the year, there was produced in 1920, from 59,000 acres and a little more, $389,870 worth of alfalfa, $108,055 worth of sugar beets, $87,150 worth of wheat, $18,140 worth of potatoes, $50,410 worth of oats, and $67,130 worth of pasturage, making a total of $832,200 worth of crops produced from the 59,850 acres under irrigation, or an average of $13.90 per acre. That shows the benefits of irrigation, on a comparatively small scale, it is true, but illustrative in a way of many of the irrigation projects of the West.

I hope to see the idea extended much beyond the limit to which it goes now, and for our western country. It is a particularly interesting problem to my own State. The turbulent Missouri River flows through and along the border of my State for a distance of 500 miles, a menace rather than a blessing because of its overflows and because of the erosion of the banks. But I hope that this will lead to a new interest in the question of irrigation and the storage of some of the waters of this great river and its tributaries for the purpose of irrigation. In order that we may comply with the present law and the powers of Congress as understood, we may have to make irrigation a secondary feature, in form, at least, but in reality it would become the principal feature of any improvement of the Missouri River.

I hope this amendment will carry. Of course, not the least among my reasons for wishing it may carry is the advantage it will give to the returned soldier, to the veteran—first, in the utilization of his services in the development of any project which may be selected and agreed upon between the Secretary and any reclamation district; secondly, because of the 60 days' preference it gives him in the matter of purchasing or making his entry upon the land. As I said, while I can not conscientiously support the pending bill as a whole, yet, if it passes, I hope it will pass with the McNary amendment as a part of it.

Mr. WADSWORTH. Mr. President, like the Senator from South Dakota [Mr. STERLING], I expect to support the amendment offered by the Senator from Oregon [Mr. MCNARY]. I do so because, primarily, it proposes to extend credit for a productive enterprise and, as contrasted with other provisions of the bill which is before us, it is sound and will bring a lasting benefit not only to the men who undertake the enterprise, and particularly the veterans, but to the country as a whole.

For some years I have believed that the safety of this Republic depends in the long run on the percentage of home owners inhabiting its borders, and any such measure as this, based upon sound principles, avoiding wildcat finance, useless extension of credit, and inflation of credit and prices, will always receive my support. I can not, however, support the so-called bonus bill.

As a preliminary to a discussion of the provisions of the bill, I desire to say just a passing word concerning a certain gentleman, a constituent of mine, who has taken a leading part in opposing the bonus bill. I refer to Mr. Frank A. Munsey, of New York, the publisher of the New York Herald and the New York Sun. Senators probably are familiar with his efforts in opposition to this legislation. I shall not recite them.

It so happens, however, that that gentleman has been subjected to bitter attack. His motives and his character have been traduced to such an extent that, were the practice to become general with respect to any person who had courage enough to stand by his convictions, I fear that grave harm would come to the body politic generally.

Mr. Munsey has replied to his critics. He has done it over his own signature and published it on the front page of his paper. I think it only due to him that at this time and in this place the statement published by him be made a matter of record. I therefore ask unanimous consent that there be printed in connection with my remarks the statement published by Mr. Munsey this morning.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Is there objection? The Chair hears none, and it is so ordered.

The statement referred to is as follows:

[From the New York Herald, Monday, August 28, 1922.]

A FEW FACTS THAT ARE DUE THE PUBLIC.

The New York Herald has opposed the various soldier bonus measures because it does not believe in handing a bonus to the young men of the country for doing the thing that is their right and duty to do—the protection of their country.

The New York Herald has opposed these measures on the ground that with the country now carrying a war indebtedness of $23,000,000,000 the Congress has no right to put an additional burden of $5,000,000,000 of indebtedness on the backs of the American people—five thousand millions of dollars.

The New York Herald has opposed these measures on the ground that they are largely political raids on the Treasury, devised and engineered by politician statesmen in Congress as an appeal to the soldier vote.

With the purpose of neutralizing the effect of the fight the New York Herald has made against the bonus, certain men and certain publications have been somewhat careless or downright malicious in their fervid charges against the man responsible for the stand of the New York Herald on the bonus grab.

That man is myself. Some of the charges are bitter, some of them venomous and criminally libelous. Briefly they amount to this: That I am a rich man; that I made a large share of my fortune in United States Steel and in munitions stocks; that these steel stocks were enormously profitable during the war. One newspaper, the Daily News of New York, puts it this way:

"A large part of Munsey's large fortune is from investments in United States Steel stock. This steel company made the material for the guns, bayonets, shells, automobiles, tanks, and so on, which were used in the war. Holders of steel stock profited enormously by the making of these weapons.

"Such weapons as these killed—killed—five or six million human beings during the war.

"The process of killing these five or six millions and wounding fifteen or sixteen millions more enormously enriched holders of munitions shares, like Mr. Munsey * * * large owners of munitions stock, like Mr. Munsey—well, their profits ran up into tens of millions.

"Furthermore, if we recall correctly, Mr. Munsey was extremely anxious in his newspapers for us to get into the war. He thought we were supine because we didn't do it sooner. He always believed in the draft, in seizing the young men and shipping them across the ocean to take their chances."

There is one truth in this whole utterance; just one—no more; that is that I deprecated America's delay in taking her part in the war. With this single exception this malicious utterance is utterly and wholly false. It has no shading or suggestions of truth.

The public will perhaps be interested in the facts concerning this charge and similar charges. The public is always fair in its judgment and its attitude when it has the facts, and the public is entitled to the facts in this instance.

The facts that have to do with these charges are these. The fortune I have, be it little or big, did not come to any considerable extent through the buying and selling of stocks. Some years ago, when my income was mounting large from my magazine business, I put some of my money then lying idle in bank into the security market. Up to this time all my thought and energy had gone into the upbuilding of my magazine business.

There is not much natural sympathy between money earning and money investing. A man may be good at one and good for nothing at the other. It was up to me now to handle the money flooding in from my publishing interests. My modest initial investments in the street grew ultimately to important holdings.

Weird stories have been circulated about my undertakings in the security markets. Until now they have been good-natured, though, I must say, grossly inaccurate. The bitter charges now, because of my stand on the bonus, are largely founded on these inaccuracies and exaggerations with respect to my security holdings. But inaccuracies and exaggerations good-naturedly expressed are one thing, and malicious, bitter, and wholy unwarranted attacks with the view to discrediting my newspapers in their fight against the bonus are quite another.

While I am on the subject I may as well put the record straight so that well-meaning newspaper men will not hereafter indulge in fantastic pictures in respect of my security holdings when I was in the market.

It was recently said that in my stock transactions I acted on inside information, a sure thing. There has never been a sure thing in any of my business activities, or in any of my financial investments. I have always been willing to take a chance on my own judgment, always been willing to take a loss on my own judgment.

I have never had a business partner in my publishing enterprises and other interests. I have reasoned out my own problems, done my own thinking, and I followed this method strictly in my stock transactions. In dealing in the volatile values of Wall Street I was indulging a spirit of adventure. But all the while my time was given to my publishing interests. Wall Street was a side issue.

Neither then nor at any time, before or since, in my life was I a party, directly or indirectly, to putting up, or putting down, values of securities. And neither then nor at any time, before or since, in my life did I buy or sell securities on tips or on short speculative movements. I bought or sold securities on the underlying business conditions of the country and the money conditions of the country as I saw them.

I bought always with a view to a long term and not a short one. Getting in and out of a stock every day, or every few days, or several times in a day, is highly speculative; buying for a long term—that is, to hold with the expectation of increased values with improving business conditions—is like buying and selling real estate.

But Wall Street never had any real interest for me. My real interest and real aim in life has been, and is, to do constructive work, to create something worth while, to make two blades of grass grow where one grew before. Money coming in from this creative work has

the seeming of real money; money coming in from the marking up and down of stocks isn't the same thing with me.

With sufficient experience in the security market to satisfy me and with some profit—not enough to get excited about—I withdrew my capital from the Street and turned to something more dramatic, more worth while, the daily newspaper. My actual net profit from my security holdings was relatively inconsequential compared with the aggregate profit of years from my publishing, real estate, and other interests.

I have not owned a share of Wall Street securities of any kind whatsoever in, I should say, something like a dozen years. I owned no Wall Street securities at the beginning of the war. I owned no Wall Street securities during the war, and I have owned no Wall Street securities since the war. I do not own now, and never have owned, a share in any munition plant of any kind or description. I had no connection, directly or indirectly, with any property or interest that lent itself to profiteering during or after the war.

I made no money whatever, directly or indirectly, out of the war or anything associated with the war. On the contrary, my interests, due to the high cost of magazine and newspaper making and the generally disturbed condition of affairs, suffered a very heavy shrinkage during the war and in the inflation period after the war.

This statement, answering the charges that my fortune has been made largely in Wall Street and from munition investments and war profiteering, must not be taken to mean that I have any apologies to make for my operations in listed securities. I ventured less into the realm of chance in Wall Street, far less, than I did in undertaking to found and build up without capital and without experience a magazine business in competition with the great established magazine properties of New York, and I took far less chance than I have taken, and one generally takes, in the daily newspaper field.

The fortune I have, such as it is, has come primarily from two sources: The $40 capital I brought with me from Maine to New York 40 years ago and the capacity God gave me for work. There has been no mystery, no legerdemain, no short cuts to fortune building with me. It has been done by fairly sound reasoning, the courage to put my conclusions to the test, and by paying the price in work.

I am a thorough believer in work. I love work and I wish all Americans loved work as I love it. Generally speaking, there is no such thing as getting something for nothing. We must pay the price in thought, in care, in watchfulness, in work—intense, everlasting work.

If I were a manufacturer of hardware, or textiles, or shoes, or anything else not linked up with public affairs, this statement in answer to careless and vicious charges would not be imperative, though I hold that one who is at all before the public, whatever his line of endeavor, owes it to the public to correct misstatements and put the truth before the public.

Calumny travels fast and far, and unless apprehended is accepted as the truth by the public. The public has no reason to suppose calumny isn't the truth if allowed to stand as the truth.

But with the newspaper owner the situation is highly sensitive, as the newspaper is a public institution. The newspaper is just what the man back of it makes it. The newspaper mirrors the man back of it, mirrors the man who puts himself into it. If his heart is in the public service his newspaper will be a bulwark of strength to the community and to the country. Indeed, with the present political subserviency to the vote, the best hope for sound government must rest with the well-purposed, independent press.

The attitude of the New York Herald on the bonus question has been the conscientious attitude of the owner of the New York Herald. I have no personal or selfish motive in my objection to the bonus. Fifty bonuses might be paid to soldiers and it wouldn't affect me personally.

I have taken my stand against the bonus on the ground that it is all wrong in theory, that it degrades the American soldier. It robs him of the spirit of patriotism, the spirit of defense of his country. I have taken my stand against the bonus because the Government is in no condition to shoulder this additional burden, because the taxpayers of the country are in no condition to shoulder this additional burden, and because the payment of this proposed bonus to soldiers would be a vicious precedent for future generations to deal with.

FRANK A. MUNSEY.

Mr. WADSWORTH. As to the pending bill itself, there have been a good many general statements made concerning the veterans of the war, both soldiers and sailors, and some of them may give rise to an inaccurate conception of just what the Government has done in the matter of pay and allowances up to this time. Merely in the interest of reasonably accurate history, and not for the purpose of argument, I desire to recite very briefly those measures taken by the Congress affecting the soldiers and sailors who were called to the colors during the last war.

When we went into the war the base pay of the private was $15 per month. In May or June, 1917—I forget which month, but I think it was May—approximately two months after we entered the war the Congress legislated on the question of pay and the base pay of the private was raised to $30 per month. The impression seems to prevail that $30 a month was the pay of the soldier generally. As a matter of fact, that was but the base pay of the private soldier, and the privates comprise approximately 49 per cent of the enlisted strength of the Army. Prior to our entrance into the war the base pay of the private first class was $18 per month. That was raised to $33 per month. The privates, first class, comprise approximately 25 per cent of the Army. Prior to our entrance into the war the corporal of the line, so called, received $21 per month, and that was raised shortly after we entered the war to $30 per month. The corporals in the aggregate comprise about 9.5 per cent of the enlisted strength of the Army. Prior to our entrance into the war the duty sergeant received $30 per month. His pay was raised to $38 per month. The duty sergeants and men of similar grade among the enlisted strength comprise about 9.5 per cent.

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Wyoming?

Mr. WADSWORTH. I yield.

Mr. WARREN. The Senator spoke of the $30 which the private received. What was the additional pay that he received when he went abroad?

Mr. WADSWORTH. I was coming to that. I will just finish this statement of the base-pay schedule, very much abbreviated. The battalion sergeant major, prior to our entrance into the war, received $40 a month and during the war that pay was increased to $48. The regimental sergeant major received $45 a month prior to our entrance into the war and that noncommissioned officer's pay was raised to $51 a month after our entrance into the war. The sergeant, first class, Medical Corps, received $50 a month before and was raised to $56 a month. The hospital sergeant received $65 a month prior to our entrance into the war and was raised to $71 a month. The quartermaster sergeant, who ranked among the highest paid grades and is typical of the highest grades as then existing, received $75 a month prior to our entrance into the war and was raised to $81.

It will be seen, therefore, that the soldiers in the lowest grades—the privates and privates, first class, and the corporals—received by far the greatest increase, measured by percentage of their former pay. It will be seen also that the mere statement that $30 a month was the pay of the soldier is grossly inaccurate, for more than 50 per cent of them got a great deal more than $30, and every soldier who went abroad got a 20 per cent increase in his base pay. So that no soldier served in France for as little as $30 a month or anything like it.

Mr. HEFLIN. About what was the average pay, then, for the private soldier?

Mr. WADSWORTH. I have not made an accurate estimate as to the average pay of the men in the Army. Exclusive, of course, of food and hospital care and clothing, I assume the average cash pay would run close to $40, and exclusive also of extra allowances, such as are given for marksmanship, $2 a month; sharpshooter, $3 a month; expert rifleman, $5 a month; and corresponding experts in other branches of the service which are not armed with the rifle but which require proficiency with some other weapon.

Mr. WARREN. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Wyoming.

Mr. WARREN. Bearing on that, I ran across some correspondence lately, directed to me and probably to others, from the president of the Board of Trade of the United States, which gives the figures of pay of soldiers serving in France as follows: During the 19 months we were at war enlisted men of the various nations received the following total sums: The United States, $570; France, $27.55; Italy, $33.06; Russia, $7.41; Great Britain, $138.70. Belgium paid a rate slightly higher than France. New Zealand and South Africa paid a rate equal to Great Britain. Canada paid a rate equal to our own. Australia paid its men, all volunteers, the highest rate of any nation, $42 a month.

Mr. NELSON. What did Great Britain pay?

Mr. WARREN. Great Britain paid $138.70.

Mr. OVERMAN. Per year?

Mr. WARREN. No; for 19 months.

Mr. BURSUM. Mr. President, I would like to ask the Senator what was the policy of France with reference to her economic resources and her man power during the war?

Mr. WADSWORTH. Conscription.

Mr. WARREN. So far as France was concerned, her army was conscripted. It is the duty of every young man to serve in the army in France at some period for a given length of time, and the pay runs as low at times as $1 per annum.

Mr. BURSUM. But were the man power of France, her industrial strength, her economic resources, conscripted?

Mr. WADSWORTH. I think that was not done in any country. I never heard of conscription for any other purpose than a military one being invoked by any nation during the last war, or, for that matter, in any war.

I am not citing these figures in the way of argument, but merely, if I may, to contribute something to a little more accurate conception of just what happened, because the impression has been so often given out that nothing has been done, whereas, as a matter of fact, the base pay of the humblest private of the Army was raised 100 per cent at the very beginning.

As contrasted with the pay of soldiers of other countries—and I would not for a moment urge that we come down to any such figures as theirs—it is interesting to understand just what the situation was. As contrasted with Great Britain, the so-called pay of the soldier of the United States was more than three times as much, even though soldiers of both were serving

in a foreign country under exactly the same economic conditions, so far as that country was concerned.

I do not imagine for a moment that any Senator or any citizen believes that $30 a month for the private or $33 a month for the private, first class, or $36 a month for the corporal was voted for any other purpose than to give to the soldier a generous allowance of pocket money. Certainly it was never considered possible to compensate him. No such thought ever entered the mind of the Senate at the time, nor has any military legislation affecting pay in time of war been built upon the basis of compensation.

I remember very well, I think, the debate which occurred in the Senate at the time we doubled the base pay of privates and made corresponding, although somewhat less, increases in the upper grades of the enlisted force. Canada had established the principle of a dollar a day for her private soldiers and Australia had done something of the same sort. The American Congress believed that our men should receive and have for their enjoyment just as much pocket money as the soldiers of any other land. If I am not greatly mistaken, that is why the increase was made, and no one complained against it. It was a generous allowance of pocket money compared with the allowance made to American soldiers in the wars of the past. I think it was none too much, considering the conditions which our men had to confront, especially when removed so far from home as were those who went to France, and approximately 50 per cent of our men went to France and the other 50 per cent stayed in this country.

When the men were mustered out, again the Congress believed that the question of pocket money and the facilities which the soldier should have in tiding over that period of time between his discharge and his resumption of civilian employment should be taken care of, and the Congress appropriated a sum of money which, under the statute enacted at the time, gave to each soldier upon discharge $60. That has not been mentioned in this debate.

Mr. WARREN. Mr. President, the Senator from New York will perhaps remember that that amounted to $270,000,000. Great Britain has given $6,000,000 to her soldiers.

Mr. WADSWORTH. I have not the British figures at hand, but my recollection is that the $60 given to the men of the Army and Navy of the United States upon discharge amounted to about the same sum of money given for similar purposes by the British Government to the British soldier. That again was an effort of the Congress to see to it that the men were comfortable in the transition stage. It was not compensation. It was never intended to be compensation. In fact, there is no possible way of estimating it as such.

Another matter of far less importance, but worthy of mention, was the provision made by the Congress that each soldier upon discharge should receive and be permitted to take home and use as he saw fit an entirely new outfit of clothing. Under that provision each man was entitled to take and did, upon his own application, as I recollect it, take the following articles: A pair of shoes, a pair of olive-drab breeches, an olive-drab shirt, an olive-drab coat, a felt hat, and his choice of an overcoat or slicker. No time limit was stated as to the date upon which applications should come in from the men. Some of them drew the clothing, if the clothing was available, at the camp from which they were discharged. At many of those camps, of course, such a great reserve of clothing was not in existence, but the men were permitted to write to the Quartermaster General after they reached their homes and ask that this allowance of new clothing be sent to them. Thousands and tens of thousands did so, so much so that not only was the entire available stock of clothing in the hands of the War Department at the close of the war exhausted, but for nearly two years thereafter the Quartermaster General had to continue to manufacture new clothing to meet the applications that were still coming in. I can not recollect the figures of the appropriations which the Congress made after the war was over to continue the filling and the honoring of these applications. Suffice it to say that in the appropriation bill of a year ago the Congress decided that the applications should cease and that thereafter applications for new clothing should not be honored; but for two and one-half years at least after the war those applications were honored.

So, Mr. President, in the matter of the comfort provided for the men by Congress in the enactment of the statutes which I have recited, I do not think it can be said that the American Government or the American people were remiss. When we add to the efforts of the Government the efforts of the great associations which were organized on semireligious lines in some cases, and in others on civic lines, to bring further and additional comforts and relief to the soldiers—I mean by that the American Red Cross, the Y. M. C. A., the Knights of Columbus, the Salvation Army, the Jewish Welfare Society, and such as they—adding their hundreds of millions, literally, I do not think it can be charged by any Senator or any citizen, and I have never heard it charged by any soldier, that the American people as a whole were remiss in endeavoring to provide every obtainable comfort for their men in time of war.

I myself rejoiced at it. I think all those sums were wisely spent. They meant a greater degree of contentment for the men—a higher morale, which means better fighting qualities. They meant a better health rate. There was far less sickness in our Army in the World War than in any army we have ever raised. I think there was also far less discontent; there was less homesickness. The efforts that were made toward entertainment and providing comforts both by the Government and outside agencies were worth every penny that was expended and more, too. All those things were done by contributing money; but none of them have the slightest relation to compensation for duty performed. This bill is the first effort in the history of the American Congress, as I read history, to fix compensation for duty performed and to measure it by dollars and cents.

Mr. OVERMAN. May I interrupt the Senator there?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from North Carolina?

Mr. WADSWORTH. I yield.

Mr. OVERMAN. What would the Senator from New York call the $60 which we gave our soldiers when they came home?

Mr. WADSWORTH. As I remember the intent of Congress, as evidenced in the debate at the time and in the committee in drafting the amendment, the $60 payment was for the purpose of facilitating the comfort of the discharged soldier from the day of his discharge until he could take up his civilian employment.

Mr. OVERMAN. I understood the Senator from New York to say that we increased the pay of the soldier from $18 to $30 per month because Canada and Australia had done so?

Mr. WADSWORTH. Yes; because we wished our men to enjoy the same comforts as the soldiers of those countries enjoyed.

Mr. OVERMAN. Did not Canada, when her soldiers came out of the war, appropriate the same amount of money as we did—$60—whether it be called compensation, gratuity, bonus, or what not?

Mr. WADSWORTH. I do not know.

Mr. OVERMAN. Has not Canada also appropriated—call it compensation, bonus, or what not—a sum averaging $600 for each of her soldiers?

Mr. WADSWORTH. I do not know what the action of the Canadian Government has been.

Mr. OVERMAN. I think the Prime Minister of Canada, with whom I had a conversation here, told me that the Canadian Government had given to each Canadian soldier a bonus, the amount of which I have forgotten. If we are imitating Canada, and if she has given her men a bonus, why should we not also give our men a bonus?

Mr. WADSWORTH. I think it is a bad example to follow when it goes beyond the point of giving every conceivable comfort to the man who is serving his country.

Mr. OVERMAN. I understood the Senator to say that our Government increased the pay of its soldiers from $18 to $30 because Canada did it. If so, why should we not give a bonus or a compensation because Canada, as well as Australia, did it?

Mr. WADSWORTH. I think the two things are based on entirely different principles. The Senator from Minnesota [Mr. NELSON] reminds me, and it should be stated for the RECORD, that the Government also supplied some allowances for those soldiers who left dependents behind them, either wives or dependent children. My recollection is that the allowance was based upon a total of $15 for a wife and $5 for each dependent child up to an aggregate of $25 or perhaps $30. I never liked that.

I criticized it several times when the bonus bill, so-called, was previously before the Senate. I do not believe it was right for the Government to withdraw from the pay of a soldier any money for the support of his dependents. I think the Government owed that in its entirety. If we took a man from civil life and compelled him to go out and fight for his country, and at the same time he had to leave a wife and children behind, and we appropriated money for his pay sufficient for his personal comfort—and that is what the pay of the soldier in time of war is, and that is all it is—we should not have deducted from that pay one single cent to be sent home to his wife and children; the Government should have shouldered all of it. My original proposal two years ago was, instead of hav-

ing this indiscriminate distribution of cash to all the men who wanted it, whether they needed it or not—for that is what this bill in its essence means—that we should return to all those men who made allotments from their pay the sum total of the allotments made and square that account, and thereby finally assume at this late day the entire financial responsibility for supporting the wife and the children whom the soldier was compelled to leave.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Minnesota?

Mr. WADSWORTH. I yield.

Mr. NELSON. I think the statement which the Senator has just made is slightly confusing. As I understand, the Government required the soldier to contribute a portion of his pay as an allowance for his dependents, and then the Government made an equal contribution toward the allowance, so that the entire allowance did not come out of the pay of the soldier.

Mr. WADSWORTH. No; not at all. I was remiss in not stating that the Government matched the money which the soldier put in, dollar for dollar, as I recollect.

Mr. BURSUM. But was not the deduction made by the Government, and without any consultation with the soldier? The money was deducted and was sent to his dependents pursuant to the declaration which the soldier had made when he entered the Army, giving the names of his dependents.

Mr. WADSWORTH. Certainly.

Mr. BURSUM. It became simply a matter of administration, and the consent of the soldier was not required in order to send the money to his dependents.

Mr. WADSWORTH. Certainly; there was a law placed upon the statute books in reference to the payment of allotments from the soldier's pay to his dependent family, and also concerning the contributions of the Federal Government to meet or match the amount paid by the soldier. What the Senator from New Mexico says is perfectly true, but I do not think it changes or impairs the argument I am trying to make, that that was not a generous or a wise or a sound public policy.

Mr. BURSUM. I agree thoroughly with the Senator from New York as to that, and that is one of the reasons which, in my judgment, entitle the soldier to a refund at this time, which would come under the pending bill.

Mr. WADSWORTH. But this bill does not take into consideration anything of the sort; it makes no mention of it. The men who made a sacrifice and who sent home $10, $15, or $20 out of their pay to their families will not get any more under this bill than will the man who never sent back one cent. That is one of my criticisms of this measure, yet it is called an "adjusted compensation bill." There is no adjustment about it.

Mr. NICHOLSON. Will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Colorado?

Mr. WADSWORTH. I do.

Mr. NICHOLSON. The Senator from New York makes mention of men who returned no money to their families. There was a very small percentage of men who went into the Army who did not leave dependents behind them and from whose pay there was not deducted $15 per month.

Mr. WADSWORTH. The Senator is mistaken. There was a very large number who did not send back anything. They were not required to do so; there was no need for their doing so. I am not criticizing men who did not send money home voluntarily or under compulsion of the law, but a large percentage did not. They did not have to; there was no need of it; and yet they will get just as much under this "pawnbroker" arrangement that we have here as the men who did.

Mr. BURSUM. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield further to the Senator from New Mexico?

Mr. WADSWORTH. I yield.

Mr. BURSUM. Does not the Senator from New York believe that the $7.50 which was deducted from the soldier's pay on account of insurance during the period in which he was in the service ought to have been paid by the Government during his period of service?

Mr. WADSWORTH. My own personal view is that the Government might have shouldered that burden. I have never given much thought to that, but I recollect that when the war risk insurance act was passed it was regarded as the greatest step in advance that had ever been taken in the matter of securing the future of the country's soldiers and sailors. I do not recollect that the proposal was ever made at that time that the insurance premiums during the period of hostilities should be carried by the Government itself; I have never worked that out or studied it out, but as the Senator asks the question at this moment there does not seem anything unreasonable in the suggestion implied in his question. However, not all the men took insurance, nor in equal amounts, and again where is there any "adjusted compensation"?

There is no such thing as adjustment here. Men are treated with the grossest inequality. The mere indiscriminate distribution of $300 or $400, as the case may be, does not adjust anything, and it is confessed that it does not compensate anyone. The Senator from Alabama [Mr. UNDERWOOD] was perfectly clear about that. It can not be called compensation. There is no Senator here who would walk up to a veteran who had gone through the Argonne and say to him, "Here is what your services were worth; take $300." I never could understand how the name "adjusted compensation" could be attached to this bill. It is a desperate effort to get rid of the term "bonus" or "gratuity"; but, so long as these men are all treated exactly alike in dollars and cents, no matter what their sacrifices were, no matter what their pay, no matter what their service was there is no other name to call it but a "bonus."

Mr. BURSUM. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from New Mexico?

Mr. WADSWORTH. I yield.

Mr. BURSUM. I should like to ask the Senator one more question, and that is with reference to the Liberty bonds for which the soldiers subscribed. I am informed that in some divisions every soldier subscribed for Liberty bonds. The subscriptions were arranged through officers of the regiment as a rule, and those bonds were subscribed for by the soldier and paid for by deducting out of his wage a definite sum each month.

Those bonds in most instances very likely were sold around 80 to 85 cents on the dollar, and some cases for less. Does the Senator believe that it is fair and just on the part of the Government to impose upon the soldier the loss incurred under such circumstances for the financing of the war in which he was engaged when he was doing the fighting, was hazarding his life, and baring his breast in defense of his country?

Mr. WADSWORTH. Mr. President, I do not think it can be said that the men were compelled to subscribe for Liberty bonds. I think it unfortunate that such elaborate canvasses were made in the different regiments and brigades. In one particular camp I took occasion to protest against it. The pride of the men was appealed to, and the men in Company A of the Three hundred and first Infantry were invited by their officers to outsubscribe the men in Company B, and so on down through the lettered companies to the machine-gun company at the end of the line. I think it unfortunate that such rivalry was set up as between units and which resulted in many men—not in all, but in many men—subscribing for more Liberty bonds than they could really afford to pay for. Yet it is fair to say that while their subscriptions were generous, and perhaps in some instances too generous, they were subscribing for something of value; and they were not alone in having to sacrifice Liberty bonds at a price lower than par, for thousands of people had to do that during the year or two years following the war. Thank Heaven, Liberty loan bonds are now selling at par, and any man who subscribed to those bonds, whether he be ex-soldier or ex-sailor or mere civilian, will get all his money back with interest. That scarcely can be counted in as part of an obligation financially which the Government incurred in its treatment of the soldiers, and can scarcely be deducted from the pay of the soldier as a basis upon which to write bonus legislation.

Mr. President, I know full well that Members of the Congress who undertake to oppose legislation of this kind—which involves Uncle Sam laying from three billions to seven billions of dollars on a counter and inviting any one or all of four and a half million men to step up and take his share, whether he needs it or not—are put down in the minds of many as being enemies of the veteran, or at least failing utterly to appreciate what he went through. I hope I shall not be charged with any such failure of appreciation of what the soldiers and sailors in this war went through any more than I should be charged with failure to appreciate what the soldiers and sailors of former wars went through. War is organized destruction, perpetrated at wholesale. It can not be carried on without the infliction of suffering—suffering untold. The man who goes through with it with a brave smile on his face, and does his duty, and incidentally saves his country and the rest of us who could not go, is the man who will have my respect and admiration as long as he lives; but, Mr. President, I hope I shall not again be asked to appraise the performance of that duty in dollars and cents. We never have done so in the history of this country.

Had a bonus bill been introduced and passed at the close of the Civil War, I doubt if this Nation could have borne the

burden imposed upon it by any such practice as that. We staggered for years under the national debt of something like $8,000,000,000 resulting from the Civil War. Suppose the veterans of the Civil War, who numbered 2,000,000—a much larger army, in proportion to our population of that day, than the army we raised in the war with Germany—had demanded a bonus such as this, and it had been given them. Could the American people have borne it? Could the great West have been opened up with such alacrity? Could our people, under a burden such as that would have entailed, have spread across the prairies and the mountains and built up this great Nation? I doubt it. That would have been a fearful burden imposed upon 20,000,000 or 25,000,000 people. It would have more than doubled our national debt at that time, and it took us 50 years to whittle down the national debt left from the Civil War to a point where we could say that, practically speaking, it no longer existed.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Minnesota?

Mr. WADSWORTH. I yield.

Mr. NELSON. There was nearly a billion dollars left of that debt when the Spanish War broke out, and I think a remnant of between eight and nine hundred million dollars was unpaid when the World War broke out.

Mr. WADSWORTH. I think we had not paid it all, but perhaps some of that debt was due to other obligations. Certainly the major portion of it was Civil War debt. Some of it may have been due to the Spanish War and some to Panama Canal bonds.

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Wyoming?

Mr. WADSWORTH. I do.

Mr. WARREN. I suppose the Senator remembers that in the seventies Congress passed a bill somewhat similar to this which was vetoed by the President of the United States.

Mr. WADSWORTH. President Grant vetoed a bill quite closely resembling this, and the attempt was never made again to pass such a bill applicable to veterans of the Civil War and certainly no such movement arose from the veterans of the Spanish war.

Mr. President, last Friday afternoon I listened with great interest to a colloquy here in the Senate between four or five Senators, discussing the difficulties that are confronting the American people to-day. They discussed the coal strike and the suffering which may and probably will—in fact, some of them asserted that it was a certainty—overtake the people of our great communities as the result of the lack of coal and the lack of railroad transportation. We can sit here in this Senate Chamber and discuss these things in an academic way, but they are mighty real things when you go out among the people. When the average citizen is faced with the practical certainty of going down in his pocket deeper than ever not only to pay taxes but to pay his living expenses in the face of this industrial emergency and at the very moment when the people are wondering how they are going to heat their houses and run their industries and keep their employment—the notice has already gone out from Detroit that 106,000 men in the Ford plants may have to stop work in 10 days—it is not a very cheering thought that will come into those people's minds if, at that very hour, the Congress passes a bill burdening the American people with at least three and a half billions more in taxation.

There will come a time, Mr. President, when the people can not bear any more burdens. What political party would have the courage or the rashness to-day to introduce here a revenue bill raising the taxes of the people? Neither of them. This bill attempts to get away from that. It is an effort, almost laughable in its futility, to persuade people that money can be raised without imposing taxes—an utter impossibility.

The Senator from North Dakota [Mr. MCCUMBER] says it will cost but $78,000,000 in the first year. The Secretary of the Treasury points out that we have a $400,000,000 deficit facing us the first year, and the latest information is that instead of $400,000,000 the deficit will be $500,000,000, and yet lightly does the Senator from North Dakota suggest that we add another $78,000,000 to that deficit; and that is to be used only in paying the $50 cash bonus to those men whose so-called adjusted compensation does not exceed $50.

What relief are we to have as a people? There is none in sight, even if we do not pass this bill. We will have to impose heavier taxes or issue bonds in any event. The Senator from North Dakota lightly suggests that we suspend the good-roads work over the country in order to pay this so-called adjusted compensation. That is simply another way of taxing the people—depriving them of the facilities for doing business—that is all. What does this amount to when brought down to its essence? It is the many that pay, not the few. Political charlatans will invent, or pretend to invent, methods and pieces of legislation for imposing taxes in such a way that the few only will pay. Point me to a single taxation policy evolved by any government in the history of governments that has succeeded in imposing taxes in such a way that the few only bear the burden.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Nebraska?

Mr. WADSWORTH. I yield.

Mr. HITCHCOCK. The Senator remembers that one of the first acts of his party upon coming into power was to relieve from the excess-profits tax the corporations in the United States that were making the highest profits in business, and that in that way $450,000,000 of national revenue was sacrificed——

Mr. WADSWORTH. I do not agree with the Senator's last statement at all. I do not think you can find excess profits to-day.

Mr. HITCHCOCK. And about the same time another $100,000,000 of revenue was sacrificed by removing the surtaxes on the great fortunes of the United States.

Mr. WADSWORTH. The Senator's question is all based upon the assumption that high surtax rates on income taxes are paid by the rich man alone. He also bases his question, or must do so, upon the assumption that the excess-profits tax is paid by the rich corporation or individual alone. My contention is that it is paid by the rich man or the rich corporation *in the first instance*, and then inevitably, in whole or in part, depending upon market conditions, it percolates down through the body politic, and rests its heavy hand, directly or indirectly, upon every man, woman, and child in the country. If you impose taxes such as these in the hope that they will be paid by one selected group alone, you will encounter the proof of the same fallacy which has existed and has been shown time and time again. Prices will be raised to the consumer in order to pay the taxes. It has always been so.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York further yield to the Senator from Nebraska?

Mr. WADSWORTH. I do.

Mr. HITCHCOCK. The Senator's argument is quite familiar, and it is a very entrancing theory; but the fact was that those who brought influence to bear upon the Congress to lay aside that $450,000,000 of excess-profits tax were the corporations that were paying the tax, and the fact is that when we repealed the tax we lost the revenue. I know that it is a beautiful theory, and they added to that theory by saying that if you repealed the excess-profits tax you would improve business; but business has not improved. This is going to be the most disastrous year for business that this country has had, perhaps, in its history.

Mr. WADSWORTH. Then this is a beautiful time to incur another national debt of $5,000,000,000!

Mr. HITCHCOCK. And the theory that business could be improved by relieving the highly profitable corporations of $450,000,000 of excess-profit taxes has been proven false. This country this year is going to have the greatest number of commercial failures that it has ever had in its history.

Mr. WADSWORTH. Therefore, Mr. President, tax them more, according to the Senator!

Mr. HITCHCOCK. No, Mr. President; you do not tax the companies that are in difficulties. Your excess-profits tax falls only upon those corporations that are earning tremendous profits. You do not tax the companies that are in difficulties by an excess-profits tax; only those that are rolling in profits.

Mr. BORAH and Mr. REED of Missouri addressed the Chair.

The PRESIDING OFFICER. Does the Senator from New York yield; and if so, to whom?

Mr. WADSWORTH. I yield first to the Senator from Idaho.

Mr. BORAH. If you tax the corporations that are rolling in profits, they are monopolistic corporations, and those corporations can and always do—it has been proven by actual observation—pass the tax on to the consumer.

Mr. HITCHCOCK. Mr. President——

Mr. WADSWORTH. I think I have the floor.

Mr. HITCHCOCK. That remark was in answer to my statement. Will not the Senator yield to me a moment longer?

Mr. WADSWORTH. Very well.

Mr. HITCHCOCK. The Senator from Idaho is advancing a very beautiful theory, and it has been frequently asserted that those corporations that were enjoying the excess profits passed the tax on to the people in the shape of increased prices; but

the Senator can not point to any reduction in prices by those corporations since you relieved them of the tax.

Mr. BORAH. Of course not; but if the Senator will go back to the time when we imposed an excess-profits tax upon sugar refineries and other corporations at the time of the Spanish-American War, where we have the history of the beginning and the end of it, he will find that they passed every single dollar of that tax on to the consumer. Competitive business, or corporations engaged in competitive fields, can not do so; at any rate not so fully, but corporations enjoying a monopoly can and do. While I voted against repealing the tax, I realize much of it was passed on.

Mr. WADSWORTH. So long as there is a seller's market, it will always be done.

Mr. REED of Missouri. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Missouri?

Mr. WADSWORTH. I should like to proceed. Does the Senator want to ask me a question?

Mr. REED of Missouri. I merely wanted to call attention to the fact that the Senator states that the Secretary of the Treasury estimates a $450,000,000 deficit for this year. That is the exact amount which the experts of the Treasury estimated we would get from the excess-profits tax which was repealed. The figures exactly tally.

Mr. WADSWORTH. Yes; and the experts of the Treasury made their estimates while the revenue bill which we last passed was before us. Since then we have awakened to the realization that while we hoped to balance our revenue account, we are going to be four or five hundred million dollars behind it; and the experts' estimates were not worth the paper they were written on at that time.

The truth of the matter is, the business of the country is not making the profits and the income that we expected is not forthcoming. We can add taxes, but there comes a time when taxes cease being productive.

Mr. REED of Missouri. Of course, if we repeal them we will not get the money.

Mr. BORAH. In to-day's New York Times is a very fine illustration of the situation which confronts us. The article reads:

> A preliminary report of the Commissioner of Internal Revenue for the fiscal year ended June 30, 1922, signed by C. P. Smith, acting commissioner, shows that collections from income and profits taxes in 1921 were $3,228,137,673.75 and in 1922 $2,087,946,243.76, a decrease of $1,140,191,429.99.

Mr. WADSWORTH. May I interrupt the Senator to say that that included excess-profits taxes, which were not repealed as of that fiscal year?

Mr. BORAH. This article continues:

> The receipts for 1922 include payments of the third and fourth installments of the 1920 taxes and the first and second installments of the 1921 taxes. There are included also various payments on account of additional assessments and amended returns of income and profits taxes for prior years.
>
> The total internal-revenue collections from all sources were $3,197,451,083 in 1922 and $4,595,357,061.95 in 1921, a decrease of $1,397,905,978.95.
>
> In every State there was a falling off in income and profits tax payments in 1922 as compared with 1921, while the decrease from 1920 collections was extremely heavy.

In other words, the sources of taxes are drying up, the most deadly form of economic disease with which we can possibly be afflicted.

Mr. WADSWORTH. I thank the Senator from Idaho for contributing that statement. He has expressed briefly and comprehensively the very idea I have been trying to enunciate. I can point to an instance illustrating the situation perhaps a little more in detail, and I know I shall not have the sympathy of a great many Senators in pointing to it.

Thousands and thousands of people were starving in Russia, and a great relief organization was set up here in the United States, under Mr. Hoover, elaborately organized, and with the very last word of information from the famine-stricken districts of that unhappy country. An appeal was made to the most generous people on God's footstool to save the starving Russians from certain death. What happened? They did not have any more money they could give, and the effort failed. Mr. Hoover and his assistants, able and persuasive as they were, could not get any more money. There was none left to spare. Then we taxed the people $20,000,000, and made them give—our only recourse.

There is no more spare money in this country. Money does not drop from the sky, and you do not pick it up on the street more than once. Money is earned in the sweat of men and women who work for a living, and they are the people who pay taxes—men and women who work in all the various strata of life. The drones are but an infinitesimal fraction of the American people. The overwhelming portion of them work hard day after day, producing, producing, producing, and it is from the producers only that you can raise billions of dollars in taxes. When you have taken away the surplus over and above what is necessary to sustain themselves and their families, when you have taken away that surplus, you begin to grind them down, down, down; and no more heinous crime can be committed by any government than to impose an impossible burden of taxation upon its people.

Revolution starts there. Trace the histories of the revolutions of the past, and away down underneath nearly every one of them lies that otherwise uninteresting topic of dollars and cents. Taxation without representation accounted for the American Revolution. Overburdensome taxation by the Bourbons accounted for the French Revolution.

I am not preaching a warning here. I am no such pessimist, but I tell you this question of dollars and cents has become the greatest question that confronts the men and women of America, and I can not understand for the life of me how any man can arise and blithely suggest at this hour in our history the adding of from three and a half to seven billion dollars to our national obligations.

The very men who it is said will be benefited by it will suffer the worst in the long run. They have the 40 years to live, the period outlined in the bill. Most of us have not. They will have to earn their proportion of this money and they will be the greatest earners, and therefore the greatest contributors, among all our people, for the next generation and a half. Theirs is the energy, theirs is the enterprise, theirs is the physical and mental strength, and you say to them "Here is $250 or $300 as adjusted compensation for what you did for your country during the war." You do not say to them, as you should say, that they will have to work all the harder, that their wives will have to work all the harder, that their sons and daughters, when they grow up, will have to work all the harder to pay the money back in the form of taxes.

Mr. President, for the moment the indiscriminate distribution of cash from the Treasury may have its attractive side to the recipients, but it will not be attractive long. The Senator from North Dakota has referred to this so-called compensation as the giving of a "few paltry dollars" to these men. He said it when he said that; a few paltry dollars"! That is just what it will be to each and every man, but to the Nation it is billions.

I suppose the amounts of adjusted compensation, so called, under this bill, will average something like $300 per man. What does this bill propose? That a certificate to that effect will be handed to the soldier, if he wants it, whether he needs it or not. It makes no difference whether he is able-bodied or otherwise, rich or poor; he is invited to come and take it. It will be handed to him. The Congress does not dare impose the taxes now to pay for the face value of that certificate. So we are going to defer the taking of the money out of the Treasury of the United States and defer and avoid for a little while the imposition of very heavy taxes.

We say to the man, "You can take this certificate and go to your little country bank, if you live in a little country town, step up to the cashier's office, and borrow 50 per cent of its face value, and if you have not paid that loan back to the bank at the end of three years the Government will make the bank good."

What a way to treat self-respecting veterans! The Senator from New Mexico, I think, calls it a pawnbroker arrangement. It is, with the intimation that the note signed by the veteran, supposedly and most assuredly a self-respecting man, will not be paid; with the intimation given to him by suggesting in this bill that he can later repudiate the note and his Government will pay. That is the way he is going to get the cash, or 50 per cent of it, by going back on his own obligation. What an attractive way to educate the young men of this country.

Mr. BURSUM. Mr. President, I suggest to the Senator from New York that a very easy way to obviate that embarrassment is by adopting the amendment which I have offered.

Mr. WADSWORTH. The Senator from New Mexico has introduced an amendment which, as I understand it, will give the soldier 50 per cent in cash outright on the certificate, and the rest he can borrow.

Mr. BURSUM. No; he can not borrow on his certificate.

Mr. WADSWORTH. In any event, the money is to be paid, and eventually it will be paid, by the imposition of taxes.

Mr. BURSUM. A debt can never be paid except by money or the giving of a note.

Mr. WADSWORTH. Does the Senator believe that a debt can be paid by the giving of a note? There has been too much

of that doctrine. That is the spirit back of this bill. These people have squirmed and wriggled and wriggled and squirmed to invent a way of giving money to these men without it costing anything to anybody.

Mr. BURSUM. Mr. President, the Senator recognizes that on account of obligations incurred during the war—and this is one which might very well be charged to the war—it became necessary to borrow money. Ninety-five per cent of the commercial business of the country is conducted on a basis of credit. Credit becomes necessary at times, especially in these times, when matters are depressed on account of the universal idleness all over the country, which naturally curtails the ordinarily available supply of money, and credit becomes more essential. I think, if the facts were known, if the amount of the losses in production during the past several months on account of the strikes in this country were computed, it would seem that we have lost more money than what would pay this bonus twice over. Yet the country is not going bankrupt. It is simply a case of deciding whether we owe these veterans the money. If we owe them, we ought to pay them; and if we have not the money, we ought to use our credit to get it. There will be no less money or any more money in the country by reason of this payment. It will all remain inside of the borders of the United States.

Mr. WADSWORTH. There will be more paper money in the country. There will be an inflation of credit by just the amount that is borrowed for unproductive enterprise. That is where we have to draw the line as to the soundness or unsoundness of a financial undertaking involving the extension of credit: Is the credit to be extended for the fostering of a productive enterprise? If so, then, other things being equal, that is a sound form of credit extension; but if credit is to be extended merely for the purpose of indiscriminate distribution of cash, with no productive enterprise assured and in sight, then, instead of helping the country, you are inflating credit and inflating prices. What are these men going to do with what the Senator from North Dakota calls their "few paltry dollars"?

How large a percentage of this distribution among hundreds of thousands of men will be invested in productive enterprise and thereby justify the expansion of credit? What can be done with a capital of $100? It may be used to make the last payment on a "flivver."

Mr. REED of Missouri. Or it might be used to make the last payment on a cook stove or some household goods to enable a man to take care of his family and keep them warm.

Mr. WADSWORTH. Possibly so. Any number of instances can be found of that character, but I do not think it can be contended—and the Senator from New Mexico himself will not contend—that this form of credit is comparable with the form of credit to which he alluded a moment ago. The money will be distributed in such fashion that it can not bring about, in the long run, that return which the man himself has a right to expect. How is he going to do it? It is a few paltry dollars, just as the Senator from North Dakota said. It differs vastly from the expansion of credit for the purpose of giving to the veteran aid in the establishment of a farm or a home. That is legitimate from the standpoint I am trying to occupy. That brings the man something in the end that is well worth while. It brings the country something. It does show our appreciation for his service.

Mr. STANFIELD. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Oregon.

Mr. STANFIELD. Why does the Senator presume that the veteran will not use this money in improving his situation?

Mr. WADSWORTH. I think in the overwhelming majority of the cases the amount will be so small that it can not be used for any useful purpose.

Mr. STANFIELD. The Senator from New York is surely only presuming that the veteran is going to spend the money in a wasteful manner. Of course, the fact of the matter is that the veteran may use it for a very beneficial purpose.

Mr. WADSWORTH. But so many of the payments will be so small that they will not be able to use it in that way. At least that is my judgment of it. I have heard that expression from many veterans.

Mr. STANFIELD. The Senator is basing it wholly on his judgment that they will not use it in a useful way. These veterans are not spendthrifts. In fact the great majority of them are men of frugal habits. This money may be the means of enabling many of them to construct a home or to furnish a home or to accomplish some such useful purpose.

Mr. WADSWORTH. If we would confine our efforts to something like the amendment suggested by the senior Senator from Oregon [Mr. MCNARY] and perhaps even make that more generous with respect to the ex-service men we would really accomplish something for them and for the country; but I can not believe that this method of distribution is going to do any considerable number of them any permanent good. It is perfectly apparent that the supporters of the bill do not dare at this time, nor for three years to come, give them all the money. They are going to urge the young man to borrow half of it at a bank.

Mr. REED of Missouri. Mr. President, will the Senator yield?

Mr. WADSWORTH. I yield.

Mr. REED of Missouri. The Senator knows why they postponed payment for three years?

Mr. WADSWORTH. To avoid taxation.

Mr. REED of Missouri. No; to wait for the Democrats to come in and raise the money. That is the idea, I think.

Mr. WADSWORTH. The Senator from Missouri is the first Senator in the debate who has been entirely frank and injected a political thought into the discussion. I had hoped to steer clear of that. I remember the Senator from Montana [Mr. MYERS] something like a year ago said one evening here when we were having a rather heated debate upon the so-called bonus bill that there would not be nearly as much excitement about it if there were not 4,000,000 voters asking for it. I am sure that is not a controlling motive with Senators who are going to vote for or against the bill, and yet there have been efforts to push it into politics. I have seen efforts made to get some political advantage for one party as against another, efforts which I decry as strenuously as I may, because the men who fought for us knew no party. They belonged to every conceivable political aggregation. I do not believe they come here as members of a party either to oppose or to ask for the legislation, and I shall hope that the two great political parties may manage to keep that consideration out of the discussion.

Mr. President, much has been said concerning the overwhelming opinion of the veterans of the war that the bill should pass.

Mr. BURSUM. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from New Mexico?

Mr. WADSWORTH. I yield.

Mr. BURSUM. I merely desire for a moment to bring up the matter of expansion before the Senator gets off of that subject. I agree, of course, that whatever is appropriated and whatever is paid out will inflate the currency to that extent. But the Senator will recall that during the war the country became inflated very greatly and was inflated at a very rapid rate; that in 1920 there were sudden curtailments of credit, curtailments which were so severe in their influence upon the industries of the country and upon the banks of the country that in 1921 it became necessary, in order to stabilize and save the agricultural industry and to save the banks of the country, to reinflate by creating a credit of something over $600,000,000, which was made through the War Finance Corporation.

At the present moment we are living under a condition of depression on account of industrial controversies all over the country—the strikes; the coal strike, the railroad strike—and in sympathy with those strikes and on account of the influence which those strikes have upon other industries, other industries are paralyzed. In consequence of all this there has been a great loss of production, and that has correspondingly deflated the country to the extent of that loss of production. If we should have an inflation of six or seven hundred million dollars it would not be an injury, but rather it would be a stimulus to the business of the country. It would not hurt any.

Mr. WADSWORTH. That inflation will do us good is an economic doctrine I have never heard put forth before.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Nebraska?

Mr. WADSWORTH. I yield.

Mr. HITCHCOCK. I would like to call the attention of the Senator to the fact also that the drastic deflation which began in 1920 and ran through 1921 and did so much to ruin the cotton growers in the South and the agriculturists of the West was a policy which was followed because of the Republican platform adopted in June, 1920. The Republican platform denounced the expansion which the Senator from New Mexico [Mr. BURSUM] says produced such prosperity following the war; it denounced the Democratic policy of credits and currency expansion, and demanded and promised on the part of the Republican Party a drastic deflation, which it has carried out. Does the Senator remember that?

Mr. WADSWORTH. Is the Senator addressing the Senator from New Mexico or the Senator from New York?

Mr. HITCHCOCK. I would be glad to have either Senator of the Republican Party recall the fact.

Mr. WADSWORTH. No; I do not recollect it in that way at all.

Mr. HITCHCOCK. Will the Senator permit me to read the plank?

Mr. WADSWORTH. Oh, the Senator can read national platforms——

Mr. HITCHCOCK. I hope the Senator will let me read it.

Mr. WADSWORTH. I have not said anything about a policy of deflation at all.

Mr. HITCHCOCK. But the Senator's party did. His party demanded it. His party demanded the very thing that brought ruin upon the country.

Mr. WADSWORTH. Mr. President, is it not reasonable to expect the Senator from Nebraska to make his political speech in his own time?

Mr. HITCHCOCK. I will confine it to reading the Senator's party platform.

The PRESIDING OFFICER. The matter rests entirely with the Senator from New York whether he will yield or not.

Mr. WADSWORTH. Very well; I yield.

Mr. HITCHCOCK (reading):

> The prime cause of the "high cost of living" has been first and foremost a 50 per cent depreciation in the purchasing power of the dollar, due to a gross expansion of our currency and credit. Reduced production, burdensome taxation, swollen profits, and the increased demand for goods arising from a fictitious but enlarged buying power have been contributing causes in a greater or less degree.

I will omit the next paragraph and come to the gist of what it said:

> There is no short way out, and we decline to deceive the people with vain promises or quack remedies. But as the political party that throughout its history has stood for honest money and sound finance, we pledge ourselves to earnest and consistent attack upon the high cost of living by rigorous avoidance of further inflation in our Government borrowing, by courageous and intelligent deflation of over-expanded credit and currency.

That was the pledge of the Republican Party, and in the same plank it denounced the Democratic Party for the expansion of credit and currency which produced the two wonderfully prosperous years following the war.

Mr. WADSWORTH. Well, Mr. President, just what the declarations of the two great parties in their last national conventions have to do with the subject in hand I am not aware. I am not going to discuss the thing from the standpoint of a Republican or Democrat. I only know this, Mr. President, that the country is facing an immense deficit in its revenues. Every conceivable effort must be made to cut down the expenses. Tremendous strides have been made in that direction already. It seems to me as if even greater strides must be made in the next year or two before our Budget will balance. Indeed, desperate efforts must be made, even to the extent of abandoning what otherwise would be considered absolutely necessary projects. I need not remind Senators of the steps which already have been taken and how grave is the disappointment of the people in many parts of the country in that the Government has been unable to carry out those functions which the people believe are useful, constructive functions. The situation will be infinitely worse and will be extended over an indefinite period if action as contemplated in this bill is taken.

I need but remind Senators of one of the sacred obligations of the Government and that is the care of the disabled man. The cost of his hospitalization, his medical treatment, his compensation for injuries incurred in line of duty, and his vocational training this fiscal year will amount to $600,000,000 and we are but four years after the war. I do not begrudge one penny of the $600,000,000. At the same time we must recollect, if we have any memories at all, that after every war charges and obligations such as that increase inevitably. As the years go by that $600,000,000 will increase to $700,000,000, $800,000,000, $900,000,000, $1,000,000,000 a year. It is a burden which the American people will bear cheerfully, and yet no man will deny that it is a very, very heavy burden.

If we add to that the other legitimate expenses of the Government for carrying on those functions which the Government ought to perform, and then add the obligation contemplated in this bill, involving at least three and one-half billion dollars, and possibly as much as $7,000,000,000, and remember, at the same time, that this may not be the end of demands of this kind, I think every man who has some regard for the future contentment of the people, their happiness and their prosperity, will make up his mind that this constitutes a burden greater than can be borne. There is a limit, Mr. President; we have already reached it, as the figures show. We can not contrive taxes today that will balance our budget unless at the same time we abandon many activities that are necessary for the progress of America.

Mr. President, I merely wish to make this further observation: Much has been said about the number of the veterans who are in favor of this legislation. It is impossible, of course, to take a poll and develop thereby the sentiment of the veterans of the war. We receive conflicting reports. I have received hundreds and hundreds of letters supporting the proposed legislation, although I have been opposing it since the political campaign of 1920; I have likewise received hundreds of letters from veterans opposing it. In conclusion, as a sample of this opposition, I ask that the Secretary be allowed to read a letter addressed to me under date of August 17, 1922, from the commander of an American Legion post in the State of New York.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Secretary will read as requested.

The reading clerk read the letter, as follows:

AUGUST 17, 1922.

Senator JAMES W. WADSWORTH, Jr.,
United States Senate, Washington, D. C.

MY DEAR SENATOR: This is to advise you that the Leonard S. Morange Post, No. 464, American Legion, of Bronxville, N. Y., is unanimously opposed to the enactment of legislation intended to give a bonus or gratuity or so-called financial adjustment of compensation to veterans of the late war who suffered no disability therefrom and are not dependent on gratuities for their maintenance and support.

It is becoming increasingly apparent that at the end of this legislative session an attempt will be made to dragoon the Senate of the United States into passing certain legislation now pending which will give effect to the bonus system for military service rendered in time of war against the public enemy.

Our post invokes your opposition to such legislation.

It can not be said that the action taken by this post is either casual or remote in time. Every individual member has been afforded ample opportunity within the past six months to consider the terms of the proposed legislation and has voted as an individual over his own signature to define his position on this matter. This post also furnished a ballot to each of the few veterans of the World War who are residents in Bronxville and its vicinity and who are not affiliated with the American Legion, and the post has counted the ballots which have been cast by this element as if they were the votes of members.

This ballot has been watched with keen interest by the residents of the community, and the results thereof approved publicly without a single dissenting voice. The whole matter is one in which the people of Bronxville are keenly alive, and there can be no question about their undivided opposition to the enactment of any bonus legislation.

I have heard the argument advanced that those who are opposed to the bonus need not accept it, but have also heard that argument answered to the effect that if bonus legislation is passed it will be almost necessary for many of the beneficiaries thereunder to accept the bonus in order to pay the increased taxes which must be levied.

Respectfully yours,

DOUGLAS I. MCKAY,
Commander Leonard S. Morange Post, No. 464,
American Legion.

Mr. REED of Missouri. Mr. President, I desire to inquire of the Senator in charge of the pending bill whether he desires to go on to-night?

Mr. CURTIS. Yes, Mr. President; it is desired to go on to-night.

Mr. REED of Missouri. I wish to make some remarks in reference to the bill, but I should much prefer to make them to-morrow morning.

Mr. HEFLIN. Mr. President, I desire to suggest to the Senator from Missouri that if he does not wish to go on now I shall make a few remarks on the bill.

Mr. REED of Missouri. I shall yield to the Senator from Alabama and discuss the bill to-morrow.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. SIMMONS. Will the Senator from Alabama yield to me, in order that I may present an amendment to the pending bill?

Mr. HEFLIN. Does the Senator from North Carolina merely desire to present an amendment so that it may be offered later?

Mr. SIMMONS. Yes.

Mr. HEFLIN. I yield to the Senator for that purpose.

Mr. SIMMONS. I submit the amendment which I send to the desk, and which I intend to offer to the bill at the proper time. I ask that the amendment may be printed.

The PRESIDING OFFICER. The Senator from North Carolina offers an amendment to the pending bill, which will be printed and lie on the table.

Mr. DIAL. Will the Senator from Alabama yield to me, in order that I may present an amendment to the pending bill, and ask that it be printed?

The PRESIDING OFFICER. Does the Senator from Alabama yield to the Senator from South Carolina?

Mr. HEFLIN. I yield.

Mr. DIAL. I submit an amendment to the pending bill and ask that it may be printed and lie on the table.

The PRESIDING OFFICER. It will be so ordered.

Mr. HEFLIN. Mr. President, the Senator from New York [Mr. WADSWORTH] has called attention to a newspaper statement to the effect that several thousand people will soon go out of employment who are now working in the plants of Henry Ford; but the Senator from New York failed to tell us what Mr. Ford said was the reason for that. Mr. Ford said he was forced to that action because of conditions produced by Wall Street financiers and permitted under the reign of the Republican Party.

Mr. President, I hold in my hand a statement from the New York World of to-day, which reads as follows:

MELLON BACKS HARDING.

(Special to the World.)

WASHINGTON, August 27.—Secretary Mellon is urging the reappointment of W. P. G. Harding as governor of the Federal Reserve Board. The President has inclined to some other candidate, especially Comptroller of the Currency Crissinger, but there is opposition to Crissinger among Republican Senators.

Secretary Mellon's views, it is believed, will go far in guiding the selection and may outweigh all other considerations. The announcement from the White House that the President shares none of the animosity against Mr. Harding is taken as an indication that the latter is leading for the place.

Mr. President, I also have before me an article which appeared in the Washington Evening Star of last Saturday, I believe, under the caption "Opposed by farm bloc," and which reads:

Opposition to the reappointment of former Governor Harding, according to some close observers of Reserve Board developments, is mainly from the section of the country represented in Congress by the farm bloc, while business sentiment, on the other hand, is said to be opposing Mr. Crissinger because of his suggestion for a 3½ per cent rediscount rate on farm paper, contingent upon not more than 6 per cent being charged on original loan by banks.

I wish to bring to the attention of the country the fact that Mr. Mellon, the Secretary of the Treasury, has opposed the appointment of a farmer upon the Federal Reserve Board, and now we are told that the financiers of Wall Street—for that is what it means—do not want Mr. Crissinger appointed because he favors a reduction in the rediscount rate.

Mr. President, the Bank of England has reduced its rediscount rate and interest rate to 3 per cent, whereas the Federal reserve system in the United States has reduced the rate only to 4½ and 4 per cent. We are insisting that the rate ought to be reduced here; that on loans through our banks, whether on agricultural paper or other kinds of paper, 3 per cent rediscount at Federal reserve banks is sufficient in these hard times.

I wish to call the attention of the Senate to what has been going on under the high interest rate charged by the Federal reserve system during the deflation drive conducted by Governor Harding. I am going to read some startling statements from a letter of John Skelton Williams, former Comptroller of the Currency, addressed to the Senator from Utah [Mr. SMOOT]. In the concluding portion of his letter Mr. Williams says:

Let me in conclusion bring to your attention the simply outrageous increase which has taken place in the salaries paid by the 12 reserve banks since 1918. In that year the total amount of salaries paid, as officially reported, amounted to $4,768,449. In the 12 months ending June 30, 1922, the Federal reserve banks in their most important departments did a smaller business than in 1918. For example, there was a tremendous falling off in the work involving the handling of the Liberty bond issues, no new Liberty bonds being brought out in the past 12 months, and there was also a heavy falling off in the amount of loans, discounts, and bought paper held by the 12 reserve banks. The average amount held for the 12 months ending June 30, 1922, was about $250,000,000 less than for the calendar year 1918; and yet the official reports just published show that the 12 reserve banks paid out in salaries for the 12 months ending June 30, 1922, the huge sum of $19,987,559, an increase over the calendar year 1918, when business in the most important departments was larger than it was in the past 12 months, of $15,219,110.

I call the especial attention of Senators to the following statement:

The increase alone in the salaries paid in the past 12 months, as compared with the calendar year 1918, amounts to more than three times the total of the salaries paid during the past year to all the Members of the United States Senate, all the Members of the United States House of Representatives, the President of the United States, the Vice President, the Chief Justice of the Supreme Court, all members of the Supreme Court, all United States circuit judges, all members of the President's Cabinet, all members of the Interstate Commerce Commission, all members of the Federal Trade Commission, all members of the War Finance Commission, the General of the United States Army, and the Admiral of the Navy.

Senators, these facts are simply astounding and shocking. A deflation policy that destroyed business was at the same time accumulating millions through usurious interest rates and using it to increase the salaries of agents, clerks, and other officials of the Federal reserve banks. All this was done under the approving eye of W. P. G. Harding.

And yet we are told that the Secretary of the Treasury is begging the President of the United States to reappoint him and that the Secretary is likely to have his way about it. Who is it that is demanding this man's reappointment? Wall Street, the men whose financial policy is driving Henry Ford, a man of immense wealth himself, to shut down, the men who will not permit the Federal Reserve Board to reduce the rediscount rate at least to the figure set by the Bank of England of 3 per cent. If Great Britain can afford, with all the vexing problems that confront her, to reduce the rediscount rate in the Bank of England to 3 per cent, why is it that the Government of the United States will permit the system here to hold it at 4½ per cent upon the common man and 4 per cent to certain other interests?

What have we found, Mr. President? We found this progressive interest rate applied, and while the country was in distress and its business was going to ruin, credits were withdrawn, currency was withdrawn, and the work of destruction went on until ruin was spread all about the country. What were these bankers doing during that time? Charging inexcusably high interest rates; making tremendous profits. What were they doing with those profits?

Increasing their salaries by leaps and bounds—an increase of over $15,000,000 over the salaries paid in 1918 when the banks did more business than in the year just ended. Why, Mr. President, I have shown here before that in New York they increased the salaries of clerks who were drawing $1,200 to $12,000; clerks drawing $1,600 to $16,000; clerks drawing $1,800 to $18,000; clerks drawing $2,500 to $25,000; and in the case of the governor of the board they raised his salary to $50,000! Who was paying that? The people of the United States, whose business was dying—literally dying—under that miserable, drastic, destructive deflation policy. What else did they do? Out of the profits they made from charging an interest rate ranging from 7 per cent to 87½ per cent they accumulated this money. Sixty per cent of it would go into the Public Treasury after running expenses and dividends were paid. With all that accumulation of money they did not turn the Government's part into the Treasury. They took it and used it. They said: "Here is the time to feast," and they proceeded to set apart over $20,000,000 to build a bank palace in the Wall Street district in New York City costing more money than this Capitol, the Senate Office Building, the House Office Building, and the State, War, and Navy Building, all four combined. That is what has been going on while the business of the people was going to ruin. The people could not get money to meet their business needs. They could not get credits extended to save their business from ruin. Why, during that time of destructive deflation, under the direction of Governor Harding these bank officials took out of circulation $14 per capita when they ought to have had twice $14 per capita.

How much did that $14 per capita amount to? Multiply 110,000,000 of people by $14, and you have a billion and a half dollars taken out of circulation, when we needed more money and credits to meet the requirements of business.

Was the Federal reserve system able to extend more credits? Governor Harding said it was. In his report of 1920, before he had heard the siren song of the financiers of Wall Street, before he had looked longingly at the promised land of incoming Republicans, he made a statement in his annual report in which he said: "We have met the requirements of the war without encroaching upon our reserves. We can expand still more without doing so, and we can expand very much more by resorting to the emergency provisions of the act." That is in his report. If he could do that, and John Skelton Williams says that he could, why did he not do it?

Mr. President, I have said here dozens of times that it was because Wall Street speculators wanted to make more than $1,000,000,000 out of the cotton crop of 1920, and they made it. They wanted to make millions and hundreds of millions on the corn crop and the wheat crop and the cattle industry of the West, and they made it out of the colossal losses of legitimate business in the South and West. What did the Republican leaders do? They came here and slammed the door in the face of the soldier who bared his breast in battle and offered to die for his country. They held him back for one year, two years, three years, four years, and he is still waiting for simple justice at the hands of the Government whose life he saved.

The Senator from New York said something about putting this adjusted-compensation fund upon a counter and permitting these ex-service men to come up and take their share. I saw the Senator from New York and those with him vote to put the excess-profits fund, $450,000,000, upon the counter, and they bade the profiteers come up and take down millions each and go their way rejoicing. I saw his party, with his aid, take $90,000,000 out of the Treasury for the big income-tax payers of the country, making $540,000,000 in these two instances, and they went their way with no sound of Republican protest following in their wake.

Mr. President, I have the figures here. Four hundred and fifty millions dollars of excess-profits tax and $90,000,000 taken off of the big income-tax payers, makes $540,000,000. Divide that by 4,000,000 of young, brave, upstanding Americans and it would give them $135 cash each. My, how much aid that would have been to these poor boys during the hard times that are behind us and how much it would assist them now!

Why, I had a letter here from a Republican Member of the House from New York, Mr. FISH, asking me if I had any old clothes to give to these boys. I wrote him that I did not, but that I was in favor of adjusted compensation for these boys. Give them old clothes! That is the estimate placed upon the valor of the soldier by the average high-brow Republican. They bow and smile most graciously when the profiteer comes around. "Walk right in; what can we do for you?" "Why," he says, "I want this excess-profits tax taken off."

They say: "Very well; it shall be done." Who is that at the door? Why, they are the big income-tax payers. "What can we do for you?" "Why," they say, "we want $90,000,000 of income taxes taken off of us." They say: "Very well; it shall be done." Then the contractors come in, who have material piled about their premises that the Government never used and never moved, and they say: "What do you want?" They say, "We want $700,000,000 and more to pay for this material. We want every dollar of it." The reply is made: "Why, you are not patriotic unless you give some. Won't you give something to the Government?" "Not a cent!" "Well, have a seat; we will grant your request." You granted $90,000,000 for the big income-tax payer, and he went his way; you granted $450,000,000 for the excess-profits man, and he went his way; you granted $700,000,000 and more to the contractor, and he went his way; you left neglected and standing in the cold the man who offered his all, his life, for his country, and then you stand here and talk about denying them the paltry sum of $1.25 a day on the battle fields of France!

Why, Mr. President, that would not begin to compensate him. Before I proceed any further I want a page to take this letter from John Skelton Williams to Senator SMOOT up to the press gallery to the newspaper boys. Let them all have it. I want to see how many of them are going to carry those figures about the increase in salaries of high officials, agents, clerks, and useless employees at the Federal reserve banks. I have a system of my own that I am working on. We may not be able to reach the people from this place through certain newspapers, but we will reach them on the hustings in October, and how we are going to lay our facts before them, and we ask them whether they want to continue this crowd in power or whether they want to put some others in who are for the people! Whose Government is this? It belongs to the American people. Are we going to permit the truth to be suppressed, keep the people in the dark, shut the door in the face of the soldier, and let big profiteers and big income-tax payers and big speculators in Wall Street literally run the country for which these boys were willing to die, and for which their comrades did die? That is the question we have to answer.

But I was about to remark, it has been said that a dollar and a quarter a day would not be compensation for the soldier's valor. Why, you can not compensate him. What good will a dollar and a quarter a day do him, we are asked. It will keep him from sitting in a theater in Cleveland where they were stacking up old clothes on the stage, and having him walk down the aisle before the people that he offered to die for, and take a suit of old clothes, and walk out with it, with his head hanging down. It will prevent such as that. What good will this paltry sum, as you call it, do him?

It will help to get him something to eat, something to wear, and a place to sleep for awhile. Senators on the other side, some of them, will deny him even that; but they were as silent as the tomb when the big income-tax payers were taking off their $90,000,000, and the excess-profits men took off their $450,000,000, and those who sold war materials at tremendous profits grabbed up more than $700,000,000 and carried it away. Not one of them opened his mouth in protest. Not one of them said to these men, "Shame on you!" Not one of them halted the profiteer at the door and said to him, "You ought to be ashamed of yourself. You are a contemptible wretch. You started into this game fleecing your Government in the hour of its peril. You took advantage of its distress, of its misfortune. You sold it goods at top-notch prices and unreasonable profits, and you have made not only hundreds of thousands but millions, and you imposed upon your Government in some instances and made ten times as much stuff as you knew the Government would want. You took advantage of your Government's need in the hour of dire distress and danger, and here you come now asking us to pay you for material that you knew would never be needed. Shame on you!" Did they say that? Not a word of it. They took him by the arm, they escorted him into the committee room, where he demanded that every dollar that he had charged against the Government be paid, and he got it. Not one of them ever said a word against him. These brave boys who marched through this city, stalwart, fearless young Americans, crusaders in the cause of right and liberty, were going away to do what?

To save this Government from overthrow and to save the liberty of the world. Who would have thought that when they came back anybody, including even the profiteer, would carry on a propaganda like that which they are carrying on to-day to deny the soldier the paltry sum of $1.25 a day for offering his life in battle fire 3,000 miles from home?

You hear some of these highbrows on the other side saying, "You can not estimate the value of the risk they took." Of course you can not. God bless them, you can not measure it in any way. We will cherish it in our heart of hearts while we live, and our posterity after us will love and honor their heroic service. You can not measure it, but you can help give him something to eat; you can put food in his mouth, clothes on his back, and a shelter over his head for a time. You can help him up and get him started. Many a man in this world to-day is on his feet doing well who started with $50 or had $100 to tide him over some awful time. Two hundred and fifty or three hundred dollars in cash now would be a blessing and a benediction to these boys. I have shown that the money they have given to these profiteering human hogs, who have rooted around this Capitol until they took away more than a half billion dollars—I have shown that the money they have thrown away to the big rich, these big, purse-proud fellows who put money in your campaign in 1920, $540,000,000, was enough to have given to 4,000,000 of these boys $135 apiece.

That is not all; I have shown that if you counted that $700,000,000 on war materials never used, where they took advantage of their Government and held it up, and add it to the $540,000,000, it would give to each and every one of 4,000,000 boys $310 cash, and you would have settled the financial obligation long past due. But you would not do that. You permitted that money to go, and now you have it in your power to compel England and France to pay a billion and a half dollars, and that would clean this debt up on a cash basis; but you will not do that. Wall Street will not permit you to do it. Wall Street collected more than $1,700,000,000 from France and England, but they are not going to permit you to do it.

You have Republican editors and a few others in Europe now working up a propaganda to cancel this debt. That is what is going on, and you give away ten or eleven billion dollars of the American people's money, with your own brave soldiery in distress at home, denying them adjusted compensation.

What is adjusted compensation? They try to hide behind the talk about a "bonus." It is not a bonus. What is adjusted compensation? Here is a young soldier who comes up and says, "I left my home at a certain time. I was gone so many months, was 'over there,' and served in France. I came back here, and you kept me away from where I used to work six months, through no fault of mine; I could not get there, and you did not get me there, and I have lost that time. I was doing well when I left here, and when I came back I had no job, my employment was gone, and I had not a nickel in my pocket."

They had to take up collections to get clothes in the playhouses of the country. This young man says, "I come now to present my little bill. It is small but it will help me greatly. I don't know whether you are going to pay it or not, but I claim you owe me that much. I do not ask you to present to me that amount as a gift, but I claim that you are due me that much." And what do you do? You will not even permit him to have his account adjudicated. You did not let him wait a week when you called him to the colors, but you have refused for four years to even give him a hearing on adjusted compensation. Some get up and say it is a bonus. The Senator from New York says the fact that you are going to give them all exactly the same amount shows it is a bonus. That is a strange doctrine. Four hundred and thirty-five Members of the House of Representatives are drawing $7,500 each; they get exactly the same pay. Ninety-six Senators are drawing exactly the same amount, and when we draw our salary, which is supposed to be compensation for service rendered according to the theory of the Senator from New York, we are getting a bonus. Four hundred and thirty-five Members in the House draw $7,500, and 96 Senators draw that amount, and because it is the same amount and paid on the same day under the theory of the Senator from New York it is a bonus. I think

it must be apparent to everyone that that suggestion is utterly ridiculous.

There is no bonus about it. As the Senator from Arizona [Mr. ASHURST] said, we paid for the shells, we paid for the powder in them, we paid for the bullet, we paid for the steel and the lead, we paid for the gun, we paid for the saber, we paid for all those things; we paid for implements and vehicles and the like to get the boys to the battle ground. War material, of course, had to be bought; but the spirit that abides in the breasts of our brave boys was what we were relying on. When they got there we knew that the thing would not last long, and it did not. Now it is over, and these human beings, made in God's image, whose valor and heroism saved the day, come home, and they are shoved back by the contractor who made hundreds and thousands of saddles that he knew we would never need and got his money, and there were other contractors who ran their arms into the Treasury, by the sanction of the Republican Congress, and took this money out, while the soldier stood in the background; and the profiteer got his, and the big income-tax payer got his.

Then came the army of tariff barons beating at the door, and we stood there and said, "Gentlemen, surely you will not make the soldiers wait any longer; they are taking up collections to get clothes for them; they are selling them on the auction block in Boston; they have nothing to live on, nothing to wear, no place to sleep; you will not make them wait any longer; I know you will not; 500,000 of them are out of employment and are in distress; I know you will not make them wait." But they said, "Shove them aside, shove them aside."

Here come the tariff barons marching upon a Republican Congress. They are hungry. They want an opportunity to tax the American people $3,000,000,000 in the year 1922, and if they can get their oppressive, tyrannical tariff bill through they will do it. They will get back some of the money they gave to the Republican campaign fund in 1920. "Get back, you boys who wore the khaki on the fields of France. Wait until these men are served."

The soldier boy stood there with a look of humiliation and disappointment on his face. He said, "They all got back for us over yonder. Nobody wanted to get in front of us over there." They said "Go to it, boys. We are relying on you. All that is dear at home is in your hands. You are the first consideration, soldiers of our country, standing between us and the overthrow of our Government and the loss of our liberty." First over there but last at home. That is the record of the Republican Party. God save the Republic from the continued affliction of such leadership and control.

Mr. President, the Senator from New York told us that when you keep taxing the people you get down to a certain point and revolutions are born. I want to tell the Senator from New York that the deflation policy conducted by his party cost the South and the West billions of dollars, and you have reduced almost to a state of pauperism thousands and thousands of men who were well-to-do in 1919. If reducing a man from a state of prosperity to a state of pauperism in 12 months is not drastic destructive deflation, what is it?

Mr. STANFIELD. Mr. President, day after day, it seems, we sit here and listen to the Senator from Alabama stating that the deflation policy was the policy of the Federal Reserve Board. Now he has reversed himself, and says it was the policy of the Republican Party, when surely the Senator from Alabama knows that the Federal Reserve Board was the creation of the Democratic Party.

Mr. HEFLIN. Certainly. I have said here 30 times, perhaps, that under Republican rule it was perverted from the ends of its institution, maladministered; that the progressive interest rate amendment to the Federal reserve act was introduced in this body by Senator MCLEAN, of Connecticut, a Republican, and in the House by Mr. PLATT, of New York, a Republican, and passed through a Republican Congress; and that the deflation resolution, introduced by Senator MCCORMICK, of Illinois, passed a Republican Senate, and the Republican platform adopted in June in Chicago declared for the deflation policy and condemned the Democratic Party for extending the credits it did extend to the people. I have said that before.

Mr. President, I was about to recount to the Senator from New York, when my friend from Oregon interrupted me, the ruin wrought in my State under the deflation policy. The farmers of my State alone were robbed of $102,000,000 on one cotton crop of 640,000 bales in one year. I saw big western mules, for which our farmers paid $250 and $300 at Christmas, 1919, sell for $40 and $50 during the year 1920. That is the work of your deflation policy.

Yet the Senator from New York, interrupted by the Senator from Idaho, said that the income taxes and other taxes had fallen off nearly $1,000,000,000. Of course, they took off nearly a hundred millions for the big income-tax payers. They took off $450,000,000 for the excess-profits tax men, the big profiteers. That accounts for over half a billion of it right there. They destroyed the purchasing power and the debt-paying power of the people, and that reduced the volume of business, and all this ruin has been wrought, and now you are face to face with the situation to which Mr. Ford, a man worth many millions of dollars himself, has called to your attention.

Before I close I want to say this: A clever Senator in this body, and one who sympathizes with my fight on deflation, who happens to be on the other side, a man of wealth himself, told me that just before they started this deflation drive; yes, before the farmer and average business man was attacked with poison gas—poison gas administered by W. P. G., known henceforth as William Poison Gas Harding—that they sent word to him: "You had better prepare for the storm before it breaks. We are going to have deflation." He said: "Prepare for the storm before it breaks. My business is such that I can not escape without heavy losses. I will lose thousands of dollars if deflation is brought upon me." And he said to me: "I did. That deflation policy cost me many thousands of dollars."

Yet the Secretary of the Treasury and Wall Street are seeking to have William Poison Gas Harding reappointed. What did he do? What happened in the situation that I have just mentioned? It is like a situation where a theater is full of people from the rank and file of our citizenship while men of great wealth and royal personages are sitting in a box. A bomb is placed under the building. The fuse is ready to be touched off and the work of destruction done. Quietly some man slips down to the box and whispers "Clear out of this box quietly. We are going to blow up this building. Don't make any noise, but get out before the bomb explodes." You see the men of wealth and the royal party get up and walk out, and the unsuspecting mass sit still while the work of destruction is done.

After the wealthy ones and the royal party have gone the wretch touches off the fuse, the bomb explodes, the building is destroyed, and thousands of lives go into eternity without a moment's warning. That is what happened when William Poison Gas Harding touched off the Republican Wall Street bomb. They tell us that he sent word out to the rich of the country, "Get out, deflation is coming." But no warning was given to the people of the South or the people of the West, the common mass. He caught them, administered poison gas, shelled them with field guns, and blew them up with bombs.

I protest against his reappointment, and assert that he can not be confirmed if reappointed. No Senator from the South will vote for his confirmation except two or possibly three, and no Senator from the West, in my judgment; not one would vote to confirm him.

The PRESIDING OFFICER. The Senator from Alabama will suspend while the Chair announces that the hour of 6 o'clock having arrived, under the unanimous-consent agreement hereafter debate is confined to 20 minutes on the amendments. The Senator has 20 minutes on the pending amendment.

Mr. HEFLIN. Mr. President, I have spoken longer than I intended, but I propose to continue to condemn this crime until it is a stench in the nostrils of every honest man and woman in the Republic. I intend to see to it that it is condemned and that those who perpetrate it are punished. That is a part of my business as a Senator from a sovereign State who loves his country and who wants to see justice done between man and man, and the great instrumentalities of the Republic so administered that they will bring about the greatest good to the greatest number.

I want to have the great Federal reserve banking system honestly, economically, and efficiently administered. I want to see it restored to the respect and confidence of the people. This can not be done with Governor Harding at the head of it.

PETITION AND MEMORIAL.

Mr. MCNARY (for Mr. NORRIS) presented a petition of sundry citizens of Bartley, Cambridge, Wilsonville, Indianola, Maywood, Freedom, and Danbury, all in the State of Nebraska, praying that the Federal Government take over and operate the railroads and coal mines, which was referred to the Committee on Interstate Commerce.

Mr. WILLIS presented a resolution of Chippewa Grange, No. 1912, Patrons of Husbandry, of Doylestown, Ohio, protesting against the passage of ship subsidy legislation, which was referred to the Committee on Commerce.

CIVIL SUITS IN UNITED STATES DISTRICT COURTS.

Mr. CUMMINS, from the Committee on the Judiciary, to which was referred the bill (S. 3918) to amend section 51 of chapter 4 of the Judicial Code, reported it with amendments and submitted a report (No. 892) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WATSON of Indiana:

A bill (S. 3959) to direct the Secretary of the Interior to grant to certain persons and corporations leases of certain lands, and the oil and gas deposits therein, lying south of the medial line of the main channel of Red River in Oklahoma, and for other purposes; to the Committee on Public Lands and Surveys.

By Mr. McCUMBER:

A bill (S. 3960) for the relief of Daniel M. Slattery; to the Committee on Military Affairs.

A bill (S. 3961) granting an increase of pension to Elizabeth C. Curtis (with an accompanying paper); to the Committee on Pensions.

By Mr. NEW:

A bill (S. 3962) to prohibit the sending of threatening letters through the mails, and for other purposes; to the Committee on the Judiciary.

By Mr. ROBINSON (for Mr. HARRISON):

Joint resolution (S. J. Res. 239) authorizing the Secretary of War to investigate the feasibility of constructing bridges across West and East Pascagoula Rivers, the Bay of Biloxi, and Bay St. Louis, in the State of Mississippi, for purposes of the national defense; to the Committee on Military Affairs.

WITHDRAWAL OF PAPERS—ADELIA SULLIVAN.

On motion of Mr. NEW, it was—

Ordered, That the papers filed with the bill (S. 2577, 66th Congress) for the relief of Adelia Sullivan, be withdrawn from the files of the Senate, no adverse report having been made thereon.

SPEECH BY SENATOR HARRISON.

Mr. McKELLAR. I ask unanimous consent to have printed in the RECORD in 8-point type a speech delivered by the Senator from Mississippi [Mr. HARRISON] August 26, 1922, at the celebration of the sixty-fourth anniversary of the Lincoln-Douglas debate, at Freeport, Ill.

There being no objection, the speech was ordered to be printed in the RECORD in 8-point type, as follows:

Senator HARRISON spoke as follows:

"Ladies and gentlemen, to come to Freeport under any circumstances is a pleasure, but to participate in this celebration, the sixty-fourth anniversary of the occasion upon which the eyes of the country were focused, the debate between Abraham Lincoln and Stephen A. Douglas, is an opportunity that comes to but few men.

"The debates between these intellectual giants attracted universal attention and were the most far-reaching in effect in the history of the country.

"From the earliest period of our colonial history slavery had been recognized and practiced by 12 of the original 13 States. When our independence was won slavery immediately became an appendage to our body politic. As new territory was acquired and more States were formed the slavery question began to be an issue. It became, therefore, the policy of the Government to admit States in pairs, so that when a State was admitted into the Union permitting slavery another was admitted prohibiting slavery. Thus it was that when Mississippi was admitted into the Union permitting slavery Illinois was likewise admitted into the Union as an antislave State.

"Sharp contest of conflicting views, however, did not arise until 1820, when Missouri, a part of the Louisiana Purchase, was formed into a State and admitted into the Union under congressional adjustment known as the Missouri Compromise, permitting that State to be admitted as a slave State, but prohibiting in the future slavery in all other States that might be admitted north of the thirty-sixth degree and thirty minutes north latitude.

"The Missouri Compromise seemed to settle the slavery question until in the settlement of the Mexican War new lands were acquired and the vexatious question again arose. The issue became so acute that Clay, the great pacificator, then an old man, who had been the leader in bringing about the compromise of 1820, was called from retirement in Kentucky and under his leadership the compromise measures of 1850 were agreed upon and enacted into law. These measures, in substance, approved California's admission as a free State, but adhered to the principle that in the future those States in that territory seeking admission should determine for themselves whether they were to be admitted as free or slave States.

"In 1853 a bill was introduced into the Senate for the admission of Nebraska into statehood. Nebraska was north of the thirty-sixth degree and thirty minutes north latitude. The constitution of Nebraska was silent with respect to slavery. Senator Douglas, at that time in the Senate of the United States, was chairman of the committee to which it was referred. The bill was reported to the Senate by him with an amendment in substance stating 'that all questions pertaining to slavery in the Territories and in the new States to be formed therefrom are to be left to the decision of the people residing therein through their appropriate representatives.' In other words, while indirectly repealing the Missouri Compromise of 1820, it was but carrying out the principle enunciated in the later compromise of 1850. The Nebraska bill, on the motion of Senator Dickson of Kentucky, was amended on the floor of the Senate, and the amendment finally became a law, expressly repealing the Missouri Compromise and permitting slavery to exist in the new States to which slaves might be carried if the people of the States should desire it.

"The adoption of this amendment was the beginning of a political explosion in every northern State. Lincoln, who had served one term in the lower House of Congress, and who had voted no less than 40 times for the Wilmot proviso, which sought to prohibit slavery in those lands acquired from the Mexican War, was aroused. He had been quietly practicing his profession in the capital of your State, but on the reopening of the slavery question he immediately gave up his practice and, like one inspired, went from city to city criticizing and denouncing Douglas and those with whom he was allied in pressing the Nebraska bill with the amendment repealing the Missouri Compromise. When Congress adjourned Douglas returned home, and from one end of the State to the other he traveled, speaking to multitudes, giving an account of his stewardship and his course as the champion of State sovereignty. This was in 1854. Four years later Douglas came up for reelection, and was the nominee of his party for the Senate. Lincoln became his opponent as the nominee of the Republican Party.

"The slavery issue had not abated, but had become more intense. Around the fireside, in workshops, in countinghouses, and at every public function it was the subject above all others that engrossed attention. In the meanwhile Kansas had applied to the Federal Government for admission as a State. Her representatives had agreed upon what was known as the Lecompton constitution, guaranteeing to her people the right of slavery within the State. Her admission was championed by the Buchanan administration, of which Douglas was one of the most influential spokesmen on the floor of the Senate.

"When the question came up for consideration, Douglas defied his own party administration and led the fight against the admission of Kansas as a State under the circumstances. He took the position which he had ever maintained and to which he adhered until his death, that the people should have the right to pass on their constitution, and in this instance the Lecompton constitution might be foisted upon the people without their approval. So earnestly and persistently did he combat the admission of Kansas into the Union under such conditions that he aroused the antagonism of the Federal administration and many of his own party leaders. But may it be said to the constancy of his purpose and devotion to principle that finally the Lecompton constitution was defeated and Kansas was admitted as a State under a constitution adopted by its people.

"He at that time had become the stormy petrel of American politics. He had warm friends and bitter enemies. The part he took in the debates was always a strong and dominating part. He never vacillated, but always stepped to the front as a leader in whatever position he took. It was at that time and under those circumstances that the celebrated debates, one of which we to-day commemorate, were held in seven leading centers throughout the State.

"Mr. Lincoln challenged Douglas and Douglas accepted. The terms of the debates were that on the first day Douglas was to be allowed 1 hour to open, Lincoln 1 hour and 30 minutes to answer, and then Douglas a rejoinder of 30 minutes. At the next place they were to alternate, and so on throughout the seven memorable debates.

"No two political gladiators ever fought over such a momentous question and with more settled convictions of the correctness of their respective positions. No two men ever measured up in higher degree and drew such crowds. The people came from every section and other States, and what was said was heralded by the press throughout the country, and accepted as a lead for others of the same thought to follow. The arena was Illinois; the amphitheater was the whole country. Mr. Douglas was then the foremost figure in public life. Clay, Calhoun, Webster, Cass, and Benton had passed from the political stage and he was left the unrivaled debater—the towering personality, the most commanding figure in America. He was

'the little giant of the West'—so known, so heralded, and so crowned. Abraham Lincoln at that time was little known and his prominence in that debate grew out of the fact that he was Douglas's opponent.

"It was a debate worthy of our very best traditions, and has occupied as it ever will a high place in the political literature of America. Stephen A. Douglas was a man of striking personality—short in stature, with a lionlike head, and deep, penetrating and attractive voice. His manner of speech was captivating, his power of expression seductive, and his grasp of public questions at that time unequaled by anyone. He could move audiences to tears or cheers with the same ease that he could steal away their thoughts. He could play upon their racial sensibilities, their partisan prejudices, with the same success that he could arouse their patriotic impulses. Crowds bent under the power of his oratory and the force of his logic as tall pines sway under the force of a storm. As a debater few men were his equal and none his superior. His followers were confined to no locality and they worshiped him with a devotion that amounted to idolatry. His utterances were their teachings and his acts the compass that guided their political movements.

"Mr. Lincoln at that time was not so fortunately circumstanced. He did not possess the influence that generally attaches to a leader whose reputation is bound by no State and who forms an important part in the machinery of the administration that moves the Government. He had never been permitted to shake the 'tree of patronage' that Hesperidian apples might fall at the feet of his friends. He had never held the Senate in the grip of his logic or swayed them with the power of his eloquence, and therefore he could not draw crowds as one to whom great reputation allures. However, his keen intellect, his constant poise, his majestic simplicity, his power of close analysis, and the natural results of an appeal forcefully and sincerely made in behalf of humanity soon ingratiated him into the hearts of his fellow Americans and drew from his giant antagonist that degree of respect that is always accorded to one exceptionally endowed.

"It is one of the many instances that is revealed through our form of government—that he who to-day may be poor to-morrow may be rich; that the capitalist of to-day may have been the laborer of yesterday. In a country such as ours, with opportunities unlimited, deaf to caste and rank, one who to-day may shine only in the reflected glory of another to-morrow may live in such glory that he is able to share it with his one-time benefactor.

"In 1858 Lincoln was known throughout this country only as the man who engaged in joint debates with Stephen A. Douglas. To-day Douglas is known as the man who engaged in joint debates with Abraham Lincoln.

"And to-day, as I stand before this great audience, championing the side against which one of the most beloved characters of American history stood and fought, I realize the magnitude of my task and the mighty current which I must combat, but I am sure that those of you who are not less proud of the name of Lincoln but proud of that other great Illinoisan who was Illinois's outstanding political character for almost a generation, reflecting credit upon her proud name and whose memory every son of Illinois and of this whole country should ever revere, will bear with me in patience while I present in a nonpartisan, unprejudiced, dispassionate way the principles which were the incarnation of his mighty genius and for which he stood with a devotion as unwavering as the sun and a constancy as fixed as the stars. And if in the presentation of the issues involved in that debate and the principles for which each contended I should say something that might meet with your disapproval and you should think that it would have been better if left unsaid, you will understand that my purpose is not to relight the fires that have long gone out or rekindle the smoldering prejudices that now lie dormant; they are presented because the exigencies of the occasion demand it and a discussion of the question would be colorless without them.

"Douglas understood, as few men in his day, the principles upon which this Government was founded. No one was more devoted to them or more fearless and constant in exposition of them. With slavery as unpopular before the people of Illinois as it was in 1858, it took courage on the part of a political leader to stand before his Illinois constituents and defend the right of the people of other States to countenance and practice it in the way in which he did. And those principles were defended without respect to the audience before whom he spoke or the section in which he happened to be. He believed in those principles with all his heart, and what gave him courage, as he so often said, was 'that they could be uttered in one section just the same as they could in another.'

"It is easy for public men to drift upon the tide of popular opinion, but it takes courage and the highest order of statesmanship to combat a popular theory in which all the prejudices of the moment are interwoven.

"How easy in 1858 would it have been for Douglas, whose reputation was unbounded and whose place was secure, to have played upon the sensibilities of the people of Illinois, to have inveighed against slavery, which to them was most unpopular, to have aroused their every prejudice, and to have appealed to those sentiments that would have met their approval without imposing upon him the necessity of an explanation or excuse! But how unlike Douglas it would have been if he had followed such a course. He would have spurned the thought and loathed the idea.

"Stephen A. Douglas was a man of the people. He personified in his every political act what Lincoln in his immortal words proclaimed, that this was a 'government of the people, for the people, and by the people.' He had faith in the wisdom of those men who builded better than they knew the framework upon which this mighty Nation should stand. He believed that the Federal Constitution was the most ideal piece of constructive statesmanship ever conceived by man; that it represented the most perfect form of government and insured the greatest guaranty of the rights of the people in its dual form. If he was zealous for the powers delegated by it specifically to the Federal Government, he was more so of the rights reserved in its hidden lines to the States. He believed in popular sovereignty in its every meaning and acceptation. It was with him a passion—an obsession. It was the anchor to which he tied his whole political faith. He recognized that the closer the Government is brought to the people, the more it will be understood, the greater will it be appreciated, the more economically administered, and rigidly, yet impartially, enforced,

"Neither political exigency or party devotion could modify those ideas. His adherence to that rule of political conduct was inflexible, his faith in it unswerving. To those who assailed his constancy to popular government and pictured him as an advocate of slavery, as a champion of its extension, as the archmover in spreading it broadcast all over the land, let me remind them that they need only recall that when President Buchanan, the leader of his party, employed his every influence to have Kansas admitted into the Union as a slave State under the provisions of the Lecompton constitution, Douglas was unyielding to his principles and defied not only that administration but some of his warmest personal friends in his opposition to it, contending that the people of Kansas should say what kind of a constitution they desired.

"And how completely does it answer the argument that Douglas was advocating slavery! How easy would it have been for him—if he had desired to promote the extension of slavery—to have surrendered the principle for which he had ever battled and allowed the Lecompton constitution and the admission of Kansas as a slave State into statehood without the approval of her people! No. Slavery to him was not the big question—it was only interwoven in the larger question of the right of the people of a State, under the Federal Constitution, to control in all matters coming under the jurisdiction of the States, without outside interference. And it was due to his unrelenting opposition that Kansas's admission into the Union as a slave State was delayed, and finally when the voice of the people was heard it was admitted as a free State.

"That was the dominant issue of those great debates, and with a logic unanswerable, a persistence irresistible, and a sincerity of expression that carried weight in every utterance he pressed that thought in its every phase and refused to be diverted therefrom.

"Douglas was not an advocate of slavery. Indeed, in speech after speech in that series of debates he approved the course of Illinois excluding slavery; but in no instance did he ever modify or soften his opposition to the right of the negro to citizenship under the Constitution. He combated with all the force of his mighty genius the assertion that the Declaration of Independence declared that the negro was included in the phrase 'all men were created equal.' And in the course of those debates, when that contention was made, his reply was that at the time of the adoption of the Declaration of Independence 12 out of the 13 original Colonies not only indorsed slavery but practiced it, his argument being that if what Mr. Lincoln and those who contended as he did were true, that is, that the Declaration of Independence had sought to give the negro equality of citizenship, that it was contrary to the practice of practically every Representative in the Congress that declared

for our independence and which Representatives and their States, following the declaration, failed to practice such a contention.

"There is an impression, general in its scope, that in those remarkable debates one of the important questions upon which Lincoln and Douglas divided was the right of the negro to social and political equality. Nothing could have been further from the issues of that campaign. It is quite true that Mr. Lincoln contended that that clause of the Declaration of Independence that 'all men are created equal' meant that the negro should have and was entitled to all the natural rights enunciated in the Declaration of Independence. To be specific, he said 'in the right to eat the bread which his own hand earned, he is the equal of every living man.' But, said he, 'anything that argues me into the idea of perfect social and political equality with the negro is but a specious and fantastic arrangement of words by which a man can prove a horse chestnut to be a chestnut horse. I have no purpose to introduce political and social equality between the white and the black races. There is a physical difference between the two, which, in my judgment, will probably forever forbid their living together upon the footing of perfect equality, and inasmuch as it becomes a necessity that there must be a difference I am in favor of the race to which I belong having the superior position. I will say then that I am not nor ever have been in favor of making voters or jurors of negroes nor of qualifying them to hold office.'

"Those views were shared by Mr. Douglas, and in expressions time after time he stood upon the same principles.

"I have cited these instances to disprove the common acceptation and at the same time as an illustration to show the remarkable change that has come over the country in the last 60 years.

"When all the chaff is removed from the subject matter of those debates, with side questions eliminated, it came down to the issue of whether the people of a State should decide for themselves the right of slavery or whether the human element should be accepted to the exclusion of the principles enunciated in the organic law.

"On one hand stood Mr. Douglas—not advancing slavery, not indorsing it, yet advocating its extension if the people of a State desired it. On the other hand stood Mr. Lincoln, hating slavery, condemning it, crying out against it as inhumane and morally wrong and advocating the prevention of its extension in every way. He was not for destroying it in those States where under the law it was established and existed but believed that by prohibiting a further extension of it and eliminating it in Territories it would gradually work its own destruction. As strong as Mr. Lincoln was in his opposition to slavery he did not even go so far against slavery as to say that with one fell swoop he would get rid of it in the District of Columbia. He recognized that fortunes had been invested in the property rights incident to slavery and that it could only be extinguished through a conservative course of gradual elimination.

"Mr. Douglas looked upon the Dred Scott decision as a wise judgment and as conforming to his interpretation of the Constitution. He respected the judgment of the Supreme Court and felt constrained when one of its decisions was rendered, whether they met his approval or not, to abide the consequences. He believed that it should be the final tribunal to which contested constitutional questions should go, and that when the decision was handed down an appeal to no other source should be permitted. It was his contention that in this, our peculiar form of government, there must be a final arbiter, and that when the people failed to respect it and abide by its decisions the very pillars of our Government would be threatened.

"The Supreme Court having held that the master of Dred Scott, a slave, had a right to carry him into a Territory of the United States, the Congress was powerless under the Constitution to give him his freedom. Mr. Lincoln argued against that decision, condemned it, held it up to scorn, questioned its correctness, and asserted the right of appeal from it either to Congress or to the people. And in this connection may I suggest that it was the far-sighted and political adroitness of Mr. Lincoln in the debate held here in Freeport that forced an answer from Mr. Douglas to the question whether 'the people of a United States Territory, in any lawful way, against the wish of any citizen of the United States, exclude slavery from its limits,' prior to the adoption of its constitution that perhaps reelected Douglas to the Senate, but blazed the way for Mr. Lincoln to become President of the United States. It was the answer of Mr. Douglas to that question that reveals the only time in all those debates or in his whole legislative career where one might believe that he did not answer candidly the question presented, the only time when it would appear he forsook the principles to which he was wedded and succumbed to the political exigencies of the hour. When he said that for laws to be enforced they must be backed by public opinion, it carried with it an assumption that the people, as a mass, would repeal a law by its continued and uninterrupted violation.

"It is remarkably strange in this day of independent thought and action when the theories and principles of our Government are very often too little understood that such tremendous changes have taken place in the enactment of legislation and the practice of governments from those contended for by Lincoln and Douglas.

"How little is the sentiment to-day for the repeal of the decisions of the Supreme Court of the United States through an appeal to the Congress or to the people. With what respect do the American people unanimously look upon the integrity of the members of the Supreme Court and the decisions of that great tribunal. How unwise would it be if the Senators should vote for the resolution recently introduced by one of the Senators of the United States to override a decision of the Supreme Court when two-thirds of the Congress should desire it. How dangerous to the perpetuity of our institutions if the Congress should seriously contend and say that decisions of the Supreme Court could be overturned by the Congress or the people at the ballot box.

"The faith of the American people in the integrity of our courts can not be shattered, and to a great degree, perhaps, is the stability of our form of government dependent upon the character of men who compose the Supreme Bench and the respect of all the people for its decisions.

"And may I be permitted to say in this presence that as Lincoln declared and Douglas believed, the progress and stability and dominating influence of our Government among the nations of the world are measured in large degree by the character of our electorate.

"Men in public life to-day seeking political preferment may challenge the convictions of Lincoln and forget the utterances of Douglas and appeal to race prejudice and pamper the pride of racial elements in order to obtain their votes, but in the heart of this country and in the sober judgment of its people they recognize that both Lincoln and Douglas were right when they stood for a Caucasian electorate, literate and high-minded, unhyphenated, and thoroughly American. America to-day is great, dominant, and commanding, but if it is to continue so and maintain its great influence in world affairs its heartbeats must remain American, its blood pure, and its ideals high. Whenever the principles upon which our fathers built this Government are changed and their teachings forgotten, our shores overrun by those who love another country better than America, then we will become 'a house divided against itself' and it can not endure.

"And how, in so many matters of legislation, have we moved away from the principles of the fathers and the teachings of Douglas in wiping out State lines, building up in the National Capital a bureaucracy, and concentrating all the powers in the Federal Government? Under the tendency of the times in the movement on to Washington to obtain appropriations for governmental agencies of which the fathers never conceived nor the Constitution contemplated, we have seen State governments become almost powerless and too often inefficient. What the American people to-day need is an old-time awakening, reviving the teachings of the fathers, and, as Douglas contended, leaving in the hands of the people those powers which, under the Constitution, they were designed to have.

"How often in those debates did the illustrious Douglas cite the legislation that was enforced in Maine, that was undesirable to the people of Illinois? And with what sincerity did the martyred Lincoln declare that because of climatic or other natural causes laws could not be uniform but must be different in the various States. And it is to the credit of these two great men, trained in different political fields of thought, nursed in the schools of different political theories, that they should have agreed upon the one principle that because of a difference in the occupation of the people of the various States a law applicable to one might not be applicable to the other, and that the people of one State should not attempt to foist upon the people of another laws that were inimical to their interests and not desired by them.

"If Douglas could return to-day, how violent would he be in his opposition to some of the new-fangled ideas and tendencies of Federal encroachment upon the sovereign rights of the people. And I have no doubt that the silent Lincoln would throw the mighty power of his great influence against those things which he conceded in those debates as destructive of popular sover-

eignty and the rights of the people. It would be a long stretch of the imagination to see Douglas in the Senate of the United States championing a measure that would clothe the Federal Government with power to go into the State of Mississippi and because of an infraction of the police laws of that State, be it murder or rape, to seek to impose penalties upon the taxpayers of the county in which the crime was committed for the benefit of the Federal Treasury because of the failure of its officers to enforce the law; and I can not conceive of Lincoln, with the views expressed in these remarkable debates in answer to the advocacy of Douglas for popular sovereignty, would have permitted, with his approval, a law being passed vesting in the Federal Government authority to have gone into the county of St. Clair and extract from the sureties of the bond of the sheriff or other officers of that county and from its innocent taxpayers large sums as penalties because of the ruthless and inexcusable killing of many of its citizens a few years ago in East St. Louis. I can not in my wildest imagination see either Lincoln or Douglas permitting the arm of the Federal Government to reach into your State on that recent most inexcusable and reprehensible occurrence of citizens of your State being shot down in cold blood at Herrin and to again punish innocent taxpayers of Williamson County because the officers of that county failed or were unable to protect the lives of its citizens.

"The people of a State must have and be permitted to exercise certain powers, and one of the most important of all is to see that its police laws are enforced and that the lives and property of its citizens are protected. The people have the power to say who shall be their officers not only to make the laws for the protection of life and property but to say what officers shall enforce them. Because, forsooth, mistakes are made in the selection and innocent people are sometimes injured, it does not and should not license the Federal Government to step in and thereby change the whole fabric of our constitutional rights. Let us enforce the laws, and the best way to do it is to see that the right kind of individuals are selected for their enforcement. Under the present tendency of Federal encroachment and concentration of power in the Federal Government there has been recently passed in the House of Representatives and is now on the calendar of the United States Senate a measure that proposes to do just those things against which Lincoln and Douglas inveighed and their spirits no doubt would revolt.

"What we need to-day in this wonderful country is a rebaptism in the faith of our fathers and a reinculcation of the principles upon which this Government was founded. There should be carried on in every hamlet in this broad land a plan of education, not only by the parents around the hearthstone but in the public schools, informing all ages of those teachings upon which this great dual form of Government was founded and through an adherence to which it has progressed by leaps and bounds to its present commanding and dominant position among all the nations of the world. There is in this day and time too little of the faith of the fathers and too slight understanding of the theories which they sought to bequeath to posterity.

"I wish there could be organized in this country a campaign of education that would compel the teachings in the public schools of the principles upon which the rights of the States and Federal Government are based, so that as generations come on and new problems are presented they can at least be met by an intelligent conception and application of those principles upon which the Government was founded.

"One of the evils of this day is the failure of so many American voters to possess such a spirit of Americanism that would lead them to forget the interest of other countries when those interests conflict with the general welfare of our own. If the qualifications in the various States of the Union—and that, under the teachings of Douglas, was where the qualifications should be imposed—were more restrictive and compelled a higher degree of intelligence and in many instances a longer residence in America—certainly long enough for an understanding and respect for the principles and institutions of this Government to be planted in their bosoms—then this country's future would be more secure. The laxity of our election laws and the encouragement in the last generation of undesirable peoples from foreign lands who did not understand and could not accept the spirit of our institutions has detracted more from than it has elevated the character of our citizenship.

"The educational test for immigrants from foreign shores before admission as citizens into this country was a step in the right direction—but their right to participate in our elections very often comes too soon after their arrival here. I wish that I had the power to bring to the attention of every State in the American Union the dangers that lurk in an un-American and illiterate electorate and influence them to enact such election laws as would insure a more intelligent and American electorate. If the American people would attend more to the character of its voters and the purity of its elections, and adhere more strictly to the principles upon which the Government was founded, the rights of the people would be better guaranteed and this Government would then ever be a fixed star, the brightest of all in the great firmament of nations.

"But, ladies and gentlemen, while there has always been and ever will be two theories of political thought, two great political parties, made up of patriotic American citizens unswerving in their allegiance, there is no reason why we should be intolerant of the opinion of others, inconsiderate of their views, and unwilling to concede to each honesty of purpose and loyalty to the convictions which they hold. And if that spirit pervades the land and the principles for which Douglas contended and which Lincoln conceded—the sovereign rights of the people—this Government will ever be secure and its people contented.

"And, in conclusion, will you permit me to say that even though the clash of those two intellectual giants in 1858 gripped the attention of the country and presaged an antagonistic feeling between the sections, causing a rupture that threatened the very existence of the Union, it would, I am sure, be as beautiful to Lincoln as it would be inspiring to Douglas if they could return here to-day and see this country, once so torn in fratricidal strife, bleeding at every pore, clashing with its every resource, now reunited and bound together by ties of mutual affection, brotherly love, and common interest, and cemented by the blood of the sons of both North and South and sealed with the treasure of the sentiments and aspirations of a common people."

RECESS.

Mr. CURTIS. I ask that the unanimous-consent order be carried out and the Senate take a recess until to-morrow at 11 o'clock a. m.

The PRESIDING OFFICER. Pursuant to the unanimous-consent agreement heretofore entered into, the Senate stands in recess until 11 o'clock a. m. to-morrow.

The Senate thereupon (at 6 o'clock and 5 minutes p. m.) took a recess until to-morrow, Tuesday, August 29, 1922, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

MONDAY, *August 28, 1922.*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou God, our heavenly Father, for every blessing we offer Thee praise and thanksgiving. Amid the war of elements, the wreck of matter, and the crash of worlds our lives are full of the mercy of the Lord and our days are made secure by Thy care. Thy eye is upon us for our good and Thy hand is laid upon us for our defense. With patient step help us to move onward day by day, breathing a sweeter, purer air from a higher altitude of earthly achievement. In all our labors, plans, and purposes, O may Thy spirit say unto us: This is the way, walk ye in it; and may we love to do so. In Jesus' name. Amen.

The Journal of the proceedings of Saturday, August 26, 1922, was read and approved.

ORDER OF BUSINESS.

Mr. MONDELL. Mr. Speaker, I anticipate that on to-morrow we shall have before us for consideration the coal distribution bill. That is a very important measure, and will probably consume, at least, two days. Next Monday is unanimous-consent and suspension day. It is also Labor Day. I doubt if we have a quorum on that day. There are quite a number of bills of some importance that ought to be considered that are on the Unanimous-Consent Calendar; and I ask unanimous consent that in lieu of unanimous-consent day on Monday next we have a day for consideration of Unanimous-Consent Calendar immediately following consideration of the coal distribution bill, not to interfere with conference reports. That will probably be on Thursday.

Mr. DYER. Of this week?

Mr. MONDELL. Of this week.

Mr. STAFFORD. I assume the gentleman means the day following the completion of the consideration of the coal distribution bill?

Mr. MONDELL. Yes.

The SPEAKER. The gentleman from Wyoming asks unanimous consent that, in lieu of Monday next, the business that would then be in order on the Unanimous-Consent Calendar be assigned for the day following the completion of the bill to be reported by the Committee on Interstate and Foreign Commerce.

Mr. MOORE of Virginia. Mr. Speaker, the other day the gentleman from Wyoming said he expected that, following the enactment of the bill that was then under consideration, providing for the appointment of a coal commission, and the enactment of the bill of which he now speaks, the coal distribution bill, the House would enter upon a recess. I, for one, in view of the situation that exists in the country, was very much surprised and astonished at that statement. Everybody knows the extremely critical situation that confronts us. A great many think that the Congress ought to deal with it further than by the enactment of the two measures referred to. I believe personally we would be running away from our duty to leave here in such a crisis. And to quote, in substance, the language of Senator Borah in the Senate last Saturday, I do not believe we will dare to go away. I will ask my friend whether he still contemplates that, after the very limited and inadequate legislation that is proposed, represented by the two bills mentioned, he still expects to bring about, or endeavor to bring about, a recess of the House without anything further being done?

Mr. MONDELL. Mr. Speaker, it does not make much difference what the "gentleman from Wyoming" might expect to be able to do. The entire matter is in the hands of the House. The House will adjourn or recess when it is proper to do it under the conditions that exist at this time. At the time I made the statement that the gentleman refers to the anthracite coal and the railway shopmen strikes seemed to be in a fair way to early settlement and it looked as though it might be entirely possible to take a short recess pending the report of the conference committee having charge of the tariff bill. In view of the changed situation of affairs, and the fact that the committee of conference will probably be able to report much more promptly than we had anticipated, I do not at this time believe there is likely to be any recess, unless it may be for two or three days, until the conference report on the tariff bill shall have been disposed of.

Mr. MOORE of Virginia. I would like to say to my friend one word further. I do not think—and I speak as a very unimportant Member of the House, one who is only authorized to speak for himself—I do not think that, in view of the critical situation, we ought to be marking time to the extent that is now the case. I think that at least the entire situation in its legal aspects, which is now, as I understand, being dealt with to some extent by the Committee on Interstate and Foreign Commerce in its economic and business aspects, ought to be taken up and given speedy consideration by the Committee on the Judiciary.

Mr. MONDELL. Mr. Speaker, all of these observations are very interesting, but they do not bear at all, I may say to my friend from Virginia, on the very reasonable request that I made that after the consideration of the bill, which I understand is to be reported from the Committee on Interstate and Foreign Commerce to-day, we shall have one day for the consideration of bills on the Unanimous-Consent Calendar. I think all matters to which the gentleman from Virginia refers will be considered. I know the House is not disposed to stand in recess or to adjourn at any time when there is any probability of the need of action relative to any matter of importance. The statement I made a few days ago related to a situation in which the skies seemed to be clearing.

Mr. MOORE of Virginia. The other day a member of the Cabinet said—and I almost agree with him—that he regarded the present situation as the most serious we have had in 50 years. If that is true, it strikes me that we ought to be trying to do something concrete and definite. Because not only is the present peril and prospective peril to the country very great but it is most regrettable. I do not say this as a partisan, because I would not make any suggestion at this time of a partisan kind, that the country is losing confidence in the Government, and it behooves us to recognize our responsibility and duty to go forward and endeavor to do something to mitigate the evils that exist and are so dangerous and threatening, and to strengthen the confidence of the public.

Mr. MONDELL. That is exactly what the Committee on Interstate and Foreign Commerce is now considering, and what the House will consider as soon as that committee reports. If further legislation seems essential to meet the situation we shall consider it. I trust it will not.

Mr. GARNER. Mr. Speaker, further reserving the right to object, I want to say that I am surprised that my friend from Virginia [Mr. MOORE] has not observed sufficiently to know that the Republican organization does not know what it wants to do, and after it determines what it wants to do, it does not know whether it can do it or not. So he does not need to be disturbed about the present conditions. They only illustrate what has been in vogue for the past 12 months and which probably will continue. There seems to be no harmony of action between this body and another body or between it and the Executive.

Mr. HICKS. Mr. Speaker, regular order.

Mr. GARNER. I will ask for the regular order myself if the gentleman from New York wants me to, but the gentleman can not take a few jibes, because his skin is very thin. It will be thicker before he gets through.

Mr. MONDELL. I hope the gentleman from New York will not demand the regular order. The remarks of the gentleman from Texas are perfectly harmless. Gentlemen should not be disturbed.

Mr. GARNER. The skin of the gentleman from Wyoming is thick enough, but the skin of these gentlemen from New York is entirely too thin. The gentleman from Wyoming asks unanimous consent to set aside unanimous-consent day and use some other day. He ought to be able to tell the House if he expects to move to suspend the rules and consider important legislation. It is unfair to the minority and unfair to the House to set aside next Monday and take up some other day for the purpose of taking up something that might be of a partisan nature. If the gentleman from Wyoming will tell this side of the House what he expects to consider under suspension of the rules, if anything, I shall not object; but I shall insist that it is only fair to this House to know what he expects to consider under suspension of the rules.

The SPEAKER. The gentleman will please suspend a moment to enable the Chair to receive a message from the Senate.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had insisted upon its amendments to the bill (H. R. 10248) authorizing the sale of surplus power developed under the Salt River reclamation project, Arizona, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. McNARY, Mr. JONES of Washington, and Mr. SHEPPARD as the conferees on the part of the Senate.

The message also announced that the Senate had passed joint resolution (S. J. Res. 238) authorizing the Federal Reserve Bank of St. Louis to enter into contracts for the erection of a building for its branch office in Little Rock, Ark., in which the concurrence of the House of Representatives was requested.

The message also announced that the Senate had passed with amendment the bill (H. R. 7425) for the relief of Zah Barmon, in which the concurrence of the House of Representatives was requested.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3917. An act to amend section 876 of the Revised Statutes.

SENATE JOINT RESOLUTION REFERRED.

Under clause 2, Rule XXIV, Senate joint resolution of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. J. Res. 238. Joint resolution authorizing the Federal Reserve Bank of St. Louis to enter into contracts for the erection of a building for its branch office in Little Rock, Ark.; to the Committee on Banking and Currency.

ORDER OF BUSINESS.

Mr. RAYBURN: Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RAYBURN. I desire to know what is contained in the unanimous-consent request of the gentleman from Wyoming.

The SPEAKER. The Chair stated it a moment ago.

Mr. RAYBURN. I was not here.

The SPEAKER. The gentleman from Wyoming asked unanimous consent, on the completion of the bill which is to be reported from the Committee on Interstate and Foreign Commerce, which is expected to be taken up to-morrow, that on the day following the completion of that bill a day shall be set apart for unanimous-consent and suspension business instead of Monday next, Labor Day.

Mr. MONDELL. I will say to the gentleman from Texas that the matter of suspension is a matter that rests with the Speaker. I have not discussed with him the question of suspension. I have not had in mind at any time any special legislation. I think there is a bill, one that I have in mind, which has been

agreed to by the Committee on Banking and Currency, having to do with the construction of a Federal reserve bank building. I imagine that that would not be objected to.

Mr. GARNER. Mr. Speaker, will the gentleman yield to a question?

Mr. MONDELL. But that is a matter which——

The SPEAKER. The Chair, who has control over suspension, would state that he has no program as to suspension, and is willing to agree, if it will facilitate the agreement, that he will recognize no motions for suspension without the consent of the gentleman from Tennessee [Mr. GARRETT].

Mr. GARNER. Mr. Speaker, I do not want to be ugly about the matter, but I want to call the attention of the Speaker and of the gentleman from Wyoming and of the House to this affair: If you agree to set aside Monday and substitute some other day, and the gentlemen will notify their friends to be here and suspend the rules and pass any bill, I think a better procedure is for the entire House to understand what the program is, because when unanimous consent requests are submitted that is the only opportunity we have to find out about these matters. That is the reason why I asked the question.

The SPEAKER. Is there objection to the request of the gentleman from Wyoming?

Mr. GARRETT of Tennessee. Mr. Speaker, I do not understand that that means that Calendar Wednesday will be set aside?

Mr. MONDELL. No; but I think I shall make that request.

Mr. GARRETT of Tennessee. The gentleman does not intend to make that request to-day, does he?

Mr. MONDELL. I do not know that I shall. We hope, however, to secure a rule for the consideration of the coal distribution bill, when Calendar Wednesday would be utilized for that purpose under the rule.

Mr. GARRETT of Tennessee. I do not object to the other request.

The SPEAKER. Is there objection?

There was no objection.

Mr. GARRETT of Tennessee. I do not object if it is understood that it does not set aside Calendar Wednesday now; that is, under this agreement.

DISTRICT OF COLUMBIA BUSINESS.

The SPEAKER. To-day is District day. The gentleman from Pennsylvania is recognized.

CLOSING UPPER WATER STREET.

Mr. FOCHT. Mr. Speaker, I call up Senate bill 813.

The SPEAKER. The gentleman from Pennsylvania calls up the bill which the Clerk will report.

The Clerk read as follows:

A bill (S. 813) to authorize the Commissioners of the District of Columbia to close upper Water Street between Twenty-first and Twenty-second Streets NW.

Be it enacted, etc., That the Commissioners of the District of Columbia are hereby authorized to close upper Water Street between Twenty-first and Twenty-second Streets NW., lying between Potomac Park and square 88, provided that the consent in writing of the owners of all private property in square 88 is first had and obtained; and upon the closing of said street between the limits named the Commissioners of the District of Columbia are authorized to transfer the land contained in the bed of said street to the Chief of Engineers, United States Army, as a part of the park system of the District of Columbia.

BILL CREATING ADDITIONAL JDUGES—APPOINTMENT OF A CONFEREE.

The SPEAKER. The Chair will appoint as a member of the conference on the bill creating additional judges, in place of Mr. WALSH, resigned, Mr. DYER, of Missouri.

CLOSING UPPER WATER STREET.

Mr. FOCHT. Mr. Speaker, this bill, S. 813, has been passed by the Senate and has been reported unanimously by the Committee on the District of Columbia of the House. It provides for the closing of the street between Twenty-first and Twenty-second Streets, north of B Street. This street really has never been used for traffic purposes. At the present time it is virtually what might be called an ash dump. It is, of course, Government property, and it is desired by the National Academy of Sciences, an organization which for many years has been accumulating a fund for the construction of a building, of which I have the blue prints here, if Members desire to see them, also a blue print showing that portion of the street which it is desired to be closed. The National Academy of Sciences now has something in excess of $1,000,000, and immediately upon the passage of this legislation they will proceed with the construction of the building. I believe most of the Members are familiar with the legislation, since it has been here for several years, and I doubt whether any further explanation is necessary. I, therefore, Mr. Speaker, move the previous question.

The SPEAKER. The gentleman from Pennsylvania moves the previous question on the bill to the final passage.

The previous question was ordered.

The bill was ordered to a third reading, and was accordingly read the third time, and passed.

On motion of Mr. FOCHT, a motion to reconsider the vote by which the bill was passed was laid on the table.

DWELLINGS IN ALLEYS IN THE DISTRICT OF COLUMBIA.

Mr. FOCHT. Mr. Speaker, I call up the bill (S. 2597) to amend an act entitled "An act to provide, in the interest of public health, comfort, morals, and safety, for the discontinuance of the use as dwellings of buildings situated in the alleys of the District of Columbia," approved September 25, 1914.

The SPEAKER. The gentleman from Pennsylvania calls up the bill which will be reported by the clerk.

The bill was read as follows:

Be it enacted, etc., That the operation of the second paragraph of section 1, relating to the use or occupation of alley buildings as dwellings, of the act of Congress approved September 25, 1914, entitled "An act to provide, in the interest of public health, comfort, morals, and safety, for the discontinuance of the use as dwellings of buildings situated in the alleys in the District of Columbia," be, and the same hereby is, postponed until June 1, 1923.

Mr. FOCHT. Mr. Speaker, this is a measure postponing the date of the taking effect of an act which we passed in 1914, providing that after November 10 next all alley houses in the District of Columbia—of which there are something like 3,000, occupied by approximately 10,000 tenants, most of them colored—should be vacated and no longer used for residence purposes. On account of the war and the demand for places of abode and the exactions upon builders in the District of Columbia the commissioners report that it will be absolutely impossible to find housing for any part even of these 10,000 colored people who ultimately, when these alley houses are abandoned, must necessarily move to remoter portions of the District. This bill proposes to extend until next year the time of the taking effect of this law. It is regarded as very serious emergency legislation.

Mr. STAFFORD. Will the gentleman yield to me?

Mr. FOCHT. I yield to the gentleman from Wisconsin.

Mr. STAFFORD. In reading the report I notice that a special committee was appointed by the commissioners to investigate housing conditions to which this bill applies, and that that committee recommended within a couple of months the postponement of the enforcement of this act for two years instead of one. As I read the report, in the eight years since this law was enacted nothing has been done to correct the conditions pertaining to closed alleys. Those of us who were here during the war period remember distinctly the occasion for this legislation. It had the warm support of Mrs. Ellen Wilson, the first wife of our former President. She was deeply interested in correcting the dwelling conditions in the blind alleys in the District of Columbia. That bill as enacted forbade the continuation of living in these dwellings in blind alleys after December 1, 1918. In November, 1918, that postponement was extended until one year after the proclamation of peace with Germany. Now it is proposed to extend it until June 1, 1923. If nothing has been done in these eight years, what prospect is there that anything will be done between the date when this extension takes effect and June 1 next? The commissioners present the serious situation confronting them and confronting the District so far as housing for these 9,000 colored people is concerned. I believe that altogether there are some 2,000 dwellings affected by this law. We have good ground to believe that if conditions in the country improve as we hope they will, the Congress will not be in session after March 4 next until after the date of the expiration of this remedial legislation. If such is the fact, what will be the imminent condition confronting the commissioners on the date when the law takes effect and the people living in these blind alleys have to move out of their dwellings? This special committee appointed by the District Commissioners has requested that the date be extended two years.

The Senate date provides for an extension of less than one year. I present to the serious consideration of the chairman of the committee who brings in this bill to the exigent conditions that will confront the many dwellers in these blind alleys if Congress is not in session between March 4 and the date when this bill virtually compels these people to move out on June 1 next.

Mr. FOCHT. Unless we pass this bill they will have to move out sooner than that.

Mr. STAFFORD. Yes, but I am calling the attention of the gentleman to the condition that will arise if Congress is not in session. What are you going to do?

Mr. STEPHENS. Why not extend it two years?

Mr. STAFFORD. It will not be possible to grant any extension of time then, because Congress will probably not be in session. Now why should not the Committee on the District of Columbia follow the recommendation of this special committee appointed by the commissioners?

This is certainly a most serious condition, Mr. Speaker. According to the letter of the commissioners to the committee, the commissioners are considering remedial legislation, which I suppose involves the idea of condemning certain property, so that instead of these alleys remaining blind alleys they will be thoroughfares extending from street to street, as the original law intends; but nothing has been done in eight years. I wish emphatically to call the attention of the chairman of the committee to the fact that if Congress is not in session after March 4 next and before June 1 there will be a critical condition as far as the housing situation is concerned when these people are ejected from their habitations, with no place provided for them to go.

Mr. STEPHENS. Why not amend this bill so as to extend the time two years?

Mr. FOCHT. Mr. Speaker, it may be that there was more enthusiasm than judgment in the fixing of the time when this law should take effect. The proposition to remove these houses and have the people in better living quarters is a meritorious one, but there seems to have been a failure to appreciate the length of time it would take to overcome existing conditions. Now we all agree that an alley is a poor place for human habitation; but when my friend from Wisconsin [Mr. STAFFORD] speaks of blind alleys I do not quite understand what he means. My idea of a blind alley would be one which had only one means of entrance and exit, so that when you went into it you would have to come back to the same place to get out.

Mr. STAFFORD. That is the case.

Mr. FOCHT. Under the fire regulations there is no such thing as a blind alley; they are not permissible. After some little investigation which I made I came to the conclusion that these houses are not so bad after all, except as to their location in the alleys. You will find in European cities people calling themselves aristocrats and rich living on streets not half as wide as these so-called alleys. If these people want to live in close proximity to their employment, around the various circles, which is central for them, as it is claimed, and with the alleys paved or concreted it would be for their convenience. That is their business. Although I would like to see it emphasized, I think the men owning these houses would feel more comfortable if their tenants lived in a different quarter. The only object and purpose of this bill is to meet an emergency, so that the present law will not expire on the 10th of November; and in the meantime we hope the housing situation will be different; that we will have some legislation that will be broader and more comprehensive, and not such as this Senate bill. It is impossible to clean out the alleys and make parks of them; to remove 3,000 buildings and find accommodations for 10,000 people, all of them employed, and many by the Representatives of the House and the Senate and the Government.

Mr. STAFFORD. The gentleman from Pennsylvania states that this bill in its essence does not apply to blind alleys. The gentleman is not acquainted with the fundamental purpose of the bill. The report and everything embodied in the bill was to correct the conditions arising out of blind alleys. The report of the housing committee appointed by the commissioners refers to that condition. It does not relate to these alleys and thoroughfares that have entrance from street to street; the very proposal of the District Commissioners is to work out a scheme whereby they can open up the blind alleys, which their own letter in the report on the bill shows are dens of vice and immorality. That is the problem. If they were not blind alleys, this bill would not be before the House.

Mr. FOCHT. The blind alleys have all been opened. This bill proposes to move the houses away and make parks of the land.

Mr. STAFFORD. A special committee recommends that the blind alleys be opened, and nothing has been done. I am surprised that the gentleman is not acquainted with the real purpose of the bill reported by him for consideration of the House.

Mr. FOCHT. Mr. Speaker, I move the previous question.

The previous question was ordered.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. FOCHT, a motion to reconsider the vote whereby the bill was passed was laid on the table.

ACACIA MUTUAL LIFE ASSOCIATION.

Mr. FOCHT. Mr. Speaker, I call up the bill (H. R. 11116) to amend an act entitled "An act to incorporate the Masonic Mutual Relief Association of the District of Columbia," approved March 3, 1869, as amended.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 1 of an act entitled "An act to incorporate the Masonic Mutual Relief Association of the District of Columbia," approved March 3, 1869, as amended, be amended by striking out the words "The Masonic Mutual Life Association of the District of Columbia" and substituting therefor the words "Acacia Mutual Life Association" as the name of the association, so that as amended it shall read "Acacia Mutual Life Association."

That sections 2, 3, 4, and 5 of such act be amended to read as follows:

SEC. 2. That membership in this association shall be limited to Master Masons, and that the business and objects of the association shall be to provide and maintain a fund for the benefit of the member, his family, widow, orphans, heirs, assignees, legatees, distributees, dependents, or other beneficiaries, and for this purpose it shall and may be lawful for the association to make all and every insurance appertaining to or connected with life or disability risks of whatever kind or nature and to grant, purchase, or dispose of annuities, and to furnish any aid or service to promote the health or safety of its members or their beneficiaries: *Provided, however*, That the association shall forever be conducted for the mutual benefit of its members and their beneficiaries, and not for profit, and that in the exercise of the powers hereinbefore enumerated it shall be subject to the supervision imposed by the laws of the District of Columbia relating to mutual life insurance companies.

SEC. 3. That the number of directors of said association shall be fixed by the by-laws and shall be at least 21, a number of whom, less than a majority, shall be elected by the members at the annual meeting of the association from among themselves for a term of three years; that in all cases of a tie vote the choice shall be determined by lot, and in all other cases a plurality vote shall decide. The annual meeting of the association shall be held at such time and place as provided in the by-laws. The directors shall elect from their number at their first meeting succeeding the annual meeting of the members a president of the association and a vice president, and shall elect from the members of the association a secretary and a treasurer, and from time to time such additional officers as the by-laws may provide. The president, the vice president, the secretary, and the treasurer shall each give bond with surety to the association in such sum as the board of directors may require for the faithful performance of his duties. At all meetings of the board of directors 12 of the board shall form a quorum. In case of any vacancy in the board of directors by death, resignation, or otherwise, such vacancy shall be filled by the remaining directors from among the members of the association to serve for the remainder of the unexpired term.

SEC. 4. That the directors shall have full power to make and prescribe such by-laws, rules, and regulations as they shall deem needful and proper for the disposition and management of the business, funds, property, and effects of the association not contrary to this charter or to the laws of the United States, and they shall have power to alter or amend the same as the interests of the association, in their opinion, may require.

SEC. 5. That nothing herein contained shall be construed to affect or impair in any manner whatsoever any vested right or interest existing in or under any contract of the association.

Mr. FOCHT. Mr. Speaker, this bill was passed at the last session and there was some objection made to it as to the designation of the institution. The request was made and the President vetoed it. The objections offered at that time have been met by an amendment, and the bill has been unanimously reported by the committee. If any Member desires any further explanation, the author of the bill is present and has every detail and will be glad to furnish whatever is desired to enlighten the membership of the House. If there is no question, Mr. Speaker, I move the previous question.

The previous question was ordered.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion by Mr. FOCHT, a motion to reconsider the vote whereby the bill was passed was laid on the table.

REMOVAL OF SNOW AND ICE FROM SIDEWALKS IN THE DISTRICT OF COLUMBIA.

Mr. FOCHT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 3086).

The Clerk read the title of the bill as follows:

S. 3086. An act providing for the removal of snow and ice from the paved sidewalks of the District of Columbia.

Mr. GARRETT of Tennessee. Why does not the gentleman ask that the bill be considered in the House in the Committee of the Whole?

Mr. FOCHT. Mr. Speaker, following the suggestion of the gentleman from Tennessee, I withdraw my motion to go into the Committee of the Whole House on the state of the Union and ask unanimous consent for the consideration of the bill in the House as in Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That it shall be the duty of every person, partnership, corporation, joint-stock company, or syndicate in charge or control of any building or lot of land within the fire limits of the District of Columbia, fronting or abutting on a paved sidewalk, whether as owner, tenant, occupant, lessee, or otherwise, within the first eight hours of daylight after the ceasing to fall of any snow or sleet, to remove and clear away, or cause to be removed and cleared away, such snow or sleet from so much of said sidewalk as is in front of or abuts on said building or lot of land.

SEC. 2. That it shall be the duty of the Commissioners of the District of Columbia, within the first eight hours of daylight after the ceasing to fall of any snow or sleet, or after the accumulation of ice on the paved sidewalks within the fire limits of the District of Columbia, in front of or adjacent to all public buildings, public squares, reservations, and open spaces in the said District owned or held by lease by said District, to cause such snow, sleet, and ice to be removed; and also to cause the same to be removed from all crosswalks of improved streets and places of intersection of alleys with paved sidewalks, and also from all paved sidewalks or crosswalks used as public thoroughfares through all public squares, reservations, or open spaces within the fire limits of said District owned or held by lease by the District of Columbia; but in the event of inability to remove such accumulation of snow, sleet, and ice without injury to the sidewalk, by reason of the hardening thereof, it shall be their duty, within the first eight hours of daylight after the hardening thereof, to make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon, such paved sidewalks, crosswalks, and places of intersection of alleys with paved sidewalks, and shall, as soon thereafter as the weather shall permit, thoroughly clean, or cause to be thoroughly cleaned, said sidewalks, crosswalks, and places of intersection of alleys with paved sidewalks.

SEC. 3. That it shall be the duty of the Chief Engineer of the United States Army, within the first eight hours of daylight after the ceasing to fall of any snow or sleet, or after the accumulation of ice upon the paved sidewalks within the fire limits of the District of Columbia, to remove or cause to be removed from such sidewalks as are in front of or adjacent to all buildings owned or leased by the United States, except the Capitol buildings and grounds and the Congressional Library building and from all paved sidewalks or crosswalks used as public thoroughfares in front of, around, or through all public squares, reservations, or open spaces within the fire limits of the District of Columbia, owned or leased by the United States, such snow, sleet, and ice; but in the event of inability to remove such accumulation of snow, sleet, and ice, by reason of the hardening thereof, without injury to the sidewalk, it shall be his duty, within the first eight hours of daylight after the hardening of such snow, sleet, and ice, to make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon, such paved sidewalks and crosswalks, and shall, as soon thereafter as the weather shall permit, thoroughly clean said sidewalks and crosswalks.

SEC. 4. In case the snow, sleet, and ice can not be removed from so much of the paved sidewalks within the fire limits of the District of Columbia as front upon or abut such buildings or lots of land as are not owned or held by lease by the District of Columbia or the United States without injury to said sidewalks, because of the hardening thereof, the person, partnership, corporation, joint-stock company, or syndicate in charge or control of such buildings or lots of land, whether as owner, tenant, occupant, lessee, or otherwise, shall, within the first eight hours of daylight after the same has formed, make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon, said sidewalks, and shall, as soon thereafter as the weather shall permit, thoroughly clean said sidewalks.

SEC. 5. That in the event of the failure of any person, partnership, corporation, joint-stock company, or syndicate to remove or cause to be removed such snow or ice from the said sidewalks, or to make the same reasonably safe for travel, or cause the same to be made reasonably safe for travel, as hereinbefore provided, it shall be the duty of the Commissioners of the District of Columbia, as soon as practicable after the expiration of the time herein provided for the removal thereof, or for the making of the said sidewalks reasonably safe for travel, to cause the snow and ice in front of such building or lot of land to be removed or to cause the same to be made reasonably safe, as hereinbefore directed to be done by such person, partnership, corporation, joint-stock company, or syndicate in charge or control of such building or lot of land, and the amount of the expense of such removal or such work of making the said sidewalks reasonably safe for travel, shall in each instance be ascertained and certified by the said commissioners to the corporation counsel of the District of Columbia.

SEC. 6. That the corporation counsel is hereby directed and authorized to sue for and recover from such person, partnership, corporation, joint-stock company, or syndicate the amount of such expense in the name of the District of Columbia, together with a penalty not exceeding $25 for each offense, with costs, and when so recovered the amount shall be deposited to the credit of the District of Columbia.

SEC. 7. That in order to enable the said commissioners and the Chief of Engineers of the United States Army to comply with their duties under this act and to carry it into effect there is hereby appropriated the sum of $10,000, one-half out of the general revenue fund of the District of Columbia and the other one-half out of any moneys in the Treasury not otherwise appropriated.

The following committee amendment was read:

On page 3, line 10, after the comma, insert "except the Capitol Buildings and Grounds and the Congressional Library Building."

The Clerk proceeded to read the bill.

Mr. STAFFORD (interrupting the reading). Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentlemen will state it.

Mr. STAFFORD. Where a bill is considered in the House as in Committee of the Whole, is it not necessary to have the bill read a first time?

The SPEAKER. The Chair thinks that the reading by title is the first reading.

Mr. STAFFORD. I was laboring under the impression that all bills have to be read a first time That is the rule whether the bill be a House bill or a Union Calendar bill. At some time bills must be read the first time.

The SPEAKER. The Chair thinks it is read the first time by title.

Mr. STAFFORD. Mr. Speaker, then I ask unanimous consent that the first section of the bill may be considered for amendment.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent that the first section of the bill may be considered for amendment. Is there objection?

There was no objection.

The first section of the bill is as follows:

Be it enacted, etc., That it shall be the duty of every person, partnership, corporation, joint-stock company, or syndicate in charge or control of any building or lot of land within the fire limits of the District of Columbia, fronting or abutting on a paved sidewalk, whether as owner, tenant, occupant, lessee, or otherwise, within the first eight hours of daylight after the ceasing to fall of any snow or sleet, to remove and clear away, or cause to be removed and cleared away, such snow or sleet from so much of said sidewalk as is in front of or abuts on said building or lot of land.

Mr. STAFFORD. Mr. Speaker, I move to strike out the last word for the purpose of directing an inquiry to the gentleman from Pennsylvania [Mr. FOCHT]. I noticed throughout this bill that it is purposed only to apply to buildings and tracts of land within the fire limits of the District of Columbia. As I understand, the fire limits of the District of Columbia are somewhat restricted. They are not coextensive by any means with the residential district. For instance, the fire limits do not extend to Cleveland Park, and they do not extend into many of the other residential districts. Why should not you make it applicable to the entire District where there are dwellings? If we are to legislate at all, we should legislate for the entire District. To just say that this shall apply to the District within the fire limits, those limits being restricted, is not passing legislation that is meeting the demands and needs of the people so far as the removal of ice and snow from the sidewalks is concerned. The people in Cleveland Park are just as much entitled to that relief and are just as much interested in ingress and egress to and from the District of Columbia as the people living in the city proper.

Mr. ZIHLMAN. Mr. Speaker, Cleveland Park is in the fire limits.

Mr. STAFFORD. The gentleman says that Cleveland Park is in the fire limits. He is much better acquainted with District matters than I am, because he is on the District Committee and his congressional district adjoins the District of Columbia, but, as I remember it, when I last examined the map of the District that showed the fire limits Cleveland Park and the residential districts in that neighborhood were not within those limits. It is true that they are within the limits so far as fire protection is concerned, but "fire limits" has a meaning quite different from merely fire protection.

The fire limit means where they must have a special character of building, so far as construction is concerned, and I think upon reflection and investigation the gentleman will come to the conclusion that the entire part or the major part of Cleveland Park is not within the fire limits of the District.

Mr. FOCHT. I will say to the gentleman that in drawing this bill it was the intention that there should be a certain prescribed limitation and that the fire limits should be that zone of limitation. Although the gentleman is so thoroughly acquainted with blind alleys, probably he does not know so much about the rural or rustic scenery of the District or he would know that there are 25 farms in this District of Columbia, and the gentleman surely would not compel the snow to be shoveled from in front of them.

Mr. STAFFORD. Mr. Speaker, I can not permit such an imputation to be cast upon me by the gentleman from Pennsylvania without challenging it. I wish to say that I do not ride in an automobile through the wide boulevards of Washington, but I walk, and I walk in the suburbs. I know the conditions that exist. I do not know as much about blind alleys as the gentleman, who has made a full investigation. My information was based entirely upon the report. I do not confess to having gone any further than that. The gentleman stated, when that bill was under consideration, that he had personal information about the conditions referred to. I yield in my judgment as far as blind alleys are concerned to the expert opinion of the distinguished gentleman from Pennsylvania.

Mr. STEPHENS. How about blind tigers?

Mr. STAFFORD. A question has been suggested about blind tigers. Once upon a time, Mr. Speaker, I did not have any acquaintance with those particular denizens of the jungle, but since the incoming of the illiberal, narrow, intolerant, and what not bill that takes away my liberties so that I can no longer indulge in an innocent drink of harmless beer in this city——

Mr. FOCHT. Oh, that only proves that the gentleman is quite unacquainted with the town.

Mr. STAFFORD. Where before I saw open, reputable saloons now I see merely a reminder of that kind known as speak-easies that were familiar in Kansas and North Dakota when I visited those States years back, when they attempted to enforce prohibition against the will of the constituency, but I yield to the gentleman from Pennsylvania because I know he is more acquainted with blind tigers than I am. My only acquaintance with blind tigers since the reign of Volsteadism is from the outside.

Mr. CLARKE of New York. Does the gentleman not think that before the reign of Volsteadism he might have seen double?

Mr. STAFFORD. No; I must say there is more chance of my seeing double since the reign of Volsteadism, because prior to that time I limited my beverages to a good wholesome glass of beer. I can not honestly say that to this date that has been the case. Since the reign of Volsteadism I am afraid to indulge in anything that is disposed of in these blind tigers because of the numerous instances of poisoning which have developed since this great reform.

Mr. DOWELL. Mr. Speaker, I move to strike out the last word. May I inquire of the chairman of the committee if he knows the fire limits of the city of Washington? Are they fixed by regulation of the commissioners or by statute enacted by Congress?

Mr. FOCHT. My impression is that that is a matter regulated by the commissioners, and they extend the limits as the various commercial and residential zones are extended. They have fire plugs in all those sections.

Mr. DOWELL. If this legislation is limited to the fire limits, that would mean an indefinite territory.

Mr. FOCHT. It would not include the farms in the outlying districts.

Mr. DOWELL. It would include anything that the commissioners might desire to place within the fire limits, and they may do that by regulation?

Mr. FOCHT. I think so.

Mr. STAFFORD. I question very seriously whether this would extend to residential districts, say, out on Wisconsin Avenue. As I stated, it has been some years since I saw a map showing the fire limits of the District.

They are rather limited, indeed. The purpose of the fire limits of the District of Columbia is to limit the character of the construction of buildings. I am strongly of the opinion that some good reason should be advanced why this bill should not be made coextensive with the parts of the District where there are sidewalks.

Mr. DOWELL. That is what I wanted to ask. What was the idea of the committee in limiting this? Why should not the streets outside of the fire limits be cleared?

Mr. FOCHT. There is great speculation in real estate in the District of Columbia. The first thing the real estate speculator does to make things look attractive is not to build a house, but a sidewalk. There are some miles of such sidewalks in the District of Columbia, with no one going to work or coming home from work over them. But down in the congested part, where you and I walk, they are so tired or so utterly lack civic pride as not to clear their walks, and that is what we want to reach. I hope that no one will object to this bill.

Mr. DOWELL. I want to pass this bill, but I do not want to protect the speculator the gentleman has referred to, and if the speculator is merely building sidewalks to speculate upon why not make him keep them clean?

Mr. FOCHT. I will not object to any amendment that will enlarge the purport of the bill.

Mr. DOWELL. Mr. Speaker, I move to amend by striking out "fire," on line 5, page 1, of the bill. This will leave the bill to be coextensive with the city——

The SPEAKER. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. DOWELL: Page 1, line 5, strike out the word "fire."

Mr. MOORE of Virginia. Mr. Speaker, the gentleman from Iowa has just said the intent of his amendment is to make the bill coextensive with the limits of the city of Washington. What are the limits of the city of Washington?

Mr. FOCHT. There is no such thing as the city of Washington.

Mr. MOORE of Virginia. We have the District of Columbia. I do not know what are the boundaries to the city of Washington, if there are any.

Mr. FOCHT. The gentleman has not the knowledge of this matter that my friend from Wisconsin [Mr. STAFFORD] has. He used the word "Washington." There is no incorporated institution known as the "city of Washington." He means the District of Columbia.

Mr. MOORE of Virginia. May I have the attention of the gentleman a little further. His amendment ranges all over the District of Columbia——

Mr. DOWELL. I can answer that. It will apply only where there are sidewalks. This applies merely to sidewalks. And if the sidewalks in the city of Washington or the District of Columbia are not kept clean this is a provision to require it.

Mr. MOORE of Virginia. The gentleman will remember that a good deal of the District of Columbia is in the country. Nevertheless there are sidewalks there. I am not contesting his view. I merely ask him if he wants to apply the law throughout the District.

Mr. DOWELL. I want to so apply it. It is a very simple thing to clean a sidewalk of snow on a long strip where it is outside the congested part of the city. They can draw an apparatus over it in a very few minutes and clear the snow off. It is a very simple thing and is not an expensive matter, either. And with that in view it seems to me that if there are sidewalks inside the city or in the District that are not kept clean, we ought to require the owners to keep them free of snow. That is why I offer my amendment.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. LOWREY. Division, Mr. Speaker.

The House divided, and there were—ayes 4, noes 32.

So the amendment was rejected.

The SPEAKER. The Clerk will read.

The Clerk concluded the reading of the bill.

Also, the following committee amendment was read:

Page 3, line 10, after the word "States" insert the words:

Except the Capitol Buildings and Grounds and the Congressional Library Building.

The SPEAKER pro tempore (Mr. HICKS in the chair). The question is on the committee amendment.

Mr. STAFFORD. Mr. Speaker, I wish to inquire, in connection with the committee amendment, whether the committee considered extending the exception to other buildings than the Capitol Buildings and the Congressional Library Building?

Mr. FOCHT. The idea was to include the Botanic Garden, and that is the only one, I believe, in addition. I will offer an amendment to include the Botanic Garden.

Mr. STAFFORD. I do not yield for that purpose.

Mr. FOCHT. Let the gentleman offer it.

Mr. STAFFORD. I wish to inquire in that particular whether the committee considered excepting, for instance, the power plants of the Government right down here within a few blocks of the Capitol?

Mr. FOCHT. Are there any sidewalks there?

Mr. STAFFORD. I do not know whether there are or not. As far as excepting the Congressional Library is concerned, I do not know who would be expected to remove the snow. I wish to refer to an incident of about four years ago when we had a very heavy snow and the snow remained on the sidewalks around the Congressional Library for several days. They had a force there to do it, but the Superintendent of the Library at that time did not see fit to have the snow removed from the sidewalks around the building. Unless there is a new superintendent that has more desire for the convenience of the travel of pedestrians than the one that was formerly in office, I do not know whether we would go very far there in having the snow removed from around the Library Building by exempting it from the provisions of this bill.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. CHINDBLOM. Did we not recently pass a bill here to transfer the control of the Congressional Library to the Superintendent of the Capitol?

Mr. STAFFORD. We did. I expect we will have better service since the work of supervising the Library of Congress has now been referred to the former superintendent of the Capitol who is now the architect.

Mr. CHINDBLOM. The Congressional Library will be in as good hands as the Capitol itself.

Mr. STAFFORD. It will. And we can testify that so far as the removal of snow and ice from around the Capitol Building is concerned it has always been removed very expeditiously.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

Mr. STAFFORD. Mr. Speaker, I wish to offer an amendment to the amendment. After the committee amendment insert "and United States Botanic Garden."

The SPEAKER pro tempore. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD to the committee amendment: Page 3, line 11, after the word "buildings," insert the words "and United States Botanic Gardens."

Mr. STAFFORD. And also to strike out the second "and" in the committee amendment and insert a comma.

The SPEAKER pro tempore. The gentleman from Wisconsin offers an addition to his amendment, which the Clerk will report.

The Clerk read as follows:

Addition to amendment offered by Mr. STAFFORD: Strike out the second word "and" in the committee amendment in line 11 and insert a comma.

Mr. MANN. Why the amendment?

Mr. STAFFORD. It was stated by the chairman of the committee in response to an inquiry that the Botanic Garden had their own force of men to keep the sidewalks clear, and that they have always kept their walks clear. We do not wish to impose that burden upon the Chief Engineer of the Army. This amendment excepts from the general scope the sidewalks around the buildings that the Army engineer will not supervise.

Mr. MANN. As a matter of fact, not of law, do not the custodians of all these public buildings remove the snow from all the sidewalks?

Mr. STAFFORD. I had an amendment prepared to cover that.

Mr. MANN. If they remove it, then the Army engineer will not.

Mr. STAFFORD. This bill is imposing a burden upon the Army engineer, and this amendment relieves him of a certain part of that burden.

Mr. MANN. Somebody has the responsibility of removing the snow. Of course, this will not remove the snow.

Mr. STAFFORD. If we are going to relieve any official or employee of a duty and transfer it to another official or employee, you may be assured that that work will be shifted on to the other employee or official.

Mr. MANN. Not at all. You could not pass a bill requiring private owners to remove the snow unless you put the responsibility upon somebody to remove the snow from Government-owned buildings. Nobody would defend such a bill, and it would not be legal anyhow. I suppose that is the reason for doing this. It would not affect the practice any.

Mr. STAFFORD. The gentleman from Illinois was evidently outside the Chamber a moment ago when I cited an instance four years ago, where there was a heavy snow, and the snow was not removed from the sidewalks around the Library of Congress. They shirked their duty.

Mr. MANN. They did not have the money.

Mr. STAFFORD. They shirked the duty. It was the duty of the janitors and the like to do that. They did not care enough for the convenience of the public. All they were concerned in was in being nicely housed in that display house of the country.

Mr. MANN. The trouble is that they have not the money. We never give them the money. They will not do the work themselves. They can not, and the Chief of Engineers can not go out himself and remove the snow; and he does not get the money to do it. We preserve the legality of the bill by imposing the responsibility of removing the snow from the public property while requiring it to be removed from private property. That is the purpose, as I understand.

Mr. STAFFORD. I know that the Superintendent of the Botanic Garden has horses and a snowplow, and he invariably removes the snow on the walks within the Botanic Garden and also the walks on the outside. We are excepting the Botanic Garden. This is intended to take the Capitol and the Library of Congress from the scope of the duty of the Chief of Engineers to do this work.

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from Wisconsin.

The question was taken, and the Speaker pro tempore announced that the "noes" seemed to have it.

Mr. STAFFORD. Mr. Speaker, I ask for a division.

The SPEAKER pro tempore. A division is demanded.

The House divided; and there were—ayes 6, noes 19.

So the amendment was rejected.

The SPEAKER pro tempore. The question now is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The Clerk will read.

Mr. CHINDBLOM. Mr. Speaker, I move to strike out the last word.

The SPEAKER pro tempore. The gentleman from Illinois moves to strike out the last word.

Mr. CHINDBLOM. I do so for the purpose of asking the chairman of the committee whether by any possibility the Government may have any leases for property where the leases provided that the owner of the property shall have anything to do with the removal of snow and ice.

Mr. FOCHT. I do not know anything about it.

Mr. CHINDBLOM. If that is the case, of course, in this bill we relieve the owner of the property of any responsibility in that regard, because this bill provides that it shall be the duty of the Chief of Engineers of the United States Army to remove the snow from sidewalks around Government buildings or adjacent thereto—buildings owned or leased by the United States Government. Has the committee inquired whether such lessees shall have any responsibility in the matter of the removal of snow?

Mr. FOCHT. I can not answer as to that.

The SPEAKER pro tempore. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk resumed and completed the reading of the bill.

Mr. FOCHT. Mr. Speaker, I move the third reading of the Senate bill as amended.

The SPEAKER pro tempore. The question is on the third reading of the Senate bill as amended.

The Senate bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. FOCHT, a motion to reconsider the vote whereby the Senate bill was passed was laid on the table.

CLAIMS FOR MATERIAL AND LABOR FURNISHED THE DISTRICT OF COLUMBIA.

Mr. FOCHT. Mr. Speaker, I ask unanimous consent to call up the bill (H. R. 5027) to amend an act approved February 28, 1899, entitled "An act relative to the payment of claims for material and labor furnished for District of Columbia buildings."

The SPEAKER pro tempore. The gentleman from Pennsylvania asks unanimous consent for the present consideration of the bill H. R. 5027.

Mr. FOCHT. And I ask that it be considered in the House as in Committee of the Whole.

Mr. MANN. What is the bill?

Mr. WINGO. Let the bill be reported.

The SPEAKER pro tempore. The Clerk will report the bill by title.

The Clerk read the title of the bill (H. R. 5027) to amend an act approved February 28, 1899, entitled "An act relative to the payment of claims for material and labor furnished for District of Columbia buildings."

The SPEAKER pro tempore. Is there objection?

Mr. WINGO. Reserving the right to object, will the gentleman explain what this bill is?

Mr. FOCHT. I will yield to the gentleman from Wisconsin.

Mr. STAFFORD. Mr. Speaker, this is a bill to make the same provision for the benefit of material men or laborers engaged in work on Government buildings in the District of Columbia, either in construction or repair work, as is applicable in the case of Government buildings outside the District.

Mr. GARRETT of Tennessee. Is it a Senate bill?

Mr. STAFFORD. No; it is a House bill.

Mr. GARRETT of Tennessee. It has not passed the Senate?

Mr. STAFFORD. No.

Mr. GARRETT of Tennessee. Is there anything emergent about it?

Mr. STAFFORD. I would not say that it is emergent.

Mr. GARRETT of Tennessee. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER pro tempore. Will the gentleman withhold that a moment?

Mr. GARRETT of Tennessee. I will withhold it for a moment.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. DREWRY (at the request of Mr. BLAND of Virginia), indefinitely, on account of sickness in his family.

To Mr. LANKFORD, for two days, on account of sickness.

ADJOURNMENT.

Mr. STAFFORD. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER pro tempore. The gentleman from Wisconsin moves that the House do now adjourn.

Mr. GARRETT of Tennessee. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 120, nays 57, not voting 250, as follows:

YEAS—120.

Andrews, Nebr.	Fairfield	Kelly, Pa.	Patterson, N. J.
Barbour	Faust	Ketcham	Purnell
Begg	Fenn	Kissel	Reece

Mr. Ackerman (for) with Mr. Wright (against).

Mr. Brooks of Pennsylvania (for) with Mr. McSwain (against).

Mr. Gahn (for) with Mr. Stevenson (against).

Miss Robertson (for) with Mr. Stedman (against).

Mr. Olpp (for) with Mr. Thomas (against).

Mr. Williams of Illinois (for) with Mr. Logan (against).

Mr. Reed of New York (for) with Mr. Johnson of Mississippi (against).

Mr. Strong of Pennsylvania (for) with Mr. McClintic (against).

Mr. Watson (for) with Mr. Davis of Tennessee (against).

Mr. Paige (for) with Mr. Garrett of Texas (against).

Mr. Rhodes (for) with Mr. Kunz (against).

Mr. Steenerson (for) with Mr. Dominick (against).

Mr. Webster (for) with Mr. Linthicum (against).

Mr. Rodenberg (for) with Mr. Tucker (against).

Mr. Edmonds (for) with Mr. Ward of North Carolina (against).

Mr. Morin (for) with Mr. Upshaw (against).

Mr. Kirkpatrick (for) with Mr. O'Brien (against).

Mr. Darrow (for) with Mr. Martin (against).
Mr. Crowther (for) with Mr. Wise (against).
Mr. Graham of Pennsylvania (for) with Mr. Montague (against).
Mr. McArthur (for) with Mr. Jacoway (against).
Mr. Lehlbach (for) with Mr. Ten Eyck (against).
Mr. Funk (for) with Mr. Goldsborough (against).
Mr. Burroughs (for) with Mr. Fisher (against).
Mr. Kiess (for) with Mr. Fulmer (against).
Mr. King (for) with Mr. O'Connor (against).
Mr. Temple (for) with Mr. Fields (against).
Mr. Treadway (for) with Mr. Drewry (against).
Mr. Cooper of Ohio (for) with Mr. Larsen of Georgia (against).

Mr. COLE of Iowa. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. COLE of Iowa. No; I was not.

The SPEAKER. This is not a quorum call. The gentleman is not entitled to vote.

Mr. HOOKER. Mr. Speaker, I should like to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. HOOKER. I was not.

The SPEAKER. The gentleman does not qualify.

Mr. BLACK. Mr. Speaker, I desire to be recorded present if I may do so.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. BLACK. I was not.

The SPEAKER. The gentleman can not be recorded.

Mr. BOX. I desire to vote, Mr. Speaker. I was present but was not listening.

The SPEAKER. Then the gentleman can not vote.

Mr. BOX. Do I understand the Speaker to rule that I can not be recorded as present?

The SPEAKER. There is no rule that allows it unless the gentleman was present and listening when his name was called.

Mr. CABLE. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. CABLE. I was not.

The SPEAKER. The gentleman does not qualify.

The result of the vote was announced as above recorded.

Accordingly (at 1 o'clock and 42 minutes p. m.) the House adjourned until Tuesday, August 29, 1922, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. VOLSTEAD: Committee on the Judiciary. S. 3618. An act to amend section 135 of the Judicial Code; with amendments (Rept. No. 1195). Referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII,

Mr. MOORE of Virginia introduced a resolution (H. Res. 417) requesting the Committee on the Judiciary to consider without delay certain emergency legislation and to report the same to the House at the earliest possible time, which was referred to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FAUST: A bill (H. R. 12484) granting a pension to Charles M. Cornelius; to the Committee on Invalid Pensions.

By Mr. MORGAN: A bill (H. R. 12485) granting an increase of pension to Sarah L. Murphy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12486) granting a pension to Eliza Oldham; to the Committee on Invalid Pensions.

By Mr. MORIN: A bill (H. R. 12487) for the relief of A. S. Guffey; to the Committee on Claims.

By Mr. FULLER: A resolution (H. Res. 416) to pay Norman E. Ives $1,200 for extra and expert services to the Committee on Invalid Pensions; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

6242. By Mr. ANSORGE: Petition of Henry Johnson and three other parties, of New York City, indorsing the Towner-Sterling bill; to the Committee on Education.

6243. By Mr. KISSEL: Petition of New York State Legislative Board, Albany, N. Y., urging the repeal of title 3 of the transportation act of 1920; to the Committee on Interstate and Foreign Commerce.

6244. Also petition of Grain Trade Association of San Francisco Chamber of Commerce, San Francisco, regarding prohibition results in San Francisco, Calif.; to the Committee on the Judiciary.
